TABLES OF ABBREVIATIONS.

tr............transit or translated. By itself it means "English translation", or "translated into English by". Where a translation is into any other language, the language is stated.

tr., tract........tractate.
v..............see (Lat. vide).
Ven............Venerable.
Vol............Volume.

II.—ABBREVIATIONS OF TITLES.
Acta SS............Acta Sanctorum (Bollandists).
Ann. pont. cath....Battandier, Annuaire pontifical catholique.

Diet. d'arch. chrét...Cabrél (ed.), Dictionnaire d'archéologie chrétienne et de liturgie.

Hast., Dict. of the
Bible............Hastings (ed.), A Dictionary of the Bible.
Kirchenlex........Wetzer and Welte, Kirchenlexicon.
P. G.............Migne (ed.), Patres Graci.
Vig., Dict. de la Bible.Vigouroux (ed.), Dictionnaire de la Bible.

NOTE I.—Large Roman numerals standing alone indicate volumes. Small Roman numerals standing alone indicate chapters. Arabic numerals standing alone indicate pages. In other cases the divisions are explicitly stated. Thus "Rashdall, Universities of Europe, I, ix" refers the reader to the ninth chapter of the first volume of that work; "I, p. ix" would indicate the ninth page of the preface of the same volume.

NOTE II.—Where St. Thomas (Aquinas) is cited without the name of any particular work the reference is always to "Summa Theologica" (not to "Summa Philosophiae"). The divisions of the "Summa Theol." are indicated by a system which may best be understood by the following example: "I-II, Q. vi, a. 7, ad 2 un" refers the reader to the seventh article of the sixth question in the first part of the second part, in the response to the second objection.

NOTE III.—The abbreviations employed for the various books of the Bible are obvious. Ecclesiasticus is indicated by Eccles., to distinguish it from Ecclesiastes (Eccles.). It should also be noted that 1 and 11 Kings in D. V. correspond to I and II Samuel in A. V.; and I and II Par. to I and II Chronicles. Where, in the spelling of a proper name, there is a marked difference between the D. V. and the A. V., the form found in the latter is added, in parentheses.

Diocese (Lat. diœcesis), the territory or churches subject to the jurisdiction of a bishop (q. v.).

I. Origin of Term.—Originally the term diocese (Gr. διοικησις) signified management of a household, thence administration or government in general. This term was soon used in Roman law to designate the territory dependent for its administration upon a city (civitas). What in Latin was called 

ager, or territorium, namely a district subject to a city, was habitually known in the Roman East as a diœcesis. But as the Christian bishop generally resided in a civitas, the territory administered by him, being usually contiguous with the juridical territory of the city, came to be known ecclesiastically by its usual civil term, diocese. This name was also given to the administrative subdivision of some provinces ruled by legates (legati) under the authority of the governor of the province. Finally, Diocletian designated by this name the twelve great divisions which he established in the empire, and over each of which he placed a vicarius (Paulus-Wissowa, Real-Encyclopadie der classischen Alterthums-wissenschaft, Stuttgart, 1903, V, 1, 716 sqq.). The original term for local groups of the faithful subject to a bishop was έκκλησία (church), and at a later date, παροιχία, i. e. the neighbourhood (Lat. parocchia, parochia). The Apostolic Canons (xiv, xv), and the Council of Nicesa in 325 (can. xvi) applied this latter term to the territory subject to a bishop. This term was retained in the East, where the Council of Constantinople (381) reserved the word diocese for the territory subject to a patriarch (can. ii). In the West also parochia was long used to designate an episcopal see. About 850 Leo IV, and about 1093 Urban II, still employed parochia to denote the territory subject to the jurisdiction of a bishop. Alexander III (1159-1181) designated under the name of parochian i the subjects of a bishop (c. 4, C. X, qu. 1; c. 10, C. IX, qu. 2; c. 9, X, De testibus, II, 20). On the other hand, the present meaning of the word diocese is met with in Africa at the end of the fourth century (ce. 50, 51, C. XVI, qu. 1), and afterwards in Spain, where the term parochia, occurring in the ninth canon of the Council of Antioch, held in 341, was translated by "diocese" (c. 2, C. IX, qu. 3). See also the ninth canon of the Synod of Toledo, in 589 (Hefele, ad h. an. and c. 6, C. X, qu. 3). This usage finally became general in the West, though diocese was sometimes used to indicate parishes in the present sense of the word (see Parish). In Gaul, the words terminus, territorium, civitas, pagus, are also met with.

II. Historical Origin.—It is impossible to determine what rules were followed at the origin of the Church in limiting the territory over which each bishop exercised his authority. Universality of ecclesiastical jurisdiction was a personal prerogative of the Apostles; their successors, the bishops, enjoyed only a jurisdiction limited to a certain territory: thus Ignatius was Bishop of Antioch, and Polycarp, of Smyrna. The first Christian communities, quite like the Jewish, were established in towns. The converts who lived in the neighbourhood naturally joined with the community of the town for the celebration of the Sacred Mysteries. Exact limitations of episcopal territory could not have engrossed much attention at the beginning of Christianity; it would have been quite impracticable. As a matter of fact, the extent of the diocese was determined by the domain itself over which the bishop exercised his influence. It seems certain, on the other hand, that, in the East at any rate, by the middle of the third century each Christian community of any importance had become the residence of a bishop and constituted a diocese. There were bishops in the country districts as well as in the towns. The chorepiscopi (ἐκ χώρας εσωκομοι), or rural bishops, were bishops, it is generally thought, as well as those of the towns; though from about the second half of the third century their powers were little by little curtailed, and they were made dependent on the bishops of the towns. To this rule Egypt was an exception; Alexandria was for a long time the only see in Egypt. The number of Egyptian dioceses, however, multiplied rapidly during the third century, so that in 320 there were about a hundred bishops present at the Council of Alexandria. The number of dioceses was also quite large in some parts of the Western Church, i.e. in Southern Italy and in Africa. In other regions of Europe, either Christianity had as yet a small number of adherents, or the bishops reserved to themselves supreme authority over extensive districts. Thus, in this early period but few dioceses existed in Northern Italy, Gaul, Germany, Britain, and Spain. In the last, however, their number increased rapidly during the third century. The multiplication of the faithful in small towns and country districts soon made it necessary to determine exactly the limits of the territory of each church. The cities of the empire, with their clearly defined suburban districts, offered limits that were easily acceptable. From the fourth century on it was generally admitted that every city ought to have its bishop, and that his territory was bounded by that of the neighbouring city. This rule wasstringently applied in the East. Although Innocent I declared in 113 that the Church was not bound to conform itself to all the civil divisions which the imperial government chose to introduce, the Council of Chalcedon ordered (151) that if a civitas were dismembered by imperial authority, the ecclesiastical organization ought also to be modified (can. xvii). In the West, the Council of Sardica (314) forbade in its sixth canon the establishment of dioceses in towns not populous enough to render desirable their elevation to the dignity of episcopal residences. At the same time many Western sees included the territories of several civitates.

From the fourth century we have documentary evidence of the manner in which the dioceses were created. According to the Council of Sardica (can. vi),
this belonged to the provincial synod; the Council of Carthage, in 407, demanded moreover the consent of the primate and of the bishop of the diocese to be divided (canons iv and v). The consent of the pope or the emperor was not called for. In 446, however, Pope Leo I ruled that dioceses should not be established except in large towns and populous centres (c. 4, Dist. lxxx). In the same period the Apostolic See was active in the creation of dioceses in the Burgundian kingdom and in Italy. In the latter country many of the sees had no other metropolitan than the pope, and were thus more closely related to him. Even clearer is his role in the formation of the diocesan system in the northern countries newly converted to Christianity. After the first successes of St. Augustine in England, Gregory the Great provided for the establishment of two metropolitan sees, each of which included two dioceses. In Ireland, the diocesan system was introduced by St. Patrick, though the diocesan territory was usually coextensive with the tribal lands, and the system itself was soon peculiarly modified by the general extension of monasticism (see Ireland). In Scotland, however, the diocesan organization dates only from the twelfth century. To the Apostolic See also was due the establishment of dioceses in that part of Germany which had been evangelized by St. Boniface. In the Frankish Empire the boundaries of the dioceses followed the earlier Gallo-Roman municipal system, though the Merovingian kings never hesitated to modify or change the limits established by the civil authorities. In Italy, the diocesan system was established by the popes. St. Peter Damian proclaimed (1059–60) this as a general principle (c. 1, Dist. xxii), and the same is affirmed in the well-known “Dictatus” of Gregory VII (1075–1085). The papal decreets (see DECRETALS, PAPAL) consider the creation of a new diocese as one of the “causae majores,” I.e. matters of special importance, reserved to the pope alone (c. 1, X, De translatione episcopi, c. 1, X, De translatione episcopi). The creation of a diocese, which he is the sole judge (c. 5, Extrav. communes, De prebendis et dignitatisibus, III, 2). A word of mention is here due to the missionary or regional bishops, episcopi gentium, episcopi (archiepiscopi) in gentibus, still found in the eleventh century. They had no fixed territory or diocese, but were sent into a country or district for the purpose of evangelizing it. Such were St. Boniface in Germany, St. Augustine in England, and St. Willibrord in the Netherlands. They were themselves the organizers of the diocese, after their apostolic labours had produced happy results. The bishops met with in some monasteries of Gaul in the earlier Middle Ages, probably in imitation of Irish conditions, had no administrative functions (see BELLES-Lettres, d. kath. Kirche in Irland, I, 226–30; and Löning, bd. 902). III. CREATION AND MODIFICATION OF DIOCESES.—We have noticed above that after the eleventh century the sovereign pontiff reserved to himself the creation of dioceses. In the actual discipline, as already stated, all that touches the diocese is a causa major, I.e. one of those important matters in which the bishop possesses authority whatever and which, if he choose, he may reserve to himself. Since the episcopate is of Divine institution, the pope is obliged to establish dioceses in the Catholic Church, but he remains sole judge of the time and manner, and alone determines what flock shall be entrusted to each bishop. Generally speaking, the diocese is a territorial circumscription, but sometimes the bishop possesses authority only over certain classes of persons residing in the territory; this is principally the case in districts where both the Western and the Eastern Rite are followed. Whatever, therefore, pertains to the creation or suppression of dioceses, changes in their boundaries, and the like is within the pope’s exclusive province. As a general rule, the preparatory work is done by the Congregation of the Consistory, by Propaganda when the question relates to territories subject to this congregation, and by the Congregation of Extraordinary Ecclesiastical Affairs when the establishment of a diocese is governed by concordats (q. v.), or when the civil power of the country has the right to intervene in their creation. We shall take up successively (1) the creation of new dioceses; (2) the various modifications to which the diocese is subject, included by canonists under the term Innovatio. (1) Creation of Dioceses.—Strictly speaking, it is only in missionary countries that there can be question of the creation of a diocese, either because the country was never converted to Christianity or because its ancient hierarchy was suppressed, owing to conquest by infidels or the progress of heresy. Regularly, before becoming a diocese, the territory is successively a mission, a prefecture Apostolic, and finally a vicariate Apostolic. The Congregation of Propaganda makes a preliminary study of the question and passes judgment on the opportuneness of the creation of the diocese in question. It considers principally whether the number of Catholics, priests, and religious establishments, i.e. churches, chapels, schools, is sufficiently large to justify the establishment of a diocese. These matters form the subject of a report to Propaganda, to which must be added the number of towns or settlements included in the territory. If there is a city suitable for the episcopal see, the fact is stated, also the financial resources at the disposal of the bishop for the works of religion. There is, finally, a study of the character of the territory, indicating the territory of the future diocese. As a general rule, a diocese should not include districts whose inhabitants speak different languages or are subject to distinct civil powers (see Instructions of Propaganda, 1798, in Collectanea S. C. de P. F. Rome, 1907, no. 645). Moreover, the general conditions for the creation of a diocese are the same as those required for providing “dismembering” a diocese. Of this we shall speak below. (2) Modification (Innovatio) of Dioceses.—Under this head come the division (dismemberment) of dioceses, their union, suppression, and changes of their respective limits. (a) Division or Dismemberment of a Diocese.—This is reserved to the Holy See. Since the pope is the supreme power in the Church, he is not bound to act in conformity with the canonical enactments which regulate the dismemberment of ecclesiastical benefices. The following rules, however, are those which he generally observes, though he is free to deviate from them.—First, to divide a diocese, a sufficient reason must exist (causa justa). The necessity, or at least the utility, of the change must be demonstrated. There is sufficient reason for the subdivision of a diocese if it be too extensive, or the number of the faithful too great, or the means of communication too difficult, to permit the bishop to administer the diocese properly. The benefit which would result to religion (incrementum cultus divinit) may also be brought forward as a reason for the change. The pope is either made use of the hope of forwarding the interests of Catholicism. Dissections between inhabitants of the same diocese, or the fact that they belong to different nations, may also be considered a sufficient reason. Formerly, the mere fact that the endowment of a diocese was very large—a case somewhat rare at the present day—formed a legitimate reason for its division. The second condition is suitability of place (lucus congruus). There should exist in the diocese to be cre-
DIACONESE

ated a city or town suitable for the episcopal residence; the ancient discipline which rules that sees shall be established only in important localities is still observed.

Third, a proper endowment (dos congrua) is requisite. The bishop should have at his disposal the resources necessary for his own maintenance and that of the ecclesiastics engaged in the general administration of the diocese, and for the establishment of a cathedral church, the expenses of which are in the general administration of the diocese. Formerly it was necessary that in part, at least, this endowment should consist in lands; at present this is not always possible. It suffices if there is a prospect that the new bishop will be able to meet the necessary expenses. In some cases, the civil government grants a subsidy to the bishop; in other cases, he must depend on the liberality of the faithful and on a contribution from the parishes of the diocese, known as the cathedraticum (q. v.).

Fourth, generally for the division of a diocese the consent of the actual incumbent of the benefice is requisite; but the pope is not bound to observe this condition. John XXII ruled that the pope had the right to proceed to the division of a diocese in spite of the opposition of the bishop (c. 5, Extrav. commun., Decr. 10, 1338). As a rule, the pope asks the advice of the archbishop and of all the bishops of the ecclesiastical province in which the diocese to be divided is situated. Often, indeed, the division takes place at the request of the bishop himself.

Fifth, theoretically the consent of the civil power is not required; this would be contrary to the principles of the distinction and mutual independence of the ecclesiastical and civil authority. In some countries, however, the consent of the civil authority is indispensable, either because the Government has pledged itself to endow the occupants of the episcopal sees, or because concordats have regulated this matter, or because a suspicious government would not permit a bishop to administer the new diocese if it were created without civil intervention (see Naldini, Conventiones de rebus ecclesiasticis, Rome, 1859, pp. 19 sqq.). At present, the creation or division of a diocese is done by a pontifical Brief, forwarded by the Secretary of Briefs. As an example, we may mention the Brief of 11 March, 1904, which divided the Diocese of Providence and established the new Diocese of Fall River. The motive prompting this division was the invenirementum religionis et the majus bonum etiamiam; the plan was approved by the pope, and this request was approved by the Archbishop of Boston and by all the bishops of that ecclesiastical province. The examination of the question was submitted to Propaganda and to the Apostolic Delegate at Washington. The pope then created, mutu proprio, the new diocese, indicated its official title in Latin and in English, and determined its boundaries, which correspond to political divisions, and, finally, fixed the revenues of the bishop. In the case before us these consist in a moderate cathedraticum to be determined by the bishop (discreto arbitrio episcopi imponendum). According to the practice of Propaganda, all the priests who at the time of the division exercised the ministry in the dismembered territory belonged to the clergy of the new diocese (Rescript of 13 Aug., 1891, in Collectaneae S. C. del P. F. , etc., no. 1751).

(b) Union of Dioceses.—As in the case of the division of a diocese, the union of several dioceses ought to be justified by motives of public utility, e. g. the small number of the faithful, the loss of resources. As in the case of division, the pope is influenced by the advice of persons familiar with the situation; sometimes he asks the opinion of the Government, etc. It is a generally recognized principle in the union of benefices, that such union takes effect only after the death of the actual occupant of the see which is to be united to another; at least when he has not given his consent to this union. Though the pope is not bound by this rule, in practice it must be taken into account. The union of dioceses is taken into account. There is, first, the uno anse principalis or aequalis when the two dioceses are entrusted for the purpose of administration to a single bishop, though they remain in all other respects distinct; each of them has its own cathedral chapter, revenues, rights, and privileges, but the bishop of one see becomes the bishop of the other by the mere fact of appointment. In this way two dioceses divided by ipso facto resigning the other. This situation differs from that in which a bishop administers for a time, or even perpetually, another diocese; in this case there is no union between the two sees. It is in reality a case of plurality of ecclesiastical benefices; the bishop holds two distinct sees, and his nomination must take place according to the rules established for each of the two dioceses. On the contrary, in the case of two or more united dioceses, the election or designation of the candidate must take place by the agreement of those persons in both dioceses who possess the right of election or of designation. Moreover, in the case of united dioceses, the pope sometimes makes special rules for the residence of the bishop, e. g. that he shall reside in each diocese one part of the year. If the bishop of the diocese is absent, in this matter, the bishop may reside in the more important diocese, or in that which seems more convenient for the purposes of administration, or even in the diocese which he prefers as a residence. If the bishop resides in one of his dioceses he is considered as present in each of them for those juridical acts which demand his presence. He may also convocate at his discretion two separate diocesan assemblies for each of the two dioceses or only one for both of them. In other respects the administration of each diocese remains distinct. There are two classes of unequal unions of dioceses (uniones inaequalia): the uno subjectiva or per accessorium, seldom put into practice, and the uno per confusionem. In the former case, the one diocese retains all its rights and the other loses its rights, obtains those of the principal diocese, and thus becomes a dependency. When a diocese is thus united to another there can be no question of right of election or designation, because such a dependent diocese is conferred by the very fact that the principal diocese possesses a titular. But the administration of the property of each diocese remains distinct and the titular of the principal diocese is also the principal in the united diocese. The second kind of union (per confusionem) suppresses the two pre-existing dioceses in order to create a new one; the former dioceses simply cease to exist. To perpetuate the names of the former sees the new bishop sometimes assumes the titles of both, but in administration no account is taken of the fact that they were formerly separate sees. Such a union is equivalent to the suppression of the dioceses.

(c) Suppression of Dioceses.—Suppression of dioceses, properly so called, in a manner other than by union, takes place only in countries where the faithful and the clergy have been dispersed by persecution, the ancient dioceses becoming missions, prefectures, or vicariates Apostolic. This has occurred in the Orient, in England, in the Netherlands, etc. Changes of this nature are not regulated by canon law.

(d) Change of Boundaries.—This last mode of innato is made by the Holy See, generally at the request of the bishops of the two neighbouring dioceses. Among the sufficient reasons for this measure are the difficulty of communication, the existence of a high mountain or of a large river, dioceses between the inhabitants of one part of the diocese, also the fact that they belong to different countries. Sometimes a re-settlement of the boundaries of two dioceses is necessary because the limits of each are not clearly defined. Such a settlement is made by a Brief, sometimes also
by a simple *decretum* or decision of the Congregation of the Consistory approved by the pope, without the formality of a Bull or Brief.

IV. **DIFFERENT CLASSES OF DIOCESES.**—There are several kinds of dioceses. There are dioceses properly so called and archdioceses (q.v.). The diocese is the territorial circumscription administered by a bishop; the archdiocese is placed under the jurisdiction of an archbishop. The Consistory of the Holy Office, or Bull of Indulgence, is the form of dispensation. But the power of their pastors alone is different. Generally, several dioceses are grouped in an ecclesiastical province and are subject to the authority of the metropolitan archbishop. Some, however, are said to be exempt, i.e., from any archiepiscopal jurisdiction, and are placed directly under the authority of the Holy See. Such are the dioceses of the ecclesiastical provinces of Rome and several other dioceses or archdioceses, especially in Italy, also in other countries. The exempt archbishops are called titular archbishops, i.e., they possess only the title of archbishop, have no suffragan bishops, and administer a diocese. The term "titular archbishop", it is to be noted, is also applied to bishops who do not administer a diocese, but who have been made titular bishops to be invested with an episcopal dignity or archiepiscopal. For the better understanding of this it must be remembered that archdioceses and dioceses are divided into titular and residential. The bishop of a residential see administers his diocese personally and is bound to reside in it, whereas the titular bishops have only an episcopal title; they are called vicars Apostolic, auxiliary bishops, administrators Apostolic, nuncios, Apostolic delegates, etc. (see *Titular Bishop*). Mention must also be made of the suburbanarum dioceses (dioceses suburbicariae), i.e., the six dioceses situated in the immediate neighbourhood of Rome and each of which is administered by one of the six cardinal-bishops. These form a special class of dioceses, the titulars or occupants of which possess certain special rights and obligations (see *Suburbanarum Dioceses*).

V. **Nomination, Translation, Renunciation, and Resignation.**—The general rules relating to the nomination of a residential bishop will be found in the article *Bishop*. They are applicable whatever may have been the cause of the vacancy of the diocese, except in the case of a contrary order of the Holy See. The Church admits the principle of the perpetuity of ecclesiastical benefices. Once invested with a see the bishop continues to hold it until his death. There are, however, exceptions to this rule. The bishop may be allowed by the pope to resign his see when actuated by motives which do not spring from personal convenience, but from concern for the public good. Some of these reasons are expressed in the canon law; for instance, if a bishop has been guilty of a grave crime (*conscientia criminis*), if he is in failing health (debilitas aetatis), if he has not the requisite knowledge (defectus scientiae), if he has not the consent of the faithful (massa plebis), or if he has been a cause of public scandal (scandalum populii), if he is irregular (irregularitas)—c. 10, X, De renuntiatione, 1, 9; c. 18, X, De regularibus, 111, 32. The pope alone can accept this renunciation and judge of the sufficiency of the alleged reasons. Pontifical authorization is also necessary for the exchange of dioceses between two bishops, which is not allowed except for grave reasons. The same principles apply to the transfer (transferatio) of a bishop from one diocese to another. Canonical legislation compares with the indissoluble marriage the bond which binds the bishop to his diocese. This comparison, however, must not be understood literally. The pope has the power to sever the mystical bond which unites the bishop to his church, in order to grant him another diocese or to promote him to an archiepiscopal see. A bishop may also be deposed from his functions for a grave crime. In such a case the pope generally invites the bishop to resign his own accord, and deposes him only upon refusal. As the Holy See alone is competent to try the kind of a bishop, it follows that the pope alone, or the congregation to which he has delegated the powers of the Propaganda (Congregation of Bishops and Regulars, the Propaganda, sometimes the Inquisition), can inflict this penalty or pronounce the declaratory sentence required when the law inflicts deposition as the sanction of a specified delinquency. Finally, the pope has always the right, strictly speaking, to deprive a bishop of his diocese, even if the latter is not guilty of crime; but for this act there must be grave cause. After the conclusion of the Concordat of 1801 (q.v.) with France, Pius VII removed from their dioceses all the bishops of France. It was, of course, a very extraordinary measure, but was justified by the gravity of the situation.

VI. **ADMINISTRATION OF THE DIOCESE.**—The bishop is the general ruler of the diocese, but in his administration of ecclesiastical affairs he is subject to the Congregation of the Holy Office and the Secretariat of State (see *Bishop*). According to the Council of Trent he is bound to divide the territory of his diocese into parishes, with ordinary jurisdiction (q.v.) for their titulars (Sess. XXIV, c. xiii, De ref.), unless circumstances render impossible the creation of parishes or unless the Holy See has arranged the matter otherwise (Congreg. de Propaganda Fide, v. 31–33). The bishop needs also some auxiliary service in the administration of a diocese. It is customary for each diocese to possess a chapter (q.v.) of canons in the cathedral church; they are the counsellors of the bishop. The cathedral itself is the church where the bishop has his seat (sedes episcopii). The pope reserves to himself the right of authorizing its establishment as well as that of a chapter of canons. In many dioceses, principally outside of Europe, the pope does not establish canons, but gives as auxiliaries to the bishop other officials known as *consultores cleri diocesani*, i.e., the most distinguished members of the diocesan clergy, chosen by the bishop, often in concert with his clergy or some members of it. The bishop is bound to ask the advice of those counsellors, canons or consultants, in the most important matters. In some cases, the right to nullify episcopal action taken without their consent. The *consultores cleri diocesani*, however, possess but a consultative voice (Third Plen. Council of Baltimore, nos. 17–22; Plen. Conc. America Latina, no. 246.—See *Consultors, Diocesan*). After the bishop, the principal authority in a diocese is the vicar-general (*vicarius generalis in spiritualibus*); he is the bishop's substitute in the administration of the diocese. The office dates from the thirteenth century. Originally the vicar-general was called the "official" (*officialis*); even yet *officialis* and *vicarius generalis in spiritualibus* are synonymous. Strictly speaking, there should be in each diocese only one vicar-general. In some countries, however, local custom authorizes the appointment of several vicars-general. The one specially charged with the canonical lawsuits (*jurisdiction contentiosa*), e.g. with criminal actions against ecclesiastics or with matrimonial cases, is still known as the "official"; it must be noted that he is none the less free to exercise the functions of vicar-general in other departments of diocesan administration. A contrary custom prevails in certain countries of Germany, where the "official" possesses only the *jurisdiction contentiosa*, but this is a derogation from the common law. For the temporal administration of the church the bishop may appoint an *economus*, i.e., an administrator. As such functions do not require ecclesiastical jurisdiction, this administrator may be a layman. The choice of a layman fully acquainted

* The Russian bishop for the United States has neither a diocese, properly so called, nor ordinary jurisdiction.
† One of these dioceses has been suppressed by the Russian Government.

* The Apostolic Delegation of Arabia also includes Egypt.
DIOCESE

with the civil law of the country may sometimes offer many advantages. (Second Plenary Council of Baltimore, nos. 29-75.)

In certain very extensive dioceses the pope appoints a vicarius generalis in pontifici@ibus, or auxiliary bishop, whose duty is to supply the place of the diocesan bishop in the exercise of those functions of the sacred ministry which demand episcopal order. In the appointment of this bishop the pope is not bound to observe the special rules for the appointment of a regular bishop, or to divide the diocese in such a manner as to give the bishop no jurisdiction by right of his office; the diocesan bishop, however, can grant them, e.g., the powers of a vicar-general.

The common ecclesiastical law contains no enactments relating to the rights and powers of the chancellor, an official met with in many dioceses (see DIOCESAN CHANCERY). The Second Plenary Council of Baltimore (no. 71) advises the establishment of a chancery in every diocese of the United States. The chancellor is specially charged with the affixing of the episcopal seal to all acts issued in the name of the bishop, in order to prove their authenticity. He appears also in the conduct of ecclesiastical lawsuits, e.g. in matrimonial cases, to prove the authenticity of the alleged documents. Because of the importance of his functions, the chancellor sometimes holds the office of vicar-general in spiritualibus. By episcopal chancery is sometimes understood the office where are written the documents issued in the name of the bishop and to which is addressed the correspondence relating to the administration of the diocese; sometimes also the term signifies the persons employed in the execution of these functions. The taxes or dues which the episcopal chancery may claim for the issuing of documents were fixed by the Council of Trent (Sess. XXI, c. i, De ref.); afterwards by Innocent XI (hence their name Taza Innocentiana), 8 Oct., 1678; finally by Leo XIII, 10 June, 1896.

The fiscal duties of the bishop, also known as promotor or procurator fiscalis, are specially charged with attending to the interests of the diocese in all trials and especially with endeavouring to secure the punishment of all offences cognizable in the ecclesiastical tribunals. An assistant, who is called fiscal advocate (advocatus fiscalis), may be appointed to aid this officer.

Formerly the diocese was divided into a number of archdeaconries, each administered by an archdeacon, possessed of considerable authority in that part of the diocese placed under his jurisdiction. The Council of Trent restricted very much their authority, and since then the office of the archdeacon has gradually disappeared. It exists at the present day only as an honorary title, given to a canon of the cathedral chapter (see ARCHDEACON). On the other hand, the ancient office of vicarius forani, deventi ruralis, or archipresbyteri still exists in the Church (see ARCHPRIEST; DEAN). The division of the diocese into deaneries is not obligatory, but in large dioceses the bishop usually entrusts to certain priests known as deans or vicars forane the oversight of the clergy of a portion of his diocese, and generally delegates to them special jurisdictional powers (Third Plen. Council of Baltimore, nos. 27-28). Finally, by means of the diocesan synod all the clergy participate in the general administration of the diocese. According to the common law, the bishop is bound to assemble a synod every year, to which he must convocate the vicar-general, the deans, the canons of the cathedral, and at least a certain number of parish priests. Here, however, custom and pontifical privileges have departed in some points from the general legislation. In this meeting, all questions relating to the moral and the economic state of the diocese are publicly discussed and settled. In the synod the bishop is the sole legislator; the members may, at the request of the bishop, give their advice, but they have only a deliberative voice in the choice of the examinatores cleri diaecesani, i.e. the ecclesiastics

charged with the examination of candidates for the priaparies (Third Plen. Council of Baltimore, nos. 29-75).

It is because the diocesan statutes have been elaborated and promulgated in a synod that they are sometimes known as statuta synodalitiae. In addition to the general laws of the Church and the enactments of the national or plenary and provincial synods, the bishop may regulate by statutes, that are often real ecclesiastical laws, the particular discipline of each diocese, or fix by means of the general laws the special needs of the diocese. Since the bishop alone possesses all the legislative power, and is not bound to propose in a synod these diocesan statutes, he may modify them or add to them on his own authority.

VII. VACANCY OF THE DIOCESE.—We have already explained how a diocese becomes vacant (see V above); here it will suffice to add a few words touching the administration of the vacant See. In those dioceses where there is a coadjutor bishop with right of succession, the latter, by the fact of the decease of the diocesan bishop, becomes the residential bishop or ordinary (q. v.) of the diocese. Otherwise the government of the diocese during the vacancy belongs regularly to the chapter of the cathedral church. The chapter is the body which must choose, with the consent of the bishop, a vicar general, whose powers, although less extensive, are in kind like those of a bishop. If the chapter does not fulfill this obligation, the archbishop appoints ex officio a vicar capitarl. In dioceses where a chapter does not exist, an administrator is appointed, designated either by the bishop himself before his death, or, in case of his neglect, by the metropolitan or by the senior bishop of a province (see ADMINISTRATOR). The

VIII. CONSPICUOUS OF THE DIOCESAN SYSTEM OF THE CATHOLIC CHURCH.—The accompanying table of the diocesan system of the Church shows that there are at present throughout the world: 9 patriarchates of the Latin, 6 of the Oriental Rites; 6 subdiocesan dioceses; 163 (or 166) with the Patriarchates of Venice, Lisbon, and Goa, are regular ecclesiastical provinces, the dioceses of the Latin, and 20 of the Oriental Rites; 176 dioceses of the Latin, and 52 of the Oriental Rites; 137 vicariates Apostolic of the Latin, and 5 of the Oriental Rites; 55 prefectures Apostolic of the Latin Rite; 12 Apostolic delegations; 21 abbeyes or prelates nullius diocesis, i.e. exempt from the jurisdiction of the diocesan bishop. There are also 89 titular archdioceses and 432 titular dioceses.

DIOCLEA

Dioeclea, a titular see of Phrygia in Asia Minor. Dioeclea is mentioned by Ptolemys (V, ii, 23), where the former editions read Doka; this is probably the name, which must have been hellenized at a later time; in the same way Dioeclea in Dalmaia is more commonly called Dola. The autonomous rights of Dioeclea are proved by its coins struck in the reign of Elagabalus (Head, Hist. Num., 502). It figures in the "Synecdemus" of Hierocles, in Parthey, "Notitia Episcopatum" (I-XI, XIX), and in Gelzer, "Nova Tactica", i. e. as late as the twelfth or thirteenth century, as a bishopric in Phrygia Pictinaea, the metropolis of which was Laodicea. Only two bishops are known, in 431 and 451 (Lequien, Or. Christ., I, 823). An inscription found near Doghla, or Dola, a village in the vilayet of Smyrna, shows that it must be the site of Dioeclea, though there are no ruins.

S. PÉTRIDÈS.

Dioecletian (Valerius Dioecletianus), Roman Emperor and persecutor of the Church, b. of parents who had been slaves, at Dioeclea, near Salona, in Dalmatia, A. D. 245; d. at Salona, A. D. 313. He entered the army and by his markéd abilities attained the offices of Governor of Moesia, consul, and commander of the guards of the palace. In the Persian war, under Carus, he especially distinguished himself. When the son and successor of Carus, Numerian, was murdered at Chaledon, the choice of the army fell upon Dioecletian, who immediately slew with his own hand the murderer Aper (17 Sept., 284). His career as emperor belongs to secular history. Here only a summary will be given. The reign of Dioecletian (284-305) marked an era both in the military and political history of Rome. The triumph which he celebrated together with his colleague Maximian (20 Nov., 303) was the last triumph which Rome ever beheld. Britain, the Rhine, the Danube, and the Nile furnished trophies; but the proudest boast of the conqueror was that Persia, the persistent enemy of Rome, had at last been subdued. Soon after his accession to power, Dioecletian realized that the empire was too vast and too much exposed to attack to be safely ruled by a single head. Accordingly, he associated with himself Maximian, a bold but rude soldier, at first as Caesar and afterwards as Augustus (286). Later on, he further distributed his power by granting the inferior title of Caesar to two generals, Galerius and Constantius (292). He reserved for his own portion Thrace, Egypt, and Italy and Africa, the provinces of Galerius, while Galerius was stationed on the Danube, and Constantius had charge of Gaul, Spain, and Britain. But the supreme control remained in Dioecletian's hands. None of the rulers resided in Rome, and thus the way was prepared for the downfall of the imperial city. Moreover, Dioecletian undermined the authority of the Senate, assumed the dictatorial for the service of the Persian court. After a prosperous reign of nearly twenty-one years, he abdicated the throne and retired to Salona, where he lived in magnificent seclusion until his death.

Dioecletian's name is associated with the last and most terrible of all the ten persecutions of the early Church. Nevertheless it is a fact that the Christians endured all manner of persecution at the hands of his reign. Eusebius, who lived at this time, describes in glowing terms "the glory and the liberty with which the doctrine of piety was honoured", and he extols the clemency of the emperors towards the Christian governors whom they appointed, and towards the Christian members of their households. He tells us that the rulers of the Church "were courted and honoured with the greatest suberviency by all the rulers and governors". He speaks of the vast multitudes that flocked to the religion of Christ, and of the spacious and splendid churches erected in the place of the humbler buildings of earlier days. At the same time he bewails the falling from ancient fervour "of many into the excessive liberty" (Hist. Ecle., VII, 3). Had Diocletian remained sole emperor, he would probably have allowed this toleration to continue undisturbed. It was his subordinate Galerius who first induced him to turn persecutor. These two rulers of the East, at a council held at Nicaeza in 302, resolved to suppress Christianity throughout the empire. The cathedral of Nicaeza was demolished in the same year. An edict was issued "to tear down the churches to the foundations, and to destroy the Sacred Scriptures by fire; and commanding also that those who were in honourable stations should be degraded if they persevered in their adherence to Christianity" (Euseb., op. cit., VIII, 11). Three further edicts (303-304) marked successive stages in the severity of the persecution. The first ordering that the bishops, presbyters, and deacons should be imprisoned; the second that they should be tortured and compelled to sacrifice, which every means to sacrifice: the third including the laity as well as the clergy.

The atrocity of the cruel which these edicts were enforced, and the vast numbers of those who suffered for the faith are attested by Eusebius and the Acts of the Martyrs. We read even of the massacre of the whole population of a town because they declared themselves Christians (Euseb., loc. cit., xi, xii; Lactant., "Div. Institut." V, xi). The abdication of Diocletian (1 May, 305) and the subsequent partition of the empire brought relief to many provinces. In the East, however, where Galerius and Maximian held sway, the persecution continued for a long time. Thus it will be seen that the so-called Diocletian persecution should be attributed to the influence of Galerius; it continued for seven years after Diocletian's abdication. (See Persecutions.)

Dioecletianopolis, a titular see of Palestine Prima. This city is mentioned by Hierocles (Synecdemus, 719, 2), Georgius Cyriacus (ed., Gelzer, 1012), and in some "Notitia Episcopatum", as a suffragan of Cæsarea. Its native name is unknown, and its site is not by any theory identified. One bishop is known, Ele- saus, in 559 (Lequien, Oriens Christianus, 111, 616).

(2) Another Dioecletianopolis was a suffragan see of Philippopolis in Thrace. Its site is unknown. Two bishops are mentioned, Cyriacus in 431, and Epici- tutes in 451 and 458. A third, Elias, in 553, is doubtful (Lequien, op. cit., I, 1161).

(3) Still another Dioecletianopolis was a suffragan of Ptolemais in Thebais Seemunda (Parthey, Notit. Episc., I). This city is also mentioned by Hierocles (op. cit., 732, 3), and by

EMPEROR DIOCLETIAN
(Capitoline Museum, Rome)

T. B. SCANNELL.
Diodorus of Tarsus, date of birth uncertain; d. about A. D. 392. He was of noble family, probably of Antioch. St. Basil calls him a “nursling” of Silvanus, Bishop of Tarsus, but whether this discipleship was at Antioch or at Tarsus is not known. He studied at Athens, then embraced the monastic state. He became head of a monastery in or near Antioch, and St. Chrysostom was his disciple. When Antioch groaned under Arian bishops, he did not join the small party of irreconcilables headed by Paulinus, yet when Bishop Leontius made Aetius a deacon, Diodorus and Flavian threatened to leave his communion and retire to the West, and the bishop yielded. These two holy men, though not priests, taught the people to sing the Psalms in alternate choral fashion (with a scriptural passage throughout the Church), at first in the chapels of the monastery, and then, at Leontius’s invitation, in the churches. When, at length, in 361, the Arian party appointed an orthodox bishop in the person of St. Meletius, Diodorus was made priest. He seems to have written some of his works against the pagans as early as the reign of Julian, for that emperor declared that Diodorus had used the learning of Origenes to mock the immortal gods, who had punished him with sickness of the throat, emaciation, wrinkles, and a hard and bitter life. In the persecution of Valens (361–78), Flavian and Diodorus, now priests, during the exile of Meletius kept the Catholics together, assembling them on the northern bank of the Orontes, since the Arian emperor did not permit Catholic worship within the city. Many times banished, Diodorus in 372, made the acquaintance of St. Basil in Armenia, whither that saint had come to visit Meletius. On the return of the latter to his flock, he made Diodorus Bishop of Tarsus and Metropolitan of Cilicia. Theodosius soon after, in a deacon, named Diodorus and St. Pelagius of Laodicea as norms of orthodoxy for this western Asia at the Council of Antioch in 379 and of Constantinople in 381. Sozomen makes him responsible at the latter council for the proposal of Nectarios as bishop of that city, and represents him as one of the chief movers in the appointment of St. Flavian as successor to Meletius, by which the unhappy schism at Antioch was prolonged.

Diodorus came to Antioch in 380 or later, when St. Chrysostom was already a priest. In a sermon he spoke of Chrysostom as St. John the Baptist, the Voice of the Church, the Rod of Moses. Next day Chrysostom ascended the pulpit and declared that when the people had applauded, he had groaned; it was Diodorus, his father, who was John the Baptist; the Antiochenes could bear witness how he had lived with a pure conscience, having his food among the poor, and persevering in prayer and preaching; like the Baptist, he had taught on the other side of the river, often he had been imprisoned—may, he had been often beheaded, at least in will, for the Faith. In another sermon he likens Diodorus to the martyrs: “See his mortified limbs, his face, having the form of a man, but the expression of an Angel.”

St. Basil in 387 asked Diodorus to disown a fictitious letter circulated in his name, permitting marriage with a deceased wife’s sister. In the following year he criticizes the rhetorical style of the longer of two treatises sent him by Diodorus, but gives warm praise to the shorter. Diodorus’s style is praised by Chrysostom, Theodoret, and Photius, but of his very numerous writings only a few unimportant fragments have been preserved, chiefly in Castren (q. v.). He wrote against some of the heresies and still more against heathen philosophy. Photius gives a detailed summary of his eight books “de Fato”; they were evidently very dull from a modern point of view. According to Leontius he composed commentaries on the whole Bible. St. Jerome says that these were imitations of those of Eusebius of Emesa, but less distinguished by secular learning. Diodorus rejected the allegorical interpretation of the Alexandrians, and adhered to the literal sense. In this he was followed by his disciple Theodore of Mopsuestia, and by Chrysostom in his unequalled expositions. The Antiochene School of which he was the leader was discredited by the subsequent heresies of Nestorius, of whom his disciple Theodore of Mopsuestia was the precursor.

Theodoret wrote to excommunicate Diodorus, but St. Cyril declared him a heretic. The damning passages cited by Marius Mercator and Leontius seem, however, to belong to a work of Theodore, not of Diodorus; nor was the latter condemned when Theodore and passages of Theodoret and Ibas (the three Chapters) were condemned by the Fifth General Council (553). In that synod Diodorus was too far in his opposition to (the younger) Apollinaris of Laodicea, according to whom the rational soul in Christ was supplied by the Logos. Diodorus, in emphasizing the completeness of the Sacred Humanity, appears to have asserted two hypostases, not necessarily in a heretical sense. If the developments by Theodore and Ibas are viewed on the reputation of Diodorus, the praise of all his contemporaries and especially of his disciple Chrysostom tend yet more strongly to exculpate him. It will be best to look upon Diodorus as the innocent source of Nestorianism (q. v.) only in the sense that St. Cyril of Alexandria is admittedly the unwilling origin of Monophysitism through some incorrect expressions. Against this view are Jülicher in Th. Schmid, 492 (1902); Funk [in “Rev. d’hist. eccl.”, III (1902), 947–71; reprinted with improvements in “Kirchengesch. Abhandl.”] (Paderborn, 1907), III, 823.

The fragments of his Commentaries on the Old Testament are collected in Migne, P. G., XXXIII, from the Catena of Nicephorus and that published by Calmet (Antwerp, 1760). They consist of a “Pentateuch,” “Nahum,” “Lamentations,” and “Hymn of Psalms” (Antwerp, 1760). A few more are found in Pitra, “Spicilegium Solesmense” (Paris, 1852), I. A long list of the lost works is in Fabricius, “Bibl. Gr.”, V, 24 (reprinted in Migne, loc. cit.). Some Syriac dogmatic fragments are in Lagarde, “Analecta Syriaca” (Leipzig and London, 1858). Four treatises of Pseudo-Justin Martyr have been attributed to Diodorus by Harnack (“Texte und Unters.”, X, VI., 4, 1901).

John Chapman.

Diognetus, Epistle to (Epistola ad Diognetum).

—This beautiful little apology for Christianity is cited by no ancient or medieval writer, and comes down to us in a single MS. of the fourteenth century in the library of Strasbourg. The identification of Diognetus with the teacher of Marcus Aurelius, who bore the same name, is at most plausible. The author’s name is unknown, and the date is anywhere between the Apostles and the age of Constantine. It was clearly composed during a severe persecution. The manu-
script attributed it with other writings to Justin Martyr; but that earnest philosopher and hasty writer was quite incapable of the restrained eloquence, the smooth flow of thought, the limpid clearness of expression, which mark this epistle as one of the most perfect compositions of antiquity. The last two chapters (xi, xii) are florid and obscure, and bear no relation to the rest of the letter. They seem to be a fragment of a homily of later date. The writer of this addition describes himself as a "disciple of the Apostles"; and through a misunderstanding of these words the epistle has, since the eighteenth century, been placed as one of the writings of the Apostolic Fathers. The letter breaks off at the end of chapter xii; it may have originally been much longer.

The writer addresses the "most excellent Dionysius", a well-disposed pagan, who desires to know what is the religion of Christians. Idol-worship is ridiculed, and it is shown that Jewish sacrifices and ceremonies cannot cause any pleasure to the only God and Creator of all. Christians are not a nation nor a sect, but are diffused throughout the world, though they are not of the world, but citizens of heaven; yet they are the soul of the world. God, the invisible Creator, has sent His Child, by whom He made all things, to save man, after He has allowed man to find out his own weakness and proneness to sin, and tried the possibility of saving himself. The last chapter is an exposition, "first" of the love of the Father, evidently to be followed "secondly" by another on the Son; but this is lost. The style is harmonious and simple. The writer is a practised master of classical eloquence, and a fervent Christian. There is no resemblance to the public apologies of the second century. A closer affinity is with the "Ad Donatum" of St. Cyril, which is addressed to a willing but inquiring pagan. The writer does not refer to Holy Scripture, but he uses the Gospels, 1 Peter, and 1 John, and is saturated with the Epistles of St. Paul. Harnack seems to be right in refusing to place the author earlier than Ireneus. One might well look for him much later, in the persecutions of Valerian or of Diocletian. He cannot be an obscure person, but must be a writer otherwise illustrious; and yet he is certainly not one of those writers whose works have come down to us from the second or third centuries. The name of Lucian the Martyr would perhaps satisfy the conditions of the problem; and the loss of that part of the letter where it spoke more in detail of the Son of God would be explained, as it would have been suspected or convicted of the Arianism of which Lucian was accused by the father of the writer. The so-called letter may be in reality the apology presented to a judge.

The editio princeps is that of Stephanus (Paris, 1592), and the epistle was included among the works of St. Justin by Syllburg (Heidelberg, 1593) and subsequent editors; the best of such editions is in Otto, "Corpus Apologetarum Christianorum" (3d ed., Jenae, 1879), II, 465 ff. The attribution to Clement is based upon the editor of 1592, attributing it to an earlier date, and Galland included it in his "Bibl. Vett. Pp.", I, as the work of an anonymous Apostolic Father. It has been given since then in the editions of the Apostolic Fathers, especially those of Hefele, Funk (2d ed., 1901), Gebhardt, Harnack, and Zahn (1875), Lightfoot and Harmer (London, 1891, with English tr.). Many separate editions have been issued since, according to the English critics, Mohler, Hefele, Fournier, Alzog, and Taschirner. Gebhardt placed it in the time of Justinian; Dorner referred it to Marcian; Zeller to the end of the second century, while Ceillier, Hoffmann, Otto, defended the MS. attribution to Justin; Fessler held for the first or second century. These definite views are now abandoned, likewise the suggestions of Krüger that Aristides was the author, of Draseke that it is by Apelles, of Overbeck that it is post-Constantinian, and of Donaldson that it is fifteenth-century rhetorical exercise. The MS. is thirteenth- or fourteenth-century. Zahn has sensibly suggested 250–310.

John Chapman.

Dionysius, a titular see in Arabia. This city, which figures in the "Synecdemos" of Hierocles (725, 3) and Georgius Cyprius (1072), is mentioned only in Part of the "Prima Notitia", about 840, as a suffragan of Bostra. Lequien (Or. Christ., II, 853) gives the names of three Greek bishops, Severus, present at Nicaea in 325, Epiphanius at Constantinople in 351, and Maras at Chalcedon in 451. Another, Peter, is known by an inscription (Waddington, Inscriptions de Syrie, no. 3237). Fifteen or sixteen titular Latin bishops are known throughout the fifteenth century, and even later (200, 1, 222, II, 160). Waddington (op. cit., 529 sqq.) identifies Dionysius with Soada, now es-Suweida, the chief town of a caiza in the vilayet of Damascus, where many inscriptions have been found. Soada, though an important city, is not alluded to in ancient authors under this name; inscriptions prove that it was built by a "lord builder Dionysos" and that it was an episcopal see. Nolke identifies this view. Gebhardt identifies Dionysius with Shobab (Philippopolis), but this is too far from Damascus.

S. Petrideres.

Dionysius, Saint, Pope, date of birth unknown; d. 26 or 27 December, 268. During the pontificate of Pope Stephen (234–57) Dionysius appears as a presbyter of the Roman Church and as such took part in the controversy concerning the validity of heretical baptism (see Baptism under subtitle Rehaptism). This caused Bishop Dionysius of Alexandria to write him a letter on baptism in which he is described as an excellent and learned man (Eusebius, Hist. ecc., VII, 314), in which he rebukes the writer for abandoning the Catholic faith. Hieronymous of Sebaste also addressed Dionysius a letter concerning Lucianus (ibid., VII, ix); who this Lucianus was is not known. After the martyrdom of Sixtus II (6 August, 258) the Roman See remained vacant for nearly a year, as the violence of the persecution made it impossible to elect a new head. It was decided to ordain the presbyter Dionysius, and the edict for this purpose was signed by Stephen. Some months later the Emperor Gallienus issued his edict of toleration, which brought the persecution to an end and gave a legal existence to the Church (Eusebius, Hist. ecc., VII, xiii). Thus the Roman Church came again into possession of its buildings for worship, its cemeteries, and other properties. Dionysius was able to bring order once more into the See. About 290 Bishop Dionysius of Alexandria wrote his letter to Ammonius and Euphranor against Sabellianism in which he expressed himself with ineffectiveness as to the Logos and its relation to God the Father (see Dionysius of Alexandria). Upon this an accusation against him was laid before Pope Dionysius who called a synod at Rome about 260 for the settlement of the matter. The charge was issued, in his own name and that of the council, an important doctrinal letter in which, first, the erroneous
doctrine of Sabellius was again condemned; and, then, the false opinions of those were rejected which, like the Marcionites, in a similar manner separate the Divine monarchy into three entirely distinct hypostases, or who represent the Son of God as a created being, while the Holy Scriptures declare Him to have been forgotten; passages in the Bible, such as Deut., xxxii, 6, Prov., viii, 22, cannot be cited in support of false doctrines such as these. Along with this doctrinal epistle Pope Dionysius sent a separate letter to the Alexandrian Bishop in which the latter was called on to explain his views. This Dionysius of Alexandria did in his turn, as Dionysius, De sententia Dionysi, V., xiii: De decretis Niceen synodi, xxvii). According to the ancient practice of the Roman Church Dionysius also extended his care to the faithful of distant lands. When the Christians of Capadocia were in great distress from the marauding incursions of the Goths, the pope addressed a consolatory letter to the Church of Cessarea and sent a large sum of money by messengers for the redemption of enslaved Christians (Basilius, Epist. lxx, ed. Garnier). The great synod of Antioch which deposed Paul of Samosata sent a circular letter to Pope Dionysius and Bishop Maximus of Alexandria concerning its proceedings (Eusebius, Hist. ecc., VII, xxx). After death the body of Dionysius was buried in the papal crypt in the catacomb of Callistus.

Dionysius, SAINIT, Bishop of Corinth about 170. The date is fixed by the fact that he wrote to Pope Soter (c. 168 to 176); Harnack gives 165-7 to 175-5). Eusebius gives the period of the eleventh year of Marcus Aurelius (171). When Illegissipus was at Corinth in the time of Pope Anicetus, Primus was bishop (about 150-5), while Baccyclus was Bishop of Corinth at the time of the Paschal controversy (about 190-8). Dionysius is only known to us through Eusebius, for St. Jerome (De viris ill., xxvii) has not ventured to declare any servility. Eusebius knew a collection of seven of the "Catholic Letters to the Churches" of Dionysius, together with a letter to him from Pinytus, Bishop of Cnosus, and a private letter of spiritual advice to a lady named Chrysophora, who had written to him. Eusebius first mentions a letter to the Lacedaemonians, teaching orthodoxy, and enjoining peace and union. A second was to the Athenians, stirring up their faith exhorting them to live according to the Gospel, since they were not far from apostasy. Dionysius spoke of the recent martyrdom of their bishop, Publius (in the persecution of Marcus Aurelius), and says that Dionysius the Areopagite was the first Bishop of Athens. To the Nicomedeans he wrote against Marcion, also against the Publicans, Creeds of Cret, he praised the bishop, Philip, for his aversion to heresy. To the Church of Amastris in Pontus he wrote at the instance of Baceylides and Elpistas (otherwise unknown), mentioning the bishop's name as Palmas; he spoke in this letter of marriage and continence, and recommended the charitable treatment of those who had fallen away into sin or heresy. Writing to the Cnosians, he recommended their bishop, Pinytus, not to lay the yoke of continence too heavily upon the brethren, but to consider the weakness of most. Pinytus replied, after polite words, that he hoped Dionysius would send strong meat next time, that his people might not grow up on the milk of babies. This severe prelate is mentioned by Eusebius (IV, xxii) as an ecclesiastical writer, and the historian praises the tone of his letter.

But the most important letter is that to the Romans, the only one from which extracts have been preserved.

Pope Soter had sent alms and a letter to the Corinthians:—"For this has been your custom from the beginning, to do good to all the brethren in many ways, and to send alms to many Churches in different cities, now relieving the poverty of those who asked aid, now assisting the brethren in the mines by the alms of the seed, Romans keeping up the traditional custom of Romans, which your blessed bishop, Soter, has not only maintained, but has even increased, by affording to the brethren the abundance which he has supplied, and by comforting with blessed words the brethren who came to him, as a father his children. Again: You also by both opening and not closing your doors, to both the Romans and Corinthians who are the planting of Peter and Paul. For they both came to our Corinth and planted us, and taught alike; and alike going to Italy and teaching there, were martyred at the same time." Again: "To-day we have kept the holy Lord's day, on which we have read your letter, which we shall ever possess to read and to be admonished, even as the former one written to us through Clement." The testimony to the generosity of the Roman Church is carried on by the witness of Dionysius of Alexandria in the third century; and Eusebius in the fourth declares that it was still seen in his own day in the great persecution. The witness to the martyrdom of St. Peter and St. Paul, κατὰ τὸν ἀδελφὸν εὐαγγέλιον, is of first-rate importance, and is true to the spirit of the moment and the public reading of it. The letter of the pope was written "as a father to his children".

Dionysius's own letters were evidently much prized, for in the last extract he says he wrote them by request, and that they have been falsified "by the apostles of the devil". No wonder, he adds, that the Scriptures are falsified by such persons.

The extracts are in Eusebius, Hist. Ecc., IV, xxii, also In, xxv (Routh, Reliquiae Sacer., I.), see Harnack, Gesch. der Alten Kirche, 1893, pp. 226 [225] ff.; see also 252 ff. The latter is the same, with a few additional notes, as Eusebius, Hist., iv, i, 313. Bardenhewer, Gesch. der altchristlichen Literatur (Freiburg im Br., 1903), II, 381 sq.

J. P. KIRSCH.

Dionysius Euxipius, the surname Euxipius, or "The Little", adopted probably in self-deprecation and not because he was small of stature, flourished in the earlier part of the sixth century, dying before the year 544. According to his friend and fellow-student, Cassiodorus (De divinis Locutionibus, c. xxiii), though by birth a Scythian, he was in character a true Roman and thorough Catholic, most learned in both tongues — i.e. Greek and Latin—and an accomplished Scripturist. Much of his work is attributed to him, and he is represented as having governed a monastery as abbot. His industry was very great and he did good service in translating standard works from Greek into Latin, principally the "Life of St. Pachomius", the "Instruction of St. Proclus of Constantinople" for the Armenians, the "De opificie hominum" of St. Gregory of Nyssa, the history of the Church of the Greeks from 218 to 428 (falsified by him), written by B.irdexhewer, and the monastic life of the 5th century; and the Latin translation of St. Cyril of Alexandria's synodal letter against Nestorius, and some other works long attributed to Dionysius, are now acknowledged to be earlier and are assigned to Marius Mercator.

Of great importance were the contributions of Dionysius to the science of canon law, the first beginnings of which in Western Christendom were due to him. "Codex canonum Ecclesiae Universalis" (Codex Concordiense, or Codex Concordiae), the code of synodal decrees, of which he has left two editions:—

(a) "Codex canonum Ecclesiae Universalis". This contains canons of Oriental synods and councils only in Greek and Latin, including those of the four ecumenical councils from Nicea (325) to Chalcedon (451).

(b) "Codex canonum ecclesiasticorum". This is in Latin in a sort of concordance, both to the former, but the Council of Ephesus (431) is omitted, while the so-called "Canons of the Apostles" and those of Sardica are included, as well as 138 canons of the
African Council of Carthage (419).—(c) Of another bilingual version of Greek canons, undertaken at the instance of Pope Hormisdas, only the preface has been preserved. (2) A collection of papal Constitutions (Collectio decretorum Pontificum Romanorum) from Siricius to Anastasius II (384–498).

In chronology Dionysius has left his mark conspicuously. It was he who introduced the use of the Christian Era (see CHRONOLOGY) and it was for him that the dates are reckoned from the Incarnation, which he assigned to 25 March, in the year 554 from the foundation of Rome (A. u. c.). By this method of computation he intended to supersede the "Era of Dioecletian" previously employed, being unwilling, as he tells us, that the name of an impious persecutor should be thus knitted with that of the Incarnation. Often called the Dionysian Era, was soon much used in Italy and, to some extent, a little later in Spain; during the eighth and ninth centuries it was adopted in England. Charlemagne is said to have been the first Christian ruler to employ it officially. It was not until the tenth century that it was employed in the papal chancery (Lersch, Chronologie, Freiburg, 1889, p. 235). Dionysius is also called the father of the legislation of Easter, which so greatly occupied the early Church. To this end he advocated the adoption of the Alexandrian Cycle of nineteen years, extending that of St. Cyril for a period of ninety-five years in advance. It was in this work that he adopted the Era of the Incarnation, which he employed throughout the Latinity of Easter, and the testimony of Cassiodorus, ibid., LXX. See also MAASEN, Quellen der Lit. des. von. Rechts im Abendlande (Graz, 1870): HARDENHUEKER, Gesch. der altchristl. Lit. (Freiburg im Breisgau, 1869).

JOHN GERARD.

Dionysius of Alexandria (bishop from 247–8 to 264–5), called "the Great" by Eusebius, St. Basil, and others, was undoubtedly, after St. Cyprian, the most eminent bishop of the third century. Like St. Cyprian he is known chiefly by the testimony of his contemporaries. Like St. Cyprian his writings usually took the form of letters. Both saints were converts from paganism; both were engaged in the controversy as to the restoration of those who had lapsed in the Decian persecution, about Novatian, and with regard to the iteration of heretical baptism; both corresponded with one another on important matters of Church policy. It is curious that neither mentions the name of the other. A single letter of Dionysius has been preserved in Greek canon law. For the rest we are dependent on the many citations by Eusebius, and, for one phase, to the works of his great successor St. Athanasius.

Dionysius was an old man when he died, so that his birth will fall about 190, or earlier. He is said to have been of distinguished parentage. He became a Christian when still young. At a later period, when he was warned by a priest of the danger he ran in studying the books of heretics, a vision—so he informs us—assured him that he was capable of proving all things, and that this faculty had in fact been the cause of his conversion. He studied under Origen. The latter was banished by Demetrius about 231, and Heraclas took his place as bishop of Alexandria. On the death of Demetrius very soon afterwards, Heraclas became bishop, and Dionysius took the headship of the famous school. It is thought that he retained this office even when he himself had succeeded Heraclas as bishop. In the last year of Philip, 249, although the emperor himself was reported to be a Christian, a riot at Alexandria, roused by a popular prophet and poet, had all the effect of a persecution. It is described by Dionysius in a letter to Fabius of Antioch. The mob first seized an old man named Metras, beat him with clubs when he would not deny his faith, pierced his eyes and face with reeds, dragged him out of the city, and stoned him. Then a woman named Quinta, who would not sacrifice, was drawn along the rough pavement by the feet, dashed against millstones, scourged, and finally stoned in the same suburb. The houses of the faithful were plundered. Not one, so far as the bishop knew, apostatized. The aged virgin, Apollonia, after her teeth had been knocked out, sprang of her own accord into the fire prepared for her rather than utter blasphemies. Serapion had all his limbs broken, and was dashed down from the upper story of his own house. It was imposed on them to have the heads of their children, who were not yet twelve years of age, cut off and burnt; but when he saw them on fire, he starting up, gave the word to put them out. Not to prevent this he stood up and was soon stoned to death. The riot was stopped by the civil war, but the new Emperor Decius instituted a legal persecution in January, 250. St. Cyprian describes how at Carthage the Christians rushed to sacrifice, or at least to obtain false certificates of hav- ing done so. Similarly Dionysius tells us that at Alexandria they continued their sacrifices, in order to preserve their account of official position, or persuaded by friends; some pale and trembling at their act, others boldly asserting that they had never been Christians. Some endured imprisonment for a time; others abjured only at the sight of tortures; others held out until the tortures conquered their resolution. But there were noble instances of constancy. Julianus and Kronton were scourged through the city on camels, and then burnt to death. A soldier, Bassa, who protected them from the insults of the people, was beheaded. Macer, a Libyan, was burnt alive. Epimachus and Alexander, after long imprisonment and many tortures, were also burnt, with four women. The virgin Ammonaria also was long tortured. The aged Mercuria and Dionysius, a mother of many children, suffered by the sword. Hieron, Ater, and Isidore, Egyptians, after many tortures were given to the flames. A boy of fifteen, Diocorius, who stood firm under torture, was dismissed by the judge for very shame. Nemesium was tortured and scourged, and then burnt between two robbers. A number of soldiers, and with them an old man named a priest, were sentenced to die in the deserts and the mountains, and were cut off by hunger, thirst, cold, sickness, robbers, or wild beasts. A bishop named Charimon escaped with his ζύζαρες (wife?) to the Arabian mountain, and was no more heard of. Many were carried off as slaves by the Saracens and some of these were later ransomed for large sums.

Some of the lapsi had been readmitted to Christian fellowship by the martyrs. Dionysius urged upon Fabius, Bishop of Antioch, who was inclined to join Novatian, that it was right to respect this judgment delivered by blessed martyrs "now seated with Christ, and sharers in His Kingdom and assessors in His judgment". He adds the story of an old man, Serapion, who after being condemned to death was saved and could obtain absolution from no one. On his death-bed he sent his grandson to fetch a priest. The priest was ill, but he gave a particle of the Eucharist to the child, telling him to moisten it and place it in the old man's mouth. Serapion received it with joy, and immediately expired. In the preface, sent a Servianus (detective) to search for Dionysius, who directly the decree was published; he looked everywhere but in Dionysius's own house, where the saint had quietly remained. On the fourth day he was inspired to depart, and he left at night, with his domestics and certain brethren. But it seems that he was soon made prisoner, for soldiers escorted the whole party to Taposiris in the Marcottis. A certain Timotheus, who had not been taken with the others, informed a passing
countryman, who carried the news to a wedding-feast he was attending. All instantly rose up and rushed to release the bishop. The soldiers took to flight, leaving their prisoners on their uncushioned litters. Dionysius, believing his rescuers to be robbers, held out his clothes to them, retaining only his tunic. They urged him to rise and fly. He begged them to leave him, declaring that they might as well cut off his head at once, as the soldiers would shortly do so. He let himself down on the ground on his back; but they seized him by the hands and feet and dragged him away, carrying him out of the little town, and setting him on an ass without them, to the two, Galus and Peter, he remained in a desert place in Libya until the persecution ceased in 251. The whole Christian world was then thrown into confusion by the news that Novatian claimed the Bishopric of Rome in opposition to Pope Cornelius. Dionysius at once took the side of the latter, and it was largely by his influence that the whole East, after much disturbance, was brought in a few months into unity and harmony. Novatian wrote to him for support. His curt reply has been preserved entire: Novatian can easily prove the truth of his protestation that he was consecrated against his will by voluntarily retiring; he ought to have suffered martyrdom rather than divide the Church of God; indeed it would have been a particularly glorious mark of his holiness, if this bishop of the Church which is the importunity attached by Dionysius to a schism at Rome; if he can even now persuade his party to make peace, the past will be forgotten; if not, let him save his own soul. St. Dionysius also wrote many letters on this question to Rome and to the East; some of these were treatises on penalties. He took a somewhat milder view than Cyprian, for he gave greater weight to the 4th commandment, and refused forgiveness in the hour of death to none.

After the persecution the pestilence. Dionysius describes it more graphically than does St. Cyprian, and he reminds us of Theudeyses and Defoe. The heathen thrust away their sick, fled from their own relatives, threw bodies half dead into the streets; yet they suffered more than the Christians, whose heroic acts of mercy are recounted by their bishop. Many priests, deacons, and persons of merit died from succouring others, and this death, writes Dionysius, was in no way inferior to martyrdom. The baptismal controversy spread from Africa throughout the East. Dionysius was far from teaching, like Cyprian, that baptism by a heretic rather befools than cleanses; but he was impressed with the idea that the Church of the East had councils that repetition of such a baptism was necessary, and it appears that he besought Pope Stephen not to break off communion with the Churches of Asia on this account. He also wrote on the subject to Dionysius of Rome, who was not yet pope, and to a Roman named Philemon, both of whom had written to him. We know seven letters from him on the subject of this baptism. Among those he asks advice in the case of a man who had received baptism a long time before from heretics, and now declared that it had been improperly performed. Dionysius had refused to renew the sacrament after the man had so many years received the Holy Eucharist; he asks the pope’s opinion. In this case it is clear that he had not received the sacrament; he had been used, not in the mere fact of their having been performed by heretics. We gather that Dionysius himself followed the Roman custom, either by the tradition of his Church, or else out of obedience to the decree of Stephen. In 253 Origen died; he had not been at Alexandria for many years. But Dionysius had not forgotten his old master, and wrote a letter in his praise to Theodorus of Csesarea.

An Egyptian bishop, Nepos, taught the Chiliasm error that there would be a reign of Christ upon earth for a thousand years, a period of corporal delights; he founded this doctrine upon the Apocalypse in a book entitled “Refutation of the Allegorizers.” It was only after the death of Nepos that Dionysius found himself obliged to write two books “On the Promises” to counteract this error. He treats Nepos with great respect, but rejects his doctrine, as indeed the Church has since done, though it was taught by Papias, Justin, Irenæus, Victorinus of Pettau, and others. The diocese proper to Alexandria was still very large (though Heracleus is said to have instituted new bishoprics), and the Arsinoite nome formed a part of it. Here the error was very prevalent, and St. Dionysius went in person called to the two thousand and five hundred heretics, and for three days instructed them, refuting the arguments they drew from the book of Nepos. He was much edified by the docile spirit and love of truth which he found. At length Korakion, who had introduced the book and the doctrine, declared himself convinced. The chief interest of the incident is not in the picture it gives of ancient Church life and of the wisdom and gentleness of the bishop, but in the remarkable disposition, which Dionysius appeals, on the authenticity of the Apocalypse. It is a very striking piece of “higher criticism,” and for clearness and moderation, keenness and insight, is hardly to be surpassed. Some of the brethren, he tells us, in their zeal against Chiliasm, repudiated the Apocalypse altogether, and by their reproaching St. Dionysius, did not hesitate to give a picture of the character, style, and what is called working out. He shows that the one writer calls himself John, whereas the other only refers to himself by some periphrasis. He adds the famous remark, that “it is said that there are two tombs in Ephesus, both of which are called that of John.” He demonstrates the close likeness between the Gospel and the Epistle, and points out the wholly different vocabulary of the Apocalypse; the latter is full of socalisms and barbarisms, while the former are in good Greek. This acute criticism was unfortunate, in that it was largely the cause of the frequent rejection of the Apocalypse in the Greek-speaking Churches, even as late as the Middle Ages. The difference of opinion of St. Dionysius enabled him to the liberal critics of the nineteenth century. Lately the swing of the pendulum has brought many, guided by Boussot, Harnack, and others, to be impressed rather by the undeniable points of contact between the Gospel and the Apocalypse, than by the differences of style (which can be explained by a different scribe and interpreter, since the author of both books was certainly Victorinus), or by the fact, that Loisy admits that the opinion of the numerous and learned conservative scholars “no longer appears impossible.” But it should be noted that the modern critics have added nothing to the judicious remarks of the third-century patriarch.

The Emperor Valerin, whose accession was in 253, did not persecute, until 257. In that year St. Cyprian was banished to Curibus, and St. Dionysius to Kephro in the Mareotis, after being tried, together with one priest and two deacons, before Emilius, the prefect of Egypt. He himself relates the firm answers he made to the prefect, writing to defend himself against a certain Germanus, who had accused him of a disgraceful flight. Cyprian suffered. St. Dionysius was spared, and returned to Alexandria, directly taxation was decreed by Gallienus in 260. But not to peace, for in 261-2 the city was in a state of tumult little less dangerous than a persecution. The great
thoroughfare which traversed the town was impassable. The bishop had to communicate with his flock by letter, as though they were in different countries. It was easier, he wrote, to pass from East to West, than from Alexandria to Alexandria. Famine and pestilence raged anew. The inhabitants of what was still the second city of the world had decreased so that the males between fourteen and eighty were now scarcely so numerous as those between forty and seventy had been not many years before. A controversy arose in the latter years of Dionysius of which the half-Arian Eusebius, bishop of Nicomedia, wrote an entire work to answer. All we know is from St. Athanasius. Some bishops of the Pentapolis of Upper Libya fell into Sabellianism and denied the distinctness of the Three Persons of the Blessed Trinity. Dionysius wrote some four letters to condemn their error, and sent copies to Pope Sixtus II (257–8). But he himself fell, so far as words go, into the opposite error, for he said the Son is a πρότασις (something made) and participated in substance. Εὐσεβίου, from the Father, even as is the husbandman from the vine, or a shipbuilder from a ship. These words were seized upon by the Arians of the fourth century as plain Arianism. But Athanasius defended Dionysius by telling the sequel of the history. Certain brethren of Alexandria, being offended at the words of their bishop, betook themselves to Rome to Pope St. Dionysius. The latter declared that to teach that the Son was made or was a creature was an impious equal, though contradictory, to that of Sabellius. He also wrote to his namesake of Alexandria informing him of the accusation brought against him. The latter immediately composed books entitled "Refutation" and "Apologeticus;" in these he explicitly declared that there never was a time when God was not Father, that Christ was always the Word and Wisdom and Power, and coeternal, even as brightness is not posterior to the light from which it proceeds. He teaches the "Trinity in Unity and the Unity in Trinity;" he clearly implies the equality and eternal procession of the Holy Ghost. In these last points he is more explicit than St. Athanasius himself is elsewhere, while in the use of the word consubstantiational, ἀνεστασιστικος, he anticipates Nicea, for he bitterly complained of the calumnies that he had rejected the expression. But however he himself and his advocate Athanasius may attempt to explain away his earlier expressions, it is clear that he had been incorrect in thought as well as in words, and that he did not at first grasp the true doctrine with the necessary dispatch, that he was owing this to a want of explicitness and must have been the cause of the Alexandrian's clearer vision. The pope, as Athanasius points out, gave a formal condemnation of Arianism long before that heresy emerged. When we consider the vagueness and incorrectness in the fourth century of even the supporters of orthodoxy in the East, the decision of the Apostolic See will seem a marvellous testimony to the doctrine of the Fathers as to the unfalling faith of Rome.

We find Dionysius issuing yearly, like the later bishops of Alexandria, festal letters announcing the date of Easter and dealing with various matters. When the heresy of Paul of Samosata, Bishop of Antioch, began to trouble the East, Dionysius wrote to the Church of Antioch on the subject, as he was obliged to do, and it is clear that the bishop, however, must have been the cause of the Alexandrian's clearer vision. The pope, as Athanasius points out, gave a formal condemnation of Arianism long before that heresy emerged. When we consider the vagueness and incorrectness in the fourth century of even the supporters of orthodoxy in the East, the decision of the Apostolic See will seem a marvellous testimony to the doctrine of the Fathers as to the unfalling faith of Rome.

Dionysius the Pseudo-Areopagite. By "Dionysius the Areopagite" is generally understood the judge of the Areopagus who, as related in Acts, xvii, 34, was converted to Christianity by the preaching of St. Paul, and according to Dionysius of Corinth (Eusebius, Hist. Eccl., I, iv), was Bishop of Athens. In the course of time, however, two errors of far-reaching import arose in connexion with this name. In the first place, a series of famous writings of a rather peculiar nature was attributed to this bishop, which has been correctly and regularly identified with the name of Gaul, Dionysius, the first Bishop of Paris. It is not our purpose to take up directly the latter point; we shall concern ourselves here (1) with the person of the Pseudo-Areopagite; (2) with the classification, contents, and characteristics of his writings; (3) with their history and transmission; under this head the question as to the minimum and maximum of the far reaching spread of these writings will be answered.

Deep obscurity still hovers over the person of the Pseudo-Areopagite. External evidence as to the time and place of his birth, his education, and later occupation is entirely wanting. Our only source of information regarding this problematical personage is the writings themselves. The first of these, the Didache, by the first writer, was composed about the latter half of the fifth century, and that, in all probability, he was a native of Syria. His thoughts, phrases, and expressions show a great familiarity with the works of the neo-Platonists, especially with Plotinus and Proclus. He is also thoroughly versed in the works of the schools of Alexandria and especially in the works of the Fathers as far as Cyril of Alexandria. (Passages from the Areopagite writings are indicated by title and chapter. In this article D. N. stands for "De divinis nominibus;" C. H. for "Celestis hierarchia;" E. H. for "Ecclesiastica hierarchia;" Th. M. for "Theologia mystica," which are all found in Migne, P. G., vol. III.) In a letter to Polycarp (Ep. vii, P. G., III, 160A) and in "Cel. hier. (ix, 3; P. G., III, 200 D) he intimates that he was formerly a pagan, and this seems quite probable, considering the peculiar character of his literary work. But one should be more cautious in regard to certain other personal references, for instance that he was chosen teacher of the "newly-baptized" (D. D. N., iii, 18; G., III, 86, 181), that his spiritual father and guide was a wise and saintly man, Hierotheus by name; that he was advised by the latter and ordered by his own superiors to compose these works (ibid., 681 sq.). And it is plainly for the purpose of deceiving that he tells of having observed the solar eclipse at Christ's Crucifixion (Ep. vii, 2; P. G., III, 1681 A) and of having, with Hierotheus, the Apostles (Peter and James, and other hierarchies, looked upon as "Be-Be-Be-Getting, God-Receiving body, i. e. of the Blessed Virgin" (D. D. N., iii, 2; P. G., III, 46 C). The former of these accounts is based on Matt., xxxvii, 45,
and Mark, xv, 33; the latter refers to apocryphal descriptions of the "Dormition Mariae". For the same purpose the Eucharistic liturgy, which is divided into five parts, is the subject of unique treatises. The names of the five choirs are taken from the canonical books and are arranged in the following order. First triad: seraphim, cherubim, thrones; second triad: virtues, dominations, powers; third triad: principalities, archangels, angels (D. N., ii, 2 in P. G., III, 200 D). The grouping of the seven choirs illustrates Dionysius' rationalization of terms in the light of monophysite heresy. This reserved, indefinite attitude of the author explains the remarkable fact that the names of the seven choirs are taken from the canonical books in the following order: first triad: seraphim, cherubim, thrones; second triad: virtues, dominations, powers; third triad: principalities, archangels, angels (D. N., ii, 2 in P. G., III, 200 D). The grouping of the seven choirs illustrates Dionysius' rationalization of the divine hierarchy in seven chapters, each of which is subdivided into three parts (πρόθολοι, μεσθήρω, θεωρία). After an introduction which discusses God's purpose in establishing the hierarchy of the Church, and which pictures Christ as its Head, holy and supreme, Dionysius treats of three sacramentals, the Holy Spirit, the Church, and their relation to the three stages of the Teaching Church (bishops, priests, deacons), of three stages of the Learning Church (monks, people, and the class composed of catechumens, energusmen, and penitents), and, lastly, of the burial of the dead (C. H., iii, (3), 6 in P. G., III, 432 sq.; vi in P. G., III, 529 sq.). The main purpose of the author is to disclose and turn to the uses of contemnion the deeper mystical meanings of ritual and of the sacred rites, ceremonies, institutions, and symbols. The fourth treatise is entitled "Mystical Theology", and presents in five chapters guiding principles concerning the mystical union with God, which is entirely beyond the compass of sensuous or intellectual perception (επιστήμη). The ten letters, four addressed to a monk, Caius, and one each to a deacon, Dorotheus, and a bishop, Demophilus, to the bishop of Damascus, and to the Apostle John, contain, in part, additional or supplementary remarks on the above-mentioned principal works, and in part, practical hints for dealing with sinners and unbelievers. Since in all these writings the same salient thoughts on philosophy and theology recur with the same striking peculiarities of expression and with manifold references, in both form and matter, from one work to another, the assumption is justified that they are all to be ascribed to one and the same author. In fact, at its first appearance in the literary world the entire corpus of these writings was combined as it is now. An eleventh letter to Apollonians, given in Migne, P. G., III, 1119, is a medieval forgery based on the tenth letter. In addition, there are also a letter to Timothy and a second letter to Titus.

Dionysius would lead us to infer that he is the author of still other learned treatises, namely: "Theological Outlines" (D. N., ii, 3 in P. G., III, 640 B); "Sacred Hymns" (D. N., vii, 4 in P. G., III, 212 B); "Symbolic Theology" (C. H., xv, 5 in P. G., III, 356 A), and treatises on "The Righteous Judgment of God" (D. N., iv, 35 in P. G., III, 370 B), "On the Soul" (D. N., iv, 2 in P. G., III, 696 C), and on "The Objects of Intellect and Sense" (E. H., i, 2 in P. G., III, 373 B). No reliable trace, however, of any of these writings has ever been discovered, and in his references to them Dionysius is as uncontrollable as in
his citations from Hierotheus. It may be asked if these are not fictitious pure and simple, designed to strengthen the belief in the genuineness of the actually published works. This suspicion seems to be more warranted because of other discrepancies, e.g. when Dionysius, the priest, in his letter to Timothy, extols the latter as a 'hierarch, thesiai, theon logophrûs, and nevertheless seeks to instruct him in those sublime secret doctrines that are for bishops only (E. H., i, 5 in P. G., III, 377 A), doctrines, moreover, which, since the cessation of the Disciplina Arcani, had already been made public. Again, Dionysius points out (D. D. n., i, 2 in P. G., III, 681 B; cf. E. H., iv, 2 in P. G., III, 476): "the passages are intended to serve as catechetical instruction for the newly-baptized. This is evidently another contradiction of his above-mentioned statement. We may now turn to the history of the Pseudo-Dionysian writings. This embraces a period of almost fifteen hundred years, and three distinct turning points in its course have divided it into as many distinct periods: first, the period of the gradual rise and settlement of the writings in Christian literature, dating from the latter part of the fifth century to the Lateran Council, 649; second, the period of their highest and universally acknowledged authority, both in the Western and in the Eastern Church, lasting till the beginning of the fifteenth century; third, the period of sharpest conflict waged about their authenticity, begun by Lactantius, and ending with the recent conclusion of the Tomistic controversy. The Apocrygata were formerly supposed to have made their first appearance, or rather to have been first noticed by Christian writers, in a few pseudo-epigraphical works which have now been proved to be the products of a much later period; as, for instance, in the following: Pseudo-Originates, "Homilia in diversis secunda"; Pseudo-Athanasius, "Quaestiones ad Antiochenos", ed. Q. viii; Pseudo-Hippolytus, against the heretic Beros; Pseudo-Chrysostom, "Sermo de pseudo-prophetis". Until quite recently more credit was given to other lines of evidence on which Franz Tischler endeavoured to support his entirely new thesis, to the effect that the author of the writings lived about the year 375 in Egypt, as Abbot of Rinhonkoura. Tischler's attempts, however, at removing the textual difficulties, and solving the authenticity of the documents, have been almost unsuccessful. In fact, those very passages in which Tischler thought that the Fathers had made use of the Apocrygata (e.g. in Gregory of Nazianzus and Jerome) do not tell in favour of his hypothesis; on the contrary, they are much better explained if the converse be assumed, namely, that Pseudo-Dionysius drew from them. Tischler himself, convinced by the results of recent research, has abandoned this opinion. Other events also, both historical and literary, evidently exerted a marked influence on the Apocrygata: (1) the Council of Chalcedon (451), the Christological terminology of which was studiously followed by Dionysius; (2) the writings of the neo-Platonist Proclus (411–48, by whom Dionysius borrowed to a surprising extent); (3) the controversy of the liturgy of the Mass, which is alluded to in the "Ecclesiastical Hierarchy" (ii, 2, in P. G., III, 425 C, and iii, 3, 7 in P. G., III, 436 C; cf. the explanation of Maximus in P. G., IV, 114 B); (4) the Henoticon of the Emperor Zeno (482), a formula of union designed for the bishops, clerics, monks, and faithful of the Orient, as a compromise between Monophysitism and orthodoxy. Both occasions of the Henoticon and the Orient the Apocrygata correspond fully to the sense of the Henoticon; and one might easily infer that they not only originated in the same sphere, but that they were made to further the purpose of the Henoticon.

The result of the foregoing data is that the first appearance of the pseudo-epigraphical writings cannot be placed earlier than the latter half, in fact at the close, of the fifth century.

Having ascertained a terminus post quem, it is possible by means of evidence taken from Dionysius himself to fix a terminus ante quem, thus narrowing to about thirty years the period within which these writings have originated. The earliest reliable citations from the writings of Dionysius are from the end of the fifth and the beginning of the sixth century. The first is by Severus, a party of moderate Monophysites named after him, and Patriarch of Antioch (512–518). In a letter addressed to a certain abbot, John (Mai, Script. vet. coll., VII, 1, 71), he quotes in proof of his doctrine of the μια σωφροσύνη in Christ the Dionysian Ep. iv (P. G., III, 1072 C), where a καθηκοντική καταγεγραμμένα is mentioned. Again, in his "treatise on the Halicarnese," (Cod. Syr. Vat. 140, fol. 100 B), Severus cites a passage from D. D. n., ii, 9, P. G., III, 648 A (Ἀλλὰ καὶ τὸ πάντοπος—θεωρεῖ διαπέπληκτα), and returns once more to Ep. iv. In the Syrian "History of the Church" of Zacharias (ed. Ahrens-Kruger, 134–5) it is related that Severus, a man well-versed in the writings of Dionysius (Areop.), was present at the Synod in Tyre (513). Andreas, Bishop of Cappadoceia, wrote (about 520) a commentary on the Apocalypse wherein he quotes the Apocrygata four times and makes use of at least three of his works (Migne, P. G., Cvi, 257, 305, 356, 780; cf. Diekamp in "Hist. Jahrb.," XVIII, 136, pp. 1–36). Like Severus, Zacharias Rhetor and, in all probability, also Andreas of Cappadoceia, inclined to Monophysism (Diekamp, ibid., pp. 33, 35).

So far as we can judge, the first use of a "Book of Hierotheus"—Hierotheus had come to be regarded as the teacher of Dionysius—existed in the Syrian literature of that time and exerted considerable influence in the spread of Dionysian doctrines. Frothingham (Stephen Bar Sudali, p. 63 sq.) considers the pantheist Stephen Bar Sudali as its author. Jobbink monographically discusses the question in "Dionysius the Areopagite" (1919), just mentioned, published against Severus a polemical treatise which has since been lost, but claims the Apocrygata as authority for the orthodox teaching (P. G., Cxi, 765). So also Ephraem, Archbishop of Antioch (527–543), interprets in a right sense the well-known passage from D. D. n., i, 4, P. G., III, 329 A: δὸ ἄνωθεν ἑνωτικός, by distinguishing between σωφροσύνη ἐνωτικός and ἑνωτικὸς νοστικός. They also put their researches in a book, and showed that the treatise against Cyril in which he had earlier, John of Scythopolis in Palestine wrote an interpretation of Dionysius (Pitra, "Analeet. sacr.," IV, Proleg., p. xxiii; cf. Loofs, "Leontius of Byzantium," p. 270 sq.) from an anti-Syrian standpoint. In Leontius of Byzantium (485–543) we have another important witness. This eminent champion of Catholic doctrine in at least four passages of his works builds on the μια χνίσεως (P. G., LXXVI, 1283 A; 1288 C; 1304 D; Canisius-Basnage, "Thesaur. monum. eccles.," Antwerp, 1725, i, 571). Sergius of Resina in Mesopotamia, archdeacon and presbyter (d. 536), at an early date translated the works of Dionysius into Syrian. He admitted their genuineness, and for their defence also translated into Syrian the already current "Galen" (die "Ceres", ibid., add. 1251 and 22370; cf. Zacharias Rhetor in Ahrens-Kruger, p. 208). He himself was a Monophysite.

By far the most important document in the case is the report given by Bishop Innocent of Maronia of the religious debate held at Constantinople in 533 between seven orthodox and seven Severian speakers (Har- donnin, II, 1159 sqq.). The former had as leader and spokesmen Onuphrius of Sebaste, who was thoroughly versed in the literature of the subject. On the second day the "Orientalis" (Severians) alleged against the Council of Chalcedon, that it had by a novel and erroneous expression decreed two natures in Christ. Besides Cyril of Alexandria, Athanasius, Gregory Thaumaturgus, and Felix and Julius of Rome, they also quoted Dionysius the Areopagite as an exponent of the doctrine of one nature. Hypatius re-
The teacher above-mentioned who the catholicos, they very would point out in the polemical writings of Cyril against Dionysius and Theodore the use made of such evidence, Hypatius persisted in the stand he had taken: "sed nunc videtur quoniam et in illis libris [Cyrill] heretici falsantes addiderunt ea". The references to the archives at Alexandria had just as little weight with him, since Alexandria, with its libraries, had long been in the hands of the heretics. How could an interested party of the opposition be introduced as a witness? Hypatius refers again especially to Dionysius and successfully puts down the opposition: "Ilia enim testimonio que vos Dionysii Areopagitae dicitis, unde potestis ostendere vera esse, sicut suspicamini? Si enim eius erant, non potuissent lateri beatum Cyrilum. Quid autem de beato Cyrillo dixit, quando et beatus Atanasius, si pro certo segetis eius fuisset, ante omnio in Niceno concilio de consubstantiali Trinitate cadem testimonio propositum adversus Arii diversae substantiae blasphemias". Indeed, as to the consubstantiality of the Father and the Son the Areopagite has statements that leave no room for misinterpretation; and had these come from a disciple of the Apostles, they would have been all the more valuable. Hereupon the Syrians dropped this objection and turned to another.

The fact must, indeed, appear remarkable that these very writings, though rejected outright by such an authority as Hypatius, were within little more than a century looked upon as genuine by Catholics, so that they could be used against the heretics during the Lateran Council in 649 (Harduin, III, 698 sqq.). How, if at all, the following grouping will show, it was chiefly heterodox writers, Monophysites, Nestorians, and Monothelites, who during several decades appealed to the Areopagite. But among Catholics also there were not a few who assumed the genuineness, and as some of these were persons of consequence, the way was gradually paved for the authorization of his writings in the above mentioned branches of science. Monophysites belonged: Themistius, deacon in Alexandria about 537 (Harduin, III, 784, 893 sq., 1240 sq.); Callistus of Alexandria, about 540 (Harduin, I, 786, 895, 898); John Philoponus, an Alexandrian grammarian, about 546-549 (W. Reichardt, "Philoponus, de opificio mundi"); Petrus Calinicus, Monophysite Patriarch of Antioch, in the latter half of the sixth century, in his polemics against the Patriarch Damianus of Alexandria (II, xli and xlvii; cf. Frothingham, op. cit., after Cod. Syr. Vat., 108, f. 282 sqq.). As examples of the Nestorian group may be mentioned Joseph Huzaya, a Syrian monk, teacher about 580 at the school of Nisibis (Assemani, Bibl. orient., vol. III, pt. I, p. 103); also Ischojeb, chaplain of the eighth century, in his "Buch der Synhados", p. 229 sqq.; and John of Apamea, a monk in one of the monasteries situated on the Orontes, belonging most probably to the sixth century (Cod. Syr. Vat., 93). The heads of the Monothelites, Sergius, Patriarch of Constantinople (610-638), Cyrus, Patriarch of Alexandria (630-643), Pyrrius, the successor of Sergius in Constantinople (638-641), took as the starting point the polemics against Dionysius to Caius, wherein they altered the oft-quoted formula, θεοτροφή ενεργία into μια θεοτροφή ενεργία.

To glance briefly at the Catholic group we find in the "Historia Euthymiana", written about the middle of the sixth century, a passage taken, according to a certain editor of John Damascus (P. G. CXVI, 748), from D. D. N. i, 2, P. G. III, 682 D: τοπιρίρας δις — τετακώνσεις. Another witness, who at the same time leads over to the Latin literature, is Liberatus of Carthage (Breviarium cause Nestor. et Eutych., ch. v). Joannes Malalas, of Antioch, who died about 555, narrates, in his "Universal Chronicle", the conversion of the judge of the Areopagus through St. Paul (Acts, xvii, 34), and praises the latter as a powerful philosopher and antagonist of the Greeks (P. G. XCVII, 584; cf. Krumbacher, Gesch. d. byz. Lit., 3rd ed., p. 112 sqq.). Another champion was Theodore, presbyter. Though it is difficult to locate him chronologically he was, according to Le Nourry (P. G., III, 16), an "auctor antiquissimus" who flourished, at all events, before the Lateran Council in 649 and, as we learn from Philoponus (P. G., CIII, 44 sq.), undertook to defend the genuineness of the Areopagite writings. The repute, moreover, of these writings was enhanced in a marked degree by the following eminent churchmen: Eulogius, Patriarch of Alexandria (550-607), knew and quoted, among others, the D. D. N. xii, 2, verbatim (P. G., CIII, 1061; cf. Der Katholik, 1897, II, p. 95 sq.). From Eulogius we naturally pass to Pope Gregory the Great, with whom he enjoyed a close and honourable friendship. Gregory the Great (590-604), in his thirty-fourth Homily on Luke, xx, 1-10 (P. L., LXXXVI, 1254), distinctly refers to the Areopagite's teaching regarding the Angels: "Furtur vero Dionysius Areopagita, antiquus videit et venerabilis Pater, dicere etiam eis, "et dominus servum tuum et servum tuum dabit"; et, "et proximus homo". Moreover, in the "Homilia (capitulum) I" we discover a number of similar expressions and Biblical examples which are borrowed from the eighth letter of Dionysius "ad Demophilum" (P. G., III, 1085 sq.). In other passages frequent reference is made to the D. D. N. In the following years, two Patriarchs of Jerusalem both from the eighth century, the Patriarch Theodore (634-638), formerly a monk of the Theodosius monastery in the desert of Judäa. In a panegyric on the "Assumptio Mariae" (P. G., LXXXVI, 3277 sq.) he quotes sentences from the D. D. N., i, 4; ii, 10; from the "Theologia Mystica", i, 1; and from Ep. ii. The second, a still brighter time-honoured witness of the true doctrines is the first Patriarch Theodore (634-638), formerly a monk of the Theodosius monastery near Jerusalem. Immediately after his installation he published an epistula synodica, "perhaps the most important document in the Monothelite dispute". It gives, among other dogmas, a lengthy exposition of the doctrine of two energies in Christ (Hefele, Concilien
deschriften, P. G., CIII, 1263 sqq.; 2nd ed., 1263 sqq.). In this "Ad Caum" (θεοτροφή ενεργία), he refers to our author as a man through whom God speaks and who was won over by the Divine Paul in a Divine manner (P. G., LXXXVII, 3177). Maximus Confessor evidently rests upon Sophronius, whose friendship he had gained while abbot of the monastery of Chrysopolis in Alexandria (935). In accordance with Sophronius he expounds the Didascalicon of Dionysius the Areopagite in the orthodox sense, and praises it as indicating both essence and natures in their distinct properties and yet in closest union (P. G., XCI, 345). Following the example of Sophronius, Maximus also distinguishes in Christ three kinds of actions (θεοτροφής, άνθρωπος, και μετα-θεοτροφής) (P. G., IV, 536). Thus the Monothelites lost their strongest weapon, and the Lateran Council found the saving word (Hefele, op. cit. 2nd ed., 129). In other regards also Maximus plays an important part in the
authorisation of the Areopagitic. A lover of theologico-mystical speculation, he showed an uncommon reverence for these writings, and by his glosses (P. G., IV), in which he explained dubious passages of Dionysius in an orthodox sense, he contributed greatly towards the recognition of Dionysius in the Middle Ages. Another equally indefatigable champion of Dionysius was Anastasius, a monk from the monastery of Sinai, who in 640 began his chequered career as a wandering preacher. Not only in his "Guide" (6570), but also in the "Questiones" and in the seventh book of the "Meditations on the Hexameron", he unhesitatingly makes use of different passages from Dionysius (P. G. CXXIIX). By this time a point had been reached at which the official seal, so to speak, could be put upon the Dionysian writings. The Lateran Council of 649 solemnly rejected the Monothelite heresy (Hardouin, III, 699 sqq.). Pope Martin I quotes from the D. D. N., ii, 9; iv, 20 and 23; and the "Ep. ad Caecum"; speaks of the author as "beatus memorie Dionysius", "Dionysius egregius, sanctus, beatus", and vigorously objects to the perversion of the text: "una inste novo dei et viri operatio. The influence which Maximus exerted by his personal appearance at the council and by his above-mentioned explanation of the θεοδρόμη δεόντω, is easily recognized ("Dionysius duplicem operationem dupliscis naturae composito sermo abusus est"—Hardouin, III, 787). Two of the testimonies of the authors cited by Maximus in this session are taken from Dionysius. Little wonder, then, that henceforth no doubt was expressed concerning the genuineness of the Areopagitic. Pope Agatho, in a dogmatic epistle directed to the Emperor Constantine (680) cites among other passages from the Fathers also the D. D. N., ii, 6. The Sixth Ecumenical Council of Constantinople (680) followed in the same year in the lateran, later under the title "Ep. iv ad. Caecum" against the falsification of Pyrrhus, and rejected the meaning which the Monothelite Patriarch Macarius assigned to the passage (Hardouin, III, 1099, 1346, 1066). In the second Council of Nicara (757) we find the "Celestial Hierarchy" of the "deiffer Dionysius" cited against the Iconoclasts (Hardouin, IV, 362). This finishes the first and darkest period in the history of the Areopagitics; and it may be summarized as follows. The Dionysian writings appeared in public for the first time in the Monophysite controversies. The Severians made use of them first and were followed by the orthodox. After the religious debate at Constantinople in 533 witnesses for the genuineness of the Areopagites began to increase among the fathers, hitherto hostile. Despite the opposition of Hypatius, Dionysius did not altogether lose his authority even among Catholics, which was due chiefly to Leontius and Ephrem of Antioch. The number of orthodox Christians who defended him grew steadily, comprising high ecclesiastical dignitaries who had come from monasteries. Finally, under the influence of Maximus, the Lateran Council (649) cited him as a competent witness against Monothelitism.

As to the second period, universal recognition of the Areopagitic writings in the Middle Ages, we need not mention the Greek Church, which is especially proud of him; but neither in the West was a voice raised in challenge down to the first half of the fifteenth century; on the contrary, his works were regarded as essential to theological instruction. It was even believed that St. Paul, who had communicated his revelations to his disciple in Athens, spoke through these writings (Histor-polit. Blätter, CXXV, 1900, p. 541). There is no doubt concerning the fact itself, a glance at the main divisions of the tradition may suffice. Rome received the original text of the Areopagita undoubtedly through Greek monks. The opposition on the part of Islam during the sixth and seventh centuries compelled many Greek and Oriental monks to abandon their homes and settle in Italy. In Rome itself, a monastery for Greek monks was built under Stephen II and Paul I. It was also Paul I (755 - 767) who in 757 sent the writings of Dionysius, together with other books, to Pepin in France. Adrian I (772 - 795) also accompanied the Latin translation of the Acts of the Nicenan Council (787) which he sent to Charlemagne. During the first half of the ninth century the facts concerning Dionysius are mainly grouped around the Abbé Hildeuin of Saint-Denys at Paris. Through the latter the false idea that the Gallic martyr Dionysius of the third century, whose relics were preserved in Saint-Remi, was identical with the Areopagite rose to an undoubted certainty, while the works ascribed to Dionysius gained in repute. Through a legation from Constantine, Michael II had sent several gifts to the Frankish Emperor Louis the Pious (827), and among them were the writings of the Areopagite, which gave particular joy and honour to Hildeuin, the influential arch-chaplain of Louis. Hildeuin took care to have them translated into Latin and he himself wrote a life of the saint (P. L., CVI, 13 sqq.). About the year 858 Scottus Eriugena, who was versed in Greek, made a new Latin translation of the Areopagite, which became the main source from which the Middle Ages obtained a knowledge of Dionysius and his doctrines. The work was undertaken at the instigation of and in the name of Thomas Aquinas, who Scottus enjoyed great influence (P. L., CXXII, 1026 sq.; cf. Traube, "Poet. lat. av. Carol.", II, 520, 589 sqq.). Compared with Hildeuin's, this second translation marks a decided step in advance. Scottus, with his keen dialectical skill and his soaring speculative mind, found in the Areopagite a kindred spirit. Hence, despite many errors in translation, it is often necessary to turn to the old Latin Areopagite, if one is to grasp the conceptions of thought and to penetrate the problems. As he accompanied his translations with explanatory notes and, in his philosophical and theological writings, particularly in the work "De divisione naturae" (P. L., CXXII), he recurs again and again to Dionysius, it is readily seen how much he did towards securing recognition for the Areopagite.

The works of Dionysius, thus introduced into Western literature, were readily accepted by the medieval Scholastics. The great masters of Saint-Victor at Paris, foremost among them the much-admired Hugh, based their teaching on the doctrine of Dionysius. Peter Lombard and the greatest Dominican and Franciscan scholars, Alexander of Hales, Albertus Magnus, Thomas Aquinas, Bonaventura, Scotus, Eriugena, and others, entered the mysterious obscurity of the writings of Dionysius with a holy reverence. In rapid succession there appeared a number of translations: Latin translations by Joannes Sarrazenus (1170), Robert Grosseteste (about 1220), Thomas Vercellensis (1400), Ambrosius Camaldulensis (1360), Marsilius Ficinus (1422); and even in the sixteenth century Hulsius, Eickhardt, Tauler, Suso, and others, entered the mysterious obscurity of the writings of Dionysius with a holy reverence. In rapid succession there appeared a number of translations: Latin translations by Joannes Sarrazenus (1170), Robert Grosseteste (about 1220), Thomas Vercellensis (1400), Ambrosius Camaldulensis (1360), Marsilius Ficinus (1422); and even in the sixteenth century Hulsius, Eickhardt, Tauler, Suso, and others, entered the mysterious obscurity of the writings of Dionysius with a holy reverence.
Dioscorus, Anti pope, b. at Alexandria, date unknown; d. 14 October, 530. Originally a deacon of the Church of Alexandria, he was adopted into the ranks of the Roman clergy, and by his commanding abilities soon acquired considerable influence in the Church of Rome. Under Pope St. Symmachus he was sent to Ravenna on an important mission to Theodore the Studite, and was afterwards reserved with great distinction as papal aposcissarius, or legate, to the court of Justinian at Constantinople. During the pontificate of Felix IV he became the recognized head of the Byzantine party—a party in Rome which opposed the growing influence and power of a rival faction, the Gothic, to which the pope inclined. To prevent a possible contest for the papacy, Pope Felix IV, shortly before his death, had taken the unprecedented step of appointing his own successor in the person of the aged Archdeacon Boniface, his trusted friend and adviser. When, however, on the death of Felix (Sept., 530) Boniface II succeeded him, the great majority of the Roman priests—sixty out of sixty-seven—refused to accept the new pope and elected in his stead one of the candidates (Sept., 530). Both popes were consecrated on the same day (22 Sept., 530), Dioscorus in the basilica of Constantine (the Lateran) and Boniface in an aula (hall) of the Lateran Palace, known as the basilica Julia. Fortunately for the Roman Church, the schism which followed was but of short duration, for in less than a month (14 Oct., 530) Dioscorus died, and the presbyter Stilimayr elected him was subsequently to be pope. In December, 530, Boniface convened a synod at Rome and issued a decree anathematizing Dioscorus as an intruder. He at the same time (it is not known by what means) secured the signatures of the sixty presbyters to his late rival’s condemnation, and caused the document to be deposited in the archives of the Church. The anathema against Dioscorus was subsequently removed, and the document solemnly burned by Pope Agapetus I (555). (See Boniface II.)

Bibliography, ed. Duchesne (Paris, 1886), I, 281 sq.; Jüwe, Regula Romannorum Pontificum (2nd ed., Leipzig, 1865), 1,111–12. In 1883 Ameli discovered the documents bearing on the election of 530, in the chapter library of Novara, and published them with a most learned dissertation. See also: Berti, "Kirchenrechtliche Kritik" (Kempten, 1877); French, by Darboy (Paris, 1845) and Dulac (Paris, 1865).

Jos. Stilimayr.
Dioscurus, Bishop of Alexandria (also written Dioscorus; Dioscurus from the analogy of Dioscuri), date of birth unknown; d. at Gangra, in Asia Minor, 11 Sept., 454. He had been archdeacon under St. Cyril, whom he succeeded in 439. Soon after, the Theodoret, who had been on good terms with Cyril since 433, wrote him a polite letter, in which he speaks of the report of Dioscurus's virtues and his modesty. In such a letter no contrary report would be mentioned, and we cannot infer much from these vague expressions. The peace established between John of Antioch and Cyril seems to have continued betwixt the two for many years. The successor and nephew of John, had to judge the case of Ibas, Bishop of Edessa, who was accused of heresy and many crimes by the Cyrilian party. Domnus acquitted Ibas. The Cyrilian monks of Osroene were furious, and betook themselves to Dioscurus as their natural protector. Dioscurus wrote to Domnus, complaining that he championed the Nestorian Ibas and Theodoret. Domnus and Theodoret both replied defending themselves, and showing their perfect orthodoxy. The accusers of Ibas went to the court at Constantinople, where the feeble Theodosius II was only too ready to mix in ecclesiastical quarrels. From him the Cyrilians obtained a decree against the Nestorians, and in particular against Irenaeus, who had befriended the Nestorians at the Council of Ephesus, which had been held with great haste and in great secrecy. He was now deposed from the Bishopric of Tyre which he had obtained. Theodoret was forbidden to leave his Diocese of Cyrirus. In September a new Bishop of Tyre was appointed, and the Patriarch Domnus, feeling that Dioscurus was about to triumph, wrote to Flavian of Constantinople in order to get his support. Alexandria of old had been the first of the East and was now to be rescued in like manner by the great Flavian. The Egyptian patriarch had vast civil and political influence, as well as an almost autocratic sway over a hundred bishops and a great army of monks, who were heart and soul devoted to the memory of Cyril, and rather fervent than discriminating in their orthodoxy. Constantinople had been granted the next dignity after Rome by the great Council of 381, and this humiliation of Alexandria had embittered the long-standing rivalry between the two sees. Antioch had always tended to support Constantinople, and Domnus was now ready to grant precedence to Flavian. Dioscurus, he said, had already complained that he, Domnus, was betraying the rights of Antioch and Alexandria in admitting the canon of 381, which had not been received by the Greeks. But Flavian was not a helpful ally, for he had neglected to obtain the favour of the eunuch Chrysaphius, who was all-powerful at court. An unforeseen incident was now to set the world in a blaze. At a council held by Flavian in November of the same year, 448, Eusebius of Dorylaeum accused the Archimandrite Eutyches of teaching one nature only in Christ. In order to support his charge, he alleged heresy. This made it unavoidable that he should be deposed and excommunicated. Now Eutyches was godfather to Chrysaphius, and "one nature" was precisely the unfortunate expression of St. Cyril, which his followers were already interpreting in a heretical sense. Eutyches therefore at once became the martyr of Cyrilianism; and though he was not a writer nor a theologian, he gave his name to the Monophysite heresy, into which the whole Cyrillian party now plunged once for all.

The Cyrilians were further incensed by the failure of their second attempt to convict Ibas. They had procured an order from the emperor, 23 Oct., 448, for a fresh trial. The bishops who met for this purpose at Tyre in Feb., 449, were obliged by the presence of the Eastern monks to transfer some of their sittings to Berytus. At the end of the month Ibas was exculpated, though the emperor was known to be against him. Dioscurus and his party replied by an unexpected stroke; in March they induced the emperor to issue an invitation to all the greater bishops to attend with their suffragans a general council to be held at Ephesus in August. It was indeed not unreasonable to desire some permanent settlement of the interminable war, and the pope, St. Leo I, warmly accepted the emperor's proposition, or rather order. Eutyches had written to him, pretending that he had appealed at the time of his condemnation, and promising to abide by his judgment. He wrote also to other bishops, and we still possess the reply sent to him by St. Peter of Bari. "Theologians," says the Emperor, "the council of Valentinian III, the Western emperor, had its head-quarters. St. Peter tells him to await the decision of the pope, who alone can judge a case concerning the Faith. St. Leo at first complained that the matter had not at once been referred to him, then, on finding that a full account sent by St. Flavian had been accidentially delayed, wrote a compendious explanation of the whole doctrine involved, and sent it to St. Flavian as a formal and authoritative decision of the question. He reproves Flavian's council for want of severity in an expression of Eutyches, but adds that the archimandrite may be restored if he repeat. This letter, the most famous of all Christian antiquity, is known as "St. Leo's Tome". He sent as legates to the council of Chalcedon Tertullian (he died on the way), and the deacon Hilarus, afterwards pope. St. Leo expresses his regret that the shortness of the notice must prevent the presence of any other bishop of the West. It is probable that this difficulty had been anticipated by Dioscurus, who had answered an appeal from Eutyches in a different strain. He regarded him as a down-trodden disciple of the great Flavian; he took up his cause, and addressed him: 

As his predecessor Peter had appointed a bishop for Constantinople, and as Theophilus had judged St. Chrysostom, so Dioscurus, with the air of a superior, actually declared Eutyches absolved and restored. In April Eutyches obtained a slight revision of the Acts of the council which had condemned him. In the same month the case of Ibas was again examined, by the emperor's order, this time at Edessa itself, and by a lay inquisitor, Chereas, the Governor of Osroene. The people received him with shouts against Ibas. No defence was heard. On the arrival of Chereas's report, the emperor wrote commanding the presence of Ibas's most furious accuser, the monk Bar Tsounma (Borsumnas), and other monks at the approaching Golda. Ibas was absolved by the council of Dioscurus dominant. In March Theodosius had prohibited Theodoret from coming to the council. On 6 August he shows some fear that his order may be disregarded, in a letter in which he constitutes Dioscurus president of the synod. The council met at Ephesus on 8 Aug., 449. It was to have been ecumenical in authority, but it was directed by St. Leo. The "Great Council" has been its title ever since. A full history of it would be out of place here (see Ephesus, Robber Council of). It is only necessary to say that the assembly was wholly dominated by Dioscurus, Flavian was not allowed to sit as a bishop, but was on his trial. When Stephen, Bishop of Ephesus, wished to give Chrysaphius to Flavian's clergy, he was attacked by soldiers and monks of Eutyches, 300 in number, who cried out that Stephen was the enemy of the emperor, since he received the emperor's enemies. Eutyches was admitted to defend himself, but the other side was only so far heard that the Acts of the council which had condemned him were read in full. Not content with restoring Eutyches, Dioscurus proceeded to the deposition of Flavian. This bold measure could only be carried by terrorism. The soldiers and monks were brought into the council, and many
bishops were forced to sign a blank paper. The papal legate Hilarus uttered the protest Contradictriciam, and saw Flavian and Eusebius of Dorylaem (q.v.) appealed to the pope, and their letters, only lately discovered, were probably taken by Hilarus to Rome, which he reached by a devious route. St. Flavian was thrown into prison, and died in three days of the blows and ill usage he had received. The bishops who were present gave their testimony, when the Acts were publicly read at the Council of Chalcedon, to the evidence used at Ephesus. No doubt they exaggerated somewhat, in order to excuse their own base compliance. But there were too many witnesses to allow them to falsify the whole affair; and we have also the witness of the letters of Hilarus, of Eusebius, and of Flavian, and the martyrdom of the latter, to confirm the charges against Dioscurus.

No more was read at Chalcedon of the Acts. But at this point begin the Syriac Acts of the Robber Council, which tell us of the carrying out by Dioscurus of a thoroughgoing but short-sighted policy. The papal legates came no more to the council, and Domnus excused himself through illness. A few other bishops withdrew or escaped, leaving 101 out of the original 128, and some nine new-comers raised the total to 109. Among the new-comers were a number of the heretics, such as "Let him be burned in the midst of Antioch". The accused was not present, and no witnesses for the defence were heard. Daniel, Bishop of Haran, nephew of Ibas, was degraded. Irenaeus of Tyre, already deposed, was anathematized. Then it was the turn of the leaders of the Antiochene party. Ibas had been accused of impiety and of an abominable and execrable practice; his remonstrance could be made against the great Theodoret; his character was unblemished, and his orthodoxy had been admitted by St. Cyril himself. Nevertheless his earlier writings, in which he had impiously and with incorrect expressions attacked St. Cyril and defended Nestorius, were now raked up against him. Nor did he venture to dissent from the sentence of deposition pronounced by Dioscurus, which ordered his writings to be burnt. If we may believe the Acts, Domnus, from his bed of real or feigned sickness, gave a general assent to all that the council had done. But this could not save him from the accusation of favouring Nestorians. He was deposed without a word of defence being heard, and a new patriarch, Maximus, was elected.

So ended the council. Dioscurus proceeded to Constantinople, and there made his own secretary, Anatolius, bishop of the city. One foe remained. Dioscurus had avoided reading the pope’s letter to the Council of Ephesus, though he promised more than once to do so. He evidently could not then venture to contest the pope’s ruling as to the Faith. But now, with his own creatures on the throne of Antioch and Constantinople, and sure of the support of Chrysaiphus, he stepped at Nicea, and with ten bishops launched an excommunication against St. Leo himself. It would be vain to attribute all these acts to the desire of his own aggrandizement. Political motives could not have led him so far. He must have known that in attacking the pope he could have no help from the bishops of the West or from the Western emperor. It is clear that he was genuinely infatuated with his heresy, and was fighting in its interests with all his might.

The pope, on hearing the report of Hilarus, immediately annulled the Acts of the council, absolved all those whom it had excommunicated, and excommunicated the hundred bishops who had taken part in it. He wrote to Theodosius II insisting on the necessity of a council to be held in Italy, under his own direction. The emperor, with the obstinacy of a weak man, supported the council, and paid no attention to the intervention of his sister, St. Pulcheria, nor to that of his colleague, Valentinian III, who, with his mother Galla Placidia, and his wife, the daughter of Theodosius, wrote to him at St. Leo’s suggestion. The reasons given to the pope by Theodosius for his refusal are unknown, for his letters to Leo are lost. In June or July, 450, he died of a fall from his horse, and was succeeded by his sister Pulcheria, who took for her colleague and nominal husband the excellent general Marcian. St. Leo, now sure of the support of the rulers of the East, declared a council unnecessary; many bishops signed to follow his letter to him in 453. The remainder would do so without difficulty. But the new emperor had already taken steps to carry out the pope’s wish, by a council not indeed in Italy, which was outside his jurisdiction, but in the immediate neighbourhood of Constantinople, where he himself watched its proceedings and ensured its orthodoxy. St. Leo therefore agreed, and sent legates who this time were to preside.

The council, in the intention of both pope and emperor, was to accept and enforce the definition given long since from Rome. Anatolius was ready enough to please the emperor by signing the Tome; and at Pulcheria’s intercession he was accepted as bishop by St. Leo. The latter permitted the restoration to communion of all the bishops who had refused to come to the Robber Council, with the exception of Dioscurus and of the leaders of that synod, whose case he first reserved to the Apostolic See, and then committed to the council. The synod met at Chalcedon, and its six hundred bishops made it the largest of ancient councils (see CHALCEDON, ECUMENICAL COUNCIL OF). The papal legates presided, supported by lay commissioners appointed by the pope. The clergy were in practice the real presidium, since the legates did not speak Greek. The first point raised was the position of Dioscurus. He had taken his seat, but the legates objected that he was on his trial. The commissioners asked for the charge against him to be formulated, and it was replied that he had held a council without the permission of the Apostolic See, a thing which had never been permitted. This statement was difficult to explain, before the discovery of the Syriac Acts; but we now know that Dioscurus had continued his would-be general council for many sessions after the papal legates had taken their departure. The commissioners ordered him to sit in the midst as accused. (A sentence in this passage of the Acts is wrongly translated in the old and in the new editions; it was "necessisely followed by Hefele, who thus led Bright into the error of supposing that the commissioners addressed to the legates a rebuke they meant in reality for Dioscurus.) The Alexandrian patriarch was now as much deserted by his own party as his victims had been deserted at Ephesus by their natural defenders. Some sixty bishops, Egyptian, Palestinian, and Illyrian, were on his side, but were afraid to say a word in his defence, though they raised a great commotion at the introduction into the assembly of Theodoret, who had been especially excluded from the Council of Ephesus. The Acts of the first session of the Robber Council were read, continually interrupted by the clamours of the bishops. The leaders of that council, Juvenal of Jerusalem, Thalassium of Cesarea, Maximus of Antioch, now declared that Flavian was orthodox; Anatolius had long since gone over to the winning side. Dioscurus alone stood his ground. He was at least no time-server, and he was a convinced heretic. After this session he refused to appear. At the second session (the third, according to the printed texts and Hefele, but the Ballerini are right in inverting the order of the second and third sessions) the case of Dioscurus was continued. Petitions against him from Alexandria were read. In these he was accused of injustice and cruelty to the family of Cyril and of many other crimes, even against the emperor and the State. How much of this was true it is impossible to say, as
Dioscurus refused to appear or to make any defence. The accusations were dropped, and judgment must necessarily go against Dioscurus, if only for contempt of court. The bishops therefore repeatedly demanded that the legates should deliver judgment. Popes' letters to them, and the decision of the crimes of Dioscurus—he had absolved Eutyches contrary to the canons, even before the council; he was still continuouly when others asked for pardon; he had not had the pope's letter read; he had excommunicated the pope; he had been thrice formally cited and had refused to appear. Wherefore the most holiest and the most venerable of these bishops, with all us and the present most holy council, together with the thrice blessed and praiseworthy Peter the Apostle, who is the rock and base of the Catholic Church and the foundation of the orthodox Faith, has stripped him of the episcopal and of all sacerdotal dignity. Wherefore this most holy and great council will decree that which is in accordance with the canons against the aforesaid Dioscurus. All the bishops signed their agreement in a few words, and then all signed the papal sentence. A short notice of his deposition was sent to Dioscurus. It is taken almost word for word from that sent to Nestorius by the Council of Ephesus twenty years before. With the rest of the council—its definition of the Faith imposed upon it by Pope Leo, its rehabilitation of Theodoret and of Ibas, etc., it was extended to a Bull destined to ridicule his condemnation, saying that he should soon be restored. But the council decreed that he was incapable of restoration, and wrote in this to the emperors, reciting his crimes. He was banished to Gangra in Paphlagonia, where he died three years later. The whole of Egypt revered him as the true representative of the Church and from that time forth the Patriarchate of Alexandria was lost to the Church. Dioscurus has been honoured in it as its teacher, and it has remained Eutychian to the present day.

The chief authority for the events which preceded the Robber Council besides some letters of Theodoret is the Syriac version of the Acts of that council, published from a codex of 535 in the Brit. Mus.; Secundum Synodum Ephesius nomen excepit quae ad eum pertinent . . . . Perry ed. (Oxford, 1875); The second Synod of Ephesus, from Syriac MSS., tr. by Perry (Dartford, 1851); German tr. by Hoffmann, Verhandlungen des 2. Epheser-Koncil (2 vols., M., 1879); also from a syriac HS. (Kiel, 1873); the best dissertation on it is Martin, Le Pseudo-Synode dans l'histoire sans le nom: Esquisse d'une histoire genealogique sur l'Orientalisme dans l'histoire de l'Eglise (Paris, 1875), and articles by the same in Rev. des Qu. Hist., XI (1876), and in Rev. of the XIX. cent. IV, 1 (1877-78); XXVII (1880); Livingston, The Roman Primate, 529-531 (London, 1889). Dr. Rivington has well noted (p. 214) that Dioscurus was said falsely to have been the author of a Bull when he called Dioscurus the nephew of St. Cyril or blames him for ignoring the so-called Constantinopolitan Creed. The appeals of Flavian and Eusebius were first published by Ameli, San Leone Magno e l'Oriente (Rome, 1882, and Monte cassino, 1880) and with other documents in his Scriptor. Canonic. (Monte cassino, 1880); also by Mounin, in Neues Archiv der Gesellschaft für ältere deutsche Geschichtskunde, XI (1880). The older historians, who wrote before the discovery of the Syriac Acts, are antiquated as regards Dioscurus, including Hefele (but we await the next volume of the new French edition by Ledercq), and Bright, with the exception of his posthumous Th. Age of the Fathers (London, 1904). For more general literature see Chalcroton; a fragment of a letter of Dioscurus written from Gangra to the Alexandrians is found in the American Archiv, Series IX, XVIII, 380. A panegyric on Macarius of Tkhaid, preserved in Copitae is not genuine published by Amelin, Monum. et Acta 1, and by P. P. van der Loos, Meir, 1888; see Revillout in Rev. Egypt., 1890-92. A Copitae life has been published in French and in English, by F. Diaspolis, Synodontis seu Theophylactis, in Journal Asiatique, XV serie (1893) 5.241; Copitae fragments of the paneg. and the life pub. by Baumstark, 1856. A letter from Dioscurus to St. Leo, 21 June, 445 (Ep. xi), is interesting. The pope, politely but peremptorily, and with a fine mixture of dogmatism and deference, declared his impossibility to meet on the night between Saturday and Sunday; also that on festivals when there is a great concourse the Sacrifice is to be repeated as often as the basilica is refilled, that none may be deprived of his devotion.

Diplomatics, Papal.—The word diplomatics, following a Continental usage which long ago found recognition in Mabillon's "De Re Diplomatica", has so frequently come to denote also in English the science of ancient official documents, more especially of those emanating from the chanceries of popes, kings, emperors, and other authorities possessing a recognized jurisdiction. Etymologically diplomatics should mean the science of diplomas, and diploma, in its classical acceptance, signified only a permit to use the cursus publicus i.e., the public postpaths to convey envoys to and from foreign courts and imparting certain privileges. But the scholars of the Renaissance erroneously supposed that diploma was the correct classical term for any sort of charter, and from then the word came into use among jurists and historians and obtained general currency.

History of Diplomatics.—There is abundant evidence that during the Middle Ages a certain watchfulness, necessitated unfortunately by the prevalence of forgeries of all kinds, was exercised over the authenticity of papal Bulls, royal charters, and other instruments. In this control of documents and in the precautions taken against forgery the Chancery of the Holy see set a good example. Thus we find Gregory VII reforming even in his time the papal Bulls for the use of crusading soldiers and imparting certain privileges. But the scholars of the Renaissance erroneously supposed that diploma was the correct classical term for any sort of charter, and from then the word came into use among jurists and historians and obtained general currency.
Dom Ruinart. Seeing, however, that this pioneer work had not extended to any documents later than the thirteenth century and had taken no account of certain classes of papers, such as the ordinary letters of the popes and privileges of a more private character, two other Benedictines of St-Maur, Dom Toustain and Dom Tassin, compiled a work in six large quarto volumes, with many facsimiles etc., known as the “Novel Traité de Diplomatie” (Paris, 1750-1763), which, though it marks but a small advance on Mabillon’s work, has been widely used, and has been presented in a more summary form by Dom Vaines and others.

With the exception of some useful works specially consecrated to particular countries (e.g., Maffei, “Istorìa”, Mantua, 1727, unissued; and Muratori, “De Diplomaticis Antiquis”, included in his “Antiquitates Italicæ”, 1710, vol. III), as also the treatise of G. Marini on papal documents (Lapcripti diplomatici, Rome, 1805), no great advance was made in the science for a century and a half after Mabillon’s death. The “Dict. raisonné de diplomatie chrétienne”, by M. Quentin, which forms part of Migne’s “Encyclopédia”, is a rather unskilful digest of older works, and the sumptuous “Elémens de palaeographie” of L. Wallis (Leipzig, 1848), though independent of Mabillon’s work, further, in addition to the work of Léopold Delisle, the chief librarian of the Bibliothèque Nationale, Paris, and of M. de Mas-Latrie, professor at the Ecole de Chartes, as well as that of Julius von Pflugk-Harttung, the editor of a magnificent series of facsimiles of papal Bulls, deserve to occupy a foremost place; but their work has been carried on in Germany and elsewhere, often by those who are not themselves Catholic. It must be said, however, that the photographic reproductions of documents which can now be procured so easily and cheaply have enormously facilitated that process of minute comparison of documents which forms the basis of all palaeographic studies. Further, the improvement in the cataloguing and the extension of facilities under Pope Leo XIII in such government offices as the Papal Chancery has made the contents much more accessible and have rendered possible such a calendar of early papal Bulls as has been appearing since 1902, being the result of the researches of Messrs. P. Kehr, A. Brauckmann, and W. Wiederhold, in “Nachrichten der Göttingen Gesellschaft der Wissenschaften”. Of the series of papal regesta now being published by various scholars, especially by members of the Ecole Française de Rome, a sufficient account has been given in the second part of the article Bullarium. Still greater progress in the study of diplomacy is no doubt to be looked for from the facilities afforded by the recently founded journal, “Archiv für Urkundenforschung” (Leipzig, 1907), edited by Messrs. Karl Brandl, H. Bresslau, and M. Tangl, all specialists in this field.

Subject-Matter of Papal Diplomates.—As this topic has already been treated in part in the article Bullarium and Briefs, it will be sufficient here to recall the principal elements in the process of expediting ancient papal documents, all of which need special attention. We have first of all the officials who are concerned in the preparation of such instruments and who collectively form the “Chancery”. The constitution of the Chancery, which in the case of the Holy See seems to date back to a schola notariarum, with a primicerius at its head, of which we hear under Pope Julius I (337-352), varied from period to period, and the part played by the different officials composing it need hardly varied also. Besides the Holy See, each bishop also had some sort of chancery for the issue of his own episcopal Acts. An acquaintance with the procedure of the Chancery is clearly only a study preparatory to any more extended study of the documents of the Holy See. Secondly, we have the text of the document. As the position of the Holy See became more fully recognized, the business of the Chancery increased, and we note a marked tendency to adhere strictly to the forms prescribed by traditional usage. Various collections of these formulae, of which the “Liber Jurium” is one of the chief sources, are highly useful, not only for the regularity of the form but also the authenticity of the document. Many others will be found in the “Recueil général des formules” by de Rozière (Paris, 1861-1871), though these, like the series published by Zeumer (Formule-Merovingiæ et Caroliniæ avv., Hanover, 1886), are mainly secular in character. After the text of the document, which of course varies according to its nature, and in which not merely the wording but also the rhythm (the so-called current) has often to be considered, attention must be paid (1) to the manner of dating, (2) to the signatures, (3) to the attestations of witnesses etc., (4) to the seals and the attachment of the seals, (5) to the material upon which it is written and to the manner of folding, as well as (6) to the handwriting—under this last heading the whole science of palaeography, 1836, becomes of the utmost importance. All these matters fall within the scope of the diplomatics, and all offer different tests for the authenticity of any given document. There are other details which often need to be considered, for example the Tironian (or shorthand) notes, which are of no infrequent occurrence in primitive Urkunden, both papal and imperial, but which, though they may be authenticated, are infrequently investigated (see Tangl, “Die tironischen Noten”, in “Archiv für Urkundenforschung”, 1907, I, 87-106). A special section in any comprehensive study of diplomacy is also likely to be devoted to spurious documents, of which, as already stated, the number is surprisingly great.

Besides the books referred to in the course of this article see the bibliography of the article Bullarium and Briefs. A larger selection of authorities may be found in such treatises as those of Grass, Manuel de Diplomatique (Paris, 1891); and Brasselet, Handbuch der Urkundenkunde (Leipzig, 1889), I. One very useful work for the study of papal diplomacy, the Praxis Consolator, by Apullio, ed. Schmitt-Kallenfleib (Munich, 1904), though confined to the working of the Chancery at the close of the fifteenth century, is valuable for the indirect light thrown on the general method. Consult also, as important preliminary works, the regesta of pope, the Denkschriften der akademischen Gesellschaft der Wissenschaften zu Leipzig (1902), and the Forschungen des deutschen diplomatischen Gelehriten (Paderborn, 1902). The papal Chancery is largely mentioned (see, however, the earlier authorities of M. Raffi). Finally, the best introduction to the study of papal diplomacy is to be found in the section contributed by Schmitt-Kallenfleib to the Grundriss der Geschichtswissenschaft (Leipzig, 1900), vol. I, pp. 172-200.

Herbert Thurston.

Diptych (or Diptychon, Gr. διπτυχον from δυς, twice, and πτωσις, to fold), a sort of notebook, formed by the union of two tablets, placed one upon the other and united by rings or by a hinge. These tablets were made of wood, ivory, bronze, or metal. Two pieces of rectangular surface, which were covered with wax, upon which characters were scratched by means of a stylus, the diptych was known among the Greeks from the sixth century before Christ. They served as copy-books for the exercise of penmanship, for correspondence, and various other uses. The Roman military certificates, privilegia militum, were a kind of diptych. Two tablets were sometimes inserted, and the diptych would then be called a triptych, polyptych, etc. The term diptych is often restricted to a highly ornamented type of notebook. They were generally made out of ivory with carved work, and were sometimes from twelve to sixteen inches in height. In the fourth and fifth centuries a distinction

DIPTYCH

aro between profane and ecclesiastical (liturgical) diptychs, the former being frequently given as presents by high-placed persons. It was customary to commemorate in this way one's elevation to a public office, or any event of personal importance, e.g. a marriage. The consuls, on the day of the installation, were wont to offer diptychs to their friends and even to the emperor. These presented to the latter often had a border of gold and were quite large. Their tablets often exhibited on a central panel the portrait of the sovereign, surrounded by four other plates. The (undated) Barberini ivory at the Louvre is thus constructed and once served as an ecclesiastical diptych (see below). Some believe it to be the binding of a book offered to the emperor, Strzygowski holds it to be of Egyptian origin and thinks that the portrait is that of the Great Emperor Gallienus. The oldest dated consular diptych is that of Probo (406); it is kept in the treasury of the cathedral of Aosta, Piedmont. The latest is that of the Eastern consul, Basilius (514), one tablet of which is at the Uffizi Museum in Florence and the other at the Brera in Milan. The Theodosian Code (384) forbade the offering of ivory diptychs to any but the regular (i.e. not profane) offices. In the treasury of the Freiburg Museum in Liverpool, bearing the image of Marcus Aurelius (d. 180), is prior to this enactment. The consular diptychs are recognizable by their inscriptions or by the figure of the consul which they bear. On the diptych of Boetius at Brescia (487) and several others of the same type, the consul is clad in a tunic and a trabea (a kind of consular scepere) and in his right the mappa circens, or white cloth which he used to wave as the signal for the games in the circus. These games (ludi) or other liberalties offered to the people by the consul were frequently represented on the tablets of the diptychs.

There is less certainty concerning the diptychs of officials other than consuls, e.g. pratores, questors, etc. The diptych of Rubius Probusius V. C. (i. e. str. cacarinus) vicarius urbis Roma, in the Berlin Museum, is the most precious relic of this class, and probably dates from the end of the fourth century. Among the diptychs of private individuals that of Gallicius Comesan, discovered at Rome on the Esquiline, exhibits only the name of its owner. Others were richly ornamented and reproduced often some of the motifs of the official type. The diptychs in the Mayer Museum, Liverpool, are seen Esculapius and Telesphorus, Hygeia, and Amor. The most beautiful of the profane diptychs was carved at the time of a marriage between the Symmachus and the Nicomachi (392 to 394, or 401). It represents on each leaf (one of which is at the South Kensington Museum and the other, in a very damaged condition, at Cluny) a woman performing a sacrifice. Many of the profane diptychs were preserved in the treasuries of the churches, where they were eventually used for liturgical purposes or enshrined in book-bindings or in goldsmith work. The diptych of Boetius, among others, bears, on the interior, some liturgical texts and religious paintings, attributed to the seventh century. The Lique diptych of the consul Anastasius (517), one leaf of which is at Berlin and the other at South Kensington, bears an inscription of forty-two lines and the prayer Communicantes from the Canon of the Mass. Another of the same consul (in the Bibliothèque Nationale, Paris) has a list of the bishops of Bourges. At the cathedral of Monza, Lombardy, a diptych represents in the dress of consuls King David and St. Gregory the Great. It is perhaps an ancient consular diptych, transformed in the eighth or ninth century; according to some it appears to be of ecclesiastical origin. Many carved diptychs reproduced purely religious subjects. On a diptych in the treasury of Rouen cathedral the figure of St. Paul is exactly the same as that on a sarcophagus in Gaul. A diptych leaf in the treasury of Tonges was evidently influenced by the carvings on the crypta of St. Maximinus at Ravenna, and seems to have belonged to an ancient episcopal see. Certain diptychs with religious subjects, e.g. the Holy Sepulchre and the holy women at the Tomb of Christ (Milan), an angel (British Museum), probably date from the fourth or fifth century. Diptych leaves divided into five compartments have generally served as a cover for copies of the Gospels. The diptychs, though not profane, were important for the history of sculpture, there being a good number of them extant, and several being accurately dated. At different periods in the Middle Ages, numerous diptychs or triptychs of ivory were made, to serve as little devotional panels.

The liturgical use of diptychs offers considerable interest. In the early Christian ages it was customary to write on diptychs the names of those, living or dead, who were considered as members of the church, a signal evidence of the doctrine of the Communion of Saints. Hence the terms “diptychs of the living” and “diptychs of the dead.” Such liturgical diptychs varied in shape and dimensions. Their use (sacer tabula, matricula, libri eorum et mortuorum) is attested in St. John Chrysostom (fourth century), and by the history of St. John Chrysostom (fourth century), nor did they disappear from the churches until the twelfth century in the West and the fourteenth century in the East. In the ecclesiastical life of antiquity these liturgical diptychs served various purposes. It is probable that the names of the baptized were written on diptychs, which were thus a kind of baptismal register. A local register, “diptychs of the living,” would include the names of the pope, bishops, and illustrious persons, both lay and ecclesiastical, of the benefactors of a church, and of those who offered the Holy Sacrifice. To these names were sometimes added those of the Blessed Virgin, of martyrs, and of other saints. From such diptychs came the first ecclesiastical calendars. The “diptychs of the dead” would include the names of persons otherwise qualified for inscription on the diptychs of the living, e.g. the bishops of the community (also other bishops), moreover priests and laymen who had died in the colour of sanctity. It is to this kind of diptychs that the later necrology owe their origin. Occasionally special diptychs were made to commemorate some event, such as the consecration of a church. In this way arose at an early date the episcopal lists or catalogues of occupants of sees. Whatever their immediate purpose the liturgical diptychs admitted only the names of persons in communion with the Church; the names of heretics and of excommunicated members were never inserted. Exclusion from these lists was a grave ecclesiastical penalty; the highest dignity, episcopal or imperial, would not avail to save the offender from its inflication. The content of the diptychs was read out, either from the ambo (q. v.) or from the altar by a priest or a deacon. In this respect a variety of customs obtained in different churches and at different periods; sometimes the diptychs were simply laid on the altar during Mass, and when read publicly, such reading did not always occur at the same stage of the Mass. The order of which traces are now seen in the Roman Canon of the Mass was the fixed usage of the Roman Church as early as the fifth century. In that venerable document a long passage after the Sanctus corresponds to the ancient recitation of the diptychs of the living; it contains, as is well known, mention of those for whom the Mass is offered, of the pope, of the bishop of the diocese, of the Blessed Virgin, and of several saints. At Easter and at Pentecost the Hanc igitur furnished a proper occasion to mention the names of the newly baptized, now mentioned only as a body. Finally the recitation of the “diptychs of the dead” is still recalled by the Memorial which follows the consecration.

R. MAERE.

**Direction, Spiritual.**—In the technical sense of the term, spiritual direction is that function of the sacred ministry by which the Church guides the faithful to the attainment of eternal happiness. It is part of the commission given to her in the words of Christ: “Going, therefore, teach ye all nations, teaching them to observe all things whatsoever I have commanded you” (Matt., xxviii, 19 sq.). She exercises this function both in her public teaching, whether in word or writing, and in the private guidance of souls according to their individual needs; but it is the private guidance that is generally understood by the term “spiritual direction”.

I. In one way the Church requires all her adult members to submit to such private direction, namely, in penance. Those on whom Christ has imposed the office of penance are the bishops in the dioceses, the priests in the confessional, not only the part of judge to absolve or retain the sins presently confessed, but also the part of a director of consciences. In the latter capacity he must instruct his penitents if ignorant of their duties, point out the wrong or the danger in their conduct, and suggest the proper means to be employed for amendment or improvement. The penitent, on his part, is directed to inquire, with a spirit of profound humility and sobriety, in cases of serious doubt regarding the lawfulness of his action, ask the advice of his director. For a person who acts in a practical doubt, not knowing whether he is offending God or not, and yet consenting to do what he thinks to be morally wrong, thereby offends his Creator. Such consultation is the more necessary as no one is a good judge in his own cause; a business man would not venture blind to the three wise of a infallible bargain, and passion often invents motives for unlawful indulgence.

II. Still more frequently is spiritual direction required in the lives of Christians who aim at the attainment of perfection (see **Perfection**). All religious are obliged to do so by their profession; and many of the faithful, married and unmarried, who live amidst worldly cares aspire to such perfection as is attainable in their states of life. This striving after Christian perfection means the cultivation of certain virtues and watchfulness against faults and spiritual dangers. The knowledge of this constitutes the science of asceticism (q. v.). The spiritual director must be well versed in this difficult science, as his advice is very necessary for those who are rich in grace. Cassian, in his *Conversations*, says: “The devil does the devil draw a monk headlong and bring him to death sooner than by persuading him to neglect the counsel of the Elders and trust to his own judgment and determination?” (Conf. of Abbot Moses).

III. Since, in teaching the Faith, the Holy Ghost speaks through the sovereign pontiff and the bishops of Christ, the director of the spiritual life of the Christian must never be at variance with this infallible guidance. Therefore the Church has condemned the doctrine of Molinos, who taught that directors are independent of the bishops, that the Church does not judge about secret matters, and that God and the director alone enter into the inner conscience (Denzinger, *Enchiridion*, nos. 1152, 1153). Several of the most learned Fathers of the Church devoted much attention to spiritual direction, for instance, St. Jer-ome, who directed St. Paula and her daughter St. Eustochium; and some of them have left us learned treatises on ascetic theology. But while the hierarchy of the Church is Divinely appointed to guard the purity of faith and morals, the Holy Spirit, who breathed where he will; and thou hearest his voice, be thou not surprised wherewith he cometh, and whither he goeth” (John, iii, 8) has often chosen priests as religious, and even simple laymen and women, and filled them with supernatural wisdom in order to provide for the spiritual direction of others.

IV. Whoever the director be, he will find the principal means of progress towards perfection to consist in the exercise of prayer (q. v.) and mortification (q. v.). But when the spiritual director has instructed the penitent to amend the life, the Church has, in all ages, provided for the guidance of the soul in the direction of souls arises from the presence or absence of the mystical element in the life of the person to be directed (see **Mysticism**). Mysticism involves peculiar modes of action by which the Holy Ghost illumines a soul in ways which transcend the normal use of the reasoning powers. The spiritual director who has such persons in charge needs the greatest leniency, prudence, and especially sound judgment because many things have been made by presumption and imprudent zeal, for men of distinction in the Church have gone astray in this matter.

V. Even in ordinary cases of spiritual direction in which no mysticism is involved, numerous errors must be guarded against: the following deserve special notice: (1) The false principles of the Jansenists, who hold that there is no true remedy for mortal sins, that purity of conscience before they allowed them to receive Holy Communion. Many priests, not members of the sect, were yet so far tainted with its severity as gradually to alienate large numbers of their penitents from the sacraments and consequently from the Church. (2) The condemned propositions summarized under the headings: “De perfectione christianis” in the Index of Jansenistic “Heretical and Schismatic Authors” (Würzburg, 1850), page 485, which are largely the principles of Quietism. These are specious: To obtain perfection a man ought to disdain all his faculties; he should take no vows, should avoid external work, ask God for nothing in particular, not seek sensible devotion, not study science, not consider rewards and punishments, not employ reasoning in prayer. (3) The errors and dangers pointed out in the Enchiridion of Leo XIII, “Testem Benedictin*” in it the pope singles out for particular condemnation: “First, all external guidance is set aside for those souls which are striving after Christian perfection as being superfluous, or indeed not useful in any sense, the contention being that the Holy Spirit will draw a monk headlong and bring him to death sooner than by persuading him to neglect the counsel of the Elders and trust to his own judgment and determination.” In the same document warnings are given against inculcating an exaggerated esteem of the natural virtues, thus depreciating the supernatural ones; also against casting contempt on religious vows, and especially pointing out to the poor the danger of giving them up to the spirit of our times, in that they restrict the bounds of human liberty, and that they are more suitable to weak than to strong minds”.

VI. An important document of Leo XIII bearing specifically on the direction of religious souls is the decree “Quemadmodum” of 1890. It forbids all religious superiors who are not priests “the practice of thoroughly inquiring into the state of their subjects’ consciences, which is a thing exclusively reserved to
the Sacrament of Penance”. It also forbids them to refuse to their subjects an extraordinary confessor, especially in cases where the conscience of the persons so refused stands greatly in need of this privilege; as also “to take it on themselves at their pleasure their subjects to approach the Holy Table, or even sometimes to forbid them Holy Communion altogether”. The pope abrogates all constitutions, usages, and customs so far as they tend to the contrary, and absolutely forbids such superioras as are here spoken of to induce in any way their subjects to make to them any such manifestations of conscience, (See the decree “Quemadmodum”, with explanations, in the American Ecclesiastical Review, March, 1893.)

Directories, Catholic.—The ecclesiastical sense of the word directory, as will be shown later, has become curiously confused with its secular use, but historically speaking the ecclesiastical sense is the earlier, Directory simply means guide, but in the later Middle Ages it came to be specially applied to guides for the recitation of Office and Mass. For example, in the early part of the fifteenth century one Clement Maydeston, probably following the models of his predecessors, adopted the title “Directorium Sacerdotum” for his reorganized Sarum Ordinal. In this way the words “Directory Sacerdotum” came to stand at the head of a number of books, some of them among the earliest products of the printing press in England, which were issued to instruct the clergy as to the form of Mass and Office to be performed on days and feasts throughout the year. This employment of the word directory was by no means peculiar to England. To take one convenient example, though not the earliest that might be chosen, we find a very similar work published at Augsburg in 1501, which bears the title: “Index sive Direc- torium Missarum Horarumque secundum ritum chori Constanciensis diocesis dicendarum”. As this title suggests, the office and Missal of the cathedral church of St. John in Constance was the subject of the Directory. The publication of Office and Mass had to be constructed according to the needs of a particular diocese or group of dioce- ses, for as a rule each diocese has certain saints’ days and feasts peculiar to itself, and these have all to be taken account of in regulating the Office, a single change often occasioning much disturbance by the necessity it creates of transferring coincident celebra-

zioni to other days. Out of the “Directorium Sacer- dotum” which in England was often called the “Pye”, and which seems to have come into almost general use about the time of the invention of printing, our present Directory, the “Ordo divini Officii recitandi Sacri- que peragendi” has gradually developed. We may note a few of the characteristics both of the actual and the ancient usage.

DIRECTORIES—It is now the custom for every diocese, or, in cases where the calendar followed is substantially identical, for a group of dioceses belonging to the same province or country, to have a “Direct- ory” or “Ordo recitandi” printed each year for the use of all the clergy. It consists simply of a calendar for the year, in which are printed against each day concise directions concerning the Office and Mass to be read on that day. The calendar is usually provided with some indication of fast days, special indulgences, days of devotion, and other items of information which may be convenient for the clergy to be reminded of as they occur. This Ordo is issued with the authority of the bishop or bishops concerned, and is binding upon the clergy under their jurisdiction. The religious orders have usually a Directory of their own, which, in the case of the larger orders, often differs according to the country in which they are resident. For the secular clergy the calendar of the Roman Missal and Breviary, apart from special privilege, always forms the basis of the “Ordo recitandi”. To this the feasts and saints’ days celebrated in the diocese are added, and, as the higher grade of these special celebrations often extend their jurisdiction, the Ordo will differ from the ordinary calendar, a certain amount of shifting and transposition is inevitable, even apart from the complica-
tions introduced by the movable feasts. All this has to be calculated and arranged beforehand in ac-
cordance with the rules supplied by the general rubrics of the Missal and Breviary. Even so, the clergy of particular churches have further to provide for the celebration of their own particular days of devotion or dedication, and to make such other changes in the Ordo as these insertions may impose. The Ordo is always compiled in Latin, though an exception is sometimes made in the Directories drawn up for nuns who recite the Divine Office, and, as it is often supplemented with a few extra pages of diocesan notices, recent decrees of the Congregation of Rites, notices of missals and motua- ritive Offices, etc., matters only affecting the clergy, it is apt to acquire a somewhat professional and ex-
clusive character.

How long a separate and annual “Ordo recitandi” has been printed for the use of the English clergy it seems impossible to discover. Possibly Bishop Chal- loner, Vicar Apostolic from 1741 to 1758, had some- thing to do with its introduction. But in 1759 a Catholic London printer conceived the idea of transla-
ting the official “Directorium”, or Ordo, issued for the clergy, and accordingly published in that year: “A Lay Directory or a help to find out and assist at Ves- pers . . . on Sundays and Holy Days”. Strange to say, another Catholic printer, seemingly the publisher of the official Ordo, shortly afterwards, conceiving his interests to be affected by this publication, published a rival publication: “The Lay’s Directory or the Order of the (Catholic) Church Service for the year 1764”. This “Lay’s Directory” was issued year by year for three-quarters of a century, gradually growing in size, but in 1857 it was supplanted by “The Catholic Directory” which since 1855 has been published in London by Messrs. Burns & Lam- bert, now Burns & Oates, the earliest numbers of the “Lay’s Directory” contained nothing save an abbreviated translation of the clerical “Ordo reci-
tandi”, but towards the end of the eighteenth century a list of the Catholic chapels in London, advertisements of schools, obituary notices, important ecclesias-
tical announcements, and other miscellaneous mat-
ters began to be added, and at a still later date we find
an index of the names and addresses of the Catholic clergy serving the missions in England and Scotland. This feature has been imitated in the "Irish Catholic Directory" and in the Catholic Directories of the United States. Hence the widespread idea that Catholic directories are so called because they commonly form an address book for the churches and clergy of a particular country, but an examination of the early numbers of the "Laity's Directory" conclusively shows that it was only to the calendar with its indication of the daily Mass and Office that the name originally applied.

Former Usage.—In the Middle Ages, and indeed almost down to the invention of printing, the books used by the clergy of the Church were much more divided up than they are at present. Instead of one book, our modern Breviary for example, containing the whole Office, we find at least four books—the Psalterium, the Hymnarium, the Antiphonarium, and the Legendarium, or book of lessons, all in separate volumes. Rubrics or ritual directions were rarely written down in connexion with the text to which they belonged (we are speaking here of the Mass and Office, not of the services of rarer occurrence such as those in the Pontifical), but they were probably at first communicated by oral tradition only, and when they began to be recorded they took only such summary form as we find in the "Ordines Romani" of Hittorp and Mabilion. However, about the eleventh century there grew up a tendency towards greater elaboration and precise form of these matters that are consistant for and primarily at the same time we notice the beginning of a more or less strongly marked division of these directions into two classes, which in the case of the Sarum Use are conveniently distinguished as the Customary and the Ordinal. Speaking generally, we may say that the former of these rubrical books contains the principles and the latter their application; the former determines those duties of persons, the latter deals with the arrangements which vary from day to day and from year to year. It is out of the latter of these books, i.e. the Ordinal (often called Ordinarium and Liber Ordinarius), that the "Directorium", or "Pye", and eventually also our own modern "Ordo recitandi" were in due time derived. The process was a gradual one. But we may distinguish in the English and also in the Continental Ordinals two different stages. We have, first, the type of book in common use from the twelfth to the fifteenth century, and represented by the "Sarum Ordinal" edited by W. H. Frere, or the "Ordinaria of Laon" edited by Chevalier. Here we have a great deal of miscellaneous information respecting feasts, the Office and Mass to be said upon them according to the changes necessitated by the occurrence of Easter and the shifting of the Sundays, as well as the "Incipits" of the details of the service, e.g. of the lessons to be read and the commemorations to be made. The second stage took the form of an adaptation of this Ordinal for ready use, an adaptation with which, in the case of Sarum, it is named "Directorium Sacerdotum", the complete "Pye" (known in Latin as Pica Sarum), abbreviated editions of which were afterwards published in a form which allowed it to be bound up with the respective portions of the Breviary. The idea of this great "Pye" was to give all the thirty-five possible combinations of clergy of a particular country, but an examination of the particular year admitted of, assigning a separate calendar to each, more or less corresponding to our present "Ordo recitandi". This arrangement was not peculiar to England.

One of the earliest printed books of the kind was that issued about 1175 for the Diocese of Constance, of which a rubricated copy is to be found in the British Museum. It is a small folio in size, of one hundred and twelve leaves, and after the ordinary calendar it supplies summary rules, under thirty-five heads, for drawing up the special calendar for each year according to the Golden Number and the Dominical Letter. Then the Ordo for each of the thirty-five possible combinations is set out in detail. The name most commonly given to these "Pyes" on the Continent was "Ordinaria" more rarely "Directorium Missae". For example, the title of such a book printed for the Diocese of Liège in 1492 runs: "In nomine Domini Amen ... Incipit fiber Ordinarius ostendens qualiter legatur et cantetur per totum annum circulum in ecclesia leodiensis tam de tempore quam de festis sanctorum in nocturnis officiis divinis." The copies of these were also provided for the religious orders. An "Ordinarius Dominicorum" exists in manuscript at Jesus College, Cambridge, and an early printed one in the British Museum. When the use of printing became universal, the step from these rather copious directories, which served for all possible years, to a shorter guide of the type of our modern "Ordo recitandi", and intended only for one particular year, was a short and easy one. Since, however, such publications are useless after their purpose is once served, they are very liable to destruction, and it seems impossible to say how early we may date the first attempt at producing an Ordo after our modern fashion. The fact that at the Council of Trent (Sess. XXIII, De Reform., cap. xviii) it was thought necessary to urge that ecclesiastical students should be trained in the Office, and that a "Directorium" which they could determine the ordo recitandi in each year for themselves, seems to imply that such Ordos as we now possess were not in familiar use in the middle of the sixteenth century.

Modern Directories.—At the present day it may be said that in every part of the world not only is a printed Ordo provided for the clergy of every Diocese and religious institute, but that almost everywhere some adaptation of this is available for the use of the laity. The earliest English attempt at anything of the sort seems to have been a little "Catholic Almanac", which appeared for three or four years in the reign of James II (see The Month, vol. CXI, 1905). But this was a mere calendar of feasts without any directions for the Office, and was not very complete. The Ordo of which we now speak appears under the title "The Irish Catholic Directory and Almanac for 1909, with a complete Directory in English" seems to have existed under various names since 1857 or earlier. It was first called "A Complete Catholic Directory", and then, in 1846, "Batterby's Registry", from the name of the publisher. For Scotland, though the Scottish missions are included in the "Catholic Directory" published in London, there is also a separate "Catholic Directory for the Clergy and Laity of Scotland" which began under a slightly different name in 1868. Catholic Directories also exist for the Australian and Canadian provinces, and occasionally for separate dioceses, e.g. the Diocese of Birmingham, England, possesses an "Official Directory" of the clergy (b) by description connected. This was the "Directorium Sacerdotum", the complete "Pye" (known in Latin as Pica Sarum), abbreviated editions of which were afterwards published in a form which allowed it to be bound up with the respective portions of the Breviary. The idea of this great "Pye" was to give all the thirty-five possible combinations of clergy of a particular country, but an examination of the particular year admitted of, assigning a separate calendar to each, more or less corresponding to our present "Ordo recitandi". This arrangement was not peculiar to England.
existence of the "Directorium Chori", a work originally compiled by Guidetti in 1582, possessing a quasi-official character and often reprinted since. It was intended for the use of the hebdomadarius and cantors in college churches, and is quite different in character from the works considered above.

See Scriven in Kirchenlexikon, s. v. Directorium. For the Pythion 1900, especially the Appendix to vol. II; and also in the same series, The Texts of Clement of Alexandria (London, 1894); Chevalier, Bibliographie liturgique (Paris, 1897—), in which is an article on the Catholic Directory and the Old-Established Reims, Bayeux, etc. On English directories, see Thurston, An Old-Established Periodical in The Month (London, Feb., 1882).

HERBERT THURSTON.

The United States.—These publications begin in the United States with an "Ordo Divini Officii Reitandi", published at Baltimore, in 1801, by John Hayes. It had none of the directory or almanac features. "The Catholic Laity's Directory to the Church Service with an Almanac for the year", an imitation of the English enterprise, was the next, in 1817. It was published in New York with the "permission" of the Bishop of New York, by Mathew Field, who was born in England of an Irish Catholic family and left there for New York in 1815. He died at Baltimore, 1832. His son, Joseph M. Field, was six years old when he arrived in New York, and became a prolific and brilliant writer, dying at Mobile in 1856. Joseph's daughter, Kate Field, was later the well-known author and lecturer. Though her works were never Catholic, she wrote this, the first of this type of work in the United States. This production, in addition to the ordinary almanac calendars, had a variety of pious and instructive reading matter with an account of the principal churches, colleges, seminaries, and institutions of the United States. It made up a small 32mo book of sixty-eight pages. Among other things, it promised the preparation of a Catholic magazine which, however, was never started. Of course, this first issue of this almanac was the next effort in the same direction, and on practically the same lines, was also at New York, in 1822, by W. H. Creagh. It was edited by the Rev. Dr. John Power, rector of St. Peter's Church, and says in the preface that it was "intended to accommodate the Missal with a view to facilitate the use of the same". The contents were: "Directions to Bishops" (English); "An alphabetic directory of the Episcopacy in the United States"; "Present Status of religion in the respective Dioceses"; "A short account of the present State of the Society of Jesus in the U. S."; and obituaries of priests who had died from 1811 to 1821. This was the only number of this almanac.

In 1834 Fielding Lucas of Baltimore took up the idea and brought out "The Metropolitan Catholic Calendar and Laity's Directory" for that year, to be published annually. He said in it that he had "intended to present it in 1832 but from circumstances over which he had no control it has been delayed to the present period". It prints a list of the hierarchy and the priests of the various dioceses, with their stations. In this publication and its various successors the title of the directory is to a high extent a superficial meaning, as the issues include no ecclesiastical calendar or Ordo. James Meyers "at the Cathedral" is the publisher of the subsequent volumes until 1838, when Fielding Lucas, Jr., took hold and changed the name "U. S. Catholic Almanac", which Meyers had given it, back to "Metropolitan Catholic Almanac". In the issue of 1835 there is inserted a map of the United States, "prepared at much expense to enable the public to at a glance the extent and relative situation of the different dioceses", with a table of comparative statistics, 1835 to 1845. A list of the clergy in England and Ireland was added in the volume for 1850. "Lucas Brothers" is the imprint on the almanac for 1856-57, and the Baltimore publication then ceased, to be taken up in 1858 by Edward Dunigan & Brother of New York, in 1859, "America's American Catholic Almanac and List of the Clergy". All general reading matter was omitted in this almanac, publication of which was stopped the following year when John Murphy & Co. of Baltimore resumed the compilation of the "Metropolitan Catholic Almanac". Owing to the Civil War no almanacs were published during 1862 or 1863. In 1864 in New York started "Sadlier's Catholic Directory, Almanac and Ordo", which John Gilmary Shea compiled and edited for them. It made a volume of more than 600 pages and gave lists of the clergy in the United States, Canada, Great Britain, Ireland, and Australasia, with diocesan statistics. This publication continued alone in the field until 1896, when Hoffman Brothers, a German firm of publishers of Milwaukee, brought out "Hoffman's Catholic Directory", which the Rev. James Fagan, a Milwaukee priest, compiled for them. In contents it was similar to the New York publication. This directory continued until 1896, when the Hoffman Company failed, and their plant was purchased by the Wiltzius Company, which has since continued the directory. The Sadler Directory was published in 1885.

The Wiltzius "Catholic Directory, Almanac and Clergy List" has reports for all dioceses in the United States, Canada, Alaska, Cuba, Sandwich Islands, Porto Rico, Philippines Islands, Newfoundland, England, Ireland, Scotland, and Wales, together with statistics of the Austro-Hungarian Monarchy, Belgium, Costa Rica, Guatemala, Salvador, German Empire, Japan, Luxemburg, The United States of Mexico, Netherlands, Norway, Oceanica, South Africa, The United States of Brazil, Curacao, Dutch Guiana, Switzerland, and the West Indies. It contains also an alphabetical list of all clergymen in the United States and Canada, as well as a map of the ecclesiastical provinces in the United States. It gives a list of English-speaking bishops abroad, American colleges in Europe, and the leading Catholic societies; statistics of the Catholic Indian and Negro missions, and a list of Catholic papers and periodicals in the United States and Canada.

In the almanac for 1837 it is noted, concerning the statistics, that "the numbers marked with an asterisk are not given as strictly exact, though it is believed to be an approximation. It is the aim to give an idea of the relative standing of the dioceses", and as far as could be ascertained from the statements forwarded to the editor from the several dioceses. On the same topic "Hoffman's Directory" for 1890 says: "It is much to be regretted that the statistics are not more carefully kept. In every diocese there are parishes that fail to report and many diocesan reports statistics are only partially correct, so that any general summary that can be made up at best is only an approximation." Dealing with this long-standing and well-founded complaint of inaccurate Catholic statistics, the archbishops of the United States, at their annual conference in 1907, resolved to co-operate with the United States Census Bureau in an effort to collect correct figures. Archbishop Glennon of St. Louis was appointed a special census official by the Government for this purpose, and under his direction an enumeration of the Catholics of every parish in the United States was made. The figures thus obtained were used in the "Directory" for 1909. It is the first, therefore, of these publications giving statistics of population on which any reliance can be placed in regard to a majority of dioceses.

CANADA.—In 1886, "Le Canada Eclesiastique, Almanach Annuaire du clergé Canadien", printed in French, was begun in Montreal. The contents are similar to those of the directories in English. Recent issues have a number of illustrations of local and historical interest, such as a series of portraits of the
Discerning of Spirits.—All moral conduct may be summed up in the rule: avoid evil and do good. In the language of Christian asceticism, spirits, in the broad sense, is the term applied to certain complex influences, capable of compelling the will, the ones toward good, the others toward evil; we have the worldly spirit of error, the spirit of race, the spirit of Christianity, etc. However, in the restricted sense, spirits indicate the various spiritual agents which, by their influence and movement, may influence the moral value of our acts. Here we shall speak only of this second kind. They are reduced to four, including, in a certain way, the human soul itself, because in consequence of the original Fall, its lower faculties are at variance with its superior powers. Conoscipence, that is to say, disturbances of the imagination and errors of sensibility, thwart or pervert the operations of the intellect and will, by deterring the one from the true and the other from the good (Gen., viii., 21; James, i, 14). In opposition to our vitiated nature or, so to speak, to the flesh which draws us into sin, the Spirit of God acts within us by grace, a supernatural help given to our intellect and will to lead us back to good and to the observance of the moral law (Rom., vii., 22-25). Besides these two, there are the Holy Ghost, the Third Person of the Divine, in the actual order of Providence, two others must be observed. The Creator willed that there should be communication between angels and men, and as the angels are of two kinds (see Angels), good and bad, the latter try to win us over to their rebellion and the former endeavour to make us their companions in obedience. Hence four spirits lie slyly without our knowledge and extinguish our friendship for the good and the human (in the sense heretofore mentioned); the diabolical its misery. In ordinary language they may, for brevity sake, be called simply the good and the evil spirit.

Discernment of spirits is the term given to the judgment whereby to determine from what spirit the impulses of the soul emanate, and it is easy to understand the importance of this judgment both for self-direction and the direction of others. Now this judgment may be formed in two ways. In the first case the discernment is made by means of an intuitive light which infallibly discovers the quality of the movement; it is then a gift of God, a grace gratis data, vouchsafed mainly for the benefit of our neighbour (1 Cor., xii., 10). This charisma or gift was granted in the early Church and in the person of the lives of the saints as, for example, St. Philip Neri. The second kind of discernment may be obtained through study and reflection. It is then an acquired human knowledge, more or less perfect, but very useful in the direction of souls. It is procured, always, of course, with the assistance of grace, by the reading of Holy Writ, of works on theology and asceticism, of autobiographies, and the correspondence of the most distinguished ascetics. The necessity of self-direction and of directing others, when one had charge of souls, produced documents, preserved in spiritual libraries, from the perusal of which one may see that the discernment of spirits is a science that has always flourished in the Church. In addition to the special treatises enumerated in the bibliography the following documents may be cited: for the history of the subject, the works of "St. Pseudo of Hermas" (I, II, Mand. VI, e. 2); St. Anthony's discourse to the monks of Egypt, in his life by St. Athanasius; the "De perfectione spirituali" (ch. 30-33) by Marcus Diadochus; the "Confessions" of St. Augustine; St. Bernard's XXIII sermon, "De discretione spirituum"; Gerson's treatise, "De diversis dia- logis confessores, martyrum, et sanctissimae Mariæ Virginis"; St. Francis's autobiographies and "Castle of the Soul"; St. Francis de Sales' letters of direction, etc.

An excellent lesson is that given by St. Ignatius Loyola in his "Spiritual Exercises". Here we find rules for the discernment of spirits and, being clearly and briefly formulated, these rules indicate a secure course, containing in embryo all that is included in the most extensive treatises of later date. For a complete explanation of them the best commentaries on the "Exercises" of St. Ignatius may be consulted, especially those by P. Gagliardi and a few authors like Godinez, Lopez Ezquerra, and Scaramelli who, setting aside the other parts of the "Exercises", are manifestly imbued with the doctrine of this book on the discernment of spirits. The author of "Exercises" was, by a saint inspired by Divine light and a learned psychiologist taught by personal experience, it will suffice to recall the principal ones. Ignatius gives two kinds and we must call attention to the fact that in the second category, according to some opinions, he sometimes considers a more delicate discernment of spirits adapted to the extraordinary course of mysticism. Be that as it may, he begins by enunciating this clear principle, that both the good and the evil spirit act upon a soul according to the attitude it assumes toward them. If it pose as their friend, they flatter it; if it resist them, they torment it. But the evil spirit speaks only to the imagination and the senses, whereas the good spirit acts upon reason and conscience, so that to the rational mind it is good to intensify love for God. Of course it may happen that a perfectly well-disposed soul suffers from the attacks of the devil deprived of the sustaining consolations of the good angel; but this is only a temporary trial the passing of which must be awaited in patience and humility. St. Ignatius also teaches us to distinguish the spirits by their mode of action and by the end they seek. Without any preceding cause, that is to say, suddenly, without previous knowledge or sentiment, God alone, by virtue of His sovereign dominion, can flood the soul with light and joy. But if there has been a preceding cause, either the good or the bad angel may be the author of the consolation; this remains to be judged from the consequences. As the

Diriment Impediments. See Impediments.

Discalced (Lat., dis, without, and calceus, shoe), a term applied to those religious congregations of men and women, the members of which go entirely unshod or wear sandals, or with or without covering for the feet. These congregations are often distinguished on this account from other branches of the same order. The custom of going unshod was introduced into the West by St. Francis of Assisi for men and St. Clare for women. After the various modifications of the Rule of St. Francis, the Observants adhered to the primitive custom of going unshod, and in this they were followed by the Minims and Capuchins. The Discalced Franciscans or Alcantarines, who prior to 1897 formed a distinct branch of the Franciscan Order, went without footwear of any kind. The followers of St. Clare at first went barefoot, but later came to wear sandals and even shoes. The Coletines and Capuchin Sisters returned to the use of sandals. Sandals were also adopted by the Camaldolese monks of the Congregation of Monte Corona (1522), the Unitarian monks, the Poor Hermits of St. Jerome of the Congregate of St. Pater, the Augustines of Thomas of Jesus (1532), the Barefooted Servites (1593), the Discalced Carmelites (1568), the Feuillants (Cistercians, 1575), Trinitarians (1594), Mercedarians (1604), and the Passionists. Discernment. See also DISCERNMENT.
Disciple.

Disciple.—This term is commonly applied to one who is learning any art or science from one distinguished by his accomplishments. Though derived from the Latin discipulus, the English name conveys a meaning somewhat narrower than its Latin equivalent: disciple is opposed to master, as scholar to teacher, whilst both disciple and scholar are juxtaposed under the Latin discipulus. In the English versions of the Old Testament the word disciple occurs only once (Is., viii, 16); but the idea it conveys is to be met with in several other passages, as, for instance, when the Sacred Writer speaks of the "sons" of the Prophets (IV K., ii, 7); the same seems, likewise, to be the meaning of the terms children and son in the sapiential books (e.g. Prov., iv, 1, 10, etc.). Never more frequently does the New Testament use the word disciple in the sense of pupil, adherent, one who continues in the Master's word (John, viii, 31). So we read of disciples of Moses (John, ix, 28), of the Pharisees (Matt., xxii, 16; Mark, ii, 15; Luke, v, 33), of John the Baptist (Matt., ix, 14; Luke, vii, 18; John, iii, 25). These, however, are only incidental applications, for the word is almost exclusively used of the Disciples of Jesus.

In the Four Gospels it is most especially applied to the Apostles, sometimes styled the "twelve disciples" (Matt., x, 1; xi, 1; xx, 17, xxvi, 20; the sixteenth verse of chapter xxviii, having reference to events subsequent to Christ's Passion, mentions only the "eleven disciples," joined by the boy and the prophet (Matt., xiv, 19; xx, 33, 36, etc.). The expression "his disciples" frequently has the same import. Occasionally the Evangelists give the word a broader sense and make it a synonym for believer (Matt., x, 42; xxvii, 57; John, iv, 1; ix, 27, 28, etc.). Besides the signification of "Apostle" and that of "believer" there is finally a third one, found in St. Luke, and perhaps also in the other Evangelists. St. Luke narrates (vi, 13) that Jesus "called unto him his disciples, and he chose twelve of them (whom also he named apostles)." The disciples, in this context, are not the crowds of believers who flocked around Christ, but a smaller body of His followers. They are commonly identified with the seventy-two (seventy, according to the received Greek text, although several Greek MSS. mention seventy-five), (Acts, vii, 53; xii, 1) as having been chosen by Jesus. The names of these disciples are given in several lists (Chronicon Paschale, and Pseudo-Dorotheus in Migne, P. G., XCl, 521–523; 543–545; 1061–1065); but these lists are unfortunately worthless. Eusebius positively asserts that no such roll existed in his time, and mentions that "some" of the names are those of Cephas, Matthias, Thaddeus, and James "the Lord's brother." (Hist. Eccl., i, xii). In the Acts of the Apostles the name disciple is exclusively used to designate the converts, the believers, both men and women (vi, 1, 2, 7; ix, 10, 19; etc.; in reference to the latter connotation see in particular x, 36), even such as were only imperfectly instructed, like those found by St. Paul at Ephesus (Acts, xix, 9) and in Thessalonica (1 Thess., ii, 13).}

Charles L. SouVay.

Disciples of Christ, a sect founded in the United States of America by Alexander Campbell. Although the largest portion of his life and protracted activity was spent in the United States, Alexander Campbell was born, 12 Sept., 1788, in the County Antrim, Ireland. On his father's side he was of Scotch extraction; his mother, Jane Connelige, was of Huguenot descent. Both parents are reported to have been persons of deep piety and high literary culture. His father, after serving as minister to the Anti-Burgher Church in Ahohey and director of a prosperous academy at Richhill, emigrated to the United States and engaged in the oft-attempted and ever futile effort "to found at all Christian commotions on a purely scriptural basis," the hallucinations of the sincere minds, the only outcome of which must always be, against the will of the Founder, to increase the discord of Christendom by the creation of a new sect. In 1808 Alexander embarked with the family to join his father, but was shipwrecked on the Scottish coast and took the opportunity to prepare himself for the ministry at the University of Glasgow. In 1809 he migrated to the United States, and found in Washington County, Pennsylvania, the nucleus of the new movement in the "Christian Association of Washington," under the auspices of which was issued a "Declaration and Address," setting forth the objects of the association. It was proposed "to establish no new sect, but to persuade Christians to abandon party names and creeds, sectarian usages and denominational strife, and associate in Christian fellowship, in the common faith in a divine Lord, with no other terms of religious communion than faith in and obedience to the Lord Jesus Christ."

An independent church was formed at Brush Run on the principles of the association, and, 1 Jan., 1812, Alexander was "ordained." His earnestness is attested by the large number of five sermons preached in one year; but he wrecked or seems to have wrecked a part of success by finding in his reading of the Scriptures the invalidity of infant baptism, and the necessity of baptism by immersion, thus excluding from the Christian dispensers the vast majority of believing Christians. On 12 June, 1812, with his wife, father, mother, and three others, Alexander was rebaptized by immersion, which thing he did not live to see, nor the number of new Baptists. This he did, but with the proviso that he should be allowed to preach and teach whatever he learned from the Holy Scriptures. The Baptists never took to him cordially; and in 1817, after five years of heretical labours, his followers, whom he wished to be known by the appellation of Disciples of Christ, were generally styled "Campbellites," numbered only one hundred and fifty persons. Campbell's mission as a messenger of peace was a failure; as time went on he developed a polemical nature, and became a sharp critic in speech and in writing of the weaknesses and vagaries of the Protestant sects. Only once did he come in direct contact with the "Catholic Church." "Sermonization of his five days' debate" in 1837, with Archbishop Purcell of Cincinnati, which excited great interest at the time but is now forgotten. His sixty volumes are of no interest. Campbell was twice married and was the father of twelve children.
He died at Bethany, West Virginia, where he had established a seminary, 4 March, 1866. President, or successor, is elected every 6 years.

The Disciplinary Power of the Church.

III. Disciplinary Power of the Church.—It is evident, therefore, that the disciplinary power of the Church is an essential part of its mission and authority. It is necessary for the maintenance of its spiritual and temporal order, and for the preservation of its spiritual and temporal interests.

The disciplinary power of the Church is exercised by its officers, who are elected or appointed by the Church. The officers of the Church are divided into two classes: the clergy and the laity. The clergy includes the bishops, priests, and deacons, who are appointed by the Church for the performance of its spiritual and temporal duties. The laity includes all the members of the Church, who are elected by the Church for the performance of its spiritual and temporal duties.

The disciplinary power of the Church is exercised by its officers for the purpose of maintaining the spiritual and temporal order of the Church. It is necessary for the preservation of the spiritual and temporal interests of the Church, and for the protection of the spiritual and temporal rights of its members.

The disciplinary power of the Church is exercised by its officers for the purpose of maintaining the spiritual and temporal order of the Church. It is necessary for the preservation of the spiritual and temporal interests of the Church, and for the protection of the spiritual and temporal rights of its members.

It is necessary for the preservation of the spiritual and temporal interests of the Church, and for the protection of the spiritual and temporal rights of its members.

The disciplinary power of the Church is exercised by its officers for the purpose of maintaining the spiritual and temporal order of the Church. It is necessary for the preservation of the spiritual and temporal interests of the Church, and for the protection of the spiritual and temporal rights of its members.

The disciplinary power of the Church is exercised by its officers for the purpose of maintaining the spiritual and temporal order of the Church. It is necessary for the preservation of the spiritual and temporal interests of the Church, and for the protection of the spiritual and temporal rights of its members.
Church is a phase, a practical application, of its power of jurisdiction, and includes the various forms of the latter, namely, legislative, administrative, judicial, and coercive power. As for the power of ordination (potestas ordinis), it is the basis of liturgical discipline by which its exercise is regulated. For the proof that the Church is a society and that, as such, it necessarily has the power of jurisdiction which it derives from Divinity, see Church. Disciplinary power is proved by the very fact of its exercise; it is an organic necessity in every society whose members it guides to their end by providing them with rules of action. Historically it can be shown that a disciplinary power has been exercised by the Church uninterruptedly, first by the Apostles and then by their successors. The Apostles in the first council at Jerusalem formulated rules for the conduct of the faithful (Acts, xv). St. Paul gave moral advice to the Christians of Corinth on virginity, marriage, and the agape (I Cor., vii, xi). The Pastoral Epistles of St. Paul are a veritable code of clerical discipline. The Church, moreover, has never ceased to represent herself as charged by Christ with the guidance of mankind in the way of eternal salvation. The Council of Trent expressed the disciplinary authority of the Church in all that concerns liturgical discipline and Divine worship (Sess. XXI, c. ii): “In the administration of the sacraments, the substance of the latter remaining intact, the Church has always had power to establish or to modify whatever she considered most expedient for the utility of those who receive them, or best calculated to ensure respect for the sacraments themselves according to the circumstances and requisites of its end place.” In fact, we need only to recall the numerous laws enacted by the Church in the course of centuries for the maintenance, development, or restoration of the moral and spiritual life of Christians.

IV. Mutability of Discipline.—That ecclesiastical discipline should be subject to change is natural since it was made for men and by men. To claim that it is immutable would render the attainment of its end utterly impossible, since, in order to form and direct Christians, it must adapt itself to the variable circumstances of time and place, conditions of life, customs of peoples and races, being, in a certain sense, like St. Paul, all things to all men. Nevertheless, neither the actual changes nor the possibility of further alteration must be exaggerated. There is no change in those disciplinary rules, which define essential truths, and which, although they belong to the faithful and confirms the natural and the Divine law, nor in those strictly disciplinary regulations that are closely related to the natural or Divine law. Other disciplinary rules may and must be modified in proportion as they seem less efficacies for the social or individual welfare. Thomasius aptly says (Vetus et nova Ecclesiae disciplina (ed. Lyons, 1706), pref. in xvii): “Whoever has the least idea of ecclesiastical laws, those that concern government as well as those that regulate morals, knows well that they are of two kinds. Some represent immutable rules of eternal truth, itself the fundamental law, the source and origin of these laws, from the observance of which there is no dispensation, against which no prescription obtains, and which are not modified either by diversity of custom or of place. While the Faith of the Church remains the same in all ages, it is not so with her discipline. This changes with time, grows old with the years, is rejuvenated, is subject to growth and decay. Though in its early days admirably vigorous, with time defects crept in. Later it overcame these defects and although along some lines its usefulness increased, in other ways its first splendour waned. That in its old age it languishes is evident from the leniency and indulgence which now seem absolutely necessary. However, all things fairly considered, it will appear that old age and youth have each their defects and good qualities.” Were it not necessary to exemplify the mutability of ecclesiastical discipline it would be quite unnecessary to make a choice. The ancient catechumenate exists only in a few rites; the Latin Church no longer gives Communion to the laity under two kinds; the discipline relating to penance and indulgences has undergone a profound evolution; matrimonial law is still subject to modifications; fasting is not what it formerly was; the use of censures in penal law is but the shadow of what it was in the Middle Ages. Many other examples will easily occur to the mind of the well-informed reader.

V. Disciplinary Infallibility.—What connexion is there between the discipline of the Church and her infallibility? Is there a certain disciplinary infallibility? It does not appear that the question was ever discussed in the past by theologians unless apropos of the examination of disciplinary powers of the Papacy in the case of religious orders. It has, however, found a place in all recent treatises on the Church (De Ecclesia). The authors of these treatises decide unanimously in favour of a negative and indirect rather than a positive and direct infallibility, inasmuch as in her general discipline, i.e. the common laws imposed on all the faithful, the Church can prescribe nothing that would be contrary to the law of God. It is evident that anything that the natural or the Divine law would exact. If well understood this thesis is undeniable; it amounts to saying that the Church does not and cannot impose practical directions contradictory of her own teaching. It is quite permissible, however, to inquire how far this infallibility extends, and to what extent, in her disciplinary activity, the Church makes use of the privilege of inerrancy granted her by Jesus Christ when she defines matters of faith and morals. Infallibility is directly related to the teaching office (magisterium), and although this office and the disciplinary power reside in the same ecclesiastical authorities, the disciplinary power does not necessarily depend directly on the teaching office. Teaching pertains to the order of truth; legislation to that of justice and prudence. Decisive, in fact, is the determination of whether civil laws are based on some fundamental truth, but as laws their purpose is neither to confirm nor to condemn these truths. It does not seem, therefore, that the Church needs any special privilege of infallibility to prevent her from enacting laws contradictory of her doctrine. To claim that disciplinary infallibility consists in regulating, without possibility of error, the adaptation of a general law to its end, is equivalent to the assertion of a (quite unnecessary) positive infallibility, which the incessant abrogation of laws would belie and which would be to the Church a burden and a hindrance rather than an advantage, since it would suppose each law to be the best. Moreover, it would make the application of laws to their end the object of a positive judgment of the Church; this would not only be useless, but would become a perpetual obstacle to disciplinary reform.

From the disciplinary infallibility of the Church, correctly understood as an indirect consequence of her doctrinal infallibility, it follows that she cannot be rightly accused of introducing into her discipline anything opposed to the Divine law; the most remarkable instance of this being the suppression of the chalice in the Communion of the laity. This has often been vio-

ently attacked as contrary to the Gospel. Concerning it the Council of Constance (1415) declared (Sess. XIII): “The claim that it is sacrilegious or illicit to observe this custom or law [Communion under one
kind] must be regarded as erroneous, and those who obstinately affirm it must be cast aside as heretics.  

The opinion, generally admitted by theologians, that the Church is infallible in her approbation of religious orders, must be interpreted in the same sense; it means that in her revelation of a manner of life designed to provide for the practice of the evangelical counsels she cannot come into conflict with these counsels as received from Christ together with the rest of the Gospel revelation.  (See Roman Congregations.)

THOMASSEN, Fetus et nova Disciplina education (ed. Lyons, 1700), preface; JELLEST A. KIRCHENBERG, s.v. III, chs. 6, 19, 52; Cavagni's discussion on Tolbert, Thed. dogm. comp. (Innsbruck [1778], I, 203-4), and WILMS, De Christ. Ecclesid. (Ratisbon, 1887), 469 sq.  

A. BOUDINON

Discipline of the Secret (Lat. Disciplina Arcanæ; Ger. Arcandisciplina), a theological term used to express the custom which prevailed in the earliest ages of the Church, by which the knowledge of the more intimate mysteries of the Christian religion was carefully kept from the heathen and even from those who were undergoing instruction in the Faith. The custom itself is beyond dispute, but the name for it is comparatively modern, and does not appear to have been used before the controversies of the seventeenth century, when, on the one hand, the drying up of the exegesis of the “Theology and canon” was published both in the Protestant and on the Catholic side.

The origin of the custom must be looked for in the recorded words of Christ: “Give not that which is holy to dogs; neither cast ye your pearls before swine; lest perhaps they trample them under their feet, and turning upon you, they tear you” (Matt., vii, 6). The doctrine in Gregory the Great is explicitly vouched for by St. Paul's assurance that he had fed the Corinthians “as . . . little ones in Christ”, giving them “milk to drink, not meat”, because they were not yet able to bear it (1 Cor., iii, 1-2).

With this passage we may compare also Heb., v, 12-14, where the same illustration is used, and it is declared that “solid food is for the perfect; for them which are of age, who by reason of use have sobriety of mind.” Although the origin of the custom is thus to be traced back to the very beginnings of Christianity, it does not appear to have been so general, or to have been carried out with so much strictness in the earlier centuries as it was immediately after the persecutions had ceased. This may be due in part to the construction of the Church in the fourth and fifth centuries, which was largely a matter of the actual care and supervision of the clergy. It would be impossible to say how much of this discipline was growing more strict all through the second and third centuries on account of the pressure of persecution, and that, when persecution was at last relaxed, the need for reserve was felt at first, while the Church was still surrounded by hostile Paganism, to be increased rather than diminished. After the fifth century, when the Church had been thoroughly established and secure, the need of such a discipline was no longer felt, and it passed rapidly away.

The practice of reserve (oikonomia) was exercised mainly in two directions, in dealing with catechumens, and with the heathen. It will be convenient to treat of these separately, as the reasons for the practice, and the mode in which it was carried out, differ somewhat in the two cases.

(1) Catechumens.—It was desirable to bring learners slowly and by degrees to a full knowledge of the Faith. A convert from heathenism could not profitably assimilate the whole Catholic religion at once, but must be taught gradually. It would be necessary for him to learn first the great truth of the unity of God, and not until this had sunk deep into his heart could he safely be instructed concerning the Blessed Trinity. Otherwise tritheism would have been the inevitable result. So again, in times of persecution, it was necessary to be very careful about those who offered themselves for instruction, and who might be spies wishing to be instructed only that they might betray. The doctrines to which the reserve was more especially applied were those of the Holy Trinity and the Sacrament of the Holy Eucharist. The Lord’s Prayer too, was jealously guarded from the knowledge of all who were not properly instructed. With regard to the Holy Eucharist and the Lord’s Prayer some relics of the practice still survive in the Church. The Mass of the Catechumens, that earlier portion of the Eucharistic service to which learners and neophytes were admitted, and which consisted of passages from Holy Scripture and sometimes included a sermon, is still quite distinguishable, though the custom no longer survives in the Western Liturgy, as it does in the Eastern, of formally bidding the uninitiated to depart when the more solemn part of the service is about to begin. So also the custom of saying the Lord’s Prayer in silence in all public services, except the later part of the Mass when the Catechumens, according to the ancient use no longer have been present, owes its origin to this discipline.

The earliest formal witness for the custom seems to be Tertullian (Apol., vii); Omnibus mysteriis silentii fides adhibetur. Again, speaking of heretics, he complains bitterly that their discipline is lax in this respect, and that evil received from Holy Scripture and Holy Writings must not be told to the uninitiated.” St. Gregory Nazianzen (Oratio xi, in s. bapt.) where he speaks of a difference of knowledge between those who are without and those who are within, and St. Cyril of Jerusalem whose “Catechetical Discourses” are entirely built upon this principle, and who in his first discourse uttered his heart’s desire, to tell what they have heard. “Should he (the catechumen) ask what the heathens have said, tell nothing to a stranger; for we deliver to thee a mystery . . . let no man say to thee, What harm if I also know it? . . . see thou let out nothing, not what is said is not worth telling, but because the ear that hears does not deserve to receive it. Thou thyself wast once a catechumen, and then I told thee in the secrecy of the Now I have to withhold from thee the height of what is taught thee, thou wilt know that the catechumens are not worthy to hear them” (Cat., Lct. i, 12). St. Augustine and St. Chrysostom in like manner frequently stop short in their public addresses, and, after a more or less veiled reference to the mysteries, continue with: “The initiated will understand what I mean.” St. Ambrose’s words in St. Augustine’s time taught eight days before baptism (Hom. xii, cf. “Enchir.”, Ixxi, and the “Apostolic Constitutions”, vii, xiv; St. Chrys., Hom. xx, al. xix, in Matt.). The Creed in like manner was taught just before baptism. So St. Ambrose, writing to his sister Marcellina (Epist. xx, Benedict, ed.), says that on Sunday, after the Mother and the Child had been brought during the Creed in the baptistry of the basilica to those who were sufficiently advanced. (Cf. also St. Jerome, Epist. xxxviii, ad Pammachius.) More detailed teaching about the Holy Trinity and about the other sacraments was only given after baptism. Other passages which may be consulted are : Chrys., Hom. in Matt.,” xxiii, “Hom. xviii, in I. Cor.; Paschasius, Augustine, “Serm. ad Neoph.”; I.; St. Ambrose, “De his qui mysteriis iterum et iterum.”; Gaudentius, “Ser. ii ad Neoph.”; Apost. Constit., III, v, and VIII, xi. The rule of reti
arence applied to all the sacraments, and no catechumen was ever allowed to be present at their celebration. St. Basil (De Spir. S. ad Amplphlochium, xxvii) speaking of the sacraments says: "One must not circulate in writing the doctrine of mysteries which none but the initiated are allowed to see." For baptismal reference may be made to Theodoret (Epitom. Decret., xviii), St. Cyril of Alexandria (Contr. Julian., i), and St. Gregory Nazianzen (Orat. xi, de bapt.).

The discipline with respect to the Holy Eucharist of course requires no proof. It is involved in the very nature of the Missa Catechumenorum, and one can scarcely in writing the doctrine of mysteries which none but the initiated are allowed to see. Confirmation was never spoken of openly. St. Basil, in the treatise already quoted (De Spir. S., xxv, 11), says that no one has ever ventured to speak openly in writing of the holy oil of unction, and Innocent I, writing to the Bishop of Gubbio on the sacramental "form" of this ordinance answers: "I dare not speak the words, lest I should seem rather to betray a trust, than to respond to a request for information" (Epist. i, 3). Holy orders in the same way were never given publicly. The Council of Laodicea forbade it definitely in its fifth canon. St. Chrysostom (Hom. xvii in 11 Cor.), in speaking of the practice of begging the prayers of the faithful for those who are to be ordained, says that the custom is "asserted co-operation with what is done. "For it is not lawful to reveal everything to those who are yet uninitiated." So also St. Augustine (Tract xi, in Joann.): "If you say to a catechumen, Dost thou believe in Christ? he will answer, I do, and will sign himself with the Cross. . . . Let us ask him, Dost thou eat the Flesh of the Son of Man and drink the Blood of the Son of Man? He will not know what we mean, for Jesus has not trusted himself to him."

(2) The Heathen.—The evidence for the reserve of Christian writers when dealing with religious questions in books which might be accessible to the heathen is, naturally, to a large extent of a negative character, and therefore difficult to produce. Theodoret (Quast. xv in Num.) lays down the general principle in terms which are quite clear and unmistakable: "We speak in obscure terms concerning the Divine Mysteries, on account of the uninitiated, but when these have withdrawn we teach the initiated plainly." That passage alone would suffice to refute the allegation not unfrequently made that the Discipline of the Secret was a confinement of the knowledge of the Divine Faith, and was introduced in imitation of the heathen "mysteries". On the contrary all Christians were taught the whole truth, there was no esoteric doctrine, but they were brought to full knowledge slowly, and precautions were taken, as was very necessary, to prevent heathens from learning anything of which they might make an evil use. A very striking example of the way in which the Christians of the early church were guarded against the teachings of St. Chrysostom. He writes to Pope Innocent I to say that in the course of a disturbance at Constantinople an act of irreverence had been committed, and "the blood of Christ had been split upon the ground." In a letter to the pope there was no reason for not speaking plainly. But Palladius, his biographer, speaking of the same incident in a book for general use, "I have only "the words of Christ" (Chrys. ad Inn., i, 3 in P. G., LI, 534; cf. Dollinger, "Lehre der Eucharistie," 15). It is, no doubt, on this account that almost all the early apologists, as Minucius Felix, Athenagoras, Amorbius, Tatian, and Theophilus, are absolutely silent on the Holy Eucharist. Justin Martyr and to a less degree Tertullian are more outspoken; the frankness of the former has been unduly urged to prove the non-existence of this institution in the first half of the second century. So again, as Cardinal Newman has observed (Development, 27), both Minucius Felix and Arnobius in controversy with heathens deny absolutely that Christians used altars in their churches. The obvious meaning was that they did not use altars in the heathen sense, and they must not be taken as denying the teaching of the Epistle to the Hebrews, that, in a Christian sense, "we have an altar".

The controversial importance of this subject in more recent times is, of course, obvious. The Catholics answered the accusation of Protestant writers, that their special doctrines could not be found in the writings of the early Fathers, by showing the existence of this practice of speaking or writing plainly on the doctrine of the Holy Eucharist, and that it was the result of persecution. They alleged therefore that Catholics could not use it to account for the silence of any writer before the latter part of the second century at the earliest. To this Catholics responded that, although no doubt the practice may have been intensified through persecution, it goes back to the very beginnings of the Christian religion and the teaching of the Apostles. Moreover it can be shown to have been in force before St. Justin's time, and his action must be regarded as an exception, rendered necessary by the need for putting before the emperor an account of the Christian religion which should be true and full.

The monuments of the earliest centuries afford interesting examples of the principle of the Discipline of the Secret. Monuments which could only speak of the mysteries of religion under veiled symbols. So in the catacombs there is scarcely any instance of a painting the subject of which is directly Christian, although all spoke of Christian truth to those who were instructed in their meaning. Jewish subjects typical of Christian truths were commonly shown, which may be veiled, and are called under the name and form of a fish (see Fisch) made the allusion to the doctrine of the Holy Eucharist possible and plain. There is, for example, the famous Autun inscription (see PECTORIS): "Take the food, honey-sweet, of the redeemer of the saints, eat and drink holding the Fish in thy hands"; words which every Christian would understand at once, but which conveyed nothing to the heathen. The monument of Abercius (q. v.) offers another notable instance.

The need for this reticence became less pressing after the fifth century, as Europe became Christianized and the discipline gradually passed away. We may, however, still trace its effects in the seventh century in the absurd misstatements contained in the Koran on the subject of the Blessed Trinity and the Holy Eucharist. This, perhaps, is almost the last instance which could be brought forward. Once the doctrines of the Church had been publicly set forth, any such discipline became impossible and no return to it was practicable. For a refutation of the theory of G. Anrich (Das antike Mysterienwesen, 1894), that the primitive Christians borrowed this practice from the mysteries of Mithra, see CUMONT, "The Mysteries of Mithra" (London, 1903), 196-99.

SCHLEEMAN, De disciplinis aromae (Antwerp, 1678); MILLER,
DISCUSS

Discus, See Paten.

Discussions, Religious (Conferences, Disputations, Debates), as contradistinguished from polemical writings, designate oral dialectical duels, more or less formal and public, between champions of divergent religious beliefs. For the most part, the more celebrated of these discussions have been held at the instigation of the civil authorities; for the Church has rarely shown favour to this method of ventilating revealed truth. This attitude of opposition on the part of the Church is wise and intelligible. A champion of orthodoxy, possessed of all the qualifications essential to the successful conduct of such a debate, and even over, it seems highly improper to give the antagonists of the truth an opportunity to assail mysteries and institutions which should be spoken of with reverence. The fact that the Catholic party to the controversy is nearly always obliged to be on the defensive places him at a disadvantage before the public, who, as Demosthenes remarks, “listen eagerly to revellings and accusations.” At any rate, the Church, as the custodian of Revelation, cannot abdicate her office and permit a jury of more or less competent individuals to decide upon the truths committed to her care.

St. Thomas (II-II, Q. x, a. 7) holds that it is lawful to dispute publicly with unbelievers, under certain conditions. To discuss as doubting the truth of the faith, is a sin; to discuss for the purpose of refuting error, is praiseworthy. At the church, as the custodian of the audience must be considered. If they are well instructed and firm in their belief, there is no danger; if they are simple-minded then, where they are solicited by unbelievers to abandon their faith, a public defence is needful, provided it can be undertaken by competent parties. But where the faithful are not exposed to such a trial, whether by the proceedings of some other parties, or the soft are conversed. It is not, then, surprising that the question of disputations with heretics has been made the subject of ecclesiastical legislation. By a decree of Alexander IV (1254–1261) inserted in “Sextus Decretalium,” Lib. V, c. ii, and still in force, all laymen are forbidden, under threat of excommunication, to dispute publicly or privately with heretics on the truth. The text reads: “Inhibemus ete quodque, ne quisque laece persone licet publice vel privatim de fide catholicae disputare. Qui vero contra fecerit, excommunicationis laqueo inmoder.” (We furthermore forbid any lay person to engage in dispute, either private or public, concerning the Catholic Faith. Whosoever shall act contrary to this decree, let him be bound in the fetters of excommunication.) This prohibition is the basis of the passage of each of the papal bulls, and is built upon the constant conclusions. The terms Catholic Faith and dispute have a technical signification. The former term refers to questions purely theological; the latter to disputations more or less formal, and engaging the attention of the public. There are numerous questions, somewhat connected with theology, which many laymen who have received no scientific theological training can treat more intelligently than a priest. In modern life, it frequently happens that an O'Connell or a Montalembert must stand forward as a defender of Catholic interests upon occasions when a theologian would be out of place. But when there is a question of dogmatic or moral theology, every intelligent layman will concede the propriety of leaving the exposition and defence of it to the clergy.

But the clergy are not free to engage in public disputes on religion without due authorization. In the “Collectanea S. Cong. de Prop. Fide” (p. 102, n. 294) we find the following decree, issued 8 March, 1625: “The Sacred Congregation has ordered that public discussions shall not be held with heretics, because for the most part, either owing to their loquacity or audacity they try to engage in the apostolate of the truth when the truth is crushed. But should it happen that such a discussion is unavoidable, notice must first be given to the S. Congregation, which, after weighing the circumstances of time and persons, will prescribe in detail what is to be done.” The Sacred Congregation enforced this decree with such vigour, that the custom of holding public disputes with heretics wellnigh fell into desuetude. [See the decree of 1631 regarding the missionaries in Constantinople; also the decrees of 1645 and 1662, the latter forbidding the General of the Capuchins to authorize such disputes (Collectanea, 1674, n. 302.)]

That this legislation is still in force appears from the letter addressed to the bishops of Italy by Cardinal Allen in 1836. In the chapter of the Sacred Congregation of Affairs (27 Jan., 1902) in which it is declared that discussions with Socialists are subject to the decrees of the Holy See regarding public disputes with heretics; and, in accordance with the decree of Propaganda, 7 Feb. 1845, such public disputations are not to be permitted unless there is hope of producing greater good and unless the conditions prescribed by the theologians are fulfilled. If the Holy See, it is added, doubts that these discussions often produce no result at all or even result in harm, has frequently forbidden them and ordered ecclesiastical superiors to prevent them; where this cannot be done, care must be taken that the discussions are not held without the authorization of the Apostolic See; and that only those who are well qualified to secure the triumph of Christian truth shall take part therein. It is evident, then, that no Catholic priest is ever permitted to become the aggressor or to issue a challenge to such a debate. If he receives from the other party to the controversy a public challenge under circumstances which make a non-acceptance appear morally impossible, he must refer the case to his canonical superiors and be guided by their counsels. The nature of the controversy is the principal matter of the utterances of the Apostles: for according to St. Peter (I Pet., iii, 15) you should be “ready always to satisfy everyone that asketh you a reason of that hope which is in you,” while St. Paul admonishes Timothy (II Tim., i, 14), “Contend not in words, for it is to no profit, but to the subverting of the hearers.”

Historic Disputations in Early Times—The disputations of St. Stephen and St. Paul, mentioned in the Acts of the Apostles, were rather in the nature of Apostolic pleading than of formal discussions. St. Justin’s “Dialogue with Tryphon” was, in all probability, a literary effort after the model of Plato’s dialogues. St. Augustine, the ablest disputant of all time, engaged in several set debates with Arians, Manicheans, Donatists, and Pelagians. Each of these great disputations is preserved among the saint’s works, and ought to be closely studied by those who are called to defend the Catholic cause. Of particular interest is the celebrated Conference of Carthage, convened by order of Emperor Honorius to finish the inveterate schism of the Donatists. It opened 1 June, 411, and lasted three days. The tribune Marcellinus represented the emperor, and in the presence of 286 Catholic and 279 Donatist bishops, St. Augustine, as chief spokesman of the Catholics, so completely upset the sectarian arguments, that the victory was
DISCUSSIONS

awarded to the Catholics, many prominent members of the sect were converted, and Donatism was doomed to a lingering death. Another memorable disputation took place in Africa a couple of centuries later (615) between St. Maximus, Abbot of Chrysopolis (Siculeni) and the Monothelites of Pyrrhus that had been driven from Constantinople by popular violence. It was conducted with rare skill and ended with the temporary conversion of Pyrrhus to the orthodox faith.

During the Reformation Period.—At the outbreak of the Lutheran and Zwinglian revolution, tumultuous discussions of religious subjects grew to be epidemic. Luther opened the revolt by inviting disputation upon his Ninety-Five Theses, 31 Oct., 1517. Although ostensibly framed to furnish matter for an ordinary scholastic dispute, Luther did not seriously contemplate an oral debate; for several of his theses were in variance with Catholic doctrine and could not be discussed at a Catholic university. Instead, they were widely scattered through Europe, everywhere creating confusion. An opportunity of disseminating more openly his peculiar tenets regarding justification by faith alone, the slavery of the human will, and the sinfulness of good works was offered to the Reformer by his order during a convention held at Heidelberg in April, 1518, when he directed a debate on twenty-eight theological and forty philosophical theses in the presence of many professors, students, citizens, and courtiers. Though his pointed tenets were viewed with deep displeasure by the older heads, he was successful in winning over several of his younger hearers, notably Brenz and the Dominican, Martin Bucer. Emboldened by the outcome of the Heidelberg Dispute, and having discovered that the road to success lay in captitating the young, the agitator made futile attempts at organizing disputations at the seats of learning; but no university would lend its halls to the dissemination of such doctrine.

The imprudence of Dr. Eck, who had become involved in a literary contest with Carlstadt and had hastily challenged his adversary to a public debate, gave Luther his long-looked-for opportunity. With his customary energy, he took the direction of the intellectual duel, encouraged both antagonists to persevere, and arranged the details. The city of Leipzig was chosen as the scene. Although the faculty of the university entered a vigorous protest, and the Bishops of Merseburg and Brandenburg launched prohibitions and an excommunication, the disputation took place under theegis of Duke George of Saxony. The discontent of the Catholics was increased when they learned that Luther had secured permission to subject a controversy with Eck to the jurisdiction of papal supremacy. Eck came to Leipzig with one attendant; Luther and Carlstadt entered the city accompanied by an army of adherents, mostly students. The preliminaries were carefully arranged; after which, from 27 June to 4 July (1519) Eck and Carlstadt debated the subject of free will and our ability to cooperate with grace. Eck had the better part of the argument, and Carlstadt was forced to make admissions which stultified the new Lutheran doctrine. Thereupon Luther himself came forward to assail the dogma of Roman supremacy by Divine right. Sweeping away the authority of decretals, councils, and Fathers, he discovered to his hearers, and possibly also to himself, how completely he had abandoned the basic principles of the Catholic religion. The controversy of 1519 showed that a new Huss had arisen to scourge the Church. The debate on the primaev was succeeded by discussions of purgatory, indulgences, penance, etc. On 14 and 15 July, Carlstadt, regaining courage, resumed the debate on free will and good works. Finally, Duke George declared the disputation closed, and each of the contendants departed, as usual, claiming the victory.

Of the two universities, Erfurt and Paris, to which the final decision had been reserved, Erfurt declined to intervene and returned the documents; Paris sat in judgment upon Luther's writings, attaching to each of his opinions the proper theological censure. The most tangible outcome of this disputation was not that, while it opened the eyes of Duke George to the true nature of Luther's revolt and attached him unalterably to the Church of his fathers, on the other hand it gained for the Lutheran cause the valuable aid of the youthful Melanchthon, who never understood the merits of the controversy, but was overawed by the vigorous personality of the Reformer.

The Leipzig Disputation was the last occasion on which the ancient custom of swearing to advance no tenet contrary to Catholic faith was used. In all subsequent debates between Catholics and Protestants, the bare text of Holy Writ was taken as the sole and sufficient foundation of authority. This, naturally, placed the Catholics in a disadvantaged position and narrowed their prospect of success. This was particularly the ease in Switzerland, where Zwingli and his lieutenants organized a number of one-sided debates under the presidency of town councils already won over to Protestantism. Such were the discussions of Zurich, 1523, of Swiss Baden, 1526, and of Berne, 1528. In all of these the result was invariably the same, the abolition of Catholic worship and the dissolution of churches and religious institutions.

Passing over the numerous futile attempts made by the Protestants to heal their internecine quarrels by means of colloquies, we come to the still more hopeless efforts of Charles V to bring the religious troubles of Germany to a "speedy and peaceful termination" by conferences between the Catholic and the Protestant divines. Since the Protestants proclaimed their determination to adhere to the terms of the Augsburg Confession, and, in addition, formally repudiated the authority of the Holy Roman emperor as "other judge of the controversy than Jesus Christ", it was to be foreseen that the result of conferences thus conducted could only be to waste time and increase the acrimony already existing between the parties. This was as clear to Pope Paul III as to Luther, both of whom predicted the inevitable failure. However, since the emperor and his brother, King Ferdinand, persisted in making such efforts, they were authorized, through their envoy, Morone, to proceed to Speyer, whether the meeting had been summoned for June, 1540. As the plague was raging in that city the conference took place in Hagena. Neither the Elector of Saxony nor the Landgrave of Hesse could be induced to attend. Melanchthon was absent through a heavy illness, and Eck, who had taken an ignoble part in the affair of the Landgrave's bigotry, the leading Protestant theologians at the conference were Bucer, Myconius, Brenz, Blauser, and Urbanus Rhegius. The most prominent on the Catholic side were Bishop Faber of Vienna and Dr. Eck. Present and actively intriguing to prevent an accommodation was John Calvin, then exiled from Geneva; he appeared at Speyer as an envoy of Francis I, whose settled policy it was to perpetuate religious discord in the domains of his rival. After a month wasted in useless wrangling, King Ferdinand protracted the conference to reassemble at Worms on 28 October.

Undismayed by the failure of the Hagena conference, the emperor made more strenuous efforts for the success of the contest at the Congress at Worms. He dispatched his minister Granvella and Ortiz, his envoy, to the papal court. The latter brought with him the celebrated Jesuit, Father Peter Faber. The pope sent the Bishop of Feltz, Tommaso Campeggio, brother of the great cardinal, and ordered Morone to attend. They were not to take part in the debates, but were to watch events closely and report to Rome. Granvella opened the proceedings at Worms, 25 Nov., with an
eloquent and conciliatory address. He pictured the evils which had befallen Germany, "once the first of all empire" and its religious liberty, and divested them of "the shining cloak," and warned his hearers that "all the evils that shall come upon you and your people, if, by clinging stubbornly to preconceived notions, you prevent a renewal of concord, will be ascribed to you as the authors of them." On behalf of the Protestants, Melanchthon returned "an intrepid answer"; he threw all the blame upon the Catholics, who refused to accept the settlement.

A great deal of time was spent in wrangling over points of order; finally it was decided that Dr. Eck should be spokesman for the Catholics and Melanchthon for the Protestants. The debate began 14 Jan., 1541. A tactical blunder was committed in accepting the Augsburg Confession as the basis of the conference. That document had been drawn up to meet an emergency. It was apologetic and conciliatory, so worded as to persuade the young emperor that there was no radical difference between the Catholics and the Protestants. It admitted the spiritual jurisdiction of the bishops and tacitly acknowledged the supremacy of the pope by laying the ultimate appeal with a council beyond convened. But many changes had taken place in the ten intervening years. The bishops had been driven out of every Protestant territory in Germany; the Smalkald confederates had solemnly abjured the pope and scorned his proffer of a council; each petty territorial prince had constituted himself the head and exponent of religion within his domain. For all practical purposes the Augsburg Confession no longer represented the views of the Lutheran theologians. Moreover, as Dr. Eck pointed out, the Augsburg Confession of 1530 was a different document from the Confession of 1530, having been changed by Melanchthon to suit his sacramental view of the Eucharist. Had the theologians at Worms reached an agreement on every point of doctrine, the discord in Germany would have continued until the leaven for the purposes had been driven out of the land by a series of edicts upholding their lucrative dominion over their territorial churches. Eck and Melanchthon battled four days over the topic of original sin and its consequences, and a formula was drafted to which both parties agreed, the Protestants with a reservation.

At this point Granvella suspended the conference, to the protests of both parties, whether the emperor had summoned a diet, which he promised to attend in person. This diet, from which the emperor anticipated brilliant results, was called to order 5 April, 1541. As legate of the pope appeared Cardinal Contarini, assisted by the nuncio Morone. The inevitable Calvin was present, ostensibly to represent Luneburg, in reality to foster discord in the interest of France. As collectors at the religious conference which met simultaneously, Charles appointed Eck, Pflug, and Gropper for the Catholic side, and Melanchthon, Bucer, and Pistorius for the Protestants. A document of mysterious origin, the "Ratisbon Book," was presented by Joachim of Brandenburg as the basis of agreement. This strange compilation, it developed later, was in reality a secret report of the meeting at Worms, between the Protestants, Bucer and Capito, on one side, and the Lutheranizing Gropper and a secretary of the emperor named Veltwick on the other. It consisted of twenty-three chapters, in which, by an ingenius phraseology, the attempt was made so to formulate the controverted doctrines that each party might find its own views therein expressed. How much Charles and Granvella had to do in the transaction, is unknown; they certainly knew and approved of it. The "Book" had been submitted by the Elector of Brandenburg to the judgment of Luther and Melanchthon; and their contemptuous treatment of it augured ill for its success. When it was shown to the legate and Morone, the latter was for rejecting it summarily; Contarini, after making a score of emendations, notably emphasizing in Article 14 the dogma that the pope had in some cases been a "priest and a private person" he could accept it; but as legate he must consult with the Catholic theologians. Eck secured the substitution of a conciser exposition of the doctrine of justification. Thus emended, the "Book" was presented to the collators by Granvella for consideration. The first four articles, treating of man before and after the fall, the origin of sin, and original sin, were accepted. The third article, on the fifth article, on justification, was reached. After long and vehement debates, a formula was presented by Bucer and accepted by the majority, so worded as to be capable of bearing a Catholic and a Lutheran interpretation. Naturally, it was unsatisfactory to both parties. The Holy See condemned it and administered a severe rebuke to Contarini for protesting against it. No greater success was attained as to the other articles of importance.

On 22 May the conference ended, and the emperor was informed as to the articles agreed upon and those on which agreement was impossible. Charles was sorely disappointed, but he was powerless to effect anything he desired. The emperor, in writing the "Ratisbon Interim," published 28 July, 1541, enjoining on both sides the observance of the articles agreed upon by the theologians, was by both sides disregarded. Equally without result was the last of the conferences summoned by Charles at Ratisbon, 1546, just previously to the outbreak of the Smalkaldic War.

The Colloquy at Poissy.—In 1550 six French cardinals, and the bishops of Lyons, Avignon, Paris, and two other bishops, with a host of minor prelates and doctors, wasted in a barren controversy with the Calvinists an entire month, which might have been spent far more advantageously to the Church and more in consonance with the duties of their offices had they taken their places in the Council of Trent. The papal legate was absented, and the regent during the minority of her son, Charles IX. Between this typical representative of the Medici and her contemporary, Elizabeth of England, there was little to choose. With both religion was simply a matter of expediency and politics. The Calvinist faction in France, though less than half a million in number, was aggressive and insolent, under the guidance of several prelates of the Church and other leaders, with the higher nobility. The fatal virus of Gallicanism and chronic disaffection towards the Holy See paralyzed Catholic activity; and although a general council was in session under the immediate presidency of the Roman pontiff, voices were heard even among the French bishops, advocating the convocation of a schismatical national synod. We may regard it as an extermination of the guilt of Catherine and her advisers, that they refused to go the whole length of a schism and chose the alternative of a religious conference under the direction of the civil power. The pope did his utmost to prevent what, under the circumstances, could only be construed as a public defiance of ecclesiastical authority. He dispatched the Cardinal of Ferrara, with Laynez, General of the Jesuits, as his adviser, to dissuade the regent and the bishops. But the affair had gone too far; on 9 Sept. the representatives of the rival religions began their pleadings before a woman and a boy, eleven years old. The proceedings were opened by a speech of Chancellor L'Hôpital, in which he emphasized the right and duty of the monarch to provide for the needs of the Church. Even should a general council be in session, a colloquy between Frenchmen convened by the king was the better way of settling religious disputes; for a general council, being, for the most part, composed of foreigners, was incapable of understanding the wishes and the needs of France. Yet these French politicians who refused to submit articles of faith to the decision of a
DISIBOD

37

general council because the majority of the Fathers were not French, chose as authoritative expounders of the dogmas of the Church the Genevan Beza and the Italian Vermigli.

It was a deep humiliation for the proud hierarchy of France to be compelled to listen to a long tirade by Beza against the most cherished of Catholic doctrines, the Real Presence of Christ in the Eucharist. They suppressed their feelings, out of respect for the king, until the hardy Reformer, in the heat of argument, gave utterance to his conviction that the Body and Blood of Christ were as far distant from the bread and wine, as the highest heaven is from the earth. This was too much for the bishops to bear, and they cried out, "He blasphemeth". It was too much for Catherine herself, and proved to her that the fundamental dogma of the Catholic Church was at stake. Beza's speech, revised and amended, was scattered broadcast among the people of France. We are told that the Cardinal of Lorraine confuted the heretic at the next session in a masterly address; but since he did not set it down in writing its value cannot be ascertained.

The only sensible speech made at this colloquy was that of the Jesuit Laynez, who had the courage to remind the queen that the proper place for ventilating subjects concerning the Faith was Trent, not Paris; that the Catholic Councils was the supreme pontiff, not the Court of France. Catherine wept; but instead of following the Jesuit's wise counsel, she appointed a committee of five Calvinists and five lukewarm Catholics, who drafted a vague formula which could be interpreted in a Catholic or a Calvinistic sense, and was consequently unsuited for a profession of faith.

The spread of Protestantism and the application of its fundamental principle of private judgment naturally produced far-reaching differences in belief. To heal these and so bring about unity, various conferences were held: at Weimar (1560), between the Lutherans, Strigel and Flacius, on free will; at Altenburg (1568-69), between the Jena theologians and those from Wittenberg, on free will and justification; at Montbéliard (1568), between Beza and the Tubingen theologians, on predestination. None of these resulted in harmony; they rather emphasized differences in belief and intensified partisanship.

DISPUTATIONS IN MODERN TIMES.—The conference of Poissy was the last attempt made to reconcile or slay over the radical differences of Catholicity and Protestantism. The subsequent debates between champions of the rival religions in more recent times; but in these each side laboured to establish its own position and prove that of its adversary untenable. The most memorable and successful of these modern disputations was the "Conference on the Authority of the Church" held 8 March, 1679, between Bossuet and the Calvinist minister Jean Claude. This was a model of close debate, in which, with due courtesy, each antagonist kept strictly to the subject in hand, the relation of the Church and the Bible. The fondness of English-speaking peoples for public debates has often shown itself in challenges, generally delivered by Protestant controversialists, to discuss religious topics in public. As a rule, they have produced no good results, since both sides revived worn-out arguments and wandered over too wide a field. Such was the "Controversial Discussion between Rev. Thomas Maguire and Rev. Richard T. Pope", held in the lecture-room of the Dublin Institution in April, 1827, Daniel O'Connell being one of the presiding officers. It was printed and widely circulated. Of a similar nature was the "Debate on the Roman Catechism" held between 21 Jan., 1837, between Alexander Campbell, the founder of the Campbellite sect, and Bishop John P. Purcell. More satisfactory, because confined within closer limits, was the celebrated "Discussion of the Question, Is the Roman Catholic Religion, in any or in all its Principles or Doctrines, Inimical to Civil or Religious Liberty? and of the Question, Is the Presbyterian Religion, in any or in all its Principles or Doctrines, Inimical to Civil or Religious Liberty?" debated in Philadelphia in 1836 between Rev. John Hughes, later Archbishop of New York, and Rev. John Breckinridge of the Presbyterian Church. Both parties kept their tempers remarkably well; but to judge from the violent riots which broke out not long after, the debate had little effect in extinguishing unreasoning prejudices. With the exception of this debate on religious questions at Rome, held in the Eternal City in 1872, there have been no oral religious discussions in recent times and this method of elucidating religious truth may be regarded as discomfited by modern public opinion.

DISPARITY

Disibod, Saint, Irish bishop and patron of Disenberg (Disibodenberg), born c. 619; d. 8 July, 700. His life was written in 1170 by St. Hildegard, from his own recollections. Conferences of Disibod in 758 against the heresies of the year 653, and settled in the valley of the Nahe, not far from Bingen. His labours continued during the latter half of the seventh century, and, though he led the life of an anchorite, he had a numerous community, which built bee-hive cells, in the Irish fashion, on the eastern slopes of the mountain. Before his death he consecrated a church erected, served by a colony of monks following the Rule of St. Columba, and he was elected abbot-bishop, the monastery being named Mount Disibod, subsequently Disenberg, in the Diocese of Mainz. Numerous miracles are recorded of the saint. Some authors are of opinion that his death really took place on 8 Sept., whilst the date 8 July is that of the translation of his relics in the year 751, St. Boniface being present. Acta SS., 8 July; MARIOLON, Annal. Ord. S. Bn., (Lavisse, 1730), IV; BUTLER, Lives of the Saints, 8 Sept.; O'HANSON, Lives of the Irish Saints (London, 1875), VII, 156.

W. H. CRATAN-FLORID.
DISPARITY

or simply disparity of worship, and implies a different relation on the part of the contracting parties in the matter of an essential religious rite to wit, the sacra-

ment of Baptism. Viewed in a less strict, but still a proper, sense, it is named imperfect disparity of worship or, more commonly, mixed religion (mixta reli-gio), which presupposes an equality as to the reception of baptism, but denotes a divergency as to form of belief and religious observance. Imperfect dispa-

rity or mixed religion, does not void the marriage of a Catholic with a baptized non-Catholic, but it does make it (unless dispensation intervenes) illicit and sinful. However, such a marriage may be null and void on account of another diriment impediment, e.g. clandestinity.

Disparity of worship, in its strict sense, and as the subject of this article, is that diversity which exists between two persons, one of whom has, and the other has certainly not, received Christian baptism. This disparity exists between a baptized Christian, whether Catholic or non-Catholic, and a pagan, Mohammedan, Jew, or even a catechumen (believer in the Catholic Faith yet not baptized). Imperfect disparity of worship, or mixed religion, might more strictly and properly be called disparity of faith, since faith (an internal act), and not baptism, is the real point of difference; perfect disparity of worship, on the contrary, might more aptly and properly be called disparity of baptism, for the reason that the external act (baptism), and not the internal assent of the mind (faith), is the fixed point of dissimilarity. Baptism has been chosen as the basis of this diriment impediment for a two-fold reason: (1) it is an external ceremony and recognition and proof, and (2) it is a sacrament which imprints an indelible character upon the soul of the receiver and so presents a personal religious condition which is fixed and unchangeable. Personal faith, on the contrary, viewed either as the internal assent of the mind or as the outward profession of the internal act, is so mutable, changeable and always easy of de-

monstration, and hence could not afford a solid and immovable foundation. The primary reason why Catholics are debarred from intermarriage with unbaptized persons is because the latter are not capable of receiving the Sacrament of Matrimony, as baptism is the door to all the other sacraments. Furthermore, according to the more probable opinion, the Catholic Church, with a view to the salvation of unbaptized persons, does not receive the sacrament or the concomitant graces (cf. Sanechez, Bk. II, disp. viii, n. 2; Pirring, Bk. IV, tit. i, n. 71; Schmalgruber, Bk. IV, tit. i, n. 307; Billot, “De Ecclesiae Sacra-
ments”, pars posterior, 539 sqq.; Hurter, III, 538, n. 598; and Wernz, who examines the reasons for the opposite opinion and answers them, “Jus Decret.”, IV, 63 sqq.). The Church has not decided this question; hence the opinion of Dominicus de Soto (In IV Sent., art. iii, ad finem), Perrone (III, 306), Rosset, who holds that it is the more probable (De Sacr. Matrimouii, I, 281 sqq.), and Tanquerey (Synopsis Theol. Dogmat., I, 618, n. 51), to wit, that the Catholic does receive the sacrament, is tenable. The marriage, according to both opinions, is certainly void (cf. Xlll., “Aracenum”, 10 Feb., 1880) and indissoluble.

EXTENT OF THE IMPEDIMENT.—This impediment exists only in instances where the disparity is of such nature that one of the contracting parties is, and the other party is certainly not, baptized. Every baptiz-

ed person. Protestant as well as Catholic, is subject to this disqualifying and annulling impediment, be-

cause Christ gave the Church jurisdiction over all who belong to it by baptism. Under the name “Catholic” are here included, besides practical Catholics, children baptized as infants in the Catholic Church but never reared or instructed in her teachings, Catholics who have fallen away or apostatized from the Catholic Faith and have joined other denomina-

tions or turned infidel. Once baptized always baptized, and always subject to the laws of Christ and His infallible Church, is axiomatic. Disparity of worship embraces and renders null and void (no dispensation having been granted) the marriage (a) of a Catholic with pagan, Mohammedan, Jew, or catechumen, and (b) of baptized non-Catholics, e. g. heretics and schismatics, with unbaptized persons. It does not extend to, or make void, the marriage (1) of two certainly unbaptized persons, for, since they do not belong to Christ by baptism, there is no jurisdiction over them; (2) of a Catholic with a baptized Protestant, or schismatic, or apostate Catholic, or Catholic turned infidel; (3) of baptized non-Catho-

lics with one another. Seeing that the parties in the second and third classes have been baptized, it is evi-

dent that their marriages are outside the domain of the diriment impediment, whose aim is to protect the sacrament.

Difficulties as to the marriages of Catholics with non-Catholics, and of non-Catholics with one another, or with pagans or other unbaptized persons have in these days multiplied, due either to absolute omission of baptism, or its careless and often invalid adminis-

tration even among the so-called Christian denominations. The difficulty of these cases is an axiom: (1) valid administration (dispensation) or valid administration (dispensation) of baptism in these sects are as a consequence frequent, and render complex the question whether or not disparity of worship covers the marriages in these instances. The safe guide in this confusion is the axiom: a doubtful baptism, as regards a marriage already, or about to be celebrated, is to be held valid if, after due in-

vestigation, the doubt is still insalubrious or it is not prudent (on account of delay, etc.) to remove it. This rule, so different from that governing baptism as a necessary means for salvation, is based upon the principle that the right to marry yields but to the evi-

dence (not doubt) of the non-baptism. Accordingly, disparity of worship invalidates the matrimonial union only if one of the partners be not a Christian and not baptized or be not a baptized Christian, and not certainly not baptized. The doubt may concern the act of baptizing or the validity of the ceremony. Inves-

tigation on these points must proceed in this manner: search must be made of the ritual belonging to the denomination of the party concerning whose baptism there is doubt, and if the ritual teaches the necessity of baptism, and that describes the use of the valid matter and form in its administration, and if the children are indeed those of strict adherents and observers of their religion, there is a certainty (sufficient for marriage) that the baptism was valid. If the ritual prescribes baptism with the necessary matter and form, but, upon investigation, a serious doubt remains, the baptiz-

at is still considered valid. If, on the contrary, the sect repudiates baptism, forbids infant-baptism, or admits to baptism only adults of thirty years, or the parents assert that they do not belong or wish to be-

long to any sect or denomination, but are satisfied with pleasing the Supreme Being by a good, moral life rather than by any fixed form of worship, then there is no certainty, not even a presumption, in favour of baptism. Should the parents be careless and negligent in the observance of the law which they are members, or belong to a denomination which, whilst not rejecting baptism, yet does not admit its necessity, and in which, ordinarily, baptism is not administered, then there is no presumption for or against the baptism of their offspring, and each indi-

vidual case must be referred to Rome (Congreg. of the Inquisition, 1 Aug., 1883).

Disparity of worship does not affect the marriage of a Catholic or baptized non-Catholic with one whose baptism, even after careful investigation concerning the baptismal ceremony or its validity, remains doubt-

ful. Neither does it in any way influence the mar-

riage of two who, after diligent examination, are still
considered doubtfully baptized. There is a difference of opinion among the jurists and theologians as to the influence of this diriment impediment upon the marriage of such doubly baptized, if after investigation it turns out for a certainty that they were certainly unbaptized. The more common opinion is that disparity of worship does not nullify this marriage. Gasparrí gives as reason that the consuetudinary law never contemplated this case, and hence does not influence it (De Matrimonio, I, nos. 597 and 601). Wernz (IV, 722, note), Gury-Ballerini (II, 384), and others say that the marriage of such doubly baptized children is the Church's dispensation, either special or general. Lehmkuhl (II, 536) distinguishes and asserts that if a dispensation from the prohibitive impediment of "mixed religion" has been granted antecedent to the marriage, the union is valid; his reason, however, that the Church in dispensing with the prohibitive did implicitly dispense with the diriment impediment, seems to be at variance with a decree of the Holy Office (29 April, 1840, n. 2) which clearly states that the Holy See dispenses with the impediment of disparity of worship only in express terms. Where no dispensation has been granted, he holds that the marriage is null on account of the existing disparity of worship and must be revalidated. He recognizes, however, as very valuable for the doubly baptized that one who was ever had been considered and had considered themselves Catholics, and had followed Catholic practices, and afterwards it was discovered that one of them had not been baptized (loc. cit. in note).

Origin of the Impediment.—This impediment, inasmuch as it is diriment, is not enjoined by the natural, Divine, or written ecclesiastical law, but has been introduced by a universal custom and practice in the Eastern and Western Churches since the twelfth century. The natural and Divine laws do, however, repudiate and prohibit such marriages as tend to frustrate the primary ends of marriage by exposing believers and their offspring to the loss of their Catholic faith, and this prohibition continues in force so long as the danger exists and no proportionately grave cause dictates the necessity of such marriage. The Mosaic Law (Deut., vii, 3) prohibits marriage between the Israelites and the Chanaanites, and even the Samarians (who kept the Law and had the Book of Moses), on account of the heathenish ceremonies they observed, lest the Jews might be turned away from the service of the true God and cling to the worship of the false gods. The New Testament also prohibits such marriages (I Cor., vii, 39): "... let her marry to whom she will but only in the Lord" and (II Cor., vi, 14): "... bear not the yoke with [i. e. do not marry] unbelievers," do not, indeed, declare invalid the marriages of Christians with unbelievers, but certainly do earnestly forbid the faithful to marry unbelievers unless the ends of Christian marriage are safeguarded and grave and weighty reasons exist for the union. Certainly in the time of St. Paul and immediately afterwards the proportionately small number of Christians was sufficiently grave cause for permitting such intermarriages with the hope of the conversion of the unbelieving partner.

With the development of the Church and its growth in numbers, opportunities for Christian marriage increased, reasons for mixed unions (unless in rare cases) ceased, and then the natural and Divine laws asserted their right to prohibit such marriages as tended to frustrate the ends of the matrimonial sacrament by exposing the Catholic to a weakening or loss of faith, the offspring to a lack of Christian education, and the family to a want of the Christian love which unites a worthy Christian family, as well as clergy, realized from sad experience and observation the ordinary tendency of mixed unions to a compromise or loss of faith on the part of the Catholic, and the un-Catholic bringing-up, or at least religious indifference, of the children, and, finally, injury to domestic peace and happiness by the constant exposure to disputes, and sometimes bitter quarrels, about the fundamental principles of Catholic Faith, and the consequent weakening, if not total extirpation, of Christian love between husband and wife (St. Ambrose, De Abraham, Bk. I, ch. ix, says: "There can be no unity of love where there is no unity of faith"). At different periods and in different countries (especially Spain and Gaul) particular councils inveighed against them, and although these laws were not strictly observed, and the frisson of mixed marriages continued in the Church, many mixed marriages were permitted by St. Jerome (Lib. I in Jovinianum) and Augustine (Lib. de Fide et operibus, ch. xix), yet after the death of the latter, and especially from the seventh to the twelfth century, the detestation of them so increased, and the conviction that they were not Christian marriages, and therefore to be shunned and not contracted, grew so strong and general throughout the entire Church that as far back as the twelfth century it was a universal custom and practice which even had the force of a universal church law (Bellarmine, De Controversiis, III, De Sacramento Matrimonii, Bk. I, ch. xxiii; Benedict XIV, Constit. "Singulari nobis", paragraphs 9 and 10).

This impediment is binding on Christians of newly converted or even pagan countries, where there has been no such custom inasmuch as there have been no Catholics. The opinion of Lessius and others to the contrary is clearly refuted by the granting of faculties by Gregory XIII to the Christian missionaries of Japan to dispense with this impediment in the cases of newly converted Japanese Catholics. Many theologians and canons say that there is one exception to this nullifying law, and that is the instance of an emigrant Catholic family settled in a pagan country without a single Catholic neighbour, forty or fifty days journey removed from the nearest Catholic, and unable on account of the distance or want of means to leave the country or procure a dispensation from the impediment, and thus compelled to remain their whole lives single or marry pagans (Santi-Lehner, IV, 74; Gasparrí, De Matrimonio, I, 429). It does not seem that disparity of worship holds in a case of this kind; the ecclesiastical law under such circumstances does not bind a man so as to deprive him of his natural right to marry. Wernz, however (Jus Decret., IV, 775, n. 37), holds the opposite opinion.

Dispensation from the Impediment.—The Church can dispense from this impediment, inasmuch as it is of ecclesiastical institution. It never does so unless for gravest reasons and upon the fulfillment of certain conditions and guarantees that safeguard, as far as possible, the ends of the Sacrament of Matrimony. The natural and Divine laws, before permitting mixed marriages, exact the removal of all danger to the faith of the Catholic and to the baptism and Catholic bringing-up of all the children of the marriage. The Church cannot dispense with this necessary requirement, and the better to ensure its presence, insists upon certain conditions and promises, which must be committed to writing and signed and, in some instances and countries, also sworn to, by the unbaptized party to the pact. The Church never permits the parties to dispense with the requirements of the Church, and the Church in no case grants the permission for the marriage. The promises on the part of the unbaptized party are: (1) that he (or she) will afford the Catholic partner full and perfect freedom to practise the Catholic Faith, and that he (or she) will abstain from saying or doing anything to lessen or change that faith, and, if he be an inhabitant of a country that tolerates or permits polygamy; (2) that he (or she) will permit all children of their union to be baptized and rear in the Catholic Faith and practice, and that he (or she) will do or say nothing calculated to lessen their faith or turn
them away from it or its practices. The Catholic petitioner for the dispensation must also give promise (usually also written, in order that the dispenser may have a moral certainty of the absence of danger to the substantial ends of the sacrament) that he (or she) will strictly attend to his (or her) personal religious duties and have all the children baptized and properly reared and trained in the Catholic doctrine and practice, and that by prayer and good example and other legitimate and prudent means he (or she) will constantly labour to bring about the conversion to the Catholic Faith of his (or her) unbaptized partner. The promise to strive to effect the conversion of the unbeliever is of special importance, although too frequently neglected. The sovereign does not merely in most cases eliminate the last vestige of possible perversions of the Catholic party, ensures the primary end of marriage, i.e. the bearing and rearing of children for the Church and heaven, and rounds out, by the perfect unity of the married couple in faith and Christian love, their marriage according to its great type, the union of Christ with the Church. Even with all these promises, written and sworn to as safeguards to Christian marriage, a dispensation cannot be licitly given unless a grave necessity, proportionate to the great risks to be encountered, justifies the marriage.

This dispensation, in former days very rarely granted in Catholic countries, is now of more frequent occurrence, owing to the existence of "civil marriage" and growing, if not always apparent, disparities in the matter of their children’s baptism. The rule of the Church was, and is, not to grant a dispensation from this impediment unless in provinces or countries where the Catholics are largely outnumbered by the non-baptized inhabitants. Rather than dispense from the disparity of worship, the Church will more willingly and readily grant dispensation from the impediment eliminating the necessity for legitimacy, precisely for the reason that in the latter cases there is no danger to the faith of either Catholic or offspring, while in the case of the former, even though the necessary promises are made and kept, there is always danger of religious indifference or independence on the part of the Catholic parent, and especially of the children on account of the example of the non-baptized parents, as for the same reasons one can more readily dispense with this impediment; bishops cannot. They, however, are delegated to do so, but in the pope’s name and by virtue of the delegated authority. Thus the bishops in pagan countries—China, Japan, Africa, etc.—and in countries where the unbaptized largely outnumber the Catholics, as England, United States, etc., have ample faculties in respect of this impediment. To-day the only case (and should there be danger in delay it is not; see Formula T, 11 June, 1907) reserved to Rome in the faculties granted to bishops of the United States is that of a Catholic with an orthodox Jew, i.e. a circumcised follower of Judaism. The case of a Jew uncircumcised, or even circumcised if he has abandoned Judaism, is not covered. All bishops can (decrees of Congreg. of Inquis., 20 Feb., 1888, and 1 March, 1889) dispense, and delegate the parish priests to dispense, from the impediment of disparity of worship in the case of one who is in danger of death but is only civilly married or lives in concubinage. The aforesaid promises cannot be omitted. The sick party must promise absolutely to observe the requirements of the natural and Divine laws, and to carry out the injunctions of the ecclesiastical law as far as possible (Collectanea S. C. de Prop. Fide, n. 2188). Bishops cannot dispense in instances where the ends, purposes, and substantial blessings of the sacrament are well protected, unless there also exists a grave and proportionately weighty reason. There are sixteen canonical reasons, some grave and others still more grave (Inst. S. C. de Prop. Fide, 9 May, 1877). Should the bishop dispense without cause, the dispensation would be null and void. The pope’s dispensation, in a similar case labouring under the same defect, would be valid. The reason of this difference is that a bishop cannot violate the law of his superior (in this instance the universal law), whereas the pope, who is supreme legislator, can dispense from all resolutions. The ecclesiastical courts do so validly with the prohibition of the natural and Divine laws; hence he must have, before conceding the dispensation, a moral certainty that the practice of the Faith by the Catholic, and the Catholic baptism and rearing of the children, are amply protected. The Holy See dispenses from this impediment only for the gravest reasons and only in express terms (Collectanea S. C. de Prop. Fide, n. 948, 2); hence a dispensation from mixed religion instead of disparity of worship would not suffice for the validity of the marriage.

All the European Governments (except Austria) ignore this impediment. The Austrian impediment is different from the ecclesiastical impediment. It is the law of the party who has the majority of the children, and, so far as Catholicism is concerned, this civil impediment is more injurious than otherwise. According to the Austrian law, the marriage of a Catholic with a Jew, or other unbaptized party, is civilly invalid as long as the Catholic remains in the Catholic Church. Should the Catholic leave the Church, and announce that he (or she) held no belief in any faith, the marriage with an unbaptized party would be civilly valid. Unbaptized parties can, on the other hand, enter into civilly valid marriage with baptized Protestants. The Church in granting dispensation from disparity of worship, thus permitting the marriage of a Catholic and an unbaptized person, by that act dispenses also from all impediments of purely ecclesiastical nature. Should the Church exempt (except clandestinity: cf. "Praxis Curiae Romana"); "Non Tenere", 2 Aug., 1907); the Church does this in order that the exemption of the unbaptized may, on account of the indissolubility of the marriage, be communicated to the Catholic party (Congreg. of Inquis., 3 March, 1825). This dispensation never includes dispensation in any degree in the direct line of Divine authority (cf. Bullarium, pont. decreta, n. 13, 1587; Jus., 127, n. 3, 1893; Bullarium, 1860, 1277). This dispensation, which is publici juris, can be invoked by any Catholic to annul a marriage contracted without the necessary dispensation. The burden of proof rests upon the challenger, who must clearly demonstrate that there was either no act of baptismal administration or that the act of baptismal administration (however illegally and unjustly made) was certainly invalid. The usual canonical laws of evidence are supplemented by special laws laid down for the demonstration of the ceremony or the validity of the baptism. The customary norm (c. 111, X, De presby. non-bap., 111, xiiii) in case of practical Catholici
civilly determined to give in the case of the death of the deceased (Congreg. of Prop. Fide, 1851) for the verification of the fact or non-fact of the baptism, as also of the validity of the act, must be strictly followed.

Dispensation

P. M. J. Rock.

Dispensation (Lat., dispensatio), an act whereby in a particular case, a lawful superior grants relaxation from an existing law. This act may be divided into: (1) Dispensation in General; (2) Matrimonial Dispensations. For dispensations from vows see Vows and Religious Orders; and from fasting and abstinence, Fast, Abstinance.

I. Dispensation in General.—Dispensation differs from abrogation and derogation, inasmuch as this supposes the law totally or in part, whereas a dispensation leaves it still in vigour; and from epiekaia, or a favourite interpretation of the purpose of the legislator, which supposes that he did not intend to include a particular case within the scope of his law, whereas by dispensation a superior withdraws from the power of the law a case which otherwise would fall under it. The raison d'être for dispensation lies in the nature of personal administration which often compels the adapting of general legislation to the peculiarity of a particular case by way of exception. This is peculiarly true of ecclesiastical administration. Owing to the universality of the Church, the adequate observance by all its members of a single code of laws would be very difficult. Moreover, the Divine purpose of the Church, the welfare of souls, obliges it to reconcile as far as possible the general interests of the community with the spiritual needs or even weaknesses of its individual members. Hence we find instances of ecclesiastical dispensations from the very earliest centuries; such early instances, however, were meant rather to legitimize accomplished facts than to authorize beforehand the doing of certain things. Later on antecedent dispensations were frequently granted; as early as the eleventh century Yves of Chartres, among other canonists, outlined the theory on which they were based. With reference to matrimonial dispensations now common, we meet in the sixth and seventh centuries with a few examples of general dispensations granted to legitimize marriages already contracted, or permitting others about to be contracted. It is not, however, until the second half of the eleventh century that we come upon papal dispensations in individual cases. The earliest examples relate to already existing unions; the first certain dispensation for a future marriage dates from the beginning of the thirteenth century. In the sixteenth century the Holy See began to give ample facilities to bishops and missionaries in distant lands; in the seventeenth century such privileges were granted to other ecclesiastics. Such was the origin of the ordinary faculties of the Faculties, Canonical now granted to bishops.

I. KINDS OF DISPENSATION.—(a) A dispensation may be explicit, tacit, or implicit, according as it is manifested by a positive act, or by silence under circumstances amounting to acquiescence, or solely by its connexion with another positive act that presupposes the dispensation. (b) It may be granted in foro interno, or in foro externo, according as it affects only the personal conscience, or conscience and the community at large. Although dispensations in foro interno are used for serious cases, they are also often granted in public cases; hence they must not be identified with dispensations in casu occulti. (c) A dispensation may be either direct or indirect, according as it affects the law itself, or merely by suspending or modifying the object of the law in such a way as to withdraw it from the latter's control. For instance, when a dispensation is granted from the matrimonial impediment of a vow, the pope remits the obligation resulting from the promise made to God, consequently also the impediment it raised against marriage. (d) A dispensation may be in formâ gratiosâ, in formâ commissâ, or in formâ commissâ mixtâ. Those of the first class need no execution, but contain a dispensation granted ipso facto by the superior in the act of sending it. Those of the second class give jurisdiction to the person named as executor of the dispensation, if he should consider it advisable; they are, therefore, for favours to be granted. Those of the third class compel the executor to deliver the dispensation if he can verify the accuracy of the facts on which such dispensation is asked; they seem, therefore, to contain a favour already granted. From the respective nature of each of these forms of dispensation result certain important consequences that affect delegation, obregation, and revocation in the matter of dispensations (see Delegation; Obregation; Revocation).

2. The Dispensing Power.—It lies in the very notion of dispensation that only the legislator, or his lawful successor, can of his own right grant a dispensation from the law. His subordinates can do so only in the measure that he permits. If such communication of ecclesiastical authority is made to an inferior by reason of an office he holds, his power, though derived, is known as ordinary. If it is only given him by the superior of his order, it is known as delegated. When such delegation takes place through a permanent law, it is known as delegation by right of law. It is styled habitual, when, though given by a particular act of the superior, it is granted for a certain period of time or a certain number of cases. Finally, it is called particular if granted only for one case. When the power of dispensation is ordinary it may be delegated to another, but such a delegation is known as dispensation. When such delegation takes place through an unexpressed law, it is known as delegation ad universilimum causarum, i.e. for all cases of a certain kind, and for delegation by the pope or the Roman Congregations. Even these exceptions do not cover delegations made because of some personal fitness of the delegate, nor those in which the latter receives not actual jurisdiction to grant the dispensation, but an appointment to execute it, e.g. in the case of dispensations granted in formâ commissâ mixtâ (see above).

The power of dispensation rests in the following persons: (1) The Pope.—He cannot of his own right dispense from the Divine law (either natural or positive). When he does so, he does so by derived power communicated to him as Vicar of Christ, and the limits of which he determines by his magisterium, or authoritative teaching power. There is some diversity of opinion as to the nature of the pope's dispensing power in this respect; it is generally held that it operates by way of indirect dispensations: that is, by dispensing, he remits the obligation resulting from his deliberate consent, and thereby the consequences that by natural or positive Divine law flowed from such obligation. The pope, of his own right, has full power to dispense from all ecclesiastical laws, whether universal or particular, even from the disciplinary canons of the Church. Such authority is consequent on his primacy and the fullness of his immediate jurisdiction. A part of this power, however, he usually communicates to the Roman Congregations.

(b) The Bishop.—Of his ordinary right, the bishop can dispense from his own statutes and from those of his predecessors, even when pensions in a diocese, and other dispensation, were granted (where he alone is legislator). From the other laws of the Church he cannot dispense of his own right. This is evident from the nature of dispensation and of diocesan jurisdiction. A principle main-
tained by some authors, viz. that the bishop can grant any dispensation which the pope has not specially served to himself, cannot be admitted. But by derieved right (either ordinary or delegated according to the terms of the grant) the bishop can dispense from those laws that expressly permit him to do so or from those for which he has received an indulgence to that effect. Moreover, by ordinary right, based on custom or the tacit consent of the Holy See, he may dispense in a case where recourse to the Holy See is difficult and where delay would entail serious danger; (b) in doubtful cases, especially when the doubt affects the necessity of the dispensation or the sufficiency of the motives; (c) in cases of frequent occurrence but requiring dispensation, also in frequently occurring matters of minor importance; (d) in decrees of national and provincial councils, although he may not pronounce a general decree to the contrary; (e) in pontifical laws specially passed for his diocese. It should be always remembered that to fix the exact limit of these various powers legitimate custom and the interpretation of reputable authors must serve as guides. Superiors of exempt religious orders (see Exception) can grant to their subjects, individually, the dispensation from laws within their own right; the bishop grants by his ordinary power. When there is question of the rules of their order they are bound to follow what is laid down in their constitutions (see Religious Orders).

(C) The Vicar-General.—He enjoys by virtue of his appointment the ordinary dispensing power of the bishop, also the delegated powers of the latter, i. e. those which are not personally but as ordinary (according to present discipline, the pontifical faculties known as ordinary); exception is made, however, for those powers which require a special mandate like those of the chapter Liceat, for dealing with irregularities and secret cases. The vicar capitular likewise has all the dispensing power which the bishop holds of his own right, or which has been delegated to him by ordinary.

(D) Parish Priest.—By his own ordinary right, founded on custom, he may dispense (but only in particular cases, and for individuals separately, not for a community or congregation) from the observance of fasting, alstince, and Holy Days. He can also dispense, within his own territory, from the obligation of stating cases for which he is empowered to dispense, to do so; the terms of these statutes usually declare the extent of such power, also whether it be ordinary or delegated. Dispensation being an act of jurisdiction, a superior can exercise it only over his own subjects, though as a general rule he can do so in their favour even outside his own territory. The bishop and the parish priest, except in circumstances governed by special enactments, acquire jurisdiction over a member of the faithful by reason of the domicile or quasi-domicile he or she has in a diocese or parish (see Domicile). Moreover, in their own territory they can use their dispensing power in respect of persons without fixed residence (e.g.), probably also in respect of travellers temporarily resident in such territory, or a general rule he who has power to dispense others from certain obligations can also dispense himself.

(3) Causes for Granting Dispensations.—A sufficient cause is always required in order that a dispensation may be both valid and licit when an inferior dispenses from a superior's law, but only for the licency of the act when a superior dispenses from his own law. Nevertheless, in this latter case a dispensation granted without a motive would not (in se), except for some special reason, e. g. scandal, constitute a serious fault. One may be satisfied with a probably sufficient cause, or with a cause less than one that, of itself and without any dispensation, would excuse from the law. It is always understood that a superior intends to grant only a licit dispensation. Therefore a dispensation is null when in the motives set forth for obtaining it a false statement is made which has influenced not only the causa impulsive, i. e. the reason inclining the superior more easily to grant it, but also the causa motiva, i. e. the really determining reason for the grant in question. For this, and in general for the information which should accompany the petition, in order that a dispensation be valid, see below apropos of causes and assessment in rescripts of dispensation. Consequently a false statement of the fraudulent withholding of information, i. e. done with positive intention of deceiving the superior, totally annuls the dispensation, unless such statement bear on a point foreign to the matter in hand. But if made with no fraudulent intent, a false statement does not affect the grant unless the object of the statement be some circumstance which ought to have been expressed under pain of nullity, or unless it affects directly the motive cause as above described. Even then false statements do not always nullify the grant; for (a) when the dispensation is composed of several distinct and separable parts, that part or element alone is nullified on which falls the oblation or subrubtion, (b) in the case may be (b) when several adequately distinguished motives exist, every dispensation is null and void only when the oblation or subrubtion in question affects them all. It is enough, moreover, that the accuracy of the facts be verified at the moment when the dispensation is granted. Therefore, in the case of dispensations ex gratia (or in formà gratiased), i. e. granting favours, the facts must be true when the dispensation is made, but as the granting and, on the other hand, in the case of dispensations in formà commissà (and according to the more general opinion, in those in formà commissà mixtì), the causes alleged must be verified only when the dispensation is actually executed.

(i) Form and Interpretation.—It is proper, generally speaking, that dispensations be asked for and granted in writing. Moreover, the Roman Congregations are forbidden by rule to receive petitions for dispensations or to answer them by telegram. The execution of a dispensation made on receipt of telegraphic information that such dispensation had been granted would be null, unless such means of communication had been officially used by special authorization from the pope. Except when the interest of a case so requires, the letter passed by the latter to the former is automatically presumed by himself to the contrary, the general dispensing power, whether ordinary or delegated, ought to be broadly interpreted, since its object is the common good. But the actual dispensation (and the same holds true of dispensing power given for a particular case) ought to be strictly interpreted unless it is a question of a dispensation authorized by the common law, or one granted motum proprio (by the superior spontaneously) to a whole community, or with a view to the public good. Again, that interpretation is lawful without which the dispensation would prove hurtful or useless to the beneficiary, also that which extends the benefits of the dispensation to whatever is juridically connected with it.

Collection of Dispensations.—(a) A dispensation ceases when it is renounced by the person in whose favour it was granted. However, when the object of the dispensation is an obligation exclusively resulting from one's own will, e. g. a vow, such renunciation is not valid until accepted by the competent superior. Moreover, neither the non-use of a dispensation nor the fact of having obtained another dispensation incompatible with the former is, in itself, equivalent to a renunciation. Thus, if a girl had received a dispensation to marry Peter and another to marry Paul, she would remain free to marry either of them. (b) A dispensation ceases when it is revoked after due notice to the recipient. The legislator can validly revoke a dispensation, even without cause, though in
the latter case it would be illicit to do so; but without a cause an inferior cannot revoke a dispensation, even validly. With a just cause, however, he can do so if he has dispensed by virtue of his general powers (ordinary or delegated); not so, however, when his authority extended merely to one particular case, since thereby his authority was exhausted. A conditional dispensation ceases by the death of the superior when the dispensation having been granted in forma commissis, the executor had not yet begun to execute it. But the grant holds good if given ex gratia (as a favour) and even, more probably, if granted in forma commissis munito. In any case, the new pope is wont to revalidate old dispensations, although in the present year by his predecessor and not yet availed of. (d) A conditional dispensation ceases on verification of the condition that renders it void, e.g. the death of the superior when the dispensation was granted with the clause ad beneplacitum nostrum (at our good pleasure). (e) A dispensation ceases by the adequate and total cessation of its motive causes, the dispensation thereupon ceasing to be legitimate. But the cessation of the influencing causes, or of a part of the motive causes, does not affect the dispensation. However, when the motive cause, though complex, is substantially one, it is rightly held to cease with the disappearance of one of its essential elements.

II. MATRIMONIAL DISPENSATIONS.—A matrimonial dispensation is the grant of a privilege by the Pope, in the case of impediments prohibiting or annulling a marriage. It may be granted: (a) in favour of a contemplated marriage or to legitimize one already contracted; (b) in secret cases, or in public cases, or in both (see EXPERIENCES OF MATRIMONY); (c) in foro interno only, or in foro externo (the latter includes also the former). Power of dispensing in foro interno is not always restricted to the Pope, or to the Congregations of the Congregation of Extraordinary Ecclesiastical Affairs (see DIVORCE (IN MORAL THEOLOGY)). Propaganda remains the channel for securing dispensations for all cases under the heads: (1) disparity of powers; (2) mixta religio; (3) the Pauline Privilege. The Congregation of Extraordinary Ecclesiastical Affairs is the competent and one that acts thereon, its function is henceforth that of intermediary. It is to be remembered that in America, the United States, Canada and Newfoundland, and in Europe, the British Isles are now removed from Propaganda, and placed under the Congregation of Extraordinary Ecclesiastical Affairs loses all its powers; consequently the countries hitherto subject to it must address themselves either to the Holy Office or to the Congregatio de Disciplinis Sacramentorum according to the nature of the impediment. It should be noted that the powers of a Congregation are suspended. During the vacancy of the Holy See, except those of the Penitentiaria in foro interno, which, during that time, are even increased. Though suspended, the powers of a Congregation may be used in cases of urgent necessity.

(a) By tacit consent of the Holy See he can dispense in foro interno from secret impediments from which the pope is wont to exercise his power of dispensing, in the three cases: (1) where parties already contracted and consummated, when urgent necessity arises (i.e. when the interested parties cannot be separated without scandal or endangering their souls, and there is no time to have recourse to the Holy See or to its delegate) — it is, however, necessary that such marriage shall have taken place in lawful form before the Church, and that one of the contracting parties at least shall have been ignorant of the impediment. (2) Dismissal of marriages about to be contracted and which are called embarrassing (perplexi) cases, i.e. where everything
being ready a delay would be defamatory or would cause scandal; (3) when there is a serious doubt of fact as to the existence of an impediment; in this case the dispensation seems to hold good, even though in course of time the impediment becomes certain, and even public. In cases where the law is doubtful no dispensation is necessary; but the bishop may, if he thinks proper, declare authentically the existence and sufficiency of such doubt. (b) By virtue of a decree of the Congregation of the Inquisition or Holy Office (20 February, 1888) diocesan bishops, even though in possession of the title of administrator Apostolic, and prefects Apostolic, having jurisdiction over an allocated territory, also vicars-general in spiritualibus, and vicars capitular) may dispense in very urgent (gravissimum) danger of death from all diriment impediments (secret or public) of ecclesiastical law, except priesthood and affinity (from lawful intercourse) in the direct line. However, they can use this privilege only in favour of persons actually living in real conubium or united by a merely civil marriage, and only when there is no time for recourse to the Holy See. They may also legitimize the children of such unions, except those born of adultery or sacriilege. In the decree of 1888 is also included the impediment of clandestinity. This decree permits therefore to these diocesan bishops (and those having the same faculties) to dispense, in the case of conubium or civil marriage, with the presence of the priest and of the two witnesses required by the Decree “Ne temere” in urgent cases of marriage in extremis. Canonists do not agree as to whether bishops hold these faculties by virtue of their ordinary power or by general delegation of the Holy See. It seems to us more probable that the power just described under (a) belong to them as ordinaries, while those under (b) are delegated. They are, therefore, empowered to delegate the former; in order to subdelegate the latter they must be guided by the limits fixed by the decree of 1888 and its interpretation dated 9 June, 1889. That is, if it is a question of habitual delegation parish priests only should receive it, and only for cases where there is no time for recourse to the bishop. Besides the fixed perpetual faculties, bishops also receive from the Holy See habitual temporary indults for a certain period of time or for a limited number of cases. These faculties are granted by fixed “formulas”, in which the Holy See from time to time, or as occasion requires it, makes some slight modifications. (See formulae) Forwards, these formulas call for a broad interpretation. Nevertheless it is well to bear in mind, when interpreting them, the actual legislation of the Congregation whence they issue, so as not to extend their use beyond the places, persons, number of cases, and impediments laid down in a given indult. Faculties thus delegated to a bishop do not in any way restrict his ordinary faculties; nor (in so) do the faculties issued by one Congregation affect those granted by another. When several specifically different impediments occur in one and the same case, and one of them exceeds the bishop’s powers, he may not dispense from any of them. Even when the bishop has faculties for each impediment taken separately he cannot (unless he possesses the faculty known as de cumulo) use his various faculties simultaneously. In cases where all the impediments being public, one of them exceeds his ordinary faculties. It is not necessary for a bishop to delegate his faculties to his vicars-general; since 1897 they are always granted to the bishop as ordinary, therefore to the vicar-general also. With regard to other priests a decree of the Holy Office (14 Dec., 1898) declares that for the future tempora futurea, all vicars-general always subdelegated unless the indult expressly states the contrary. These faculties are valid from the date when they were granted in the Roman Curia. In actual practice they do not expire, as a rule, at the death of the pope nor of the bishop to whom they were given, but pass on to those who take his place (the vicar capitular, the administrator Apostolic, or successor). Faculties granted for a fixed period of time, or a limited number of cases, cease when the period or number has been reached; but while awaiting their renewal the bishop, unless culpably negligent, may continue to use them provisionally. A bishop can use his habitual faculties only in favour of his own subjects. The matrimonial discipline of the Decree “Ne temere” (2 Aug., 1907) contains all such provisions in favour of ecclesiastics of canonical domicile, or continuously resident for one month within his territory, also even, or persons who have no domicile anywhere and can claim no continuous stay of one month. When a matrimonial impediment is common to both parties the bishop, in dispensing his own subject, dispenses also the other.

(6) Vicars Capitular and Vicars-General. A vicar capitular, or in his place a lawful administrator, enjoys all the dispensing powers possessed by the bishop in virtue of his ordinary jurisdiction or of delegation of the law; according to the actual discipline he enjoys even the habitual powers which had been granted the deceased bishop for a fixed period of time or for a limited number of cases, even if the indult had been limited by a condition according to the rules of N. Considering the actual praxis of the Holy See, the same is true of particular indults (see below). The vicar-general has by virtue of his appointment all the ordinary powers of the bishop over prohbit impediments, but requires a special mandate to give him common-law faculties for diriment impediments. As for habitual temporary faculties, since they are not addressed to the ordinary, they belong also ipso facto to the vicar-general while he holds that office. He can also use particular indults when they are addressed to the ordinary, and when they are not so addressed the bishop can always subdelegate him, unless the contrary be expressly stated in the indult. (D) Parish Priests and Other Ecclesiastics. A parish priest by common law can dispense only from an interdict laid on a marriage by him or by his predecessor. Some canonists of note accord him authority to dispense from secret impediments in what are called embarrassing (perplexi) cases, i.e. when there is no time for recourse to the bishop, but with the obligation of subsequent recourse ad cautelam, i.e. for greater security; a similar authority is attributed to them by popular opinion. Although the Penitentiaria continues to grant among its habitual faculties a special authority for such cases and restricts somewhat its use.

(2) Particular Indults of Dispensation.—When there is occasion to procure a dispensation that exceeds the powers of the ordinary, or when there are special reasons for direct recourse to the Holy See, procedure is by way of supplica (petition) and private rescript. The supplica need not necessarily be drawn up by the petitioner, nor even at his instance; it does not, however, become valid until he accepts it. Although, since the Constitution “Sapienti”, all the faithful may have direct recourse to the Congregations, the supplica is usually forwarded through the ordinary (of the person’s birthplace, or domicile) as it was before, although the Penitentiaria continues to grant among its habitual faculties a special authority for such cases and restricts somewhat its use.
when one of them is not a Catholic; the nature, degree, and number of all impediments (if recourse is had to the Congregatio de Disciplinae Sacramentorum or to the Holy Office in a public impediment, and to the Penitentiary for the second time in a secret one, it is necessary that the latter should know of the public impediment and that recourse has been had to the competent Congregation). The supplica must, moreover, contain the causes set forth for granting the dispensation and other circumstances specified in the Propaganda Instruction of 9 May, 1877 (it is no longer necessary, either for the validity or licetcy of the dispensation, to observe the Acta Relativa, as it is called); otherwise, even when probably this very thing had been alleged as the only reason for granting the dispensation.

When there is a question of consanguinity in the second degree bordering on the first, the supplica ought to be written by the bishop's own hand. He ought also to sign the declaration of poverty made by the petitioners when the dispensation is sought from the Penitentiaria in formâ pauperum; when he is in any way hindered from so doing he is bound to commission a priest to sign it in his name. A false declaration of poverty henceforth does not invalidate a dispensation in any case; but the authors of the false statement are bound in conscience to reimburse any amount unduly withheld (regulation for the Roman Congregations).

It is not necessary to dwell on the many points already briefly described; the reader is referred to the special canonical works, wherein are found all necessary directions as to what must be expressed so as to avoid nullity. When a supplica is affected (in a material point) by obreption or subreption it becomes necessary to ask for a so-called "reformatory decree" in case the favour asked has not yet been granted by the Curia, or for those letters known as "Perinde ac valere" if the favour has already been granted. If, after all this, a further material error is discovered, letters known as "Perinde ac valere super perinde ac valere" must be applied for. See Gasparri, "Tractatus de matrimonio" (2nd ed., Rome, 1882), I, no. 362.

Dispensation rescripts are generally drawn up in formâ commissâ mixâ; i.e., they are entrusted to an executor who is thereby obliged to proceed to their execution, if he finds that the reasons are as alleged (si vera sint exposito). Canonists are divided as to whether rescripts in formâ commissâ mixâ contain a favour granted from the moment of their being sent off, or to be granted when the execution actually takes place. Gasparri holds it as received (accepted), Giusberti that the dispensation is actually true at the moment when the petition is presented. It is certain, however, that the executor required by Penitentiaria rescripts may safely fulfill his mission even if the pope should die before he had begun to execute it. The executor named for public impediments is usually the ordinary who forwards the supplica and for secret impediments an approved person; for the reasons already given, the person delegated cannot validly execute a dispensation before he has seen the original of the rescript. Therein it is usually prescribed that the reasons given by the petitioners must be verified. This verification, usually no longer a condition for valid execution, can be made, in the case of public impediments, extra-judicially or by the bishops themselves; but in some cases (e.g., the dispensation for a dowry) by the executor himself. It can be made by the executor in the very act of hearing the confessions of the parties. Should the inquiry disclose no substantial error, the executor proclaims the dispensation, i.e., he makes known, usually in writing, especially if he acts in foro externo, the decree which dispenses the petitioners; if the rescript authorizes him, he also legitimates the children. Although the executor may subdelegate the preparatory acts, he may not, unless the rescript expressly says so, subdelegate the actual execution of the decree, unless he subdelegates to another ordinary. When the impediment is common to, and known to, both parties, execution ought to be made for both; whereas, in a case in foro interno, the confessor of one of the parties holds over the rescript, after he has executed it, to the confessor of the other. The executor ought to observe with care the clauses enumerated in the decree, as some of them constitute conditions sine quo non for the validity of the dispensation. As a rule, these clauses affecting validity may be recognized by the conditional conjunction or adverb of exclusion with which they begin (e.g., dummodo, "provided that"), and are thus included in an ablativo absolute. When, however, a clause only prescribes a thing already of obligation by law it has merely the force of a reminder. In this matter also it is well to pay attention to the stylus curiaris, i.e., the legal dictum of the Roman Congregations and Tribunals, and to consult authors of repute.

(3) Causes for Granting Dispensions.—Following the principles laid down for dispensations in general, a matrimonial dispensation granted without sufficient cause, even if the pope himself, would be illicit; the more difficult and numerous the impediments the more serious must be the motives for removing them.

An unjustified dispensation, even if granted by the pope, is null and void, in a case affecting the Divine law and the proper canons of canon law, and also in cases affecting ordinary ecclesiastical law. Moreover, as it is not supposable that the pope wishes to act illicitly, it follows that if he has been moved by false allegations to grant a dispensation, even in a matter of ordinary ecclesiastical law, such dispensation is invalid. Hence the necessity of distinguishing in dispensations between motive or determining causes (causa motiva) and impediments (causa impediscente). Except when the information given is false, still more when he acts spontaneously (motus proprio) and "with certain knowledge", the presumption always is that a superior is acting from just motives. It may be remarked that if the pope refuses to grant a dispensation on a certain ground, an inferior prelate, properly authorized to dispense, may grant the dispensation in the same case on other grounds which in his judgment are sufficient. Canonists do not agree as to whether he can grant it on the identical ground by reason of his divergent appreciation of the latter's force.

Among the sufficient causes for matrimonial dispensations we may distinguish canonical causes, i.e., classified and held as sufficient by the common law and canonical decrees. For a dispensation to be justified it is not provided for nominally in the law, but deserving of equitable consideration in view of circumstances or particular cases. An Instruction issued by Propaganda (9 May, 1877) enumerates sixteen canonical causes. The "Formulary of the Dataria" (Rome, 1901) gives twenty-eight, which suffice, either alone or concurrently with others, and act as a norm for all suffragan archiepiscopates. Excluded are; transactions in places; smallness of place coupled with the fact that outside it a sufficient dowry cannot be had; lack of dowry; insufficiency of dowry for the bride; a larger dowry; an increase of dowry by one-third; cession of family feuds; preservation of peace; conclusion of peace between princes or states; avoidance of lawsuit over a dowry, or some important business transaction; the fact that a fiancée is an orphan; or has the care of a family; the age of the fiancé over twenty-four; the difficulty of finding another partner, owing to the fewness of male acquaintance, or the difficulty the latter experience in coming to her home; the hope of safeguarding the faith of a Catholic relation; the danger of a mixed marriage; the hope of converting a non-Catholic party; the keeping of property in a family; the preservation of an illustrious or honourable family; the excellence and merits of the parties; defamation to be avoided, or scandal pro-
vented; intercourse already having taken place between the petitioners, or rape; the danger of a civil marriage; of marriage before a Protestant minister; revalidation of a marriage that was null and void; finally, all reasonable causes judged such in the opinion of the pope (e.g. the public good), or special reasonable causes actuating the petitioners and made known to the pope, i.e. motives which, owing to the social status of the petitioners, might remain for a long time without the consent of respect for their reputation. These various causes have been stated in their briefest terms. To reach their exact force, some acquaintance is necessary with the *stylus curiae* and the pertinent works of reputable authors, always avoiding anything like exaggerated formalism. This list of causes is by no means exhaustive; the Holy See, in granting a dispensation, will consider any worthy circumstances that render the dispensation really justifiable.

(4) Costs of Dispensations.—The Council of Trent (Sess. XXIV, cap. v. De ref. matrim.) decreed that dispensations should be free of all charges. Diocesan chanceries are bound to conform to this law (many pontifical documents, and at times clauses in induits, remind them of it) and neither to exact nor accept, and if they do, the menace of contribution to the chancy expenses sanctioned by an Instruction approved by Innocent XI (S. Oct., 1678), and known as the Innocent Tax (Taxa Innocentiana). Rosset holds that it is also lawful, when the diocese is poor, to demand payment of the expenses it incurs for dispensations. Sometimes the Holy See grants abated freedom in this matter, but never in the case of a party who has the means to defray the expenses. From this source shall be employed for some good work, and not go to the diocesan curia as such. Henceforth every rescript requiring execution will state the sum which the diocesan curia is authorized to collect for its execution.

In the Roman Curia the expenses incurred by petitioners fall under four heads: (a) expenses (expenditures) of cause, viz. the fee to the accredited agent, when one has been employed. This fee is fixed by the Congregation in question; (b) a tax (taza) to be used in defraying the expenses incurred by the Holy See in the organized administration of dispensations; (c) the *compendium*, or eleemosynary fine to be paid to the Congregation and applied by it to pious uses; (d) an annuity imposed on the petitioner and payable by himself in good works. The moneys paid under the first two heads do not affect, strictly speaking, the gratuity of the dispensation. They constitute a just compensation for the expenses the petitioners occasion the Curia. As for the alms and the compendium, besides the fact that they do not profit the pope nor the members of the Curia personally, but are employed in pious uses, they are justifiable, either as a fine for the faults which, as a rule, give occasion for the dispensation, or as a check to restrain too great freedom of petitions often based on frivolous grounds. And if the Tridentine prohibition be still urged, it may be truly said that the pope has the right to abrogate the decrees of councils, and is the best judge of the reasons that legitimize such abrogation. On the *sacramentum matrimonii* or *compendium*, it has been noted that the custom of tax and compendium is neither uniform nor universal in the Roman Curia.

Dispersion of the Apostles (Lat. *Divisi Apostolorum*), a feast in commemoration of the missionary work of the Twelve Apostles. It is celebrated as a double major on 15 July. The first vestige of this feast is found in the sequence composed for it by a certain Godescalcus, Bishop of Mende (Rationale Div. Off. 749), in the second half of the fourteenth century. Under the title, "Dimissio," "Dispersion," or "Divisio Apostolorum," it was universally celebrated in the northern countries of Europe, but unknown during the Middle Ages in Spain and Italy. The object of the feast (so Godescalcus) is to commemorate the departure (dispersion) of the Apostles from Jerusalem for the various parts of the world, some fourteen years after the Ascension of Christ. According to Durandus some of his contemporaries honoured this feast the (aporyphal) division of the relics (bodies) of St. Peter and St. Paul by St. Sylvestre (Schulting, Bibl. ecle., 1591, 2, 2, 173 sq.; Mag. Armellini, Chiese di Roma, 1891, 902 sq.). This feast is now kept with solemnity by modern missionary societies, in Germany and Poland, also in some English and French dioceses, and in the United States, to the canonical provinces of St. Louis, Chicago, Milwaukee, Dubuque, and Santa Fé.

Dispersion of the Jews. See Diaspora.
Dissenters. See Nonconformists.

Dissentis, Abbey of, a Benedictine monastery in the Canton Grisons in eastern Switzerland, dedicated to Our Lady of Mercy. Tradition ascribes its foundation to Sts. Placid and Sigebert, in the year 614, but Mabillon places the date two years earlier. The history of the abbey has been somewhat chequered, but it has at times risen to positions of great importance and influence. It was destroyed by the Avars in 670, when its abbots and thirty monks were murdered, but was rebuilt by Charles Martel and Abbot Pirminius in 711. Charlemagne visited the abbey on his return journey from Rome in 800 and bestowed upon it many benefactions. Abbot Udalric I (1031-1055) was the first of its superiors to be made a prince of the empire, which dignity was subsequently held by several other of its abbots; many of them became bishops of the neighbouring dioceses. In 1581 the abbey was honoured by a visit from St. Charles Borromeo. After enjoying independence for a thousand years it was incorporated into the newly formed Swiss Confederation in 1617, since which date it has, in common with the other five Benedictine abbeys of Switzerland, been subject to the jurisdiction of the president of that Confederation. In 1799 it was burned and plundered by the soldiers of Napoleon’s army, when amongst other valuable treasures, a seventh century MS. chronicle of the abbey perished. The printing press that had been set up in 1729 was also destroyed at the same time, but much of the melted type and other metal was saved and from it were made the pipes of the organ of St. Martin’s church at Dissentiis, which is still in use. The abbey was rebuilt by Abbot Anselm Huenzler, the last of its superiors to enjoy the rank and title of Prince of the Empire. During the nineteenth century the monastery suffered greatly from misfortunes of various kinds, and so great was the relaxation of discipline in consequence that its recovery was almost despaired of. Abbot Paul Birker came from his abbey of St. Boniface at Munich to assist in restoring regular observance, but so little success attended his labours that he left Dissentiis in 1851, and returned to Munich as a simple monk. The abbey has, however, survived those evil times and is in a satisfactory and flourishing condition. Dom Benedict Provost, the eightieth who has ruled over its fortunes, was abbot in 1908 of a community of between thirty and forty monks, who, among their other duties, served five public oratories and conducted successfully a gymnasium of nearly a hundred boys.

Dissidents in Poland. See Poland.

Distraction (Lat. distractio, to draw away, hence to distract) is here considered in so far as it is wont to happen in time of prayer and in administering the sacraments. It hardly needs to be said that the idea of mental prayer and mind-wandering are destructive of each other. So far as vocal prayer is concerned, the want of actual interior attention, if voluntary, will take from its perfection and become reprehensible. Distraction, however, according to the commonly accepted teaching, do not rob prayer of its essential character. To be sure one must have had the intention to pray and therefore in the beginning some formal adverence; otherwise a man would not know what he was doing, and his prayer might become like the flimsy prayer of the Levitical type. So long, however, as nothing is done outwardly which would be incompati

Dutchmar. See Dithmar.

Dithmar (Thietmar), Bishop of Merseburg and medieval chronicler, b. 25 July, 975; d. 1 Dec., 1018. He was a son of Count Siegfried of Walbeck and a relative of the imperial family of the Saxons Ottos. After receiving his education in the monastic schools of Quedlinburg, Bergen, and Magdeburg, he became, in 1002, provost of the monastery of Altenburg, of which he was prior and which was later named after him. In 1003, he was elected priest in the monastery of Altenburg, and in 1004 was consecrated fourth Bishop of Merseburg on 24 April, 1009. As bishop he worked with great energy for the spiritual and temporal restoration of his

Joseph F. Delany.

Distributions (from Lat. distribuere), canonically termed distributiones quotidiana, are certain portions of the revenue of a church, distributed to the canons present at Divine service. There are many regulations concerning these distributions in the "Corpus Juris". The latest law on the subject is found in the decrees of the Council of Trent (Sess. XXII, cap. iii, De ref.), where it is ordained that bishops have power to set aside one-third of the revenues of officials and dignitaries of cathedral and collegiate chapters and convert this third into distributions for those who satisfy exactly their obligation of being personally present every day at the service to which they are bound. Only those who renounced their rights to the distributions, as do also capitulars who have received ecclesiastics, and supernumerary canons who are waiting a regular stall in the chapter. To earn these distributions it is necessary to chant the Office in common, according to the custom of the particular church to which the beneficiary belongs. A mere corporal presence, however, without mental application to the service performed, will not entitle one in conscience to these emoluments.

diocese which had been almost ruined by Giseler, the second Bishop of Merseburg, in his unholy ambition to become Archbishop of Magdeburg in 881. At the same time he fearlessly defended the canonical liberty of ecclesiastical elections against the encroachments of the secular princes.

While Bishop of Merseburg he composed his famous Chronicle "Chronicon Thietmari", which comprises in eight books the reigns of the Saxons Emperors Henry I (called the Fowler), the three Ottos, and Henry II (the Peasant). After covering the reigns of Henry I and the first two Ottos, are largely based on previous chronicles, most of which are still extant; the fourth book, comprising the reign of Otto III, contains much original matter; while the remaining four books, which describe the reign of Henry II to the year 1018, are the independent narrative of Dithmar. As councillor of the emperor and participator in many important political transactions, he was well equipped for writing a history of his times. The spirit of sincerity which pervades his chronicle is abundant compensation for the barbarous expressions which occasionally mar the literary style. The last four books, besides being the principal source for Saxo history during the reign of the holy emperor Henry II, contain valuable information, not to be found anywhere, regarding the contemporary history and civilization of the Slavic tribes east of the river Elbe, especially the Poles and Hungarians. Dithmar's original manuscript, with corrections and additions made by himself, is still preserved at Dresden. A facsimile edition of it was prepared by L. Schmidt (Dresden, 1903). The chronicle was also published by Kurze, "Beitr. zur Gesch. der lteren Kirchenhist.", vol. III (Leipzig, 1859), and by Lappenberg in "Mon. Germ. Hist.: Scripta." (183, 733-871, whence it was reprinted in Migne, P. L., CXXXIX, 1183-1422. A German translation was made by Laurent (Berlin, 1848, and Leipzig, 1892).

Michael Ott.

**Dives (Latin for rich).—** The word is not used in the Bible as a proper noun; but in the Middle Ages it came to be employed as the name of the rich man in the parable of the rich man and Lazarus, Luke, XVI, 19-31. It has often been thought that in this lesson on the life of the rich Christ spoke of real persons and events. The "House of Dives" is still pointed out in Jerusalem; but, of course, if such a house ever existed, it must have long since disappeared.

**REMA NIB E, Dict. de la Bibl., s. v. LAZAR; Commen-
tances on this passage of St. Luke.**

W. S. Reilly.

**Divination,** the seeking after knowledge of future or hidden things by inadequate means. The means being inadequate they must, therefore, be supplemented by some power which is represented all through history as coming from gods or evil spirits. Hence the word *divination* has a sinister signification. As prophecy is the lawful knowledge of the future, divination, its superstitious counterpart, is the unlawful. As magic aims to do, divination aims to know. Divination is practically as old as the human race. It is found in every age and country, among the Egyptians, Chaldeans, Hindus, Romans, and Greeks; the tribes of Northern Asia had their shamans, the inhabitants of Africa their magicians, the Celtic nations their druids, the aborigines of America their medicine-men—all recognized diviners and wizards. Everywhere divination flourished and nowhere, even to-day, is it completely neglected. Cicero's words were, and are, parently always will be, true, that there is no nation, civilized or barbarian, which does not believe that there are signs of the future and persons who can interpret them. Cicero divided divination into natural and artificial. Natural (untaught, unskilled) included dreams and oracles in which the diviner was a passive subject of inspiration, and the prediction was from a power supposed to be then and there within him. Artificial (taught, studied) comprised all foretelling from signs found in nature or produced by man. Hence the diviner, especially among the Persians, never acted apparently from his own skill and observation. This division is almost the same as that given by St. Thomas with respect to the invocation of demons: divination with express invocation of spirits, embracing dreams, portents or prodigies, and necromancy, and divination with tacit invocation through signs and movements observed in objects in nature, such as stars, birds, figures, etc., or through signs and arrangements produced by man, such as molten lead poured in water, casting of lots, etc. Dreams here mean those expressly prepared and prayed for with hope of intercourse with gods or the dead. Portents or prodigies are unusual and marvellous sights coming from the lower world. Here we are considering artificial divination.

**Mormons.—** The variety of divinatory methods is very great. Scarcely an object or movement in the heavens, on the earth, or in the air or water escaped being metamorphosed into a message of futurity. Add to these the inventions of man, and there is a glimpse of the immense entanglement of superstitions in which pagan people groped their way. They can, however, be grouped with advantage, as shown by St. Thomas's division. A detailed list has been given by Cicero, Clement of Alexandria in his "Stromata", and others of the Fathers. Under the first class, express invocation, come oneiromancy or divination by dreams; necromancy, by so-called apparitions of the dead or spiritism; apparitions of various kinds, which may be either external or in imagination, as Ojajen observes; Pythomancy or by possessed persons, as the Delphi Pythonis; hydromancy, by signs in water; aeromancy, by signs in air; geomancy, by signs in terrestrial substances (geomancy has also another meaning) aruspices, by signs in the entrails of sacrificial victims, etc. The second class, tacit invocation and signs found ready-made in nature, embraces judicial or genethic astrology, pretending to tell the future through the stars and planets, celestial and terrestrial signs, or the movements of horses and sneezing of men, etc.—with us it comprises all fort- telling by signs; omens, when chance words are turned into signs; chiromancy, when the lines of the hand are read; and many similar modes. The third class, tacit invocation and signs prepared by man, includes geomancy from points or lines on paper or pebbles thrown at random; drawing of straws; throwing dice; cutting cards; letting a staff fall or measuring it with the fingers saying, "I will, I will not"; opening a book at random, called *Sortes Virgilianae,* so much was the *Ieneid* used in this fashion by the Romans, etc. This last transferred to the Bible is still current in Germany and elsewhere. Hypnotism is also used for purposes of divination.

**History.—** To attempt to trace the origin of divination is a waste of time, since like religion it is universal and indigenous in one form or another. Some nations cultivated it to a higher degree than others, and their influence caused certain modes of divination to spread. By its practice they gained much reputation for occult power. Pre-eminent in history stand the Chaldeans as seers and astrologers, but the ancient Egyptians and Chinese were also great adepts in elaborate mysterious rites. Which of them had priority therein is still an open question, though the larger share...
in the development of divination, especially in connexion
with celestial phenomena, is attributed to the Chal-
deans, a vague term embracing here both Babylonians
and Assyrians. In Greece from the earliest historical
times are found diviners, some of whose methods came
from Asia and from the Etruscans, a people famous
for the art. While the Romans had modes of their
own, their intercourse with Greece introduced new
forms, and principally through these two nations they
spread in the South and West of Europe. Before
Christianity divination was practised everywhere
according to rites native and foreign. In early days
priest and diviner were one, and their power was very
great. In Egypt the pharaoh was generally a priest;
its opponents. The sacerdotal class, and in Babylonia and Assyria almost
every movement of the monarch and his courtiers was
regulated by forecasts of the official diviners and
astrologers. The cubeiform inscriptions and the papyri
are filled with magical formulae. Witness the two
treatises, one on terrestrial and the other on celestial
phenomena, compiled by Sargon several centuries
before our era. In Greece, where more attention was
paid to aerial signs, the diviners were held in high es-
teem and assisted at the public assemblies. The Ro-
mans, who placed most reliance in divination by sacri-
fices, had official colleges of augurs and auspicii who
by an adverse word could postpone the most import-
ant business. No war was undertaken, no colony
sent out without a diviner to invoke the gods, and at critical
moments the most trifling occurrence, such as a
bough, would be invested with meaning. Alongside
all this official divining there were practised secret
rites by all kinds of wizards, magicians, wise men, and
witches, Chaldean soothsayers and strolling sibyls
spread everywhere telling fortunes for gain. Be-
tween the regulars and the irregulars there was a very
large body of diviners, who were often in league with
demons regarded as hostile to the gods of the country,
they were regarded as illicit and dangerous and were
often punished and prohibited from exercising their
art. From time to time in various countries the number
and influence of the regular diviners were diminished on
account of their pride and oppression, and no doubt
at times they in turn may have adroitly mitigated the
tyranny of their masters, and thus helped to diminish
the fear and respect of the cultivated people for their
tutelary. Micerio's "De Divinatione" is not so
much a description of its various forms as a refuta-
tion of them; Horace and Juvenal launched many a
keen arrow at diviners and their dupes, and Cato's say-
ing is well known, that he wondered how two augurs
could meet without laughing at each other. Rulers,
however, retained them and honoured them publicly,
the better to keep the people in subjection, and out-
side classical lands, workers of magic still held sway.
Wherever Christianity went divination lost most of
its old-time power, and one form, the natural, ceased
almost completely. The new religion forbade all
knowledge of the future, and the official system though it continued to have many ad-
herents. The Fathers of the Church were its vigorous
opponents. The tenets of Gnosticism gave it some
strength, and neo-Platonism won it many followers.
Within the Church itself it proved so strong and at-
tractive to her new converts that synods forbade it
and councils legislated against it. The Council of
Arles (c. 314) decreed five years penance to
consultants of diviners, and that of Laodicea (c. xxxvi,)
about 360, forbade clergics to become magicians or
to make amulets, and those who wore them were to
be driven out of the Church. A canon (xxxvi) of Orléans
(511) excommunicates those who practised divination,
auguries, or lots falsely called Sortes Sacramentorum (Bibi-
orum), i.e. deciding one's future conduct by the first
passage found on opening a Bible. This method was
evidently a great favourite, as a synod of Vannes (c. xvi)
in 461 had forbidden it to clergies under pain of excommu-
cination, and that of Agde (c. xlix) in 506 condemned
it as against piety and faith. Sixtus IV, Sixtus V,
and the Fifth Council of Lateran likewise condemned
divination. Governments have at times acted with
great severity. Constantius decreed the penalty of
death for diviners. The authorities may have feared
that some would-be prophets might endeavour to ful-
fil forcibly their predictions about the death of sov-
eigns. When the races of the North, which swept
over the old Roman Empire, entered the Church, it
was only to be expected that some of their lesser su-
perstitions should survive. All during the so-called
Dark Ages divination was generally prohibited,
and after the Crusades they were followed more openly.
At the time of the Renaissance and again preceding
the French Revolution, there was a marked growth of
noxious methods. The latter part of the nineteenth
century witnessed a strange revival, especially in
the United States and England, of all sorts of supersti-
tion, necromancy or spiritism being in the lead. To-
day the number of persons who perceive in signs and
seek to know the future is much greater than appears
on the surface. They abound in communities where
dogmatic Christianity is weak.

The natural cause of the rise of divination is not
difficult to discover. Man has a natural curiosity to
know the future, and coupled with this is the desire of
normal gain and security. Man desires to know the
future, and therefore, in every age to lift the veil, at least par-
tially. These attempts have at times produced re-
results which cannot be explained on merely natural
grounds, they are so disproportionate or foreign to the
means employed. They cannot be regarded as the
direct work of God nor as the effect of any purely
material cause, hence they must be attributed to
spiritual causes, and they are the outcome of what
we know of God, the spirits causing them must be
evil. To put the question directly: can man know
future events? Let St. Thomas answer it substance:
Future things can be known either in their causes or in
themselves. Some causes always and necessarily pro-
duce their effects, and these effects can be foretold with
certainty; other causes have their effects itself
inconclusive, but they generally do so, and these can be
foretold as well-founded conjectures or sound inferences,
like a physician's diagnosis or a weather observer's
prediction about rain. Finally there is a third class
of causes whose effects depend upon what we call
chance or upon man's free will, and these cannot be
foretold from their causes. We can only see them in
themselves when they are actually present to our eyes.
Only God alone, to whom all things are present in His
eternity, can see them before they occur. Hence we read
in Isiaus (xli, 23), "Shew the things that are to come
hereafter, and we shall know that ye are gods." Spirits
can know better than men the effects to come from
the second class of causes because their knowledge is
deeper, deeper, and more universal, and many occult
powers of nature are known to them. Consequently
they can foretell more events and more precisely, just
as a physician who sees the causes clearer can better
prognosticate about the restoration of health. The
difference, in fact, between the first and second classes
of causes is due to the limitations of our knowledge.
The microcosm is identified with the individual,
which is in turn identified with the universe, so that
from following their effects. Future contingent
things, the effects of the third class, spirits cannot
know for certain, except God reveal them, though
they may wisely conjecture about them because of
their wide knowledge of human nature, their long ex-
perience, and their judgments based upon our
thoughts as revealed to them by our words, coun-
tances, or acts. Unless we wish to deny the value of
human testimony, it cannot be doubted that diviners foretold some contingent things correctly and magicians produced at times superhuman effects. The very survival of divination for so many centuries would otherwise be inexplicable and its role in history an insoluble problem. On religious grounds, to say that divination and kindred arts were complete impostsures would be to contradict Scripture. In it we read laws forbidding magic, we have facts like the deeds of Jannes and Mambres before Pharaoh, and we have a declaration of God showing it possible for a sign or wonder to be foretold by false prophets and to come to pass. II. The Jews and God gave them knowledge, their ignorance of the future resulted in the well-known ambiguity of the oracles.

Attempts to give artificial divination a merely natural basis have not succeeded. Christipus (de Divinatione, li, 63) spoke about a power in man to recognize and interpret signs, and Plutarch (de Oraculis) wrote on the special qualifications an augur should have and the nature of the signs; but a preternatural influence was recognized in the end. Some modes may have been natural in their origin, especially when necessary causes were concerned, and many a prediction made without occult intervention, but these must have been comparatively rare, for the client, if not already influenced, generally there was some premonition, analogy, or oracles. That some analogy may be traced between an eagle and victory, an owl and sadness—though to the Athenians a welcome omen—and that to lose a tooth is to lose a friend, may readily be admitted, but to try to connect these with future contingent events would be to reason badly from a very slight analogy, just as to stab an image, to injure the person it represents, would be to mistake an ideal connexion for a real one. Human instinct demanded a stronger foundation and found it in the belief in an intervention of some supernatural agency. Reason demands the same. A corporeal sign is either an effect of the same cause of which it is a sign, as smoke of fire, or it proceeds from the same cause as the effect which it signifies, as the falling of the barometer foretells rain, i.e. the change in the instrument and the change in the weather come from the same cause. Man's future actions and signs in nature stand in no such relation. The sign is not an effect of his future act; neither do the sign and his act proceed from the same cause. The other kinds of signs from living creatures can be passed over by almost the same reasoning. From those who believed in magic, supernatural, or prophecies, and divination, were all in close communion, or that animals and plants were divinities, a belief in omens and auguries of all kinds might be expected (see ANIMISM). Everywhere, as a matter of fact, divination and sacrifice were so closely connected that no strict line could have been drawn in practice between divination and without express invocation of gods or demons. The client came to offer sacrifice and the priest, the diviner, tried to answer all his questions, while the private wizards boasted of their "familiar spirits".

Theological Aspect.—From a theological standpoint divination supposes the existence of devils who have great natural powers and who, actuated by jealousy of man and hatred of God, ever seek to lessen his glory and to do him harm. This knowledge is a premonition, and the client came to injure him bodily, mentally, and spiritually. Divination is, as we have seen, foretelling what comes from necessity or what generally happens, or foretelling what God reveals or what can be discovered by human effort, but it is the usurpation of knowledge of the future, i.e. arriving at it by inadequate or improper means. This knowledge is a premonition of Divinity and so the usurper is said to divinize. Such knowledge may not be sought from the evil spirits except rarely in exorcisms. Yet every divination is from them either because they are expressly invoked or because they mix themselves up in these vain searches after the future that they may entangle men in their snares. The demon is invoked tacitly when anyone tries to acquire information through means which he knows to be inadequate, and the means are inadequate when neither from their own nature nor from any Divine promise are they capable of producing the desired effect. Since the knowledge of futurity belongs to God alone, to ask it directly or indirectly from demons is to attribute to them a Divine perfection, and to ask their aid is to offer them a species of worship; this is superstition and a rebellion against the command of God. Hence the oracle was hidden many things from us. In pagan times when divining sacrifice was offered it was idolatry, and even now divination is a kind of demonolatry or devil-worship (d'Annibale). All participation in such attempts to attain knowledge is derogatory to the dignity of a Christian, and opposed to his love and trust in Providence, and militates against the spread of the Kingdom of God. Any method of divination with direct invocation of spirits is grievously sinful, and worse still if such intervention ensues; with tacit invocation divination is in itself a grievous sin, though in practice, ignorance, simplicity, or want of belief may render it venial. If, however, notwithstanding the client's disbelief the diviner acts seriously, the client's belief is a basis for superhuman assistance. That if methods apparently harmless strong suspicion of evil intervention arises it would be sinful to continue; if only a doubt arises as to the natural or diabolical character of the effect protest should be made against the intervention of spirits; if in doubt as to whether it be from God or Satan, except a miraculous act be sought which would be extremely rare it should be discontinued under pain of sin. A protestation of not wishing diabolical interference in modes of divination where it is expressly or tacitly expected is of no avail, as actions speak louder than words. A scientific investigator in doubt about the adequacy of the means can experiment to see if such superhuman intervention be a fact, but he should clearly express his opposition to all diabolical assistance. The divining-rod, if used only for metals or water, may perhaps be explained naturally; if used for detecting guilty persons, or things lost or stolen as such (which may be metals), it is certainly a tacit method. To believe in most of the popular signs is simply ignorance or weakness of mind (see SUPERSTITIONS).

DIVINATION IN THE BIBLE.—The Hebrews coming from Egypt, a land teeming with diviners, and dwelling in a country surrounded by superstitious tribes would have their inborn desire for foreknowledge intensified by the spirit of the times and their environments; but God forbade them repeatedly to have anything to do with charmers, wizards, diviners, necromancers, etc., all of whom were abomination in His sight (Deut. xviii, 10, 11). The ideal was in Balam's day when "there is no soothsaying in Jacob nor divination in Israel" (Num., xxiii, 23), and to preserve this, the soul that went aside after diviners God declared He would destroy (Lev., xx, 6), and the man or woman in whom there was a divining spirit was to be put to death (Ex. xxiii, 24, 25). St. Chrysostom puts it, humoured the Hebrews like children, and to preserve them from excessive temptation, lots were allowed under certain conditions (Jos., vii, 14; Num., xxvi, 55; Prov., xvi, 33, and in N. T. See also Lort). Hebrew seers were permitted to answer when it pleased Him (Origen, Cels., i, xxxvi, xxv), prophets might be consulted on private affairs (Josh., xvi, 6), but in the priest's capacity as interpreter of matters by the Urim and Thummim. Gifts were offered to seers and prophets when consulted, but the great prophets accepted no reward when they acted as God's representatives (IV K., v, 20). When the
DIVINE

Hebrews fell into idolatry, divination, which always accompanied idolatry, reviled and flourished, but all during their history it is evident that secretly and again more openly wrongful arts were used, and as a result condemnations were frequent (I K., xx, 24; IV K., xvii, 17; Zach. x, 2; Is, xlv, 25, etc.). It should be borne in mind that their history is a very long one, and when we reflect how completely other nations were given over to all kinds of impious arts and silly observances we shall readily admit that the Hebrews were in comparison remarkably free from superstitions. When later on these flourished more strongly and permanently it was during the decay of faith preceding and following the time of Christ (see Jos., Anti. Jud., XX, v, i, viii; Bell. Jud., VI, v, 2). The Talmud shows the downward tendency.

The various methods of divining and kinds of diviners are not always clearly distinguished in Scripture, the Hebrew words being differently interpreted and sometimes merely synonyms. The following list is based mainly upon Lesètre's article in Vigouroux's "Dict. de la Bible":

1. Divination by consulting the Teraphim (תראה), or small household gods of which we first read in the time of Abraham and Laban (Gen., xxxi, 19). How they were consulted is not known. It was apparently a Chaldean form, as Laban came from that country. They are met with in Judges, xviii, 5; IV K., xxiv, 21, and elsewhere. It is sometimes deceived their ignorance (Zech., x, 2).

2. The Ḥārtumīm (חרותים), a name translated by "interpreters" (Vulg. conjetores) in the Douay version (Gen., xli, 8), but elsewhere (Dan., ii, 2) by "diviners" (Vulg. arīolii) and other names, especially "Chaldeans".

3. The Ḥālāmīn (חללים) are the wise men (Vulg. sages) mentioned in the Bible (Gen., xli, 8), a name given to those skilled in divination in Egypt, Idumea (Abd., 8), Persia (Esth., i, 13), and Babylon (Jer., i, 35).

4. Ḥiq\(a\)m or Ḥiq\(b\)m (희법) designated divination in general and is always used in the Scripture in a bad sense except in Prov., xvi, 10. By it the witch of Endor raised up the dead Samuel (I K., xxviii, 3). The "king of Babylon stood in the high way," the two days, seeking division [hip\(a\)m], shuffling arrows; he inquired of the idols (teraphim), and consulted entrails) (Esth., xxi, 21). The arrows bore the signs or names of towns, and the first name drawn was the one to be attacked. This was a Babylonian mode. The Arabs practised it so: three arrows were prepared and the first inscribed "The Lord wills it," the second "The Lord wills it not," and the third was blank. If the blank came a new drawing followed until an inscribed arrow was taken. The last method mentioned in text quoted was aruspicy (Vulg. exta consultari).

5. Nāḥāṣ (נהח) is soothsaying (Vulg. augurium) in the Bible (Num., xxiii, 23). The precise method signified by it is in dispute. It was equivalent to divination by the flight of birds, but this mode so common among the Greeks and Romans, was apparently not used by the Hebrews except towards the time of Christ. From its derivation, as commonly accepted, it would mean divination by serpents, ophiomancy, but on the other hand it is never in this sense in the Scriptures. Baham's divination by animal sacrifices is so termed (Num., xxxii, 19), as also Joseph's (Gen., xliii, 15) which remains a very old custom in spite of Calmet's triumphant solution (Dict. of the Bible, III, p. 30) except the reasonable explanation of Grotius be accepted (Humelauer, Com. in Gen., p. 561).

6. Mekāšsheph (מעכשף) is the magician (Vulg. maleficus) in Ex., vii, 11, and the wizard in Deut., xviii, 10, who not only seeks the secrets of the future but works wonders. St. Paul mentions two of their leaders, Jannes and Mambres, and their modes are styled sorceries (Vulg. veneficia) in IV K., ix, 22 and (Vulg. maleficæ) Micheas, v, 11.

7. The word "boh (בוח) signifies the spirit called by the person calling him, the necromancer. In Deut. xviii, 11, it is "the spirit from the dead" (the best known case is that of the witch of Endor) and elsewhere by Pythons (Is., xviii, 9), divining spirits (I K., xxviii, 7). The Septuagint translates the words by "ventrilocquot" because when the necromancers failed or wished to deceive the people they muttered as if from under the ground as though spirits so spoke; it recalls Shakespeare's "squeak and gurgle" (Hamlet, xx, 4). A bottle or even water bag is "boh;" the use of the word here may come from the diviner containing the spirit or being inflated by it.

8. The Yūdōh onīm (ていました) were diviners whom we generally find connected with necromancers, and the two terms are perhaps practically synonymous (I K., xxviii, 3; IV K., xxi, 6; etc.).

9. Divining by Meḥōn (מנהון) included apparently many methods of divination by chance words, as when Abraham's servant sought a wife for Isaac (Gen., xxiv, 14; I K., xiv, 9; III K., xx, 33); auguries (Is., xi, 6); observers of dreams (Deut., xviii, 10), etc. There were also modes by charming serpents (Jer., vii, 17), astrology (Is., xlvii, 13), and by consulting the Ephod (I K., xxix, 9).

In the N. T. diviners are not specifically mentioned except in Acts, xvi, 10 concerning the girl who had a pythionical spirit; but it is altogether likely that Simon Magus (Acts, viii, 9), Elymas (Acts, xxii, 6), and others (II Tim., iii, 13), including the possessors of the magical books burnt at Ephesus (Acts, xix, 19), practised divination and that it is included in the wonders by which Antichrist will seduce (Apost., xxi, 20). Under the change of Law, prophecy replaced divination and was placed on a higher plane than under the Old Dispensation, we are taught not to be solicitous for the morrow (Matt., vi, 34), but to trust Him perfectly Who numbers the very hairs of our heads (Matt., x, 30). In divination, apart from the fraud of the Father of Lies, there was much merely human fraud and endless deception; the predictions were generally as in the case of the necromancer, for fortune-telling and the general result then as now favoured vice and inured virtue. (See Astrology.)

Divine Charity, Society of (Societas Divinae Charitatis), founded at Maria-Martental near Kaiserswerth in 1904 by Joseph Tilmanns for the solution of the social question through the pursuit of agriculture and trades (printing, etc.) as well as by means of intellectual pursuits. The society consists of both priests and laity.

TILMANNS and OERGEN, Die wahre Lösung der sozialen Frage (Munich, 1905).

Sisters of Divine Charity, founded at Besançon, in 1799, by a Vincentian Sister, and modelled on the Sisters of Mercy of St. Vincent de Paul. The mother-house, originally at Naples, is now in Rome, and there are many filial establishments in Italy, in Malta, and

tion, founded

Divine Father have lived. The

Holy Family and its

Charity, Institute of the, founded in

City of New York, U. S. A., by the Rt. Rev. Thomas Stanislaus Preston. On 8 September, 1869, Father Preston began a semi-weekly gathering of the poor and abject children of the street in one of the most wretched quarters of the city; after this came the opening of a house for the reformation of young girls not yet hardened in vice, and the preservation of children and older girls from the moral danger in which they lived. The founder called it the House of the Holy Family and became its spiritual director. The work was fostered by many prominent Catholic laity of New York, and the objects of the community for Befriending Children and Young Girls. Foremost among these ladies was Mrs. Mary C. D. Starr (in religion Mother Veronica; d. at White Plains, 9 Aug., 1901), who became the president of the association and devoted all her time and energies to this work of charity under the direction of Father Preston. Seeing the necessity of a religious community which should be trained to this work and perpetuate it, Father Preston compiled a rule of life for those who desired to devote their lives to it. The first draft was written 5 September, 1873, and was observed in its elemental form until 1886, when it was elaborated and obtained the formal approbation of the Archbishop of New York. The constitutions, which are an enlargement of the rule, and the details of the way of life in the institute, were written gradually, as it developed, and reached their completion in 1899. On the 29th of September, 1900, both rule and constitutions received the express canonical approbation of Archbishop Corrigan of New York. The object of the institute is (1) the reformation of erring girls; and (2) the training, religious, mental, and industrial, of girls in moral danger from ignorance, idleness, or waywardness, or dangerous influences. The institute is composed of two classes, choir sisters and little (or lay) sisters. In addition to the House of the Holy Family the sisters are in charge of a training school for girls at White Plains, and a working-girls' home in New York City. The institute comprises about 40 sisters in charge of 215 girls.

Divine Office. See OFFICE.

Divine Providence, Sisters of.—I. Sisters of Divine Providence of St. Vincent de Paul, founded at Molsheim, in the Diocese of Strasbourg, by Vincent Laval Molheimen (1825). After the Revolution of 1848 the community reassembled at Binderheim and, in 1857, received both ecclesiastical and civil approbation, the former from the Archbishop of Strasbourg, the latter from Napoleon I. In 1819 the mother-house was definitely located at Rappoltswiller, and in 1869 the institute received papal confirmation. The congregation has 1800 members, of whom 1200 are teachers in 337 primary schools of Alsace. The sisters have over 41,000 children under instruction; they conduct boarding and day schools, orphan asylums, reformatories, a housekeeping school, a high school for girls, and a deaf and dumb institution. Attached to the novitiate are a teacher's seminary and practice school.

II. The Society of Divine Providence, founded, in 1812, at St. Mauritius near Münster by Eduard Michels, chaplain and private secretary to Archbishop Droeze at Vischering of Cologne. He shared the imprisonment of his archbishop and on his return went to St. Mauritius, where, with the help of two other priests, he founded an orphan asylum. He selected several teachers whom he sent to the Sisters of Divine Providence at Rappoltswiller to be trained in the religious life of the mother-house and novitiate and with a few alterations by the new community and received episcopal approbation. The congregation took as its special work the care of poor, neglected, and orphaned children, as well as teaching in general. In 1878 the work of the sisters was interrupted by the Kulturkampf, and they were forced to take refuge at Steyl, Holland. In 1887, when they resumed their work in Germany, the mother-house was removed to Friedrichsburg near Münster, where a boarding and a trade school were opened. In the city of Münster the sisters have charge of the domestic management of five episcopal institutions, and in the city and diocese they conduct boarding schools, orphan asylums, protectories, trade schools, elementary schools, Sunday schools, a young-women's asylums (at Molsheim), Magdalen asylum (at Marienburg). In Bremen they direct an elementary school, Sunday school, and orphanage. This congregation has 50 branch houses in Germany, and 14 in Holland, among the latter the convent of St. Joseph at Steyl, that of Maria-Roepaan at Ottersum, and of St. Aloysius at Kessel. In 1885 a colony of sisters went to Brazil, where they have 2 houses. The congregation numbers (1908) 1115 members.

F. M. RUDGE.

III. Sisters of Divine Providence, founded at Finthen near Mainz (whence they are sometimes called the Finthen Sisters) in 1851 by Bishop Wilhelm Emmanuel Freiherr von Ketteler. The first superior was sent to the Sisters of Divine Providence at Hillevange, also to be formed in the religious life, and the rule followed there was made the basis of the new institute, which later received the papal approbation. The congregation was founded primarily for the work of teaching and for the care of the sick so far as consonant with their duties as teachers. The right of incorporation was not obtained until 1868, and the first superior was the then Sister and charge of the orphan asylum of Neustadt. At the time of the Kulturkampf they had 21 foundations in the Grand Duchy of Hesse. When they were allowed to resume their activities they devoted themselves less to purely educational work and took charge of hospitals, children's asylums, homes for girls, industrial and housekeeping schools, orphan asylums, servants' homes, endowed infirmaries, and almshouses. Connected with the mother-house at Mainz are 76 branch houses with 730 members, 70 in the Diocese of Mainz, and 6 in that of Limburg. In Mainz the sisters conduct a boarding school with housekeeping and trade courses. At Oberursel they direct the Johannestift for abandoned children founded by Henry von Finthen. The sisters who have houses they care for the sick in their homes.

IV. Sisters of Divine Providence, mother-house at Pittsburg, Pennsylvania, U. S. A., founded in 1876 by six sisters from Mainz (see III), who were later joined by other sisters from Mainz. The congregation now numbers about 200, in charge of 20 schools in the Diocese of Pittsburg, one in the Wheeling, and 3 in the Columbus, Diocese.

Sister M. Theresia.

DIVINE PROVIDENCE, CONGREGATION OF THE SISTERS OF, founded in Lorraine, 1762, by the Venerable Jean-Martin Moye (b. 1730; d. 1793), priest of the
Diocese of Metz, afterwards missionary to China, for "the propagation of the faith, the ensuring of a Christian education to children, especially those of the rural population, for the care of the sick, and other works of mercy". Approved by the Bishop of Metz in 1762, and recommended to the solicitude of his clergy, within six years the congregation had exceeded the limits of his diocese and planted itself on the banks of the Vosges. Marie Morel was the first superior. Suppressed in 1792, the congregation was re-established after the Revolution; in 1816 the Rules and Constitutions were formally adopted by the provincial chapter. The mother-house is at St-Jean-de-Bassel, in the Diocese of Metz, Lorraine, with establishments in Lorraine, Alsace, Belgium, and the United States. There are about 500 sisters in the Diocese of Metz, and 300 in the Diocese of Strasburg, who direct schools, boarding schools, industrial schools, domestic economy institutes, hospitals, etc. At St-Jean-de-Bassel there is a normal institute devoted exclusively to the training of the young teachers of the congregation, generally 155 in number, and connected with this institute is a model school, all under the supervision of the educational boards of the German Imperial Government. In Belgium there are about 100 sisters. At Perpignan, near Tournai, they directed schools from 1842 to 1908. At Covington, Kentucky, where they have charged of schools and kindergartens. 

Sisters of Divine Providence, of Kentucky, incorporated American provincial house at Mt. St. Martin's convent, Newport, Kentucky. Mother Anna Houlé, superior general (d. 1903) of the congregation succeeded in placing the Sisters of St-Jean-de-Bassel in the foremost ranks of teachers in Alsace-Lorraine, and then, like Moye, longed to see them labour for the Christian education of youth in America, where she rightly judged the labourers to be few. In 1888 Bishop Mues of Covington, Kentucky, visited the mother-house general at St-Jean-de-Bassel, and arranged to have the sisters introduced into his diocese. Accordingly, in August, 1889, three sisters arrived in Covington and took up residence in one of the historical mansions of northern Kentucky, now known as Mt. St. Martin's convent. The growth of the American branch has necessitated the building of a new convent in 1905. In 1898, the property was acquired at Melbourne, Kentucky, the site of a new St. Ann's Convent, where it is designed to erect the new provincial house. Mother Anna visited the American province in 1892. There are 215 sisters; until 1903 occasional small colonies were added from the mother-house general; about one-third of the subjects are American. At Mt. St. Martin's convent are the novitiate and normal school for the province. Teaching is the primary object of the sisters. They conduct an academy and many parish schools, an infant asylum, a home for French emigrant and working girls, and a home for the aged. The sisters are working in the dioceses of Covington, Providence, and Cleveland, and the archdioceses of New York, Baltimore, and Cincinnati. 

Sister M. Camillus, 

VI. SISTERS OF DIVINE PROVIDENCE, founded at Castrovilla, Texas, U.S.A., 1808, by Sister St. Andrew from the mother-house at St-Jean-de-Bassel, Lorraine, at the instance of Bishop Dubuis of Galveston. In 1896 the mother-house was transferred to San Antonio. The Constitutions were approved by Pope Pius X on May 25, 1907. The sisters (1908) of 67 schools and academies in Texas, Louisiana, and Oklahoma. Mother Mary Florence. 

VII. SISTERS OF DIVINE PROVIDENCE OF ST. ANDREW, founded at Hambourg-la-Forteresse, in 1806, by Father Anton Gapp, "for the Christian instruction of children in the primary schools and higher schools for girls". The congregation received the authorization of the French Government in 1826, and the mother-house was established at Forbach, Lorraine, but in 1839 was removed to Peltre. Destroyed in 1870 by the flames which swept the whole district, it was rebuilt after the close of the Franco-Prussian War. The congregation has now in Lorraine 135 institutions, among them 7 higher schools for girls 20 trade and several housekeeping schools, and 9 hospitals. In Belgium they have 35 foundations. There are also some 900 schools, in which about 17,000 children in Lorraine and 4000 in Belgium. 

Divine Redeemer, Daughters of the mother-house at Oedenburg, Hungary; founded in 1863 from the Daughters of the Divine Saviour of Vienna. This congregation has 37 filial houses and 300 sisters, who conduct schools of all kinds and care for the sick. 

Divine Saviour, Society of the, founded at Rome, 8 Dec., 1851, by Johann Baptist Jordan (b. 1848 at Garweil im Breisgau), elected superior general and founder of the congregation, who issued a pious pastoral letter to the clergy, promising uniformity and harmony. The social object of the congregation was to teach the catechism and the catechumens. The congregation was founded to serve the upper missions of the Diocese of Metz, Lorraine, but has extended its mission to all Europe, to North America, and to Asia. 

Divine Redeemer, Daughters of the, founded at Oedenburg, Hungary; founded in 1863 from the Daughters of the Divine Saviour of Vienna. This congregation has 37 filial houses and 300 sisters, who conduct schools of all kinds and care for the sick.
there are stations in Assam (where the sisters conduct 6 orphan asylums), Austria, Hungary, Belgium, Switzer-
land, Germany, France, British Commonwealth, and the
United States. They conduct orphan asylums, kind-
gergardens, and schools, and visit the sick in their
homes. The congregation numbers about 200.

Daughters of the Divine Saviour, mother-house at
Vienna, a branch of the Niederbrunn Sisters of the
Most Holy Saviour, established 1857. The congrega-
tion had been invited by the parish priests of St. Paul's,
who care for the sick in hospitals and in their own homes, and con-
duct schools for girls, primary and grammar schools, trade
schools, kindergartens, etc. The sisters have 72 houses in the
Dioceses of Vienna, St. Pölten, Seekau, Konigratz, Brunn, Gran, Raab, and Parenzo-Pola.

Mass; Worskip.

Divine Word, Society of the (Societas Verbi
DIVINI), the first German Catholic missionary society
established. It was founded in 1875 during the period of
persecution of the Church in Steyl near Tilburg, Holland,
by a priest, Rev. Arnold Janssen (d. 15
January, 1900), for the propagation of the Catholic
religion among pagan nations. It is composed of
priests and lay brothers. On completion of their
philosophical studies the students make a year of novitiate, at the end of which they take the ordinary
vows binding for three years. Before ordination the
members of the society make perpetual vows. The
coadjutor brothers renew their vows every three
years for nine years, when they take perpetual vows.

The first mission of the society was established in
1882 in Southern Shantung, China, a district containing
135 Catholics and about 10,000,000 pagans. Accord-
ing to the statistics of 1906-07, this mission numbered
35,375 Catholics, 36,367 catechumens, 1,64 Chinese
seminarians, 46 European priests, 12 Chinese priests, 13 coadjutor brothers of the society,
3 teaching brothers, and 19 nuns. The second mission
founded was in Togo, West Africa, in 1892.
There were then scarcely a hundred Catholics in the
district. In 1906 the mission had a prefect Apostolic,
316 European priests, 122 European brothers, 123
53 native teachers, and 68 mission stations. There
were nearly 3000 children attending the schools; the
Catholics numbered 3300. The third mission was in
German New Guinea. It is a comparatively new
colony. Dangerous fevers are common. The
natives are Papuans (Negritos). They are all savages,
recognizing no form of authority, having no fixed
customs, or administration of justice. The greatest
difficulty experienced by the missionaries is the incred-
ible number of languages. Thus in the entire mission
district, 467 sq. m., probably more than a hundred
languages are spoken. The first Catholic missionaries
arrived in German New Guinea in August, 1890.
At the close of 1906, there were in the mission a prefect
Apostolic, 18 European priests, 13 coadjutor brothers,
18 nuns, 1000 native Catholics, and 400 children in the

In the Argentine Republic the society numbers
51 priests, 31 coadjutor brothers, and 41 nuns. They
have charge of colleges, seminaries, and of 12
parishes in the four Dioceses of Buenos Ayres, La
Plata, Santa Fè, and Pumau. Part of the mission
District includes the territory once occupied by the fa-
mous Jesuit Reductions of Paraguay. The mission
was established in 1808. In Brazil there are 39
priests, 14 coadjutor brothers, and 13 nuns. The
society also has a mission in the United States, at Sher-
erville, Indiana, Cook Co., Illinois. There are 13
priests and 37 coadjutor brothers in charge of a technical
school, and 30 nuns who conduct a home for the
aged. In Europe the society has six houses or col-
leges with 120 priests, 546 coadjutor brothers, and 1089
students for the society. There are 391 coadjutor
brothers for the nuns has 231 members. The colleges in Europe are:
(1) St. Michael, at Steyl near Tegelen, Holland,
-founded 8 Sept., 1875. The superior general resides
here with 47 priests, 314 coadjutor brothers, and 282
students for the society. (2) Heiligkreuz (Holy
Cross) near Neisse, Silesia, founded 24 Oct., 1892.
There are 382 coadjutor brothers. (3) St. Wendel, in the Dicre of Trier,
with 18 priests, 68 coadjutor brothers, and 155
students. (4) St. Gabriel, near Vienna, established 4
Oct., 1889. There are 26 priests, 370 novices and
students of philosophy and theology, and 50 coadjutor
brothers. (5) St. Raphael, Rome, with 5 priests and
one coadjutor brother. (6) Bischofshofen, near Salz-
burg in Austria, established 17 Aug., 1904.

Nuns.—The Society of the Servants of the Holy
Ghost (Societas Servorum Spiritus Sancti) was founded
in 1889, at Steyl, Holland, by the Rev. Arnold Jans-

senn. It numbers about 300 nuns who help the
fathers in their missions, chiefly by teaching.

Divinity of Christ. See Jesus Christ.

Divisch, Procopius, Premonstratensian, b.
at Senftenberg, Bohemia, 24 March, 1831; d. at Prenditz,
Moravia, 21 December, 1764. He was a son of Count
Wenceslaus, but took the name of Procopius when he
became a religious. He began his studies at the
Znaym Gymnasium and later entered the cloister
school of the Premonstratensians at Bruck, Styria.
In 1726 he was ordained and soon after became
professor of philosophy at the school. His lectures on
philosophy were most industrious and frequently in
his own handwriting. He was a great experimenter.
He received the doctorate in theology at Salzburg
in 1733, his thesis being "Tractatus de Dei unitate sub inscrip-
tione A et R". In 1736 he took

to the little parish of Prenditz near Znaym.
Here he had sufficient leisure for work and experiment
in his favourite subjects, hydraulics and electricity,
constructing the necessary instruments himself.
His fame soon spread abroad, and he was called to Vienna
to repeat his electrical experiments before the Em-
peror Francis and the Empress Maria Theresa. He
was the first one to apply electricity in the treatment
of disease. In 1750, prior to the publication of the
French translation of Franklin's letters to Collinson
(1751), he knew of the discharging property of pointed
rods and applied his knowledge to the performance of
curious tricks. The first lightning-rod was erected by
Divisch at Prenditz, in 1754, before Franklin's sug-
gestions were known and before they had been carried out
elsewhere. Divisch's device is quite different from
that proposed by the Philadelphian. He petitioned
the emperor in 1755 to put up similar rods all over
the country and thus prevent fires and storms.
This proposal was rejected on the advice of the mathe-
maticians of Vienna. He also constructed the Deny-
dor (Denis, "Divisch", d'or, "of gold"), a musical
instrument, imitating string and wind instruments and
producing orchestral effects. His theories are ex-
pounded in his published work, 'Theoretischer
Tractat oder die längst verlangte Theorie von der me-
chanischen Dichtungstheorie', Vienna, 1755; Frank-
fort, 1768; (Bohemian tr. Prague, 1899).

WILLIAM FOX.

Divorce.—This subject will be treated here under
two distinct headings: I. In Moral Theology; II. In
Civil Jurisprudence.

I. In Moral Theology.—The term divorce (dier-
atum, from divortare, "to separate") was
DIVORCE

employed in pagan Rome for the mutual separation of married people. Etymologically the word does not indicate whether this mutual separation included the dissolution of the marriage bond, and in fact the word is used by the Church and in ecclesiastical law in this neutral signification. Hence we distinguish between divortium plenum or perfectum (absolute divorce), which implies the dissolution of the marriage bond, and divortium imperfectum (limited divorce), which leaves the marriage bond intact and implies only the cessation of common life (separation from bed and board, or in addition separation of dwelling-place). The dissolution of the marriage bond is called separation (separation de corps).

The Catholic doctrine on divorce may be summed up in the following propositions: A. In Christian marriage, which implies the restoration, by Christ Himself, of marriage to its original indissolubility, there can never be an absolute divorce, at least after the marriage has been consummated: B. Non-Christian marriage can be dissolved by absolute divorce under certain circumstances in favour of the Faith; C. Christian marriage before consummation can be dissolved by solemn profession in a religious order, or by an act of papal authority; D. Separation from bed and board (divortium imperfectum) is allowed for various causes, such as adultery, lapse into infidelity or heresy on the part of husband or wife. These propositions we shall explain in detail.

A. In Christian marriage, which implies the restoration, by Christ Himself, of marriage to its original indissolubility, there can never be an absolute divorce, at least after the marriage has been consummated.

The Original Indissolubility of Marriage and Its Restoration by Christ.—The indissolubility of absolute divorce was ordained by Christ Himself according to the testimony of the Apostles and Evangelists: "Whosoever shall put away his wife and marry another, committeth adultery against her. And if the wife shall put away her husband, and be married to another, she committeth adultery" (Mark, x, 11, 12).—Cf. Matt., xix, 9; Luke, xvii, 18. In like manner, St. Paul: "To them that are married, not I but the Lord commandeth, that the wife depart not from her husband. And if she depart, she remain unmarried, or be reconciled to her husband. And let not the husband put away his wife" (I Cor., vii, 10, 11). In these words Christ restored the original indissolubility of marriage as it had been decreed by God before Creation. The indissolubility is grounded in human nature. This is expressly stated by Him against the Pharisees, who put forward the separation allowed by Moses: "Moses by reason of the hardness of your heart permitted you to put away your wives: but from the beginning it was not so" (Matt., xix, 8); "He who made man from the beginning, made them male and female. And said to them, For this cause shall a man leave father and mother, and cleave to his wife; and they two shall be in one flesh. Therefore now they are not two, but one flesh. What therefore God hath joined together, let no man put asunder" (Matt., xix, 4–6). The indissolubility of all marriage, not merely of Christian marriage, is here affirmed. The permanence of marriage for the whole human race according to nature is confirmed and ratified by a Divine positive ordinance.

No Catholic can doubt that even according to the natural law marriage is in a certain sense indissoluble. The following proposition is condemned in the Syllabus of Pius IX (Proposition LXVII): "According to the natural law, the bond of marriage is not indissoluble, and its dissolution in the strict sense can only be sanctioned by civil authority." The meaning of this condemnation is clear from the document where it has been taken. This is the papal Brief ("Ad apostolicas sedis festigium", 22 August, 1851, in which several works of the Turin professor, J. N. Xuyzt, and a series of propositions defended by him were condemned, as is expressly said, "de Aposto- licae potestatis plenitudine"). A certain indissolubility of marriage whenever contracted must therefore be admitted, even according to the natural law, at least in the sense that marriage, unlike other contracts, may not be dissolved at the pleasure of the contracting parties. Such dissolvibility would be in direct contradiction with the essential purpose of marriage, the proper propagation of the human race, and the education of the children. The indissolubility of marriage, to which a certain indissolvibility would nullify the essential purpose of marriage, the dissolution may nevertheless not be permitted, can hardly be proved as postulated by the natural law from the primary purpose of marriage. However, even such dissolvibility would not be in accord with the secondary purposes of marriage, and it is therefore regarded by St. Thomas (I, q. 37, dist. xxxiii, q. ii, a. 1) and most Catholic scholars as against the secondary demands of the natural law. In this sense marriage, considered merely according to the natural law, is intrinsically indissoluble. That it is also extrinsically indissoluble, i. e. that it cannot be dissolved by any authority higher than the contracting parties, cannot be doubted. The indissolubility in the strict sense is set by the natural law, has no such right of dissolving marriage. The evil consequences which would follow so easily, on account of the might of passion, in case the civil power could dissolve marriage, seem to exclude such a power; it is certainly excluded by the original Divine positive law: What therefore God hath joined together, let no man put asunder (Moses, vii, 10, 11). And in several cases divorce in the strict sense can be sanctioned by civil authority, need not necessarily be understood of marriage according to the purely natural law, because Xuyzt, whose doctrine was condemned, asserted that the State had this authority (In regard, dist. xxxiii, q. ii, a. 1) and the civil authority, because the corresponding section of the Syllabus treats of the errors about Christian marriage. (Cf. Schrader, Der Papst und die modernen Ideen, II (Vienna, 1865), p. 77.)

2. Divorce among the Israelites.—In spite of the Divine law of the indissolubility of marriage, in the course of time divorce, in the sense of complete dissolution of the tie between the husband and wife, was in a certain extent among all nations. Moses found this custom even among the people of Israel. As lawgiver, he ordained in the name of God (Deut., xxix, 1): "If a man take a wife, and have her, and she find not favour in his eyes, for some uncleanness: he shall write a bill of divorce, and shall give it in her hand, and send her out of his house." The rest of the passage shows that this divorce was understood as justifying the wife in her marriage with another husband, hence as a complete annulment of the first marriage. Some regard it only as a freedom from penalty, so that in reality the remarriage of the divorced wife was not allowed, and was adultery, because the bond of the first marriage had not been dissolved. This was rejected by theologians. Peter Lombard (IV Sent., dist. xxxix, 3), St. Bonaventure (IV Sent., dist. xxxix, art. 3, Q. i), and others. Others again, however, believe that there was a real permission, a dispensation granted by God, as otherwise the practice sanctioned in the law would be branded as sinful in some part of the Old Testament. Moreover, the phrase (Deut., xxix, 1) seems to have rendered illicit what was illicit in the beginning, but what had really been allowed later, even though it was allowed "by reason of the hardness of your heart" (St. Thomas, III, Supplem., Q. lxvii, a. 3; Bellarmine, "Controvers. de divorci. de matrim. ", I, xvii; Sanchez, "De matrimonio", X, disp. i,
n. 7; Palmieri, "De matrimonio christ.", Rome, 1880, 133 sqq.; Wernz, "Jus decretalium", IV, n. 696, not. 12; etc.). This second opinion maintains and must maintain that the expression "for some uncleaness" (in Hebrew רְמַע) does not mean any slight cause, but a grievous sin, something shameful directed against the purpose of marriage or marital fidelity. A separation for on such slighted cause is a separation of the husband, is against the primary principles of the natural moral law, and is not subject to Divine dispensation in such a way that it could be made licit in every case. It is different with separation in serious cases governed by special laws. This, indeed, does not correspond perfectly with the secondary purposes of marriage, but on that account, the Church, as a matter of right and justice, has forbidden to admit the inconvenience to be feared from such a separation to be corrected or avoided by Divine Providence. In the time of Christ there was an acute controversy between the recent, lax school of Hillel and the strict, conservative school of Schammai about the meaning of the phrase רְמַע. Hence the question with which the Pharisees tempted Our Lord: "Is it lawful for a man to put away his wife,... for any cause?" The putting-away of the wife for frivolous reasons had been sharply condemned by God through the Prophets Micæus (ii, 9) and Malachias (ii, 14), but in later days it became very prevalent. Christ abolished entirely the permission which Moses had granted, even though this permission was strictly limited; He allowed a cause similar to the one given in the Decalogue (Matt. xix, 8), but with this difference: the woman is not to take another husband, but not for the dissolution of the marriage bond.

3. The Dogmatic Basis and Practical Application of the Complete Indissolubility of Consummated Marriage within the Catholic Church.—(a) Its Foundation in Scripture.—The complete exclusion of absolute divorce (divortium perfectum) in Christian marriage is expressed in the words quoted above (Mark, xvi, 13), Luke, the "Cor" as received. The words in St. Matthew's Gospel (xix, 9), "except it be for fornication", have, however, given rise to the question whether the putting-away of the wife and the dissolution of the marriage bond were not allowed on account of adultery. The Catholic Church and Catholic theology have always maintained that by such an expression St. Matthew did not mean that the word "fornication" should in this case cover adultery, in the sense of Sis. Mark, Luke, and Paul, and the converts instructed by these latter would have been brought into error in regard to the real doctrine of Christ. As this is inconsistent both with the infallibility of the Apostolic teaching and the inerrancy of Sacred Scripture, the clause in Matthew must be explained as the mere dismission of the unfaithful wife without the dissolution of the marriage bond. Such a dismission is not excluded by the parallel texts in Mark and Luke, while Paul (I Cor., vii, 11) clearly indicates the possibility of such a dismissal: "And if she depart, that she remain unmarried, or be reconciled to her husband". Gramatically, the clause in St. Matthew may modify one member of the sentence (that which refers to the putting-away), not the other. Yet, the construction (the remarriage of the other), though we must admit that the construction is a little harsh. If it means, "Whoever shall put away his wife, except it be for fornication, and shall marry another, commit adultery", then, in case of marital infidelity, the wife may be put away, but that, in this case, adultery is not committed by a new marriage cannot be concluded from these words. Following words, "And he that shall marry her that is put away", therefore also the woman who is dismissed for adultery—"committing adultery", say the contrary, since they suppose the permanence of the first marriage. Moreover, the brevity of expression in Matthew, xix, 9, which seems to us harsh, is explicable, because the Evangelist had previously given a distinct explanation of the same subject, and exactly laid down what was justified by the reason of fornication: "Whosoever shall put away his wife, excepting for the cause of fornication, maketh her to commit adultery: and he that shall marry her that is put away, committeth adultery" (Matt., v, 32). Here all excuse for remarriage or for the dissolution of the first marriage is excluded. Even the mere dismissal of the wife, if this is done unjustly, exposes her to the danger of adultery and to this attribute of the husband who has dismissed her—"he maketh her to commit adultery". It is only in the case of marital infidelity that complete dismissal is justified—"excepting for the cause of fornication". In this case not he, but the wife who has been lawfully dismissed, is the occasion, and she will therefore be responsible should she commit adultery. Sts. Tertullian and Hilary of Poitiers, according to the interpretation of Matthew, xix, 9, there is a variant reading supported by important codices, which has "maketh her to commit adultery" instead of the expression "committeth adultery". This reading answers the difficulty more clearly. (Cf. Knabenbauer, "Comment. in Matt.", II, 114.)

Catholic exegesis is unanimous in excluding the permissibility of absolute divorce from Matthew, xix, but the exact explanation of the expressions, "except it be for fornication" and "excepting for the cause of fornication", has given rise to various opinions. Does it mean the violation of marital fidelity, or a crime committed before marriage, or a diriment impediment? (See Palmieri, "De matrim. christ.", 178 sqq.; Sasse, "Divorce und Sakramente", 188 sqq.) The former opinion is the one most generally accepted. The expression is cogent only for a consummated marriage. For Christ founds His law on the words: "They two shall be in one flesh", which are verified only in consummated marriage. How far divorce is excluded, or can be allowed, before the consummation of the marriage must be derived from other sources.

(b) Tradition and the Historical Development in Doctrine and Practice.—The doctrine of Scripture about the illicitness of divorce is fully confirmed by the constant tradition of the Church. The testimonies of the Fathers and of the councils leave us no room for doubt. In numerous places they lay down the teaching that not even in the case of adultery can the marriage bond be dissolved or the innocent party proceed to a new marriage. They insist rather that the innocent party must remain unmarried after the dismissal of the guilty one, and can only enter upon a new marriage in case death intervenes.

We read in Hermas (about the year 150), "Pastor", mand. IV, i, 6: "Let him put her [the adulterous wife] away and let him not marry another, but after putting away his wife he shall marry another, he likewise commiteth adultery" (ed. Füll, 1901). The expression in verse 8, "For the sake of her repentance, therefore, the husband ought not to marry", does not weaken the absolute command, but it gives the supposed reason of this great command. (Cf. Justin, "Martyr" (170) says (Apolog. I, iv, in P. G., VI, 38, p. 262) in the "Legatio pro christ.", xxxiii (P. G., VI, 965): "For whosoever shall put away his wife and shall marry another, commiteth adultery"; Tertullian (d. 241), "De monogamia", c. ix (P. L., II, 961): "They enter into adulterous unions even when they do not put away their wives;
we are not allowed even to marry, although we put our wives away”; Clement of Alexandria (d. 217), “Strom.”, II, xxiii (P. G., VIII, 1096), mentions the ordinance of Holy Scripture in the following words: “You shall not put away your wife except for fornication, and [Holy Scripture] considers as adultery a remarriage while the other of the separated persons survives.” Similar expressions are found in the councils of the following centuries both in the Latin and in the Greek Fathers, e. g. St. Basil of Cæsarea, “Epist. can.” ii. “Ad Amphphilochium”, can. lxviii (P. G., XXXII, 732); St. John Chrysostom, “De libello reput.” (P. G., LII, 218); Theodoretus, on I Cor., vii, 39, 40 (P. G., LXXIII, 275); St. Ambrose, “in Luc.”, VIII, v, 18 sqq. (P. L., XV, 1855); St. Jerome, in the “Martyrologium Byzantinum”, XII, 342; St. Augustine, “De adulterinis conjugiis”, ii. (P. L., XI, 473), etc. etc. The occurrence of passages in some Fathers, even among those just quoted, which treat the husband more mildly in case of adultery, or seem to allow him a new marriage after the infidelity of his spouse, does not prove that these expressions are to be understood of the permissibility of a new marriage, but of the lesser canonical penance and of exemption from punishment by civil law. Or if they refer to a command on the part of the Church, the new marriage is supposed to take place after the death of the wife who was dismissed. This permission was mentioned, not without reason, as a concession for the innocent party, because at some periods the Church’s laws in regard to the guilty party forbade forever any future marriage (cf. can. vii. of the Council of Compiègne, 757). It is well known that the civil law, even of the Christian emperors, permitted in several cases a new marriage after the separation of the wife. Hence, without contradicting himself, St. Basil could say of the husband, “He is not condemned”, and “He is considered excusable” (Ep. clxxxviii; can. ix, and Ep. cxix; can. xx, i, 405); this is because he was speaking distinctly of the milder treatment of the husband than of the wife with regard to the canonical penance imposed for adultery. St. Epiphanius, who is especially reproached with teaching that the husband who had put away his wife because of adultery or another crime was allowed by Divine law to marry another (Harres, lix, 4, in P. G., XLII, 1024), is speaking of the excusable remarriage by an adulterous or divorced wife, and, whilst he declares in general that such a second marriage is allowed, but is less honourable, still he makes the exception in regard to this last part in favour of one who had long been separated from his first wife. The other Fathers of the following centuries, in whose works ambiguous or obscure expressions may be found, are to be explained in like manner.

The practice of the faithful was not indeed always in perfect accord with the doctrine of the Church. On account of defective morality, there are to be found regulations of particular synods which permitted unjustifiable concessions. However, the synods of all centuries, and more clearly still the decrees of the popes, have constantly denounced and prohibited the remarriage of the penitent and permitted remarriage was never allowed. The Synod of Elvira (A. d. 300) maintains without the least ambiguity the permanence of the marriage bond, even in the case of adultery. Canon ix decreed: “A faithful woman who has left an adulterous husband and is marrying another who is faithful, let her be prohibited from marrying; if she has married, let her not receive communion until the man she has left shall have departed this life, unless illness should make this an imperative necessity” (Labbe, “Concilia”, II, 7). The Synod of Arles (314) speaks indeed of counselling, as far as possible, that the young men who had dismissed their wives for adultery should take no second wife” (at, in quantum possit, casalium eis detur); but it declares at the same time the illicit character of such a second marriage, because it says of these husbands, “They are forbidden to marry” (prohibebat nubere, Labbe, II, 472). The same declaration is to be found in the Second Council of Mileve (416), canon xvii (Labbe, IV, 331); the Council of Herculod (673), canon x (Labbe, VII, 554); the Council of Friuli (Forum Julii), in northern Italy (791), canon x (Labbe, X, 40); all of these teach that the marriage of the divorced man remains in force of dismissal for adultery, and that new marriage is therefore forbidden.

The following decisions of the popes on this subject deserve special mention: Innocent I, “Epist. ad Exuper.”, c. vi, n. 12 (P. L., XX, 500): “Your diligence has asked concerning those, also, who, by means of a decree of separation, have obtained another marriage. It is manifest that they are adulterers on both sides.” Compare also with “Epist. ad Vict. Rothom.”, xii, 15 (P. L., XX, 479): “In respect to all cases the rule is kept that whoever marries another man, while her husband is alive, must be held to be an adulteress, and must be granted no leave to do penance unless one of the men shall have died.” The impossibility of absolute divorce during the entire life of married people could not be expressed more forcibly than by declaring that the permission to perform public penance must be refused to women who remarried, as to a public sinner, because this penance presupposed the cessation of sin, and to remain in a second marriage was to continue in sin.

Besides the adultery of one of the married parties, the laws of the empire recognized other reasons for which marriage might be dissolved, and remarriage permitted, for instance, protracted absence as a prisoner of war, or the choice of religious life by one of the spouses. In these cases, also, the popes pronounced decidedly for the indissolubility of marriage, e. g. In- nocent I, “Epist. ad Probus”, in P. L., LX, 602; Leo I, “Epist. ad Anastatam Aquil.”, in P. L., LX, 1136; Gregory I, “Epist. ad Urbanum Abb.”, in P. L., LXXVII, 833, and “Epist. ad Hadrian. notar.”, in P. L., LXXXII, 1169. This last passage, which is found in the “Decretum” of Gratian (C. xxvii, Q. ii, c. xxvi), is as follows: “Although the civil law provides that, for the sake of conversion (i. e. for the purpose of changing the religious life, or of the death of one of the parties), the marriage may be dissolved, though either of the parties be unwilling, yet the Divine law does not permit it to be done.” That the indissolubility of marriage admits of no exception is indicated by Pope Zacharias in his letter of 5 January, 747, to Pepin and the Frankish bishops, for in chapter vii he ordains “by Apostolical authority”, in answer to the questions that had been proposed to him: “If any layman shall put away his own wife and marry another, or if he shall marry a woman who has been put away by another man, let him be deprived of communion.” [Monum. Germ. Hist.: Epist. XI, Epist. Merovingiei et Karolini avi, i (Berlin, 1892), 482]

(e) Laxer Admissions and their Correction. — Whilst the popes constantly rejected absolute divorce in all cases of divorce within the Frankish synods of the eighth century which allowed them in other cases. In this regard the Councils of Verberie (732) and Compiègne (757) erred especially. Canon ix of the first council is undoubtedly erroneous (Labbe, VIII, 407). In this canon it is laid down that if a man must go abroad, and his wife, out of attachment to home and relatives, will not go with him, she must remain unmarried so long as the husband is alive whom she refused to follow; on the other hand, in contrast to the blameworthy woman, a second marriage is allowed to the husband: “If he has no hope of returning to his own country, if he cannot abstain, he can receive another wife with a penance.” So deeply was the pre-Christian custom of the people engraven in their hearts that it was believed allowance should be
made for it to some degree. Canon v seems also to grant the unauthorized permission for a second marriage. It treats of the case in which the wife, with the help of other men, seeks to murder her husband, and he escapes from the plot by killing her accomplices in self-defence. Such a husband is allowed to take another wife: “That husband can put away that wife, and, if he will, let him take another. But let that woman who has committed adultery, and in accordance with the teaching of the Gospel and the Apostles, the bond of marriage cannot be dissolved, and that neither party—not even the innocent, who has given no cause by adultery—can contract another marriage while the other lives, and that he, or she, commits adultery who puts away an adulterous wife, or husband, and marries another; let the one husband, or wife, who has heretofore dissolved the marriage, go through the process of procedure directly the infallibility of the Church doctrine in regard to the indissolubility of marriage, even in the case of adultery, but indirectly the decree defines the indissolubility of marriage. Doubts have been expressed here and there about the dogmatic character of this definition (cf. Sasse, “De Sacramentis,” II, 436). But Leo XIII, in his Encyclical “Aeternae,” 10 November, 1882, has decided the question by declaring that the Council of Trent “the baneful heresy” (hæresin deterentiam). The acceptance of this indissolubility of marriage as an article of faith defined by the Council of Trent is demanded in the creed by which Orientals must make their profession of faith when reunited to the Roman Church. The formula prescribed by the Council, according to the decree “also, that the bond of the Sacrament of Matrimony is indissoluble; and that, although a separation tori et cohabitationis can be made between the parties, for adultery, heresy, or other causes, yet it is not lawful for them to contract another marriage.” Exactly the same declaration in regard to marriage was made in the short profession of faith approved by the Holy See in the year 119 (Collectanea S. Congr. de Pontif. Fide, Rome, 1903, pp. 639, 640). The milder indirect form in which the Council of Trent pronounced its anathema was chosen expressly out of regard for the Greeks of that period, who would have been very much offended, according to the testimony of the Venetian ambassadors, if the anathema had been directed against them when they were in the process of asserting the decree that the Roman Church was not guilty of error in her stricter interpretation of the law (Pallavicini, “Hist. Conc. Trid.”, XXII, iv).

(e) Development of the Doctrine on Divorce outside of the Catholic Church.—In the Greek Church, and the other Oriental Churches in general, the practice, and finally even the doctrine, of the indissolubility of the marriage bond became more and more lax. Zhishman (Das Eherecht der orientalischen Kirchen, 720 sqq.) testifies that the Greek and Oriental Churches separated from Rome permit in their official ecclesiastical documents the dissolution of marriage, not merely on account of adultery, but also “of those occasions and actions the effect of which on married life might be regarded as similar to natural death or to adultery, or for that reason the decree that the Roman Church was not guilty of error in her stricter interpretation of the law.” Such reasons are, first, high treason; second, criminal attacks on life; third, frivolous conduct giving rise to suspicion of adultery; fourth, intentional abortion; fifth, acting as sponsor for one's own child in baptism; sixth, prolonged disappearance; seventh, illegal dispensation from the Sacrament of Holy Orders; eighth, entrance of one party into a religious order with the permission of the other party.

Among the sects that arose at the time of the Reformation in the sixteenth century, there can hardly be question of any development of church law about divorce. Jurisdiction in matrimonial affairs was relegated, on principle, to the civil law, and only the blessing of marriage was assigned to the Church. It is true
that the interpretation of the so-called ecclesiastical officials, their approbation or disapproval of the civil marriage laws, might find expression in certain cases should they refuse to bless an intended marriage of people who had been divorced when the reason for the divorce seemed to them to be too much opposed to Scripture. It is not surprising that in this respect the tendency should have been downwards, when we remember that in the various sects of Protestantism the growth of liberalism has advanced even to the denial of Christ [Dr. F. Albert, Verbrennen und Strafen als Ehescheidungsgrund nach evangel. Kirchenrecht (in Stutz-Kirchenr. Abhandlungen, Stuttgart, 1903), 1, IV].

4. Declaration of Nullity.—The declaration of nullity is to be distinguished from divorce proper. It can be called divorce proper in a very loose sense, in the proper sense, because it presupposes that there is and has been no marriage. However, as there is question of an alleged marriage and of a union which is considered by the public as a true marriage, we can understand why a previous ecclesiastical judgment should be required, declaring the presence of a diriment impediment and the consequent invalidity of a supposed marriage, before the persons in question may be free to separate or to enter upon a new marriage. It is only when the invalidity of a marriage becomes publicly known, and further cohabitation gives scandal, or when other important reasons render a prompt separation of domicile necessary or advisable, that such a separation should take place at once, to be made decisive and irrevocable. The decision of the invalidity of a marriage is publicly known, official procedure is necessary, and the ecclesiastical process of nullification must be introduced. In the case of impediments which refer exclusively to the rights of the husband and wife, and which can be removed by their consent, only the one of the supposed spouses whose right is in question is permitted to impugn the marriage. The parties cannot before the ecclesiastical court, provided it is desired to maintain this right. Such cases are the impediments of fear or violence, of essential error, of impotence, and of other impediments, which are not established, and failure to comply with some fixed condition. In cases of the other possible impediments, every Catholic, even a stranger, may enter a complaint of nullity if he can bring proofs of such nullity, in the case of lawful consent before the nuptial act of the public authority. It is not permitted to take any account of private advantage, were unwilling to declare the invalidity of the marriage before its dissolution by death, or who knew the impediment when the bans of marriage were proclaimed and culpably kept silence. Of course it is allowed to the married parties to disprove the reasons alleged by strangers against their marriage (Wernz, "Jus decretalium", IV, n. 743).

That separation and remarriage of the separated parties may not take place merely on account of private convictions of the invalidity of a supposed marriage, but only in consequence of an ecclesiastical judgment was taught by Alexander III and Innocent III in IV Decretal, xix, 3, and II Decretal, xiii, 13. In these cases the popes and other bishops sufficed; at present the Constitution of Benedict XIV, "Dei misionate", 3 November, 1741, must be followed. This prescribes that in matrimonial cases a "defender of the matrimonial tie" (defensor matrimonii) must be appointed. If the decision is for the validity of the marriage, there need be no appeal in the second instance. The parties can be satisfied with the first decision and continue in marriage life. If the decision is for the invalidity of the marriage, an appeal must be entered, and sometimes even a second appeal to the court of third instance, so that it is only after two concordant decisions on the invalidity of the marriage in question that it can be regarded as invalid, and the parties are allowed to proceed to another marriage. (Cf. III Conc. plen. Baltim., App. 292 sqq.; Cone. Americ. latin., II, n. 16; Laurentius, "Instit. juris eccel.", 2nd ed., n. 696 sqq.; Werner, "Jnsdecretal.\", IV, n. 744 sqq.)

Sometimes, however, in missionary countries, Apostolic prefects are permitted to give summary decision of cases in which two concordant opinions of approved theologians or canonists pronounce the invalidity of the marriage to be beyond doubt. Moreover, in cases of evident nullity, because of marriage by blood relationship or affinity, of previous marriage, of the absence of form, of lack of baptism on the part of one party, a second sentence of nullity is no longer demanded (Deer. of the Holy Office, 5 June, 1889, and 16 June, 1894. Cf. Acta S. Sedis, XXVII, 114; also Deer. of the Holy Office, 27 March, 1901, Acta S. Sedis, XXXIII, 756). The court of final appeal in these cases, when no other court exists, is the episcopal court of the diocese, of second instance the metropolitan court, of third instance the Roman See. Sometimes, however, Rome designates for the third instance a metropolitan see of the country in question (Laurentius, above, 607, not. 6). No one, however, is prohibited from immediate application in the first instance to the Holy See. Custom reserves to the Holy See matrimonial cases of reigning princes.

In the Decretals the declaration of nullity is treated under the title "De Divortiis". But it is important that these matters should be carefully distinguished from one another. The lack of exact distinction between the expressions "declaration of invalidity" and "divorce", and the different treatment of invalid marriages at different times, may lead to errors in judgments of ecclesiastical decisions. Decisions of particular Churches are too easily regarded as dissolutions of valid marriages, where in fact they were only declarations of nullity; and even papal decisions, like those of Gregory II communicated to St. Boniface and of Alexander III to the Bishop of Amiens, are looked on by some writers as permissions granted by the popes to the Frankish Church for particular reasons in certain cases. The decision of Gregory II, in the year 726, was embodied in the collection of Gratian (C, xxxii, Q. vii, c. xviii), and is printed in "Mon. Germ. Hist.", IIII: Epist. (Epist. Merovincii et Karolithi aevi I), p. 276; the decision of Alexander III is given in the Decretals as pars decisi, i.e., a part of the papal letter (IV Decretal, xv, 2) left out in the Decretal itself. In both cases it is those whose marriage was invalid, who impugned the nullity of a marriage which was invalid from the very beginning because of antecedent impotence. A certain concession to the Frankish Churches was, however, made in these cases. According to Roman custom such supposod husband and wife were not separated, but were bound to live together as brother and sister. In the Frankish Churches, however, a separation was pronounced and permission to contract another marriage was allowed to the one not afflicted with absolute impotence. This custom Alexander III granted to the Frankish Churches for the future. If, therefore, the union in question is spoken of as a legitima conjunclio, or even as a legitimun matrimonium, this is done only on account of the external form of the marriage contract. The decision of the ecclesiastical court according to the natural law was present, and an actual marriage was impossible, was well understood by the pope. He says this expressly in the part of his letter that has been embodied in the Decretals (IV Dercetal., xv, 2. Cf. Baumgarten, "Die Ehe Heinrichs II" in the Tübingen "Theol. Quartalschr.", LXXXVII, 1905, 54 sqq.). That in similar cases decision has been given sometimes for separation and sometimes against it, need excite no surprise, for even at the present day the ecclesiastical idea of impotence on the part of the woman is not fully settled (cf. controversy in "The American Eccel. Review", XXXVII, 51 sqq.).

B. Non-Christian Marriage Can Be Dissolved by Absolute Divorce under Certain Circumstances in Favour of the Faith.
I. The Pauline Privilege.—The Magna Charta in favour of Christian faith is contained in the words of the Apostle, 1 Cor., vii, 12-15: "If any brother hath a wife that believeth not, and she consent to dwell with him, let him not put her away. And if any woman hath a husband that believeth not, and he consent to dwell with her, let her not put away her husband. For the unbelieving husband is sanctified by the believing wife; and the unbelieving wife is sanctified by the believing husband: otherwise your children should be unclean; but now they are holy. But if the unbeliever depart, let him depart. For a brother or sister is not under servitude in such cases. But God hath called us in peace. For the Dis. in the interpretation of the 1358 Canon (Cor- nely on Cod. 175, 9). The exegetical controversy, as to whether these words are dependent on the preceding sentence, "For to the rest I speak, not the Lord", or whether that sentence refers to the one preceding it, is of no importance in this question. In the first supposition, we should seem to have here an ordinance which is not immediately Divine, but was estab- lished by the Apostle through the power of Christ. In the second supposition, it may be an immediately Divine ordinance.

These words of the Apostle tell us that in all cases when one of the married parties has received the Christian Faith, and the other remains an infidel and is not willing to live in peace with the Christian, the be- liever is not bound but is free. The Apostle does not inflict any penalty for the first refusal for the reason that the bond has been dissolved, but if it were not at least in the power of the Christian to dissolve the previous bond and to enter upon another marriage, the words would not have their full truth. Hence the Church has understood the words in this sense, and at the same time has fixed more exactly how and under what conditions the Christian may make such a refusal exercised. Innocent III declares authoritatively (IV Decretal., xii, 7, in cap. "Quanto") that the consent is justified in entering upon another marriage if he will provided the non-Christian is unwilling either to live with the other or such cohabitation would cause the blasphemy of the Divine name or be an incentive to mortal sin: "Si enim alter infidelis conjunxit ad filiam suam, vel si ad filiam inclinabat ad blasphemiâ dominini, vel ut eum protrahat ad mortale peccatum ei cohabitare volente; qui relinquit- tur, ad secunda, si voluerit, vota transibit: et in hoc casu intelligimus quod ait Apostolus: Sî infidelis dis- colet, etc., et canoemum etiam in quo dictur: Contumelia creatoris solutâ jus matrimonii circa eum qui relinquit- tur." According to the Church's interpretation and practice, the dissolution of the matrimonial bond must be ex- pressed by the non-Christian party, and only when a new mar- riage is contracted before conversion is not effected by the separa- tion of the married parties, but only when a new mar- riage is contracted by the Christian party because of this privilege. The Holy Office says this expressly in the decree of 5 August, 1769, ad 2: "Then only may the yoke of the matrimonial bond with an infidel be unloosed, when the Christian party whose liberty proceeds to another marriage with a believer" (Collecta- ten. S. Congr. de Prop. F., n. 1312). The manner of obtaining this right to enter upon a new marriage is fixed by the Church under penalty of invalidity, and consists in a demand (interpellatio) made of the non- Christian party whether he or she be willing to live with the other in peace or not. If this interpellation is not properly made, the right of the Christian party to contract a new marriage must be obtained (Collectanea, n. 1323). If the spouse that remains in infidelity agrees to live in peace, but later on acts contrary to this agreement by abusing the Christian religion, or tempting the Chris- tian to infidelity, or preventing the children from being educated in the Christian Faith, or becomes a temptation for the other to commit adultery, it is con- sidered that the latter regains the right to proceed to a new mar- riage after any lapse of time. This consequence which follows from the very nature of the privilege was ex- pressly declared by the Holy Office in the decree of 27 September, 1848, and was confirmed by Pius IX (Col- lectan., n. 1357; Ballerini-Palmieri, "Opus theol. mor.", 3d ed., VI, n. 468). If, however, the non- Christian party refuses to continue further in married life, not from hatred of the Faith or for other sinful reasons, but because the Christian, by sinful conduct (for instance by adultery), has given just reason for separation, the Christian would not be justified in en- tering upon a new marriage. The privilege, however, would still be his if the non-Christian party wished to maintain as reason for separation adultery committed before the time of conversion. (Collectan., n. 1312, 1313, 1322.) The Holy Office has also declared that which must take place before the remarriage of the Christian, must as a general rule be about living to- gether in peace or not, but as peaceful cohabitation can only be imagined in a case where there are no seri- ous dangers, and such dangers may arise in certain cir- cumstances from continued living with the non- Christian party, it is readily understood that the Holy See is justified in making the interpellation mean- whether the non-Christian party be willing to accept the Christian Faith; and in case the non-Christian re- fuses after careful deliberation, then, as a result of this refusal, permission may be granted to the Christian party to enter upon a new marriage and thereby to dissolve the previous one. This procedure, allowed by Pius IX, was also acknowledged under Leo XIII by the decree of the Holy Office, 29 November, 1882 (Collectan., n. 1358, ad 3).

The Pauline privilege is said to be in favour of the Christian Faith, but the meaning of the privilege and the right in such cases to absolute divorce is not ex- actly defined thereby. Doubt might arise in regard to the separation of the non-Christian adherents of Christian denomination but do not belong to the Ro- man Catholic Church. The solution of these doubts is contained in the following proposition: the Pauline privilege is attached to baptism. That the privilege is granted to nobody before the actual reception of baptism is beyond question from the decree of the Sacred Congregation of Propaganda, 16 January, 1863 (Collectan., n. 1351). The Holy Office, 13 March, 1901 (Acta S. Sedis, XXXIII, 550). Even the interpellation of the non-Christian party ought to be postponed until after the baptism of the other. It requires a papal dispensation to pro- ceed to such an interpellation validly before baptism (Cf. Instructio S. Office, under the authorization of Pius IX, 3 June, 1874, in Collectan., n. 1357). It is also certain that the dissolvability here in question is not limited to the marriages of pagans, but to all mar- riages of unbaptized persons, even though they should belong to some non-Christian Christian denomination (Acta S. Sedis, loc. cit.). Whether, however, the privilege is so joined to baptism that it belongs to Christian adherents of a non-Christian denomination when they profane the Christian bond, is a question for which the Church has not given a clear decision. Baptism is a question disputed by theologians. Some theologians of repute assert that the privilege is granted in this case, and that a practical decision to this effect has been made by a Roman Congregation, according to the testimony of Konings, "Theol. mor.", II, 394 (New York, 1878). (Cf. Palmieri, "De matrimon. christ.", th. xvi, p. 164; Marini, in Collectanea, L, 214 sqq.; Wernz, "Jus de- cretal.", IV, n. 702, not. 59; Gasparri, "De matrimon.", II, n. 1331; Ballerini-Palmieri, "Opus theol. mor.", 3d ed., VI, 457 sqq.) Even in the early ages, the Venerable Bede and St. Augustine seem to have understood the passage from St. Paul (1 Cor.) in this sense. The Papal Authority to Dissolve a Non-Christian Marriage.—From the ecclesiastical decisions that have been already quoted, it is clear that the Church
DIVORCE has at least the authority of explaining the Pauline privilege, of limiting, and extending it. This would give rise to no difficulties if the Pauline privilege, as expressed in I Cor., vii, 15, were an immediate Apostolic ordinance and only mediately Divine, inasmuch as Christ would have granted the power in general in a case of necessity to dissolve in favour of the Faith a marriage contracted in infidelity. For the entire Apostolic power passed to the supreme head of the Church, and as the Apostle could determine fixed rules and conditions for the dissolution of the marriages in question, the pope would have precisely the same authority. Yet on this point there is a diversity of opinion among theologians, and the Church has not settled the question. For, even if the privilege as promulgated by St. Paul is of Divine origin, the Church's power to make at least modifications in case of necessity can readily be explained because such a power belongs to her without a doubt in other matters that are of Divine right. The first opinion seems to have been held in the fourteenth century by eminent scholars like P. de Paulo and de Tudeschis, and in the fifteenth century by St. Antoninus; in recent times it is defended by Gasparri, Ross, Fahrner, and others. The second opinion is held by Th. Sanchez, Benedict XIV, St. Alphonsus, Perrone, Billot, Wernz, and others. The instruction of the Holy Office, 11 July, 1566 (Collectan., n. 1553), calls the privilege a Divine privilege "promulgated by the Apostle". However, in spite of the disagreement in regard to the Pauline privilege, the defenders of both opinions agree that the Church has acknowledged the power to dissolve the marriage of infidels when one of the parties receives baptism, namely, by papal authority. This power is indeed not admitted by all theologians. Even Lombertini (who later became Pope Benedict XIV) doubted it when he was secretary of the Sacred Congregation of the Council, in the causa Florentina, in the year 1726. But earlier papal decisions, as well as the actual admission in this very case, leave no room for the doubt that the pope attribute to themselves this power and act accordingly.

If the Pauline privilege alone be applied, it will follow that when a pagan is converted who has been living in polygamy, he can be permitted to choose any one of his wives who may be willing to receive baptism, provided he first be converted. This was done for India by St. Pius V, 2 August, 1571, in the Constitution "Romanii Pontificis". Urban VIII, 20 October, 1626, and 17 September, 1627, did the same for the South American nations, and expressly declares: "Considering that such pagan marriages are not so firm that in case of necessity they cannot be dissolved;" similarly, Gregory XII, 25 January, 1355 (cf. Pallottini-Philipp., "Opus catalog., mor.""). See also n. 441, 451, 452.

The theological proof of this papal authority is easy for those who, as has been said, regard the Pauline privilege as an immediate Apostolic ordinance. For it is then expressly testified by Holy Scripture that the Apostolic authority, hence also the papal authority, can allow in favour of the Holy Office the dissolution of marriage contracted in infidelity. The method of procedure thereon is quite analogous to the manner in which a pope, in various cases would naturally be committed to the bearer of the Apostolic authority. Those who consider that the Pauline privilege is an immediate Divine determination of the case in which marriage may be dissolved, prove the papal authority in another way. Since it follows from I Cor., vii, 15, that marriage contracted in infidelity is not absolutely indissoluble according to Divine right, it follows from the general power of loosen which was granted to the successor of St. Peter, Matt., xvi, 19—"Whatever thou shalt loose on earth, it shall be loosed also in heaven"—that this power extends also to our present matter. Moreover, the successors of St. Peter are themselves the best interpreters of their power. Whenever the exercise of authority that has not been clearly recognized occurs, not merely on one occasion but frequently, there can be no more doubt that such authority is rightfully exercised.

Now this is precisely what took place in the grants of Pius V, Gregory XIII, and Urban VIII for the vast territories of India, the West Indies, etc.

Dissolution of Marriage Contracted in Infidelity by Profession in a Religious Order.—When the doctrine explained above, which now is practically admitted beyond doubt, has been established, the question, whether a marriage contracted in infidelity can be dissolved by the religious profession of the converted party, is not very important. It is so to be understood that the baptized party may choose the religious life, even against the will of the one still unresolved, and that conversion of this party may enter upon a new marriage. According to the doctrine we have just explained, it is clear that the pope, at least in single cases, can permit this. Whether, according to a general law, and by immediate Divine ordinance, without the intervention of the pope, this privilege belongs to the baptized party, is somewhat controversial. But it is certain that a Christian (i.e. sacramental) marriage, not yet consummated, can be dissolved by religious profession. This leads us to the third proposition about this subject of divorce.

C. Christian Marriage before Consummation Can be Dissolved by Solemn Profession in a Religious Order, or by an Act of Papal Authority.

Dissolution by Solem Profession.—The fact that religious profession causes the dissolution of the marriage bond, provided the marriage has not been consummated, is distinctly taught in the Extrav. Joan. XXII (tit. VI, cap. unie.), and was solemnly defined by the Council of Trent (Sess. XXIV, can. vi). The reason why this dissolution takes place is a theological question. They say: "If anyone shall say that a marriage contracted, but not consummated, is not dissolved by the solemn religious profession of either one of the parties to the marriage, let him be anathema." The expression, by the solemn profession, is important. Neither the mere entrance into a religious order, nor life in the novitiate, nor the so-called profession of simple vows, even though they be for life, as is customary in modern congregations, is capable of dissolving a previous marriage. The simple vows which are pronounced in the Society of Jesus, either as vows of scholastics or as vows of formed coadjutors, do not dissolve a marriage which has been contracted and not yet consummated, though they cause a diriment impediment in regard to any future marriage. The question as to how and for what reason such a marriage is dissolved by solemn profession is answered by some by pointing to an immediate Divine right, as if God himself had so ordained immediately. Others, however, ascribe it to the power which the Church has received from God, and to its ordinance. The first opinion is defended by Dominie Soto, Th. Sanchez, Benedict XIV, Perrone, Rossetti, Fahrner, and others; by Henry de Segus (commonly called Hostiensis), Suarez, Lamy, Kugler, the Wurzburg theologians, Wernz, Gasparri, Laurentius, Fahrner, and others. The tradition of the Christian Church for centuries bears witness that Christian marriage before consummation has not the same indissolubility as a consummated marriage. Scholars, however, are not unanimous
about the limits of its dissolubility. Many facts from the lives of the saints, of St. Thecla, St. Cecilia, St. Alexius, and others, such as example are narrated by Gregory the Great (III Dialog. xiv. in P. L., XXXIII) and by the Venerable Bede (Hist. Angl., xix. in P. L., CCVI, 201 sqq.;), are proof of the universal Christian conviction that, even after marriage had been contracted, it was free for either of the married parties to separate from the other in order to choose a life of evangelical perfection. Now this would be a violation of the right of the other spouse if in such circumstances the marriage bond was not dissolved, or at least could not even be considered as dissolved, and thereby the right granted to the other to enter upon another marriage. The precise conditions under which this dissolution of the marriage bond actually took place, and still takes place, can only be decided with certainty by the authentic declaration of the Church. Such a declaration was made by Alexander III, according to III Decretal., xxxii, 2: "After a lawfully accorded consent affecting the present, it is allowed to one of the parties, even against the will of the other, to choose a monastery (just as certain saints have been called from marriage), provided that carnal intercourse shall not have taken place between them; and it is allowed to the one who is left to proceed to a second marriage." A similar declaration was made by Innocent III, op. cit., cap. xlix (1217), and it may be added that a disciplinary restriction in the religious profession alone has this effect, and that therefore those who wished to practise a life of higher perfection in any other manner could be obliged by the other spouse either actually to choose the religious state or else to consummate the marriage. Under earlier ecclesiastical conditions, no long delay was imposed on any party before he could contract another marriage, because religious profession might be made without a long novitiate. The introduction of a novitiate of at least one year by the Council of Trent, and the time of three years prescribed by Pius IX and Leo XIII for simple vows before the solemn profession, and the general restriction of solemn profession by the establishment of simple profession, which does not dissolve the marriage bond, have rendered difficult the dissolution of unconsummated marriage by religious profession. So that now it seems practically necessary that if one of the married parties should choose the state of evangelical perfection before the consummation of the marriage, the marriage bond should be dissolved by papal authority.

Pope Callistus II and the not yet Consummated.—The pope's authority as supreme head of the Church to dissolve Christian marriage not yet consummated is proved on the one hand from the words of Christ to Peter, Matt., xvi, 19 (see above, under B 2), and on the other, from the dissolubility of such a marriage by religious profession, inasmuch as this profession must be solemn, for according to the declaration of the II General Council (Hist. Angl., xix. in P. L., CCVI, 999, n. 63, 201 sqq.;), solemn vows as such depend entirely upon the ordinance of the Church—"voti solemnitas ex solo constituto Ecclesiae est inventa." Hence it follows without a doubt that the dissolution of a marriage by solemn profession could never take place without the exercise of the Church's authority. Now if the Church can cause such a dissolution to be granted, she can do this in single cases—not indeed arbitrarily, but for grave reasons—because this power has been granted by God to dispense in matters of Divine right, and a delegated authority may not be exercised without a sufficient reason (cf. Wernz, "Jus decretal.", IV, n. 698, not. 39.) The actual exercise of this power on the part of the popes, which has become constant and general, is a further proof of its propriety and its actual existence. Clear instances occur during the pontificates of Martin V (1417-31) and Eugene IV (1431-47). St. Antoninus tells us that he had seen several Bulls of these popes which granted such a dispensation or a dissolution of a marriage that had not been consummated, so that thereafter they might proceed to a new marriage (Summa theor., III, tit. i, c. xxi). We can find traces of such a practice even in much earlier times. A decretal of Alexander III, namely, IV Decretal., xiii, 2, seems, according to a probable interpretation, to refer to a possible concession of such a dissolution. Perhaps the decision of Gregory II to St. Boniface, in 726 (see above under A 4), might possibly be explained in the same sense, though it is very uncertain, for it seems to refer neither to the dissolution of a consummated marriage, nor to the dissolution of a real marriage that had not been consummated, but rather to a declaration of invalidity. For several centuries the exercise of this power of dissolving such marriages has belonged to the ordinary functions of the Holy See, and is exclusively papal, for the work of the Roman Congregations in such cases is only preparatory. However, exceptional instances occur when it has been delegated to bishops (Wernz, op. cit., n. 698, not. 41). The judicial procedure in such cases was exactly prescribed by Benedict XIV in his Bull of judicial procedure ("Dei miseratone"). 3 November, 1741 (section 15), obligatory on the whole Latin Church. Any uncertainty about this ecclesiastical power (cf. Terrini, Geschichtliche Entwicklung der kirchlichen Gesetze über die Ehefragen, 170 sqq.;), which was removed by this Bull; for if this power did not belong to the Church, then the Bull in question would have approved and originated an institution against all good morals. It is, however, inconceivable that the pope could issue a general prescription that would contain an attack on morality and could formally sanction bigamy in certain cases. In the hands of one of the many vicar of Christ, the legal forces of Bologna, brought forward some special reasons which are supposed to justify the dissolution of a marriage before consummation. If they thereby wished to assert the right of dissolution by private authority, then they erred. If they intended to speak of a dissolution that could be granted by the Church, that is, by its supreme head, and then permitted for a new marriage, then they had merely collected the cases in which such a dissolution might take place in virtue of the papal authority just spoken of, but they had not given a new title to such dissolution. Some held the erroneous opinion of private dissolvibility, because they regarded such a union as no real marriage, but simply as a betrothal, and therefore they treated it according to the rules of the legal principles in the case of the title of marriage, however, was not often defended, and has long disappeared from theological schools; neither does it deserve any consideration at present, because it is in conflict with established Catholic dogmas.

D. Limited Divorce, or Separation from Bed and Board (Divortium Imperfectum) is allowed for various causes, especially in the case of adultery or lapse into intemperance, as a temporary measure.

A separation of married parties leaving the marriage bond intact is mentioned by St. Paul, I Cor., vii, 11: "If she depart, that she remain unmarried, or be reconciled to her husband." From the very nature of the case it follows that occasions may arise in which further habitation is unavoidable or even unseemly and it may be necessary to separate, according to canon law, to bring about a dissolution of the marriage bond, at least a cessation of married life must be permitted. Hence it is that the Council of Trent, immediately after its definition of the indissolubility of the marriage bond, even in case of adultery, added another canon (Sess. XXIV, can. viii): "If anyone shall say that the Church censures when she, for many causes, decrees a separation of husband and wife in respect of cohabitation and dwelling-place for a definite or an indefinite period; let him be anathema." The cessation of married life in common may have different degrees. There
can be the mere cessation of married life (separatio quodam forum), or a complete separation as regards dwelling-place (separatio quodam cohabitationem). Each of the remedy be permanent or temporary. Temporary
abstinence from married life, or separatio a tora, may take place by mutual private consent from higher religious motives, not, however, if such continuance be the occasion of moral danger to either of the parties. Should such danger threaten either, it would become their duty to resume married life. The Apostle speaks of this in I Cor., vii, 5: "Defer not one another, but when you are defiled, let each of you give yourselves to prayer; and return together again, lest Satan tempt you for your incontinency."

1. The Choice of Evangelical Perfection.—For a permanent separation on account of entrance into the state of Christian perfection, i.e., entrance into religious life on the part of the wife or of the husband, or by the reception of Holy orders on the part of the husband, there is required not only mutual consent, but also some arrangement on the part of ecclesiastical authority, according to the laws about such cases. This holds in regard to the reception of the major orders immediately after the contraction of marriage, even before it is consummated. In regard to the choice of religious life, it holds only after consummated marriage. For, as has been said, by the religious life many which has not yet been consummated marriage may be dissolved, and on that account newly-married parties have the right to a delay of two months to consider the choice of the state of perfection, and during which the consummation of the marriage may be refused (St. Alphonsus, "Theol. mor.," VI, n. 958). In case the marriage is not dissolved, the reception of Holy orders or religious profession can not take place before provision has been made for a continent life on the part of the other party. In accordance with the judgment of the diocesan bishop, he or she must either enter a religious order, or, if age and other circumstances remove all suspicion and all danger of incontinency, at least take a private vow of perpetual chastity. In no case can it ever be allowed that the husband who should receive Holy orders might dwell in the same house with the wife bound only by a private vow (cf. Laurentins, "Instit. jur. eccl.", 2nd ed., n. 609).

2. Adultery of One of the Parties.—Cause for the cessation of complete community of life, which in itself is perpetual, is given to the innocent party by adultery of the spouse. In order, however, that this right may exist, the adultery must be, first, proved; second, not to be due to the spouse either entirely or as accomplice; third, not already condemned; fourth, not, as it were, compensated by the adultery of the other party (cf. IV Decretal., xiii, 6, and xiv, 4, 5; Wernz, "Jus decret.", IV, n. 767 sq.; St. Alphonsus, VI, n. 960). If the innocent party is certain of the sin of the other, he or she has a right immediately to refuse the continuation of married life. Where the innocent party is justified in leaving at once the guilty one, or in dismissing him or her from the house, if, however, the crime is not known, or not proved with certainty, then complete separation can follow only after a judicial investigation and a judicial decision, which must be made by ecclesiastical authority (IV Decretal., xiv, 4, 5; 10; Wernz, "Jus decret.", IV, n. 771). If the crime is outside of married life is regarded as equivalent to adultery in justifying complete separation, even the unnatural sins of sodomy and bestiality. As proof of the crime may be alleged what are called suspicione vehementes. In the first centuries of the Church, there was often a commandment, and the duty was imposed on the innocent party, to separate from the guilty party. In modern times, however, was any such general legislation. The duty, however, of separation was founded partly on the canonical penance imposed for adultery that was publicly known (and this penance was incompatible with marital life), and partly on the duty of avoiding scandal, as continued living with a husband or wife addicted to adultery might seem to be a scandalous approval of this criminal life. For this latter reason, even nowadays, circumstances may arise making the dismissal of the guilty party a duty (cf. St. Alphonsus, VI, n. 963 sqq.). Commonly, however, at least for a single violation, there is no duty of separation; still less is there any duty of permanent separation; in fact, charity may in certain cases demand that after a temporary separation the contrary party might be invited or admitted to the reestablishment of the former relationship. This, however, never any obligation of justice to receive again the guilty party. The most that some theologians recognize is an obligation of justice when the party originally innocent has meanwhile become guilty of the same crime. The innocent party always retains the right in justice to recall or to demand the return of the guilty party. If the innocent husband or wife wishes to give up this right forever, then he or she can enter a religious order, or he may receive Holy orders, without the necessity of consent on the part of the guilty wife or husband who has been dismissed, or without any further obligation being imposed upon this party (III Decretal., xxxii, 15, 16). The guilty party can, however, proceed to the religious life or to the reception of Holy orders on his own account, without the consent of the innocent. This consent must either be granted expressly or be deduced with certainty from the constant refusal to be reconciled. It is the business of ecclesiastical authority to decide in any case, whether such certainty exists or not. A further obligation, such as the vow of perpetual chastity, is not imposed upon the innocent party, but the freedom to remarry is allowed after the death of the other spouse (cf. III Decretal., xxxii, 19; Wernz, op. cit., n. 710, not. 126; St. Alphonsus, VI, n. 969).

3. Heresy or Deception from the Faith.—Next to adultery, a reason for separation almost equivalent to it is defection from the Faith, whether by the rejection of Christianity or by heresy (IV Decretal., xix, 6, 7). However, there are some important differences to be noted:

(a) In the case of adultery, a single action, if proven, is enough for permanent separation, but in the case of infidelity or heresy, a certain persistence in the sin is required (cf. St. Thomas, IV Sent., dist. xxxv, Q. 1, a. 1), such for example as adherence to a non-Catholic denomination.

(b) An ecclesiastical sentence is necessary in this case for the right of permanent separation. If this has not been obtained, the innocent party is bound to receive the guilty party after conversion and reconciliation with the Church. This is expressly decided by IV Decretal., xix, 6. When, however, the right to permanent separation has been granted, the innocent party may proceed at once to the religious life or receive Holy orders, and thereby render it impossible to return to married life. It need hardly be mentioned that infidelity or heresy, as such, gives no just cause for separation of any kind, if it existed before the marriage was contracted, and if a dispensation from the impediment of disparity of worship between a baptized and a non-baptized person has been granted, or if the refusal to marry a non-Catholic, without ecclesiastical dispensation, has taken place between a Catholic and a baptized non-Catholic. In such cases, passage from one denomination to another does not give a reason for separation.

4. Danger to Body or Soul.—Besides these special cases of separation founded on ecclesiastical law, a number of other cases may arise, which, of their nature, justify temporary separation. They are summed up under the general notion of "danger to body or soul" (periculum corporis aut animae). There must, of course, be question of an approximate danger of great
harm, because this very important right of the other party may not be set aside, or even partially limited, for trivial reasons. The reasons for a temporary separation are as various as the evils which may be inflicted. To judge the gravity correctly, reasonable consideration is demanded of all the circumstances. Danger to the soul, which is given as a reason for separation, is an abuse. In many cases, the reason is not a true danger, but only a condition of the other party. It consists in temptation to some mortal sin, either to the denial of the Catholic Faith, or the neglect of the proper education of the children, or to some other grievous sin and violation of the moral law. Dangerous solicitation, or pressure, or intimidation, or threats inflicted either by, or with the consent of, one party, or silent approbation to illegal proceedings on the part of another, are other intolerable conditions. Such severe, without doubt, plotting against one's life, ill-treatment which in the circumstances should be regarded as gross, well-grounded fear of dangerous contagion, insanity, serious and constant quarrelling, etc. It is to be noted that in every case there must be a very serious evil to justify separation for any length of time. Other iniquities must be this matter is directly opposed. Of one party, provided they are not against marital fidelity, or do not include any incentive to sin on the part of the other, do not, according to Catholic law, of themselves give any right to separation; neither do punishments that might be inflicted on the guilty party in consequence of such crimes, even when this punishment be joined with dishonour. The Catholic Church upholds this right of the party non-Catholic, which, as we have seen above under A. 3. (e), permits in such cases the dissolution of the marriage bond.

By private authority, i.e. without previous application to an ecclesiastical court and its decision, a temporary separation may take place when delay would bring danger. The church law does not allow a legal dissolution of this kind. The special cases (cf. IV. d. 714; St. Alphonsus, "Theol. mor.", VI. n. 971) are such cases, although they are evident and public reasons for separation, the non-observance of the Church's regulations can more easily be overlooked. Separation because of the mere decision of a civil judge is never allowed to Catholics. (Gr. III Conc. plen. Baltim., tit. IV. c. ii.)

DIVORCE—DIVORCE. I. In Civil Jurisprudence.—Divorce is defined in civil jurisprudence as "the dissolution or partial suspension by law of the marriage relation" (Bouvier's Law Dictionary). Strictly speaking, there is but one form of absolute divorce, known, under the name derived from the civil and canon law, as divorce a vinculo matrimonii, i.e. from the marriage tie. In the states where this admittance is made, this form of divorce puts an end legally to the marriage relation. There is, however, a limited form of divorce which is, more accurately speaking, a suspension, either for a time or indefinitely, of the marriage relation, and is known as divorce a mensa et toro, or from bed and board. In addition, in some states courts grant decrees declaring marriages absolutely void, ab initio, i.e. from the beginning. But the parties cannot be said to have been divorced; however, proceedings for nullity are frequently provided for under divorce statutes.

Pre-Christian Divorce Legislation among the Hebrews, Greeks, and Romans.—Before the adoption of Christianity as the state religion of the Roman Empire, it would appear that divorce in some form existed among all ancient peoples from whom European civilization is derived. Among the Hebrews no precedent for divorce can be found prior to the Mosaic Law. It became frequent afterwards, though it would seem that the husband alone possessed the power, at least until the reign of Herod. Divorce was prevalent among the Greeks, especially in Athens, although the Romans were less lax in this respect. Divorce was demanded by the magistrate, state the grounds of complaint, and submit to his judgment; if the wife was the prosecutor, she was obliged to appear in person. The lax customs of the Spartans made divorce rare. Among the Romans the law of Romulus permitted divorce to men, but refused it to women. Adultery, poisoning of one's spouse, and false accusation, where there were sufficient grounds. While divorce was so far free that there was no one authorized by the civil power to oppose it, this freedom was restrained by the moral feeling of the people and their respect for the marriage bond. It was necessary to consult the family council and there was fear of the authority of the censors. There were three forms of marriage annulment: nullity of marriage, nullity of menstruum, and nullity of marriage bonds. Marriage bonds were associated with certain highly religious ceremonies peculiar to that form of wedding; the conventio in manum, effected by a simulated purchase (coemptio), a much more simple ceremony; and the usus or prescription, where, after living with her husband for one year without being absent for three days, the woman came, as in the other forms of marriage, in manum marrit, that is to say, under the control of her husband. No instance of divorce is known before A. C. 520 or 523. It is thought by many that this was the first instance of divorce under the Roman Republic, but it would seem probable that it was the first divorce for the special purpose of retaining the wife's dowry (dos). This is the suggestion of Becker, who points out that the wife of Antonius Tiberius Claudius Caesar Augustus, and states that other proof exists that in much earlier times divorce was properly established and strictly ordained by laws. He quotes also from Cicero (Phil., ii, 28) where he says jokingly of Antonius, who had dismissed his wife Cytheris under the same formalities as those of divorce, "that he commanded her to have her own property according to the Twelve Tables; he took away her keys and license and did not." The causes for divorce on the part of the woman were capital offences, adultery, and drinking. After the Punic wars the number of divorces reached scandalous proportions. Sulla, Cesar, Pompey, Cicero, Antony, Augustus, and Tiberius all put away their wives. Under Augustus an effort was made to curb the licence. In the interest of publicity, that emperor made it necessary for the party seeking
a divorce to make his declaration in the presence of seven witnesses, all Roman citizens of full age. Divorce remained, however, a private legal act. Women could not exclude in the time of the ancient Roman law, there was a separation pronounced, first, between parties whose marriage engagement was not legally contracted; second, where parties were separated when the contract of espousals had been made but not consummated by actual marriage. This was known as repudium. Divortium was a separation of persons already married, and indicated divorce a mensa et toro and a vinculo matrimonii.

**Imperial Christian Legislation.** In 331 Constantine the Great restricted the causes for divorce to three on the part of the man, viz., if he was a murderer, a poisoner, or a robber of graves; and three on the part of the woman, viz., if she was an adulteress, a poisoner, or a corruptor of youth. Among soldiers an absence of four years was sufficient to entitle the petitioner to a divorce. This edict was ratified by Theodosius the Great and Honorius. Under Justinian several reasons for divorce were added, and liberty of divorce by mutual consent was restored by his nephew Justin (565-78). No change was made in the Roman law until after a lapse of 340 years, when a new code was published (602) in the form of a collection of laws known as the "Libri Basilici" from which he excluded the edicts of Justin.

**English Legislation.** According as Catholic doctrine penetrated more profoundly into the medieval life, the laws of European nations were gradually accommodated to its demands. In this way, for example, the teaching of the Council of Trent (1563), which anathematized the error that matrimony could so far be dissolved by divorce that it was lawful to marry again, was universally accepted among the nations adhering to the Catholic Church. This council, however, introduced thereby no essential change in the divorce law of the Church. Originally, under the common law of England, there was no jurisdiction on the subject of divorce excepting in the ecclesiastical courts, they having jurisdiction in all matters relating to marriage and divorce, the restitution of conjugal rights, suits for limited divorce and for annulment of marriage. This followed from the Catholic doctrine that marriage, being a sacrament, could not be dissolved; for the same reason any question relative to its validity or to a suspension of conjugal relations could not be brought to the secular courts. The ecclesiastical law of England, though originating differently from the other branches of the common law and distinguished by special rules, was part of the unwritten law of the State, just as what are technically called the common law, the law of admiralty, and equity.

The Protestant Reformers rejected the sacramental theory of marriage. They agreed that absolute divorce should be granted for adultery and for malicious desertion, and that the innocent party might then remarry. As they also rejected the jurisdiction of the ecclesiastical courts it was for some time a question among them whether marriage was dissolved ipso facto by the commission of one of these offences, or whether it was necessary to have the dissolution declared by a competent officer. An effort was made to pass at the time of Edward VI to secure the adoption of a new code of ecclesiastical laws, drafted mainly by Cranmer, under which separation a mensa et toro was not recognized and complete divorce was granted in cases of extreme conjugal faithlessness; in cases of conjugal desertion or cruelty; in cases where a husband not guilty of desertion of his wife, had been several years absent from her, provided there were reason to believe him dead; and in cases of such violent hatred as rendered it in the highest degree improbable that the husband and wife would survive their animosities and again love one another. Divorce was denied when both parties were guilty of unfaithfulness, and when only one was guilty the innocent party might marry again. The ecclesiastical council was to decide all questions of divorce on the above grounds.

It is said by Howard (Hist. of Matrim. Institutions, p. 50) that the principles of this code, known as the "Reformatio Legum," were carried out in practice, although not enacted into law. He adds that "according to the ancient form of judgment divorce was probably still pronounced only a mensa et thoro; but whatever the shape of the decree, there is strong evidence that from about 1580 to 1610, except for the short period of Mary's reign, the community, in cases of adultery, relied upon them as justifying a second act of matrimony." He says also that throughout nearly the whole of Elizabeth's reign new marriages were freely contracted after obtaining divorce from unfaithful partners. However, in 1602 the Star Chamber pronounced that a marriage could be contracted after separation from bed and board by the decree of an ecclesiastical judge (Foljambe's case, 3 Salk. 138).

Following this decision the canon law was administered in the English spiritual courts with such rigour that it required an Act of Parliament to permit a remarriage after divorce. In the tenth year of James I (1613) an Act was passed enacting that no marriage could ever be solemnized before the courts; the parties were required to make evidence of their previous marriage; and in cases where sentences of divorce had been pronounced by ecclesiastical courts. There were some cases where, after sentences had been pronounced by an ecclesiastical court, a second marriage was upheld, but the decisions are generally to the effect that a perfect marriage cannot be dissolved by law. Oughton says (tit. 215) "that the marriage tie once perfected cannot be dissolved by man, but only by natural death. The parties may be separated, but they remain man and wife." The Puritans of England strongly advocated the right of divorce, but without effect, and until 1857 there was no English statute which permitted the granting of a decree of absolute divorce by a secular court. The English courts have been vested in Parliament. Precedents of divorce by Parliament strictly so called are not found earlier than 1698, but it came to be understood that if a divorce a mensa had been granted by the spiritual court, a divorce would be granted by Parliament absolutely dissolving the marriage, though only for the cause of adultery on the part of the wife. By the Act of 1857 the entire jurisdiction in matrimonial questions was transferred to a new civil court for divorce and matrimonial causes, and since the judicature Act of 1873 this jurisdiction has been vested in the probate, divorce, and admiralty division of the High Court of Justice. Its power is restricted, however, to England alone. The principles upon which divorce legislation is based and which may be traced in the legislation of those countries that permit divorce, are stated by Bishop (Marriage, Divorce and Separation, §46, ed. of 1891) as follows:

"Matrimony is a natural right, to be forfeited only by some wrongful act. Therefore the government should permit every suitable person to be the husband or wife of another, who will substantially perform the duties of the matrimonial relation; and when it is in good faith entered into, and one of the parties without the other's fault so far fails in those duties as practically to frustrate its ends, the government should provide some means whereby, the failure being stab-
lished and shown to be permanent, the innocent party may be freed from the mere legal bond of what has in fact ceased to be marriage, and left at liberty to form another alliance. The guilty party would have no claim to be protected in a second marriage; and whether it should be permitted to him or not is a question, not of right with him, but of public expediency, upon which there is considerable diversity of opinion."

**Modern European Legislation.—**A full collection of laws and statistics relating to marriage and divorce in European countries will be found in the report of the British and Foreign Commission of Labor, (1887) by D. Wright, for 1859. It is therein stated that "prior to 1808 the ecclesiastical courts had in most of the countries named more or less complete jurisdiction over matrimonial causes, but the civil courts have now exclusive jurisdiction over such matters in all of them". In Austria-Hungary absolute divorce is not allowed to members of the Catholic Church. Prior to 1 January, 1876, all the cantons of Switzerland had their own peculiar laws of divorce, but subsequent to that date a general law governing the subject took effect. In Germany perpetual separation equivalent to limited divorce was abolished throughout the empire, and the causes for such separation were made causes for absolute divorce. In Hungary divorce has been allowed for infidelity since 1 January, 1863. The laws of their respective churches apply to Latin Catholics, Greek Catholics, and Orthodox Greeks. Questions of divorce or validity of marriage among Protestants are subject to the jurisdiction of the civil courts. Excepting for Protestants and Hebrews, the ecclesiastical courts of other bodies have jurisdiction. In case of mixed marriage the court of the wife's denomination has jurisdiction. In Spain and Portugal, still Catholic countries, no absolute divorce is permitted. In Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Paraguay, Peru, Uruguay, Mexico, and Cuba, limited divorce alone is permitted.

The following causes in Austria and in Hungary for absolute divorce are typical: in Austria, adultery; commission of a crime punishable by imprisonment; malicious abandonment or non-appearance after one year's solicitation where the absentee's residence is known; assault endangering life or health; repeated cruelty; unconquerable aversion, on account of which both parties demand a divorce. In the last case a limited divorce or separation from bed and board must first be obtained. In Belgium, where the husband and wife have been married twenty-one, and the parties have been married two years or longer, divorce may be obtained by mutual consent on certain terms and conditions, but must be approved by the courts. In France divorce was introduced by the law of 1792. This law was modified in 1798 and in 1803 (Code Napoléon), was subsequently abrogated and restored in 1854; the grounds of divorce being adultery of either party; excesses, cruelty, grave injury inflicted by one spouse on the other; condemnation to infamous penalty of either of the spouses; mutual and persevering agreement of the wedded to separate, if said consent is expressed and established as prescribed. By recent legislation, after the lapse of a fixed period of time, a decree of separation can be changed into a judgment of divorce on the application of either of the parties. (Civil Code, Sec. 307.) In the German Empire perpetual judicial separations have been abolished, and all subjects of the empire, without regard to their religious status may avail themselves of the laws of divorce which exist in their respective states. In Prussia there are seven causes known as major causes for divorce and six as minor causes. Among the major causes are: false accusations of serious crimes preferred by one of the parties against the other, and endangering the life, honour, or office of the other spouse; among the minor causes are: insanity, disorderly conduct or mode of living, refusal of maintenance or support by the husband. It may be noted that in the divorce laws of European states there exists much similarity as regards the causes for divorce. In Scotland divorce is granted for adultery and malicious desertion; the former since 1560; the latter since 1573. The injured party has the right to choose either a judicial separation or an absolute divorce. In Ireland the civil courts have no jurisdiction to grant decrees of absolute divorce. In Canada exclusive authority was conferred upon the Parliament by the British North America Act, 1867, to establish courts of divorce existed in Nova Scotia, New Brunswick, Prince Edward Island, and British Columbia, and they still continue to exercise their functions. Excepting in Prince Edward Island, the divorce courts appear to have been modelled upon the English court of divorce and matrimonial causes. A court of divorce and alimony was established in Prince Edward Island as early as 1836. In the other provinces of Canada no divorce court has ever been constituted and divorces are granted only by special Act of Federal Parliament. The courts of Quebec, however, can grant *separation de corps* under the English divorce court practice and annual marriage on the ground of impotence.

In Australia, at the time of the formation of the Federal Commonwealth, there were divorce courts in all or almost all of the constituent states. Under the Constitution (Act 63–64, Vict., ch. xii, part V, Sec. 51), power was granted to the Parliament of the Commonwealth of Australia, comprising the states of New South Wales, Victoria, South Australia, Queensland, Tasmania, and Western Australia, with respect to divorce and alimony. In New Zealand, which does not form a part of the Australian Commonwealth, divorce is allowed for adultery on the part of the wife, and adultery with another woman of age above twenty-five, or cruelty, on the part of the husband. (New Zealand Statutes, Vol. I, p. 229.)

**Divorce in the United States.—**Colonial Period (1607–1787).—At the time of the settlement of the various colonies which subsequently declared their independence of Great Britain, there were no ecclesiastical courts in England, their functions being performed by special acts of legislatures obtained. Sometimes it was in the form of a private statute directly dissolving the marriage; sometimes the court was empowered to investigate the cause and grant the divorce if the complaint was sustained. There are many instances of legislative divorces granted in the New England colonies, all being divorces a vinculo. Adultery and desertion were the offenses for which divorces were granted, and would require additional circumstances. In the Southern colonies there was no court having jurisdiction to grant divorce, though in some of them an appeal for alimony would be considered in a court of equity. Under the Dutch government of New York, divorce jurisdiction was exercised by the courts for absolute, as well as for limited, separation, but when the English took possession of the colony, this jurisdiction was no longer recognized. In Pennsylvania under "The Great Law of 1682" divorce was authorized for adultery. The legislature also granted di-
In New Jersey there was no divorce jurisdiction granted the courts. It may be said, therefore, that outside of New England during the colonial period there was no such thing as a judicial divorce, consistent with the constitution of the laws of the United States; special and general divorce laws are, therefore, within the power of territorial legislatures, but by the Act of 30 July, 1886, all special divorce acts have been expressly forbidden. The various states of the Union succeeded to the full sovereign rights exercised by the Parliament of England over all subjects relating to marriage and divorce, but in the absence of special divorce statutes, there being no tribunal having jurisdiction, the law would remain the same as in the colonies prior to the Revolution. However, all states of the Union have adopted divorce statutes, excepting South Carolina, and have clothed the courts with full jurisdiction to administer relief. In most of the states statutes authorizing divorce by the husband, a mensa et toro are provided for, and in some of the states courts of equity take jurisdiction over special proceedings for a decree of nullity of marriage. In some states, however, decrees a mensa are expressly forbidden. The causes for which a decree may be granted vary from the single cause of adultery on the part of either husband or wife (law of New York and the District of Columbia), to administering another; the State of Washington, the last being known as the "omnibus provision," which permits a divorce for any other cause deemed by the court sufficient, provided that the court shall be satisfied that the parties can no longer live together. In most of the states there is no restriction upon the parties remarrying after divorce, though in many states the husband and wife are barred from remarrying during the lifetime of the innocent, and in others, as in Pennsylvania, marriage of the guilty party with a paramour during the lifetime of the innocent party is null and void.

Great uncertainty as to the effect of the divorce statutes of the different states has arisen where relief has been sought by a party whose husband or wife was remarried after divorce proceedings were brought. While it is a fundamental principle that the courts of any state have entire control over the citizens of that state in divorce proceedings, a different question arises where the husband is a resident of one state and the wife of another. The English doctrine that the domicile of the husband is that of the wife, irrespective of where she may actually be living during coverture, does not prevail in the United States. For the purposes of a divorce proceeding the wife may have a domicile separate from that of her husband. In consequence of this rule of American law it has frequently happened that actions for divorce have been initiated and carried to a conclusion without the respondent receiving any actual notice of the proceeding. This is the result of the provisions in the state statutes providing for service of notice by publication, where actual service cannot be had upon a respondent by reason of absence from the state. While decrees granted in accordance with the statutes of any particular state are valid in that state, there is no power to enforce a recognition of their validity in other states, and in consequence it frequently happens that a divorce may be valid in one state and invalid in another; the children of a second marriage legitimate in one state and illegitimate in another; the property rights of the former husband and wife terminated in one state and in full force in another. The Constitution of the United States (Art. IV, Sec. 1) provides that "full faith and credit shall be given in each state to the public acts, records and judicial proceedings of every other state, and that the courts may, by general laws prescribe the manner in which such acts, records and proceedings shall be proved, and the effect thereof." This provision, however, does not require the recognition of a divorce where one of the parties is not a citizen of the state that has granted the decree. Thus in a case where a husband abandoned his wife without justifiable cause, and the respondent married another, and the principle of a domiciliary courts therein, and the wife remained in the marital domicile, since her domicile did not follow that of her husband when he sued for a divorce in the state of his new domicile, and a decree was rendered upon a merely constructive service of process, it was held by the Supreme Court of the United States that the court of the husband's domicile did not acquire such jurisdiction over the wife as would entitle a decree to obligatory enforcement in the state of her domicile, though the state in which the decree was rendered had power to enforce it within its borders, and the state of the wife's domicile had the power to give the decree efficacy if it saw fit to do so. (Haddock v. Haddock, 201 U.S., 562.) While the courts of the states called upon to administer a divorce decree by reason of the theory adopted by the legislatures representing the actually predominant sentiment of the various communities that marriage results from a civil contract, bringing about a civil status with certain rights and duties appertaining to husband and wife, they by no means accept the theory that it is such a relation or status that the parties by divorce are entitled to dispense with. The distinction between the marriage relation and that of a contract is set up by Haddock in the following language:—"Because the parties cannot mutually dissolve it; because an act of God incapacitating one to discharge its duties will not release it; because there is no accepted performance that will end it; because a minor of marriageable age can only be rescued at the expense of another adult; because it is not dissolved by failure of the original consideration; because no suit for damages will lie for the non-fulfillment of its duties; because legislation may annul it at pleasure; and because none of its other elements are those of contract but are all of status." (1, Marriage and Divorce, § 46.)

Keeping this distinction in mind, it will be perceived that a proceeding for a divorce is a proceeding from a contract, but is a proceeding sui generis founded on the violation of duty enjoined by law and resembling more an action of tort than of contract. The law looks upon marriage as a permanent status, to be ended only by the death of one of the parties, a promise of competent persons to marry at their pleasure requiring a marriage licence merely to attest their competency. To change this status by divorce it is necessary to satisfy the court that the purpose of the marriage relation has been ended by the fault of the guilty party, and that greater evil will follow from maintaining the marriage status than from terminating it. Therefore, in theory, the divorce statutes embrace only such causes as are recognized as being of such a nature as to defeat the ends for which the marriage ceremony was performed. In the majority of the United States six causes are included in this category: (1) adultery, (2) bigamy, (3) conviction of crime in certain classes of cases, (4) intolerable cruelty, (5) wilful desertion for two years, (6) habitual drunkenness. These are recognized as just causes, either for absolute divorce or for divorce a mensa. The following causes are also considered such impediments to a lawful marriage that upon their being made to appear, the courts will decree such marriages null and void, in some jurisdictions under a separate proceeding for nullity, and in others under the form of a proceeding for divorce. These causes are (1) impotence, (2) consanguinity and affinity properly lim-
DIVORCE

ited, (3) existing marriage, (4) fraud, force, or coercion, (5) insanity unknown to the other party. All of these divorces are said to be granted in the United States under the general divorce law, as defined by the law of the respective states, and as such divorce law has been unprecedented, and exceeds in number those of any other modern nation, excepting Japan. An analysis of the statistics prepared by Carroll D. Wright, Commissioner of Labor, in 1889, showed the total number of divorces for a period of twenty years, from 1867 to 1887, to be 326,716, an increase of 228 per cent, while the increase in population for the same period was 50 per cent. The Census Bulletin upon marriage and divorce in the United States, issued by the Department of Labor and Commerce under authority of an Act of Congress, in 1908, shows that the total number of divorces for the entire country from 1887 to 1906 inclusive was 945,625. For the earlier investigations covering the twenty years, from 1867 to 1887 inclusive, the number reported was 328,716, or hardly more than one-third of the number reported in the second twenty years.

At the beginning of the forty-year period covered by the two investigations, divorces occurred at the rate of 10,000 a year. At the end of that period the annual number was about 66,000. This increase, however, is not considered as an increase in population, since the increase in population for the same period was 50 per cent. An increase of 30 per cent in population between the years 1870 to 1880, was accompanied by an increase of 79 per cent in the number of divorces granted. In the next decade, 1880 to 1890, the population increased 25 per cent and divorces 70 per cent. In the following decade, 1890 to 1900, the increase of 21 per cent in population was accompanied by an increase of 66 per cent in the number of divorces. In the six years from 1900 to 1906, population, as estimated, increased 10.5 per cent and divorces 20.3 per cent. It thus appears at the end of the forty-year period that divorces were increasing about three times as fast as the population, while in the first decade, 1870 to 1880, they increased only about two and two-thirds as fast.

The divorce rate per 100,000 population increased from 29 in 1870 to 82 in 1905. In the former year there was one divorce for every 3441 persons and in the latter year one for every 1218. The rate per 100,000 married population was 51 in the year 1870 and 290 in the year 1900. This comparison indicates that divorce is at present two and one-half times as common, even in the forty-year period, as it was forty years ago. Divorce rates appear to be much higher in the United States than in any of the foreign countries for which statistics relating to this subject have been obtained. Two-thirds of the total number of divorces granted in the twenty-year period covered by this investigation were granted to the wife. The most common single ground for divorce is desertion. This accounts for 35.9 per cent of all divorces (period 1887 to 1906), 49.1 per cent or almost one-half of those granted to the husband, and 33.5 per cent or one-third of those granted to the wife. The next most important ground of divorce is, for husbands, adultery, and for wives, cruelty. Of the divorces granted to the husbands (1887 to 1906), 28.8 per cent were for adultery, the suit brought by the husband, and 10.5 per cent of divorces granted to husbands were for cruelty. Only 10 per cent of the divorces granted to wives were for adultery of the husband, and 10.5 per cent of divorces granted to husbands were for cruelty on the part of the wife. Drunkenness was the ground for divorce in 5.3 per cent of the cases for which the wife brought suit, and in 1.1 per cent of the cases in which the suit brought by the husband resulted in a divorce. Intemperance was reported as an indirect or contributory cause for divorce in 5 per cent of the divorces granted to the husband, and in 18 per cent of the divorces granted to the wife, and appeared as a direct or indirect cause in 19.5 per cent of all divorces, and 26.3 per cent of those granted to wives, and 6.1 per cent of those granted to husbands. Only 15 per cent of the divorces were returned as contested and probably in many of these cases the contesting was hardly more than a formality. Alimony was demanded in 1.9 per cent of the divorces granted to the wife and was granted in 12.7 per cent. The proportion of husbands who asked for alimony was 2.8 per cent and the proportion obtaining it was 2 per cent. The average duration of marriages terminated by divorce is about ten years. Sixty per cent or three-fifths last less than one year and forty per cent longer. Of the divorced couples known to have been married in the United States 88.5 per cent were married in the same state in which they were divorced. Of the divorced couples known to have been married in foreign countries 36.9 per cent were married in Canada, 12.7 per cent in England, 16.1 per cent in Germany and 1.9 per cent in Ireland. Children were reported in 30.8 per cent of the total number of divorced cases. The proportion is much larger for divorces granted to the wife than for divorces granted to the husband; children being present in 46.8 per cent of the former class of divorces and 26 per cent of the latter. A reason suggested for this is that the children are usually assigned by the court to the mothers, and to her, or to her mother, in the care of a wet-nurse; children, while to the husband it involves a severance of the parental as well as the marital relation. In Canada during 1900 there were eleven divorces; in 1901 nineteen. In England there were 284 in 1902, as compared with 177 in 1901. In Germany at the same time there were about 10,000 annually, and in France 21,999, with a tendency towards a rapid increase. Now, for the first time, the number of divorces per annum is estimated. It is estimated that about fifty per cent of divorced couples have children, and it is urged that consideration for the children of divorced people should be a first concern in stimulating restrictive legislation. It has been stated that three-quarters of the boys in two reformatories, one in Ohio and the other in Missouri, were illegitimate, and that death or divorce, "mainly by divorce" (The Divorce Question in New Hampshire, Rev. W. Stanley Emery). Divorce Congress of 1906.—A well concerted effort was made in 1906, upon the initiative of the State of Pennsylvania, to secure uniform legislation by the various states and territories of the Union so as to eliminate as far as possible fraudulent proceedings for divorce, and also to obtain a new Divorce Congress in the City of Washington, where all of the states, excepting Nevada, Mississippi, and South Carolina, were represented, in addition to the District of Columbia and the territory of New Mexico. The outcome of this congress was the adoption of a form of statute designed to overcome flagrant evils arising from lack of uniformity, and also from inherent objections to various existing methods of procedure. A summary of these points will show how far the existing statutes were considered to need amendment. Having in mind the evils that have arisen from migratory divorces (that is, where the plaintiff has left his or her own state to obtain a residence for the purpose of divorce in another) the congress recommended that all suits for divorce should be brought in the state in which the one party had a bona fide residence; that the courts are given cognizance of suits where the plaintiff was domiciled in a foreign jurisdiction at the time the cause of complaint arose, relief should not be granted unless the cause be included among those recognized in the foreign domicile, and the same rules should apply in the case of the defendant. At least two years residence should be required of one of the parties before jurisdiction should be assumed. The defendant should be given every opportunity to appear and make defense, and one accused as co-respondent should be permitted to defend in the same suit. Hearings and trials should always be before the court and not before a delegated representative of it, and in
DIXON 69  DLUGOSZ

all uncontested cases, and in any other case where in the judgment of the court it is wise, a disinterested attorney should be assigned to defend the case. No decree can be granted on affirmative proof aside from the admission of the respondent. A decree dissolving marriage so as to permit remarriage of either party should not become operative until the lapse of a reasonable time after hearing or trial upon the merits of the case. If an inhabitant of one state should go into another state or territory to obtain a divorce for a cause which occurred in the matrimonial domicile, or force which would authorize a divorce by the laws of that domicile, such force should have no force or effect in the state of the domicile. Fraud or collusion in obtaining or attempting to obtain divorces should be made a statutory crime. The legitimacy of children born during coverture, except in the case of bigamous marriages, should not be affected by divorce of the parents. On the subject of causes each state should legislate for its own citizens and the common sentiment of that state should be properly expressed by the enumeration of causes in its own statute. Those heretofore given are recognized as representing the view of the great majority as covering offenses against the marriage contract of so serious a character as to defeat the purpose of the marital relation. The congress expressed the hope that the number of causes for divorce would be reduced rather than increased. May of the people of the civilized nations return to the belief in the supernatural sanction of marriage and "that it is a sacramental union, productive of the graces necessary to bear with another's shortcomings; an indissoluble union as that of soul and body, which can be dissolved only in death. This means a return to the Catholic view of marriage, and this return alone can remove the national evil of divorce." (See Marriage; Woman; Parents; also the articles on the various states and countries for divorce legislation.)

WALTER GEORGE SMITH.

Dixon, Joseph, Archbishop of Armagh, Ireland, b. at Coilluland, Co. Tyrone, in 1806; d. at Armagh, 29 April, 1866. Having entered Maynooth College at the age of sixteen he was ordained priest in 1832, and when he was appointed to the chair of Sacred Scripture and Hebrew, a post he worthily occupied for the next eighteen years. His class had an average of 200 students, amongst whom was John McEvilly, afterwards Archbishop of Tuam and a distinguished writer on Scripture subjects. Dr. Dixon's professorship was signalized by his labours in the "Reports and Mathe- matics", a work highly praised by Cardinal Wiseman and which was very much needed at the time. The first edition appeared in 1832 and a second in 1875. As Primate of Armagh he held an important synod in 1854, at which all the bishops of the northern province assisted with their theologians. In the same year he opened the broad task of completing the unfinished cathedral of Armagh and afterwards devoted himself to this work before his death. In 1856 he formed the dioce- san chapter consisting of thirteen members. During his incumbency he brought some religious congregations into the diocese, viz. the Sisters of Charity of St. Vincent de Paul (1855), who opened a house in Drogheda; the Marist Fathers (1861) who opened a college and a novitiate in Dundalk, and the Vincentian Fathers who were placed in charge of the seminary the same year. The primate was a stanch and fearless defender of the rights of the Holy See and at a public meeting in Drogheda denounced Napoleon III for complicity in the acts of the Italian revolutionists. His speech and subsequent letter to the "Freeman's Journal" created a great sensation and the em- persor made them the subject of complaint to the Pope. The primate was the organizer of the Irish Brigade in the papal service.

Ambrose Coleman.

DLUGOSZ (LUT. LONGINUS), Jan, an eminent medi- eval Polish historian, b. at Brzeczyca, 1415; d. 19 May, 1450, at Cracow. He was one of the twelve sons born to John and Beata. He received his primary education in Nowy Korczyn, then entered the Academy of Cracow, where he studied literature and philosophy. As advocate in the College of the Lateran he was appointed secretet of Cardinal Zbigniew Oleśnicki, Bishop of Cra- cow. Later he became a priate of the cathedral and preceptor for the children of the Polish King,
Casimir IV, Jagiellończyk. He was employed as the ambassador of the Polish king to different foreign countries, and especially to Bohemia and Hungary, where he settled political disputes. His ecclesiastical superiors sent him as their representative to Pope Eugenius IV, and as delegate to the Council of Basle. He declined the Archbishops of Prague, but shortly before his death was appointed Archbishop of Lemberg. Dlugosz expended his great income for religious and philanthropic purposes; he founded both cultural and literary, also for the maintenance of poor scholars.

The most beautiful church which he founded, and beneath which he was buried, is in Cracow, and is called Na Skalee (meaning, "Upon Rock", as the church was built on an enormous rock). As a Polish historian he outranks all who preceded him. He was not content to repeat the statements made by other chroniclers, but examined for himself the oldest Polish, Bohemian, Hungarian, Ruthenian, and German documents, to understand which thoroughly he studied, in his old age, several foreign languages. His works offer abundant and reliable material not only for Polish, but also for general history.

Dlugosz paid less attention to beauty of style than to the matter of the statements that conform to a philosophic manner, as one who saw the action and purposes of Providence in all historical events. His great history of Poland (Historia Polonica in twelve volumes) was composed by order of his friend and master Cardinal Olesnieki. The works of Dlugosz were first published incompletely in 1614, and fully in 1711. The best edition is that in fourteen volumes by Carl Meinhardczyk: "Joanisc Dlugosz Senioris Canonici Cracovensis Opera Omnia" (Cracow, 1683-87). It includes his heraldic work "Banderia Prutenorum", also his "Life of St. Stanislaus", "Life of St. Kinga", lives of many Polish bishops (See of Wroclaw, Poznań, Plock, Cracow, etc.), "Liber beneficiorum diocese Cracoviensis", "Lites ac res gestae inter Polonos ordinemque Cruciferorum", "Anales seu cronicae inedita regni Poloniae".

Dobeneck. See Cochrteus.

Dombayer, Martin, a distinguished Benedictine theologian, b. 24 Oct., 1753, at Schwandorf, Bavaria; d. 21 Dec., 1805, at Amberg, Bavaria. He first entered the Society of Jesus, and after its suppression in 1773 joined the Benedictines in the monastery of Weissenhoe, Diocese of Bamberg, where he was professed in 1776, and in 1777 ordained priest. He was a successor professor of philosophy at Neuburg, Bavaria (1781-87), of dogmatic theology and ecclesiastical history at Amberg (1787-94), and of dogmatic theology and patrology at the University of Ingolstadt (1794-99). On the reorganization of the latter school in 1799 he returned to his monastery of Weissenhoe, where he remained until its secularization. He then retired to Cracow, where he taught theology until his death. In 1789 he published at Amberg a "Contspectus Theologiae Dogmaticae". His chief work is the "Systema Theologiae Catholice", edited after his death by Th. P. Seresty in eight volumes (Sulzbach, 1807-19). The work is very learned and devoid of all harshness in its controversial parts.

Dobrzhoffer, Martin, missionary, b. in Graz, Styria, 7 Sept., 1717; d. in Vienna, 17 July, 1791. He became a Jesuit in 1736, and twelve years later sent out for the missions of South America, where he laboured among the Guaranis and the Abipones for eighteen years. On the expulsion of the Jesuits from the Spanish possessions in 1767, he returned to his native land. The Empress Maria Theresia frequently sent for Dobrizhofer that she might hear his adventures as told on his own lips; and she is said to have taken great pleasure in his cheerful and animated conversation. He is the author of a work in three volumes entitled "Historia de Abiponibus, equestri hellicosicae Paraguayanae natione" (Vienna, 1783-1784), a German translation of which, by Professor Kell of the University of Pesth, was published in Vienna (1831). This work is of great ethnological value. In the preface he says, "A seven years residence in the four colonies of the Abipones has afforded me opportunities of closely observing the manners, customs, superstitions, military discipline, slavers inflicted and received, political and economical regulations, together with the vicissitudes of the colonies". He further declares that what he learned amongst the Paraguayans in the course of eighteen years, what he himself beheld in the colonies of the Indians and the Spaniards, in frequent and long journeys, through woods, mountains, plains and vast rivers, he sets forth, if not in an elegant and brilliant narrative, certainly in a candid and an accurate one, which is at least deserving of credit. In the course of his work, Dobritzhofer feels the temptation to refuse and expose the erroneous statements of other writers respecting the Jesuits in Paraguay, and the malicious commentaries by which the ruin of their institutions in that country was unhappily effected. The English translation (An Account of the Abipones, an Equestrian People of Paraguay, London, 1822), commonly ascribed to Southey, is a work of New York. Coleridge, daughter of Samuel Taylor Coleridge, who judged it a performance "unsurpassed for pure mother-English by anything I have read for a long time". Dobrzhofer in 1775 was appointed preacher to the Court in Vienna, a post which he held till his death.

Docete (Gr. Δοκέται), a heretical sect dating back to Apostolic times. Their name is derived from the term "Docetism", from the verb "to appear" or "to seem". Some historians have contended that Christ only "seemed" or "appeared" to be a man, to have been born, to have lived and suffered. Some denied the reality of Christ's human nature altogether, some only the reality of His human body or of His birth or death. The word Docete, which is best rendered by "Illusionists", first occurs in a letter of Serapion, Bishop of Antioch (190-203) to the Church at Rhodes, when troubles had arisen about the public reading of the apocryphal Gospel of Peter. Serapion at first unsuspectingly allowed, but soon after forbade, this, saying that he had borrowed a copy from the sect who used it, "whom we call Docete". He suspected a connexion with Marcionism and found in this Gospel "some additions to the right is", and to this he gave the title of "apocryphon" was discovered in 1856 and contained three passages which savoured strongly of Illusionism. The name further occurs in Clement Alexander, (d. 216), Strom., III, xii, VII, xvii, where these secretaries are mentioned together with the Hermatics as instances of heretics being named after their own special error. The heresy itself, however, is much older, as it is connected in the New Testament. Clement mentions a certain Julius Cassianus as οτ διδασκείν ελπίζων, "the founder of Illusionism". This name is known also to St. Jerome and Theodoret; and Cassianus is said to be a disciple of Valentinian, but nothing more is known of him. The idea of the unreality of Christ's human nature was held by the oldest Gnostic sects.

Edward P. Spilane.
cannot therefore have originated with Celsus. As Clement distinguished the Docetae from other Gnostic sects, he probably knew some sectaries the sum-total of whose errors consisted in this illusion theory; but Docetism, as far as at present known, was always an accompaniment of Gnosticism or later of Manichæism. The Docetae, described by Hippolytus (Philos., VIII, i-iv, X, xii) are likewise Gnostic sect; these perhaps extended their illusion theory to all material substances.

Docetism is not properly a Christian heresy at all, as it did not arise in the Church from the misunderstanding of a dogma by the faithful, but rather came from without. Gnostics starting from the principle of Gnosticism, that even matter and spirit, and making all salvation consist in becoming free from the bondage of matter and returning as pure spirit to the Supreme Spirit, could not possibly accept the sentence, "the Word was made Flesh", in a literal sense. In order to borrow from Christianity the doctrine of a Saviour who was Son of the Good God, they were forced to modify the doctrine of the Incarnation. Their embarrassment with this dogma caused many vacillations and inconsistencies; some held the dwelling of an Aeon in a body which was indeed real but was not his own; others denying the actual objective existence of any body or humanity at all; others allowing a "psychic", but not a "hyle" or really material body; others believing in a real, yet not human body; others again accepting the reality of the body, but not the reality of passion from a woman, or the reality of the passion and death on the cross. Christ only seemed to suffer, either because He ingeniously and miraculously substituted some one else to bear the pain, or because the whole occurrence on Calvary was a visual deception. Simon Magus first spoke of a "putative" passion of Christ and actually boldly asserted that it was really he, Simon himself, who underwent these apparent sufferings. "As the angels governed this world badly because each angel coveted the principality for himself, he [Simon] came to improve matters, and was transfigured and rendered like unto the Virtues and Powers and Angels, so that he appeared amongst men as man though he was no man and was believed to have suffered on earth as if he had not suffered himself" (Philos., xvi, 16 in Judæo: putatum eam non esse putasse—Irenæus, Adv. Hær., I, xxiii sqq.). The mention of the demiurgic angels stamps this passage as a piece of Gnosticism. Soon after a Syrian Gnostic of Antioch, Saturninus or Saturnulius (about 125) made Christ the chief of the Aeons, but tried to show that the Saviour was unborn (αὐτὸν ἐγεννησαν) and without body (ἄγωνατος) and without form (ἀκαθάρτου) and only apparently (σωφρόνι) seen as man (Irenæus, Adv. Hær., XXIV, ii).

Another Syrian Gnostic, Cerdó, who came to Rome under Pope Hyginus (137) and became the master of Marcion, taught that "Christ, the Son of the Highest God, appeared without birth from the Virgin, yea without any birth on earth as man". All this is natural enough; for matter not being the creation of the Highest, was never written into His nature, and none of it. This is clearly brought out by Tertullian in his polemic against Marcion. According to this heresiarch (140) Christ, without passing through the womb of Mary and endowed with only a putative body, suddenly came from heaven to Capharnaum in the fifteenth year of Tiberius; and Tertullian remarks: "All these tricks about a putative corporeality Marcion has adopted lest the truth of Christ's birth should be argued from the reality of his human nature, and thus Christ should be vindicated as the work of the Creator [Demiurges] and be shown to have human flesh even as he had human birth" (Adv. Marc., III, xi). Tertullian further states that Marcion's chief disciple, Apelles, slightly modified his master's system, accepting indeed the truth of Christ's flesh, but strenuously denying the truth of His birth. He contended that Christ had an astral body made of superior substance and compared the appearance to the appearance of the angel to Abraham. This, Tertullian sarcastically remarks, is getting from the frying-pan into the fire, de cæliari in carbonarium. Valentinus, the Egyptian attempted to accommodate his system still more closely to Christian doctrine by admitting not merely the reality of the Saviour's body and suffering, but the entire life of a body passed through Mary as through a channel (διὰ τοῦ σωμάτος) though he took nothing from her, but had a body from above. This approximation to orthodoxy, however, was only apparent, for Valentinus distinguished between Christ and Jesus. Christ and the Holy Ghost were emanations from the Aeon Nous; and from all Aeons together proceeded Jesus the Saviour, who became united with the Messiah of the Demiurges.

In the East, Marinus and the school of Bardesanes, though not Bardesanes himself, held similar views with regard to Christ's astral body and seeming birth. In the West, Prolem reduced Docetism to a minimum by saying that Christ was indeed a real man, but His passion suffered was not, but as pneumatic and the psychic [spiritual and ethereal]. The pneumatic He received from Achamoth or Wisdom, the psychic from the Demiurges; His psychic nature enabled him to suffer and feel pain, though He possessed nothing ὑλικόν, i.e. nothing grossly material. (Irenæus, Adv. Hær., I, xii, iv). As the Docetae objected to the real Incarnation, so from the first they particularly objected to the reality of the passion. Hence the clumsy attempts at substitution of another victim by Basilides and others. According to Basilides, Christ seemed to men to be a man and to have performed miracles. It was not, however, Christ who suffered but Simon of Cyrene, who was constrained to carry the cross and was mistakenly crucified in Christ's stead. Simon who was crucified and crucified received Jesus' form, Jesus assumed Simon's and thus stood by and laughed. Simon was crucified and Jesus returned to his father (Irenæus, Adv. Hær., I, xxiv). According to some apocrypha it was Judas, not Simon the Cyrenean, who was thus substituted. Hippolytus describes a Gnostic sect who took the name of Docetae, though for what reason is not apparent, excepting perhaps that the pneumatic was the least pronounced feature in their system. The sectaries were in close affinity to those of the Valentinians. The primal Being is, so to speak, the seed of a fig-tree, small in size but infinite in power; from it proceed three Aeons, tree, leaves, fruit, which, multiplied with the perfect number ten, become thirty. These thirty Aeons together fructify one of themselves, from whom proceeds the Virgin-Saviour, a perfect representation of the Highest God. The Saviour's task is to hinder further transference of souls from body to body, which is the work of the Great Archon, the Creator of the world. The Saviour enters the world unnoticed, unknown, obscure. An angel announced the glad tidings to Mary. He was born and did all the things ascribed to Him. But in baptism he received the figure and seal of another body besides that born of the Virgin. The object of this was that when the Archon condemned his own peculiar fragment of flesh to the death of the cross, the soul of Jesus—that soul which had been nourished in the body born of the Virgin—might strip off that body and nail it to the accursed tree. In the pneumatic body received at baptism Jesus could triumph over the Archon, whose evil intent he had eluded.

This heresy, which destroyed the very meaning and purpose of the Incarnation, was combated even by the Apostles. Possibly St. Paul's statement that in Christ dwelt the fulness of the Godhead corporaliter (Col., i, 19, ii, 9) has some reference to Docetic errors. Beyond doubt St. John (I John, i, 3, iv, 1-3; ii
Docetism. See Docete.

Docimium, a titular see of Phrygia in Asia Minor. This city, as appears from its coins where the inhabitants are called Macedonians, must have been founded by Antigonos Dokimos. Its name is written Dokimeion, Dokimia Kome, Dokimaion, later Dokimion. It was famous for its marble-quarries, and is now identified with Istacha Kara Hisar, a village north-east of Afion Kara Hisar, in the vilayet of Sivas.

In this see two bishops were found many Christian inscriptions, later than Constantine. Docimium was a suffragan of Synnada in Phrygia Salutaris. Six or seven bishops are known, from 344 to 570 (Lequien, Or. Christ., I, 553); another bishop is mentioned in an inscription.

Doctor (Lat., docere, to teach), the title of an authorized teacher. In this general sense the term occurs in the O.T.; the “doctors” are mentioned with the “princes and ancients” (Deut., xxix, 10; xxxi, 6). In the Christian era, Jewish doctors also received the title (doctor genericus, doctor mischienus—see Talmud). Under the New Law the doctors are those who have received a special gift or charisma (see CHARISMATA) such as the “prophets and doctors” of the Church at Antioch (Acts, xiii, 1), and of whom St. Paul says that “God indeed hath set some in the church: first apostles, secondly prophets, thirdly doctors (I Cor., xii, 28; Eph., iv, 11). St. Paul speaks of himself as a doctor of the Gentiles in faith and truth (I Tim., ii, 7), and Doctor gentium is one of the titles given him in the Liturgy.

In the early Church, teachers in the catechetical schools were known as doctors audientium (Cyprian, Ep. xxix, ed. Hartel); and finally, in the course of time, some of the most illustrious doctors of arts and theology were designated as “Doctors of the Church” (q.v.).

The use of Doctor as an academic title dates from the founding of the medieval universities. Before these were regularly organized, any teacher who gathered about him a number of students was a doctor, dominus, or magister. During the first half of the twelfth century, the Doctor acquired a more specific significance, though it still implied personal excellence rather than official position. The “Four Doctors” who succeeded Irenaeus at Bologna were the distinguished jurists, Martinus (d. before 1166), Bulgarus (d. 1166), Hugo (d. 1168), and Jacobus (d. 1175). But when the doctors formed a collegium they prescribed conditions on which other persons might become members of the teaching body, and thus laid the foundation of the system of academic degrees. The doctorate was first granted in civil law (doctores legum), later in canon law (doctores decretorum), and, during the thirteenth century, in medicine, grammar, logic, and philosophy. The doctorate in music was conferred at Oxford and Cambridge in the fifteenth century; in the humanities and theology, the title was more generally employed than doctor, but for a long time these titles were synonymous. The English universities, adopting the usage of Paris, at first designated teachers of law as doctors, and pro-
professors of theology as masters; but in the course of time the former title was given to all the superior faculties, and the latter was reserved for grammar and arts. In Germany, doctor and magister were interchangeable (Kaufmann, "Geschihte" etc., II, 268 sqq.), and though the mastership is no longer conferred as a separate degree, a trace of the medieval practice is still found in the diploma which styles its recipient "Doctor of Philosophy and Master of Arts".

Bologna at first conferred only the doctorate, but Paris and the English universities very soon introduced the preparatory degrees of baccalaureate and licentiate. Later, it is true, the licentiate was granted in the Italian universities as the first examination (prima opinio), but this merely implied permission to proceed to the second, more formal, examination (publica) in which the licentia docendi was given. At Paris, the licentiate meant a real authorization to teach, besides being a prerequisite for admission to the final examination (incepto) at which the doctorate was conferred. There was a corresponding difference in the length of the course for the degree. Bologna required six years of study for the doctorate in canon law, and seven or eight for the doctorate in civil law; the student might begin his course at the age of fourteen and become a doctor at twenty or twenty-one. At Paris the statutes drawn up in 1215 by the Cardinal Legate Robert de Courçon provided that no one should lecture in theology as a master unless he was the holder of a doctorate and possessed of a biretta, and had taken a five-years course in theology. According to Denifle (Universitäten, 100-102), the eight years meant three years in arts and five years in theology. (Cf. Rashdall, "Universities", I, 462 sqq.) At Oxford, candidates who had already taken the M.A. degree were required to study theology seven years more for the licentiate, after which the M.A. had to take a five-years' course for the doctorate. For the subjects required in these courses see University. (Cf. Rashdall, op. cit., II, 452 sq.)

In regard to examinations there seems to have been considerable leniency: at times they were reduced to mere formalities, at other times they were dispensed with. The degree was awarded by the chancellor on the written certificate, especially when the candidate's fitness. The ceremony of inception was conducted by a regent; it consisted in the tradition of the book and ring, the imposition of the biretta, and the kiss of fellowship. At Paris, however, the degree in theology was conferred by the chancellor himself, who placed the biretta upon the candidate's head with the words, "Incipientis in nomine Patris et Filii et Spiritus Sancti. Amen." Then followed a disputatio (adulta or textbooks), in which the chancellor, the masters, and one of the bachelors took part. It was customary also to hold, on the evening before incipient, an elaborate disputation known as vesperie (see, for details, "Charterularium", II, App. p. 693).

Among the various doctorates, that in theology ranked as the most common thing for those who had received the degree in the other faculties to take additional courses for the S. T. D. In the German universities, for instance, licentiates in law or medicine might become bachelors in theology after five years of theological study; they would then be obliged to pursue the course prescribed for the other candidates. Conversely, theologians were sometimes permitted to take degree courses in civil law and medicine. This privilege was granted to Bologna by Clement V (10 March, 1310) for a period of ten years but it applied only to ecclesiastical persons other than priests, religious, and bishops elect. It was renewed twice by John XXII (1317 and 1330); but when the university (1343-44) petitioned for an indefinite extension of the privilege, Clement VI refused. Innocent VI, however, renewed it (30 June, 1360) for ten years (Denifle, op. cit., 209).

The chief significance of the doctorate lay in the fact that it authorized the recipient to teach everywhere without undergoing further examination—"ius ubique docendi." This prerogative developed gradually out of the licentia docendi which the degree itself implied, i.e. the right to teach in the university which conferred the doctorate. But as the older universities, Bologna, Paris, and Oxford, grew in importance and attracted students from all parts, the idea naturally spread that their graduates had the right to teach everywhere. Subsequently, this authorization was expressly granted to newly founded universities: by Gregory IX to Toulouse (1233), and by Alexander IV to Salamanca (1255). It was long, however, before the regulation held by the several degrees was applied to their holders. Paris held tenaciously to its rights; Oxford was more liberal, but would not permit a Parisian doctor to teach merely on the strength of his degree. The doctors themselves were not always anxious to exercise their prerogatives; the teaching devolved in large measure upon the bachelors, and the masters were classified as regentes (those who taught) and as non-regentes, who had content with the prestige implied by their degree or were eager for other occupations.

The essential meaning of the doctorate as fixed by the medieval universities is preserved in modern academic usage; the degree implies a qualification to teach. It has, however, undergone various modifications which are due partly to the development of the subject under which the doctorate is conferred, and partly to the custom and practice. The degree, Doctor of Laws, is often conferred as an honorary title. The doctorate in theology, or divinity, has been retained by Catholic institutions as a degree to be given either after a course of study and an examination or as a distinction (honoris causa); while the tendency among non-Catholic universities is to confer it as a regular degree. It may be that the doctorate in philosophy has attained great importance, and its value has been enhanced as the result of stricter requirements. For this and for the other doctorates, research is now generally considered the principal qualification, and in consequence the candidate's work is becoming more specialized.

The influence of the Holy See, in regard to the doctorate in theology, was exerted in various ways, e.g. by authorizing universities to confer the degree, by prescribing through papal legates the conditions for obtaining it, and by correcting abuses, notably laxity of requirements, which crept in from time to time. The historical details will be found in the article University. Legislation concerning the ecclesiastical side of the subject may be summarized as follows:

1. The power of creating doctors belongs to the pope; but he may, and often does, delegate it to universities, seminaries, and other institutions of learning. Charters granted by civil authority are valid; but to obtain canonical recognition, doctorates in theology and canon law must be conferred in virtue of pontifical authority.

2. The candidate for the degree must be a baptized Christian and must subscribe to the profession of faith formulated by Pius IV. As a rule, only priests receive the doctorate in theology and canon law. It is not, however, necessary that the recipient should be in Sacred orders. Laymen as well as priests are allowed to appear as advocates before the Roman tribunals and courts, and Sigbaturum and they are required to have the doctorate at least in canon law (Const. "Sapientii consilio", 29 June, 1908).

3. The doctoral biretta, or four-cornered cap, may be worn on academic occasions, but not in choir (Cong. of Rites, "In Venusina", 1844, and reply to the Archbishop of Santiago de Chile, 6 Sept., 1895); the ring must be worn at all times except at Mass and other ecclesiastical functions (Cong. of Rites, 12 Feb., 1892).

4. The Council of Trent (Sess. XXII, c. ii, "De
Ref.) decreed that a bishop must be either doctor or licentiate in theology or in canon law; if a religious, he should have proper testimonials from his superiors. It enacted the same requirement for the archdeacon (Sess. XXIV, c. xii, "de Ref."). Regarding the vicar capitular and the penitentiaries, it prescribed that they should either have the degree or be otherwise well qualified. The Congregation of Studies recently decided (7 March, 1906) that the penitentiary and theologian of the cathedral chapter, if not already doctors, must receive the degree within a year. The Cons., "sapiens consilis" (29 June, 1908) prescribes the doctorate in theology and canon law for the officials of the Rota and Signatura. It has been a matter of controversy whether the vicar-general is obliged to be a doctor, and whether the Tridentine decree concerning the archdeacon is still in force. For the divergent opinions, see Card. Gennari, "Questioni Canoniche" (Rome, 1908), pp. 372, 292. The whole tenor of ecclesiastical legislation has been in favour of requirements which secure scientific qualifications in those who are appointed to official positions in the Church.

EBRAN-HORN, Bibliographie d. deutschen Universitaten (Leipsig, 1904), 1, 235; DENifle, Die Universitaten des Mittelalters (Berlin, 1885); BAUMANN, Die Gogere, d. deutschen Universitaten (Stuttgart, 1888); RASHDALL, The Universities of Europe, etc. (Oxford, 1905); LAURIE, The Rise and Early Constitution of Universities (New York, 1896); BATTANDIER, Annaire Pontifical (Paris, 1900).

DOCTORS, SURNAME OF FAMOUS. It was customary in the Middle Ages to designate the more celebrated among the doctors by certain epithets or surnames which were supposed to express their characteristic excellence or dignity. This was especially the case with the doctors in law and theology. The following list exhibits the principal surnames with the dates of death.

DOCTORS IN THEOLOGY:

Abstractionem—Francis Mayron, O.F.M., 1325 or 1327.
Acutissimus—Sixtus IV, 1184.
Acutus—Gabriel Vasquez, S.J., 1604.
Amanus—Robert Conton, O.F.M., 1340.
Angelicus—St. Thomas Aquinas, O.P., 1274.
Arca testamenti—St. Anthony of Padua, 1231.
Authenticus—Gregory of Rimini, O.S.A., 1358.
Avroristos et philosophiar parens—Urbanus, O.S.M., 1403.
Beatus et fundatissimus—Egidius of Colonna, O.S.A., 1316.
Bonus—Walter Brinkley, O.F.M., 1310.
Christianus—Nicholas of Cusa, 1464.
Clarus—Louis of Montesinos, 1621.
Clarus ac subtilis—Denis of Citeaux, 15th cent.
Collectivus—Landolfo Caracceoli, O.F.M., 1351.
Columna doctorum—William of Champeaux, O.S.B., 1211.
Contradictionum—Johann Wessel, 1489.
Doctor doctorum, Scholasticus—Anselm of Leon, 1117.
Inclytus—Antonius Andreas, O.F.M., 1320.
Estaticus—Denys the Carthusian, 1471.
Emissus—St. John of Matha, O. Trin., 1213.
Emporium theologiae—Laurent Gervais, O.P., 1483.
Excellentissimus—Antonio Coretti, 1503.
Eximius—Francisco Suarez, S.J., 1617.
Facundus—Petrus Anreoli, O.F.M., 1322.
Famosissimus—Petrus Alberti, O.S.B., 1426.
Famosus—Bertrand de la Tour, O.F.M., 1334.
Fertilitas—Francis of Caenlia, O.F.M., 15th cent.
Flor mundi—Maurice O'Fichely, O.F.M., Abp. of Tuam, 1513.
Fundamentalis—Joannes Faber of Bordeaux, 1350.
Fundatissimus—see Beatus.

DOCTOR

Fundatus—William Ware, O.F.M., 1270.
Illibatus—Alexander Alamanicus, O.F.M., 15th cent.
Illuminatus—Francis Mayron, O.F.M., 1325–27; Raymond Lully, O.F.M., 1315.
Illuminatus et sublimis—Joannes Tauler, O.P., 1361.
Illustratus—Franciscus Picenus, O.F.M., 14th cent.
Illustris—Adam of Marisco, O.F.M., 1308.
Inclitus—William Mackielfield, O.P., 1300.
Incogniosissimus—Andrew of Newcastle, O.F.M., 1300.
Inter Aristotelice Aristotelicissimus—Haymo of Faversham, O.F.M., 1241.
Invincibilis—Petrus Thomas, O.F.M., 14th cent.
Irrefragibilis—Alexander of Hales, O.F.M., 1243.
Magister Sententiarum—Peter Lombard, 1164.
Magnus—Albertus Magnus, O.P., 1290; Gilbert of Citeaux, O.Cist., 1280.
Marianus—St. Anselm of Canterbury, O.S.B., 1109.
Melius—St. Bernard, O.Cist., 1153.
Mirabilis—Antonio Perez, S.J., 1649; Roger Bacon, O.F.M., 1294.
Moralis—Gerard Eudo, O.F.M., 1349.
Notabilis—Pierre de l'Ile, O.F.M., 14th cent.
Ordinatissimus—Johannes of Bassolis, O.F.M., c. 1347.
Ornatus et sufficiens—Petrus of Aquila, O.F.M., 1344.
Parisiensis—Guy de Perpignan, O.Carm., 1342.
Planus et utilis—Nicolas of Lyre, O.F.M., 1340.
Pracculus—Peter of Kaiserslautern, O.Pream., 1320.
Proclantissimus—Thomas Netter (of Walden), O.Carm., 1413.
Profundissimus—Paul of Venice, O.S.A., 1428.
Profundus—Thomas Bradwardine, 1349.
Refulginus—Alexander V, 1110.
Resolutus—Durandus of Saint-Pourçain, O.P., 1334.
Resolutus—John Bacon, O.Carm., 1346.
Scholasticus—Peter Abelard, 1142; Gilbert de la Porree, 1154; Peter Lombard, 1164; Peter of Poitiers, 1206; Hugh of Newcastle, O.F.M., 1322.
Seraphicus—St. Bonaventure, O.F.M., 1274.
Simplicissimus et invincibilis—William of Oe, O.F.M., 1347 or 1359.
Solemnis—Henry of Ghent, 1293.
Solidus, Copiosus—Richard of Middleton, O.F.M., 1300.
Speculatius—James of Viterbo, O.S.A., 1307.
Sublimis—Francis de Bachelon, O.Carm., 1372.
Jean Courte-Cuisse, 1425.
Subtiles—Duns Scotus, O.F.M., 1308.
Sublissimus—Peter of Mantua, 14th cent.
Succinctus—Francis of Ascoli, c. 1341.
Universalis—Alanus of Lille, 1202; Gilbert, Bishop of London, 1134.
Venerabilis et Christianissimus—Jean Gerson, 1429.
Venerandus—Geoffroy de Fontibus, O.F.M., 1240.
Vita Arbor—Johannes Wallensis, O.F.M., 1300.

DOCTORS IN LAW:

Aristotelis anima—Johannes Donulus, O.F.M., 1380.
Doctor a doctoribus—Antonius Francisque, 1528.
Fons canonum—Johannes Andrea, 1348.
Fons juris ubrius—Henry of Susa (Ostia), 1267–80.
Lucerna juris—Baldus de Ubaldis, 1400.
Lucerna juris pontifici—Nicholas Tedeschi, O.S.B., 1415.
Lumen juris—Clement IV, 1268.
Lumen legum—Irenius, 13th cent.
THE MADONNA AND DOCTORS OF THE CHURCH—MORETTO
STÄDL ART INSTITUTE, FRANKFORT

ST. AMBROSE
ST. GREGORY

ST. AUGUSTINE
ST. JEROME
Doctor

Memoriosissimus—Ludovici Pontificis, 1439.
Monarcha juris—Bartholomei of Salvatico, 1412.
Os aureum—Bulgari, 1166.
Pacificus (Propeius)—Nicolas Bonet, O.F.M., 1360.

Pater Decretalium—Gregory IX, 1241.
Pater et organis veritatis— Innocent IV, 1254.
Pater juris—Innocent III, 1216.
Pater peritorum—Pierre de Belpereche, 1307.
Planus ac perspicuus—Walter Burleigh, 1337.
Princes substitutum—Francesco d'Accolti, 1456.
Speculator—William Durandus, 1296.
Speculum juris—Bartholus of Sassoferrato, 1359.

Sulpicius—Benedict Raymond, 1140; Filippo Corneo, 1462.

Terus—Thomas Doctius, Siena, 1441.

E. A. Pace

Doctor Angelicus. See Thomas Aquinas, Saint.

Doctor of the Law. See Law; Scholae.

Doctors of the Church (Lat. Doctores Ecclesiae).—Certain ecclesiastical writers have received this title on account of the great advantages the whole Church has derived from their doctrine. In the Western Church the four eminent Fathers of the Church attained this honour in the early Middle Ages: St. Gregory the Great, St. Ambrose, St. Augustine, and St. Jerome. The "four Doctors" became a commonplace among the Scholastics, and a decree of Boniface VIII (1295) ordering their feasts to be kept as doubles in the whole Church is contained in his sixth book of Decretals (cap. "Gloriosus", de reliq. et vener. sanctorum, in Sexto, III, 22). In the Eastern Church three Doctors were pre-eminent: Chrysostom, Basil, and Gregory Nazianzen. The feasts of these three saints were made obligatory throughout the Eastern Empire by Leo VI, the Wise, and the same Pope in 925. A common feast was later instituted in their honour on 30 January, called "the feast of the three Hierarchs". In the Menaea for that day it is related that the three Doctors appeared in a dream to John, Bishop of Euchaita, and commanded him to institute a festival in their honour, in order to put to a stop the rivalries of their votaries and panegyrists. This was under Alexius Conon (1051–1118; see "Acts SS."). In June, under St. Basil, e. xxxviii). But sermons for the feast are attributed in MSS. to Cosmas Vettori, who flourished in the tenth century. The three are as common in Eastern as the four are in Western. Durandus (i, 3) remarks that Doctors should be represented with books in their hands. In the West analogy led to the veneration of certain Doctors, and the name of a Mass of St. Athanasius being very properly added to the three hierarchs.

To these great names others have subsequently been added. The requisite conditions are enumerated as three: eminentis doctrina, insigne vitae sanctitas, Ecclesiae declaratio (i. e. eminent learning, a high degree of sanctity, and proclamation by the Church). Benedict XIV explains the third as a declaration by the supreme pontiff or by a general council. But though general councils have acclaimed the writings of certain Doctors, no council has actually conferred the title of Doctor of the Church. In practice the procedure consists in extending to the Universal Church the use of the Office and Mass of a saint in which the title of Doctor is applied to him. The decree is issued by the Congregation of Sacred Rites and approved by the pope, after a careful examination, if necessary, of the saint's writings. It is not in any way an ex cathedra decision, nor does it even amount to a declaration that no error is to be found in the teaching of the Doctor. It is, indeed, well known that the very greatest of them are not wholly immune from error. No martyr has ever been included in the list, since the Office and the Mass are for confessors. Hence, as Benedict XIV points out, St. Ignatius, St. Irenæus, and St. Cyprian are not called Doctors of the Church.

The proper Mass of Doctors has the Introit "In medias", borrowed from that of the Theologus par excellence, St. John the Evangelist, together with special prayers and Gospel. The Creed is said. The principal peculiarity of the Office is the antiphon to the Magnificat at both Vespers, "O Doctor optimus", and it is rather by this antiphon than by the special Mass that a saint is perceived to be a Doctor (S. R. C., 7 Sept., 1754). In fact, St. John the Divine, St. Augustine, St. Athanasius, Basil, Leo, and Cyril of Jerusalem have not the Gospel of Doctors, and several have not the collect. The feasts of the four Latin Doctors were not added until the sixteenth century, when St. Thomas Aquinas was declared a Doctor by the Dominican St. Furius V in his new edition of the Breviary (1568), in which the feasts of the four Greek Doctors were also added. The Franciscan Sixtus V (1588) added St. Bonaventure, St. Anselm was added by Clement XI (1720), St. Isidore by Innocent XIII (1722), St. Peter Chrysologus by Benedict XIII (1729), St. Leo I (a well-deserved but belated honour) by Benedict XIV (1734), St. Peter Damian by Leo XII (1828), St. Bernard by Pius VIII (1830). Pius VIII added them to St. Hilary and to two more modern saints, Alphonsus Liguori (1781) and Francis de Sales (1877). Leo XIII promoted (1883) the Easterns, Cyril of Alexandria, Cyril of Jerusalem, and John Damascene, and last of all the Venerable Bede (1899). The same pope, when, in 1882, he introduced the simplification of double feasts, made an exception for Doctors, whose feasts are always to be transferred.

There are therefore now twenty-three Doctors of the Church, of whom seven are Eastern, sixteen Western. Two are popes, two are cardinals, all but five are bishops. They include a Dominican, a Franciscan, a Redemptorist, and five Benedictines. For some of these the Office had previously been granted to certain persons or orders, viz. St. Pius V to the Carthusians, St. Isidore to Spain, St. Bede to England and to all Benedictines, St. Leander of Seville and St. Fulgentius are kept as Doctors in Spain, and the former by Benedictines also, as he was in earlier times claimed as a monk. St. Idelfonsus has the Introit "In medio" in the same order (for the same reason) as St. Illuminus, among the rank of Doctors.

Pohle in Kirchliche Konkordien (Freiberg, 1897), ii, 384; Fesseler-Ignaz, Inst. Patrologiae (Innsbruck, 1890); Barke, Patrologie, iii, Sharro (Freiburg in Br., St. Louis, 1909, 5th ed.). On the early Latin Doctors see Weyman in Hist. Jahrbuch (1894), XV, 96, and in Rev. d' hist. et litt. religieuses, XLI, 562; for the Greek Doctors see Nilles in Zeitschr. f. kath. Theologie (1894), XVII, 742. See also Bouyer, Lat. Persia de l'Eglise in Rev. Augustinienne (1904), 461–56, and Pesch, Predigt. Dogmat. (Freiburg, 1903), 441 sqq.

JOHN CHAPMAN.

Doctrinarians. See Bus, César de, Venerable.

Doctrine, Christian.—Taken in the sense of "the act of teaching" and "the knowledge imparted by teaching", this term is synonymous with catechesis. It is commonly used in the Vulgate, doctrine, are often used in the New Testament in the Pastoral Epistles. As we might expect, the Apostle says "doctrine" as one of the most important duties of a bishop (1 Tim., iv, 13, 16; v, 17; II Tim., iv, 2, etc.).

The word κατηχησις means instruction by word of mouth, especially by questioning and answering. In Judaism it may be used in the same sense in the Pastoral Epistles. As the word and others of the same origin occur in St. Luke's Gospel: "That thou mayest know the verity of those things in which thou hast been instructed" (κατηχησο, ὑμῖν εἰς ἑκάσταν eruditus es—1, 4). In the Acts, xviii, 25, Apostle is described as "instructed κατηχησον, educer] in the way of the Lord". St. Paul uses the word twice: "I had rather speak five words with
my understanding, that I may instruct [καταγγέλω, instruire] others also” (I Cor., xiv, 19); and “Let him that is instructed [διδάσκω, is qui catechizatur] in the word, communicate to him that instructeth [τοις καταγγέλεισι, ei qui catechizat] him, in all good things” (Gal., vi, 6). Hence the word, with its technical meaning of oral religious instruction, passed into ecclesiastical use, and is applied both to the act of instructing and the subject-matter of the instruction. The word catechism was also formerly used for the act of instructing (“To say ay, and no, to these particulars, is more than to answer in a catechism”—As You Like It, act iii, sc. 2), as catechism is still used in French; but it more properly applied to the late sixteenth-century book in which the questions and answers are contained. The subject will be treated in this article under the three heads: I. History of Catechetics; II. Practical Catechetics; III. Modern Catechisms.

I. History of Catechetics.—(1) Oral instruction by means of questions and answers has occupied a prominent place in the scholastic methods of the moral and religious teachers of all countries and of all ages. The Socratic dialogues will occur to every one as brilliant examples. But many centuries before Socrates’ day this method was practised among the Hebrews (Exod., xii, 26; Deut., vi, 7, 20, etc.). They had three forms of catechizing: domestic, conducted by the head of the family for the benefit of his children and servants; schoolistic, conducted by teachers in schools; or ecclesiastical, conducted by priests and Levites in the Temple and the synagogues. Prosesyltes were carefully instructed before being admitted to become members of the Jewish faith. The regular instruction of children began when they were twelve years old. Thus we read of Christ “in the temple, sitting in the midst of the doctors [ἀπόφθεγμα, διδασκόμενος, διδασκαλίαν] and hearing them, and asking them questions” (Luke, ii, 46, 47). During His public life He frequently made use of the catechetical method to impart instruction: “What think ye of Christ? Whose son is he?” “Whom do men say that the man of sin is?” “Whom do you say that I am?” etc. In His final charge to His Apostles He said: “Teach ye the disciples [διδασκάλοι, διδασκόμενοι] to observe all things whatsoever I have commanded you” (Matt., xxviii, 19). And after this instruction they were to initiate them into the Church, “baptizing them in the name of the Father, and of the Son, and of the Holy Ghost” (ibid.).

But the first recorded mand are, St. Peter, “standing up with the eleven”, declared to the Jews on Pentecost day, and proved to them from the Scriptures that Jesus, whom they had crucified, was “Lord and Christ”. When they had been convinced of this truth, and had confederation in their heart for their crime, they asked, “What shall we do?” And Peter answered, “Do penance, and be baptized [in the name of Jesus Christ]” (Acts, x, 38). “And with very many other words did he testify and exhort them” (Acts, ii). We have here an abridgment of the first catechetical instruction given by the Apostles. It is both doctrinal and moral—the hearers are to believe and to repent. This twofold element is also contained in St. Peter’s second discourse after healing the lame cripple [Acts, iii, 6]. St. Stephen goes further, and brings out the belief in Jesus Christ (Messias) meant the ending of the Old Covenant and the coming in of a New (Acts, vi, vii). St. Philip the Deacon preached “of the kingdom of God, in the name of Jesus Christ”; and the Samaritans “were baptized, both men and women” (Acts, viii). Furthermore, St. Peter and St. John came from Jerusalem and “prayed for them, that they might receive the Holy Ghost”; and doubtestless declared to them the doctrine of that Holy Spirit (ibid.). The same deacon’s discourse to the eunuch deals with the proof from Scripture, and notably Isaias (ili, 7), that “Jesus Christ is the Son of God”, and the necessity of baptism. No mention is made of penance or repentance, as the eunuch was a just man anxious to do God’s will. So, too, Cornelius, “a religious man, and fearing God with all his house, giving much alms to the people, and always praying to God”, did not need oral religious instruction; accordingly St. Peter speaks to him of Jesus Christ who “is lord of all... Jesus of Nazareth: how God anointed him with the Holy Ghost, and with power, who went about doing good, and healing all that were oppressed by the devil, for God was with him. And we are witnesses of all things that he did in the land of the living, and in Jerusalem, whom they killed, hanging him upon a tree. Him God raised up the third day, and gave him to be made manifest... even to us who did eat and drink with him after he arose again from the dead; and he commanded us to preach to the people, and to testify that it is he who was appointed by God, to be judge of the living and of the dead. To him all the prophets give testimony, that by his name all receive remission of sins, who believe in him” (Acts, x). In this discourse we have the chief articles of the Creed: the Trinity (God, Jesus Christ “Lord of all things”, the Holy Ghost), the Crucifixion, Death, and Resurrection of Our Lord; His coming to judge the living and the dead, and the remission of sins. These are also the subjects of St. Paul’s discourses, as we have seen, and they could be taught in catechetical form. And even peasants at Lystra or philosophers at Athens, he deals with the fundamental truths of the existence and attributes of God (Acts, xiii, xiv, xvii). As he himself summed up the matter, he taught “publicly, and from house to house, testifying both to Jews and Gentiles penance towards God, and faith in [His] Lord Jesus Christ. Such an apostle as Peter was “instructed [καταγγέλω] in the way of the Lord”, Priscilla and Aquila “expostulated to him the way of the Lord more diligently” (Acts, xvi, xvi. —See Apostles’ Creed).

(2) The materials for describing the catechetical teaching of the ages immediately succeeding the Apostles are scanty. The books of the New Testament were the only scholars of the day who would be able to supplement these. Thus, in the Didache we find little but moral instruction; but it is clear that those to whom it is addressed must have already received some knowledge of what they were to believe. Later on we find more explicit dogmatic teaching, for instance, in St. Justin’s Apologies and in the works of the Church Fathers. It was the need for such materials that caused the Council of Carthage in the fourth century to condemn the Docetism, and the other extreme heresies, as not much more advanced than what we have seen above as taught by St. Peter, except that Justin dwells on the Creation and proves the Divinity of Christ, the Logos and only-begotten Son of the Father.

(4) In the ages of persecution it became necessary to exercise great caution in admitting persons to membership in the Church of June. No appeal or even of betrayal, must be guarded against a careful doctrinal and moral training. Hence the institution of the catechumenate and the Discipline of the Secret. The work of the Apostolus had been to remove prejudices against Christianity, and to set forth its doctrines and practices in such a way as to appeal to the reason. The next stage was, when the true religion was not at once admitted, as in the days of the Apostles. At first he was treated as an inquirer, and only the fundamental doctrines were communicated to him. As soon as he had given proof of his knowledge and fitness, he was admitted to the catechumenate proper, and was further instructed. After some years spent in this stage he was promoted to the ranks of the Compendes, i.e. those ready for baptism. As might be expected, he was now instructed more especially in the rites for this purpose. Even when he had been
initiated, his instruction was not yet at an end. During the week after Easter, while the grace of first fervour was still upon him, the various rites and mysteries in which he had just participated were more fully explained to him.

In considering the catechetical writings of the Fathers we must bear in mind the distinction of these different grades. When addressing a mere inquirer they would naturally be more guarded and less explicit than if they had to do with one who had passed through the catechumenate. Sometimes, indeed, the language was so chosen that it conveyed only half the truth to the catechumen, while the initiated could understand the whole. The distinction between the elementary and advanced instruction is noted by St. Paul: "As unto little ones in Christ. I gave you milk to drink, not meat; for you were not able as yet" (1 Cor. iii, 2). For our present purpose it will be best to take as typical examples of catechesis in the patristic times the works of St. Cyril of Jerusalem (315–386) and St. Augustine (354–430), merely noting by the way the work done by St. Ambrose (the instructor of St. Augustin) and St. Gregory of Nyssa ("The Catechetical Oration", ed. J. H. Strawley, 1903). We have from St. Cyril twenty-four catechetical discourses, forming together a complete course of moral and doctrinal instruction. In the first of these, called the "Procatechesis", he sets forth the grounds and efficacy of the grace of initiation into the Church. The "Catecheses" proper (numbered i to xviii) are divided into two groups: i-v, repeating the leading ideas of the "Procatechesis", and treating of sin and repentance, baptism, the principal doctrines of the Christian religion, and the nature and origin of faith; vi-xviii, setting forth, article by article, the baptismal Creed of the Church. The first of the eighteen discourses was intended for the comple- tente during Lent, in immediate preparation for reception into the Church. The remaining discourses (xix-xxiv), called the "Catecheses Mystagogiae", were delivered during Easter week to those who had been baptized at Easter; and these, though much shorter than the others, treated clearly and openly of baptism, confirmation, and the Holy Eucharist, the veil of secrecy being now removed. This is not the place to point out how completely in accord with Catholic teaching are the doctrines of St. Cyril (see CYRIL OF JERUSALEM; TRANSLATION), and what valuable information he gives of the details of the Liturgy in his day. In studying these "Catecheses" one cannot help being impressed with the care with which the teaching was intended for grown-up persons; hence they are not couched in the simple language which we have to use in our instructions to children. They resemble, rather, the instruction given to converts, for which purpose they are still of great use. The same remark applies to all the catechetical writings of the Fathers. St. Augustine's treatise "De Catechizandis Rudibus" forms a classic, unique and compact, in the history of catechizing. It is divided into twenty-seven chapters: i-xiv theory, xv-xxvii practice. This short work, written about the year 400, shows that the great Doctor did not disdain to devote most careful attention to the work of instructing those who wished to learn the rudiments of the Faith. It could be written only by him, whose experience of the difficulties of this task, and who had also pondered deeply on the best method of dealing with the different classes of converts. The deacon Deogratias, who had consulted Augustine on the subject, complained (as so many of us still do) of the weariness of going over the same old ground, and of his inability to put any fresh life into his instructions. St. Augustine begins by words of encouragement, pointing out that we must judge of our discourses not by their effect upon ourselves, but by their effect upon our hearers. The story may be familiar enough to us, who go on repeating it over and over again, but it is not so to those who are listening to it for the first time. Bearing this in mind, the catechist should put himself in the position of the hearer, and speak as though he were telling something new. Hilaritas, a bright and cheerful manner, must be one of the chief qualifications of an instructor; "God loveth a cheerful giver" applies to the giving of the word as well as to the giving of wealth. He should so speak that the hearer hearing should believe, believing should hope, and hoping should love (Quidquid narras ita narrar, ut ille cui loqueres audiendo creat, credendo speret, et sperans ammet, quia Hilaritas, "for it seldom, or rather never, happens that anyone wishes to become a Christian without being moved thereto by some fear of God". If he comes from some worldly motive he may be only pretending, though indeed a mere pretender may sometimes be turned into a genuine convert by our efforts. Hence, continues the holy Doctor, it is of great importance to ascertain the state of mind and the motives of those who come to us. If we are satisfied that they have received a Divine call, we have a good opening for instruction on the care of God for us. We should go briefly through the story of God's dealings with men, from the time when He made all things even to our own days; showing especially that the apostles and the divinely inspired writers lived by the fear of God. New a fulmination of the Old (in veteri testamento est occultatio novi, in novo testamento est manifestatio veteris). This is a theme developed at greater length in the "De Civitate Dei". After we have finished our story we should go on to excite hope in the resurrection of the body—a doctrine as much ridiculed in St. Augustine's day as it was in St. Paul's day, and as it is in our own time. There could be no greater encouragement to be given to the theme of the last judgment, the reward of the just, and the punishment of the wicked. The convert should be put on his guard against the dangers and difficulties in trying to lead a good life, especially those arising from scandals within as well as without the Church. Finally, he should be reminded that the grace of his conversion is not to be reckoned to his merits or to ours, but to the goodness of God. So far the saint has been speaking of persons of little or no education. In chap. viii he goes on to deal with those who are well educated, and are already acquainted with the Scriptures and other Christian writings. Such persons require briefer instruction, and this should be imparted in such a way as to bring it home to them that we are dealing with the truth of the Faith. Do not forget Augustine had in mind his own case, when he presented himself to be received into the Church by St. Ambrose. We note, too, the wisdom of this piece of advice, especially when we have to deal with Anglican converts. But though less instruction is needed in such cases, continues the holy Doctor, we may rightly inquire into the causes which have induced these persons to wish to become Christians; and in particular as to the books which have influenced them. If these are the Scriptures or other Catholic books we should praise and recommend them; but if these are heretical we should point out wherein they have distorted the true faith. Throughout our instruction we should speak with modesty, but also with authority, that he who hears us may have the grace to be converted rather for humility. Humility is also the principal virtue to be urged upon that intermediate class of converts who have received some education but not of the higher sort. These are disposed to scoff at Christian writings, and even at the Scriptures for their want of correctness of language. They should be shown that it is often with such an idea of correctness of language which is of importance; it is more profitable to listen to a true discourse than to one which is eloquent. The whole of this chapter should be taken to heart by many who join the Church nowadays. After dealing
with these different classes of inquirers, the saint devotes no less than five lengthy chapters (x to xiv) to the causes of weariness (the opposite of hilaritas) and the remedies for it. This portion is perhaps the most valuable of the whole treatise, at least from a practical point of view. Only the merest outline of St. Augustine’s advice as to the remedies can be given here. We must bring ourselves down to the level of the lowest of our hearers, even as Christ humbled Himself and took upon Himself “the form of a servant.” We must vary the subjects, and we must increase in earnestness of manner so as to move even the most hardened heart. Gradually we should reflect, as already pointed out, that the instruction, though not up to our ideal, may be exactly suited to our hearer and entirely fresh and new to him; in any case the experience may be useful as a trial to our humility. Other occupations may be pleasanter, but we cannot say that they are certainly more profitable; for duty should come first, and we should submit to God’s will and not try to make Him submit to ours. After laying down these precepts, St. Augustine goes on to give a short catechetical instruction as an example of what he has been inculcating. It is supposed to be addressed to an ordinary type of inquirer, neither grossly ignorant nor highly educated (xvi to xxv), and might well be used at the present time. The admirable way in which the saint brings out the prophetical and typical character of the Old-Testament narrative, and insinuates gradually all the articles of the Creed without seeming to reveal them, the sketch of Christ’s life and passion, and the doctrine of the Church and the sacraments are also noteworthy. The discourses are full of an earnest and instructive spirit. This short work has exercised the greatest influence on catechetics. In all ages of the Church it has been adopted as a textbook. (5) When all fear of persecution had passed away, and the empire had become almost entirely Christian, the necessity for a prolonged period of trial and instruction no longer existed. About the same time the fuller teaching on the subject of original sin, occasioned by the Pelagian heresy, gradually led to the administration of baptism to infants. In such cases instruction was, of course, impossible, though traces of it are still to be seen in the rite of infant baptism, where the godparents are put through a sort of catechism in the name of the child. As the child grew, it was taught its religion both at home and at the school. This instruction was necessarily much more simple than that formerly given to grown-up catechumens, and gradually came to be what we now understand by catechetical instruction. Meantime, however, the barbarian invaders were being brought into the Church, and in their case the instruction had to be of an elementary character. The missionaries had to go back to the methods of the Apostles and content themselves with exacting a renunciation of idolatry and a profession of belief in the great truths of Christianity. Such was the practice of St. Patrick in Ireland, St. Remigius among the Franks, St. Augustine in England, St. Boniface in Germany. We should bear in mind that in these ages religious instruction did not cease with baptism. Set sermons were rarer than in our time. We must think of the Instruction as the train of thought on the part of the preacher. We may take the practice among the Anglo-Saxons as typical of what was done in other countries. “Among the duties incumbent on the parish priest the first was to instruct his flock in the doctrines and duties of Christianity, and to extirpate from among them the lurking remains of paganism. . . . He was to explain his principal commandments; to take care that all could repeat and understand the Lord’s Prayer and the Creed; to expound in English on Sundays the portion of Scripture proper to the Mass of the day, and to preach, or, if he were unable to preach, to read at least from a book some lesson of instruction” (Lingard, “Anglo-Saxon Church,” i, iv). The laws enacted these duties will be found in Thorpe, “Ecclesiastical Institutes,” i, 378; ii, 33, 34, 84, 191. (6) It is the custom with non-Catholic writers to assert that during the Middle Ages, “the Ages of Faith”, religious instruction was entirely neglected, and that the Protestant Reformers were the first to restore the practice of the Early Church. In the “Dict. de théol.,” s. v. “Catéchisme,” and in Bareille, “Le Catéchisme Romain,” Introd., pp. 36 sqq., will be found a long list of reasons to support these assertions. We must here content ourselves with stating what was done in England. Abbot Gasquet has thoroughly gone into the subject, and declares that “in pre-Reformation days the people were well instructed in their faith by priests who faithfully discharged their plain duty in their regard” (Old English Bible and other Essays, p. 180). In proof of this he quotes the constitutions of John Peckham, Archbishop of Canterbury (1281), in which it is enjoined that every priest shall explain to his people in English, and without any elaborate subtilties (vulgariter absque cujuslibet subtilitatis textur fantastici), four times a year, the Creed, the Ten Commandments, the two precepts of the Gospel (viz. love of God and man), the seven deadly sins, the seven virtues (the three theological virtues of faith, hope, and charity, and the cardinal), and the seven sacraments. In these constitutions is contained a brief instruction on all these heads, “lest anyone should excuse himself on the ground of ignorance of these things which all the ministers of the Church are bound to know”. This legislation, after all, was nothing but an insisting on a procedure that had been going on for a long time already. Moreover, it is constantly referred to in subsequent synods and in countless catechetical writings. One of Peckham’s predecessors, St. Edmund Rich (1234-1240), was not only a man of great learning, but also a zealous teacher of Christian doctrine among the people. He wrote familiar instructions on prayer, the seven deadly sins, the Commandments, and the sacraments. Cardinal Thoresby, Archbishop of York, published in 1357 a catechism in Latin and English, the “Lay Folks Catechism”, for the purpose of carrying out Peckham’s Constitutions, and it is based on Peckham’s instruction. The two, with the English translation in rude verse, have been reprinted by the Early English Text Society, No. 118. In the episcopal Register of St. Albans, we find orders to the bishops concerning whether their pastor fulfilled his duties, and they constantly answer that they are taught bene et optime. Chaucer’s Poor Parson may be taken as a type:—

But riche he was of holy thought and work.

He was also a lerned man, a clerk,

That Christes Gospell trewly wolde preche,

His parichens devoutly wolde he teche.

He taketh the practise to have stande on the sacrement of Penance. As regards catechetical manuals we need only mention the “Pars Ocelli Sacrdotis” (about the middle of the fourteenth century) which was very popular; “Pupilla Ocelli”, by John de Burgo (1385); “Speculum Christiani”; by John Wotton, containing simple English rhymes as well as the Latin text. “One of the earliest books ever issued from an English press was this book, written in the vernacular, and published, as they expressly declare, to enable priests to fulfill the obligation imposed on them by the Constitutions of Peckham” (Gasquet, op. cit., p. 191). The part which pictures, statues, relics, pageants, and especially miracle plays took in the religious instruction of the people must not be forgotten. All of these give proof of an extensive knowledge of sacred history and an astonishing skill in conveying doctrinal and moral lessons. It is enough to refer to Ruskin’s “Bible of Amiens”, and to the Townley, Chester, and Coventry miracle plays. (Cf. Bareille, op. cit., pp. 42 sqq.)
(7) The invention of printing and the revival of learning naturally had great influence on catechetical instruction. The first great work of this kind was, however, written in Latin, though indeed it belongs to a slightly earlier period, is that of John Gerson (1363–1429). He realized that the much-needed reform of the Church should begin by the instruction of the young; and though he was chancellor of the University of Paris he devoted himself to this work. He composed a sort of little catechism entitled "Te Deum" and the "Responsio" in order to enable the clergy to catechize. He also composed the "Opus Tripartitum de Preceptis Decalogi, de Confessione, et de Arte bene Moriendi," in which he briefly explained the Creed, the Commandments of God, the sins to be mentioned in confession, and the art of dying well.

This was printed many times and was translated into French. It was the forerunner of the Catechism of the Council of Trent. In the year 1570, before Luther was born, a German catechism, "Christenspiegel" (the Christian's Mirror), written by Dederich, was printed, and at once became very popular. Two other catechisms, "The Soul's Guide," and "The Consolation of the Soul," were printed a little later and issued in many editions. In Janssen's great "History of the Catechisms," it is stated that a German catechism was issued in 1529, and speedily ran through a number of editions; it is still used in Germany and in other Protestant countries.

In 1536 Calvin composed a catechism in French: "Le formulaire d'instruire les enfants en la christienté, fait en manière de dialogue où le ministre interroge et l'enfant répond." He candidly admits that it was written for the Church to instruct children in this way. Of course he takes care to introduce the chief points of his heresy: the certainty of salvation, the impossibility of losing justice (righteousness), and the justification of children independently of baptism. It is noteworthy that as regards the Eucharist he teaches that we receive not merely a sign, but Jesus Christ Himself. He further emphasizes the moral importance of the Commandments.

In England the first Book of Common Prayer (1549) contained a catechism with a brief explanation of the Commandments and the Lord's Prayer. The explanation of the sacraments was not added until the year 1604. If this catechism be compared with that of Cardinal Thuresby, mentioned above, it will be seen that the instruction given to Protestant children in the middle of the sixteenth century was far inferior to that given in pre-Reformation days. In 1647 the Westminster Assembly of Divines drew up the Presbyterian "Larger" and "Smaller" Catechisms.

On the Catholic side Bl. Peter Canisius published three catechisms, or rather one catechism in three forms: major (1555), minor (1558), and minus (1561). Taking the form "B C of Simple Folk," he divides his treatment into two great parts: wisdom and justice. In the first he deals with Faith (the Creed), Hope (the Lord's Prayer and the Hail Mary), Charity (the Commandments).

In the second he deals with avoiding evil (sin and the remission of sin) and doing good (prayer, fasting and almsgiving, the cardinal virtues, the gifts and fruits of the Holy Ghost, the beatitudes, the evangelical counsels, and the Four Last Things). To obtain and to preserve both wisdom and justice the sacraments are necessary, and hence he places the treatment of the sacraments between the two parts. After the Council of Trent (1563) Canisius added a chapter on the Fall and Justification. The form of the three books is that of questions and answers, some of the latter being as long as four or five pages. In striking contrast to the Protestant catechisms, these are written in a calm, and there is an absence of controversial bitterness. The success of Canisius' catechisms was enormous. They were translated into every language in Europe, and were reprinted in many hundreds of editions, so that the name Canisius came to be synonymous with Catechism (Bareille, op. cit., p. 61).

The Catechism of the Council of Trent (Catechismus Romanus) is not a catechism in the ordinary sense of the word. It is rather a manual of instruction for the clergy (Catechismus ad Parochos) to enable them to catechize those entrusted to their spiritual care. The fathers of the council "deemed it of the utmost importance that a work should appear, sanctioned by the authority of the Holy Synod, from which a parish priest and all others on whom the duty of imparting instruction devolves may be able to seek and derive certain precepts for the edification of the faithful; that as there is 'one Lord one Faith' so also there may be one common rule and prescribed form of delivering the faith, and instructing the Christian people unto all the duties of piety' (Pref., viii).

The composition of the Catechism of Trent was the result of a council of 426 theologians (two of them archbishops and one a bishop) under the supervision of three cardinals. St. Charles Borromeo was the presiding spirit. The original draft was turned into elegant Latin by Pogiamus and Manutius, and this version was translated by command of the pope (St. Pius V) into Italian, French, German, and Polish. Brought out under such conditions (1566), the authority of this catechism is higher than that of any other, but is, of course, not on a level with that of the canons and decrees of a council. As to its value Cardinal Newman's estimate may be gathered from these words: "I rarely preach a sermon, but I go to this beautiful and complete Catechism to get both my matter and my doctrine" (Apologia, p. 425).

Cardinal Bellarmine's Catechism was ordered by Clement VIII to be used in the Papal States, and was recommended for use throughout the world. It appeared in two forms: "Dottrina Cristiana Breve" (1597) and "Dichiarazione più Copiosa della Dottrina Cristiana" (1598). The first is for scholars, the second for teachers; in the first the teacher asks the questions and in the second the schoolboy supplies the answers. The order is reversed. The first, which is meant to be learnt by heart, contains eleven chapters and ninety-five questions, and is arranged in the following order: the Calling of the Christian and the Sign of the Cross; the Creed, the Lord's Prayer, and the Hail Mary; the Commandments of God, the Commandments of the Church, and the Counsels; the Sacraments, the Theological and Cardinal Virtues, the Gifts of the Holy Ghost, the Works of Mercy, Sins, the Last Things, and the Rosary. It is an improvement on Canisius' catechisms, and hence it was recommended at the Vatican Council to serve as a model for the projected universal catechism.

The first catechism in English after the Reformation was "A Catechisme or Christian Doctrine necessarie for Christiane Men" compiled by Laurence Vaux, Bachelor of Divinity", 1st ed., 1567; reprinted 1574, 1583 (twice), 1599, 1605, 1610.

This has been reprinted for the Chetham Society, new series, vol. IV, Manchester, 1853. Next came a small volume, "A Briefe Instruction by way of Dialogue concerning the principal pontyes of Christian religion gathered out of the Holy Scriptures, Fathers and Counsels." By the Reverend M. George Douyle, Priest. Imprinted at Louvaine by Laureunce Kellan, anno 1604."

"A Shorte Catechisme of Cardill. Bellarmine illustrated with Images. In August, 1614; A briefe Christian Doctrine to be lerned by heart;" "A Summe of Christian Doctrine composed in Latin by Father Petrus Canisius of the Society of Jesus with an
Appendix of the Fall of Man and Justification. Translated into English [by Fr. Garnet?] at St. Omers for John Heigham. With permission of Superiors: 1622?; "A Catechism of Christian Doctrine in fifteen Conferences. Paris: 1637", 2nd ed., 1659. The author was Thomas White, alias Blacklow, of Lisbon and Douai. The most important, however, was the book which came to be known as "The Doway Catechism", "A Catechism in the Doctrine of Scripture for points controverted. Catechetically explained by way of question and answer", printed at Douai, 1st ed., 1649; again 1661, and so constantly. The last editions mentioned by Gillow are London, 1793, and Dublin, 1828; the author was Henry Turberville, a Douai priest. There was also a smaller edition, "In Alphabet of the Doway Catechism. For the use of children and ignorant people. London, printed in the year 1688"; it was reprinted many times, and continued in use until the Douai students came to England. In 1625, the Franciscan Florence O'Conry published an Irish catechism at Louvain, entitled "Mirror of a Christian Life". This, like the catechisms of H'russey (Louvain, 1608) and Stapleton (Brussels, 1637) was a small Irish catechism serving in the Netherlands. In the same century another member of the Franciscan order, Father Francis Molloy, a native of the County Meath, Ireland, and at the time professor of theology in St. Isidore's College, Rome, published a catechism in Irish under the title "Lucerna Fidelium" (Rome, Propaganda Press, 1676). We should also mention Andrew Donlevy's "The Catholic Catechism from the Scripture" (Dublin, 1742), translated into Irish and answer, Paris, 1742?. This was in English and Irish on opposite pages. "The Poor Man's Catechism or the Christian Doctrine explained with short admonitions", 1st ed., 1732; it was edited by the Rev. George Bishop. The author's name does not appear, but a later work tells us that he was: "The Poor Man's Controversy, By J. Mannock, O. S. B., the author of the Poor Man's Catechism, 1769" by Dr. James Butler, Archbishop of Cashel, published his catechism in 1775, and it was soon adopted by many Irish bishops for their dioceses. An account of it was given by Archbishop Walsh in the "Irish Eccel. Record?", Jan., 1892. In 1737 Bishop Challoner published "The Catholic Christian instructed in the Sacraments, Sacrifice, Ceremonies, and Observances of the Church, by questions and answers. By C. Lowren 1737." There is also "An Abridgement of Christian Doctrine with a short Daily Exercise", "corrected by the late Bp. Challoner", 1783. Bishop Hay's admirable works: "The Sincere Christian instructed in the Faith of Christ from the Written Word" (1781); "The Devout Christian instructed in the Faith of Christ" (1783); and "The Pious Christian catechisms on a large scale in the form of question and answer. During the eighteenth century catechetical instruction received a fresh impulse from Pope Benedict XII, who issued (1725) three ordinances prescribing in detail the methods: division into small classes and special preparation for confession and Communion. Against the rationalistic tendencies in the pedagogical movement of the century, Clement XIII in his "Reroricae praetexta" (1766); M. J. Schmidt, "Katechisten", and J. I. von Felbiger, "Vorlesungen über die Kunst zu katechisieren" (Vienna, 1774). In France, during the same century, great activity was shown, especially by the bishops, in publishing catechisms. Each diocese had its own textbook, but though occasional attempts were made at uniformity, they were not successful. Several catechisms composed by individual writers other than the bishops were put on the Index (see Migne, "Catechismes", Paris, 1842). The French original of "An Abridgment of the Quebeque Catechism" (Quebec, 1817) appeared in Paris (1792) and Quebec (1782).

The pedagogical activity of the nineteenth century abundantly exerted an influence upon religious instruction. German writers of the first rank were Overbeck (d. 1826), Sailer (d. 1832), Gruber (d. 1835), and Hirscher (d. 1865), all of whom advocated the psycho-logical method and the careful preparation of teachers, Deharbe's "Catechism" (1847) was translated between 1853 and 1860 into thirteen languages, and his "Erklärungen des Katechismus" (1857-61) has passed through numerous editions. In France, Napoleon (1806) imposed upon all the churches of the empire uniformity in the matter of catechisms and, in spite of the opposition of Pius VII, published the "Imperial Catechism", containing a chapter on duties towards the emperor. This was replaced after the fall of the empire by a large number of diocesan catechisms which again led to the production of further uniformity. Duplan-loup, one of the foremost writers of these catechisms, persued his "Catéchisme chrétien" in 1865. At the time of the Vatican Council (1869-1870) the question of having a single universal catechism was discussed. There was great diversity of opinion among the Fathers, and consequently the discussion led to no result (see Martin, "Les travaux du concile du Vatican", pp. 114-115). The question of uniformity will be examined when we come to speak of catechisms in the third part of this article. The most important event in the recent history of catechetics has been the publication of the Encyclical "Acerbo nimis" on the teaching of Christian doctrine (15 April, 1905). In this document Pius X attributes the present religious crisis to the widespread ignorance of Divine truth, and lays down strict regulations concerning the duty of catechizing (see below). For the purpose of discussing the best methods of carrying out these orders a number of catechetical congresses have been held: e. g., at Munich, 1903 and 1907; Vienna, 1905 and 1908; Salzburg, 1906; Lucerne, 1907; Paris, 1908, etc. At these gatherings scientific, yet practical, lectures were delivered; and decrees were drawn up for catechizing in school, and an interesting feature was the exhibition of the best literature and appliances. Two periodicals have likewise appeared: "Katechetische Blätter" (Munich) and "Christlich-pädagogische Blätter" (Vienna).

In the United States, the few priests who in the early days toiled in this vast field were so overburdened with work that they could not reproduce original textbooks for religious instruction; they ceased to be reprinted, with slight alterations, books commonly used in Europe. Others were composed in the manner described by Dr. England, first Bishop of Charleston, who, in 1821, published a catechism which, he writes, "I had much labor in compiling from various others, and adding several parts which I considered necessary to be explicitly dealt with under the several heads of piety."

The first to edit a catechism, so far as is known, was the Jesuit Father Robert Molyneux, an Englishman by birth and a man of extensive learning, who, till 1809, laboured among the Catholics in Maryland and Pennsylvania. Copies of this work are not known to exist now, but, in letters to Bishop Carroll of Baltimore, Father Molyneux mentions two catechisms which he issued—one in 1785, "a spelling primer for children with a Catholic catechism annexed". In 1788 a catechism was published in New York which in all likelihood was a reprint of "Butler's Catechism" mentioned above. Bishop Hay's "Abridgment of Christian Doctrine" (152 pp.) appeared in Philadelphia in 1800; another edition (145 pp.) in 1803,
and one with some alterations in the language in Baltimore in 1809 (108 pp.). Many editions were published of the catechism entitled "A Short Abridgment of Christian Doctrine, Newly Revised for the Use of the Catholic Church in the United States of America". The size of these small catechisms is from 36 to 46 pages. One edition, with title page torn, bears on the last page the record: "Bought September 14, 1794". The Philadelphia edition of 1796 is styled the thirteenth edition; that of Baltimore, 1798, the fourteenth. Whether all these editions were printed in America, or some of the earlier ones in Europe, cannot be ascertained.

This "Short Abridgement of Christian Doctrine", approved by Archbishop Carroll, was generally used throughout the United States until about 1821. In that year Bishop England published his catechism for his own diocese, and in 1825 appeared the "Catechism of the Diocese of Bardstown" recommended as a class-book by Bishop Flaget of Bardstown, Kentucky. The author of the latter catechism was Jean-Baptiste Flaget, coadjutor of Bishop Flaget. It comprised the "First or Small Catechism for Little Children" (13 pp.), and the "Second Catechism" (149 pp.). The English was criticized by Archbishop Maréchal and others. Still more defective and inexact in language was the "Catechism of the Instruction of Children" published in Philadelphia, as "revised by the Right Rev. James Doyle and prescribed by him for the united dioceses of Kildare and Leighlin" (Ireland). In the New England States the "Boston Catechism" was used for a long time, the "Short Abridgement of Christian Doctrine", newly revised and augmented and authorized by Bishop Fenwick of Boston. But the catechisms which were used most exclusively during several decades were Butler's "Larger Catechism" and "Abridged Catechism". In 1788 Samuel Campbell, New York, published "A Catechism for the Instruction of Children. The Seventh Edition with Additions, Revised and Corrected by the Author". This seems to be the first American edition of Butler's Catechism; for Dr. Roy, Bishop of Ossory, wrote some portions of Butler's Catechism; and, in 1838, the "Larger Catechism" of Father Hattenberger, the Smaller and the Larger Catechism of the Jesuit missionary, Father Weninger (1865); and the three graded catechisms of the Redemptorist Father Müller (1874). Far more extensively used than these was the English translation of Deharbe. From 1809 numerous editions of the small, medium, and large catechisms with various modifications, were published in the United States. An entirely new and much improved edition was issued in New York in 1901.

Repeated efforts have been made in the United States towards an arrangement by which a uniform textbook of Christian Doctrine might be used by all Catholics. As early as 1829, the bishops assembled in the First Provincial Council of Baltimore decreed: "A catechism should be written which is better adapted to the circumstances of this Province; it shall give the Christian Doctrine as explained in Cardinal Bellarmine's Catechism, and when approved by the Holy See, it shall be published for the common use of Catholics" (Deer, xxxiii). The clause recommending Bellarmine's Catechism as a model was added at the special request of the Congregation of Propaganda. It may be mentioned here that Bellarmine's "Small Catechism", Italian text with English translation, was published at Boston, in 1853. The wish of the bishops was not carried out, and the First and Second Plenary Councils of Baltimore (1852 and 1866) repeated the decree of 1829. In the Third Plenary Council (1854) many bishops were in favour of a "revised" edition of Butler's Catechism, but finally the mark was given to the hands of six bishops. At last, in 1855, was issued "A Catechism of Christian Doctrine, Prepared and Enjoined by Order of the Third Council of Baltimore". Although the council had desired a catechism "perfect in every respect" (Acta et Deer, p. 210), theologians and teachers criticized several points (Nilles, "Commentaria", II, 265, 188). Soon various editions came forth with additions of word-meanings, explanatory notes, some even with different arrangements, so that there is now a considerable diversity in the books that go by the name of Catechism of the Council of Baltimore. Besides, in recent years several new catechisms have been published, "one or two a decided improvement over the Council Catechism" (Messmer, "Spirago's Catechism", p. 18). Among the two of Father Faerber, the large and small catechisms of Father Groenings, S. J., and the "Holy Family Series of Catholic Catechisms", by Francis II. Butler, of the Diocese of Boston (1902). The three graded catechisms of this series give on the left page the questions and answers, on the right a "Reading Lesson", dealing with fuller, and sometimes with different, matters contained in the questions and answers. Some very practical features (reading part, followed by questions and answers, appropriate hymns, and pictorial illustrations) mark the "Text-books of Religion for Parochial and Sunday Schools", edited since 1898 by Father Yorke. These last two series to some extent depart from the traditional method and indicate a new movement in catechetical teaching. A more radical change in the style of the catechism, namely the complete abandonment of the question-and-answer method, has recently been proposed (see below, under II and III of this article, and "Am. Ecol. Rev."., 1907; Jan. and Feb., 1908). The First Plenary Council of Baltimore (1852) appointed Bishop Neumann to write, or revise, a Catechism, and to demand approbation by the archbishop and all the German-speaking bishops, should be obligatory. This decree shared the fate of the council's demand for a uniform English catechism. The Third Plenary Council (1854) decreed that the catechism to be issued by its order should be translated into the languages of those parishes in which religious instruction is given in any other than the English tongue. But the translation of the council catechism met with little favour. Another regulation, however, contained in the same decree of the council (ccxix), was gradually carried into effect. The bishops assembled expressed an earnest desire that in schools where English was not used the Christian Doctrine should be taught not only in the foreign tongue they used, but also in the language of the people in that town as a wise provision. For the young people of the second or third generation find it difficult to understand the native language of their parents; hearing discussions or attacks on their religion, they are hardly able to answer if they have not learnt the catechism in English. Moreover, after leaving school many young people have to live among English-speaking people, in places where there is no congregation of their own nationality; if they have not been taught religion in English they are tempted not to attend sermons, they feel embarrassed in going to confession, and thus may gradually drift away from the Church. In order to obviate these dangers, various catechisms (Deharbe,
Faerber, Groenings, etc.) have been published with German and English texts on opposite pages. Similarly, there are Polish-English, Bohemian-English, and other editions with double text. In most Italian schools catechism is taught chiefly in English, and only the prayers in Italian. Unwise as it would be to force a change of languages in catechetical teaching, it would be equally injudicious to artificially retard the natural development. The slow but steady tendency is towards the gradual adoption of the English language in preaching and teaching catechism, and it seems but reasonable to think that some day there will be among the Catholics in the United States not only unity in faith in the substance of the catechism, but also in its external form and language.

A number of German immigrants entered Pennsylvania about 1700, a considerable portion of them being Catholics. In 1759 the German Catholics in Philadelphia outnumbered those of the English tongue, and in 1789 they opened the church of the Holy Trinity, the first exclusively national church in the United States. Since 1711 German Jesuits have ministered to the spiritual needs of their countrymen, and Catholic settlements were established by the German parishes. It was natural that the German Jesuits should introduce the Catechism of Canisius, which for centuries had been universally used throughout Germany. The best known American edition of this famous catechism is that printed in Philadelphia, in 1810: "Catholischer Catechismus, worin die Catholische Lehre nach den fünf Hauptsätzen V. der P. Canisii, und der Lehre nach C. J. E. Tüngendorf." The editor or editor of this book was AdamBritt, pastor of the Holy Trinity Church, Philadelphia, who died at Cornwaga (1822) as a member of the Society of Jesus. During several decades the Catechism of Canisius was generally used by the German Catholics in the United States. The Redemptorists came to this country in 1823, and a Catechism of Canisius was introduced for use in nearly all the important cities. The Venerable John N. Neumann, afterwards Bishop of Philadelphia, wrote, while rector of the Redemptorist house at Pittsburg, about the year 1845, a small and a large catechism. These texts, also known as the "Redemptorist Catechisms," had a wide circulation, whereas those written later by Father Weninger, S. J., and Father Pless were relatively unknown. The second half of the nineteenth century may be called the era of Deharme's Catechism. In 1850 the "Katholischer Katechismus der Lehrbegriffe" was issued in Cincinnati, which by this time had become a centre of German Catholic population with flourishing parochial schools. Bishop Purcell declared in the approbation that the German catechisms previously published were not to be reprinted, but that this "Regensburg [Ratisbon] Catechism, long in use in Germany," was to be the only one in his diocese. Although the name of the author was not given, it was in reality Father Deharmer's "Large Catechism." Since that time numerous editions of the different catechisms of Deharmer appeared with various adaptations and many additions. For several years Deharmer reigned supreme. This supremacy has been challenged within the last two decades. Father Muller, C. S. R., in the preface to his catechism, severely criticized Deharmer's as a book "which it is difficult for children to learn and to understand." Father Faerber, who devoted forty years to catechetical instruction, produced in 1895 a textbook which commended Deharmer in its simplicity and clearness, although the critics, who charged it with incompleteness and a certain lack of accuracy, were not altogether wrong. Almost simultaneously with Father Faerber's book appeared an excellent, thoroughly revised, edition of Deharmer's texts, from which many defects had been expunged. Finally, in 1900, Father Groenings, S. J., published two catechisms, a small and a large one.

Development of Catechizing after the Council of Trent.—Mindful that the work of catechizing was more important than the issue of catechisms, the Council of Trent decreed that "the bishops shall take care that at least on the Lord's day and other festivals the children in every parish be carefully taught the rudiments of the faith and obedience to God and their parents" (Sess. IV, De Refe, c. iv.). In 1560 the Confederation of Christian Doctrine was founded in Rome by a Milanesian, and was approved by St. Pius V in 1571. St. Charles Borromeo in his provincial synods laid down excellent rules on catechizing; every Christian was to know the Lord's Prayer, the Hail Mary, the Creed, and the Ten Commandments; confessors were ordered to examine their penitents as to their knowledge of these formulaires (V Proc. Concil., 1579). He also established schools in the villages, in addition to increasing the number in the towns. Besides the renewed activity of the older orders, the Jesuits, the Barnabites, and the Clerks Regular of Pious Schools (Fiarists), who devoted themselves to the education of the young, took special care of the religious instruction of those entrusted to them. In this connexion the Jesuits were named the "first in the village.

of Catechetics. The missions of Deharmer and other religious were conducted by Father Vincent de Paul, St. Francis de Sales, and M. Olier. One of St. Francis's first acts as a bishop was to organize catechetical instruction throughout his diocese, and he himself took his turn with his canons in this holy work. St. Vincent founded his congregation of Priests of the Mission for the purpose of instructing the poor, especially in the villages. The missionaries were to teach the catechism twice a day during such mission. In his own parish of Chatillon he established the Confraternity for the Assistance of the Poor, and one of the duties of the members was to instruct as well as to give material aid. So, too, the Sisters of Charity not only took care of the sick and the poor but also taught the children. M. Olier, both in the missionary and the parochial ministry, placed a special stress on the work of catechizing. The method which he introduced will be described in the second part of this article. The Brothers of the Christian Schools, founded by St. Jean-Baptiste de la Salle, devoted themselves especially to religious as well as secular instruction. Finding that the very poor were unable to attend school, he founded in 1682 the "Petits Frères" who introduced secular lessons on Sundays. This was in 1699, nearly a century before such teaching was given in Protestant England.

II. Practical Catechetics.—Catechizing (catechism), as we have seen, is instruction which is at once religious, elementary, and oral.

Catechizing is a religious work not simply because it treats of religious subjects, but because its end or object is religious. The teacher should endeavour to influence the child's heart and will, and not be content with putting a certain amount of religious knowledge into its head; for, as Aristotle would say, the end of catechizing is not knowledge, but practice. Knowledge, indeed, there must be, and the more of it the better in the course of instruction; but it must lead to action. Both teacher and child must realize that they are engaged in a religious work, and not in one of the ordinary lessons of the day. It is the neglect to realize this that is responsible for the little effect produced by long and elaborate teaching. Religious knowledge comes to be looked upon by the child merely as a branch of other knowledge, and therefore as something to be done with conduct as the study of vulgar fractions. "When the child is fighting its way through the temptations of the world, it will have to draw far more largely on its stock of piety than on its stock of knowledge" (Furniss, "Sunday School or Catechism?"). "The work of a teacher in the Church will be directed chiefly to this, that the faithful earnestly desire 'to know Jesus Christ and Him crucified,' and that they be firmly convinced and with
the innermost piety and devotion of heart believe, that 'there is no other name under heaven given to men whereby we must be saved', for 'He is the propitiation for our sins'. But as in this we do know that we have known Him, if 'we keep His commandments', the next consideration and one intimately connected with the foregoing, is to show that life is not to be spent in ease and sloth, but that we 'ought to walk even as He walked', and with all earnestness 'justice, godliness, faith, charity, meekness'; for He 'gave Himself for us that He might redeem us from all iniquity, and purify unto Himself a people acceptable, pursuing good works'; which things the Apostle commands pastors to 'speak and exhort'. But as our Lord and Saviour has not only declared, but has also shown by His example and performed, Prophecies depend on love, and as also, according to the confirmation of the Apostle, 'the end of the commandments and the fulfilment of the Law is charity, no one can doubt that this, as a paramount duty, should be attended to with the utmost assiduity, that the faithful people be excited to a love of the infinite goodness of God towards us; that, inflamed with a sort of divine ardor, they may more powerfully strive to make preme and all-perfect good, to adhere to which is solid happiness' (Catech. of the Council of Trent, Pref., x).

The persons concerned in catechizing (teachers and taught) and the times and places for catechizing can hardly be treated apart. But it will be best to begin with the persons. The duty of providing suitable religious instruction for those who have not the care of souls is that of all parents. They may fulfill either by teaching them themselves or by entrusting them to others. Next to the natural parents the godparents have this duty. The parish priest should remind both the parents and godparents of their obligation; and he, too, as the spiritual father of those entrusted to his care, is bound to instruct them. In Pius X's Encyclical Letter on the teaching of Christian doctrine it is enacted "(1) that all parish priests, and in general, all those entrusted with the care of souls, shall on every Sunday and feast day throughout the year, without exception, give boys and girls an hour's instruction from the catechism on those things which every one must believe and do in order to be saved; (2) at stated times during the school year, give boys and girls by commissioned instruction, lasting several days, to receive the sacraments of penance and confirmation; (3) they shall likewise and with special care on all the weekdays in Lent, and if necessary on other days after the feast of Easter, prepare boys and girls by suitable instruction and exhortations to make their first Communion in a holy manner; (4) in each and every parish the society, commonly called the Confraternity of Christian Doctrine, shall be canonically erected; through this the parish priests, especially in the places where there is a scarcity of priests, will have lay helpers for the catechetical instruction in pious lay persons who will devote themselves to the office of teaching." In countries where there are Catholic schools religious instruction is given to children in the schools. As well known, for the sake of this privilege the faithful have contributed enormous sums of money to build and support schools. Where this is the case the difficulty is only a financial one. Nevertheless, the First Provincial Council of Westminster warns the pastor not to make over this duty of catechizing "so far to others, howsoever well conducted, as to not visit the schools frequently and instill into the tender minds of youth the principles of true faith and piety". We see, then, that the work of giving religious instruction belongs to the parents, to priests with the care of souls, to the teachers in Catholic schools, and to other lay helpers. Turning now to those who are taught, we may consider first the young and then those who are grown up. The young may be divided into those who are receiving elementary education (primary scholars) and those who are more advanced (secondary scholars). Although in many dioceses the scholars are arranged in classes corresponding to the secular classes, we may consider them for our present purpose as divided into three groups: those who have not been to confession; those who have been to confession but have not made their first Communion; and those who have made their first Communion. In the case of the first group the instruction must be of the most rudimentary kind; but, as already pointed out, this does not mean that the little ones should be taught nothing except the first part of some catechism; they should have the Creed and the Commandments, the Our Father and the Hail Mary taught to them, and an explanation of laws, the sinfulness of sin by the Sacraments of Baptism and Penance. The principal events in the life of Christ will be found to be an ever-interesting subject for them. How far it is wise to talk to them about Creation and the Fall, the Deluge and the stories of the early patriarchs, may be a matter of discussion among teachers. In any case great care should be taken not to give their minds to such matters as are intended to be discarded. "It is of importance at this stage to tell the children in the simplest language something about the services of the Church, for they are now beginning to be present at these. Any one who has charge of them there, or, better still, who will recall his own early memories, will understand what a hardship it is to a young child to be told about the service of the Church." The second group (those preparing for first Communion) will of course be able to receive more advanced instruction in each of the four branches mentioned above, with special reference to the Holy Eucharist. In instructing both groups the subjects should be taught dogmatically, that is, authoritatively, appealing rather to the children's faith than to their reasoning powers. The first communion instruction of the elementary scholars will be almost similar to the instruction given to younger secondary scholars, and will consist in imparting wider and deeper knowledge and insisting more upon proofs. When they grow up their difficulty will be not only the observance of the law, but the reason of it. They will ask not only what must they do but why do they have to do it. Hence the importance of thorough instruction in the authority of the Church, Scripture texts, and also appeals to right reason. This brings us to the subject of catechizing grown-up persons. Pius X goes on to speak of this matter, after laying down the regulations for the young: "In these days adults not less than the young stand in need of religious instruction. All parish priests, and others having the care of souls, in addition to the homily on the Gospel delivered at the parochial Mass on all days of obligation, shall explain the catechism for the faithful in an easy style, suited to the intelligence of their hearers, at such time of the day as they may deem most convenient for the people, but not during the hour in which children have their catechism. The aforementioned scholars shall make use of the Catechism of the Council of Trent, and they shall so order it that the whole matter of the Creed, the Sacraments, the Decalogue, the Lord's Prayer, and the Precepts of the Church shall be treated in the space of four or five years." The subjects to be treated of are laid down by Pius X: "As the things divinely revealed are so many and so various that it is not easy to find either to acquire a knowledge of them or, having acquired that knowledge, to retain them in the memory, . . . our predecessors have very wisely reduced this whole force and scheme of saving doctrine to these four distinct heads: the Apostles' Creed; the Sacraments; the Ten Commandments; and the Lord's Prayer. In the doctrine of the Creed the contents are all things which are to be held according to the discipline of the Christian Faith,
whether they regard the knowledge of God, or the creation and government of the world, or the redemption of the whole creature, the chief proclamations of the good and the punishments of the wicked. The doctrine of the Seven Sacraments comprehends the signs and as it were the instruments for obtaining divine grace. In the Decalogue is laid down whatever has reference to the Law, "the end thereof is charity." Finally, in the Lord's Prayer is contained whatever can be desired, hoped, or solicitarily prayed for by men. It follows that the two great components of the good and Sacred Scripture being explained, there can scarcely be wanting anything to be learned by a Christian man" (ib., xii). It must be borne in mind that catechetical instruction should be elementary; but this of course is a relative term, according as the pupil is an adult or a child. This difference has been dealt with above in speaking of the persons concerned in catechizing. It may be pointed out here, however, that elementary knowledge is not the same as partial knowledge. Even young children should be taught something of each of the four divisions mentioned above, viz., that they have to believe in God and to do God's will, and to obtain His grace by means of prayer and the sacraments. Further instruction will take up the evils committed by the faith sides what is ordinarily understood by Christian doctrine, catechizing should treat of Christian history and Christian worship. Christian history will include the story of the Old Testament, the New Testament, and the Church. Christian worship will include the Church's calendar (the feasts and fasts) and her services and devotions. These three doctrines, history, and worship are not altogether distinct, and may often be best taught together. For example, the second article of the Creed should be taught in such a way as to bring out the doctrine of the Incarnation, the beautiful story of Christ's birth and childhood, and the meaning and the services of Advent and Christmas. The Bible history and the history of the Church will afford countless instances bearing on the various doctrines and heresies of the doctrinal part of the catechism, and the virtues and contrary views of the practical part.

The question of catechetical methods is difficult and has given rise to much controversy. Father Furniss long ago, in his "Sunday School or Catechism?" and Bishop Bellord later on, in his "Religious Education and its Failures," passed a wholesale condemnation on the catechizing, and oriented and the fault away of so many Catholics from the Faith. "The chief cause of the 'leakage' is the imperfection of our systems of religious instruction. Those methods seem to be antiquated, injudicious, wasteful, sometimes positively injurious to the cause." (Bp. Bellord, op. cit., p. 7). Part of the blame is laid upon catechizing, and part upon the catechisms. Of the latter we shall speak presently. Again, the blame is twofold and is not altogether consistent. The children are declared not to know their religion, or, knowing it quite well, not to put it into practice. In either case they are of course lost to the Church when they grow up. Both the bishop and the Redemptorist complain that religious instruction is made a task, and so fails either to be learned, or at least to remain in the mind in such a way as to become hateful to the child and to have no bearing on his conduct in after-life. Both are especially severe on the attempt to make the children learn by heart. The bishop quotes a number of experienced missionary priests who share his views. It seems to us that, in considering the methods of catechizing, we have to bear in mind two very different sets of conditions. Some are concerned with the catechizing part of the daily curriculum, and is mainly given on weekdays by trained teachers. Where this is the case it is not difficult to secure that the children shall learn by heart some official textbook. With this as a found-

dation the priest (who will by no means restrict his labours to Sunday work) will be able to explain and illustrate and enforce what they have learnt by heart. The teachers' business will be chiefly to put the catechism into the child's head; the priest must get it into his heart. Very different are the conditions which Father Furniss and Bishop Bellord are dealing with. Where the priest has to get together on a Sunday, or one day in the week, a number of children of all ages, who are not obliged to be present; and when he has to depend upon the assistance of lay persons who have no training in teaching; it is obvious that he should do his best to make the instruction as simple, as interesting, and as devotional as possible. As in other branches of instruction we may follow either the analytical or the synthetical method. In the former we take a text-book, a catechism, and explain it word by word to the scholar and make him commit it to memory. The book is of prime importance; the teacher occupies quite a secondary place. Though it might convey a wrong impression to call this the Protestant method, yet it is exactly in accordance with the Protestant system of religious teaching generally. The written, printed word (Bible or Catechism) is to them all in all. The synthetical method, on the other hand, puts the text first in the treatment of the subject, and are minded to look up to him and listen to his voice, and receive his words on his authority. "Faith cometh by hearing."

After they have thoroughly learnt their lesson in this way, a book may be then set before them, and be explained to them and committed to memory, as containing in a fixed form the substance of what they have received by word of mouth. Whatever may be said of the relative advantages of the two methods in the teaching of secular subjects, there can be no doubt that the synthetical method is the proper one for catechetical instruction. The office of catechizing belongs to the Church's magisterium (teaching authority), and so is best exercised by the living voice. "The lips of the priest shall keep knowledge, and they shall seek the law at his mouth." (Mal., i. 6.)

(a) The Subjunctive Method of catechizing is celebrated throughout the world, and has produced wonderful fruits wherever it has been employed. We cannot, therefore, do better than give a short account of it here.

The whole catechism consists of three principal exercises and three secondary ones. The principal are: (1) the doctrinal catechism, given with an easy explanation of it by way of question and answer; (2) the instruction; (3) the reading of the Gospel and the homily. The secondary exercises are: (1) the admonitions from the head catechist; (2) the hymns; (3) prayers. These should be interspersed with the former. The duration fixed by St. Francis de Sales for a complete catechism is two hours. The place should be the church, but in a separate chapel rather than in the body of the church. Great importance is attached to the "game of the good mark" (le jeu du bon point) and the analyses. The former consists in selecting the child who has answered best in the first part (the questioning on the catechism), and putting to him a series of short, clear, and definite questions upon the matter in hand, and doing this as a sort of challenge to the child, and at the same time to interest at the notion of a contest between the catechist and one of themselves, and this gives occasion for a better understanding of the subject under treatment. If the child is considered to have won, he receives a small card of reward (le bon point). "For the success of the game of the bon point it is important to prepare beforehand a few questions which are to be put to the children, even the commonest ones." The children should be made to write out a short account of the instruction given after the questioning. These analyses should be corrected by the teacher, and a mark ("fair", "good", "very good")
should be attached to each. In order to secure regular attendance, registers should be carefully kept, and rewards (pictures, medals, etc.) should be given to those who have not missed a catechism. Treats and feasts should also be given. The spirit of emulation should be encouraged by both formal attendance and good answering and analyses. Various minor offices should be conferred upon the best children. Punishment should very seldom be resorted to.

Though the Sulpician method insists upon a thorough knowledge of the letter of the catechism, it is clear that the teacher is of prime importance rather than the book. Indeed, the success or failure of the catechism may be said to depend entirely upon him. It is he who has to do the questioning and give the instruction and the homily on the Gospel. Unless he can keep the attention of the children fixed upon him, he is bound to fail. Hence, the greatest care should be taken in selecting and training the catechists. These are sometimes seminarists or nuns, but lay persons must often be taken. By far the larger portion of "The Method of Saint Sulpice" is devoted to the instruction of the catechists (cap. iv., "Of the instruction of the children"); cap. v., "Of the sanctification of the children"; cap. vi., "Of the necessity of making the catechism pleasant to the children, and some means for attaining this object"; cap. vii., "How to turn the catechism into exercises of emulation"; cap. viii., "How to maintain good order and ensure the success of the instruction".

So far the "Method" has dealt with the catechisms generally. Next comes the division of the catechisms. These are four in number: the Little Catechism, the First-Coincidence Catechism, the Weekday Catechism, and the Catechism of Perseverance. The Weekday Catechism is the only one which requires any explanation here. A certain time before the period of fasting, the catechumens are to be admitted to the Holy Table, and these are prepared by frequent exercises, held on weekdays as well as on Sundays. As a rule, only children who have attended for twelve months are admitted to the weekday catechisms, and the usual age is twelve years. The weekday catechism is held on two days of the week, and for about three or four hours, much the same as that of the Sunday catechism, except that the Gospel and the homily are omitted. The children are examined twice during the weekday catechisms: the first time about the middle of the course; the second, a week before the retreat. Those who have often been absent without cause or who have answered badly, or whose conduct has been unsatisfactory, are rejected.

A complete account of the method will be found in "The Method of Saint Sulpice" (Tr.), and also in "The Ministry of Catechising" (Tr.) by Mgr. Dupanloup.

(b) The Munich Method.—In 1898 Dr. A. Weber, editor of the "Katechetische Blatter" of Munich, urged the adoption of the Herbart-Ziller system in theoretical points, and of the "Method of Saint Sulpice" in practical points. He pointed out that a division of the catechetical matter into strict methodical units, so that these questions are co-ordinated which are essentially one. Secondly, it insists on a methodical following of the three essential steps, viz., Presentation, Explanation, and Application— with a short Preparation before Presentation, then Combination after Explanation. This system requires "first, a division of the catechetical matter into strict methodical units, so that those questions are co-ordinated which are essentially one. Secondly, it insists on a methodical following of the three essential steps, viz., Presentation, Explanation, and Application— with a short Preparation before Presentation, then Combination after Explanation. This system requires..."

III. Modern Catechisms. When speaking of the history of catechetical studies we find that, though the method was originally and properly oral, the custom soon arose of composing catechisms—i.e. short manuals of elementary religious instruction, usually by means of questions and answers.

A catechism is of the greatest use both to the teacher and the scholar. To the teacher it is a guide as to the subjects to be taught, the order of dealing with them, capturing the child's interest from the start and preserving his good-will and attention throughout" (Amer. Eccl. Rev., March, 1908, p. 342). "Explanation turns the attention of the pupil in a definite direction. The pupil hears the lesson-aim in a few well-chosen words. At this stage of the process the pupil's ideas are also corrected and made clearer. Presentation gives an object-lesson. If at all possible, use one such object only. There are sound psychological reasons for this, although it becomes occasionally useful to employ several. Explanation might also be called concept-formation. Out of the objective lesson are here construed, or evolved, the catechetical concepts. From the concrete objective presentation, the catechetical concepts are thus gathered and form a general concept. The catechist should be familiar with the catechisms of the various methods in the Church to see which are best suited to bring home what he has to teach. In each method a recommended catechism should be selected as the basis of a course of instruction. In addition, there should be used, a".

Though the Sulpician method insists upon a thorough knowledge of the letter of the catechism, it is clear that the teacher is of prime importance rather than the book. Indeed, the success or failure of the catechism may be said to depend entirely upon him. It is he who has to do the questioning and give the instruction and the homily on the Gospel. Unless he can keep the attention of the children fixed upon him, he is bound to fail. Hence, the greatest care should be taken in selecting and training the catechists. These are sometimes seminarists or nuns, but lay persons must often be taken. By far the larger portion of "The Method of Saint Sulpice" is devoted to the instruction of the catechists (cap. iv., "Of the instruction of the children"); cap. v., "Of the sanctification of the children"; cap. vi., "Of the necessity of making the catechism pleasant to the children, and some means for attaining this object"; cap. vii., "How to turn the catechism into exercises of emulation"; cap. viii., "How to maintain good order and ensure the success of the instruction".

So far the "Method" has dealt with the catechisms generally. Next comes the division of the catechisms. These are four in number: the Little Catechism, the First-Coincidence Catechism, the Weekday Catechism, and the Catechism of Perseverance. The Weekday Catechism is the only one which requires any explanation here. A certain time before the period of fasting, the catechumens are to be admitted to the Holy Table, and these are prepared by frequent exercises, held on weekdays as well as on Sundays. As a rule, only children who have attended for twelve months are admitted to the weekday catechisms, and the usual age is twelve years. The weekday catechism is held on two days of the week, and for about three or four hours, much the same as that of the Sunday catechism, except that the Gospel and the homily are omitted. The children are examined twice during the weekday catechisms: the first time about the middle of the course; the second, a week before the retreat. Those who have often been absent without cause or who have answered badly, or whose conduct has been unsatisfactory, are rejected.

A complete account of the method will be found in "The Method of Saint Sulpice" (Tr.), and also in "The Ministry of Catechising" (Tr.) by Mgr. Dupanloup.

(b) The Munich Method.—In 1898 Dr. A. Weber, editor of the "Katechetische Blatter" of Munich, urged the adoption of the Herbart-Ziller system in theoretical points, and of the "Method of Saint Sulpice" in practical points. He pointed out that a division of the catechetical matter into strict methodical units, so that these questions are co-ordinated which are essentially one. Secondly, it insists on a methodical following of the three essential steps, viz., Presentation, Explanation, and Application— with a short Preparation before Presentation, then Combination after Explanation. This system requires "first, a division of the catechetical matter into strict methodical units, so that those questions are co-ordinated which are essentially one. Secondly, it insists on a methodical following of the three essential steps, viz., Presentation, Explanation, and Application— with a short Preparation before Presentation, then Combination after Explanation. This system..."
and the choice of words in which the instruction should be conveyed; above all, it is the best means of securing uniformity and correctness of doctrinal and moral teaching. The use which the teacher should make of it must be understood in connexion with what has been said above about the methods of catechizing. To the schola a catechetic lesson was to be a brief summary of what the teacher has been imparting to him; and by committing it to memory he can be sure that he has grasped the substance of his lesson. As already observed, this is not a difficult matter where there are Catholic schools under trained expert teachers accustomed to making the children learn by heart; but when the teaching has to be done in evening or Sunday schools, where the portions are not under the same control as in the day schools, the portions to be committed to memory must be reduced to a minimum.

A good catechism should conform strictly to the definition given above. That is to say, it should be elementary, not a learned treatise of dogmatic, moral, and ascetical theology; and it should be simple in language, avoiding technical expressions as far as consistent with accuracy. Should the form of question and answer be maintained? No doubt it is not an interesting form for grown-up persons; but children prefer it because it lets them know exactly what they are likely to be asked. Moreover, this form keeps up the idea of a teacher and a disciple, and so is most in conformity with the fundamental notion of catechizing. What form the answers should take—Yes or No, or a categorical statement—is a matter of disagreement among the best teachers. It would seem that the decision depends on the character of the different languages and nations; some of them making extensive use of the affirmative and negative particles, while others rather the indicative and subjunctive. As for Dublin, in his instructions for the revision of the catechism, Bellarmine recommended "the introduction of short reading lessons, one to be appended to each chapter of the catechism. These reading lessons should deal, in somewhat fuller form, with the matter dealt with in the questions and answers of the catechism. The insertion of such lessons would make it possible to omit without losing much. The children would have a heavy burden on the memory of the children... If these lessons are written with care and skill, and in a style attractive as well as simple, the children will, whenever they have learned by heart, from the mere fact of repeatedly reading them, and without any formal effort at committing them to memory (Irish Ecc. Record, Jan., 1892). An excellent means of assisting the child in memorizing a comprehensive table should be selected with the greatest care; they should be accurate as well as artistic. The catechism used in Venice when Pius X was patriarch was illustrated. As there are three stages of catechetical instruction, so there should be three catechisms corresponding with these. The first should be very short and simple, larded with unprofitable and unhappy material. This is the last, and everything is stated dogmatically on the authority of the Church. A catechism on these lines is clearly unsuited for children living among Protestants. As already pointed out, the instruction of those who have made their first Communion should embrace proof as well as statement. The Fathers of the Vatican Council recognized the difficulty, and endeavoured to meet it by a common text, the lessons are "Longer Catechism", "Catechism", and other catechisms of approved value, was to be drawn up in Latin, and was to be translated into the different vernaculars with the authority of the bishops, who were empowered to make such additions as they might think fit; but these additions were to be kept quite distinct from the text. The latter plan, however, a law for 1870 prevented this proposal from being carried out.

(a) The present pontiff, Pius X, has prescribed a catechism for use in the Diocese of Rome and in its ecclesiastical province, and has expressed a desire that it should be adopted throughout Italy. It has been translated into English, French, Spanish, and German, and a movement has begun with a view to extending its use to other countries besides Italy, especially to Spain, where the conditions are similar. (See "Irish Ecc. Record", March, 1906, p. 221; "Amer. Ecc. Rev.", Nov., 1906.) This catechism consists of two parts, or rather two distinct books: one for "lower classes" and one for "higher classes". The first, or "Shorter Catechism", is meant for those who have not made their first Communion, the second for those who have already been through the other. Both are constructed on the same lines: an introdu-
DOCTRINE

sary portion, and then five sections treating in turn of the Creed, Prayer, the Commandments, the Sacraments, the Virtues, etc. The "Longer Catechism" contains, in addition, in catachetic form, an instruction on the feasts of Our Lord, the Blessed Virgin, and the Saints, and a short "History of Religion" (the Old Testament, the New Testament, and the Church) in the form of a narrative. But though the two catechisms are on the same main lines, they have very little connexion with each other. Hardly any of the questions and answers are the same; so that a knowledge of one of them is of little help rather an obstacle, in learning the second. It is worthy of note that, though texts of Scripture are not quoted, the second catechism contains a large number of questions and answers relating to the Holy Scriptures, among others the following: "Is the reading of the Bible necessary to all Christians?—The reading of the Bible is not necessary to all Christians, because they are taught by the Church; still, the reading of it is very useful and recommended to all." Many of the answers in the second catechism are much longer than those in other catechisms. The catechism itself, without counting the lengthy instruction on the feasts and the "History of Religion", fills more than 200 pages in Bishop Byrne's translation.

The difficulty of one catechism is officially in use. It was drawn up by a committee appointed by the Second Provincial Council of Westminster (1855), and is based upon the Douai Catechism. It has undergone several revisions, the last of these being for the purpose of eliminating the particles Yes and No, and making all the answers distinct categorical statements. It is remarkable for its frequent appeal to proofs from the Holy Scripture. Though it has been subject to many attacks, it is justly considered to be a clear and logical statement of Catholic belief and practice, fitted to the needs of both children and grown-up persons seeking instruction. Perhaps it has this latter class too much in view, and hence it is sometimes wanting in simplicity. The omission of Yes and No and the avoidance of pronouns in the answers have been carried to a pedantic excess. Besides this ordinary catechism there is a smaller catechism, for younger children, which goes over the whole ground in a more elementary form; it is to some extent free from the objection just mentioned; but this advantage involves some verbal differences between the answers of the two catechisms. There is no official advice given in the catechism. For the instruction of the faithful, no number of excellent "Manuals" are in use, e.g. "Instructions in Christian Doctrine"; Wcnham's "Catechumen"; Carr's "Lamp of the Word"; Caffrata's "The Catechism, Simply Explained"; Fander's (Deharbe's) "Catechism", Howe's "Catechist" and Spirago's "Method of Christian Doctrine" (ed. Messer) are used by those who are being trained to be teachers. Short Bible Histories, none of them official, are used in the more elementary classes, especially Formby's volumes; in the higher classes, Wcnham's "New Testament Narrative", Richards' "Scripture History", and Knecht's "Practical Commentary". There are also separate books of the New Testament, edited by Mgr. Ward and by Father Sydney Smith, etc. It should be added that the elementary schools and the training colleges, besides many of the secondary schools and colleges, are examined in religious knowledge by inspectors appointed by the bishops.

(c) In Ireland the catechism most commonly used at the present time is the "Catechism ordered by the National Synod of Maynooth... for General Use throughout the Irish Church". After a short Introductory paragraph on God and the salvation of the soul, the section on man and the end of his creation, it treats in turn of the Creed, the Commandments, Prayer, and the Sacraments. The answers are short and clear, and, though Yes and No are excluded, the form of the answers is not always a rigid repetition of the words of the question. Various important improvements have been suggested by Archbishop Walsh (see "Irish Eccl. Record", Jan., 1892, and following numbers). There is also a smaller edition of the Maynooth Catechism. The manuals used in the advanced classes are much the same as those used in Great Britain, together with the "Companion to the Catechism" (Gill). Religious inspection is general.

(For the United States, see above under History of Catechetics.)

The Synod of Quebec (1852) ordered two catechisms for use in Canada: Butler's Catechism for those speaking English, and a new French catechism for those speaking French. The latter is called "The Quebec Catechism", and is also issued in an abridged form.

(e) In Australia the Maynooth Catechism is generally used. But the bishops in the Plenary Council of 1854 decreed that a new catechism should be drawn up for use throughout Australia.

From this enumeration it will be seen how far we are from having any uniform catechism for the English-speaking peoples. If we consider the Continent of Europe, we find that in France, Germany, and Spain different catechisms are in use in the different Provinces. In the German-speaking lands of Austria there is one single catechism for all the dioceses, approved by the whole episcopate in 1894. It is issued in three forms: small, middle, and large. All of these are arranged exactly the same lines: a short introduction, Faith and the Apostles' Creed, Hope and Prayer, Charity and the Commandments, Grace and the Sacraments, Justification and the Last Things. The middle catechism contains all the questions and answers of the small, in exactly the same words, and adds a considerable number of fresh ones. In like manner, the large catechism makes further additions. The small catechism has no texts from Scripture; the other two contain many texts, usually placed in notes at the foot of the page. The chief difference between the middle and large catechisms is that the latter deals more with reasons and proofs, and consequently gives a greater number of Scripture texts. Austria is, therefore, better off than most countries in the matter of the catechism. She has none of the difficulties arising from a multiplicity of manuals, and her single textbook is in the three forms described above as the ideal for all countries. Schuster's excellent Eccl. History, "Catechism of the Faithful", is a rare book by means of different type and signs so as to be accommodated to the three stages of the catechism. Religious training in Austria has, however, been severely criticized by Dr. Pféhler, a high authority in that country. He considers the catechism as cumbersome, the work of a good theologian but a poor catechist; he advocates the compilation of a new Bible History on the lines of Knecht's manual; and he advocates the adoption of inductive methods. See "Unser Religionsunterricht, seine Mängel und deren Ursachen".

One of the best of the German catechisms is that of the Diocese of Augsburg, mainly the work of Kinsel and Hauser, and published in 1904. It is on the lines of Deharbe, but much simplified, and copiously illustrated. So, too, is the new Hungarian Catechism (1907), which is issued in three editions: one for the first and second grade of elementary schools, one for the remaining four grades, and one for the high schools. Bishop Mailath of Transylvania has had the direction of the work. Poland has not been behind in reforming her catechetical teaching. A catechism has just been drawn up for the fourth, fifth, and sixth grades by Bishop Likowski and Valentine Gadowski. The answers to be learnt by heart are limited to forty in each year, and are short and simple. Each is followed by a fairly long explanation. This catechism contains 215 illustrations.
It should be noted that all Continental reformers have dropped the idea of making the answers theologically complete. The subsequent explanations supply what may be considered improvements.

Doctrines of Addai

A few words are needed on the subject. While in the Acts of the Apostles (Acts 5:12, 42) there is the mention of Edessa, there is no mention of the birth of Addai. It is thought by some that he was born in Edessa, but that is pure conjecture. The main documents that concern Addai are the Epistles of Addai and the Edessene Acts. The Acts of the Apostles have been used as evidence for the authenticity of the Addai literature, but it has been argued that the Addai literature is based on the Acts of the Apostles.

The Edessene Acts are a collection of documents that form a part of the Syriac Bible. They are the oldest known Christian documents and are a valuable source for the study of early Christianity. The Acts of the Apostles and the Edessene Acts are both important for understanding the history of early Christianity in the Middle East.

The Edessene Acts were written in Syriac and were used as the official liturgical text of the Edessene Church. They were also used as a basis for the formulation of the Edessene Catechism.

The Edessene Catechism was a manual used to teach the faith to new converts. It was written in Syriac and was used in the Edessene Church for centuries. The Edessene Catechism was also used as a basis for the formation of the Edessene Creed.

The Edessene Creed was a statement of faith that was used by the Edessene Church. It was written in Syriac and was used as a basis for the formation of the Edessene Catechism.

The Edessene Church was a Christian church in the Middle East that existed from the 3rd century to the 6th century. It was based in the city of Edessa and was known for its liturgical practices and its adherence to the Edessene Catechism and Creed.

The Edessene Church was influential in the history of Christianity and is known for its role in the development of the Syrian Christian Church.
bious were probably not very old when he wrote. The "Doctrine of Addai" is yet later. The Finding of the Cross must be dated some time later than St. Helena; the miraculous picture of Christ was not seen by the Abbess Etheria when she visited Edessa c. 355. Hence there can be no doubt that the "Doctrine of Addai" was first published in Syriac in a fragmentary form by Curton, "Ancient Syriac documents" (London, 1864, a posthumous work), with a translation; another translation in "Ante-Nicene Chr. Libr," XX. The full Syriac text was published by Phillips, with a translation (London, 1876). An Armenian version (and possibly a French) translation, by the Mechitarist Father Leo Alishan, "Laboufnia, Lettre d'Addar" (Venice, 1868).

The literature of the subject (including the Addar legend, the Finding of the Cross, the Greek legend in the "Acta Thaddaei," and the proving of the Church of Edessa) is very large. The following works may be specially mentioned: Lipsius, Die ekklesiastische Abgangspraxis (Brunswick, 1880); D'Echon, Les origines de L'Eglise d'Edesse et la Legende d'Addar (Paris, 1888); Martin, Les origines de l'Eglise d'Edesse et des eglises syriennes (extr. from Revue des sc. eccl., Paris, 1889); Kerkegi, Early Eastern Christianity (London, 1904); Nestle, De sancta cruce (Berlin, 1889); on the picture of Christ, Von Dobschtutz, Der Christus in der Liebe (Leipzig, 1889). Further references will be found in Baden-Gesch, Gesch. der altkirch. Lit., I, 458; Chevalier, Repertoire, s. v. Addar.

Dogma.—I. Definition.—The word dogma (Gr. δογμα, from δογμάζω) signifies, in the writings of the ancient classical authors, sometimes, an opinion or purpose that is declared, accepted, or defined; philosophical doctrines or tenets, and especially the distinctive philosophical doctrines, of a particular school of philosophers (cf. Cic. Ac., ii, 9); and sometimes, a public decree or ordinance, as δογματικός. In Sacred Scripture it is used, at one time, in the sense of a decree or edict of the civil authority, as in Luke, ii, 1: "And it came to pass, that in those days there went out a decree from Caesar Augustus" (cf. Acts, xvii, 7; Esther, iii, 3); at another time, in the sense of an ordinance of the Mosaic Law, as in Eph., ii, 15: "Making void the law of commandments contained in decrees" (δογματικά); and again, it is applied to the ordinances or decrees of the first Apostolic Council in Jerusalem: "And as they passed through the cities, they delivered unto them the decrees," (Acts, xii, 3). Among the early Fathers the usage was prevalent of designating as dogmas the doctrines and moral precepts taught or promulgated by the Saviour or by the Apostles; and a distinction was sometimes made between Divine, Apostolical, and ecclesiastical dogmas, the latter being defined as doctrines that had been taught by Christ, by the Apostles, or as having been delivered to the faithful by the Church. But according to a long-standing usage a dogma is now understood to be a truth appertaining to faith or morals, revealed by God, transmitted from the Apostles in the Scriptures or by tradition, and proposed by the Church for the acceptance of the faithful. It might be defined as a doctrine that has been taught by the Church; but private revelations do not constitute dogmas, and some theologians confuse the word defined to doctrines solemnly defined by the pope or by a general council, while a revealed truth becomes a dogma even when proposed by the Church through her ordinary magisterium or teaching office. A dogma therefore implies both a definition and the authoritative teaching of the Church.

Theologians distinguish three classes of revealed truths: truths formally and explicitly revealed; truths revealed formally, but only implicitly; and truths only virtually revealed. A truth is said to be formally revealed, when the speaker or revealer really means to convey that truth by his language, to guarantee it by the authority of his word. The revelation is formal and explicit, when made in clear expression terms. His formal but only implicit, when the language is somewhat obscure, when the rules of interpretation must be carefully employed to determine the meaning of the revealed. And a truth is said to be revealed only virtually, when it is not formally guaranteed by the word of the speaker, but is inferred from something formally revealed. Now, truths formally and explicitly revealed may be directly defined, or they may be only virtually defined, when they are proposed or defined by the Church. Such are the articles of the Apostles' Creed. Similarly, truths revealed by God formally, but only implicitly, are dogmas in the strict sense when proposed or defined by the Church. Such, for example, are the doctrines of Transubstantiation (q. v.), papal infallibility (q. v.), the Immaculate Conception (q. v.), some of the Church's teaching about the Saviour, the sacraments, etc. All doctrines defined by the Church as being contained in revelation are understood to be formally revealed, explicitly or implicitly. It is a dogma of faith that the Church is infallible in defining these two classes of revealed truths; and the deliberate denial of one of these dogmas certainly involves the denial of heresy. This is a diversity of opinions about virtually revealed truths, which has its roots in a diversity of opinion about the material object of faith (see FAITH). It is enough to say here that, according to some theologians, virtually revealed truths belong to the material object of faith and become dogmas in the strict sense when defined or proposed by the Church; whereas others, the ordinals, consider these as merely material object of faith prior to their definition, but become strict dogmas when defined; and, according to others, they do not belong to the material object of Divine faith at all, nor become dogmas in the strict sense when defined, but may be called mediately-Divine or ecclesiastical dogmas. In the hypothesis that virtually revealed conclusions do not belong to the material object of faith, it has not been defined that the Church is infallible in defining these truths; the infallibility of the Church, however, in relation to these truths is a doctrine of the Church theologically certain, which cannot lawfully be denied; and though the denial of an ecclesiastical dogma would not be heresy in the strict sense, it could entail the surrendering of the bond of truth and expulsion from the Church by the Church's own acts of ecclesiastical communication.

II. Divisions.—The divisions of dogmas follow the lines of the divisions of faith. Dogmas can be (1) general or special; (2) material or formal; (3) pure or mixed; (4) symbolic or non-symbolic; (5) and they can differ according to their various degrees of necessity.—(1) General dogmas are a part of the revelation meant by the Apostles. They are dogmas that are not special dogmas, dogmas that are not special dogmas, but special dogmas are the truths revealed in private revelations. Special dogmas, therefore, are not, strictly speaking, dogmas at all; they are not revealed truths transmitted from the Apostles; nor are they defined or proposed by the Church for the acceptance of the faithful generally. (2) Dogmas are called material (or Divine, or dogmas in themselves, in a c) which are truths that are not special dogmas. They are truths that are held by the Church, when they are considered only as revealed; and they are called formal (or Catholic, or "in relation to us", quondi nos) when they are considered both as revealed and defined. Again, it is evident that material dogmas are not dogmas in the strict sense of the term. (3) Pure dogmas are those which can be known only from revelation, as the Trinity (q. v.), Incarnation (q. v.), etc.; while mixed dogmas are truths which can be known from revelation or from philosophical reasoning, as the existence and attributes of God
Both classes are dogmas in the strict sense, when considered as revealed and defined.—(4) Dogmas contained in the symbols or creeds of the Church are called symbolic; the remainder are non-symbolic. Hence all the articles of the Apostles' Creed are dogmas; but not all dogmas are called technically articles of faith, though an ordinary dogma is sometimes spoken of as an article of faith. (5) Finally, there are dogmas belief in which is absolutely necessary as a means to salvation, while faith in others is rendered necessary by Divine precept; and in this precept must be explicitly known and believed, while with regard to others implicit belief is sufficient.

III. OBJECTIVE CHARACTER OF DOGмат ТRUTH: INTELLECTUAL BELIEF IN DOGMA.—As a dogma is a revealed truth, the intellectual character and objective reality of dogma depend on the intellectual character and objective truth of Divine revelation. We will here apply to dogma the conclusions developed at greater length under the heading of revelation (q. v.). Are dogmas, considered merely as truths revealed by God, real objective truths addressed to the human mind? Are we bound to believe them with the mind? Should we admit the distinction between fundamental and non-fundamental dogmas? The question is, the existence of Divine supernatural revelation, and consequently of religious dogmas. A certain school of mystics has taught that what Christ inaugurated in the world was "a new life". The "Modernist" theory by reason of its recent condemnation calls for fuller treatment. There are different shades of opinion among Modernists. Some of them do not, apparently, deny all intellectual value to the dogma (cf. Le Roy, Dogme et Contre-dogme). Like revelation, they say, is expressed in terms of action. Thus when the Son of God is said to "have come down from heaven", according to all theologians He did not come down, as bodies descend or as angels are conceived to pass from place to place, but the hypostatic union is described in terms of action. And to this view, they say, belongs the consciousness of right and wrong; and the evolution or development of revelation was the progressive development of the religious sense until it reached its highest level, thus far, in the modern liberal and democratic State. Then, according to these writers, the dogmas of faith, considered as dogmas, have no meaning for the mind; we need not believe them mentally; we may reject them; it is enough if we employ them as guides for our actions. (See Modernism.) Over against this doctrine the Church teaches that God has made a revelation to the human mind. There are, no doubt, relative Divine attributes, and some of the dogmas of faith may be expressed under the symbols of action. The Le Roy, Dogme et Contre-dogme, makes a meaning distinct from action. The fatherhood of God may imply that we should act towards Him as children towards a father; but it also conveys to the mind definite analogical conceptions of our God and Creator. And there are truths, such as the Trinity, the Incarnation, the Resurrection of Christ, His Ascension, etc. which are absolute objective facts, and would be believed even if their practical consequences were ignored or were deemed of little value. The dogmas of the Church, such as the existence of God, the Trinity, the Incarnation, the Resurrection of Christ, the sacraments, a future judgment, etc., have an objective reality and are facts as really and truly as it is a fact that Augustus was Emperor of the Romans, and that George Washington was first President of the United States.

(2) Abstracting from the Church's definition, we are bound to render to God the homage of our assent to revealed truth once we are satisfied that He has spoken. Even atheists admit, hypothetically, that if there be an infinite Being distinct from the world, we should pay Him the homage of believing His Divine word.

Hence it is not permissible to distinguish revealed truths as fundamental and non-fundamental in the sense that some truths, though known to have been revealed by God, may be lawfully denied. But while we should believe, at least implicitly, every truth attested by the word of God, we are free to admit that some are in themselves more important than others, more necessary than others, and that an explicit knowledge of some is necessary while an implicit faith in others is sufficient.

IV. DOGMA AND THE CHURCH.—Revealed truths become formally dogmas when defined or proposed by the Church. There is considerable hostility, in modern times, to dogmatic religion when considered as a body of truths defined by the Church, and still more considered as dogmas. But the dogma of the Church is the dogma which is here expounded for its acceptance on the doctrine of the infallible teaching office of the Church and of the Roman pontiff. It will be sufficient to notice the following points: (1) the reasonableness of the definition of dogmas; (2) the immutability of dogma; (3) the necessity for Church unity in dogma; (4) the inconveniences which are alleged to be associated with the definition of dogma.

(1) Against the theory of interpretation of Scripture by private judgment, Catholics regard as absolutely unacceptable the view that God revealed a body of truths to the world and appointed no official teacher of revealed truth, no authoritative judge of controversy, this view is as unreasonable as would be the notion that the civil legislature makes laws, and then commits to individual private judgment the right and the duty of interpreting the laws and deciding controversies. The Church and the supreme pontiff are endowed with God with the privilege of infallibility in discharge of the duty of universal teacher in the sphere of faith and morals; hence we have an infallible authority which it has been the function of the Church and the doctrine of the revelation and analytical deliverance to us by the Church are the truths contained in Divine revelation.

(2) The dogmas of the Church are immutable. Modernists hold that religious dogmas, as such, have no intellectual meaning, that we are not bound to believe them mentally, that they may be all false, that it is sufficient if we use them as guides to action; and accordingly they teach that dogmas are not immutable, that they should be changed when the spirit of the age is opposed to them, when they lose their value as rules for a liberal religious life. But in the Catholic doctrine that Divine revelation is addressed to the human mind and expresses real objective truth, dogmas are immutable Divine truths. It is an im- possible truth for a being such as was Emperor of Rome and George Washington first President of the United States. So according to Catholic belief, these are and will be for all time immutable truths: that there are three Persons in God, that Christ died for us, that He arose from the dead, that He founded the Church, that He instituted the sacraments. We may distinguish between the truths themselves and the language in which they are expressed. The full meaning of certain revealed truths has been only gradually brought out; the truths will always remain. Language may change or may receive a new meaning; but we can always learn what meaning was attached to particular words in the past.
(3) We are bound to believe revealed truths irrespective of their definition by the Church, if we are satisfied that God has revealed them. When they are proposed or defined by the Church, and thus become dogmas, we are bound to believe them in order to maintain the bond of faith (see HERESY).

(4) Finally, Catholics do not admit that, as is sometimes alleged, dogmas are the arbitrary creations of ecclesiastical authorities and that their definition is purely arbitrary, that they are devices for keeping the ignorant in subjection, that they are obstacles to conversions. Some of these are points of controversy which cannot be settled without reference to more fundamental questions. Dogmatic definitions would be arbitrary if there were no Divinely instituted infallible teaching office in the Church, the Magisterium of the Church. The Magisterium of the Church is established in His Church an infallible office, dogmatic definitions cannot be considered arbitrary. The same Divine Providence which preserves the Church from error will preserve her from inordinate multiplication of dogmas. She cannot define arbitrarily. We need only observe the life of the Church or of the Roman pontiffs to see that dogmas are not defined inconsiderately. And as dogmatic definitions are but the authentic interpretation and declaration of the meaning of Divine revelation, they cannot be considered devices for keeping the ignorant in subjection, or reasonable obstacles to conversions; on the contrary, the authoritative definition of truth and condemnation of error, are powerful arguments leading to the Church those who seek the truth earnestly.

Dogmatic definitions, and thus the Church's definition, is that in the Catholic Church, in consequence of its dogmas, religious life consists merely in speculative beliefs and external sacramental formalities. It is a strange charge, arising from prejudice or from lack of acquaintance with Catholic life. Religious life in conventional and monastic establishments is surely not a merely external formality for persons defined by the ordinary Catholic layman, such as public prayer, confession, Holy Communion, etc.; suppose careful and serious internal self-examination and self-regulation, and various other acts of internal religion. We need only to observe the public civic life of Catholics, their philanthropic works, their schools, hospitals, orphanages, charitable organizations, etc., in order to understand that the Catholic externalism does not degenerate into mere external formalities. On the contrary, in non-Catholic Christian bodies a general decay of supernatural Christian life follows the dissolution of dogmatic religion. Were the dogmatic system of the Catholic Church, with its authoritative infallible head, done away with, the various systems of private judgment would not save the world from relapsing into and following pagan ideals. Dogmatic belief is not the be-all and end-all of Catholic life; but the Catholic serves God, honours the Trinity, loves Christ, obeys the Church, frequents the sacraments, assists at Mass, observes the Commandments, because he believes mentally in God, in the Trinity, in the Divinity of Christ, in the Church, in the sacraments, according to the Offices of the Mass, in the duty of keeping the Commandments; and he believes in them as objective immutable truths.

VI. DOGMA AND SCIENCE.—But, it is objected, dogma checks investigation, antagonizes independence of thought, and makes scientific theology impossible. This difficulty may be supposed to be put by Protestants or by unbelievers. We will consider it from both points of view.

(1) Beyond scientific investigation and freedom of thought, Catholics recognize the guiding influence of dogmatic beliefs. But Protestants also profess to adhere to certain great dogmatic truths which are supposed to impede scientific investigation and to conflict with the findings of modern science. Old difficulties against the existence of God or its demonstrability, against the dogma of Creation, miracles, the human soul, and supernatural religion, have been dressed in a new garb and urged by a modern school of scientists principally from the discoveries in geology, paleontology, biology, astronomy, comparative anatomy, and physiology. But Protestants, no less than Catholics, profess to believe in God, in the Creation, in the soul, in the Incarnation, in the possibility of miracles; they talk of dogmas and dogmas impede scientific investigation. But it is urged that in the Catholic system beliefs are not determined by private judgment; behind the dogmas of the Church there is a Magisterium in the episcopate. True, behind dogmatic beliefs Catholics recognize ecclesiastical authority; but this puts no further restraint on intellectual freedom; it only raises the question as to the constitution of the Church. Catholics do not believe that God revealed a body of truths to mankind and appointed no living authority to unfold, to teach, to safeguard that body of Divine truths, to decide controversies; but the authority of the episcopate under the supreme pontiff to control intellectual activity is correlative with, and arises from their authority to teach supernatural truth. The existence of judges and magistrates does not extend the range of our civil laws; they are rather a living authority to interpret and apply the laws. Similarly, episcopate has no right to dictate the realm of revelation, and it prohibits only what is inconsistent with the full scope of that truth.

(2) In discussing the question with unbelievers we note that science is "the observation and classification, or co-ordination, of the individual facts or phenomena of nature." Now a Catholic is absolutely free in the prosecution of scientific research among scientific subjects, and none of the prohibitions or restriction on Catholics in regard to the observation and co-ordination of the phenomena of Nature. But some scientists do not confine themselves to science as defined by themselves. They propounded theories often unwarranted by experimental observation. One will maintain as a "scientific" truth that there is no God, or that his existence is unknown; another as a "scientific" belief, that in the name of "science" the existence of the soul; another, the possibility of supernatural revelation. Surely these denials are not warranted by scientific methods. Catholic dogma and ecclesiastical authority limit intellectual activity only so far as may be necessary for safeguarding the truths of revelation. If non-believing scientists in their study of Catholics were to apply the scientific method, which consists in observing, comparing, making hypotheses, and perhaps formulating scientific conclusions, they would readily see that dogmatic belief in no way interferes with the legitimate freedom of the Catholic in scientific research, the discharge of civic duty, or any other form of activity that makes for true enlightenment and true freedom. Of course, as the service rendered by Catholics in every department of learning and of social endeavour, is a fact which no amount of theorizing against dogma can set aside. (See Faith, Infallibility, Revelation, Science, Truth.)
Dogmatic Facts.—(1) Definition.—By a dogmatic fact, in wider sense, is meant any fact connected with a dogma and on which the application of the dogma to a particular case depends. The following questions involve dogmatic facts in the wider sense: Is Pius X, for instance, really and truly Roman pontiff, duly elected and recognized by the Universal Church? This is connected with dogma for it is a dogma of faith that every pontiff duly elected and recognized by the Universal Church is a successor of Peter. Again Was this or that council ecumenical? This, too, is connected with dogma, for every ecumenical council is endowed with infallibility and jurisdiction over the Universal Church. The question also whether canonized saints really died in the odour of sanctity is connected with dogma. In the stricter sense the term dogmatic fact is confined to books and spoken discourses, and its meaning will be explained by a reference to the condemnation by Innocent X of five propositions taken from the posthumous book of Jan- senius, entitled “Augustinus”.

It might be asked, for example, whether the pope could define that Jansenius was really the author of the book entitled “Augustinus”. It is conceded that he could not. He may speak of it as the work of Jansenius, because, in general repute, at least, it was regarded as the work of Jansenius. The precise authorship of a book is a called a personal fact. The question turned on the doctrine of the book. The Jansenists admitted that the doctrine of the condemned propositions was not heretical; but they maintained that the condemned doctrine was not taught in the “Augustinus”. This brings us to what are called “particular facts of doctrine”. Thus it is a fact that God exists, and that there are three Persons in God; here the same thing is fact and dogma. The Jansenists admitted that the pope is competent to judge with dogmatic fact to determine the meaning of a book. The controversy was then carried to the meaning of the book. Now it is conceded that the pope cannot define the purely internal, subjective, perhaps singular, meaning, which an author might attach to his words. But the pope, in certain cases, can determine the meaning of a book judged by the general laws of interpretation. When the pope rules that a doctrine taught in a book is condemned, “in the sense of the author”, they are condemned in the sense in which the book or propositions would be understood when interpreted according to the ordinary laws of language. The same formula may be condemned in one author and not in another, because, interpreted by the context and general argument of the author, it may be unorthodox in one case and not in the other. In the strict sense, therefore, a dogmatic fact may be defined as “the orthodox or heterodox meaning of a book or proposition”; or as a “fact that is so connected with dogma that a knowledge of the fact is necessary for teaching and conserving sound doctrine”. When we say that a book contains unorthodox doctrine, we convey the meaning of the book and that the doctrine is unorthodox; here we have close connexion between fact and dogma.

(2) The Church and Dogmatic Facts.—Jansenists distinguished between “fact” and “dogma”. They held that the Church is infallible in defining revealed truth and in condemning errors opposed to revealed truth; but that the Church is not infallible in defining facts which are not matters of Divine revelation, and consequently that the Church was not infallible in declaring that a particular doctrine, in a particular sense, was found in the “Augustinus” of Jansenius. This would confine the infallible teaching of the Church to mere abstract doctrines, a view that cannot be accepted. Theologians are unanimous in teaching that the Church, or the pope, is infallible, not only in defining what is formally contained in Divine revelation, but also in defining virtually revealed truths, or generally in all definitions and condemnations which are necessary for safe-guarding the body of revealed truth. Whether it is to be regarded as a defined doctrine, as a doctrine de fide, that the Church is infallible in definitions about dogmatic facts, is disputed among theologians. The reason of this difference of opinion will appear below. The Church, in all ages, has exercised the right of pronouncing a judgment upon dogmatic facts; and this right is essential to her teaching office. She has always claimed the right of defining that the doctrine of heretics, in the sense in which it is contained in their books, or in their discourses, is heretical; that the doctrine of an orthodox writer, in the sense in which it is contained in his writings, is orthodox. We need only observe that the Jansenists advanced within the sphere of the civil authority. We can scarcely conceive it to be held that a judge and a jury may pronounce on an abstract proposition of libel, but cannot find that a particular paragraph in a book or newspaper is libelous in the sense in which it is written. If the Church could not define the orthodox or unorthodox sense of books, sermons, conferences, and discourses, generally, she might still be infallible in regard to abstract doctrine, but she could not fulfill her task as practical teacher of humanity, nor protect her children from actual concrete dangers to their faith and morals.

(3) Faith and Dogmatic Facts.—The more extreme Jansenists, distinguishing between dogma and fact, taught that the Church is the propounder of dogma, and that to the definition of fact only respectful silence is due. They refused to subscribe the formula of the condemnation of Jansenism, or would subscribe only with a qualification, on the ground that subscription implied internal assent and acquiescence. The less extreme party, though limiting the Church’s infallibility to the question of dogmatic facts, might be signed absolutely and without qualification, on the ground that, by general usage, subscription to such a formula implied assent to the dogma, but, in relation to the fact, only external reverence. But the definitions of dogmatic facts demand real internal assent; though about the nature of the assent and its relation to faith theologians are not unanimous. Some theologians hold that the definitions of dogmatic facts are dogmatic facts, and especially of dogmatist facts in the wider acceptance of the term, are believed by Divine faith. For instance, the proposition, “every pope duly elected is the successor of Peter”, is formally revealed. Then, say these theologians, the proposition, “Pius X has been duly elected pope”, only shows that Pius X is included in the general revealed proposition that “every pope duly elected is the successor of Peter”. And they conclude that the proposition, “Pius X is successor to Peter”, is a formally revealed proposition; that it is believed by Divine faith; that it is a doctrine of faith, de fide; that the Church, or the pope, is infallible in defining such doctrines. Other theologians hold that the definitions of dogmatic facts are not dogmatic facts, and are received, not by Divine faith, but by ecclesiastical faith, which some call mediate Divine faith. They hold that in such syllogisms as this: “Every duly elected pontiff is Peter’s successor; but Pius X, for example, is a duly elected pontiff; therefore he is a successor of Peter”; the conclusion is not formally revealed by God, but is inferred from a definition, and an unrevealed proposition, and that consequently it is believed, not by Divine, but by ecclesiastical faith. It would then also be held that it has not been formally defined de fide that the Church is infallible in the definition of dogmatic facts. It would be said technically to be theologically certain that the Church is infallible in these definitions; and this infallibility cannot lawfully be questioned. This all is bound to give internal asset to Church definition of dogmatic
facts is evident from the correlative duties of teacher and persons taught. As it belongs to the duty of supreme pastor to define the meaning of a book or proposition, correlative it is the duty of the subjects who are taught to accept this meaning. (See Dogma, Faith, Infallibility, Jansenism.)

Dol and Saint-Malo, Diocese of. See Rennes, Diocese of.

Dolbeau, Jean, Recollect friar, b. in the Province of Anjou, France, 12 March, 1586; d. at Orleans, 9 June, 1652. He entered the order at the age of nineteen at Balmette, near Angers, and was one of the four Recollects who were the first missionaries of Canada.

He landed at Quebec in May, 1615, and celebrated the first Mass ever said there. He became commissionary provincial of the mission in 1618 and preached the first jubilee accorded to Canada. This zealous missionary built the first monastery of the Recollects at Quebec in 1620. He returned to France in 1625, taking with him a young Indian boy who was later baptized at Angers. Endowed with many striking qualities, Father Dolbeau was remarkable for extraordinary spiritual insight and profound humility. He was suc-
cessively master of novices, guardian, definer, and provincial delegate at the general chapter of the order held in Spain in 1633. He died in the forty-seventh year of his religious life.

Biographical notices, seventeenth Century MSS. (Public Library, Orleans); Sagard, Hist. du Canada (Paris, 1656); ed. Trench (1866); Guechard, Premiers moines franciscains en la Nouvelle France (Paris, 1693); Shea J. (New York, 1881).

Ondoric M. Jouve.

Dolci, Carlo, painter, b. in Florence, Italy, 25 May, 1616; d. 17 January, 1686. The grandson of a painter, he seems to have inherited a talent for art. He studied under J. Vignali, and when only eleven years old he attracted attention by the excellence of his work, notably a figure of Saint John and a head of the Infant Jesus. The precocious youth made a care-
fully-finished picture of his mother, and thereafter was kept busy filling the numerous commissions he received in Florence, a city he seldom left during his long life, which he devoted to art. Dolci was one of the few masters whose pictures were eagerly sought for by his countrymen during his lifetime. He was very pious and painted religious works exclusively. It is recorded that in every Passion week he painted a picture of the Saviour. He limited his brush to heads—usually of Christ and the Virgin—and seldom undertook a large-sized canvas. He is celebrated for the soft, gentle, and tender expression of his faces, the transparency of his colour, the excellent management of chiaroscuro, and the careful and ivory-like finish of his pictures. The simplicity and tranquillity on the faces of his paintings of Christ and the Virgin seem little short of inspired. Hinds calls him mawkish and affected; but Dolci was the last of the Florentine School, the last real "master of the Renaissance"; and as decadent sweetness permeated all Italian art, his pictures but reflected the dominant character of the close of the seventeenth century. Patient and slow, he painted pictures that are perfectly finished in every detail. His masterpiece (1646) is "Andrew praying before his Crucifixion" (Pitti Gallery, Flo-
rence). It is one of the few works where his figures,

always well drawn and standing out in beautiful relief, are life-size. Next in excellence to this is the "St. John writing his Gospel" (Berlin). His "Mater Dolorosa" called "Madonna del Dito" (of the thumb) is known throughout the civilized world because of its many reproductions. In 1662 Dolci saw with exag-

geration Giordano accomplish in a few hours what would have taken him weeks, and it is said he was thereupon seized with melancholy which ultimately led to his death. Loma, Mancini, Mariani, and Agnese Dolci (his daughter) were a few of his pupils and imitators. Contemporary copyists have filled European collections with spurious Dolcis. Agnese Dolci, who died the same year as her father, not only made marvellous copies of the master's pictures, but was herself an ex-

Dolche, a titular see of Comngame (Augusto-

Euphratesia). It was a small city on the road from Germania to Zeugma (Ptolemy, V, 15, 10; Itiner. Anto., 184, 189, 191, 194; Tab. Pounting.), famous for

its temple of Zeus Dolicheus; it struck its own coins from Marcus Aurelius to Caracalla. The ruins stand at Tell Dukik, three miles northwest of Antab, in the vilayet of Aleppo. Dolche was at an early date an
episcopal see suffragan of Hierapolis (Mabbouq, Membidj). Lequien (Or. Christ., II, 937) mentions eight Greek bishops: Archelaus, present at Nicea in 325, and at Antioch in 341; Olympius at Sarde in 344; Cyrus at Seleucia in 385; Maris at Constantinople in 381; Ababis, a Nestorian, in 431, deposed in 434; Athanasius, his successor; Timothy, a correspondent of Theodoret, present at Antioch in 444 and at Chalcedon in 451; Philoxenus, a nephew of the celebrated Philoxenus of Hierapolis, deposed as a Severian in 518, reinstated in 533 (Brooks, The Sixth Book of the Select Letters of Severus, London, 1904, II, 59, 90, 93). The monastery of the monks on Mount Athos was founded in 1254 and its establishment was one of the most significant events in Byzantine history. 

During the reign of Athanasius, in 343-350, reinstated in 353 (Brooks, The Sixth Book of the Select Letters of Severus, London, 1904, II, 59, 90, 93). The monastery of the monks on Mount Athos was founded in 1254 and its establishment was one of the most significant events in Byzantine history. 

Philoxenus, a nephew of the celebrated Philoxenus of Hierapolis, deposed as a Severian in 518, reinstated in 533 (Brooks, The Sixth Book of the Select Letters of Severus, London, 1904, II, 59, 90, 93). The monastery of the monks on Mount Athos was founded in 1254 and its establishment was one of the most significant events in Byzantine history.

DOLLINGER

Professor of canon law and ecclesiastical history, but was soon burdened with the teaching of dogma and New Testament exegesis, a task to which a weaker or inferior mind would not have proved equal. He declined, in 1829, a call to Breslau, although King Louis I heartily wished him out of Bavaria; he also refused a later call to Freiburg in the Breisgau. He was offered in 1839, a professorship at an English college, but preferred to remain in Munich. To facilitate the coming of Johann Adam Möhler from Tübingen to Munich (1833), he gave over to him the courses of ecclesiastical history and New-Testament exegesis, and when Möhler died (12 April, 1838) he collected a number of essays, in manuscript, which he hoped would be printed soon. They were already in print, but were widely scattered, and published them in two volumes (1839) under the title of "Gesammbliche Schriften und Aufsätze." While Möhler taught at Munich, Dollinger lectured on the history of dogma (Historische Dogmatik). At the request of Abel, Minister of the Interior, Dollinger began, in 1838, a course of lectures in the Faculty of Philosophy on the philosophy of religion in opposition to the teaching of the honorary professor Von Baader, the theosophist, and of Schelling. He continued, however, to lecture on dogma and ecclesiastical history. From November, 1846, to February, 1848, Bavarian public affairs were disturbed by the royal attachment to Lola Montez, a Spanish ballerina; the Alsatian theosophist professor Caspar von Moy, Phillips, Hölder, and Deutzer either dismissed or reprimanded; Dollinger, finally, as stated above, was removed from his office. After his restoration in 1850 he continued to the end as professor of church history. In 1862 he was made Knight of the Order of Maximilian for science and art.

Apart from the teaching of canon law and professorial duties, Dollinger held but one other ecclesiastical office in Munich. After the conflict concerning mixed marriages (1832), he was made defensor matrimonii in the matrimonial court of first instance, later in that of second instance, which office he held until 1862. His circle of friends was from the beginning quite extensive; the physicians and professors of the natural sciences who frequented his father's house were themselves men of distinction. As a student he formed the acquaintance of the poet, Graf von Platen, and of Victor Aimé Huber. Later, Platen wished to study Sanskrit with Dollinger, and visited him twice at Marktscheinfeld. In the ecclesiastical seminary of Bamberg he met Prince Alexander von Hohenlohe (q. v.), of whose miraculous cures he said later: "Cures that happen in the hospital of "Das Bartholomäi" (still published at the Church; the deep stirring of the emotions suffices easily enough to explain them"); a remark that fails to account for the presence of deep emotions in the absent sick. On a visit to Platen at Erlangen, in 1822, he met Pfaff, Schubert, and Schelling, the last a friend of his father. In his early days at Munich he was much in the society of these men and of Franz von Baader. When, in 1827, the famous Joseph Görres came to Munich as professor of history, there formed about him at once a sympathetic circle of scholars, among them the youthful Dollinger. Dollinger's relations with Lamennais, more particularly with Count Montalembert, gave occasion in 1832 to a violent attack in the Bavarian Parliament on Görres and his views, and of "Das Bartholomäi" (still published at the Church), who in 1828 was rector of the ecclesiastical seminary at Strasbourg as well as professor of dogma and homiletics; with Dollinger he projected various literary enterprises which, through pressure of other work, were never realized.

At this time Monsignor Wiseman, later Cardinal, and Archbishop of Westminster, then professor at the Roman University (Sapienza) and rector of the English College, saw the necessity of strengthening Catholicism in the development of its new opportunities in England, and for this reason was minded to effect closer relations with the learned clergy of Germany. Dollinger seemed to him the proper mediator; he therefore visited Munich in 1853, made the acquaintance of the distinguished professor, and spoke with him of his hopes and plans. Wiseman, already well known in Europe by his "Life of one Xyriaca", aroused in Dollinger so deep an interest, that the next year the latter visited England. His biographer, Friedrich, describes the result of this visit as follows: "Dollinger had a life-long hatred of bureaucracy both in Church and State; the large independence, therefore, of English public life delighted him and filled him with an admiration that was often excessive. Therefor he remained always in close touch with England, kept up a constantly increasing, and at considerable sacrifice, a number of young English students, and directed the studies of some of them. (...)"

As a rule Dollinger observed with his pupils a strict academic dignity and reserve; among the few whom he treated as intimate friends Acton was easily the foremost. Among those who in this early period exerted the greatest influence over Dollinger was Karl Joseph Jarcke, the author and editor (since 1832) of the Berlin "Politische Wochenblätter", confidant of Metternich, and a frequent visitor to the Bavarian capital. In 1838 came the foundation of the "Historisch-politi sche Blätter" by Guido Görres, Phillips, and Jarcke; the new organ soon greatly augmented the influence of Görres and his circle of friends, the most loyal and earnest of whom at this time was Dollinger.

The dispute on the question of mixed marriages in Prussia, known as the Kolner Streit (1831), followed close upon that in Bavaria (1831); both were fought out dramatically, and brought Dollinger and his Munich friends to the front as vigorous defenders of Catholic rights. The first estrangement of Dollinger from Görres and his friends came about through the publication of an important manual of canon law by Phillips (from 1834 to 1847 professor of canon law at Munich). To Dollinger it seemed that the latter emphasized excessively the extent of the papal pre-
The change that had come about in Döllinger's views during the preceding years may best be measured by the fact that his colleagues in Frankfurt obtained his consent to the following plan. General von Radowitz, in the name of the Catholic deputies, was to make this declaration in Parliament: The orders, including the Jesuit Order, are not a part of the living organism of the Catholic Church; the Jesuit Order is no wise necessary in Germany; the German episcopate and the German clergy do not need its help to fulfill their obligations; German learning [die deutsche Wissenschaft] needs no aid of this nature. The possible advantages for the Catholic Church accruing from the co-operation of the Jesuit Order would be greatly outweighed by the disservice and damage that its presence would create. If it were proposed to introduce the Jesuits into any German State, moved by the higher interests of the Catholic Church, we would protest most decidedly against the execution of any such plan.

The relations of Döllinger with the German episcopate were frequent, particularly after the meeting of the German and Austrian prelates at Würzburg (22 Oct. to 16 Nov., 1818). His report concerning the national Church and national synods, as submitted to this important assembly, aroused deep interest, was received with approval in many episcopal circles, and assured him the leadership in the acute ecclesiastico-political discussions then impending. Between 1822 and 1857 he visited Northern and Central Italy, and in 1837 Rome. Apart from his learned researches on these occasions, he profited by these journeys to strengthen his existing relations with numerous Italians, ecclesiastics and laymen, also to make new acquaintances and friendships. While Döllinger sought in every way to retain the favour of King Maximilian I of Bavaria, he always considered Munich as his own past continued to widen. For a while the famous professor seemed to stand almost alone, particularly after the stormy scenes of the Munich Congress of Catholic savants (28 Sept. to 1 Oct., 1863). Daniel Bonfatti von Haneberg, Abbot of St. Boniface in Munich, opened this Congress of eighty-four members, mostly German theologians, on which occasion Döllinger delivered his famous discourse, "Die Vergangenheit und Gegenwart der katholischen Theologie" (The Past and Present of Catholic Theology). Many of those present, among them Haneberg, saw with sorrow that they could not follow Döllinger along the new path he was taking. He held no longer to the universal idea of Catholicism as a world-religion; in its place he put the idea of the Church, and his tone, that of a man who said he had no other ambition, more and more nationalist in its tone was frequently bitter, occasionally even violent; writing over his own name he usually avoided such extremes. His first work (1826), "Die Eucharistie in den drei ersten Jahrhunderten", has already been mentioned. In 1828 he published the first volumes of Hortig's "Kirchengeschichte", from the Reformation to the end of the eighteenth century. He also wrote frequently at this time for "Eos", a new review founded by his friends, Baader and Görres; most of the articles dealt with contemporary subjects. According to Friedrich he also prepared "Ümrisse zu Dante's Paradies von P. von Corneius", i.e. an introduction to that writer's edition of Dante's "Paradiso". His journalistic activity, however, was far from pleasing to the new Church authorities. He was, for instance, the author of the book "Hormayr, a somewhat erratic, but influential, person, who so influenced the king that he wished Döllinger well out of Bavaria, as has been seen in the case of his call to Breslau.

In these years, also, he defended with vigour the matrimonial legislation of the Church, in connexion with the "Naked Marriages" (1834) and "Civil Marriage" (1835) in the Upper House of the Bavarian Parliament, and he was author of an anonymous work "Über die gemischten Ehen"; at the same time he suggested as a means of avoiding all conflict, that the civil marriage be separated from the religious ceremony. Meanwhile he continued to collect the material for his scientific works. In 1833 and 1835 respectively he published the first and second parts of his "Handbuch der Kirch
meeting of the German and Austrian bishops. Gradually he came to be looked upon as a Gallican, nor was this because of his frequently expressed and strongly dislike of the Jesuits. Many persons, among them the best and most loyal supporters of the Church, looked upon Dollinger with a certain anxiety on the course of

To understand fully the profound changes working in the mind of Dollinger during the critical years from 1847 to 1852, it is well to recall his discourses at the general meetings of the "Katholischer Verein" at Ratisbon (1849) and Linz (1850), also those in the Upper House of the Bavarian Parliament, in St. Paul's at Frankfort, and at the meetings of the German hierarchy at Würzburg (1849) and Freising (1850). To some extent, also, disappointment was responsible for his new mental attitude; his friends and admirers had in vain to obtain for him an important German see. It is worthy of note also that about 1855 the author of the work on the Reformation began gradually to modify his views to such an extent that eventually (in 1859) he wrote a panegyric on Protestantism.

The Greek patristic text entitled "Philosophoumena, or Refutation of all Heresies", discovered in 1812 and edited by Miller (Oxford, 1831), at once fascinated Dollinger, and he devoted to its study all the rich powers of his erudition, critical skill, and insight. He published in 1853 his "De Haereticis et haereticis und der römische Kirchen in der ersten Hälfte des dritten Jahrhunderts", etc. a study of the Roman Church from 200 to 250, in reply to the interpretations of the "Philosophoumena" published by Bunsen, Wordsworth, Baur, and Gieseler. Despite the contrary arguments of De Rossi, Dollinger's opinion has prevailed, and it is now generally acknowledged that Hippolytus is the author of the work in question. Dollinger's essay in the "Historisch-Politische Blätter" (1853) entitled "Betrachtungen über die Frage der Kaiserkrönung", considerations on the imperial coronation, contributed not a little to deter Pius IX from crowning Napoleon III. Concerning the definition of the dogma of the Immaculate Conception Dollinger, in another essay, rejected it as a rather superficial historical grasp of the question; the defects in his theological equipment were here most noticeable. Indeed, he was much less concerned with the doctrine itself than with the person who wished to proclaim it as a dogma of faith. It was also his first open protest against a pope who was soon to proclaim that Papal Infallibility which seemed to Dollinger an utterly intolerable dogma, from his viewpoint of exaggerated esteem for historical theology.

The year 1857 was marked by the appearance of his "Heidenthum und Judenthum, Vorhalle des Christentums" (Heathenism and Judaism, the Vestibule of Christianity), the first part of his long contemplated attempt "Der Glauben der Völker" (The Faith of the Nations) excised Dollinger to an extraordinary degree. He became firmly persuaded that theological science could be saved only by the German Catholic Church, not by the Catholic Church in Germany. By theological science he meant chiefly historical theology. All other ecclesiastical interests seemed to this great scholar quite subordinate. His aversion to the education of the clergy in seminaries, later quite pronounced, was another result of this mental attitude, the trend of which he revealed on various occasions at the Frankfort Parliament, and in the above-mentioned report (1851) of the Würzburg
the Temporal Power; to this he acceded with pleasure, and the discourses given in the royal Odem were followed with deep attention by crowded audiences. His utterances, however, were so imprudent and so clearly inspired by Liberalism that in the midst of one of them the papal nunco, Monsignor Chigi, arose with indignation and left the hall. The impression made by these discourses on the Catholic world was painful in the extreme. Döllinger was himself deeply troubled by the agitation aroused; to justify himself in some measure, also to strengthen his position, now seriously compromised, he composed in great haste and issued during the same year his "Kirche und Kirchen, Papstthum und Kirchenstaat". It seems incredible that the opinions and judgments one reads in this work are really Döllinger's own; the reader is haunted by the suspicion that he has before him a remarkable mixture of Byzantinism and hypocrisy.

The Catholic academic circles of Germany were in the meantime deeply agitated by the discussions incident to the renovation of Scholasticism (see Neo-Scholasticism) in theology and philosophy, and those over the merits of the episcopal seminaries as against the faculties at the universities and the education of candidates for the priesthood. There were excesses on both sides that intensified the situation, whereupon it seemed to many that an academical congress would be a helpful measure. An assembly of Catholic scholars met in 1863 at Munich, before which, as already stated, Döllinger delivered (28 September) the sermonegnment that "Allgemeine der katholischen Theologie" (The Past and Present Catholic Theology). His views, as expressed on this occasion, were calculated to irritate and embitter his opponents, and a reconciliation seemed farther away than before. Shortly afterwards, in the thirteenth thesis of the papal Syllabus of 8 Dec., 1864 (see Quanta Curva), certain opinions of Döllinger were condemned.

It was unfortunate, but not surprising, therefore, that the "Papststaben des Mittelalters", medieval fables about the popes (Munich, 1863; 2nd ed., 1890), received no impartial appreciation from his opponents; the pages (131–53) on the Monothelitism of Pope Honorius were considered particularly offensive. From this point on, Döllinger and his "Allgemeine" were almost universally ignored. The pen of Döllinger produced mostly anonymous articles, in which his approaching apostasy was daily more clearly foreshadowed. He gave also much thought to the plan of a universal German biography, the present "Allgemeine deutsche Biographie". Though it was finally von Ranke who induced the Munich Academy to undertake the now practically finished work which, unfortunately, still shows frequent traces of partisanship, it was Döllinger's arduous and insistent effort that first moved the Academy to consider the proposition. There is even yet a very widespread conviction, and it was believed by the great Christian archaeologist De Rossi, who was quite accurately informed on all the details of the Vatican Council, that Döllinger had in reality been invited to take an honourable share in the preliminary work for the council. Nor does this seem at all improbable to those who understand his character. It is, in any case, very regrettable that on this point the influence of Cardinal Reisch should have outweighed that of Cardinal Schwarzenberg, and availed to exclude the Munich historian.

Scarcely had the first detailed accounts of the council's proceedings appeared, when Döllinger published in the Augeburg "Allgemeine Zeitung" his famous "March articles", reprinted anonymously in August of that year under the title: "Jahres, der Papst, und das Konzil". The accurate knowledge of papal history here manifested easily convinced most readers that only Döllinger could have written the work. At this time he provoked the "Hohenlohe theses" and followed them up with an anonymous work, "Erwägungen für die Bischöfe des Konzils in die Frage der Unfehlbarkeit", considerations concerning papal infallibility for the bishops of the council. This work was translated into French, and a copy sent to every bishop. In the meantime Cardinal Schwarzenberg, in unison with French sympathizers, urged him to be present at Rome in his private capacity during the council; he preferred, however, to remain at Munich, where he prepared for the aforer "Allgemeine Zeitung", with materials sent him regularly from Rome (even by bishops), the well-known Roman correspondence (Briefe vom Konzil), each letter of which fell in Rome like a bomb, but whose real author no one knew. When Döllinger wrote for the same journal, over his own name, the articles "Einige Worte über die Unfehlbarkeit der Konzilsdekret", "Die neue Geschäftsdordnung im Konzil" (the council's new order of business), he was denounced in Rome as a heretic. Bishop Ketteler addressed to him an open letter quite brusque in tone, while other bishops urged him, if possible, to cease. On 3 July 1870, the personal infallibility of the pope and his universal pastoral office were declared articles of faith. The foregoing presentation of the actual situation in that critical time is taken from the life of Döllinger by Johann Friedrich, the theologian of Cardinal Hohenlohe during the council, and to whom, despite his death of smallpox, occurring the affairs of the council, Döllinger is indebted for the "Allgemeiner zeitung". The declaration of papal infallibility meant naturally for Döllinger a severe internal conflict. The facts, however, do not justify the statement that he had long previously determined never to accept the dogma. The Archbishop of Munich, however, insisted on a public declaration of his attitude, and Döllinger was at last forced to yield. On 29 March, 1871, he declared his refusal to accept the dogma and stating his reasons in his character as Christian, theologian, historian, and citizen.

Leo XIII and Pius X have both declared, with all due formality and solemnity, that Church and State, even within the territory of the one and the other, are independent; if the Döllinger portrait of an infallible pope dominating over the State is, therefore, a caricature. For the great scholar it was dies ater when he wrote these words, for the theologian a period of profound mental confusion, for the Christian a succumbing to spiritual arrogance, for the citizen a full confession of the bureaucratic omnipotence of the State, a kind of belated resurrection of the memories of his youth.

Döllinger had definitely severed connexion with the Church. Three weeks later (18 April, 1871) both Döllinger and Friedrich were publicly declared excommunicate. The action of the archbishop, under the circumstances unavoidable, aroused much feeling; on the one side it was hailed as a decisive step that had a salutary effect, on the other many rejoiced that the world-renowned scholar had not bent his neck under the yoke of Rome. This marked the rise of the sect of the Old Catholics. At Pentecost of the same year (1871) a declaration was published, chiefly the work of Döllinger, setting forth the need of an ecclesiastical organization. Döllinger also signed a petition to the Government asking for one of the churches of Munich. Hitherto the opposition of this party to the Church had been mostly of a philosophico-historical character, and the dominant statesmen of the time could turn it to little practical account. It was now the hour for a number of inimical canonists whose opportunity lay in the anti-Catholic tendencies of the governments of the period. Prince Bismarck's plan of a National German Catholic Church, as independent as possible to
make it (foreshadowed by Döllinger in 1819), corresponded now with the wishes of the apostate Catholics, henceforth governed absolutely by the canonist von Schildescheit (see OLD CATHOLICS). The first assembly of these opponents of the Vatican Council was held at Munich, 22–24 Sept., 1871. On the suggestion of von Schildescheit, and despite the opposition and warnings of Döllinger, it was decided to establish the "Old Catholic Church". Henceforth Döllinger followed a policy of vacillation, avoiding on the one hand any formal relationship to the new Church, on the other helpful to it by counsel and deeds; at one time disapproving positively important decisions of the Council, and again placing at its disposal all his influence against them. But Döllinger considered the Church of Old Catholics, and was personally very distasteful to him; in public, however, though with measured reserve, he defended it. Henceforth formally excommunicated from the Catholic Church, he recognized the validity and legality of that act; at the same time he held it beneath his dignity to submit to the jurisdiction of Bishop Reim- kens, for whom the Old Catholics had obtained consecra- tion from the Jesuits in Holland. He stood, therefore, between the two camps, and looked on it as almost a calumny that the most insignificant members of the new sect considered him, more or less, an inti- mate adherent and a sharer of their trials. The next seven years he spent in pacifying his con- science, or, in his own words, in a process of internal criticism; under the influence of nothing, apart from a few essays, his academic discussions, and the work "Ungedruckte Berichte und Tagebücher zur Geschichte des Konzils von Trent", unedited reports and diaries useful for a history of the Council of Trent (1876). In 1887 he edited, with Reusch, the au- tobiography of Bellarmine up to 13 June, 1613, in Ger- man; with Reusch also he published (1889–90) in two volumes and in a new edition, the De römisch-katholischen Kirche seit dem sechszehnten Jahrhundert, mit Beiträgen zur Geschichte und Caracteristik des Jesuitenordens", or a history of the moral-theological discussions in the Roman Catholic Church since the sixteenth century, including studies on the history and characteristics of the Jesuit Order. About the same time he published in two volumes his "Die Leute der Gegenwart", a life of Montan, whom he had after his death appeared (1891) the third volume of his "Akademische Vorträge", or academic discourses. He returned to the end a remarkable physical and mental strength. Though his latest writings met with a kindly reception in scientific circles, they were not considered as superior in merit, either from the view- point of scientific history or as critical narrative. Seldom has it been so clearly proven that whenever a man turns completely from a glorious and honourable past, however stormy, his fate is irreversibly sealed.

Dolman, Charles, publisher and bookseller, b. at Monmouth, England, 20 Sept., 1807; d. in Paris, 31 December, 1863. He was the son of Charles Dol- man, a surgeon of Monmouth, and Mary Frances his wife, daughter of Thomas Booker, a Catholic publisher in London. Educated at St. Gregory's, the Benedictine college at Downside, near Bath, he later, while residing at Preston, Lancashire, studied architecture under Joseph A. Hansom, intending to follow that profession, but abandoned the idea on being invited by the Bookers, publishers and booksellers, into which family his father had married, to go to London. When Joseph Booker died in 1837, he was induced to carry on the business with his aunt, Mary Booker, and his cousin, Thomas Booker. In 1840 the name of the firm was changed to Booker & Dolman and finally the business was continued in his name only. His career as a publisher of periodical literature began when in 1838 he brought out a new series of 'The Catholic Maga- zine', which up to that time had been known as "The Edinburgh Catholic Magazine". In contradistinc- tion to "The Catholic Magazine", a much older publication which had gone out of existence in 1835, Dolman's publication was discontinued in June, 1844, but its name had become so widely known that in March, 1845, the magazine was re-established under the title of "Dolman's Magazine and Monthly Miscellany of Critic- ism". This was at first under the sole management of its publisher, but later the Rev. Edward Price succeeded him. Like the others it was short-lived and in 1849 it was merged with "The Catholic Weekly and Monthly Orthodox" under the title of "The Weekly Register". It first appeared under the new name, 4 August, 1849, published by Thomas Booker. From this time on Dolman abandoned the publication of periodicals and devoted himself solely to works that had never before been brought out by the Catholic press. His many efforts to raise the standard of the Catholic press ended in failure. Disheartened by his ill-success and broken down in health, he retired to Paris, where he was received by his wife as an only son, the Very Rev. Charles Vincent Dolman, of Hereford, canon of Newport.

Thomas Gaffney Taaffe.

Dolores Mission (or Mission San Francisco de Asis of the Dolores), in point of time the sixth in the chain of twenty-one California Indian Missions; formally opened 9 Oct., 1776. The date intended for the celebration was 4 Oct., the feast of St. Francis of Assisi, but owing to the absence of the military commander of the neighbouring presidio, which had been established on 17 Sept., the feast of the Stigmata of St. Francis, the formal founding was delayed. The first Mass was celebrated near the site was celebrated in a tent by Father Francisco de la Fuente, O.F.M., in the summer of Peter and Paul, 29 June, and on 28 July the first Mass was offered up in the temporary chapel. Father Pa- lou on the title pages of the mission records gives 1 August as the day of foundation. The early mission- aries, however, always celebrated the 4th of October as the patronal feast of the mission. The appellation "Dolores" was added because the mission was estab- lished on a stream which Father Pedro Font, O.F.M., and Captain Juan Bautista de Anza had discovered on 28 March, 1776, and in honour of the Blessed Virgin who called Arroyo de Nuestra Señora de los Dolores. In all official documents, reports, and in the records, the mission bears no other name than San Francisco de Asis; but after 1824, when the Mission San Francisco Solano was established at Sonoma, to avoid confu- sion it was named Mission Dolores. From 1824 to the mission on the Dolores. The founders of the mission were Father Francisco Palou, the historian, and Father Pedro Benito Cambon. The other mission- aries stationed here in the course of time were the Franciscan Fathers Tomás de la Peña, Miguel Giribet, Vicente de Santa María, Matías Noriega, Norberto de Santiago, Diego Garcia, Faustino de Solís, Antonio Dántí, Martín de Landaeta, Diego de Noboa, Manuel Fernández, José de Espí, Ramón Abella, Luis Gil, Juan Sainz, Vicente Oliva, Juan Cabot, Blas Ordaz, José Altimira, Tomás Estéñega, Lorenzo Quijias, José Gu- tiérrez, José Mercado, José Real, Miguel Muro. The Rev. Fray Benito Sanfeliu, the first secular priest, took charge in 1816. The cornerstone of the present church, the oldest
building in San Francisco, and which survived the earthquake of 1906 practically without damage, was laid in 1782 and finished with a thatched roof. In 1795 tiles replaced the thatch. The mission buildings as usual were erected in the form of a square. The church stood in the south-east corner fronting the east. The wings of the square contained the rooms of the missionaries, two of whom were always there until about June, 1828, the shops of the carpenters, smiths, saddlers, rooms for melting tallow and making soap, for agricultural implements, for spinning wool and weaving fabrics. There were twenty looms in constant operation, and two mills moved by mule-power ground the grain. Most of the neophytes were engaged in agriculture and stock-raising. Owing to the barren nature of the soil and the high winds in the neighbourhood, sowing and planting was done ten or twelve miles down the peninsula. The stock also grazed far away from the mission. About one hundred yards from the church stood the neophyte village, composed of eight rows of one-story dwellings. The girls lived at the mission proper under the care of a matron (see California Missions). A school was in operation in 1818. The highest number of Indians living at the mission was reached in 1820, when 1242 neophytes made their home with the missionaries and received food, clothing, and instruction. The first baptism of an Indian occurred on 24 June, 1777. From that date till October, 1845, when the last Franciscan departed, 7,200 names entered into the baptismal record, about 500 of which represented white people. During the same period 5393 deaths occurred, and 2156 marriages were blessed; about eighty of the latter were those of white couples. From 1785 to the end of 1832, for which period we have the reports, the mission raised 120,000 bushels of wheat, 70,226 bushels of barley, 13,200 bushels of corn, 14,386 bushels of barley, 19,986 bushels of peas, and 905 bushels of lentils and garbanzos or horse beans. The largest number of animals owned by the mission was as follows: cattle, 11,340 head in 1809; sheep, 11,324 in 1814; goats, 65 in 1786; horses, 1,239 in 1831; mules, 45 in 1813.

DOMED
the monastery of St. Luke, Phocis, Greece, are two churches of the eleventh century, side by side, the smaller of which has a drum with windows in it, whereas the larger church has no drum, and the windows are in the dome. The drum is universal in all domed churches of the Renaissance, at which time it received special treatment and became a most important feature. Many of these drums are not circular in plan externally, but are many-sided, and the arches are often enriched by marble shafts, etc. The carrying-up of the walls vertically is a good expedient constructionally, as it provides weight above the haunches of the dome and helps to neutralize its thrusts. In the churches of the second period, at Constantinople, Salonica, Athens, and other parts of Greece, in which the true drum occurs, it is of considerable height and is generally eight-sided. Windows come at each side, and over the windows are arches which cut into the dome itself.

A primitive form of the dome and the barrel vault is of great antiquity. In some districts men were compelled to build in stone or brick or mud, because there was no wood, as in Assyria; in other districts because they had not the tools to work wood. In all such cases some form of dome or tunnel vault had to be used for shelter. In tracing the growth of the dome in historical times, it has been regarded as an outcome of the architecture of the Eastern Empire, because it was at Constantinople and in the Byzantine provinces that it was first employed in ecclesiastical structures. But it was the Romans who in reality developed the use of the dome, as of all other applications of the semicircular arch. From Rome it was carried to Constantinople and thence to other parts of Europe, to some extent by the same process of diffusion from the capital, to different parts of the Western Empire. In Eastern Christendom the dome became the dominant factor in church design; whether a single dome, as at Saint Sophia, Constantinople (built, 532–537), or a central dome encircled by other domes, as at St. Mark's, Venice, or a row of domes, as at Angoulême. The plan and domes of Angoulême are reproduced in the new Catholic cathedral at Westminster. The Roman dome was a hemisphere supported by a circular wall. Its finest example was the Pantheon, Rome. Equally characteristic, though smaller, examples abound, e.g. at Rome, the temple of Minerva Medica, the tomb of Constantia, now the church of Santa Costanza, etc. Viollet-le-Duc in writing of the domes of Ravenna, says, "The seats of this majestic cupola is the widest, the most beautiful, the most solid and most stable of all the great domes of the world." The inside diameter of the dome is 142 feet. Previous to the building of the Pantheon in its present domical form, during the reign of Hadrian about A.D. 123, the history of the dome is for the most part a blank.

The primitive Eastern dome seems to have been on a model and to have been used for subordinate purposes only. It was a common architectural feature in ancient Egypt and Mesopotamia. In later times the dome was largely employed in architecture by the Persian Sassanids, Mohammedans, and the Byzantines. From the first domed churches built for Christian worship sprang Byzantine architecture and its offshoots. The builder of the earliest domed church of any magnitude in the West-his name is lost—was at any rate in his treatment of the plan of the church, the arrangement of its parts, and the design of its structure, an effective exponent of the general architectural ideas of the East. The Eastern dome was the prevailing conception of Byzantine architecture, and M. Choisy, in his "Art de bâtir chez les Byzantins," traces the influence of this domical construction on the work of the Scholastics, who show how from the Byzantine conception of the Eastern Empire became possible. Domes were now, from the time of the construction of Saint Sophia, placed over square apartments, their bases being brought to a circle by means of pendentes, whereas, in Roman architecture, domes as a rule were placed over a circular apartment. The grouping of small domes round a large central one was very effective, and one of the peculiarities of Byzantine churches was that the dome had no additional outer covering. The dome was rarely used by medieval builders except when under oriental influence, hence it was practically confined to Spain and Italy. The dome of the cathedral at Pisa, the first model of the Tuscan style of architecture, was begun in the eleventh century, and in the thirteenth was founded the cathedral at Florence. Its dome equals in size that of St. Peter's at Rome, and was its model. During the Italian Renaissance, domed construction became again of the first importance, possibly on account of its classical precedent, and it is interesting to note that the Pantheon became once more the starting-point of a new development which culminated in the domes of St. Peter's, Rome, and St. Paul's, London.

The substructure of the dome of St. Peter's is a round drum, which serves as a stylobate and lifts it above the surrounding roofs. On this stands the ringwall of the drum, decorated with a Corinthian order and carrying an attic; on this sits the oval mass of the noblest dome in the world. The drum, fifty feet high, is pierced by sixteen square-headed windows. The enormous thickness of the stylobate allows an outside offset to receive the buttresses which are set between the windows, in the shape of spandrils, with engaged columns at the corners, over which the entablature is broken. The curve of the dome is of extraordinary beauty. Between its ribs, corresponding to the buttresses below, are three diminishing tiers of small dormer windows. The lantern above, with an dome order, repeats the arrangement of window and buttresses in the drum below, and is surmounted by a Latin cross rising 448 feet above the pavement. The foremost Renaissance church in Florence is the church of the Annunziata, and is remarkable for a fine dome carried on a drum resting directly on the ground. To the latest time of the Renaissance in Venice belongs the picturesque domed church of Santa Maria della Salute. The two finest domes in France are those of the Hôtel des Invalides and the Panthéon (formerly the church of Sainte-Geneviève) at Paris. Domes built in the early part of the twelfth century are to be found at Valencia, Zamora, Salamanca, Clermont, Le Puy, Cahors. They are also found in Poitou, Périgord, and Auvergne; at Aachen, Cologne, Antwerp, and along the banks of the Rhine; at Aosta, Pavia, Como, Parma, Piacenza, Verona, Milan, etc. There are, besides, the bulbous domes of Russia and the flattened cupolas of the Saracens. The dome became the lantern in English Gothic, and the octagon of Ely cathedral is said to be
the only true Gothic dome in existence. The central octagon of the Houses of Parliament, London, is the best specimen of a modern Gothic dome. Arab domes are mostly of the pointed form such as are derived from the rotation of the Gothic arch or bulbous, the section being a horse-shoe arch. Very beautiful examples are seen in the buildings known as the tombs of the caliphs at Cairo. Among the finest examples of domed buildings in the East are the Tombs of Mohammedan sultans in the south of India and at Agra. The largest dome in America is that of the Capitol at Washington. It is built of iron.

THOMAS H. POOLE.

DOMENECH, Emmanuel-Henri-Dietandonné, Abbé, missionary and author, b. at Lyons, France, 4 November, 1829; d. in France, June, 1886. In the spring of 1846 before completing his seminary studies and when not yet twenty years of age, he left France in response to an urgent appeal for missionaries to help develop the Church in the wilds of Texas, then rapidly filling up with American and European immigration. He went first to St. Louis, where he spent two years completing his theological course, studying English and German, and gathering knowledge of missionary requirements. In May, 1848, he was assigned to duty at the new German settlement of Castroville in Texas, from which he was transferred later to Brownsville. The war with Mexico was just concluded; raiding bands of Mexicans and rangers were ravaging on both sides of the Rio Grande, while outlaws from the border States and almost equally lawless discharged persons filled the new towns, and hostile Indians hovered constantly in the background. A cholera epidemic added its horrors. Nevertheless, the young priest went bravely to work with such energy that he soon became an efficient power for good throughout all Southern Texas. In 1850 he visited Europe and was received by the pope. Returning to Texas, he continued in the mission field two years longer, when he returned to France with health broken and was appointed titular canon of Montpellier. When the French troops were dispatched to Mexico in 1861 he was selected to accompany the expedition as almoner to the army and chaplain to the Emperor Maximilian. After the return to France he devoted his remaining years to European travel, study, and writing, and the exercise of his ecclesiastical functions. In 1882-3 he again visited America.

Among his numerous works dealing with travel, history, and theology, may be noted: "Journal d'un missionnaire au Texas et au Mexique" (Paris, 1857); "Voyage dans les solitudes américaines" (Paris, 1858); "Histoire du jansénisme"; "Histoire du Mexique" (Paris, 1860); "Souvenirs d'outre-mer" (Paris, 1884). His principal works have appeared also in English translation. In regard to his much-controverted "Manuscrit pictographique américain" (Paris, 1860), an examination of the supposed Indian pictographs leaves no doubt that in this case the unsuspecting missionary was grossly deceived.

Consult his own works, with introductions; also Petzholdt, Le livre des sauvages (Brussels, 1861).

JAMES MOONEY.

Domenichino, properly Domenico Zampieri, an Italian painter, b. in Bologna, 21 Oct., 1581; d. in Naples, 16 April, 1641. He began his art studies in the school of Calfavert, but being ill-treated there, his father, a poor shoemaker, placed him in the Carracci Academy, where Guido Reni and Alberti were also students. Domenichino was a thoughtful, plodding youth whom his companions called the "Ox," a nickname also borne by his master Ludovico. He took the prize for drawing in the Carracci Academy, gaining thereby both fame and hatred. Stimulated by success, he studied unremittingly, particularly the expression of the human face, so that Bellori says "he could delineate the soul".

His student days over, he first visited Parma and Modena to study Correggio, and then went to Rome, where his earliest friend and patron, Cardinal Aguechi, commissioned him to decorate his palace. In Rome he assisted the Carracci with their frescoes in the palace of Cardinal Farnese, who became such an admirer of Domenichino that he had him execute many of the pictures in the Basilian Abbey of Grotta Ferrata. Domenichino's best frescoes are in this church. With Guido he painted, for Cardinal Borghese, in S. Gregorio; for Cardinal Aldobrandini he executed ten frescoes at Villa Frascati; for Cardinal Montalto he decorated S. Andrea della Valle; and for Cardinal Bandini he painted four pictures for S. Silvestro which rank among his best productions. He immortalized his name by painting (1614) for the altar of S. Girolamo della Carità, the "Communion of St. Jerome", a copy of which, in mosaics, is in St. Peter's. This is one of the great pictures of the world and was considered second only to Raphael's "Transfiguration". He received about fifty dollars for it. Napoleon took it to Paris but the Allies returned it. Jealousy of Domenichino long accumulating now burst forth, and he was accused of copying his masterpiece from Agostino Carracci. Weary of attacks, the
THE COMMUNION OF ST. JEROME—DOMENICHINO
THE VATICAN, ROME
Domesday Book was the name given to the record of the great survey of England made by order of William the Conqueror in 1085-86. The name first occurs in the famous "Dialogus de Scenarii", a treatise compiled about 1176 by Richard Fitznigel, which states that the English called the book of the survey "Domestlic", or "Day of Judgment, because the inquiry was one which none could escape, and because the verdict of this register as to the holding of the land was final and without appeal. Certain is that the native English resented William's inquisition. "It is shame to tell", wrote the chronicler, "what he thought it no shame for him to do. Ox, nor cow, nor swine was left that was not set down upon his writ." The returns give full information about the land of England, its ownership both in 1085 and in the time of King Edward, its extent, nature, value, cultivators, and villeins. The survey embraced all England except the northernmost counties. The results are set down in concise and orderly fashion in two books called the "Exchequer Domesday". Another volume, containing a record of Wilt, Dorset, Somerset, Devon, and Cornwall, is called the "Exon Domesday", as it is in the keeping of the cathedral chapter of Exeter.

The chief interest of the Domesday Book for us here lies in the light which it throws upon church matters. As Professor Maitland has pointed out, a comparison of the Domesday accounts of the estates of the Church with those of the secular barony and the villeinage shows not only that the Church held lands of considerable, sometimes of vast, extent, but that she had obtained these lands by free grant from kings or underkings during the Saxon period. We find, for example, that four monasteries, Worcester, Evesham, Pershore, and Westminister, were lords of seven-twelfths of the soil of Worcestershire, and that the Church of Worcester alone was lord of one-quarter of that shire besides other holdings elsewhere. It is probable, however, that this did not imply absolute ownership, but only superiority and a right to certain services (Maitland, "Domesday Book and Beyond", pp. 236-42). This must be borne in mind when we see it stated, and so far correctly, on the authority of Domesday, that the possessions of the Church represented twenty-five per cent of the assessment of the country in 1086 and twenty-six per cent of its cultivated area in 1086. These lands were in any case very unequally distributed, the proportion of church land being much greater in the South of England. The record does not enable us to tell clearly how far the parochial system had developed, and though in Norfolk and Suffolk all the church properties had been entered in the Domesday, and in the latter, the county, the same care to note the churches was obviously not exercised in the West of England. Much church property seems to have been of the nature of a tenancy held from the king upon condition of some service to be rendered, often of a spiritual kind. Thus we read; "Alwin the priest holds the sixth part of a hide" at Turvey, Beds, "and held it temperate regis Edwardi, and did what he bade with it". King William afterwards gave it to him in alms, on condition that he should celebrate two feasts at English and Queen twice a week." Valuable as is the information which the Domesday Book supplies, many questions suggested by it remain obscure and are still keenly debated. The simile of the whole record was brought out some years ago by photozincography, and at the end of the eighteenth century an edition was printed in type specially cast to represent the contractions of the original manuscript.

The most convenient introduction to the subject is BALLARD, The Domesday Inquest (London, 1900). The more recent student may be referred to MAITLAND, Domesday Book and Beyond (new ed., London, 1895); to ROUND, Feudal England (London, 1895); and to EYTON, Domesday Studies. But there are many minor essays dealing with questions of local interest. HERBERT THURSTON.

Domicile (Lat. jus domiciliti, right of habitation, residence).—The canon law has no independent and original theory of domicile; but the law of Roman and Barbarian law, and of all modern civil codes, borrowed this theory from the Roman law; the canon law, however, extended and perfected the Roman theory by adding thereto that of quasi-domicile. For centuries ecclesiastical legislation contained no special provision in regard to domicile, adapting itself quite unreservedly to this point both to Roman and Barbarian law. A great change was brought about in the thirteenth century, after the revival at Bologna of the study of Roman law, that legisla and the canonists, returned to the Roman theory of domicile, introducing it first into the schools and then into practice. Not that the Church had "canonized", so to speak, this particular point of Roman law more than others, but civil law, being more ancient, formed a basis for canon law, which accepted it, at least in so far
as it was not at variance with later decrees of pontifical law. So true is this that there exists no document in which the theory of domicile has been completely and officially expounded by an ecclesiastical legislator.

I. ROMAN LAW.—We must therefore revert to Roman law, which established domicile as the extension or communication of a pre-existent legal status of individuals—origin (origo, jus originis). In the theory of the Roman lawyers each man belongs to his municipality, to his city, where, as he contributes his share to the expenses and taxes, so he has a right to the common advantages. Children naturally follow their father's condition and belong likewise to the city, even though born at a distance. Such is the Roman origo, quite akin to what we call nationality, except that the origo relates to the restricted locality of one's birth, and nationality to one's native land. Hence it is birth, the legal birthplace, that determines one's origo, i.e., not the actual site of birth but the place where each one should have been born, the municipality to which the father belonged (L. 1, ff. Ad munip.).

Let us now suppose a man settled for a long time in a city of which he is not a native. Partly in return for the taxes he pays, and partly to permit him to exercise local civic duties, he is granted the status of a real citizen, without loss, however, of his original origo. This, then, is the primitive concept of domicile in Roman law: the communication to a man, born in one municipality but residing permanently in another, of the civil rights normally reserved to citizens who are natives of the locality. To become as one of the latter, the stranger must create for himself a domicile, and it was this that necessarily led jurists to define domicile as the conditions upon which it could be acquired. Hence the celebrated definition of domicile given by the Emperors Diocletian and Maximianus (L. 7, C. de incol.): "It is certain that each one has his domicile in the place where he has established his home and business and has his possessions; a residence which he does not intend to abandon, unless called elsewhere, from which he departs only as a traveller and by returning to which he ceases to be a traveller." The juridical element constitutive of domicile is the intention, the will definitely to settle oneself in a place, this will being deduced from the circumstances and especially the conditions of installation. It implies indefinite stability, not perpetuity in the restricted sense of the word, as though one renounced the right to change domicile. Another domicile can be acquired at any time he be acquired on the same conditions as the first; it is lost when the intention of abandoning it is coupled with the fact of desertion. Since, therefore, domicile conferred the same rights as origo, its importance became gradually more and more marked.

We can now better understand the words that so often occur in Roman law and have been adopted by canonists: those who belong to a municipality by right of birth are citizens (cives); those who come from elsewhere, but have become its members by domicile are inhabitants (incolarum), though these terms are used almost synonymously by legists and canonists; those who have spent a sufficient time there without, however, acquiring a domicile, are strangers (transientes). We shall see below, for reasons for the quasi-domicile. Finally, those who make but a passing sojourn there are transients (peregrini; cf. L. 239, de Verb. sign.). To these categories canonists have added one which the Roman origo, being permanent, could not recognize, namely the wanderers (vagati), who have no fixed residence or who, having definitely abandoned one domicile, have not as yet acquired another.

II. DEVELOPMENT OF "DOMICILE" IN CANON LAW.

—In the troublous times that prevailed after the Barbarian invasions, the domicile of Roman law was lost sight of, and even the word itself disappeared from the juridical language of the time. However, this does not mean that persons inhabiting certain limited districts had wholly ceased to be connected with local authority, whether civil or religious, nor that all acts were regulated exclusively, after the barbarian concept, by a personal code. The material fact of habitation could not, it is true, be ignored, but it no longer served for a theory of domicile. The medieval ecclesiastical canons say that each Catholic (fidelis) should pay his tithes in the church where he was baptized and that he be held by these tithes, etc., but there is no mention of domicile.

The Roman theory was again restored to honour by the glossarists of the Bolognese School, especially by Accursius in the beginning of the thirteenth century. Whether it was because they mistook the real meaning of origo or desired to explain it in a way that suited the customs of their time, they interpreted it as a sort of domicile resulting from one's birthplace, and if one was born there per accidens, from the place of one's father's birth. Except for this inaccuracy, the Roman theory was well expounded. Moreover, according to the favourite principles of their time, the glossarists brought into prominence the double constitutive element of domicile (or, properly speaking, of the right of domicile) and the juridical element (corpus), i.e., the domicile in the sense of a certain residence, etc., together with the position and the rights of domicile; hence the concept, domicile (dominium), i.e., the intention to remain in this habitation indefinitely. Although they did not contribute directly to this revival of domicile, canonists nevertheless adopted it and it was definitively admitted in the gloss of "Liber Sextus" (cc. 2 and 3, de sepult.). They applied these rules to the acts of Christian life: to the marriage and the divorce, the circumscription of the beneficium, the extreme unction, funerals, interments, etc., also to ordination and judicial competency. The actual canonical rules on domicile are about the same.

In the meantime almost the only development of canon law in this matter has been the creation of the quasi-domicile theory, foreign alike to Roman and modern civil law. As its name implies, quasi-domicile is closely patterned on domicile and consists in a sojourn in some one place during a sufficient length of time. Not only does it not call for abandonment of the real domicile, but can coexist with the latter and even supposes the intention of returning thither. It was evident that the ordinary acts of the Christian life, the rights and obligations of a parishioner, could not be determined to a domiciliary principle. But the necessity of assimilating to such residents those who sojourn in the place for a certain length of time. The canonists soon concluded that whoever has a quasi-domicile in a place may receive there the sacraments and perform there legitimately all the acts of the Christian life without forfeiting any of his rights in the place of his real domicile; he may even thus become subject to the parish and the authority of his place of quasi-domicile. The only restrictions are, as we shall see, for ordinations and, to a certain extent, for funerals. For a long time, however, the theory remained vague and uncertain. Authors could scarcely agree as to precisely what was meant by the "sufficient length" of time (non breve tempus) required for quasi-domicile, and they hesitated to pronounce over the examination of the degree in which they could create presumption of an intention to acquire quasi-domicile. Strictly speaking, the question was really important only in regard to those marriages whose validity depended on the existence of a quasi-domicile in countries where the Tridentine decree (Famæst) had been published; in this way, as we shall see below, new legislation became necessary. The quasi-domicile theory was not definitively settled until the appearance of the Instruction of the Holy Office addressed to the Bishops of England and the United States, 7 June, 1867, in which quasi-domicile is
DOMICILE

105

patterned as closely as possible on domicile. Like the latter, it is made up of the double element of fact and right, i.e. of residence and the intention of abiding in it for a sufficient length of time, this time being clearly stated as a period covering more than six months — *per majorum anni partem*. As soon as these two conditions coexist, quasi-domicile is acquired and immediately involves the legal use of rights and competencies resulting therefrom. (See below for a recent restriction in regard to marriage.) Finally, quasi-domicile is lost by the simultaneous cessation of both its constitutive elements, i.e. by the abandonment of residence without any intention of returning to it. Suffice it to add that in this matter the canon law, when dealing with its own subject matter, adopts itself for the most part to provisions of civil law, e.g. as regards the legal domicile of minors, wards, and other analogous provisions.

III. PRESENT LAW. — From the preceding explanation there results a very important conclusion which throws a strong light on canonical legislation concerning domicile and which we must now set forth. It is this: the law does not deal with domicile for its own sake, but rather on account of its consequences; in other words, on account of the personal rights and obligations attached thereto. This explains why domicile must meet diverse requirements more or less severe according to the case in point, e.g. marriage, ordination, judicial competency. Keeping therefore in view the legal consequences of domicile and its various forms it may be defined as a stable residence which entails certain rights and legal privileges, the exercise of acts for which this authority is competent. To this definition the laws and their commentators confine themselves, without touching on the legal effects of domicile. As we have already seen, domicile, properly so called, is the place one inhabits indefinitely (*locus perpetuum habitatio*), such perpetuity being quite compatible with more or less transitory residence elsewhere. It matters not whether the owner or simply the occupant of the house in which one dwells or whether one owns more or less property in the locality. The place of one's domicile is not the house wherein one resides but the territorial district in which the house or home stands. This district is usually the smallest territory possessing a distinct, self-governing organization. All authors agree that domicile is the place where the person is; the place of domicile and, canonically considered, the parish or territorial division replacing it, e.g. mission or station. It is in the municipality that the acts and rights of civil life are exercised, and in the parish those of the Christian life. Strictly speaking, one cannot acquire domicile in a ward or hamlet or in any territorial division which does not form a self-governing group. Of course there are certain acts that do not depend, or that no longer depend, on local authority; in this sense, it is possible to speak of domicile in a diocese when it is question e.g. of ordination, or of domicile in a province apropos of the competency of a tribunal. But these exceptions are merely apparent; they imply that one has a domicile in some parish within a given diocese. The canon law distinguishes an unstable residence in different parts of a diocese, without intent to establish oneself in some particular parish. Canon law (c. 2, de sepult. in VD), like Roman law (L. 5, 7, 27, Ad munip.), allows a double domicile, provided there be in both places a morally equal installation; the most ordinary case of this being a winter domicile in the city and a summer domicile in the country. Under these conditions there are three kinds of domicile: domicile of origin, domicile of residence or acquired domicile, and necessary or legal domicile. The domicile of origin, a somewhat inexact imitation of the Roman *origio*, is that assigned to each individual by his place of nativity unless he be accidentally born outside of the place where his father dwells; practically it is the paternal domicile for legitimate and the maternal domicile for illegitimate children. Again, in reference to the spiritual life, domicile of nativity is the place where adults and abandoned children are baptized. — The domicile of residence or acquired domicile is that of one's own choice, the place where one establishes a residence for an indefinite period. It is acquired by the fact of material residence joined to the intention of remaining as long as one has no reason for settling elsewhere; this intention being manifested either by an express declaration or by circumstances. Once acquired, domicile subsists, despite more or less prolonged absences, until one leaves it with the intention of not returning. Finally, necessary or legal domicile is that of the habitual prisoner or exile in the diocese of the husband which she retains even after becoming a widow; for children under age it is that of the parents who have authority over them; for wards is it that of their guardians; lastly, for whoever exercises a perpetual charge, e.g. a bishop, canon, or parish priest, etc., it is the place where he discharges his functions.

Quasi-domicile is of one kind only, namely of residence and choice and cannot be acquired in any other way. It is acquired and lost on the same conditions as domicile itself and is deduced mainly from such reasons as justify a sojourn of at least six months, e.g. the pursuit of studies, or even for an indefinite period, as in the case of domestics. Quasi-domicile is pursued and placed under a sojourn according to the Constitution "Pancis abibite" of Benedict XIV, 19 March, 1758; but this presumption yields to contrary proof, except however when it is transformed into a presumption *juris et de jure*, which admits of no contrary proof; such is the case for the United States in virtue of the indult of 6 May, 1856, granted at the request of the Catholic Bishops of the United States in 1854 (Acta de Decretis, p. cix) and extended to the Diocese of Paris, 20 May, 1905. This being so, quasi-residents are regarded as subjects of the local authority just as are permanent residents, being therefore parishioners bound by local laws and possessing the same rights as residents, with this difference, that, if they so choose, they may go and use their rights in their own parishes. Moreover, even if they are merely quasi-parochial priest, as to their own parish priest, not only for those sacraments administered to every one who presents himself, e.g. Holy Eucharist and penance, but also for the baptism of their children, for 1st Communion, parochial Communion, Viaticum, and extreme unction. Their baptisms may also be solemnized in his presence and, except when they have chosen to be buried elsewhere, their funerals should take place from the parish church of their quasi-domicile. Finally, the quasi-domicile permits of their legitimate citation before a judge competent for the locality. As regards marriage, the quasi-domicile affects its validity in parishes subject to the decree "Tametsi" until the decree "Ne temere of 2 August, 1907, rendered the competency of the parish priest exclusive of the tribunal. It is admitted in his presence, within his parochial territory, are valid; for a fictitious marriage, however, one of the two betrothed must have dwelt within the parish for at least a month.

On the other hand those who have neither a domicile nor a quasi-domicile in a parish, who are only there as transients (*peregrini*), are not counted as parishioners; thus the parish priest should respect the pastoral rights of their own parish priest at least in so far as possible. The restrictions of former times, it is true, have been greatly lessened and at present no one would dream of claiming parochial rights for annual confession, parochial Communion or the Viaticum. Something, however, still remains: for marriage transients must ask the delegation or authorization of the parish priest of their domi-
DOMINIC

DOMINIC 106

celie (regularly of the bride) if the contracting parties have not already sojourned for a month within the parish where they seek to contract marriage; funeral or ecclesiastical services also belong to the parish priest of the domicile, i.e., if the interested parties desire to, and can transport to his parish church the body of the deceased; in any event the parish priest may demand the parochial dues known as quaera funeralis. Generally speaking, transients (peregrini) are not subjects of the local ecclesiastical authority; they are not held to the observance of vows even though, except inasmuch as these affect public order, nor do they become subjects of the local judicial authority.

As to the domicile requisite for ordination there are special rules formulated by Innocent XII, in his Constitution "Speculatorum," 4 November, 1691. The candidate's orders depends upon a bishop, first by reason of his origin, that is to say, of the place where his father had a domicile at the time of his son's birth; second by reason of his own acquired domicile. But the conditions which this domicile must satisfy are rather severe: the candidate must have already resided in the diocese for ten years or else have transported most of his movable goods to a house in which he has resided for three years; moreover, in both cases, he must affirm under oath his intention of definitively establishing in an ecclesiastical house.

If the domicile is a seigniory, the conditions of which must not be extended to other cases.

A. Bouhinon.

Dominic, Saint, founder of the Order of Preachers, commonly known as the Dominican Order; b. at Calaroca, in Old Castile, c. 1170; d. 6 August, 1221. His parents, Felix Guzman and Joanna of Aza, undoubtedly had another son, who, though probably neither was connected with the reigning house of Castile, as some of the saint's biographers assert. Of Felix Guzman, personally, little is known, except that he was in every sense the worthy head of a family of saints. To nobility of blood Joanna of Aza added a nobility of soul which so enshrined her in the popular veneration that in 1228 she was solemnly beatified by the Franciscan pope, Honorius III.

For his own part, Dominic, at the age of 35, undertook a journey to the Holy Land, and, though he returned to Spain, he was not without its effect upon their children. Not only Saint Dominic but also his brothers, Antonio and Manes, were distinguished for their extraordinary sanctity. Antonio, the eldest, became a secular priest and, having distributed his patrimony to the poor, entered a hospital where he spent his life ministering to the sick. Manes, following in the footsteps of his brother, became a Friar Preacher, and was beatified by Gregory XVI.

The birth and infancy of the saint were attended by many marvels forecasting his heroic sanctity and great achievements in the cause of religion. From his seventh to his fourteenth year he pursued his elementary studies under the tutelage of his natural uncle, the archdeacon of Castile, and, far distant from Calaroca. In 1184 Saint Dominic entered the University of Palencia. Here he remained for ten years prosecuting his studies with such ardor and success that throughout the ephemeral existence of that institution he was held up to the admiration of its scholars as all that a student should be. Amid the frivolities and dissipations of a university city, the life of this future saint was characterized by a seriousness of purpose and an austerity of manner which singled him out as one from whom great things might be expected in the future. But more than once he proved that under this austere exterior he carried a heart as tender as a woman's. On one occasion he sold his books, annotated with his own hand, to relieve the starving poor of Palencia. His biographer and contemporary, Bartholomew of Trent, states that twice he tried to sell himself into slavery to obtain money for the liberation of those who were held in captivity by the Moors. These facts are worthy of mention in view of the cruel and satirical character which some non-Catholic writers have endeavored to foist upon one of the most charitable of men. Concerning the date of his ordination his biographers are silent nor is there anything from which that date be inferred with any degree of certainty. According to the deposition of Brother Stephen, Prior Provincial of Lombardy, given in the process of canonization, Dominic was still a student at Palencia when Don Martin de Bazan, the Bishop of Osma, called him to membership in the cathedral chapter for the purpose of assisting in its reform. The bishop realized the importance to his plan of reform of having constantly before his canons the example of one of Dominic's eminent holiness. Nor was he disappointed in the result. In recognition of the part he had taken in converting its members into canons regular, Dominic was appointed sub-prior of the reformed chapter. On the accession of Don Diego d'Azevedo to the Bishopric of Burgos in 1201, the saint was again elected to the chapter with the title of prior. As a canon of Osma, he spent nine years of his life hidden in God and rapt in contemplation, scarcely passing beyond the confines of the chapter house.

In 1203 Alfonso IX, King of Castile, deputed the Bishop of Osma to demand from the Lord of the Marches, presumably a Danish prince, the hand of his daughter on behalf of his son, Prince Ferdinand. For his companion on this embassy Don Diego chose Saint Dominic. Passing through Toulouse in the pursuit of their mission, they beheld with amazement and sorrow the work of spiritual ruin wrought by the Albigensian heresy. It was in the contemplation of this scene that Dominic first conceived the idea of founding an order of preaching friars, fanatics spreading the light of the Gospel by preaching to the ends of the then known world. Their mission having ended successfully, Diego and Dominic were dispatched on a second embassy, accompanied by a splendid retinue, to escort the betrothed princess to Castile. This mission, however, was brought to a sudden close by the death of the young woman in question. The young princess, according to the custom of the time, was allowed to select the place where she would, and they set out for Rome, arriving there towards the end of 1204. The purpose of this journey was to enable Diego to resign his bishopric that he might devote himself to the conversion of unbelievers in distant lands. Innocent III, however, refused to approve this project, and instead sent the bishop and his companion to Languedoc to join forces with the Cistercians, to whom he had entrusted the crusade against the Albigenses. The scene that confronted them on their arrival in Languedoc was by no means an encouraging one. The Cistercians, on account of their worldly manner of living, had made little or no headway against the Albigenses. They had entered upon their work with considerable pomp, but the results were negligible, in a land where the comforts of life. To this display of worldliness the leaders of the heretics opposed a rigid asceticism which commanded the respect and admiration of their followers. Diego and Dominic quickly saw that the failure of the Cistercian apostolate was due to the monks' indulgent habits, and finally prevailed upon them to adopt a more austere manner of life. The result was at once notable, in a num-
offered, they accepted the gage of battle. The thorough training that the saint had received at Palencia now proved of inestimable value to him in his encounters with the heretics. Unable to refute his arguments or counteract the influence of his preaching, they visited their hatred upon him by means of repeated insults and threats of physical violence. With Prouille for his head-quarters, he laboured by turns in Fanjeaux, Montpellier, Servian, Béziers, and Carcassonne. Early in his apostolate around Prouille the saint realized the necessity of an institution that would protect the women of that country from the insults, but always on the side of mercy, wounding the arms of the spirit while others wrought death and desolation with the sword. Some historians assert that during the sack of Béziers, Dominic appeared in the streets of that city, cross in hand, interceding for the lives of the women and children, the aged and the infirm. This testimony, however, is based upon documents which Tournon regards as certainly apocryphal. The testimony of the most reliable historians tends to prove that the saint was neither in the city nor in its vicinity when Béziers was sacked by the crusaders. We find him generally during this period following the Catholic army, reviving religion and reconciling heretics in the cities that had capitulated to, or had been taken by, the victorious de Montfort. It was probably 1 September, 1209, that Saint Dominique first visited the collection de Montfort, and formed with him that intimate friendship which was to last till the death of the brave crusader under the walls of Toulouse (25 June, 1218). We find him by the side of Montfort at the siege of Lavaur in 1211, and again in 1212, at the capture of La Penne d’Ajen. In the latter part of 1212 he was at Limari labouring, at the invitation of de Montfort, for the conversion of the heathen. Lastly, just before the battle of Muret, 12 September, 1213, the saint is again found in the council that preceded the battle. During the progress of the conflict, he knelt before the altar in the church of Saint-Jacques, praying for the triumph of the Catholic arms. So remarkable was the victory of the crusaders at Muret that Simon de Montfort regarded it as altogether miraculous, and promised that all the other provinces of Saint Dominic. In gratitude to God for this decisive victory, the crusader erected a chapel in the church of Saint-Jacques, which he dedicated, it is said, to Our Lady of the Rosary. It would appear, therefore, that the devotion of the Rosary (q. v.), which tradition says was revealed to Saint Dominic, had come into general use about this time. To this period, too, has been ascribed the foundation of the Inquisition by Saint Dominic, and his appointment as the first Inquisitor. As both these much controverted questions will receive special treatment elsewhere in this work, it will suffice for our present purpose to note that the Inquisition was in full operation in 1198, or seven years before the saint took part in the apostolate in Languedoc, and while he was still an obscure canon regular at Osma. If he was for a certain time identified with the operations of the Inquisition, it was only in the capacity of a theologian passing upon the orthodoxy of the accused (see INQUISITION, SPANISH). Whatever influence he may have had with the judges of that much maligned institution was always employed on the side of mercy and forbearance, as witness the classic case of Ponce Roger.

In the meantime, the saint’s increasing reputation for heroic sanctity, apostolic zeal, and profound learning caused him to be much sought after as a candidate for various bishoprics. Three distinct efforts were made to raise him to the episcopate. In July, 1212, the chapter of Béziers chose him for their bishop. Again, the canons of Saint-Lizier wished him to succeed Garcia de l’Orte as Bishop of Comminges. Lastly, in 1215 an effort was made by Garcia de l’Orte himself, who had been transferred from Comminges to Auch, to make him Bishop of Navarre. But Saint Dominic absolutely refused all episcopal honours, saying that he would rather take flight in the flames of war than to enjoy the title of bishop. Nothing being thereby achieved, the bishop of Auch, Muret, returned to Carcassonne, where he resumed his preaching with unqualified success. It was not till 1214 that he returned to Toulouse. In the meantime the influence of his preaching and the eminent holiness of his life had drawn around him a little band of devoted disciples eager to follow wherever he might lead. Saint Dominic’s monastic family was formed eleven years before, of founding a religious order to combat heresy and propagate religious truth. The time now seemed opportune for the realization of his plan. With the approval of Bishop Foulques of Toulouse, he began the organization of his little band of followers. That Dominic and his companions might possess a fixed source of revenue Foulques made him chaplain of Fanjeaux and in July, 1215, canonically established the community as a religious congregation of his diocese, whose mission was the propagation of true doctrine and good morals, and the extirpation of heresy. During this same year Pierre Selt, a wealthy citizen of Toulouse, who had placed himself under the direction of Saint Dominic, put at their disposal the riches of his house. In 1216 the first convent of the Order of Preachers was founded on 25 April, 1215. But they dwelt here only a year when Foulques established them in the church of Saint Romanus. Though the little community had proved amply the need of its mission and the efficiency of its service to the Church, it was far from satisfying the full purpose of its founder. It was at best but a diocesan congregation, and the ambition of the saint was to carry his apostolate to the ends of the earth. But, unknown to the saint, events were shaping themselves for the realization of his hopes. In November, 1215, an ecclesiastical council was to meet at Rome to deliberate on the improvement of morals, the extinction of heresy, and the strengthening of the faith. The papal brief of appointment of Dominic had determined the order of his visit. With the Bishop of Toulouse, he was present at the deliberations of this council. From the very first session it seemed that events conspired to bring his plans to a successful issue. The council bitterly arraigned the bishops for their neglect of preaching. In canon x they were directed to delegate capable men to preach the word of God to the people. Under these circumstances it would reasonably appear that Dominic’s request for the confirmation of an order designed to carry out the mandates of the council would be joy-
fully granted. But while the council was anxious that these reforms should be put into effect as speedily as possible, he had no disposition to give the institution of any new religious orders, and had legislated to that effect in no uncertain terms. Moreover, preaching had always been looked upon as primarily a function of the episcopate. To bestow this office on an unknown and untried body of simple priests seemed too original and too bold in its conception to appeal to the minds of those who had the deliberations of the council. When, therefore, his petition for the approbation of his infant institute was refused, it could not have been wholly unexpected by Saint Dominic.

Returning to Languedoc at the close of the council in December, 1215, the founder gathered about him his little band of followers and informed them of the wish of the council that there should be no new rules for religious orders. Thereupon they adopted the ancient rule of Saint Augustine, which, on account of its generality, would easily lead itself to any form they might wish to give it. This done, Saint Dominic again appeared before the pope in the month of August, 1216, and again solicited the confirmation of his order. This time, however, on December 15, 1216, the Bull of confirmation was issued. Saint Dominic spent the following Lent preaching in various churches in Rome, and before the pope and the papal court. It was at this time that he received the office and title of Master of the Sacred Palace, or Pope's Theologian, as it is more commonly called. This office has been held uninterruptedly by members of the order ever since, and, with a few exceptions, has been confined to the members of the Dominican order. On 15 August, 1217, he gathered the brethren about him at Prouille to deliberate on the affairs of the order. He had determined upon the heroic plan of dispersing his little band of seventeen unformed followers over all Europe. The result proved the wisdom of an act which, to the eye of human prudence at least, seemed little short of suicidal. To facilitate the spread of the order, Honorius III, on 13 Feb., 1218, addressed a Bull to all archbishops, bishops, abbots, and priors, requesting their favour on behalf of the Order of Preachers. By another Bull, dated 3 Dec., 1218, Honorius III bestowed upon the order the church of Saint Sixtus in Rome. Here, amid the tombs of the Appian Way, was founded the first monastery of the order in Rome. After the establishment of Saint Sixtus, at the invitation of Honorius, Saint Dominic began the somewhat difficult task of restoring the pristine observance of religious discipline among the various Roman communities of women. In a comparatively short time the work was accomplished, to the great satisfaction of the pope. His own career at the University of Palencia, and the practical use to which he had put it in his encounters with the Albigenses, as well as his keen appreciation of the needs of the time, convinced the saint that to ensure the highest efficiency in the work of the apostolate, his followers should be afforded the best educational advantages obtainable. It was for this reason that on the occasion of the dispersion of the brethren at Prouille he dispatched Matthew of France and two companions, one of whom was St. Louis, to the University of Palencia, and the friars took possession in October, 1217. Matthew of France was appointed superior and Michael de Fabra was placed in charge of the studies with the title of Lecturer. On 6 August of the following year, Jean de Barraste, dean of Saint-Quentin and professor of theology, bestowed on the community the hospice of Saint-Jacques, which he had built for his own use. Having effected a foundation at the University of Paris, Saint Dominic next determined upon a settlement at the University of Bologna. Bertrand of Garriga, who had been summoned from Paris, and John of Navarre, set out from Rome, with letters from Pope Honorius, to make the desired foundation. On their arrival at Bologna, the church of Santa Maria della Mescarela was placed at their disposal. In 1217, the community of Saint Sixtus grow that the need of more commodious quarters soon became urgent. Honorius, who seemed to delight in supplying every need of the order and furthering its interests to the utmost of his power, met the emergency by bestowing on Saint Dominic the basilica of Santa Sabina.

Towards the end of 1218, having appointed Reginald of Orleans his vicar in Italy, the saint, accompanied by several of his brethren, set out for Spain. Bologna, Prouille, Toulouse, and Fanjeaux were visited on the way. From Prouille two of the brethren were sent to establish a convent at Lyons. Segovia was reached just before Christmas. In February of the following year he founded the first monastery of the order in Spain. Turning southward, he established another convent for women at Madrid, similar to the one at Prouille. It is quite probable that on this journey he personally presided over the erection of a convent in connexion with his alma mater, the University of Palencia. At the invitation of the Bishop of Brescia, a house of the order was established in that city. Again favouring his steps towards Rome he recrossed the Pyrenees and made visits to those of the foundations at Lyons and Paris. During his stay in the latter place he caused houses to be erected at Limoges, Metz, Reims, Poitiers, and Orleans, which in a short time became centres of Dominican activity. From Paris he directed his course towards Italy, arriving in Bologna in July, 1219. Here he devoted several months to the religious formation of the new foundations, and then, as at Prouille, dispersed them over Italy. Among the foundations made at this time were those at Bergamo, Asti, Verona, Florence, Brescia, and Faenza. From Bologna he went to Viterbo. His arrival at the papal court was the signal for the showering of new favours on the order. Notable among these marks of esteem were many complimentary letters addressed by Honorius to all those who had assisted the Fathers in their various foundations. In March of this same year Honorius, through his representatives, bestowed upon the order the church of San Eustorgio in Milan. At the same time a foundation at Viterbo was authorized. On his return to Rome, towards the end of 1219, Dominic sent out letters to all the convents, enjoining them to address to the pope, at Rome, the petition of the order, to be held at Bologna on the feast of the following Pentecost. Shortly before, Honorius III, by a special Brief, had conferred upon the founder the title of Master General, which till then he had held only by tacit consent. At the very first session of the chapter in the following spring the saint startled his brethren by offering his resignation as master general. It is needless to say the resignation was not accepted, and the founder remained at the head of the institute till the end of his life.

Soon after the close of the chapter of Bologna, Honorius III addressed letters to the abbeys and priories of San Vittorio, Sillia, Mansu, Floria, Vallobbrosa, and Aquila, ordering that several of their religious be deputed to begin a religious crusade under the preaching of Saint Dominic. It is said that 100,000 unbelievers were converted by the preaching and the miracles of the saint. According to Lacordaire and others, it was during his preaching in Lombardy that the saint instituted the Militia of Jesus Christ, or the third order, as it is commonly called, consisting of men and women living in the world, to protect the rights and property of the
ST. DOMINIC—TITIAN
BORCHES GALLERLY. ROMF
Church. Towards the end of 1221 Saint Dominic returned to Rome for the sixth and last time. Here he received many new and valuable concessions for the order. In January, February, and March of 1221 three consecutive Bulls were issued commanding the whole to the prerogatives of the Church. The thirtieth of May, 1221, found him again at Bologna presiding over the second general chapter of the order. At the close of the chapter he set out for Venice to visit Car- dol. While he was thus employed he was indebted for many substantial acts of kindness. He had scarcely returned to Bologna when a fatal illness attacked him. He died after three weeks of sickness, the many trials of which he bore with heroic patience. In a Bull dated at Spoleto, 13 July, 1234, Gregory IX made his cult obligatory throughout the Church.

The life of St. Dominic was one of tireless effort in the service of God, while he journeyed from place to place he prayed and preached almost uninteruptedly. His penances were of such a nature as to cause the brethren, who accidentally discovered them, to fear the effect upon his life. While his charity was boundless he never permitted it to interfere with the stern sense of duty that guided every action of his life. If he abominated heresy and laboured unremittingly for the conversion of the heretics, he loved with truth and charity the souls of those among whom he laboured. He never failed to distinguish between sin and the sinner. It is not to be wondered at, therefore, if this athlete of Christ, who had conquered himself before attempting the reformation of others, was more than once chosen to show forth the power of God. The failure of the fire of the apostles, which had been employed against the heretics, and which was thrice thrown into the flames; the raising to life of Napoleone Orsini; the appearance of the angels in the refectory of Saint Sixtus in response to his prayers, are but a few of the supernatural happenings by which God was pleased to attest the eminent holiness of His servant. We are not surprised, therefore, that, after signing the Bull of canonization on 13 July, 1234, Gregory IX declared that he no more doubted the saintliness of Saint Dominic than he did that of Saint Peter and Saint Paul.

**Dominical Letter, a device adopted by the Romans from the old chronologists to aid them in finding the day of the week corresponding to any given date, and indirectly to facilitate the adjustment of the "Proprium de Tempore" to the "Proprium Sane- torum" when constructing the ecclesiastical calendar. It is a table of movable and immovable feasts (see Calendar, Christian), has from an early period taken upon herself as a special charge to regulate the measurement of time. To secure uniformity in the observ- ance of feasts and fasts, she began, even in the patri- tic age, to supply a computus, or system of reckoning, by which the relation of the solar and lunar years might be accommodated and the celebration of Easter determined. Naturally she adopted the astronomical methods then available, and these methods and the terminology belonging to them, having become tradition, are perpetuated in a measure to this day, even after the reform of the calendar, in the prolegomena to the Breviary and Missal.

The Romans were accustomed to divide the year into "bdinistra", periods of eight days, and in their marble "fasti", or calendars, of which numerous specimens remain, they used the first eight letters of the alphabet to mark the days of each period was composed. When the Oriental seven-day period, or week, was introduced, in the time of Augustus, the first seven letters of the alphabet were employed in the same way to indicate the days of this new division of time. In fact, fragmentary calendars on marble still survive in which both a cycle of eight letters—A to H—indicating "bdinistra", and a cycle of seven letters—A to G—indicating weeks, are used side by side (see "Corpus Inscriptionum Latinarum", 2nd ed., i, 220).

—The same peculiarity occurs in the Julitian Cal- endar of 45 B.C., when, of 365 days, 354 were marked by the Christians, and in their calendars the dates of the year from 1 January to 31 December were marked with a continuous recurring cycle of seven letters: A, B, C, D, E, F, G. A was always set against 1 January, B against 2 January, C against 3 January, and so on. Thus F fell to 6 January, G to 7 January, A again occurred on 8 January, and, consequently, on 15 January, 22 January, and 29 January. Continuing in this way, 30 January was marked with a B, 31 January with a C, and 1 February with a D. Supposing this to be carried on through all the days of an ordinary year (i.e. not a leap year), it will be found that a D corresponds to 1 March, G to 1 April, B to 1 May, E to 1 June, G to 1 July, C to 1 August, F to 1 Septemper, A to 1 October, D to 1 November, and F to 1 December, which Durandus recurred by the following distich:

Alta Domat Dominus, Gratiss Beqa Equentse Contemnitt Fietos, Augebit Dons Fidei.

Now, as a moment's reflection shows, if 1 January is a Sunday, all the days marked by A will also be Sundays; if 1 January is a Saturday, Sunday will fall on 2 January, and the days marked by A will be Sundays; if 1 January is a Friday, Saturday will be a B will be Sundays; if 1 January is a Monday, then Sunday will not come until 7 January, a G, and all the days marked by a G will be Sundays. This being explained, the Dominical Letter of any year is defined to be that letter of the cycle, A, B, C, D, E, F, G, which corresponds to the day upon which the first Sunday (and every subsequent Sunday) falls.

It is plain, however, that when leap year occurs, a complication is introduced. February has then twenty-nine days. According to the Anglian and civil calendars this extra day is added to the end of the month; according to the Catholic ecclesiastical calendar 24 February is counted twice. But in either case 1 March is then one day later in the week than 1 February, and, in other words, the Sundays come a day earlier than they would in a common year. This is expressed by saying that a leap year has two Dominical Letters, the second being the letter which precedes that with which the year started. For example, 1 January, 1907, was a Tuesday; the first Sunday fell on 6 January, or an F. F was therefore, the Dominical Letter for 1907. The first of January, 1908, was a Wednesday, the first Sun- day fell on 5 January, and E was the Dominical Let- ter, but as 1908 was leap year, its Sundays after Feb- ruary came a day sooner than in the normal year and were D's. The year 1908, therefore, had a double Dominical Letter, E-D. In 1909, 1 January is a Fri- day and the Dominical Letter is C. In 1910 and 1911,
1 January falls respectively on Saturday and Sunday and the Dominical Letters are B and A.

This, of course, is all very simple, but the advantage of the device lies, like that of an algebraic expression, in its being a mere symbol adaptable to any year. By constructing a table of letters and days of the week, A always denotes January 1, January 1st, August 1, and August 1st; B, February 1, February 1st, September 1, and September 1st; C, March 1, March 1st, October 1, and October 1st; D, April 1, April 1st, November 1, and November 1st; and E, May 1, May 1st, December 1, and December 1st. Thus, in the year 1453, Monday is the first day of the year, following which the letters appear to be, B, E, C, D, and A, and the day names are found as B, E, C, D, and A, which is the same for all years, or any two consecutive years, as long as the Gregorian Calendar is used.

The Dominical Letter is determined by a special method as follows:

1. January falls respectively on Saturday and Sunday and the Dominical Letters are B and A.

This, of course, is all very simple, but the advantage of the device lies, like that of an algebraic expression, in its being a mere symbol adaptable to any year. By constructing a table of letters and days of the week, A always denotes January 1, January 1st, August 1, and August 1st; B, February 1, February 1st, September 1, and September 1st; C, March 1, March 1st, October 1, and October 1st; D, April 1, April 1st, November 1, and November 1st; and E, May 1, May 1st, December 1, and December 1st. Thus, in the year 1453, Monday is the first day of the year, following which the letters appear to be, B, E, C, D, and A, and the day names are found as B, E, C, D, and A, which is the same for all years, or any two consecutive years, as long as the Gregorian Calendar is used.

The Dominical Letter is determined by a special method as follows:

1. January falls respectively on Saturday and Sunday and the Dominical Letters are B and A.

2. Then take the quotient divided by 727, which is the number of the Dominical Letter, or equal respectively to 1, 2, 3, 4, 5, 6, or 7.

3. Therefore, the Dominical Letter is E.

But the Dominical Letter had another very practical use in the days before the “Ordo divini officii rectorum” was printed annually and when, consequently, a priest had to determine an “Ordo” for himself (see Directories, Catholic). As will be shown in the following discussion, Easter Sunday may be as early as 22 March or as late as 25 April, and there are consequently thirty-five possible days on which it may fall. It is also evident that each Dominical Letter allows five possible dates for Easter Sunday. Thus, in a year whose Dominical Letter is A (i.e., when January 1 is a Sunday), Easter must be either on 26 March, 2 April, 9 April, 16 April, or 23 April, for these are all the Sundays within the defined limits. But according as Easter falls on one or another of these Sundays we shall get a different calendar, and hence there are five and only five, possible calendars for years whose Dominical Letter is A. Similarly, there are ten combinations, for whose Dominical Letter is B, five for C, and so on, thirty-five possible combinations in all. Now, advantage was taken of this principle in the arrangement of the old Pynhe or directorium which preceded our present “Ordo”. The thirty-five possible calendars were all included therein and numbered, respectively, primium A, secundum A, tertium A, etc., primium B, secundum B, tertium B, and so on. Hence, we can see why the Pynhe first thing to determine was the Dominical Letter of the year, and then by means of the Golden Number or the Epact, and by the aid of a simple table, to find which of the five possible calendars assigned to that Dominical Letter belonged to the year in question. Such a table as that just referred to, but adapted to the dates of Easter Sunday, would be of great advantage to the use of the Pynhe. The following table, when added to the other knowledge, will be found at the beginning of every Breviary and Missal under the heading, “Tabula Paschalis nova reformata”.

The Dominical Letter does not seem to have been familiar to Bede in his “De Temporum Ratione”, but in its place he adopts a similar device of seven numbers which he calls “successiones” (De Temp. Rat., cap. iii). This was of Greek origin. The Concurrere are numbers denoting the day of the week on which 24 March falls in the successive years of the solar cycle, 1 standing for Sunday, 2 (feria secunda) for Monday, 3 for Tuesday, and so on. It is sufficient here to state that the relation between the Concurrere and the Dominical Letter is the following:

<table>
<thead>
<tr>
<th>Concurrere</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
<th>7</th>

HERBERT THRUSTON.

Dominican Republic, THE (SAN DOMINGO, SANTO DOMINGO), is the eastern, and much the larger, political division of the island now comprehensively known as Haiti, which is the second in size of the Greater Antilles. The territory of this republic, estimated at 16,065 square miles, is divided from that of the Republic of Haiti, on the west, by a serpentine line running from the mouth of the Yaqui River, on the north coast, to a point not far from Cape Beata, on the south; its northern shores are washed by the Atlantic Ocean, its southern by the Caribbean Sea; while on the east, the Mona Passage separates it from the island of Puerto Rico. In proportion to its size, it is much more densely settled than Haiti. Ethnologically, the Dominicans contrast with the Haitians in being a Spanish-speaking people, mostly of mixed negro and European descent, the Haitians being pure negro and speaking French. The climate of San Domingo is in some parts bad, in others remarkably good, notably in and around the city of San Domingo, where, in spite of poor sanitation, it is said that “no body need die of anything but old age”. During the dry season (November to March) the mean diurnal variation of temperature on the south coast is from 70 to 80 degrees Fahr.; during the rainy seasons (summer and autumn) it is from 80 to 92. These figures, like most statistics of contemporary San Domingo, are necessarily supplied in round numbers, and are the average of the years 1873 to 1878.

General History.—From the date of its discovery until the era of the French Revolution the civil and the ecclesiastical history of the territory now occupied by the Dominican Republic are inseparably conjointed. In December, 1492, Christopher Columbus, having failed in his expectation of identifying the island of Cuba with a portion of the “Indies” of his charts, and landing at La Terra, when, in spite of poor sanitation, it is said that “no body need die of anything but old age”. During the dry season (November to March) the mean diurnal variation of temperature on the south coast is from 70 to 80 degrees Fahr.; during the rainy seasons (summer and autumn) it is from 80 to 92. These figures, like most statistics of contemporary San Domingo, are necessarily supplied in round numbers, and are the average of the years 1873 to 1878.

and about the Hayna River, as well as the remarkable salubrity of the country of the Ozamas, on the south coast, Isabella, which had been found unhealthy, was abandoned. At the mouth of the Ozama River and on its left bank, Bartolomé Colón began the settlement of Nueva Isabella, which was not long afterwards replaced by San Domingo, on the opposite bank. Thus, the present capital of the Dominican Republic,

the oldest Christian city in the New World, was already established as the capital of the “New Spain” in the last year of the fifteenth century. Leo X erected the See of San Domingo—the mother church of all Spanish America, and the oldest bishopric in the New World—in 1513. In 1514, under Alessandro Giraldini, its first bishop, the present cathedral church of San Domingo was begun; it was completed in 1540. In this cathedral, about 200 feet in length by 90 in width, the remains of several members of the Columbus family—possibly even of the great admiral himself—still repose; here, too, is still reverently preserved a fragment of the cross which Columbus set up on Santo Cerro, and about which miraculous legends have grown up in the course of four centuries. The catalogue of adelantados of the island includes the names of Diego Colón (immediate successor to his uncle Bartolomé), of Bobadilla, and Ovando. There Columbus himself lived for many years, there he was imprisoned by his nephew, and there he set out upon his last voyage to Spain. To San Domingo Ojeda returned from his last expedition of discovery and conquest in 1509. His grave is still shown in the main doorway of the ruined Franciscan church. In 1517 Paul III made San Domingo the metropolitan see of the New World. Meanwhile houses of the Friars Preachers, the Franciscans, and the Merecedarians sprang up rapidly, and in this West Indian port, the population of which could never have exceeded 20,000, the ruins of not fewer than half a dozen ancient convents are still to be seen. The Jesuit college, now used as a theatre, was not founded until a later period.

While all this activity lasted, the seeds of social and political decay were being sown in Hispaniola. The aborigines were either killed or driven into hiding among the Cibao mountains; the importation of negro slaves became a regular institution. The Spanish settlers were men of the losing, not the conquering, type; their blood mingled with that of the negro and, in some degree, the aboriginal, to produce the San Domingan of modern times. In 1565 Francis Drake drove the Spanish garrison out of San Domingo and burned section after section of the city until a ransom of 30,000 crowns was paid to him. In the next century French adventurers—the original boucaniers—began to use the little island of Tortuga, near the north-west coast of Hispaniola, as a piratical rendezvous; from Tortuga they gradually spread over the eastern end of Hispaniola, creating a claim of occupation which Spain recognized in the Treaty of Ryswick (1697). It was in April, 1655, that an English force, convoyed thither on the fleet commanded by Admiral Penn, was driven away, after effecting a landing about thirty miles west of the capital. The natural resources of Hispaniola still enriched Spain, and the mint at Concepcion de la Vega continued to coin gold from the Hayna. After the Peace of Ryswick, Hispaniola might almost have been forgotten if an English cabinet-maker had not (about the year 1760) discovered the value of mahogany. The demand, at first created by a shipment from Jamaica, was largely supplied by the Spanish island.

The French Revolution reacted upon Hispaniola. The whites and mulattos of San Domingo, under Spanish leaders, attempted to restore the old regime in the French colony, but in 1793 all Hispaniola was ceded to France. The Spanish authorities transferred San Domingo to the representative of the French Republic, who was the mulatto General Toussaint L’Ouverture. Until the Treaty of Paris (1814) the French whites, the white and coloured partisans of Spain, the blacks of Haiti, and, now and then, a British expeditionary force fought for supremacy in San Domingo. The treacherous capture of L’Ouverture and his mysterious death in prison at Beaniac, in 1803, were followed by a general massacre of the whites in March, 1804. The Haitian blacks now compelled the submission of San Domingo to the authority of their first president, Dessalines. At last, in 1814, the Treaty of Paris restored to Spain her oldest possession in the New World.

Actual Conditions.—Out of the political chaos, which had lasted for more than half a century, arose the present Dominican Republic. Its constitution was proclaimed 18 November, 1844, and its first president was Pedro Santana; it was recognized by France in 1848, and by Great Britain in 1856. An attempt to restore Spanish rule, in 1861, in defiance of the Monroe Doctrine, ended with a final Spanish evacuation in 1865. In 1867 the foreign debt of the republic had reached the amount of more than $21,000,000, the interest on which was supposed to be secured by customs receipts; following a default of interest (1 April, 1890), the Government of the United States intervened to obtain an equitable settlement, and its efforts led to the convention of 1905 (ratified 1907), by which an agent, always a citizen of the United States, is to be permanently empowered to act as general receiver of the Dominican customs in the interest of the foreign bondholders. Since 9 June, 1905, all lands held by the Dominican Government have been open for settlement, free for ten years, and after that at a rent of 5 cents per acre. Although there can be little doubt that the national resources of the republic still include large quantities of gold, silver, and copper ore,
and even iron, the actual products are only vegetable: sugar (183,754 acres under cultivation in 1906); tobacco (nearly 15,000,000 lbs. of leaf exported annually); cocoa; coffee. The actual timber output is insignificant. In 1907 the total length of railroad was 112 miles.

The Constitution of the Dominican Republic is said to be modelled on that of Venezuela; the presid-ent elected for four years, is assisted by a council of ministers; the legislature is a single chamber elected by popular vote in twenty-four departments. The supreme court of the republic (a president and four judges) is appointed by the national congress, its "minister fiscal," however, being appointed by the chief executive; for courts of finance, a special court is established. The republic is divided into eleven judicial districts, each presided over by an alcalde. By the terms of the Constitution education is gratuitous and compulsory.

The ancient city of San Domingo (population, 16,000) is still the scene of the national government, as well as the see of the archbishop, who, however, no longer has any suffragans. The relations between Church and State are (1905) very cordial. The Constitution of the Republic, in which religious liberty is an article, guarantees to the Church freedom of action, which, nevertheless, is curtailed by the law providing that the civil solemnization of marriages must precede the canonical. The municipal cemeteries are consecrated in accordance with the Church's requirements, though in some important centres of population there are none. Catholic cemeteries besides. In the Dominican Republic (with which the Archdiocese of San Domingo is coextensive) there are 600,000 Catholics, upwards of 1000 Protestants, and very few Jews, while the Masonic lodges number about thirteen. The total number of parishes is 56, each with its own church, in addition to which there are 13 chapels and 82 mission stations. The (ecclesiastical) Conceptional, the ancient capital, is under the care of the Eurlist Fathers (Congregation of Jesus and Mary), who also administer the cathedral parish. Another college under ecclesiastical control is that of San Sebastian in La Vega. A diocesan congregation of religious women numbers 30 members, distributed among four houses; these sisters, who have charge of a hospital, care for orphan children and the infirm aged.

Dominicans. See Preachers, Order of.

Dominici, Giovanni, Blessed (Ranchi or Bac-chini was his family name), Cardinal, statesman, and writer, b. at Florence, 1356; d. at Buda, 10 July, 1420. He entered the Dominican Order at Santa Maria Novella in 1372 after having been cured, through the intercession of St. Catherine of Siena, of an imminent of speech for which he had been refused admission to the order two years before. On his return from Paris, where he completed his theological studies, he laboured as professor and preacher for twelve years at Venice. With the sanction of the master general, Blessed Raymond of Capua, he established convents of strict observance of his order at Venice (1391) and Fiesole (1406), and founded the convent of Corpus Christi at Venice for the Dominican Nuns. In 1405 he was placed at the head of the convent of Venice to the conclave of 1410 in which Gregory XII was elected; the following year the pope, whose confessor and counsellor he was, appointed him Archbishop of Ragusa, created him cardinal in 1408 and sent him as ambassador to Hungary, to secure the adhesion of Sigismund to the pope. At the Council of Constance Dominici read the voluntary resignation which Gregory XII had adopted, on his advice, as the surest means of ending the schism. Martin V appointed him legate to Bohemia on 19 July, 1418, but he accomplished little with the followers of Hus, owing to the supineness of King Wenceslaus. He was declared blessed by Gregory XVI in 1832 and his feast is observed 10 June. Dominici was not only a prolific writer on spiritual subjects but also a graceful poet, as his many vernacular hymns, or Laudii, show. His "Regola del governo di cura familiare," written between 1400 and 1105, is a valuable pedagogical work (edited by salvi, Florence, 1860) which treats, in four books, of the faculties of the soul, the powers and senses of the body, the uses of earthly goods, and the education of children. This last book has been translated into German by R. Bischoff (Bielefeld, 1884) and into the cotholischen Pedagogik, VII, Freiburg, 1894). His "Lucula Notici" (R. Coulon, O. P., Latin text of the fifteenth century with an introduction, Paris, 1908) in reply to a letter of Nicola di Piero Salutati, is the most important treatise of that day on the study of the pagan authors. Dominici does not lightly condemn classical study, but simply opposes the pagan humanism of the day.

Dominic of Prussia, a Carthusian monk and ascetical writer, b. in Poland, 1382; d. at the monastery of St. Alban near Trier, 1416. According to the account he wrote of himself his first teacher was the parish priest, a pious Dominican; later he was a student at the University of Cracow where he was noted for his intelligence. Falling into bad habits he led a vagrant life for twenty years, but was re-formed through the influence of Adolf of Essen, prior of the Carthusian monastery of St. Alban, near Trier. Dominic now became a Carthusian, entering the order in 1100. His monastic life was one of severe penance and religious fervour. The spiritual favours he received were numerous, and many are ascribed to him. Among the most celebrated are those of having mass said at Mainz and view of the monastery of St. Alban, where he died. As an author Dominic composed seventeen treatises, which have been preserved in various libraries. In the "Libri duo expec-teriarum" he relates the events of his own life; the "Tractus de Contemptirun mundi," "Remedium tenta-ctionem," "De veri obedientia," and "Sonus euphan-atis" he prepared during his solitary retreats. A fur-ther work is his "Letters of Direction".

Dominic of Prussia is frequently mentioned in the
discussions as to the origin of the Rosary, and what has been improperly called "the Carthusian Rosary" is ascribed to him. To the one hundred and fifty Ave Marias which in those days formed the Psalter of Mary, he had the thought of adding meditations on the life of Christ and among theseasons it is held by some that the "Psalter" of Dominic was the form, or one of the original forms, from which the present Rosary developed.

Cart.** (Montreuil, 1888), ad. an. 1414-15; **Tappert, Der heilige Bruno (Luxemburg, 1872), 74-85; Marx, Geschichte des Erzstifts Trier (Trier, 1902), II, 331; Eister, Beitrag zur Geschichte des Rosenkranzes in der Katholik (Mainz, Oct., Nov., Dec., 1897); **Thurston, The Rosary in the Month** (November, 1900).

_Ambrose Mougel_

**Dominic of the Mother of God** (called in secular life DOMENICO BARBERI), a member of the Passionist Congregation and theologian, b. near Viterbo, Italy, 22 June, 1792; d. near Reading, England, 27 August, 1818, at the age of 26 years. Dominic was a small boy. There were six children, and Dominic, the youngest child, was adopted by his maternal uncle, Bartolomeo Pacelli. As a boy he was employed to take care of sheep, and when he grew older he did farm work. He was taught his letters by a kind Capuchin priest, and learned to read from a country lad of his own age; although he read all the books he could obtain, he had no regular education until he entered the Congregation of the Passion. He was deeply religious from childhood, felt himself distinctly called to join the institute he entered, and believed that God, by a special manifestation, had told him that he was destined to announce the Gospel truth and to bring back stray sheep to the way of salvation.

He was received into the Congregation of the Passion in 1814, and ordained priest, 1 March, 1818. After completing the regular course of studies, he taught philosophy and theology to the students of the congregation aslector for a period of ten years. He then held in Italy the offices of rector, provincial con- sistor, and provincial, and fulfilled the duties of these positions with ability. In 1826, he went to England and the same year he constantly gave missions and retreats. He founded the first Passionist Retreat in Belgium at Ee near Tournai in 1840; in 1842, after twenty-eight years of effort, he established the Passionists in England, at Aston Hall, Staffordshire. During the seven years of his missionary life in England he established three houses of the congregation. He died at a small railway station near Reading and was buried under the high altar of St. Anne's Retreat, Sutton, St. Helen's. Among the remarkable converts whom he received into the Church may be mentioned John Doree Dal- gairns, John Henry Newman, and Newman's two companions, E. S. Bowles and Richard Stanton, all of whom were afterwards distinguished Oratorians. The reception in 1843 of Newman and his friends marked the beginning of the greatest work of his life. In 1846 Father Dominic received the Ixon. George Spen- cer, in religion Father Ignatius of St. Paul, into the Congregation of the Passion.

Among Father Dominic's works are: courses of philosophy and moral theology; a volume on the Passion of Our Lord; a work for nuns on the Sorrows of the Blessed Virgin, "Divina Paraenesis"; a reflection of: De Lamennais; three series of sermons; various controversial and ascetical works. In 1841 he addressed a Latin letter to the professors of Oxford in which he answered the objections and explained the difficulties of Anglicans. An English translation of the letter is given in the appendix to the Life of Father Dominic by Father Pius Devereux, S. J., Life of Father Dominic; Italian, by Padre Felippo (1860); **Lucca di San Giuseppe** (Geneva, 1877); English, by Pits De- Vereux, (London, 1883); **Camus, Father Dominic and the Conversion of England** (London, 1890); and other pamphlets concerning the mission of the Oratorian to St. Paul of the Cross (London, 1853).

**Arthur Devine**

**Dominis, Marco Antonio De**, a Dalmatian ecclesiastic, apostate, and man of science, b. on the island of Kvarner, off the coast of Dalmatia, in 1566; d. in the Castle of Sant' Angelo, Rome, September, 1624. Educated at the Illyrian College at Loreto and at the University of Padua, he entered the Society of Jesus and taught mathematics, logic, and rhetoric at Padua and Brescia. On leaving the Jesuits (1590), he was, through imperial influence, appointed Bishop of Zengg (Segna, Seng) and Modrus in Dalmatia (Aug., 1600), and transferred (Nov., 1602) to the archiepiscopal See of Spalato. He sided with Venice, in whose territory his see was situated, during the quarrel between Paul V and the Republic (1606-7). That fact, combined with a correspondence with Fra Paolo Sarpi and conflicts with his clergy and fellow- bishops which culminated in his extreme, and died in the Roman Curia, led to the resignation of his office in favour of a relative and his retirement to Venice. Threatened by the Inquisition, he prepared to apostatize, entered into communication with the English ambassador to Venice, Sir Henry Wotton, and having been assured of a welcome, left for England in 1616. On his way there, he published at Hildeschief, "Expositio et historia super vero sanctissimo et dignissimo et adornato Regino de Poloniae, Cann. Pont. Decr. orthodoxo, ex libris Christiano nausfragio", afterwards reprinted in England. He was received with open arms by James I, who quassed him upon Archbishop Abbot of Canterbury, called on the other bishops to pay him a pension, and granted him precedence after the Arch- bishops of Canterbury and York. De Dominis wrote a number of anti-Roman sermons, published his own reports of his "moral works," "Historia Contraria Primatum Papae" (Vol. I, 1617; vol. II, 1620, London; vol. III, 1622, Hanover), and took part, as assistant, in the consecration of George Montaigne as Bishop of Lincoln, 14 Dec., 1617. In that same year, James I made him Dean of Windsor and granted him the Mastership of the Savoy.

In 1619 De Dominis published in London the first edition of Fra Paolo Sarpi's "History of the Council of Trent"; the work appeared in Italian, with an anti- Roman title page and letter dedicatory to James I. His vanity, avarice, and inscrupulousness, however, soon lost him his English friends; the projected Spanish marriage of Prince Charles made him anxious about the security of his position in England, and the elec- tion of Gregory XIII. (1572) removed him from office. An occasion of intimating, through Catholic diplomats in England, his wish to return to Rome. The king's anger was aroused when De Dominis announced his intention (16 Jan., 1622), and Star-Chamber proceedings for illegal correspondence with Rome were threatened. Eventually he was allowed to depart, but his chests of hoarded money were seized by the king's men and remitted to the treasury. This incident added to the personal appeal to the king. Once out of England his attacks upon the English Church were as violent as had been those on the See of Rome, and in "Sui Reditus ex Anglia Consiliun" (Paris, 1623) he recanted all he had written in his "Consilium Profec- tionis" (London, 1616), declaring that he had deliberately lied in all that he had said against Rome. After a stay of six months in Brussels, he proceeded to Rome, where he lived on a pension assigned him by the
pope. On the death of Gregory XV (8 July, 1623) the pension ceased, and irritation loosened his tongue. Coming into conflict with the Inquisition he was declared a relapsed heretic, was confined to the Castle of Sant' Angelo, and there died a natural death. His case was so complex after his death, his heresy declared manifest, and his body burned together with his works on 21 Dec., 1624.

In 1611 he published, at Venice, a scientific work entitled: "Tractatus de radix visus et lucis in vitris, perspectivis et ired", in which, according to Newton, he was the first to develop the theory of the rainbow, by drawing attention to the fact that in each raindrop the light is refracted and an intermediate reflection. His claim to that distinction is, however, disputed in favour of Descartes.

EDWARD MYERS.

**Dominus ac Redemptor. See Society of Jesus.**

**Dominus Vobiscum**, an ancient form of devout salutation, incorporated in the liturgy of the Church, where it is employed as a prelude to certain formal prayers. Its origin is evidently Scriptural, being clearly borrowed from Ruth, ii, 4, and II Par., xv, 2. The same idea is also suggested in the New Testament, e. g. in Matt., xxviii, 20: "Ecce ego vobiscum sum", etc. The ecclesiastical usage dates probably from Apostolic times. Mention of it is made (ch. iii.) by the Council of Braga (563). It also appears in the sixth or seventh-century "Sacramentarium Gallesanum". The phrase is pregnant with a deep religious significance, and therefore intensely expressive of the highest and holiest wishes. For is not the presence of the Lord—the Source of every good and the Author of every best gift—a certain pledge of Divine protection and a sure earnest of the possession of all spiritual peace and consolation? In the mouth, therefore, of the priest, as one acts as the representative and delegate of the Church, in whose name and with whose authority he prays, this deprecatory formula is pre-eminently appropriate. Hence its frequent use in the public prayers of the Church's liturgy. During the Mass it occurs eight times, namely, before the priest ascends the altar, before the two orations of the collect, the Offertory, the Preface, the Post-Communion oratio, and the blessing. On four of these occasions the celebrant, whilst saying it, turns to the people, extending and joining his hands; on the other four he remains facing the altar. In the Divine Office this formula is said before the principal oratio of each Hour by priests, even in private recitation, because they are supposed to public union with, and in behalf of, the Church. Deacons say it only in the absence of a priest or with his permission if present (Van der Stapen, De officio divino, 43), but subdeacons use instead the "Domine exaudi orationem meam". Contrary to general usage, the "Dominus Vobiscum" does not precede the prayer of the Blessed Sacrament before Benediction is given. Gardellino (Comment. in Inst. Clem., § 31, n. 5) explains this anomaly on the ground that the blessing with the Sacred Host in the monstrance effectively removes what is implied in the formula. Bishops use the "Pax Vobis" (q. v.) before the collects in Masses where the Gloria is said. The response to the "Dominus Vobiscum" is "Et cum spiritu tuo" (cf. II Tim., iv, 22; Gal., vi, 18; Phil., iv, 23). Formerly this answer was rendered back with one voice by the entire congregation. Among the Greeks there is a corresponding form "Pax omnibus" (Liturgy of St. Basil). It is interesting to note that the Pope already mentioned, ordained (Mansi, IX, 777) that priests, as well as bishops, to whom alone the Priscillanists sought to restrict it, should adopt this formula.

**Saint Peter Damian** was a friend and svessor of the Emperor Titus; b. 24 Oct., a.d. 51, and reigned from 81 to 96. In spite of his private vices he set himself up as a reformer of morals and religion. He was the first of the emperors to defy himself during his lifetime by assuming the title of "Lord and God". After the revolt of Saturninus (93) he organized a series of bloodythirsty proscriptions against all the wealthy and noble families. A conspiracy, in which his wife joined, against himself and he was murdered, 18 Sept., 96.

When the Acts of Nero's reign were reversed after his death, an exception was made as to the persecution of the Christians (Tertullian, Adv. Nat., i, 7). The Jewish persecution brought upon them fresh unpopularity, and the subsequent destruction of the Christianity deprived them of the last shades of protection afforded them by being confounded with the Jews. Hence Domitian in his attack upon the aristocratic party found little difficulty in condemning such as were Christians. To observe Jewish practices was no longer lawful; to reject the national religion, without being able to plead the excuse of being a Jew, was atheism, to count or the other, as Jews or as atheists, the Christians were liable to punishment. Among the more famous martyrs in this second Persecution were Domitian's cousin, Flavius Clemens, the consul, and M. Acilius Glabriu who had also been consul. Flavia Domitilla, the wife of Flavius, was banished to Pandataria. But the persecution was not confined to such noble victims. We read of many others who suffered in the loss of their goods ( Dio Cassius, LXVII, iv). The book of the Apocalypse was written in the midst of this storm, when many of the Christians had already endured more and were perished to follow them (St. Irenaeus.
DOMITILLA

Adv. Heres., V, xxx). Rome, “the great Babylon”, “was drunk with the blood of the saints and with the blood of the martyrs of Jesus” (Apop., xvii, 5, 6; ii, 10, 13; vi, 11; xiii, 15; xx, 4). It would seem that participation in the feasts held in honour of the divinity of the tyrant was made the test for the Christians of the East. Those who did not adore the “image of the beast” were slain. The writer joins to his sharp denunciation of the persecutors’ words of encouragement for the faithful by foretelling the downfall of the great harlot “who made drunk the earth with the wine of her fornication and bestial lust in their blood and their filth” (Rev. v, 12, 13). Clement’s Epistle to the Corinthians was also written about this time; here, while the terrible trials of the Christians are spoken of, we do not find the same denunciations of the persecutors. The Roman Church continued loyal to the empire, and sent up its prayers to God that He would direct the rulers and magistrates in the exercise of the power committed to their hands (Clement, i, 13; St. Paul, Rom., xiii; 1; Pet., ii, 13). Before the end of his reign Domitian ceased to persecute. (See Persecutions.)

T. B. Scannell.

Domitilla, Catacombs of Saint. See Cemetery.

Domitopis, a titular see of Isauria in Asia Minor. The former name of this city is unknown; it was called Domitopolis or Dometopolis after L. Domitius Ahenobarbus (Ravenn. In Epist. ad Tit. xliii, 1894, 168 sqq.). Ptolemy (V, vii, 5) places it in Cilicia; according to Constantine Porphyrogennitus (De themat., I, 15) it was one of the ten cities of the Isaurian Despotate (cf. Georgius Cyprius, ed. Gelzer, S. 82). It figures in Parthey’s “Notitiae episcopatum”, I and III, and in Gelzer’s “Nova Tactica”, 1618, as a suffragan of Seleucia. Lequien (Oriens christian., II, 1023) mentions five bishops, &C. Ist. 587. Domitopolis is to-day Dindebol, a village on the Ermeneke Su, in the vilayet of Adana (cf. Sterrett, in Papers of the American School, Athens, III, 80).

S. Pétridès.

Domnus, Pope. See Dons.

Domnus Apostolicus (Domnus Apostolicus), a title applied to the pope, which was in most frequent use between the sixth and the eleventh centuries. The pope is styled Apostolic because he occupies an Apostolic see, that is, one founded by an Apostle, as were those of Ephesus, Philippi, Corinth, etc. (cf. Tertullian, De praescriptione, xxxvi). Rome being the only Apostolic Church of the West, Sedes apostolica meant simply the Roman see, and Domnus Apostolicus the Bishop of Rome. In Gaul, however, as early as the fifth century the expression sedes apostolica was applied to any episcopal see, bishops being successors of the Apostles (cf. Sidonius Apollinaris, Ep. lib. vi, i, etc.). By the sixth century the term was in general use, and many letters from the Merovingian kings are addressed Domnus sanctis et apostolivd sede apostolica. The bishops of Gaul were given the title of Domnus Apostolicus (cf. Venantius Fortunatus, “Vita S. Mart.”, IV; “Formulae Mareuli”, II, xxxix, xlii, xlix). Many examples are also found in wills and deeds (e.g. P. L., LXX, 1281, 1314, etc.), and one occurs in a letter of introduction given by Charlemagne to St. Boniface (Epp. Bonifaci, xi). However, in the Acts of Charlemagne and of the councils held during his time, even outside the Empire, as in England, the term Domnus Apostolicus, in its exact usage, meant simply the pope. Perhaps the only example of it found in Greek authors is in the second letter of Theodore the Studite to Leo III, ἐν ψυχῇ ἀποστολικῷ. Long before this, however, the word Apostolicus alone had been employed to designate the pope. Probably the earliest example is in the list of popes compiled at the time of Pope Vigilius (d. 572) under the name Apostolici or Apostolorum (P. L., LXXVIII, 1405). The expression recurs frequently in documents of the Carolingian kings, as well as in Anglo-Saxon writings. Claude de Turin gives a curious explanation—Apostolici costus. At the Council of Reims held in 1049 the Bishop of Compostela was epposcommunicated ‘quia contra fas sibi vendicare culmen apostolici nominis (because wrongly named himself an Apostolic name), thinking himself the successor of St. James the Greater, and it was thereupon laid down “quod solus Romanus Pontifex universalis Ecclesiae Primas esset et Apostolici” (that only the pontiff of the Roman see was primate of the universal Church and Apostles). To-day the title is found only in the Litany of the Saints. There are also the expressions apostoliceceticus (pontificate) and the ablative absolute apostolicecet (during the pontificate of). It is to be noted that in ecclesiastical usage the abbreviated form dominus signifies a human ruler as against Dominius, the Divine Lord. Thus at meals monastic grace was asked from the superior in the phrase “Domine benedicite, i.e.; “Be pleased sir to give the blessing.”

U. Benigni.

Donahoe, Patrick, publisher, b. at Munnery, County Cavan, Ireland, 17 March, 1811; d. at Boston, U. S. A., 18 March, 1901. He emigrated to Boston when ten years of age with his parents, and at fourteen was apprenticed to a printer. He worked on “The Jesuit” when that paper was started by Bishop Fenwick in 1832, and after the bishop relinquished its ownership it was carried on by H. L. Devereaux under the new title of “The Literary and Catholic Sentinel”. In 1836 he began the publication of “The Pilot’, a weekly paper devoted to Irish American and Catholic interests, which in succeeding years became the organ of Catholic opinion in New England, and had a wide circulation all over the United States. He established in connexion with it a publishing and book-selling house from which were issued a large number of Catholic books. Later he organized a bank. All his ventures proved successful and the wealth he acquired was generously given to advance Catholic interests. The great Boston fire of 1872 destroyed his publishing plant. Another fire in the following year and injudicious loans to friends made him financially much more than his bank, and in 1876 Bishop Williams purchased “The Pilot”, to help to pay the debtors of the bank, and Mr. Donahoe then started a monthly “Donahoe’s Magazine” and an exchange and passenger agency. In 1881 he was able to buy back “The Pilot” and devoted his remaining years to its management. During the Civil War he actively interested himself in the organization of the Catholic Legion of the Union. In 1893 he was appointed archivist of the American Catholic Historical Association, and in 1895 he was made an archivist of the United States. In 1893 the University of Notre Dame gave him the Lactare Medal for signal services to American Catholic progress.

Pilot (Boston), 23 March, 1901 and files; Leahy, Hist. Cath. Ch. in New England States (Boston, 1896).

Donahue, Patrick James, See Wheeling.

Donatello (Donato di Nicolò di Betto Bardi), one of the great Tuscan sculptors of the Renaissance, b. at Florence, c. 1386 d. there, 1466. He was the son of Nicolò di Betto Bardi, and was early apprenticed to a goldsmith to learn design. At the age of seventeen he accompanied his friend Brunellesco to Rome, and the two youths devoted themselves to drawing and to making excursions in their pursuit of the antique. Half the week they spent chiselling
Donatello's occupation was architecture; Donatello, though understanding the interrelation of the two arts, always, whether in conjunction with Brunellesco or, as later, with Michelozzo, made sculpture paramount. It is hard to place his work chronologically. While still a mere boy, he carved the wooden crucifix in Santa Croce, Florence. On his return from Rome to Florence he was engaged for years on the statues for Giotto's belfry and the buildings then in progress. For the Campane he did "The Baptist"; for the "Jeremiah" ("Habakkuk"); a group representing Abraham and Isaac and Isaac and "David" (tr. "Zuccone") (Bald-head), so lifelike that Donatello is said to have himself cried to it, "Why don't you speak?"; for the Duomo, "St. John the Evangelist" and "The Singing-gallery"; for OrSan Michele, "St. Peter" and "St. Mark", and the "St. George", which he executed at the order of the Guild of Armourers—Donatello's most ideal and perfect work. The socle-relief of "St. George and the Dragon and the King of Cappodocia's Daughter" is absolutely Greek in simplicity and plastic beauty. Other fine reliefs are the bronze doors for the sacristy of San Lorenzo; the medallions for the ceiling; and the "Annunciation" in the same church, with its noble figures of the Blessed Virgin and the archangel. In the Loggia de' Lanzi is the somewhat ill-proportioned group of the "Abraham and Isaac". The "Donatello's "David" in the Bargello, uniting the delicacy of the adolescent "Baptist" of Casa Martelli with a classic fashion of wreath-bound hair, seems a link between two of the phases in Donatello's development. Purely Renaissance and yet conceived in the antique spirit are the "Amorino" (Cupid) and the bronze "David" of the National Museum, Florence. Both are instinct with life and the potent vitality of youth, jubilant or contained. Pope John XXIII, a personal friend of the sculptor, died in Florence, 1419. Donatello made his tomb, a recumbent portrait-statue in the baptistery. In the Duomo of Siena he performed the same office for Bishop Pecchi. In Siena also he made several rare statuettes and reliefs for the chiseling-font of San Giovanni. At Prato, for the open-air pulpit of the Duomo, he carved the casement with groups of playing children (pupi). He is believed to have been in Rome again in 1433. A tabernacle of the Blessed Virgin in St. Peter's is said to be by Donatello, and also the tombstone of Giovanni Crivelli in Santa Maria in Arca Celli. In 1443 he went to Padua to do the "Christ in the Crib" for the sacristy of the church of St. Anthony of Padua. He remained there about ten years. First he carved his "Christ on the Cross", the head a marvel of workmanship and expression; then statuettes of the Blessed Virgin, St. Francis of Assisi, St. Anthony, and other saints; also a long series of reliefs for the high altar. While in Padua Donatello was commissioned to make a monument to the Venetian Condottiere (General) Gattamelata (Eraso de' Narni), and he blocked out the first great equestrian statue since classic times. The last known statue of Donatello is "St. Louis of Toulouse" in the interior of Santa Croce.

Donatello became bedridden in his latter years, and some of his works were completed by his pupils. Piero de' Medici provided for him. Donatello had always carried his life-work with him and his assistants, and took no forethought for himself. His character was one of great openness and simplicity, and he had an ingenuous appreciation of his own value as an artist. Unassuming as he was, his pride of craft and independence of spirit would lead him to destroy a masterpiece at one blow if his modest price were haggled over. He was buried beside his patron Cosimo de' Medici, near the tomb of his fellow-countryman Nami, in S. Croce, Florence. Donatello was a thorough realist and one of the first modellers with whom character and personality in the subject meant more than loveliness. His Apostles and saints were generally close likenesses of living persons. He had a vivid faculty for individual traits and expression and a method of powerful handling that makes it impossible to forget his creations. In such figures as the "Baptist" and the "Magdalene" of the baptistery of Florence he has repeatedly evoked admiration for its anatomical value. His busts of contemporaries (such as that of Nicolò da Uzzano, "Youth with Breastplate", etc.) look like casts from life. One of the most graceful pieces is the "San Giovanni", a reliquary of a child, in sandstone, in the Bargello, Florence. Minor works are the "Marzoceo" (original in the National Museum, Florence)—the lion, the "Martyrdom of St. Francis of Assisi" and the "St. George" in the Bargello; and the Martelli equestrian on the staircase of their house.

**Donation (in Canon Law)**, the gratuitous transfer to another of some right or thing. When it consists in placing in the hands of the donee some movable object it is known as a gift of hand (donum manualem, an offering or oblatio, an alms). Properly speaking, however, it is a voluntary contract, verbal or written, by which the donor expressly gives, without consideration, something to the donee, and the latter in an equally express manner accepts the gift. In Roman law and in some modern codes this contract carries with it only the obligation of transferring the ownership of the thing in question; actual ownership is obtained only by the real traditio or handing over of the thing itself, or by the observation of certain juridically prescribed formalities (L. 20, C. De pactis, 11, 3). Such codes distinguish between conventional (or imperfect) and perfect donation, etc., the actual transfer of the thing or right. In some countries the contract itself transfers ownership. A donation is called renumerative when inspired by a sentiment of gratitude or services rendered by the donee. Donations are also described as inter vivos if made while the donor yet lives, and causa mortis, when made in view or contemplation of death; the latter are valid only after the death of the donor and until then are at all times revocable. They much resemble testaments and codicils. They are, however, on the same footing as donations inter vivos once the execution of the donation has occurred. In the case of real and personal and contract donations the thing must by the act of giving pass to the donee; in the case of property donations it is sufficient if the property of the thing is transferred to the donee. A donation is revocable by the donor at any time. It is determinable by operation of the law or by agreement. The ownership of the thing is transferred, if it is determined, at the death of the donor. If the donation is gratuitous and the donee has some consideration the donation is determined at the death of the donor. The donee may not renounce the donation; he must accept it, or its value is transferred to the donor. A donation validates a contract which is null and void by operation of the law or because of recusation of the donee. The donee may assign the donation to another in order to receive the thing, but the donor may not assign the donation to another in order to receive the thing. A donation is revocable by the donor at any time but is determined at the death of the donor. A donation is determinable or revocable by operation of the law or by agreement if the donee has some consideration and is gratuitous. The donor may not assign the donation to another if the donee has some consideration. A donation is revocable by the donor at any time but is determined at the death of the donor. A donation is determinable or revocable by operation of the law or by agreement if the donee has some consideration and is gratuitous. The donor may not assign the donation to another if the donee has some consideration.
pose freely, even in favour of the Church, of property acquired by them after ordination [L. 33 (34) C. De episcopis et clericis, 1, 3]. The Franks, long quite unaccustomed to dispose of their property by will, were on the other hand generous in donations, especially cessiones post obitum, similar to the Roman law donations in view of death but carrying with them the renunciation on the donor's part of his right of revocation; other Frankish donations to the Church were reserved the usufruct. The only reason for the renunciation of the precatio ecclesiastica was quite favourable to the growth of donations. At the request of the donor the Church granted him the use of the donated object for five years, for his life, or even a use transferable to the heirs of the first occupant. Synods of this epoch assert to some extent the validity of pious donations even when the legal requisition had been observed, though as a rule they were not omitted. Generally speaking, the consent of the civil authority (princeps) was not indispensable for the acquisition of property by religious corporations. The restrictions known as the "right of amortization" (see Mortmain) are of later date, and are the outcome of theories elaborated in the Middle Ages but carried to their logical issue by the communal and (in the countries) concerning biens de mainmorte, or property held by inalienable tenure, i.e. the property of religious corporations, they being perpetual. The Church does not accept such legislation; nevertheless the faithful may act accordingly in order to secure to their donations the protection of the law.

Canonical Legislation. Donations are valid and obejct in ecclesiastical and civil law; a person disposes of their property and accepted by the administrators of ecclesiastical institutions. No other formality is required, neither notarial act nor authorization of the civil power. The declaration before the public authority, required by Roman law, is not obligatory in canon law. Nor are the faithful obliged to heed the restrictions which are placed by some modern civil codes in the way of a free disposition of their property. On the other hand the donation must be accepted by the donee; it is not true, as some have maintained, that every donation for works of religion (ad pias causas) implies a vow, i.e. an act in itself obligatory independently of the acceptance of the donee. If the administrators of an ecclesiastical institution refuse to accept it, they may be subjected to the prohibition of canon law a restitutio in integrum, whereby it is also put in a condition to accept the refused donation. The canonical motives for the revocation or diminution of a donation are the birth of children to the donor and the donation inofficiosa, or excessive generosity on the latter's part, whereby he diminishes the share of inheritance that legitimately belongs to his children. In both cases, however, the donation is valid in canon law to the degree in which it respects the legitimate share of the donor's children. It is worthy of note that while ecclesiastical and religious establishments may give alms, they are bound in the matter of genuine donations by the provisions of the canon law concerning the alienation of ecclesiastical property.

Civil Legislation.—In most European countries the civil authority restricts in three ways the right of the Church to accept donations: (1) by imposing the forms and conditions that the civil codes prescribe for donations; (2) by reserving to itself the right of saying what institutions shall have civil personality and be thereby authorized to acquire property; (3) by exacting the approval of the civil authority, at least for important donations. Austria recognizes a juridical personality not only in those religious institutions which are charged with the maintenance of public worship, but also, through easily granted approval, in religious associations of any kind. The so-called amortization laws (against the traditional inalienability of tenure on the part of religious corporations) have so far remained only a threat, though the Government reserves the right to establish such legislation. Religious communities, however, are required to make known to the civil authorities all their acquisitions of property. In Germany, even since the promulgation of the Civil Code of the Empire (1896), the legislation varies from State to State. In all, however, property rights are reserved to the ecclesiastical institutions that are recognized by the State. As a rule, donations must be authorized by the civil power if they exceed the value of five thousand marks (1250 dollars, or 250 pounds sterling) though in some states this figure is doubled. In Prussia civil authorization is requisite for all acquisition of real property by a diocese, a chapter, or any ecclesiastical institution. In Italy every donation must be approved by the civil authority, and only the institutions recognized by the State are allowed to acquire property; note, however, that simple benefices (see Benefice) and religious orders cannot acquire this last privilege. With few exceptions, ecclesiastical institutions in Italy are not allowed to invest in any other form of property than Government bonds or the "Joins legali," i.e. the "corporate" or "church" donations, or worship-associations, are recognized by the State as civil entities for the conduct of public worship; it is well known, however, that Pius X forbade the Catholics of France to form such associations. That country, it is true, recognizes the civil personality of fict associations organized for a non-lucrative purpose, but declares illicit every religious congregation not approved by a special law. At the same time, it refuses to approve the religious congregations which have sought this approval, and is gradually suppressing all those which were formerly approved. (See Property, Ecclesiastical.)

 Donation (in Civil Jurisdiction), the gratuitous transfer, or gift (Lat. donatio), of ownership of property. The Latin word munus also signified a gift, but a "gift on some special occasion such as births or marriages" (Roby, Roman Private Law, Cambridge, 1902, I, 80). The person transferring ownership by donation is termed the donor, the person to whom the transfer is made, the donee. In contemplation of law, the donation is "based upon the fundamental right every one has of disposing of his property as he wills." (125 New York Court of Appeals Reports, p. 579), a right, however, deemed from ancient times an appropriate subject for legal regulation and restraint (see Johns, Babylonian and Assyrian Laws, etc., New York, 1904, XXI). Donation requires the consent not only of the donor, but also, and also that of the donee to accept and assume it, "as I cannot," remarks Pothier (Treatise on Obligations, 4), "by the mere act of my own mind transfer to another a right in my goods, without a concurrent intention on his part to accept them." Donations are usually classified as (1)
inter vivos (among the living) and (2) mortis causa (in view of death).

(1) Inter Vivos.—Sir William Blackstone explains (in his Commentaries, II, 441) that in English law mutual consent to give and to accept is not a gift, but is an imperfect contract void for want of consideration. Yet delivery and acceptance being added to the ineffectual contract, the transaction becomes an irrevocable transfer by donation inter vivos, regarded in law as an executed contract, just as if the preliminary consents had constituted an effectual "act in the law" (see Pollock, Principles of Contract, New York, 1890, p. 2). "Every gift," remarks Chancellor Kent, "is which is made perfect by delivery, and every grant, are executed contracts, for they are founded on the mutual consent of the parties in reference to a right or interest passing between them" (Commentaries on American Law, II, 457; and Milton (Paradise Lost, XII, 67) says:

He gave us only over beast, fish, fowl, Dominion absolute; that right we hold
By his donation.

According to English law, writing under seal, known as a deed, so far transfers personal property without actual delivery that ownership vests upon execution of the deed, and the donation is irrevocable until discharge by delivery (J. W. Smith, The Law of Contracts, 36, Philadelphia, 1844), but the law has by statute limited the things, defined in English law as personal property, but land (real estate) may be the subject of this donation (24 Vermont Reports, 591; 115 New York Court of Appeals Reports, 293). The legislation of the Emperor Justinian abolished requirements which by Roman law had previously been necessary to perfect a donation, and thereupon, by force of this legislation, the donor's informal agreement to give, bound him to make delivery. Donations, were, however, rendered revocable by the same legislation for a failure to comply with their conditions, and also for gross ingratitude (Leage, Roman Private Law, London, 1906, 145). The English law "controls," to quote Chancellor Kent, "gifts when made to the prejudice of existing creditors" (Commentaries, II, 440); and a donation may be avoided if the donor "were under any legal incapacity . . . or if he were drawn in, circumvented or imposed upon by false pretences, ebrity or surprise" (Blackstone, Commentaries, II, 441). But English law does not annul donations for ingratitude nor for various other causes mentioned in the Roman law. English law does not, according to Chancellor Kent, "indulge in any idea of the Roman law: donatio causa mortis, the husband and wife were contrary to the policy of the Roman law which permitted donatio propter nuptias before marriage only (Leage, op. cit., 95). By English common law there accrued to a husband full ownership of his wife's personal property, and possession for their joint lives of her real property. And because English law deemed husband and wife one person (Bishop, Commentaries on the Law of Married Women, Boston, 1873, I, 231), a gift of personal property from husband to wife was "impossible according to the old and technical common law" (ibid., 730). But the commentator adds that "it is otherwise in equity" (ibid., 731). By the French Code Civil, donations inter vivos, designated entre vifs, are recognized; but they are subjected to many restrictions.

(2) Mortis Causa.—A donation of this kind is made when a person "in his last sickness," to quote Blackstone (Commentaries, II, 514), "apprehending his dissolution near, delivers or causes to be delivered to another the possession of any personal goods . . . to keep in case of his decease. The same donation may also be made in presence of any other impending peril of death. The "Institutes" of Justinian cite a classic example: sic et apud Homerum Telenarchus donat Pirce (I, VII). This donation differs strikingly from donation inter vivos in not being absolute, but conditional on the donor failing to recover from the sickness or to escape the peril; also in being dependent on his not having exercised the right which remains to him, of revoking the donation. The transfer is thus perfected by death only. Roman law permitted such donations between husband and wife because these were donations que conferuntur in tempus solutis matrimonii (Pothier, Pandecte Justinianae, XXIV, I, xix). Nor were donations of this kind from husband to wife forbidden by the English common law (24 Vermont Reports, 590). As the danger in view of which the donation in question is made is usually only irremovable, therefore a transfer from an owner "not terrified by fear of any present peril, but moved by the general consideration of man's mortality", cannot be sustained as a donation mortis causa. A transfer of ownership of real estate cannot be effected by this form of donation. And any donation mortis causa expressly embracing the whole of the donor's property has been said to be illegal, being deemed to be an attempt to escape disposition by last will (American Law Register, I, 25). The grounds already referred to on which a donation inter vivos may be avoided seem also grounds for avoiding a donation mortis causa. In every instance the evidence establishing such a donation as against a donor's representatives must "be clear and convincing, strong and satisfactory" (126 New York Court of Appeals Reports, 757). For this "death-bed disposition of property", as it is termed by Blackstone (op. cit.), is not a favourite of the law. Many years ago a lord chancellor of England, profoundly learned in the law and noted for his conservatism suggested that if "this donatio mortis causa was struck out of our law altogether it would be quite as well." (American Law Register, I, II). And by the Code Civil it has been "struck out" of the law of France.

Donation of Constantine (Lat. Donatio Constantiae).—By this name is understood, since the end of the Middle Ages, a forged document of Emperor Constantine the Great, by which large privileges and rich possessions were conferred on the pope and the Roman Church. In the oldest preserved (ninth century) manuscript (Bibliothèque Nationale, Paris, MS. Latin 3287) it was confided to Charles, the great Frank, by the emperor. The title reads: "Donationes domini Constantinii Imperatoris." It is addressed by Constantine to Pope Sylvester I (314-35) and consists of two parts. In the first (entitled "Confessio") the emperor relates how he was instructed in the Christian Faith by Sylvester, makes a full profession of faith, and (tells of his baptism in Rome by that pope, and how he was thereby converted and part the ("Donatio") of Constantine is made to confer on Sylvester and his successors the following privileges and possessions: the pope, as successor of St. Peter, has the primacy over the four Patriarchs of Antioch, Alexandria, Constantinople, and Jerusalem, also over all the bishops in the world. The Lateran basilica at Rome, built by Constantine, shall surpass all, and how it was thereby made a sanctuary. The emperor to the right to wear an imperial crown, a purple cloak and tunic, and in general all imperial insignia or signs of distinction; but as Sylvester refused to put on
his head a golden crown, the emperor invested him with the high white cap (phrygium). Constantin, the document continues, rendered to the pope the service of a sinner, but led the host up on which the pope rode. Moreover, the emperor makes a present to the pope and his successors of the Lateran palace, of Rome and the provinces, districts, and towns of Italy and all the Western regions (tom pulatium nostrum, ut prelatum est, quamque Rome urbis et omnes Italiae seu occidentalium regionum provincias loca et civitales). The document goes on to say that for himself the emperor has kept the true board upon which the pope bears his name, and thither he removes his government, since it is inconvenient that a secular emperor have power where God has established the residence of the head of the Christian religion. The document concludes with maledictions against all who dare to violate these donations and with the assurance that the emperor has signed them with his own hand and placed them on the tomb of St. Peter.

This document is without doubt a forgery, fabricated somewhere between the years 750 and 550. As early as the fifteenth century its falsity was known and demonstrated. Cardinal Nicholas of Cusa (De Concordantia Cathedrae, III, i, in the Basile ed. of his Opera, 1563, I) spoke of it as a dictamen apocryphum. Some authorities (Lorenz, Grauert, and Falsen, et ementita Constantini donatio declamatio, Mainz, 1518) proved the forgery with certainty. Independently of both his predecessors, Reginald Peacocke, Bishop of Chichester (1450–57), reached a similar conclusion in his work, The Repressor of over much Blaming of the Clergy, Rolls Series, II, 361–
306. Its genuineness was yet occasionally defended, and it still found further used as authentic, until Baronius in his "Annales Ecclesiasticorum" (ad an. 324) admitted that the "Donatio" was a forgery, whereafter it was soon universally admitted to be such. It is so clearly a fabrication that there is no reason to wonder that, with the revival of historical criticism in the fifteenth century, the true character of the document was at once recognized. The forger made use of various authorities, which Grauert and others (see below) have thoroughly investigated. The introduction and the conclusion of the document are imitated from authentic writings of the imperial period, but formule of other periods are also utilized. In the "Confession" of faith the doctrine of the Holy Trinity is explained at length, afterwards the Fall of man and the Institution of the Sacraments; the addition of the decrees of the Iconoclast Synod of Constantinople (754) against the veneration of images. The narrative of the conversion and healing of the emperor is based on the apocryphal Acts of Sylvester (Acta or Gesta Sylvaestri), yet all the particulars of the "Donatio" narrative do not appear in the hitherto known texts of that legend. The distinctions conferred on the pope and the cardinals of the Roman Church, the longer probably invented and described according to certain contemporary rites and the court ceremonial of the Roman and the Byzantine emperors. The author also used the biographies of the popes in the Liber Pontificalis (q. v.), likewise eighth-century letters of the popes, especially in his account of the imperial donations.

The authorship of this document is still wrapped in obscurity. Occasionally, but without sufficient reason, critics have attributed it to the author of the False Decretals (q. v.) or to some Roman ecclesiastic of the eighth century. On the other hand, the time and place of its composition have lately been thoroughly studied by numerous investigators (especially Germans), though no sure and universally accepted conclusion has as yet been reached. An attempt to prove the forgery Baronius (Annales, ad. an. 1081) maintained that it was done in the East by a schismatic Greek; it is, indeed, found in Greek canonical collections. Natalis Alexander opposed this view, and it is no longer held by any recent historian. Many of the recent critical students of the document locate its composition at Rome, and maintain that the forgery was a schismatic, their chief argument being an intrinsic one: this false document was composed in favour of the popes and of the Roman Church, therefore Rome itself must have had the chief interest in a forgery executed for a purpose so clearly expressed. Moreover, the sources of the document are chiefly Roman. Nevertheless, the earlier view of Zaeroma and others that the forgery was composed in the Byzantine Empire has quite recently been ably defended by Hengrother and Grauert (see below). They call attention to the fact that the "Donatio" appears first in Frankish collections, i. e., in the False Decretals and in the above-mentioned St-Denis manuscript; moreover the earliest certain quotation of it is by Frankish authors in the second half of the ninth century. Finally, this document was never a forgery before the middle of the eleventh century, nor in general is it referred to in Roman sources until the time of Otto III (983–1002, i. e., in case the famous "Diploma" of this emperor be authentic). The first certain use of it at Rome was by Leo IX in 1054, and it is to be noted that this pope was by birth and training a German, and that the "Donatio" was therefore imitated in Italy, for which reason it is supposed that the chief aim of the forgery was to prove the justice of the translatio imperii to the Franks, i.e., the transfer of the imperial title at the coronation of Charlemagne in 800; the forgery was, therefore, important mainly for the Frankish Empire. This view is rightly tenable against the opinion of the majority that the forgery originated at Rome.

A still greater divergence of opinion reigns as to the time of its composition. Some have asserted (more recently Martens, Friedrich, and Bayet) that each of its two parts was fabricated at different times. Martens holds that the author executed his forgery at brief intervals; that the "Constitutum" originated after 800 in connexion with a letter of Adrian I (778) to Charlemagne wherein the pope acknowledges the imperial position to which the Frankish king by his own efforts and fortune had attained. Friedrich (see below), on the contrary, attempts to prove that the "Constitutum" was composed of two really distinct parts. The gist of the first part, the so-called "Con- fesso", appeared between 638 and 653, probably 638–641, while the second, or "Donatio" proper, was written in the reign of Stephen I, 857–67. Paul, brother and successor of Pope Stephen. According to Bayet the first part of the document was composed in the time of Paul I (757–767); the latter part appeared in or about the year 774. In opposition to these opinions most historians maintain that the document was written at the same time and wholly by one author. But when was it written? Colom- nier decides for the reign of Pope Conon (805–857) and Genelin for the beginning of the eighth century (be- fore 728). But neither of these views is supported by sufficient reasons, and both are certainly untenable. Most investigators accent as the earliest possible date the pontificate of Stephen II (752–757), thus establishing a connexion between the forgery and the historical events that led to the origin of the States of the Empire and to the imperial title of the German Emperors. But in what year or period from the above-mentioned pontificate of Stephen II until the reception of the "Constitutum" in the collection of the False Decretals (c. 840–50) was the forgery executed? Nearly every student of this intricate question maintains his own distinct view. It is necessary first to answer a preliminary question: Did Pope Adrian I in his letter to Charlemagne of the year 778 (Jaffé, Ep. 111) exhibit a knowledge of the "Constitutum"? From a passage of this letter (Sicut temporibus beati Silvestri Romani pontificis a sanctae recorda-
tionsissimo Constantino magno imperatore per eius largitatem sanetae Dei Catholicae et Apostolien Romanae ecclesiae elevata et exalta ta est et potestatem in Hesperiae partibus largiri dignatus, ita et in his vestris felicissimis temporibus atque nostris sanetae Dei ecclesiæ, id est beati Petri apostoli, germinet aequexuitet, \ldots several writers, e.g. Dollinger, Lanen, Meyer, and others, have concluded that Adrian I lost then aware of this forgery, so that it must have appeared before 778. Friedrich assumes in Adrian I a knowledge of the "Constitutum" from his letter to Emperor Constantien VI written in 785 (Mansi, Concil. Coll., XI, 1056). Most historians, however, rightly refrain from asserting that Adrian I made use of this document; from his letters, therefore, the time of its origin cannot be deduced.

Most of the recent writers on the subject assume the origin of the "Donatio" between 752 and 795. Among them, some decide for the pontificate of Stephen II (752-757) on the hypothesis that the author of the forgery wished to substantiate thereby the claims of this pope in his negotiations with Pepin (Dollinger, Hauck, Friedrich, Böhler). Others locate the date of the forgery to the pontificate of Paul I (757-767), or even to the pontificate of St. Sylvester, and that the "Donatio" had especially in view the honour of this saint (Scheffer-Boichorst, Mayer). Others again locate its origin in the pontificate of Adrian I (772-795), on the hypothesis that the reign of Charlemagne, or the first years of Louis the Pious, i.e. somewhere between 800 and 810. They argue that the chief purpose of the forgery was to bestow on the Western ruler the imperial power, or that the "Constitutum" was meant to indicate what the new emperor, as successor of Constantine the Great, might have conferred on the Roman Church. They point out, as the first year of the Frankish Empire maintain that the document was written in the ninth century, e.g. especially Hergenröther and Grauert. The latter opines that the "Constitutum" originated in the monastery of St.-Denis, at Paris, shortly before or about the same time as the False Decretals, i.e. between 810 and 820.

Tightly connected with the date of the forgery is the other question concerning the primary purpose of the forger of the "Donatio". Here, too, there exists a great variety of opinions. Most of the writers who locate at Rome itself the origin of the forgery maintain that it was intended principally to support the claims of the popes to secular power in Italy; they differ, however, as to the extent of the said claims. According to the "Constitutum", the popes were also to be aided in the creation of a united Italy under papal government. Others would limit the papal claims to those districts which Stephen II sought to obtain from Pepin, or to isolated territories which, then or later, the popes desired to acquire. In general, this class of historians seems to connect the forgery with the historical events and political movements of that time in Italy (Mayer, Lanen, Friedrich, Loew, and others). Several of these writers lay more stress on the elevation of the papacy than on the donation of territories. Occasionally it is maintained that the forger sought to secure for the pope a kind of higher secular power, something akin to imperial supremacy as against the Frankish Government, then solidly established in Italy. Again, some of this class limit to Italy the expression occidentum regionum provinciarum, but most of them understand it to mean the whole former Western Empire. This is the attitude of Weiland, for whom the chief object of the forgery is the increase of papal power over the imperial, and the establishment of a kind of imperial supremacy of the pope over the whole West. For this reason also he lowers the date of the "Constitutum" no further than the end of the reign of Charlemagne (814). As a matter of fact, however, in this document Sylvester does indeed obtain from Constantine imperial rank and the emblems of imperial dignity, but not the real imperial supremacy. Martens therefore sees in the forgery an effort to elevate the papacy in general; all alleged prerogatives of the pope and of Roman ecclesiasties, all gifts of landed possessions, and rights of secular government are not meant to provide an elevation, and from it all the new Emperor Charlemagne ought to draw practical conclusions for his behaviour in relation to the pope. Scheffer-Boichorst holds a singular opinion, namely that the forger intended primarily the glorification of Sylvester and Constantine, and only in a secondary way a defence of the papal claims to territorial possessions. Grauert, for whom the forger is the Pyrenean Frankish writer Hergenrother, i.e. the forger had in mind a defence of the new Western Empire from the attacks of the Byzantines. Therefore it was highly important for him to establish the legitimacy of the newly founded empire, and this purpose was especially aided by all that the document alleges concerning the elevation of the pope. It might then be possible to deduce the last word of historical research in this matter still remains to be said. Important questions concerning the sources of the forgery, the place and time of its origin, the tendency of the forger, yet await their solution. New researches will probably pay still greater attention to textual criticism, especially that of the first part or "Confession" of the "Constitutum".

As far as the first few pages of this document permits us to judge, the forged "Constitutum" was first made known in the Frankish Empire. The oldest extant manuscript of it, certainly from the ninth century, was written in the Frankish Empire. In the second half of that century, the document is expressly mentioned by three Frankish writers. Ado, Bishop of Vienne, speaks of it in his Chronicon (840, in p. L., CXXIII, 92); \textit{Enea}, Bishop of Paris, refers to it in defence of the Roman primacy (Adversus Graecos, c. cix, op. cit., CXXI, 758); Hincmar, Archbishop of Reims, mentions the donation of Rome to the pope by Constantine the Great according to the "Constitutum" (De ordine palatini, c. xiii, op. cit., CXXV, 908). The document obtained wider circulation by its incorporation into the False Decretals (790-795, or more specifically between 817 and 852; Hinschius, Decretales Pseudo-Isidorianae, Leipzig, 1863, p. 249). At Rome no use was made of the document during the ninth and the tenth centuries, not even amid the conflicts and difficulties of Nicholas I with Constantinople, when it might have served as a weapon against the desiderata of the Patriarch and his followers. The first pope who used it in an official act and relied upon it, was Leo IX; in a letter of 1054 to Michael Cerularius, Patriarch of Constantinople, he cites the "Donatio" to show that the Holy See possessed both an earthly and a heavenly imperium, the royal priesthood. Thenceforth the "Donatio" acquires more importance and is more frequently used as evidence in the ecclesiastical and political conflicts between the papacy and the secular power. Anselm of Lucca and Cardinal Deusdedit inserted it in their collections of canons. Gratian, it is true, excluded it from his "Decretum", but it was soon added to it as "Palea". The ecclesiastical writers in defence of the papacy during the conflicts of the early part of the twelfth century quoted it as authoritative (Hugo de Fleury, De regal potestate et ecclesiastic dignitate, 11; \textit{Placidus of
Donatists. — The Donatist schism in Africa began in 311 and flourished just one hundred years, until the conference at Carthage in 411, after which its importance waned.

Causes of the Schism. — In order to trace the origin of the division we have to go back to the persecution under Diocletian. The first edict of that emperor against Christians (24 Feb., 303) commanded their churches to be destroyed, their Sacred Books to be delivered up and burnt, while they themselves were to be enslaved. St. Athanasius states that the fourth edict ordered all to offer incense to the idols under pain of death. After the abdication of Maximian in 305, the persecution seems to have abated in Africa. Until then it was terrible. In Numidia the governor, Florus, was infamous for his cruelty, and, though many officials may have been, like the proconsul Annius, unwilling to go further than they were obliged, yet St. Optatus is able to say of the Christians of the whole country that some were confessors, some were martyrs, some fell, only those who were hidden escaped. The exaggerations of the highly strung African character showed themselves. A hundred years earlier Tertullian had taught that flight from persecution was not permissible. Some now went beyond this, and voluntarily gave themselves up to martyrdom and to the faces of their tormentors, and were always, not always above suspicion. Menursius, the Bishop of Carthage, in a letter to Secundus, Bishop of Tigitis, then the senior bishop (primate) of Numidia, declares that he had forbidden any to be honoured as martyrs who had given themselves up of their own accord, or who had boasted that they possessed copies of the Sacred Books of the Bible. He knew that some of these, he says, were criminals and debtors to the State, who thought they might by this means rid themselves of a burdensome life, or else wipe away the remembrance of their misdeeds, or at least gain money and enjoy in prison the luxuries supplied by the kindness of Christians. The later exccesises of the Circumcellions show that Menursius had some ground for the severe line he took when he explains that the late supremacy, which in his own province had been tortured and put to death for refusing to deliver up the Scriptures; he himself had replied to the officials who came to search: "I am a Christian and a bishop, not a traditor." This word traditor became a technical expression to designate those who had given up the Sacred Books, and also those who had committed the worse crimes of delivering up the sacred vessels and even their own brethren.

It is certain that relations were strained between the confessors in prison at Carthage and their bishop. If we may credit the Donatist Acts of the forty-nine martyrs of Abitene, they broke off communion with Menursius. We are informed in these Acts that Menursius was a man of the severest ascetic profession, and that his deacon, Cecilian, raged more furiously against the martyrs than did the persecutors themselves; he set armed men with whips before the door of the prison to prevent their receiving any succour; the food brought by the piety of Christians was thrown to the dogs by these ruffians, and the drink provided was spiked in the street, so that the martyrs, whose condemnation the mild proconsul had deferred, died in prison of hunger and thirst. This story is recognized by Du-
DONATISTS

chene and others as exaggerated. It would be better
to say that the main point is incredible; the prisoners
would not have been allowed by the Roman officials
to starve; the details—that Mensurius confessed himself
a traditor, that he prevented the succouring of the im-
prisoned confessors—are simply founded on the letter
of Mensurius to Secundus. Thus we may safely reject
all the latter part of the Acts as fictitious. The earlier
part is authentic: it relates how certain of the faithful
of Africane met and celebrated their usual Sunday ser-
vice, in defiance of the emperor’s edict, under the
leadership of the priest Saturninus, for their bishop was
a traditor and they disowned him; they were sent to
Carthage, made bold replies when interrogated, and
were imprisoned by Anulinus, who might have con-
demned them to death forthwith. The whole account
is characteristic of the fervid African temperament.
We can well imagine how the prudent Mensurius and
his lieutenant, the deacon Caecilian, were disliked by
some of the more excitable among their flock.

We know in detail how the inquiries for sacred
books were carried out, for the official minutes of an
investigation at Cirta (afterwards Constantine) in
Numidia are preserved. The bishop and his clergy
showed themselves ready to give up all they had, but
drew back from the silver lamp-stands; every one of
their generosity was not remarkable, for they added
that the names and addresses were well known to the
officials. The examination was conducted by Munu-
tiis Felix, perpetual flamen, curator of the colony of
Cirta. Having arrived with his satellites at the bish-
op’s house—in Numidia the searching was more se-
vere and rigid than in other parts of the empire. A book
was found with four priests, three deacons, four subde-
ccons and several fossores (diggers). These declared
that the Scriptures were not there, but in the hands of
the lectors; and in fact the bookcase was found to be
empty. The clergy present refused to give the names
of the lectors, saying they were known to the notaries;
but, with the exception of the books; they gave in an
inventory of all possessions of the church: two golden
chalices, six of silver, six silver crouns, a silver bowl,
seven silver lamps, two candelsticks, seven short
bronze lamp-stands with lamps, eleven bronze lamps
with chains, eighty-two women’s tunics, twenty-eight
veils, sixteen men’s tunics, thirteen pairs of men’s
boots, forty-seven pairs of women’s boots, nineteen
countrymen’s smocks. Presently the subdeacon Sil-
vanius was called, and having taken a silver lamp,
which he had found behind a jug. In the din-
ing-room were four casks and seven jugs. A subde-
ccon produced a thick book. Then the houses of the
lectuals were visited: Eugenius gave up four volumes,
Felix, the mosele-worker, gave up five, Victorinus
eight, Projectus five large volumes and two small ones,
the grammian Victor two codices and five quiniones,
or gatherings of five leaves; Euticius of Casarea de-
cclared that he had no books; the wife of Coddeo pro-
duced six volumes, and said she had no more, and
a search was without further result. It is interesting
to notice that the books were all codices (in book form),
not rolls, which had gone out of fashion in the course
of the preceding century.

It is to be hoped that such disgraceful scenes were
infrequent. A contrasting instance of heroism is
found in the story of Felix. Bishop of Tibuca, who
was haled before the magistrate on the very d.
June, 303, when the decree was posted up in that city.
He refused to give up any books, and was sent to Car-
thage. The proconsul Anulinus, unable by close con-
fines to weaken his determination, sent him on to
Rome to Maximianus, the Emperor.
In 305 the persecution had relaxed, and it was
possible to unite fourteen or more bishops at Cirta
in order to give a successor to Paul. Secundus presided
as primate, and in his zeal he attempted to examine
the conduct of his colleagues. They met in a private
house, for the church had not yet been restored to the
Christians. “We must first try ourselves,” said the
primate, “before we can venture to ordain in his hon-
To Donatus of Mascele he said: “You are said to have
been a traditor.” “You know”, replied the bishop,
“how Florus searched for me that I might offer in-
ence, but God did not deliver me into his hands;
brother. As God forgave me, do you reserve me to
his judgment.” “What then”, said Secundus, “shall
we say of the martyrs? It is because they did not
suffer anything that they were crowned?” Secun-
dus was silenced by a text of the epistle. “See me
to God,” said Donatus, “to Him will I give an ac-
count.” (In fact, a bishop was not amenable to
pence and was properly “reserved to God” in this
sense.) “Stand on one side,” said the president, and
to Marinus of Aquae Tibitante he said: “You also
are said to be a traditor.” Marinus said: “I gave papers
to Polux; my books are safe.” This was not satis-
factory, and Secundus said: “Go over to that side”;
to Donatus of Calama: “You are said to be a tradi-
You gave up books on medicine.” Secundus
seems to have been incredulous, or at least he
thought a trial was needed, for again he said: “Stand
on one side.” After a gap in the Acts, we read that
Secundus turned to Victor, Bishop of Russicade: “I
We shall overcome!” Victor replied: “It was the curator, Valentinus; he
forced me to throw them into the fire. Forgive me
this fault, and God will also forgive it.” Secundus
said: “Stand on one side.” Secundus (after another
gap) said to Purpurius of Limata: “You are said to
have killed the two sons of your sister at Mileum
(Milviav).” The bishop and the priest Ilpaxo said:
“That you think I am frightened by you as the others are? What
did you do yourself when the curator and his
officials tried to make you give up the Scriptures?
How did you manage to get off scot-free, unless you
gave them something, or ordered something to be
given? They certainly did not let you go for no-
th! As for me I have killed and I kill those who are
against me: do not make me try any more. You
know that I do not intine, ere where I have no business.”
At this outburst a nephew of Secundus said to the
primate: “You hear what they say of you? He is
ready to withdraw and make a schism; and the same
is true of all those whom you accuse; and I know they
are capable of turning you out and condemning you,
and you alone will then be the heretic. What is it to
you that others are in a similar condition? You have
no account to God.” Secundus (as St. Augustine points
out) had apparently no reply ready against the accusa-
tion of Purpurius, so he turned to the two or three
bishops who remained unaccused: “What do you
think?” These answered: “They have God to Whom
they must give an account.” Secundus said: “You
know and God knows. Sit down.” And all replied:
Deo gratias.

These minutes have been preserved for us by St.
Augustine. The later Donatists declared them forged,
but not only could St. Optatus refer to the age of the
parchment on which they were written, but they are
made easily credible by the testimonies given before Ze-
nophilus in 320. Seeck, as well as Dusheesne (see below),
upholds the genuineness of the evidence from St.
Optatus of another fallen Numidian bishop, who refused to
come to the council on the pretext of bad eyes, but in
reality for fear his fellow-citizens should prove that he
had offered incense, a crime of which the other
bishop were not guilty. The bishops proceeded to
ordain a bishop, and they chose Silvanus, who, as a subde-
accon, ascribed to itself the church for sacred vessels. The people
of Cirta rose up against him, crying that he was a tra-
ditor, and demanded the appointment of a certain
Donatus. But country people and gladiators were
engaged to set him in the episcopal chair, to which he
was carried on the back of a man named Mutus.

Cecilian and Majorinus.—A certain Donatus of

Case Nigrae is said to have caused a schism in Carthage during the lifetime of Mensurius. In 311 Maxentius obtained dominion over Africa, and a deacon of Carthage, Felix, was accused of writing a defamatory letter against the tyrant. Mensurius was said to have confirmed this deposition in his house and was summoned to Rome. He was acquitted, but died on his return journey. Before his departure from Africa, he had given the gold and silver ornaments of the church to care of certain old men, and had also consigned an inventory of these effects to an aged woman, who was to deliver it to the next bishop. Maxentius gave liberty to the Christians, so that it was possible for an elected bishop to arrive at Carthage. The bishop of Carthage, like the pope, was consecrated by the neighbouring bishop, assisted by a certain number of others from the vicinity. He was primate not only of the proconsular province, but of the other provinces of North Africa, including Numidia, Byzaecne, Tripolitana, and the two Mauretaniae, which were all governed by the vicar of prefects. In each of these provinces the local primacy was attached to no town, but was held by the senior bishop, until St. Gregory the Great made the office elective. St. Optatus implies that the bishops of Numidia, many of whom were at no great distance from Carthage, had expected that they would have a voice in the election; but two priests, Botrus and Celestius, who each expected to be elected, had managed that only a small number of bishops should be present. Cecilian, the deacon who had been so obnoxious to the martyrs, was chosen by the whole people, placed in the chair of Mensurius, and consecrated by Felix, Bishop of Aptongia or Abtughia. The old men who had charge of the treasure of the church were obliged to give it up; they joined with Botrus and Celestius in refusing to acknowledge the new bishop. They were assisted by a rich lady, Anulinus, who was elected with Cecilian because he had rebuked her habit of kissing the bone of an uncanonized (non vivideatus) martyr immediately before receiving Holy Communion. Probably we have here again a martyr whose death was due to his own ill-regulated fervour.

Sceunus, as the nearest primate, came with his suffragans to Carthage to judge the affair, and in a great council by bishop order of the election of Cecilian to be invalid, as having been performed by a traditor. A new bishop was consecrated, Majorinus, who belonged to the household of Lucilla and had been a lector in the deanery of Cecilian. That lady provided the sum of 400 folles (more than 11,000 dollars), nominally for the poor; but all of it went into the pockets of the bishops, one-quarter of the sum being seized by Purpurus of Limata. Cecilian had possession of the basilica and the cathedral of Cyprian, and the people were with him, so that he refused to appear before the council. "If I am not properly consecrated", he said ironically, "let them treat me as a deacon, and lay hands on me afresh, and not on another. On this reply being brought, Purpurus cried: Let him be consecrated; let this be done; put on his head, and break his head in penance." No wonder that the action of this council, which sent letters throughout Africa, had a great influence. But at Carthage it was well known that Cecilian was the choice of the people, and it was not believed that Felix of Aptonga had given up the Sacred Books. Rome and Italy had given Cecilian their communion. The Church of the West knew that consecration by the traditor was invalid, or even if it was illicit, if the traditor was still in lawful possession of his see. The council of Sceunus, on the contrary, declared that a traditor could not act as a bishop, and that any who were in communion with traditores were cut off from the Church. They called themselves the Church of the martyrs, and declared that all who were in communion with public sinners like Cecilian and Felix were necessarily excommunicate.

The condemnation by Pope Melchisedec.—Very soon there were many cities having two bishops, the one in communion with Cecilian, the other with Majorinus. Constantine, after defeating Maxentius (28 October, 312), and becoming master of Rome, showed himself a Christian in his act. He wrote to Anulinus, proconsul of Africa (was he the same as the mild proconsul of 305?), restoring the churches to Catholics, and exempting clerics of the Catholic Church of which Cecilian is president from civil functions (Eusebius, Hist. Eccl., X., v. 15, and vii. 2). He also wrote to Cecilian (ibid., X. vi. 1) sending him an order for 10,000 (for 3,000) African pounds, per St. Crescilian, and Mauretania; if more was needed, the bishop must apply for more. He added that he had heard of turbulent persons who sought to corrupt the Church; he had ordered the proconsul Anulinus and the vicar of prefects to restrain them, and Cecilian was to appeal to these officials if necessary. The opposing party lost no time. A few days after the publication of these letters, their delegates, accompanied by a mob, brought to Anulinus two bundles of documents, containing the complaints of their party against Cecilian, to be forwarded to the emperor. St. Optatus has preserved a few words from their petition, in which Constantine is begged to grant judges from Gaul, where under his father's rule there had been no persecution, and therefore no traditores. Constantine knew the Church of the West, which had well treated Anulinus, and thereby make Gallic bishops judges of the primate of Africa. He at once referred the matter to the pope, expressing his intention, laudable, if too sanguine, of allowing no schisms in the Catholic Church. That the African schismatics might have no ground of complaint, he ordered three of the chief bishops of Gaul, Remusus of Vienne, St. Martin of Arles, to repair to Rome, to assist at the trial. He ordered Cecilian to come thither with ten bishops of his auxiliaries and ten of his own communion. The memorials against Cecilian he sent to the pope, who would know, he says, what procedure to employ in order to conclude the whole matter in accordance with justice (Eusebius, Hist. Eccl., X., v. 18). Pope Melchisedec.—In this case, the bishops of the African Church held that their peculiar faith was secure, if a canonical bishop of Rome were called to judge. Hence the request for this archbishop. It was the first time that Cecilian was directly appealed to. If he had been convoluted, the request would have been made by the bishop immediately before the trial at Rome, whom we understand why Majorinus is never again mentioned. The accusations against Cecilian in the memorial were disregarded, as being anonymous and unproved. The witnesses brought from Africa acknowledged that they had nothing against him. Donatus, on the other hand, was convicted by his own confession of having
rebatized and of having laid his hands in penance on bishops—this was forbidden by ecclesiastical law. On the third day the unanimous sentence was pronounced by Melchiades: Cecilian was to be maintained in ecclesiastical communion. If Donatist bishops returned to the Church, in a place where there were two rival bishops, the junior was to retire and be provided with another see. The Donatists were furious. A hundred years later their successors declared that Pope Melchiades was himself a traditor, and that on this account they had not accepted his decision; though there is no trace of this having been alleged at the time. But the nineteen bishops at Rome were contrasted with the seventy bishops of the Carthaginian Council, and a fresh judgment was demanded.

The Council of Arles.—Constantine was angry, but he saw that the party was powerful in Africa, and he summoned a council of the whole West (that is, of the whole of his actual dominions) to meet at Arles on 1 August, 314. Melchiades was dead, and his successor, St. Sylvester, thought it unbecoming to leave Rome, thus setting an example which he repeated in the case of Nicaea, and which his successors followed in their assemblies inERR_NUMEO]merini, among them being the provinces. Between forty and fifty sees were represented at the council by bishops or proxies; the Bishops of London, York, and Lincoln were there. St. Sylvester sent legates. The council condemned the Donatists and drew up a number of canons; it reported its proceedings in a letter to the pope, which is extant; but, as in the case of Nicaea, these have remained, nor are they clearly mentioned by the ancients. The fathers in their letter salute Sylvester, saying that he had rightly decided not to quit the spot “where the Apostles daily sit in judgment;”; had he been with them, they might perhaps have dealt more severely with the heretics. Among the canons, one forbids rebaptism (which was still practised in Africa), another declares that all who wish to return to the Church should have communion only at the hour of death. On the other hand, traditores are to be refused communion, but only when their fault has been proved by public official acts; those whom they have ordained are to retain their positions. The council pronounced some effect in Africa; the whole body of the Donatists was immovable. They appealed from the sentence; the emperor Constantine was horrified: “O insolent madness!” he wrote, “they appeal from heaven to earth, from Jesus Christ to a man.”

The Policy of Constantine.—The emperor retained the Donatists envouts in Gaul, after at first dismissing them. He seems to have thought of sending for Cecilian, then of granting a full examination in Africa. The case of Felix of Aptona was in fact examined by his order at Carthage in February, 315 (St. Augustine is probably wrong in giving 314). The minutes of the proceedings have come down to us in a mutilated state; they are referred to by St. Optatus, who appended them to his book with other documents, and they are frequently cited by St. Augustine. It was shown that Felix had been accused of the crime of Felix, who had been interpo- lated by a certain Ingentius; this was established by the confession of Ingentius, as well as by the witness of Alphius, the writer of the letter. It was proved that Felix was actually absent at the time the search for Sacred Books was made at Aptona. Constantine eventually summoned Cecilian and his opponents to Rome. The case of Felix of Aptona was in fact examined by his own see, and did not appear. Cecilian and Donatus the Great (who was now, at all events, bishop) were called to Milan, where Constantine heard both sides with great care. He declared that Cecilian was innocent and an excel- lent bishop (Augustine, Contra Crescentium, III, lxxi). He retained both in Italy, however, while he sent two bishops, Eunomius and Olympius, to Africa, with an idea of putting Donatus and Cecilian aside, and sub-
DONATISTS

had hoped for, and he weakly begged the Catholics to suffer the Donatists with patience. This was not easy, for the schisms broke out into violence. At Cirta, Silvanus having returned, they seized the basilica which the emperor had built for the Catholics. They would not give it up, and Constantine found no better expedient than to build another. Throughout Africa, but above all in Numidia, they were numerous. They taught that in all the rest of the world the Catholic Church had perished, through having communicated with the traditor Caecilian; their sect alone was the true Church. If a Catholic came into their churches, they drove him out, and washed with salt the pavement where he had stood. Any Catholic who joined them was forced to be rebaptized. They asserted that in all the rest of the world the Catholic Church was without fault, else their misprisions would be invalid. But in fact they were convicted of drunkenness and other sins. St. Augustine tells us on the authority of Tichonius that the Donatists held a council of two hundred and seventy bishops in which they discussed for seventy-five days the question of rebaptism; they finally decided that in cases where traditores refused to be rebaptized they should be excommunicated. They did not rebaptize traditores until the time of Macarius. Outside Africa the Donatists had a bishop residing on the property of an adherent in Spain, and at an early period of the schism they made a bishop for their small congregation in Rome, which met, it seems, on a hill outside the city, and had the title of St. Tichonius. They decided to succeed without a beginning. This was frequently ridiculed by Catholic writers. The series included Felix, Boniface, Encolpius, Macrobius (c. 370), Lucian, Claudian (c. 378), and again Felix in 411.

The Circumcellions.—The date of the first appearance of the Circumcellions is uncertain, but probably they began before the death of Constantine. They were mostly rustic enthusiasts, who knew not Latin, but spoke Punic; it has been suggested that they may have been of Berber blood. They joined the ranks of the Donatists, and were called by them *agoni stici* and "soldiers of Christ," but in fact were brigands. Troops of them were to be met in all parts of Africa. They had no regular occupation, but ran about armed, like pirates, and murdered Donatists and Catholics, but, it is said, that St. Peter had been told to put his sword into its sheath; but they did continual acts of violence with clubs, which they called "Israëlitès." They bruised their victims without killing them, and left them to die. In St. Augustine's time, however, they took to swords and all sorts of weapons; they rushed about accompanied by unmarried women, played, and drank. Their battle-cry was "laud es," and no bandits were more terrible to meet. They frequently sought death, counting suicide as martyrdom. They were especially fond of flinging themselves from precipices; more rarely they sprang into the water or fire. Even women caught the infection, and those who had sinned would cast themselves from the cliffs, to atone for their fault. St. Augustine says, that death by the hands of others, either by paying men to kill them, by threatening to kill a passer-by if he would not kill them, or by their violence inducing magistrates to have them executed. While paganism still flourished, they would come in vast crowds to any great sacrifice, not to destroy the idols, but to be martyred. Theodoret says a Circumcellion was accustomed to announce the intention of becoming a martyr long before the time, in order to be well treated and fed like a beast for slaughter. He relates an amusing story (Hier. Fab., IV, vi) to which St. Augustine also refers. A number of these fanatics, fattened like pheasants, met a young man and offered him a drawn sword to smite them with, threatening to murder him if he refused. He pretended to fear that when he had killed a few, the rest might change their minds and avenge the death of their fellows; and he insisted that they must all be bound. They agreed to this; when they were defenceless, the young man gave each of them a beating and went his way.

When in controversy with Catholics, the Donatist bishops were not proud of their supporters. They declared that self-sacrifices from a cliff had been forbidden in their councils. Yet the bodies of these martyrs were deified, and the Church such honors to them that only the bishops could not but conform, and they were often held enough of the strong arms of the Circumcellions. Theodoret, soon after St. Augustine's death, knew of no other Donatists than the Circumcellions; and these were the only ones that St. Augustine attacked as such. They were especially dangerous to the Catholic clergy, whose houses they attacked and pillaged. They beat and wounded them, put lime and vinegar on their eyes, and even forced them to be rebaptized. Under Ambrose and Theodoric, "the leaders of the Saints" in Numidia, property and roads were unsafe, debtors were protected, slaves were set in their masters' carriages, and the Catholic bishop was compelled to "conform to the "succession" of the Donatists, and these were the only honors that Donatist bishops invited a general named Taurinus to repress these extravagances. He met with resistance in a place named Octavia, and the altars and tablets to be seen there in St. Optatus' time testified to the veneration given to the Circumcellions who were slain; but their bishops denied them the honour due to them. In 428, the bishop of the city of *Pozzuoli* of Italy, Gregory, took some measures against the Donatists, for St. Optatus tells us that Donatus wrote him a letter beginning: "Gregory, stain on the senate and disgrace to prefects." The Persecution of Macarius.—When Constantine became master of the East by defeating Licinius in 325, he was prevented by the rise of Arianism in the East from sending, as he had hoped, Eastern bishops to Africa to adjust the differences between the Donatists and the Catholics. Circulian of Carthage was present at the Council of Nicaea in 325, and his successor, Gratus, was at that of Sardica in 312. The *concilium* of the Easterns on that occasion wrote a letter to Donatus, as though he were the true Bishop of Carthage; but the Arians failed to gain the support of the Easterns to a point of schism. Arianism had cut off the Church, which survived in Africa alone. The Emperor Constans was as anxious as his father to give peace to Africa. In 347 he sent thither two commissioners, Paulus and Macarius, with large sums of money for distribution. Donatus naturally saw in this an attempt to win over his adherents to the Church by bribery; he received the envoy with insolence: "What has the emperor to do with the Church?" said he, and he forbade his people to accept any largesses from Constans. In most parts, however, the friendly mission seems to have been not unfavourably received. But at Bagai in Numidia the bishop, Donatus, assembled the Circumcellions of the neighbourhood, who had already been excited by their bishop. Macarius was obliged to ask for the protection of the military. The Circumcellions attacked them, and killed two or three soldiers; the troops then became uncontrollable, and slew some of the Donatists. This unfortunate incident was thereafter continually thrown in the teeth of the Catholics, and they were nicknamed Macarins by the Donatists, who declared that St. Donatus of Bagai had been precipitated from a rock, and that another bishop, Marcellus, had been thrown into a well. The existing Acts of the latter "martyr" do not seem to deserve credit, and the African Catholics believed that the two bishops had sought their own deaths. The Acts of two other Donatist martyrs of 347, Maximian and Isaac, are preserved; they apparently belong to Carthage, and are attributed by Harnack to the Antipope Macrobius. It
seems that after violence had begun, the envoys ordered the Donatists to unite with the Church whether they willed or no. Many of the bishops took to flight with their partisans; a few joined the Catholics; the rest were banished. Donatus the Great died in exile. A Donatist named Vitellius composed a book to show that the servants of God are hated by the world.

A solemn Mass was celebrated in each place where the union was completed, and the Donatists set about a rumour that images (obviously of the emperor) were to be placed on the altar and worshipped. As nothing of the sort was found to be done, and as the envoys merely made a speech in favour of unity, it seems that the reunion was effected with less violence than might have been expected. The Catholics and their bishops praised God for the peace that ensued, though they declared that they had no responsibility for the action of Paulus and Macarius. In the following year Gratian, the Catholic Bishop of Carthage, held a council, in which the reiteration of baptism was forbidden, while, to please the railed Donatists, traditors were condemned anew. It was forbidden to honour suicides as martyrs.

RESTORATION OF DONATISM BY JULIAN.—The peace was happy for Africa, and the forcible means by which it was obtained were justified by the violence of the sectaries. But the accession of Julian the Apostate in 361 changed the face of affairs. Delighted to throw Christianity into confusion, Julian allowed the Catholic bishops who had been exiled by Constantius to return to the sees which the Arians were occupying. This was done with such liberality that they were similarly allowed to return at their own petition, and received back their basilicas. Scenes of violence were the result of this policy both in the East and the West. "Your fury," wrote St. Optatus, "returned to Africa at the same moment that the devil was set free," for the same emperor restored supremacy to paganism and the Donatists to Africa. The decree of Julian was considered so discriminable to them, that the Emperor Honorius in 405 had it posted up throughout Africa for their shame. St. Optatus gives a voluminous catalogue of the excesses committed by the Donatists on their return. They invaded the basilicas with arms; they committed so many murders that a report of them was sent to the emperor. Under the orders of the bishop of Carthage, Rusticus, and Lelis; they stripped off the roof, pelted with tiles the deacons who were round the altar, and killed two of them. In Numidia two bishops availed themselves of the complaisance of the magistrates to throw a peaceful population into confusion, expelling the faithful, wounding the men, and not sparing the women and children. Since they denied the validity of the sacraments administered by traditors, when they seized the churches they cast the Holy Eucharist to the dogs; but the dogs, inflamed with madness, attacked their own masters. An ampulla of chrism thrown out of a window was found unbroken on the rocks. Two bishops were guilty of rape; one of these seized the bishop's house, but was killed by the Catholic laity. All Catholics whom they could force to join their party were made penitents, even clerics of every rank, and children, contrary to the law of the Church, some for a year, some for a month, some but for a day. In taking possession of a basilica, they destroyed the altar, or removed it, or at least scraped the surface. They sometimes broke up the chalices, and sold the materials. They washed pavements, walls, and columns. Not content with recovering their churches, they employed pagan functionaries to obtain for them possession of the sacred vessels, furniture, altar-linen, and especially the books (how did they purify the books? asks St. Optatus), sometimes leaving the Catholic congregation with no books at all. The cemeteries were closed to the Catholic dead.

The revolt of Firmus, a Mauretanian chieftain who defied the Roman power and eventually assumed the style of emperor (366-72), was undoubtedly supported by many Donatists. The imperial laws against them were strengthened by Valentinian in 373 and by Gratian, who wrote in 377 to the vicars of prefects, Flavian (himself a Donatist), ordering all the basilicas of the schismatics to be given up to the Catholics. St. Augustine shows that even the churches which the Donatists had occupied by violence were restored. The same emperor required Claudian, the Donatist bishop at Rome, to return to Africa; as he refused to obey, a Roman council had him driven a hundred miles from the city. It is probable that the Catholic Bishop of Carthage, Genevlius, caused the laws to be mildly administered in Africa.

ST. OPTATUS.—The Catholic champion, St. Optatus, Bishop of Milevis, published his great work "De schismate Donatistarum" in answer to that of the Donatist Bishop of Carthage, Parmenianus, under Valentinian and Valens, 361-75 (so St. Jerome). Optatus himself tells us that he was writing after the death of Julian (363) and more than sixty years after the beginning of the schism (he means the persecution of 311). The work which is preserved is brought up to date by the author after the accession of Pope Siricius (Dec., 384), with a seventh book added to the original six. In the first book he describes the origin and growth of the schism; in the second he shows the notes of the true Church; in the third he defends the Catholics from the charge of persecuting. The fourth book shows how to be saved by Faith and by the altars of the Catholic faithful. In the fourth book he refutes Parmenianus's proofs from Scripture that the sacrifice of a sinner is polluted. In the fifth book he shows the validity of baptism even when conferred by sinners, for it is conferred by Christ, the minister being the instrument only. This is the first important statement of the doctrine that the grace of the sacraments is derived from the opus anglicanum of Christ independently of the worthiness of the minister. In the sixth book he describes the violence of the Donatists and the sacrilegious way in which they had treated Catholic altars. In the seventh book he treats chiefly of unity and of reunion, and returns to the subject of Macarius.

He calls Parmenianus "brother", and wishes to thank the Donatists for the good they have done. He mentions that they were not heretics. Like some other Fathers, he holds that only pagans and heretics go to hell; schismatics and all Catholics will eventually be saved after a necessary purgation. This is the more curious, because before him and after him in Africa Cyprian and Augustine both taught that schism is as bad as heresy, if not worse. St. Optatus was much venerated by St. Augustine and later by St. Fulgentius. He writes with vehemence, sometimes with violence, in spite of his protestations of friendliness; but he is carried away by his indignation. His style is forcible and effective, often concise and epigrammatic. To this work he appended a collection of documents containing the evidence for the history he had related. This evidence had been written, as he says, in many places before the peace of 347, and not long after the latest document it contains, which is dated Feb., 330; the rest are not later than 321, and may possibly have been put together as early as that year. Unfortunately these important historical testimonies have come down to us only in a single mutilated MS., the archetype of which was also incomplete. The use of 411 and is often quoted at some length by St. Augustine, who has preserved many interesting portions which would otherwise be unknown to us.

THE MAXIMINANS.—Before Augustine took up the mantle of Optatus together with a double portion of his spirit, the Catholics had gained new and victorious arguments from the divisions among the Donatists
The Donatists themselves could not name them all. We hear of Urbanists; of Claudianists, who were reconciled to the main body by Primianus of Carthage; of Rogatists, a Mauretanian sect, of mild character, because no Circumcellions belonged to it; the Rogatists were severely punished whenever the Donatists could induce the magistrates to do so, and were also persecuted by Optatus of Timgad. But the most famous sectaries were the Maximianists, for the story of their separation from the Donatists reproduces with strange exactitude that of the Donatists themselves from the communion of the Church. The conduct of the Donatists towards them was so inconsistent with their avowed principles, that it became in the skilled hands of Augustine the most effective weapon of all his controversial armuray.

Primianus, Donatist Bishop of Carthage, excommunicated the deacon Maximianus. The latter (who was, like Majorinus, supported by a lady) got together a council of forty-three bishops, who summoned Primianus to appear before them. The primate refused, insulted their envoy, tried to have them prevented from celebrating the Sacred Mysterions, and had stones thrown at them in the street. The council summoned him before a greater council, which met to the number of a hundred bishops at Celsiusa in June, 382. Primianus was committed to prison, and his communion was suspended within eight days; if they should delay till after Christmas, they would not be permitted to return to the Church even after penance; the lity were allowed until the following Easter, under the same penalty. A new bishop of Carthage was appointed in the person of Maximianus himself, and he was consecrated by Felix, his bishop; the Primianus were rebaptized, if they had been baptized after the permitted delay. Primianus stood out, and demanded to be judged by a Numidian council; three hundred and ten bishops met at Bagad in April, 394; the primiate did not take the place of an accused person, but himself presided. He was of course acquitted, and the Maximianists were condemned with their abettors among the clergy of Carthage were given till Christmas to return; after this period they would be obliged to do penance. This decree, composed in eloquent style by Emeritus of Caesarea, and adopted by acclamation, made the Donatists henceforward ridiculous through their having readmitted schismatics without penance. Maximianus's conduct was railed to the grave by the proconsul, who had eloped, the Donatists persecuted the unfortunate Maximianists, representing themselves as Catholics, and demanding that the magistrates should enforce against the new sectaries the very laws which Catholic emperors had drawn up against Donatism. Their influence enabled them to do this, for they were still far more numerous than the sectarians, and their numbers were often of their party. In the reception of those who returned from the party of Maximianus they were yet more fatally inconsequent. The rule was theoretically adhered to that all who had been baptized in the schism must be rebaptized; but if a bishop returned, he and his whole flock were admitted without relapsing. This was allowed even in the case of the consecrators of Maxentius's textatus of Assur and Felixianus of Musti, after the proc smul had vainly tried to expel them from their see, and although a Donatist bishop, Rogatus, had already been appointed at Assur. In another case the party of Primianus was more consistent. Silviaus, the Maximianist Bishop of Membres, was another of the consecrators. To this group was summoned by the proconsul to retire in favour of the Primatist Restitutus. As he was much respected by the people of Membres, a mob was brought over from the neighbouring town of Abitine to expel him; the aged bishop was beaten, and made to dance with dead dogs tied round his neck. But his people built him a new church, and three bishops coexisted in this small town, a Maximianist, a Primatist, and a Catholic.

The leader of the Donatists at this time was Optatus, Bishop of Thamugadi (Timgad), called Gildonius, from his friendship with Gildo, the Count of Africa (386-397). For ten years Optatus, supported by Gildo, was the tyrant of Africa. He persecuted the Rogatists and Maximianists, and he used troops against the Catholics. St. Augustine tells us that his vices and cruelties were beyond description; but they had not lengthened the existence of the Donatists, for though he was hated throughout Africa for his wickedness and his evil deeds, yet the Puritan faction remained always in full communion with this bishop, who was a robber, a ravisher, an oppressor, a traitor, and a monster of cruelty. When Gildo fell in 397, after having made himself master of Africa for a few months, Optatus was thrown into a prison, in which he died.

St. Augustine.—St. Augustine began his victorious campaign against Donatism soon after he was ordained priest in 381. His popular psalm or "Aeneidarium" against the Donatists was intended to make known to the people the arguments set forth by St. Optatus, with the same conciliatory end in view. It shows the same tendency as other works; a Donatist, condemned by pope and council, separated from the whole world, a cause of division, violence, and bloodshed; the true Church is the one Vine, whose branches are over all the earth. After St. Augustine had become bishop in 395, he obtained conferences with some of the Donatist leaders, though not with his bishop. At Hippo, he was joined by his friend, the letter of Parmenianus, refuting his calumnies and his arguments from Scripture. More important were his seven books on baptism, in which, after developing the principle already laid down by St. Optatus, that the effect of the sacrament is independent of the holiness of the minister, he shows in great detail that the authority of St. Cyprian is more awkward than convenient for controversial use. The principal Donatist controvertist of the day was Petilianus, Bishop of Constantine, a successor of the traditor Silvanus. St. Augustine wrote two books in reply to a letter of his against the Church, adding a third book to answer another letter in which he was himself attacked by Petilianus. Before this last book he published his "De Unitate ecclesiae" about 408. To these works must be added some sermons and some letters which are real treatises.

The arguments used by St. Augustine against Donatism fall under three heads. First we have the historical proofs of the regularity of Cæcilian's consecration, of the innocenae of Felix of Aptuiga, of the guilt of the founders of the "Pure" Church, also the judgments given by all the fathers of his time. In his history of Macarius, the barbarous behaviour of the Donatists under Julian, the violence of the Circumcellions, and so forth. Second, there are the doctrinal arguments: the proofs from the Old and New Testaments that the Church is Catholic, diffused throughout the world, and necessarily one and united; appeal is made to the Sea of Rome, where the succession of bishops is from the same root. Third, St. Augustine borrows his list of popes from St. Optatus (Ep. ii), and in his psalm crystallizes the argument into the famous phrase: "That is the rock against which the proud gates of hell do not prevail." A further appeal is to the Eastern Church, and especially to the Apostolic Churches to which St. Peter, St. Paul, and St. John addressed epistles—they are not in communion with the Donatists. The validity of baptism conferred by heretics, the impurity of rebaptizing, are
important points. All these arguments were found in St. Optatus. Peculiar to St. Augustine is the necessity of
defending St. Cyprian, and the third category is
wholly his own. This third division comprises the
argumentum ad hominem drawn from the inconsistency of
the Donatists themselves; Secundus had pardoned
the traditors; full fellowship was accorded to malefactors
like Optatus Gildonianus and the Circumcellion;
Tichonius turned against his own party; Maximian
had divided from Primianus just as Majorinus from
Cecilian; the Maximinians had been readmitted with-
out rebaptism.

This method of argument was found to be of
great practical value, and many conversions were now
taking place, largely on account of the false position in
which the Donatists had placed themselves. This
point had been especially emphasized by the Council of
Carthage of Sept. 401, which had ordered informa-
tion as to the treatment of the Maximinians to be
gathered from magistrates. The same synod re-
stored the earlier rule, long since abolished, that Dona-
tist bishops and clergy should retain their rank if they
returned to the Church. Pope Anastasius I wrote to
this council urging the importance of the Donatist
question. Another council in 403 organized public
disputations with the Donatists. This energetic ac-
ion roused the Circumcellions to new violence. The
bishop of Cimiez, the great grammarian, St. Possidius,
was insulted and ill-treated by a party led by a Donatist priest, Crispinus.
The latter’s bishop, also named Crispinus, was
tried at Carthage and fined ten pounds of gold as a
heretic, though the fine was remitted by Possidius.
This is the first case known to us in which a Donatist is
declared a heretic, but henceforward it is the common
stock in the treatment of Donatists. In the case of
Maximianus, Bishop of Bagaila, is also related by St.
Augustine in detail. The Emperor Honorius was in-
duced by the Catholics to renew the old laws against the
Donatists at the beginning of 405. Some good re-
resulted, but the Circumcellions of Hippo were excited
to new violence. The letter of Petilianus was de-
fended by a grammarian named Crescentius, against
whom St. Augustine published a reply in four books.
The third and fourth books are especially important,
as in these he argues from the Donatists’ treatment of
the Maximinians, quotes the Acts of the Council of
Cirta held by Secundus, and cites other important
documents. “The saint also replied to a pamphlet by
Petilianus, De unico baptismate.”

In May, 411, Augustine had once
hoped to conciliate the Donatists by reason only. The
violence of the Circumcellions, the cruelties of Optatus
of Thamugadi, the more recent attacks on Catholic
bishops had all given proof that repression by the secular
arm was absolutely unavoidable. It was not neces-
ecessarily a case of persecution for religious opinions, but
simply a case of the defense of property against the
ensuring of freedom and safety for Catholics. Never-
theless the laws were much further than this. Those
of Honorius were promulgated anew in 408 and 410.
In 411 the method of disputation was organized on a
grand scale by order of the emperor himself at the re-
quest of the Catholic bishops. Their case was now
complete and unanswerable. But this was to be
hoped from Africa. The people of Africa knew
ition was to be forced to recognize the facts, by a public
exposure of the weakness of the separatist position.
The emperor sent an official named Marcellinus, an
excellent Christian, to preside as cognitor at the con-
ference. He issued a proclamation declaring that he
would exercise absolute impartiality in his conduct of
the proceedings and in his final judgment. The Dona-
tist bishops who should come to the conference were
to receive back for the present the basilicas which had
been taken from them. The number of those who
arrived at Carthage was very large, though somewhat
less than the two hundred and seventy-nine whose
signatures were appended to a letter to the president.
The Catholic bishops numbered two hundred and
eighty-six. Marcellinus decided that each party
should elect seven disputants, who alone should speak,
seven advisers whom they might consult, and four
secretaries to keep the records. Thus only thirty-six
bishops would be present in all. The Donatists pre-
tended that this was a device to prevent their great
numbers being known; but the Catholics did not ob-
ject to all of them being present, provided no disturb-
ance was caused. The chief Donatistic speaker, besides the amiable
and venerable Bishop of Carthage, Aurelius, was of course
Augustine, whose fame had already spread through the
whole Church. His friend, Alypius of Tagaste, and
his disciple and biographer, Possidius, were also
among the seven. The principal Donatist speakers
were Emeritus of Césarens in Mauretania ("Cherchel") and
Petilianus of Constantine (Cirta); the latter spoke or
interrupted many. The main doctrinal points and his-
torical proofs of the Catholics were made perfectly
plain. The cognitor summed up in favour of the
Catholic bishops. The churches which had been pro-
visionally restored to the Donatists were to be given
up; their assemblies were forbidden under grave pen-
alties. The lands of those who permitted Circumcel-
 lions or their property were to be confiscated. Those
who persisted in a great assembly were submitted to all
the speakers for their approval, and the report of each
speech (mostly only a single sentence) was signed by
the speaker as a guarantee of its accuracy. We pos-
sess these minutes in full only as far as the middle of
the third day; for the rest only the headings of each
little speech are preserved. These headings were
read, and a vote of approval was required. The con-
ference was convened for three days amid many interrup-
tions. On account of the dullness and length of the
full report, St. Augustine composed a popular résumé of the discussions in his "Breviculi
Collationis", and he went with more detail into a few points in a final pamphlet, "Ad Donatistas post Colla-
tonem".

Carthage, Jan., 412, Honorius issued a final law against
the Donatists, renewing old legislation and adding a
scale of fines for Donatist clergy, and for the laity and
their wives: the ilustrates were to pay fifty pounds of
gold, the spectabiles forty, the senatores and sacerdotes
thirty, the clarissimi and principales twenty, the decu-
riones, negotiatores, and pliebii five, while Circumcel-
 lions were to pay ten pounds of silver. Sires were to be
punished by order of Marcellinus in order to facilitate
reference. On account of the dullness of the whole report, St. Augustine composed a popular
résumé of the discussions in his "Breviculi
Collationis", and he went with more detail into a few points in a final pamphlet, "Ad Donatistas post Colla-
tonem".

tonem".
hundred. A further law was published in 428. The good Marcellinus, who had become the friend of St. Augustine, fell a victim (it is supposed) to the rancour of the Donatists; for he was put to death in 413, as though an accomplice in the revolt of Hercules, Count of Africa, in spite of the orders of the emperor, who did not believe him guilty. Donatism was now discredited by the sufferings and fate described by the persecuting laws of Honorius. The Circumcellions made some dying efforts, and a priest was killed by them at Hippo. It does not seem that the decrees were rigidly carried out, for Donatist clergy were still found in Africa. The ingenious Emeritus was at Cascarea in 418, and at the wish of Pope Zosimus St. Augustine had a conference with him. But this time the Bishop of the whole Donatism was dead. Even before the election of an anti-pope, Catholic bishops in Africa were considerably more numerous than the Donatists, except in Numidia. From the time of the invasion of the Vandals in 430 little is heard of them until the days of St. Gregory the Great, when they seem to have revived somewhat, for that pope complained to the Emperor Maurice that they had caused strictly enforced laws to be finally disappeared with the irritations of the Suecans.

Donatist Writers.—There seems to have been no lack of literary activity among the Donatists of the fourth century, though little remains to us. The works of Donatus the Great were known to St. Jerome, but have not been preserved. His book on the Holy Spirit is said by some to have been Arian in doctrine. His treatise on the Pseudo-Cyril, "De singularitate clericorum" is by Maerobius; and the "Adversus aleatores" is by an antipope, either Donatist or Novatianist. The arguments of Parmenianus and Crescentius are known to us, though their works are lost; but Monceaux has been able to restore from St. Augustine's citations short works by Petilianus of Carthage, and "Donatus, contrarius a libellus" by a certain Fulgentius, from the citations in the Pseudo-Augustinian "Contra Fulgentium Donatistam". Of Tichonius, or Tyconius, we still possess the treatise "De Septem regulis" (P. L., XVIII; new ed. by Professor Burkhart, in Cambridge "Texts and Studies", III, 1, 1899) on the interpretation of Holy Scripture. His commentary on the Apocalypse is lost, as are the greater part of his writings, and their commentaries on the same book. Tichonius is chiefly celebrated for his views on the Church, which were quite inconsistent with Donatism, and which Parmenianus tried to refute. In the famous words of St. Augustine (who often refers to his illogical position and to the force with which he argued against the cardinal tenets of his own faith), Tichonius, "accursed on all sides" by the voices of the holy pages, avowed and saw the Church of God diffused throughout the world, as had been foreseen and foretold of her so long before by the hearts and mouths of the saints. And seeing this, he undertook to demonstrate and assert against his own party that no sin of man, however villainous and monstrous, can interfere with the promises of God, nor can any persecution bring about the word of God to be made void as to the existence and diffusion of the Church to the ends of the earth, which was promised to the Fathers and now is manifest" (Contra Ep. Parmen. I, 1).

Among the great general histories, Tillemont's full account in his "Monuments" is the most valuable, as it has not yet been superseded. Among modern books: Bright, The Age of the Fathers (London, 1903); Fuller, in Dict. Christ. Biog., s. v. Donatism; and Du Bois, Historia Ecclesiae Ancienne de l'Eglise (Paris, 1907). Among monographs on Africa: Scheler, Itinéraire Africain (Paris, 1879), and Ant., 1870; S. van Stecker, Historia Ecclesiae Africana (Utrecht, 1690); II. Morelli, Africa Christiana (3 vols., Brescia, 1816-17); Pablo de Lescarot, Vies et voyages d'Afrique (Paris, 1842); Idem, Histoire des voyages d'Africains (Paris, 1805, 1827); Leclercq, L'Afrique Chrétienne (2 vols., Paris, 1901); Monceaux, Histoire de l'Eglise d'Afrique (Paris, 1901). I and the fourth volume will deal with Donatism. The following monographs are of less importance: Elliger du Pin, Historia Donatistarum, prefixed to his ed. of St. Opta-
only resumed his work among the blacks, but extended it to the Indians of Saramaca. In 1685 he took up his residence in Batavia where for nearly thirty-two years he ministered to 600 lepers. He left them only to visit the blacks and Indians. In 1685 the whole colony was confided to the Redemptorist Fathers by the Holy See and the King of Holland. Father Donders at once asked to be of their number and was received in Paramaribo, in 1687, by Monsignor Swinkels, the first Redemptorist vicar Apostolic of Surinam. A few months later he went back to his charge. He studied music to cheer his afflicted children, and though given an assistant he laboured to the end. The process for his beatification has been placed before the Congregation of Sacred Rites.

Dongan, Thomas, second Earl of Limerick, b. 1634, at Castletown Kilclavory, now Celbridge, County Kildare, Ireland; d. at London, 1715. He was the youngest son of Sir John Dongan, Baronet, Member of the Irish Parliament; an uncle, Richard Tangier, K.G. England, was the Earl of Tyrconnel. His wards created Earl of Tyrconnel, Lieutenant-Governor of Ireland; and another, Sir Robert, married Grace, daughter of Lord Carew, who was Baron of Baltimore. At the death of Charles I, the family, devoted to the Stuarts, removed to France. Thomas served in an Irish regiment, participated in all Turenne's campaigns under the name of D'Unguent and rose to the rank of colonel in 1674. After the Treaty of Nimeguen (1678) he returned to England in obedience to the order of the English government recalling all British subjects in French service. Through the influence of his uncle, a fellow-officer under Turenne, he was appointed to high rank in the army designated for service in Flanders, and was granted an annual pension of £500. The same year (1678) he was appointed Lieutenant-Governor of Tangiers. In 1682 the Duke of York, the Lord Proprietor, selected Dongan to govern the Province of New York, then bankrupt and in a state of rebellion. In this office Dongan proved himself an able lawyer, and left an indelible mark on political and constitutional history. He convened the first representative assembly of New York Province on 14 Oct., 1683, at Fort James within the present boundaries of the city of New York. This assembly, under the wise supervision of Dongan, passed an act entitled “A Charter of Liberties,” by which the supreme legislative power under the Duke of York shall reside in a governor, council, and the people convened in general assembly; conferred upon the members of the assembly rights and privileges making them a body coequal to and independent of the British Parliament; established town, county, and general courts of justice; solemnly proclaimed the right of religious liberty; and passed acts enunciating certain constitutional liberties, e.g., no taxation without representation; taxes could be levied only by the people met in general assembly; right of suffrage; no martial law or quartering of the soldiers without the consent of the inhabitants; election by majority of votes; and the English law of real property.

Thus to Dongan's term as governor can be dated the Magna Charta of American constitutional liberties for his successor, Governor Webbe, and in the same year, 1683, the Associative and Consecutive Agreement of the inhabitants of New York Province, which was the program of continuous political agitation by the colonists of New York Province during the eighteenth century. It developed naturally into the present state government, and many of its principles passed into the framework of the Federal Government. Moreover, a rare tribute to his genius, the government imposed by the Duke of York in 1683 was accepted by the inhabitants of New York Province, which was adopted by England after the American War of Independence as the framework of her colonial policy, and constitutes the present form of government in Canada, Australia, and the Transvaal. Dongan signed the Charter of Liberties 30 Oct., 1683, and on the following day solemnly proclaimed it at the City Hall of New York City. The Duke of York signed and sealed the Charter 4 Oct. 1684; but never returned it, probably for reasons of prudence, for at the time Charles II had, by a quo warranto proceeding, abolished the Charters of New England, and the Charter of Pennsylvania granted in 1684 distinctly admits the right of Parliament to tax the colonies. Dongan established the boundary lines of the province by settling disputes with New England. He was the Governor of Nova Scotia, as Lieutenant Governor of the Province of Canada on the North, with Pennsylvania on the South, thus marking out the present limits of New York State. By treaty with the Indians made at Albany, New York, 1684, in presence of Lord Howard, Governor of Virginia, Dongan obtained the written submission of the Iroquois to the Great Sacand Sandwich, on the two wilder skins, and outlined the treaty line between the New England Colonies and the British possessions in New France. The treaty was drawn with the friends of England and a barrier between the English and French possessions in North America, a policy afterwards maintained with success by Sir William Johnson. At the death of Charles II, 1685, James Duke of York was proclaimed king, and New York became a royal province.

A Board of Trade and Plantations, under whose supervision the province passed, vetoed the Charter of Liberties and James approved the veto. The colonists were disappointed, but such was the moral strength of Governor Dongan that we find no trace of popular resentment. In 1685 Dongan established the first post office in New York for the better correspondence of the colonies in America. In 1686 he granted charters to the city of New York, and 1687 to New Jersey, which remained unchanged for 135 years and forms the basis of the existing city government; the latter was superseded only in 1870, notwithstanding the extraordinary development in civil and political institutions. Dongan established a college under the direction of the Jesuit Fathers Harvey (his own private chaplain), Harrison, and Gage in New York City, and advised that the King's Farm, a tract beyond the walls of the then existing city, be set aside for its maintenance. The king vetoed the grant, and in 1705 this land became the property of Trinity Church. He planned that a mission of English Jesuits be permanently established at Saratoga, New York, on land purchased by him for the purpose; that a settlement of Irish Catholics be formed in the heart of the Province; and that an expedition be made to explore the Mississippi River and take possession of the great valley then made known by the explorations of La Salle. These plans were set aside by the king.

In 1687, the Assembly of New York was dissolved by the king, and in 1688 Andros was appointed Governor of the consolidated Province of New York and New England. Dongan refused command of a regiment with the rank of major-general, retired to his estate on Staten Island, New York, but was obliged to flee for safety in the religious persecution aroused by Lesler in 1689. In 1691 he returned to England. By the death of his brother William (1698), late Governor of the Province of Munster, Ireland, whose only son,
Colonel Walter, Lord Donnan, was killed at the battle of the Boyne, Dongan became Earl of Limerick. In 1702 he was recognized as successor to his brother's estates, but only on payment of claims of the purchasers from the Earl of Athlone. Dongan died poor and without direct heirs. By will, dated 1713, he provided that he be buried at an expense of not over 100l. and left the remainder of his estate to his niece, wife of Colonel Nugent, afterwards Marshal of France. The tribute of history to his personal charm, his integrity, and character, is outspoken and universal. His public papers give evidence of a keen mind and a sense of humour. He was a man of courage, tact, and capacity, an able diplomat, and a statesman, who judged with remarkable foresight. In spite of the brief term of five years as Governor of New York Province, by virtue of the magnitude, of the enduring and far-reaching character of his achievements, he stands forth as one of the greatest constructive statesmen ever sent out by England for the government of any of her American colonial possessions.

John T. Driscoll

Donlevy, Andrew, educator, b. in 1694, probably in Sligo, Ireland; date and place of death uncertain. Little is known about his early life. With the penal laws then rigorously enforced, it was difficult to obtain an education at home; and when he went abroad to study for the priesthood he must have gone in disguise, going abroad for any such purpose being a crime. However, he reached Paris in 1710 and became a student at the Irish College. His clerical course finished, he was ordained priest, and in 1728 was appointed professor of the College College, and obliged to leave it till 1746. He had also attended lectures at the university, graduating both in theology and law. While holding the office of prefect, he drew up a new code of rules for the government of the college, placing it under the control of the Archbishop of Paris and subject to the university. He also published in 1742 an Irish-English catechism of the Christian Doctrine, an edition of which was published in Dublin in 1764.

E. A. D'Alton

Donnan, Saint.—There were apparently three or four saints of this name who flourished about the seventh century.

(1) St. Donnan, Abbot of Eigg, and St. Donnan of Llanellan are regarded by both the Bollandists and Dempster as different personages, but there is so much confusion in their chronology and repetition in what is known of them, that it seems more probable that they were identical. Reeves (Adaman's Life of St. Columba), moreover, accepts them as the same without discussion. According to Irish annals St. Donnan was a friend and disciple of St. Columba, who followed him from Ireland to Scotland towards the end of the sixth century. Seeking a solitary retreat, he and his companions settled on the island of Eigg, off the west coast of Scotland, then used only to pasture sheep belonging to the queen of the country. Informed of this invasion, the queen ordered that all should forthwith be slain. Her agents, probably a marauding band of Piets, or pirates according to one account, arrived during the celebration of Mass on Easter eve. Being requested to wait until the Sacrifice was concluded, they did so, and then St. Donnan and his fifty-one companions gave themselves up to the sword. This was in 617. Reeves mentions eleven churches dedicated to St. Donnan; in that at Auchterless his pastoral staff was preserved up to the Reformation and is said to have worked miracles. The island of Eigg was still Catholic in 1703 and St. Donnan's memory venerated there by Martin, Journey to the Western Islands, London, 1716.

(2) Son of L mi, and nephew and disciple of St. Senan, in whose life it is related that by his uncle's direction he restored to life two boys who had been drowned. This St. Donnan succeeded St. Caran of Connlae with as Abbot of Aingin, an island in Lough Ree, on the Shannon (now Hare Island). He flourished about the year 877.

(3) St. Donnan the Deacon, son of Beoach and brother of St. Caran. He was a monk in his brother's monastery at Chlun, or Connlae, in Ireland, in the sixth century.

John T. Driscoll

Donnan, Georg Raphael, Austrian sculptor, b. at Eising, Austria, 25 May, 1692; d. at Vienna, 15 February, 1741. It is said his fancy was first kindled by the works of art at Heiligenkreuz. He received his technical training in the Academy at Vienna; in 1724 he entered the imperial service, and in 1729 passed to that of Prince Esterhazy. Donner's work stands out with prominence in a period given over to mannerism, but he is sometimes more mindful of elegance than of character in his subject. He had a true sense of the beautiful, was lifelike and noble in his conceptions, and represents for South Germany and Austria a classic reaction against rococo methods. Among his productions are the marble statue of Charles VI and two heroic reliefs, one at Vienna, the fountain for the old Town Hall, Vienna, representing "Andromeda and Perseus", the marble reliefs of "Hagar" and the "Samaritan Woman", and many busts and statues in different palaces and gardens. In Pressburg he made the equestrian statue of St. Martin, and the decorations for the burial chapel of the Primate Emmerich Esterhazy. Youthful productions (1726) are the marble figures at Mirabell, Castle, Salzburg. Doner is best known to-day by his famous fountain (1738-1739) of the Neuen Markt, Vienna; "Providencia" or "Foresight", a classic female figure, forms the apex, while lower down four sporting children, each holding a water-spouting fish, embody the four rivers of Austria proper that flow into the Danube. Donner's two brothers, Sebastian and Matthias, are generally numbered among his scholars. Sebastian was a talented sculptor, and produced various works, mostly in lead.

Donner, Matthäus, brother of the above, also a sculptor, b. 1704; d. 1756. He is known chiefly for his relief carvings and medals. He was appointed court-medallist, professor, and later rector of the Academy, and was employed by various princes. Among his medals may be mentioned one of St. Charles Albert of Bavaria, 1727, and various ones representing Maria Theresa. His medals are signed D. or M. D. LÜBKE, Outlines of the History of Art, ed. STURGIS (New York, 1904); MARQUAND AND FROTHINGHAM, History of Sculpture
Donnet, Ferdinand-François-Auguste, a French cardinal, b. at Bourg-Ariginal (Loire), 1793; d. at Bordeaux, 1882. He studied in the seminary of St. Irenæus at Lyons, taught at the college of Belley, was ordained priest and at the cæsath time of Bonaparte, he was appointed coadjutor to Lyons. From 1821 to 1827 he was elected deputy to the Cortes from Cadiz. In 1840, following upon the revolution headed by Espartero, Duke of Victoria, he followed the exiled queen Maria Cristina to Paris in the post of private secretary. He accompanied her on her return after the overthrow of Espartero, 1843, and was appointed to the office of secretary and director of the studies of the young queen, Isabella, was created Marquess of Fontana in 1855, and received the subsequent advocate of the "Spanische marriage" (the simultaneous alliance of Isabella with Francesc de Assisi and of her sister with the Duke of Montpensier) he was made a prince cardinal in 1859, and received the Legion of Honour by Louis Philippe.

The death of a dearly beloved brother at this time made a profound impression on Donoso Cortés. The mystery of human destiny assumed for him a new aspect, and from this time he became an ardent champion and defender of the Catholic Church. On the 4th of January, 1849, he pronounced a remarkable discourse in the Cortes in which he publicly repudiated his Liberalist principles, branding them as "sterile and disastrous for men who have comprehended all the errors of the past three centuries, intended to disturb and disrupt human society". In 1849 he represented Spain as minister plenipotentiary at the court of Berlin, and afterwards at Paris (1850-53), where he died.

The complete works of Donoso Cortés, with a biographical sketch by Gabino Tefjado, were published in 1854-55 (Madrid). A translation into French of his patriotic and liberal works, with an introduction by Louis Veullot, was published at Paris (1858-59). His most notable work is his "Ensayo sobre El Catolicismo, El Liberalismo y El Socialismo" (English translation, Philadelphia, 1862; Dublin, 1870). This work was written at the instance of Louis Veullot, who was an intimate friend of the author, and places Donoso Cortés in the first rank of Catholic philosophers. His exposition of the impotence of all human systems of philosophy to solve the problem of human destiny and of the absolute dependence of humanity upon the Catholic Church for its social and political salvation. Upon its publication the work was acrimoniously attacked by the Abbé Gaudel, Vice-General of Orleans, in a series of articles in the "Ami des Droits de l'Homme" and vigorously defended by Louis Veullot in "Les Contemporains".

Donoso Cortés at once submitted his work to the Holy See, which refused to interfere in it or any of the propositions declared heretical by the Abbé Gaudel. It remains to-day one of the most brilliant and profound expositions of the influence of Catholic truth upon human society from the pen of a publicist. In a notable series of letters, from 1841-53, to Count Ražysi, at that time Prussian ambassador at Madrid, Donoso Cortés gives a penetrating analysis of the social, political, and religious conditions of Europe, and with almost prophetic insight predicts the unification of Germany in a great empire under the Prussian monarchy as well as the political decadence of France and the latter's loss of Algeria and Lorraine.

J. F. Sollier.
Donenwill, Augustine. See New Westminster.

Donus (or Domus), Pope, son of a Roman called Mauricius; he was consecrated Bishop of Rome 2 Nov., 676, to succeed Adeodatus II, after an interval of four months and seventeen days; d. 11 April, 678. Of his life and acts but little is known. The Liber Pontificalis says he provided the praetexta of St. Paul Outside the Walls, or, according to Duchesne's conjecture, the little church on the road to St. Paul's, which marks the spot where Sts. Peter and Paul are said to have parted on their way to martyrdom. During the pontificate of Donus, Reparatus, the Arch-bishop of Ravenna, returned to the obedience of the Holy See, thus ending the schism created by Archbishop Maurus who had aimed at making Ravenna autocephalous. In the time of this pope a colony of Nestorian monks was discovered in a Syrian monastery at Rome—the Monasterium Boetianum. The pope is said to have endowed properly the various religious houses of the city, and to have given over their monastery to Roman monks. After a brief reign of one year, five months, and ten days, Donus died and was buried in St. Peter's. His portrait in mosaic was at one time to be seen in the church of St. Martin in the Forum.

Doric, a titulus of Palaestina Prima. The name (Dór) in Semitic languages means "dwelling", "abode". On the coming of the Hebrews, the King of Dora or Dor entered into the confederation against Josue and was defeated with the confederates (Jos., xi. 2; xii. 23). The town was first allotted to the tribe of Aser (Jos., xvii, 11), then given to Manasses (Judges, i. 27; 1 Par., vii, 20), who failed to expel the inhabitants and imposed on them a tribute; the Israelites may have captured only the upper city (Nafit Dór), called Naphedor or Phanæodour by the Septuagint, and regiones or provincia Dor by the Vulgate. The Egyptian King Rameses III set up a Phoenician colony at Dora; according to Stephans of Byzantium the Phoenicians settled there because the coast, although the shelter that produced the famous Tyrian purple dye. Dora was united by David to the Kingdom of Israel and governed under Solomon by Benabinadab, one of the twelve prefects (111 Kings, iv. 11). Later it underwent successively the rule of the Persians, the Greeks, and the Lagides. In 217 b. c. it was unsuccessfully besieged by Antiochus the Great; at a later date it was taken by the king of Syria. In 139 b. c. the usurper Tryphon, who had taken refuge at Dora, was besieged by Antiochus (VII) Sidetes with a fleet, 120,000 foot, and 5000 horse (1 Mach., xv, 13). The city then fell into the hands of a private individual called Zolahus, at whose death it was added by Alexander Janmaus to his Kingdom of Judea. When Pompey conquered Syria, he granted Dora an autonomy constitution; from this date times its peculiar era, 64-63 b. c., known chiefly through numerous coins. As Dora had suffered much from the Jews, Gabinius rebuilt it (56 b. c.). In 42 of the Christian Era its inhabitants were still disputing with the Jews, whom they seem to have specially hated. In the time of Pliny the town was in a state of utter darkness. The town of Dora [Dora] which had been formerly so powerful? Whether he may have exaggerated its decay, or the city may have risen from its ruins. As early as the fifth century it was the residence of a bishop, Sidus, and suffragan to Cesarea; there is record also of Barachius in 518, John in 536, Stephen, the friend of St. Sophronius, Patriarch of Jerusalem and the great opponent of Monothelitism. In the Middle Ages Dora was called Prusa, and Πύργος, "tower", according to Foucher of Chartres (Gesta Dei per Francos, ed. Bongars, 399); it was also known as Merla (Rey, Les colonies fratres de Syrie, Paris, 1883, 422). There are records of five Latin bishops during the fourteenth and fifteenth centuries (Eubel, 1, 253; ii, 161). Another is mentioned in "Revue bénédictine" (1904), p. 62. Its modern Arabic name is Tantourah, a village of about 1500 inhabitants, on the seashore between Caifa and Cesarea, nearer the latter. The harbour is frequented by small boats; the old port, situated more to the north, was enclosed by two headlands lengthened by two piers. To the east are vast quarries and the ancient necropolis. The ruins of the ancient city cover a space about half an acre and long by slightly third broad. Many Jewish colonists have recently settled in the vicinity.

Dorchester, Abbey of, founded in 1140 by Alexander, Bishop of Lincoln, for Canons of the Order of St. Augustine (or Black Canons). Dorchester was an important Roman city of Mercia, about nine miles from Oxford, had been the seat of a bishopric from A. D. 634, when St. Birinus, the first bishop, was sent to that district by Pope Honorius, until 1055, when the See of Mercia was transferred to Lincoln. The abbey, founded fifty-five years later, was dedicated in honour of Sts. Peter, Paul, and Birinus, was richly endowed out of the lands and tithes of the former bishopric, and had twelve parishes subject to it, being included in the Peculiar of Dorchester, until the suppression of peculiarities. The first abbot appears to have been Alured, whose name occurs in 1146 and again in 1163; the last was John Mershe, who was elected in 1533, and in the following year subscribed to the king's supremacy, with five of his canons, and was given a pension of £22 a year. The revenues of the abbey were valued at the time of its suppression at about £220. Henry VIII reserved the greater part of the property of the house for a college, erected by him in honour of the Holy Trinity, for a dean and prebendaries; but this was dissolved in the first year of his successor. No register or cartulary of Dorchester Abbey has been preserved, and in 1540 the Charter, confirming the donation of a church by King John, is given by Dugdale. Edmund Ashefeld was the first inipropriator of the abbey site and precincts, which afterwards passed through various hands. The stately church of Dorchester Abbey, as it stands today, was built entirely by the Augustinian Canons, although there are traces on the north side of Saxon masonry, probably part of the former church. The whole length of the church is 230 feet, its width seventy, and its height fifty-five feet. The north transept with its doorway is of the Norman period; the north side of the nave and chancel arch, early English, the south side of nave, south aisle, and choir, Decorated; the south porch, late Perpendicular. The extraordinarily rich sanctuary, with its highly decorated window (including the famous painted one known as the "Jesse" window) and beautifully carved sedilia and piscina, dates from 1330. One of the very few existing leaden fonts in England is in this church.

Dugdale, Monumenta Angliam, VI, 323; Parker, History of Dorchester (Oxford); Oxfordshire; Ministry, XII, 175; Victoria, History of Oxfordshire (London, 1907), II, 57.
DORÉ

134

DORIA

Doré (Auratus), Pierre, controversialist, b. at Orleans about 1500; d. at Paris, 19 May, 1550. He entered the Dominican Order in 1514 and won his degrees at Paris, in 1532, after a brilliant examination. Though elected to the office of prior at Blois in 1545, Doré continued to preach throughout the provinces. At Châlon the bishop, who had been captivated by his zeal and eloquence, entrusted him with the reform of the Carthusian monastery of Val de Pauillon (Tournai). He became superior, Claude de Lorraine, Duke of Guise, and his consort, Antoinette de Bourbon, chose him as confessor. He wrote thirty-five ascetical-theological works, which some think are only redactions of his sermons. Chief among these is "Les voies du Paradis enseignées par notre Sauveur Jésus-Christ en son évangile", which appeared twice at Lyons in 1538 (Paris, 1540; Lyons, 1550; Rome, 1610). In his "Paradoxe ad profligandas hereses ex divi Pauli epistolis selecta", he refuted the Huguenots, but soon turned to writing ascetical commentaries on the Psalms. When Henry II entered Paris in 1548, Doré wrote a Latin ode which won for him the post of court preacher and royal confessor. His famous defence of the Eucharist appeared in 1549, and he published two other apologies on the same subject and another on the Mass. At the same time he prepared his defence of the Faith in three volumes, as also another refutation of the Calvinists. He closed his literary career with two works on justification.

Doria, Andrea, Genoese admiral and statesman, b. at Oneglia, Italy, 1468; d. at Genoa, 1560. His family belonged to the magni quattuor prosapia who disputed among themselves for the supremacy in Genoa, but the Dorni and Fregosi of the opposing faction excluded the Doria from power. At first Genoa sought union with France; then, in 1464, Louis XI eded it to the Duke of Milan. Doria's early years were trying ones, as his father died young, and his mother placed him under the guardianship of a relation who was captain of the guard to Pope Innocent VIII. Thus began the active, adventurous career that was destined to make Andrea Doria one of the most important personages of Europe in the sixteenth century.

Like many Italians of his day, Doria was at first a combination of soldier and politician, commenced by serving (1487–1492) in the guards of Innocent VIII, then in the Neapolitan army of Alfonso of Aragon, to whom he alone remained faithful after the conquest of Naples by Charles VIII (1495). He next joined the Order of the Knights of St. John of Jerusalem and made a pilgrimage to the Holy Land; after this he entered the service of Gian de' Medici, leader of the French troops in the Kingdom of Naples, and had as his opponent Gonsalvo de Cordova, the most renowned general of the time. In 1503 Doria was able to re-enter Genoa, where order had been restored by Louis XII, and set out to subdue the Corsicans, then in revolt. On his return the Genoese entrusted him with the reorganization of their fleet. Doria now abandoned land service for that of sea and, armed with eight galleys at his own expense, constituted himself an independent naval power. During the years 1507 to 1519 he traversed the Western Mediterranean with his fleet, and, having overpowered the Barbary Corsairs and captured several of their chiefs, among them the famous Cadolin, returned to Genoa laden with booty.

On account of the civil discord in Genoa, Doria withdrew with twelve corsair galleys that he had seized, the crews of which would now acknowledge no other chief, and entered the service of Francis I, who appointed him "governor-general of the galleys of France". In 1524 he raised the blockade of Marseilles, then besieged by Charles V, and, after the battle of Pavia, gathered together the remnants of the French fleet (1525). He then became commander of the galleys of Clement VII; in 1527 re-entered the service of France and compelled Genoa to acknowledge the authority of Francis I. But in 1528 he quarrelled with the King of France, who did not pay him faithfully. Recalling Filippo Doria, his nephew, who was besieging Naples with his uncle's fleet, Andrea agreed to enter the service of Charles V, and began to re-establish order in Genoa, where he was received with enthusiasm (12 September, 1528). After breaking up the ancient noble clans, he set up a new social division and an aristocratic constitution which continued in force, with but few modifications, until 1798. Absolute head of the naval forces of the empire, he directed the maritime struggle against the Turks and the Barbary pirates; in 1532, just when Solyman threatened Hungary, Doria landed on the coast of Greece, took Coron and Patras, and even meditated an attack on Constantinople. In 1535 he co-operated in the siege of Tunis; in 1536 as head of the united squadron made up of the ships of the pope, Venice, and the Knights of Malta, he surprised the famous Barbarossa in the Gulf of Arta and then allowed him to escape. Loaded with honours by Charles V, Doria retired to the territory of Genoa and lived in the beautiful palace he had built at Fassolo, where he dispensed royal hospitality to Charles V and Philip II. He was greatly revered by his fellow-citizens, yet, in 1547, he suppressed with much cruelty the conspiracy formed by some discontented nobles, the Fieschi and the Cibo. Doria's tomb, decorated by Montorsoli, is in the church of San Matteo, but his colossal statue, which was erected in 1540, was overthrown and broken in 1797.

LOUIS BÉRIER.
Döring, Matthias, historian and theologian, b. between 1390 and 1400, at Kyritz, in Brandenburg; d. there 24 July, 1469. He joined the Friars Minor in his native place, studied at Oxford, was graduated (1424) at Erfurt as doctor of theology, and for some years taught theology and Biblical exegesis. In 1427 he was elected provincial of his order for Saxony. In the disputes between the Conventuals and those of the Observance he took an active part. In 1448 at Berne the Conventuals elected him minister general. This position he held for six years, receiving approbation from the assembly of prelates still posing as the General Council of Basle. In this council he had been present from 1432 as an exacting, reform-minded, and adherent of the supremacy of a general council over the pope. He was sent by it to Denmark, to win over the king and the people, and assisted in the deposition (1439) of Eugene IV, and the election of the antipope, Felix V. Excommunicated by the Archbishop of Magdeburg he appealed to Rome. In 1461 he resigned his office and spent the last years of his life in literary work at the convent of Kyritz. Döring is said to be the author of the "Confutatio primatus Papae," written (1443) anonymously and without title. Name and title were added when the article was edited in 1550 by Matthias Flacius Illyricus. It is in part an extract from the "Defensor paesi," of Marsilius of Padua (printed in Goldast, Memorabilia). Other works which were attributed to Döring are "Defensorium postulicri Nicolai Lyrani" against the Spanish bishop, Paul of Burgos, since 1481 frequently printed with the "Postillo," "Libri perpexorum Ecclesiae:" (lost); continuation (1420 to 1464) of the Chronicle of Dietrich Engellis. He also wrote on the so-called Donation of Constantine and (1444) on the Bulls of the Period of Wlamsack.

Dornin, Bernard, first publisher in the United States of distinctively Catholic books, b. in Ireland 1761; d. in Ohio, 1836. He was forced to leave his native land, in 1803, because of political troubles and, arriving in New York soon after, began a book-selling and publishing concern. He got out a New Testament, printed for him in Brooklyn, in 1805, in an edition of Pastorini's "History of the Church," 1807. He moved to Baltimore, in 1809, and from there to Philadelphia in 1817. During many years he was the leading Catholic publisher of the country, and as such enjoyed the friendship of Archbishop Carroll and of other members of the hierarchy, who esteemed him as a vigorous and gifted writer and editor. In the history of his times he distinguished himself. In Philadelphia, where he had published a number of Catholic books, and went to Ohio to reside near his daughter.

Dornin, Bernard, son of Bernard, b. in Ireland, 1800; d. at Savannah, Georgia, U. S. A., 22 April, 1874. He entered the United States Navy, 2 May, 1815, as a midshipman, from Maryland. Commissioned a lieutenant in 1823, he made a five-years' cruise around the world. The war of 1812 he brought to a successful close, and helped to successfully carry out an expedition to prevent the invasion of Mexican territory by the filibuster William Walker. After being commissioned captain, in 1855, he engaged in destroying the slave-trade. During the Civil War he attained the rank of commodore on the retired list, 16 May, 1862, and at its close was put in charge of the fifth light-ship in the district.

Finotti, Bibliotheca Catholica Americana (New York, 1872); Bayley, A Brief Sketch of the Early History of the Catholic Church on the Island of New York (New York, 1870); Register of the Navy of the U. S., s. v.

Dorothy, Saint: (1) virgin and martyr, suffered during the persecution of Diocletian, 6 Feb., 311, at Cassarea in Cappadocia. She was brought before the prefect Saporius, tried, tortured, and sentenced to death. On her way to the place of execution the pagan lawyer Theophilus said to her in mockery: "Bride of Christ, send me some water from your bridegroom's garden." Before she was executed, she sent him, by a six-year-old boy, her headdress which was found to be filled with a heavenly fragrance of roses and fruits. Theophilus at once confessed himself a Christian, was put on the rack, and suffered death. This is the oldest version of the legend, which was later variously enlarged. Dorothy is represented with an angel and a wreath of flowers. She is regarded as the patroness of gardeners. On her feast trees are blessed in some places. In the West she has been venerated since the seventh century.

Dorothea, Saint: (2) Dorothea of Montau, Saint, reclus, b. at Montau, 6 Feb., 1347, d. at Marienwerder, 25 June, 1391, became a nun in the Benedictine convent near Montau. In 1381 she married the sword-outler Albrecht of Danzig, a German man, whose nature underwent a change through his humility and gentleness. Both made frequent pilgrimages to Cologne, Aachen, and Einsiedeln, and they intended (1390) to visit Rome also; but Albrecht was prevented by illness and remained at home where he died, while Dorothea journeyed to Rome alone. Of their nine children all died, except one daughter who joined the Benedictines. In the summer of 1391 Dorothea moved to Marienwerder, and on
2 May, 1393, with the permission of the chapter and of the Teutonic Order, established a hermitage near the cathedral. She led a very arduous life. Saintly visitors sought her advice and consolation, and she had wonderful visions and revelations. Her confessor, the deacon John of Marienwerder, a learned theologian, wrote down her communications and composed a Latin biography in seven books, “Septilium”; besides a German life in four books. She was never canonized, but the people regarded her as the guardian of the country of the Teutonic Knights and “patroness of Prussia”. Her feast is celebrated on 25 June, in some places on 30 Oct. The church at Marienwerder is now in the hands of the Lutherans; her relics cannot be found.

Anne Hanson Dorsey

Dorsey, Anne Hanson, novelist, b. at Georgetown District of Columbia, U. S. A., 1815; d. at Washington, 26 December, 1896. She was the daughter of the Rev. William McMeney, a chaplain in the United States Navy, and Chloe Ann Lanigan McMeney. In 1837 she was married to Lorenzo Dorsey, and in 1840 became a convert to the Catholic Faith. From this period, for more than half a century, she devoted her exceptional talent to Catholic fiction. She was a pioneer of High Catholic literature in the United States and a leading writer for the young. While deeply religious in tone, her stories are full of thrilling interest and a knowledge of the world gained by clear insight and wide experience. Mrs. Dorsey’s only son was killed while serving in the Union Army during the Civil War. She left three daughters. Pope Leo XIII twice sent her his benediction, and the University of Notre Dame conferred upon her the Lector medal. Her chief works are: “The Student of Blenheim Forest”; “Flowers of Love and Memory”; “Guy, the Leper”; “Tears of the Diadem”; “Tale of the White and Red Roses”; “Wood-reve Manor”; “Conscience, or the Trials of May Brooke”; “Oriental Pearl”; “Cocaina, the Rose of the Algonquins”; “The Dreaming”; “Nora Brady’s Vow”; “Monk, the Venerable”; “The Old Gray Rosary”; “Tangled Paths”; “The Dreamer’s Vow”; “Gloriana”; “Ada’s Trust”; “Ada’s Promise”; “The Heirress of Carrigmona”; “Warp and Wool”; “The Palms.”

Dorothy, Synod of. See Armenianism.

Doryleum, a titular see of Phrygia Salutaris, in Asia Minor. This city already existed under the kings of Phrygia and is mentioned by most of the ancient geographers. It was situated at Karadja Hissar, six miles south-west of the modern Eski Shehir. About the end of the fourth century n. c. it was removed to Shehir Enuyk, at the ruins north of the same Eski Shehir; there it remained during the Byzantine period. Seven bishops are known from the fourth to the ninth century; the most famous being Eusebius, who denounced successively the heresies of Nestorius and Eutyches (Lequien, Oriens christ., I, 837). The see is mentioned as late as the twelfth century among the suffragans of Synamara, but must have been suppressed soon after. Doryleum was taken and destroyed by the Seljuk Turks, probably in 1070. It was there (1 July, 1097) that the crusaders won their great victory over the Turks. The city was rebuilt in 1175 by Manuel Comnenus (1143–1180). The see is mentioned as late as the Cinnamnus (“Histor.”, VII, 2–3) and Nicetas Choniates (“De gestis Man. Com.”, VI, 1) write enthusiastically about it as one of the most beautiful cities of Asia Minor. The next year it fell again into the hands of the Turks; in 1240 it passed to Ethrogoul, father of Othman, the founder of the Osmamni dynasty (this tomb is at Seughnl near Eski Shehir). Meanwhile the city stretched away from the hill of Shehir Enuyk and developed along the Poursak (ancient Tembris or Thybrinia), under the name of Eski Shehir. The modern town is situated at an altitude of 783 metres, on a vast and fertile plateau, about 400 kilometres from Constantinople. Eski Shehir is the chief town of a caza in the vilayet of Brusa. The population is 30,000 Greeks, 30,000 Turks, 10,000 Armenians, a few Catholic Armenians, Protestants, and Jews, the rest being Mussulmans. Since 1891 the Assumptionists have conducted a mission with a school for boys, and the Oblate Sisters of the Assumption two schools for girls. There is also a Catholic Armenian parish. Eski Shehir has hot springs that are used for baths. Finally, especially gigantic, warm in the Poursak. The meerschaum industry flourishes there; the chief known mine of this mineral is at Mikhali in the district of Eski Shehir.

Dositheos, followers of Dositheus, a Samaritan who formed a Gnostic-Judaistic sect, previous to Simon Magus. Although the name of Dosithes is often coupled with that of Simon Magus as the first of all heretics, we possess no trustworthy information about him. He is not mentioned in Justin or Irenaeus, but first occurs in Pseudo-Tertullian’s “Adv. Haer.”, a Latin rendering of the lost “Syntagma” of Hippolytus (about A.D. 220). “I pass over in silence”, says the author, “the heresies of Judaism, I mean Dosithes the Samaritan, who first dared to reject the Prophets, as not having spoken in the Holy Ghost. I pass over the Sadducees, who, springing from this root of error, dared in addition to this heresy to deny even the resurrection of the flesh” (ch. i). If, however, the Sadducees sprang from Dosithes, he must have begun to teach sometime previous to the Christian Era, and cannot properly be counted amongst heretics of Christianity. St. Jerome, who copied Pseudo-Tertullian, convincingly speaks of “those who before the coming of Christ used the Law”. An independent witness to the same fact is found in the Pseudo-Clementine “Recognitions”, I, 54: “the author of this [Sadducee] opinion was first Dosithes and then Simon”. On the other hand in “Recognitions”, I, 8, we read that Dosithes founded a sect after the death of John the Baptist. Origen states that “Dosithes the Samaritan, after the time of Jesus, wished to persuade the Samaritans that he himself was the Messias prophesied by Moses” (Contra Celsum, VI, 2); and he classes him with John the Baptist, Theodas, and Judas of Galilee as people whom the Jews mistakenly held to be the Christ (I hom. xxv in Lucan; Contra Celsum, I, lvii). He informs us that the Dosithians gave out
that they possessed some books of Dositheus and told some tales about him as being still alive in this world, and he further accuses Dositheus of having mutilated the Scriptures. It is not certain, however, whether Origen did not confound Dositheus the Pseudo-Messias with an Enercatite sectary who lived somewhat later. This is suggested especially by a passage in Origen's "De Principiis", IV, vii, where he ascribes to Dositheus the Samaritan and others some absurdly strict observance of the Sabbath. This is also, probably, the reason why Dositheus is placed by Hegesippus after Simon Magnus instead of before. In Talmudic literature (Pirke d. R. Eliezer, xxxviii, and Tanhuma Vayyasheb, ii) there occurs a Samaritan of the Syro-Macedonian period named "DONI", and it has been plausibly argued that the patristic references which connect Dositheus with the Sadducees arise from a confusion of Dositheus the Samaritan Pseudo-Messias with this early Jewish heretic. If this be true, there would have been three persons of this name, one at the time of Alexander the Great, another at the time of Christ, and a third, a generation later. But the mention of a fourth, at the time of Sahmanasur (about 700 B. C.) makes one cautious of Talmudic information. It is certain, however, that a Jewish sect, mentioned by several Arabic and other historians under the name of Dusitamy or Dostin, continued to exist till the tenth century, and that they were considered similar to the Kutim, or Samaritans. But they seem never to have possessed any importance in the Christian world, in which from the earliest times there existed but a vague reminiscence of their name, though they continue to be mentioned in descriptions and lists of heresies, such as the "Hereses" of Epiphanius and similar collections.

years in Canada (1721–23) he was appointed superior of the Seminary of Lisieux in France, and helped to preserve that institution from Jansenism. While acting in Rome as procurator-general for the Oriental Missions of the Congregation of the Holy Ghost, he was made vicar Apostolic of a portion of India and consecrated titular Bishop of Samos by Benedict XIII (1725). He remained in Rome until appointed coadjutor to Bishop Mornay of Quebec (1729). Bishop Dosquet had to solve many difficulties that had arisen towards the close of the life of Bishop St-Vallier. He legislated wisely in behalf of the religious communities of women and was zealous for the suppression of the liquor traffic. In 1733, after Bishop Mornay's resignation, he succeeded to the See of Quebec, where he promoted education, primary and classical. A patron and benefactor of the Congregation of the Holy Ghost, he continued almost exclusively to its missionaries Acadia, the islands of the Gulf of St. Lawrence, Cape Breton, Newfoundland, and probably Labrador. He rewarded that congregation by generous endowments, including Sarecele, a property near Paris, which until the Revolution yielded an annual revenue of 3000 livres. In 1735 ill health forced him to leave Quebec, but his resignation was accepted only in 1739. Thenceforth he resided chiefly in Rome, attending to the interests of his former diocese, especially after the English conquest.

Dosquet, ALTAR. See ALTAR (IN LITURGY), sub-title Altar-curtain.

Dossi, Giovanni, actually named Giovanni di Nicolò di Littero, but also called Dosso Dossi, an Italian painter, b. about 1470; d. at Ferrara in 1542. Dossi belonged to the School of Ferrara and was a pupil of Lorenzo Costa in Mantua. He is believed to have derived his name from the village of Dosso, in which it has been stated he was born. In conjunction with his brother Battista (1480–1548) Dossi visited Rome and Venice and passed eleven years in these places studying especially the works of Giorgione and Titian, but forming his own style, which was distinguished by
romantic treatment, imaginative power, rich, brilliant, and often novel colouring. He and his brother were frequently employed by Alfonso I, Duke of Ferrara, and by his successor, Ercole II. His greatest work is the altar-piece in the Ferrara Gallery. He also painted the cartoons for the tapestry in the cathedral of that city, for those in the church of San Francesco, and in the ducale palace at Modena. Many of his frescoes still remain in the ducale palace at Ferrara, and his paintings can be studied in the cathedral and churches of Modena, in the Louvre, and in the galleries of Dresden, Berlin, Milan, and Vienna. He painted a portrait of Ariosto and the poet enrolled his name, in conjunction with those of Leonardo da Vinci, Michelangelo, Raphael, and Titian, in the poem of "Orlando Furioso," a foundation of the Academy of Bologna, although many other portraits by Dossi are still in existence. The landscape backgrounds of his pictures are marked by beauty of colour and fine imaginative quality. On his return from Venice he appears to have settled down in Ferrara. His work has a close kinship with that of the Venetian School.

Douai (Douay, Doway), Town and University of.

—The town of Douai, in the department of Nord, France, is on the River Scarpe, some twenty miles south of Dunkirk, and is separated from it by the countries of Artois, although it is the ancient capital of the county of Flanders, and was formerly the seat of a university. It was strongly fortified, and the old ramparts have only been removed in recent years. The town flourished in the Middle Ages, and the church of Notre-Dame dates from the twelfth century.

To English Catholics, the name Douai will always be best known as that of the city where the English College was founded by Cardinal Allen (q. v.) during the reign of Queen Elizabeth, where the majority of the clergy were educated in penal times, and to which the preservation of the Catholic religion in England was largely due. Several other British establishments were founded there—colleges for the Scots and the Irish, and Benedictine and Franciscan monasteries—and Douai became the chief centre for the equipment and training of the clerics of Britain. The foundation of Douai may be said to date from 31 July, 1559, when Philip II of Spain (in whose dominions it was then situated) obtained a Bull from Pope Paul IV, authorizing its establishment, the avowed object being the preservation of the purity of the Catholic Faith from the errors of the Reformation. Paul IV died before he had promulgated the Bull, which was, however, promulgated by his successor, Pius IV, 6 January, 1560. The letters patent of Philip II, dated 19 January, 1561, authorized the establishment of a university with five faculties: theology, canon law, civil law, medicine, and arts. The formal inauguration took place 5 October, 1562, when there was a public procession of the Blessed Sacrament, and a sermon was preached in the new church of Arras.

There were already a considerable number of English Catholics living at Douai, and their influence made itself felt in the new university. In its early years several of the chief posts were held by Englishmen, mostly from Oxford. The first chancellor of the university was Dr. Richard Smith, formerly Fellow of Merton, and in the ducale palace at Modena. Many of regius professor of canon law at Douai for many years was Dr. Owen Lewis, Fellow of New College, who had held the corresponding post at Oxford; the first principal of Marchiennes College was Richard White, formerly Fellow of New College; while Allen himself, after taking his licentiate at Douai in 1570, became regius professor of divinity. It is reasonable to suppose that many of the traditions of Catholic Oxford were perpetuated at Douai. The university was, however, far from being even predominantly English; it was founded on the model of that of Louvain, from which seat of learning the majority of the first professors were drawn. The two features already mentioned—that the university was founded during the progress of the Reformation, to combat the errors of Protestantism, and that it was to a considerable extent under English influence—explain the fact that William Allen, when seeking to send his son to an English college abroad, turned his eyes towards Douai. The project arose from a conversation which he had with Dr. Vendeville, then regius professor of canon law in the University of Douai, and afterwards Bishop of Tournais, whom he accompanied on a pilgrimage to Rome in the autumn of 1567; and when he returned home, a correspondence was begun in beginning in a hired house on Michaelmas Day, 1568.

Allen's personality and influence soon attracted a numerous band of scholars, and a few years after the foundation of the college the students numbered more than one hundred and fifty. A steady stream of controversial works issued from Douai, some by Allen himself, others by such men as Thomas Stapleton and Richard Bull, and those of all the other most known. The preparation of the Douay Bible (q. v.) was among their chief undertakings. It is estimated that before the end of the sixteenth century more than three hundred priests had been sent on the English mission, nearly a third of whom suffered martyrdom; and almost as many had been banished. By the end of the persecution the college counted more than one thousand students, and its regulars included French and Flemish. The college was, in fact, a real source of income, but depended on the generosity of a few friends, and especially upon the neighbouring monasteries of Saint-Vaast at Arras, Anchin, and Marchiennes, which, at the suggestion of Dr. Vendeville, had from time to time subscribed towards the work. Many private donations were also received from England. After a few years the parish. In the eighteenth century the work was continued under the presidency of Dr. English, the first president; and in 1703, under Dr. Worthington, the third president, a regular college was built, opposite the old parish church of St-Jacques, in the Rue des Morts, so called on account of the adjoining cemetery. The town at this time formed a single parish. In the sixteenth century it was divided into four parishes, and the present church of St-Jacques dates from that time.
The English College was the first to be opened in connexion with the university. The Collège d’Anchin was opened a few months later, endowed by the Abbots of the neighbouring monastery of Anchin, and entrusted to the Jesuits. In 1570, the Abbots of Marchiennes founded a college for the study of law. The Abbots of Saint-Vaast founded a college of that name. Later on, we find the College of St. Thomas Aquinas, belonging to the Jordonians, the Collège du Roi, and others. The returning British and the established French had their schools for ecclesiastics. The Irish College was originally a Spanish foundation. It was established before the end of the sixteenth century, and endowed with 5,000 florins a year by the King of Spain. The course of studies lasted six years and the students attended lectures at the university. The Scots’ College has an unfortunate notoriety in consequence of the long dispute between the Jesuits and the secular clergy which centred round it in later times. It was established in 1594, not as a new foundation, but as the continuation of a secular college at Pont-a-Mousson in Lorraine, which, owing to the unhealthiness of the site, had to seek a new home. In 1596, however, it moved again, and it was not till after several further migrations that it settled at Douai in 1612. The English College was an outgrowth of resources, and it was due to the zealous efforts of Father Parsons in Rome and Madrid, and of Father Creighton in France and Flanders, that numerous benefactions were given, and it was placed on a permanent footing. For this reason, the Jesuits afterwards claimed the property as their own, although it was never claimed by the college before it had been given. Appeals and counter-appeals were made, but the question was still unsettled when the Jesuits were expelled from France in 1764. The French Government, however, recognized the claims of the Scotch secular clergy and allowed them to continue the work of the college under a rector chosen from their own body. The Benedictine and Franciscan houses at Douai were near together and were both bound up in their history with the restoration of the respective orders in England. The Franciscan monastery was founded mainly through the instrumentality of Father John Gennings, the brother of the martyr. It was established in temporary quarters in 1618, the students for the time attending the Jesuit schools; but by 1627, it had put up a permanent establishment, the necessary tuition within their own walls. The Benedictines began in 1605, in hired apartments belonging to the Collège d’Anchin, but a few years later, through the generosity of Abbot Caravel of the monastery of Saint-Vaast, they obtained land and built a monastery, which was opened in 1611. The house acquired a high reputation for learning, and many of the professors of the university were at different times chosen from among its members.

Returning now to the English College, we come upon the unfortunate disputes between the seculars and regulars in the seventeenth century. Dr. Worthington, though himself a secular priest, was under the influence of Father Parsons, and for a long time the students attended the Jesuit schools and all the classes were conducted by Jesuit professors. There was still a great deal of dispute about the necessary tuition to be given within its walls. In the latter half of the seventeenth and the early years of the eighteenth century, the English College went through a troubled time. During the presidency of Dr. Hyde (1646–1651), the University of Douai claimed certain controlling rights over the college, which claim, however, he successfully withstood. His successor, Dr. George Leyburn (1652–1670), fell out with the “Old Chapter”, in the absence of a bishop, governing the Church in England. He attacked one Mr. White (alias Blaeko), a prominent member of their body, and procured a condemnation of his writings by the University of Douai. In the end, however, he himself found it necessary to retire in favour of his nephew, Dr. John Leyburn, who was afterwards vicar Apostolic. Hardly was the dispute with the “Blackloists” (as they were called) finished, when a further storm of an even more serious nature arose, due to the profession of philosophy and then of theology at the English College for seventeen years. His reputation became so great that when a vacancy occurred in 1702 he was solicited by the bishop, the chief members of the university, and the magistrates of the town to accept the post of regius professor of divinity. His candidature, however, was opposed by a party headed by the chancellor. The Jesuits also declared against him, accusing him, and through him the English College, of Jansenism. In the end, Dr. Hawarden retired from Douai and went on the mission in England; and a visitation of the college, made by order of the Holy See, resulted in completely clearing it of the imputation. In 1767, Douai was taken by Louis XIV, and the college was placed under the presidency of the Irish College for the short time that it was held by the English after the siege of the Duke of Marlborough in 1710; but it was retaken by the French the following year.

During the rest of the eighteenth century, there were no important political changes until the Revolution broke out. The hopes which the English Catholics entertained for a peculiar city were disappointed, and the only important prospect open to them lay in their foreign centres of which Douai was the chief. To these centres they devoted the greater part of their energy. Under the presidency of Dr. Witham (1715–1738) who is considered a second founder, the English College at Douai was rebuilt on a substantial scale and rescued from overwhelming debt; it had lost nearly all its endowment in the notorious Mississippi scheme, known as the “South Sea Bubble”. The Irish College was rebuilt about the middle of the century, and the English Benedictine monastery between 1776 and 1781. But all were destined to come to an end a few years after this, under the Reign of Terror.

As a town, Douai suffered less than many others at the beginning of the Revolution. The universities kept up their course of studies; and when the French Government was dissolved, in 1794, it was one of the five typical Catholic universities to which Pitt appealed for an authoritative declaration as to the Catholic doctrine on the “deposing power” of the pope. During the Reign of Terror, however, it suffered the same fate as many similar establishments. When all the clergy of the town were called upon in 1791 to take the “Civic Oath”, the members of the British establishments claimed exemption in virtue of their nationality. The plea was allowed for a time; but after the execution of Louis XVI, when war was declared between England and France, it was not to be expected that this immunity would continue. The superiors and students of most of the British establishments took flight and succeeded in reaching England. The General of the English College, Rev. John Daniel, in his excommunication, Rev. John Daniel, remained in the hope of saving the college; but in October, 1793, they were taken to prison at Doullens in Picardy, together with six Anglo-Benedictine monks who had remained for a similar purpose. After undergoing many dangers and hardships, they were allowed to return to Douai in November, 1794, and a few months later, by their episcopal authority, Dr. Stapleton, President of St. Omer (who with his students had likewise been imprisoned at Doullens), they were set at liberty and allowed to return to England. The English collegians never returned to Douai. The Penal Laws had recently been repealed, and they founded two colleges to continue the work of Douai—Crook Hall (afterwards removed to Ushaw).
in the North, and St. Edmund's, Old Hall, in the South. The Roman passion was divided equally between these two until the French occupied Rome in 1799, when it ceased to be paid. Both these colleges exist at the present day. After the Revolution, Bonaparte united all the British establishments in France under one administrator, Rev. Francis Walsh, an Irishman. On the restoration of the Bourbons, a large sum was paid to the Irish Dominicans, for it was considered just and proper to indemnify those who had suffered by the Revolution; but none of this ever reached Catholic hands, for it was ruled that as the Catholic colleges were carried on in France for the sole reason that they were illegal in England, they must be considered French, not English, establishments. The buildings, however, were restored to their rightful owners, and most of them were sold. The Anglo-Benedictine alone retained their ancient monastery; and as the community of St. Gregory was then permanently established at Downside, they handed over their house at Douai to the community of St. Edmund, which had formerly been located in Paris. These Benedectines carried on a school at Douai until 1803, when in consequence of the Association's Law they were forced to leave. They returned to England, and settled at Woolhampton, near Reading.

Buch, History of the English Catholics (1886) was published in London in 1827, and a second edition in 1838. The work of preparing such a version was undertaken by the members of the English College at Douai, in Flanders, founded by William Allen (afterwards cardinal) in 1565. The chief share of the translating was done by Dr. Gregory Martin, formerly of St. John's College, Oxford. His text was revised by Thomas Worsington, Richard Bristow, John Reynolds, and Allen himself—all of them Oxford men. A series of notes was added, designed to answer the theological arguments of the Reformers; these were prepared by Allen, assisted by Bristow and Worsington.

The object of the work was, of course, not limited to controversial purposes; in the case of the New Testament, especially it was meant for pious use among Catholics. The fact, however, that the primary end was popular explanation, is shown in the fact that the Douay Version is to this day still used in many Catholic families. The fact that the Douay Version was considered authoritative for Catholics by the Council of Trent; but it was also commonly admitted that the text was purer than in any manuscripts at that time extant in the original languages. Then, also, in the translation, many technical words were retained bodily, such as "poch, parasite, azymes," etc. In some instances, also, where it was found difficult or impossible to find a suitable English equivalent for a Latin word, the latter was retained in an anglicized form. Thus, in Luke 3:6, we get "He exuminated himself," and in Heb. 13:28, "Christ was offered once to exhaust the sins of many." It was considered that an ordinary reader, finding the word unintelligible, would pause and inquire its meaning, and it was desired that he be made acquainted with his sinlessness by an inadequate rendering. In other cases latinity is used, as in Luke, x, 1, "Our Lord designed also other seventy-two"; and in Matt. xiv, 19, "In the name of Jesus, every knee bow of the celestial, terrestrial, and infernals." The proper names are usually (though not always) taken from the Vulgate; but the word Dominus is rendered throughout Our Lord. The general result was a version in cumbersome English, so full of latinity as to be in places hardly readable, but without scholarly and accurate.

In the year 1578, owing to political troubles, the college was temporarily transferred from Douai (which was then in the dominions of the King of Spain) to Reims, and during its sojourn there, in 1582, the New Testament was published, and became consequently known as the "Reims Testament." It contained many local imperfections, but a recommendation was appended signed by the three doctors of the University of Reims. The Old Testament was delayed by want of means, until the whole Bible was eventually published in two quarto volumes, in 1609 and 1610, by which time the college had returned to Douai, and the recommendation was signed by three doctors of that university. Thus the New Testament appeared nearly thirty years before it was allowed to be called "Authorized Version," and although not officially mentioned as one of the versions to be consulted, it is now commonly recognized to have had a large influence on the King James Version (see Preface to R. V., p. 4, and Carlotto, "Reims and the English Bible").

The Reims Testament was reprinted twice at Antwerp in 1621 and 1623, and a fourth edition was issued at Rouen in 1633. The Douay Version was reprinted for over a century, before a fifth edition appeared, with some slight changes, dated 1728, but without any place of publication stated. It is believed to have been printed in London and was edited by Dr. Chalon er (afterwards bishop), and Father Blyth, a Carmelite. The Douay Bible was never after this printed abroad, although the first five English books were reprinted at Liverpool in 1788, and a seventh dated Dublin, 1803, which was the last Catholic edition. Several Protestant editions have appeared, the best known being a curious work by Rev. William Fulke, first published in 1589, with the Reims text and that of the Bishops' Bible in parallel columns. A Protestant edition of the Reims Testament was also brought out by Leavitt of New York, in 1834. Although the Bibles in use at the present day by the Catholics of England and Ireland are popularly styled the Douay Version, they are most improperly so called; they are founded, with more or less alteration, on a series of revisions undertaken by Bishop Chalon er in 1749–52. His object was to meet the practice of the English theologians, who, to show the moderate in size and price, in readable English, and with notes more suitable to the time. He brought out three editions of the New Testament, in 1749, 1750, and 1752 respectively, and one of the Old Testament in 1750. The changes introduced by him were so considerable that, according to Cardinal Newman, they "almost amounted to a new edition." Cardinal Wiseman wrote, "To call it any longer the Douay or Rheims Version is an abuse of terms. It has been altered and modified until scarcely any verse remains as it was originally published." In nearly every case Chaloner's changes took the form of approximating to the Authorized Version, though his three editions of the New Testament differ from one another in numerous passages. The best known

BERNARD WARD.

Douay Bible.—The original Douay Version, which is the foundation on which nearly all English Catholic versions are still based, owed its existence to the religious controversies of the sixteenth century. Many Protestant versions of the Scriptures had been issued and were used largely by the Reformers for polemical purposes. The rendering of some of these texts showed evident signs of having been made "with an eye to nothing but destroying the divinity of the day to be furnished with a translation of their own, on the accuracy of which they could depend and to which they could appeal in the course of argument. The work of preparing such a version was undertaken by the members of the Eng-
Catholic Bible published in England in modern times is perhaps Haydock’s, which was first issued at Manchester in fortnightly parts in 1811–12. The Irish editions are mostly known by the names of the bishops who gave the imprimatur: as Dr. Carpenter’s New Testament (1783); Dr. Troy’s Bible (1791); Dr. Murray’s (1825); and Dr. Denziger’s (1836)—the last two of which were often reprinted, and circulate largely at the present day in England as well as in Ireland. Of late years the issue of the sixpenny New Testament by Burns and Oates of London has by its large circulation made the text adopted therein—Challoner’s of 1749—the standard one, especially as the same is adopted in Dr. Murray’s and Dr. Denziger’s Bible—of which, attached separately to each one of the two, and in the former case, the evidence for and against so equally balanced as to render decision impossible; in the latter, the doubt arises from the absence of sufficient evidence on either side. It is thus possible that a doubt may be positive on the one side and negative on the other (positivo-negative or negativo-positive), i. e. in cases where evidence on one side only is attainable and does not afford an absolute demonstration, as, for instance, in circumstances of absolute evidence. Again, doubt may be either theoretical or practical. The former is concerned with abstract truth and error; the latter with questions of duty, or of the licitness of actions, or of mere expediency. A further distinction is made between doubt concerning the existence of a particular fact (dubium facti) and doubt in regard to a principle or proposition (dubium juris). Prudent doubts are distinguished from imprudent, according to the reasonableness or unreasonable-ness of the considerations on which the doubt is based. It should be observed that doubt is a purely subjective condition; i. e. it belongs only to the mind which has to judge of facts, and has no application to the universal truth. The proposition that mind is commonly called doubt is, therefore, one as to which sufficient evidence to determine assent is not forthcoming; in itself it must be either true or false. Theories which have at one time been regarded as doubtful for want of sufficient evidence, frequently become certain true or false by reason of the discovery of fresh evidence in their favor (or against). It follows that theoretical doubt may be in like manner concerned with the subject-matter of either reason or faith, that is to say, with philosophy or with religion. Practical doubt is concerned with conduct; and since conduct must be guided by principles aforesaid by reason or by faith, or by both conjointly, doubts concern it the application of principles already accepted under one or other of the foregoing heads. The resolution of doubt of this kind is the province of moral theology, in regard to questions of right and wrong; and in regard to those of mere practical expediency, recourse must be had to the scientific or other principles which properly belong to the subject-matter of the doubt. Thus, for example, doubt as to the actual occurrence of an historical event can only be resolved by consideration of the evidence; doubt as to the doctrine of the sacraments, by ascertaining what is of faith on the subject; doubt as to the morality of a commercial transaction, by the application of the authoritative decisions of moral theology; while the question of the wisdom or the reverse of the transaction in regard to profit and loss may be resolved by observation of the combination of circumstances. The legitimacy, or the reverse, of doubt in regard to matters of fact is made evident by the forms of logic (induction and deduction), which, whatever may be the extent of their function as a means of acquiring knowledge, are indispensably necessary as a test of the correctness of conclusions or hypotheses already formed.

DOUBT IN PHILOSOPHY.—The validity of human perception and reasoning in general as guides to objective truth has been frequently called in question. The doubt thus raised has been sometimes of the character called methodic, fictitious, or provisional, and sometimes real, or sceptical, as embodying the conclusion that objective truth cannot be known. It is a question generally preliminary to all inquiry, and in this sense philosophy is said by Aristotle (Metaph., III, i) to be “the art of doubting well”. Sir W. Hamilton points out (Lect. on Metaphysics, v) that doubt, as a preliminary to philosophical inquiry, is the only means by which the necessary removal of prejudice may be effected; as the Baconian method was employed for the purpose of destroying the “idols”, or prejudices, by which men’s minds are naturally influenced. Thus the Scholastic proof of a proposition or thesis begins by the statement of “doubts”, or contrary arguments; after which the evidence for the thesis is given, and finally the doubts are resolved. This, it need hardly be said, is the method pursued in the “Summa” of Saint Thomas Aquinas, and still in use in the formidable examinations of theological students. An instance of this kind of doubt is the Sic et Non (Yes and No) of Abelard, which consists of a long series of propositions on theological, Scriptural, and philosophical subjects, with a counter-proposition attached to each. The solution of the doubts in the sense of the orthodox thesis, which was almost always given above the doctrine; or if so, has not been preserved. (See Victor Cousin’s “Fragmentes Philosophiques”.) The philosophical system of Descartes begins with a universal methodic doubt; the famous cogito, ergo sum, on which the whole system is based, is the solution of the philosopher’s fundamental doubt of his own existence. This solution had been anticipated by St. Augustine, who wrote: “We must freely propose doubt regarding existence as the ground of all certainty [c. g. “Tu, qui vis te nosse, scis esse te? Scio. Unde seis? Nescio. Cogitare te seis? Scio.” (Sol., II, i); “Utram aires sit vivendi, an ignis, dubitaverunt homines; vivere se tamen et meminisse et intelligere et velle et cogitare et scire et judicare quis dubitetur? Quandoquidem si dubitati visus, dubitati visi sunt in eligi” etc. (De Trin., X, i). In general it may be said that doubt, either expressed or implied, is involved in all intellectual research.

Among the systems in which doubt as to the trustworthiness of human faculties is not merely provisionally assumed, but is genuine and final, those which find in a supernatural revelation the guide to truth which natural reason fails to provide must be distinguished from those which hold doubt to be the final conclusion of all inquiry into truth. The former de-
precise reason in the interests of faith; the latter take reason as the only possible guide, but find no ground for confidence in it. To the former class belongs Nicholas of Cusa (1440), who was the author of two sceptical treatises on human knowledge; certainty is to be found, according to his view, only through the mystical knowledge of God. The scepticism of Montaigne made a reservation (whether sincerely or not is uncertain) in favour of revealed truth; and the same principle was advocated by Charron, Sanchez, and Le Vayer. Hume, in his sceptical essays on miracles and immortality, also attributed a final authority to revelation; but with obvious insincerity. The sceptical views of Hobbes, combined with his peculiar theory of the generation of knowledge, made him a disciple of religion, truth, dependent on the civil authority. Glanville’s “The Vanity of Dogmatizing”, or “Scopes Scientificae”, ground a serious defence of revealed religion on the uncertainty of natural knowledge. Balfour’s “Defence of Dogmatic Doubt”, based on the indemonstrability of ultimate truths, is an attempt in the same direction. (See Fineas.)

In the second class are to be reckoned the various systems of genuine scepticism. This appeared in Greek philosophy at a very early date. Heraclitus held the senses to be untrustworthy (κακαὶ μαθησιές) and misleading, though he also conceived a supersensuous knowledge of the universal reason, immanent in the cosmos, to be attainable. Zeno of Elea defended the doctrine of the unity of permanent elements, and proposed that the apparent things, like “hypothesises”, each of which resulted in a contradiction, and by means of them sought to demonstrate the unreality of the manifold and changing. The subjective principle of the Sophists (Protagoras, Gorgias, and others of less note) that “man is the measure of all things” implies doubt, or scepticism, as to all objective reality. Knowledge is never final, and truth is only probable. The Pyrrhonists, and Gorgias asserts that nothing really exists, that if anything existed, it could not be known, and that if such knowledge were possible it would be incomunicable. The Pyrrhonists, or Sceptics, held everything in doubt, even the fact of doubting. The Middle Academics, whose chief representatives were Arscius and Carneades, while doubting all knowledge, held it to be impossible to go beyond doubt. The Pyrrhonists have been considered in varying degrees the “Encyclopaedia” of Diderot and d’Alembert comments on the old self-contradiction of Montaigne, who claimed a higher degree of probability for the Pyrrhonian than for the Academic opinion. Sextus Empiricus advanced the theory, often since maintained, that the syllogism is really a petitio principii, and that demonstration is therefore impossible. Bayle, in his celebrated “Dictionary”, subjected the philosophy of his time to severe destructive criticism, but was confessedly unable to supply its deficiencies. Hume’s position was purely negative; for him, neither the existence of the external world nor that of the mind by which it is known was capable of demonstration; and the conclusions of the “Reneissance” were simply assertions about a thing in itself (Ding an sich) is unknowable though certainly existing, is evidently sceptical (though the author himself rejected the title), since it embodies a purely negative doubt as to the nature of transcendent reality. Kant’s argument for the existence of God, as rationally indemonstrable, but postulated by a transcendental analysis of the very definition of God, lies in a limited conception of the Divine nature. Leibniz made general consent, or the common sense of mankind, the only ground of certitude; the individual reason he held to be incapable of attaining it. “Nothing is so evident to us to-day that we can be sure we shall not find it either doubtful or erroneous to-morrow” (Essai sur l’indifference, II, xiii).

It may be observed that theories which deny the validity of simple experience as a guide to truth are really instances of doubt, because, though they assert dogmatically the inadequacy of widely accepted evidence, they are nevertheless in that state of suspense by which doubt is properly characterized in regard to the reality commonly held to be made known by experience. Thus the mental attitude which received from Professor Huxley the name of Agnosticism is a strictly doubtful one towards all that lies beyond sense-experience. The doubt is purely negative in this view; whatever is not cognizable by the aid of the senses is held to be unknowable; God may exist, or he may not, but we can neither affirm his existence nor deny it. Again, the system or method known as Pragmatism regards all reality as doubtful; truth is the correspondents with our ideas. It may be regarded as anything final, but must perpetually change with the progress of human thought; knowledge must be taken at its “face value” from moment to moment, as a practical guide to well-being, and must not be regarded as having any necessary correspondence with definite and permanent reality.

Doctrines regarding Religion has at different times assumed a variety of forms. It is not certain now far the ancient mythologies received or even demanded exact belief; it is at any rate certain that they were, as a rule, not considered worthy of serious attention by the philosophers of any school. The atheism which formed part of the charge on which Socrates was condemned was an offence against the State rather than against the gods. (See the “Doubt in the Christian Revelation”, ii. ch. 16., p. 451.) The faith demanded by the Christian Revelation stands on a different footing from the belief claimed by any other religion. Since it rests on Divine authority, it implies an obligation to believe on the part of all to whom it is proposed; and faith being an act of the will as well as of the intellect, its refusal involves not merely intellectual error, but also some sort of sin. It follows that an absolute doubt, and not a mere uncertainty, must be held in regard to the Christian religion, equivalent to its total rejection, the ground of its acceptance being necessarily in every case the authority on which it is proposed, and not, as with philosophical or scientific doctrines, its intrinsic demonstrability in detail. Thus, whereas a philosophical or scientific opinion may be held as a concluded proposition without bearing on the absolute doubt, no such position can be held towards the doctrines of Christianity; their authority must be either accepted or rejected. The unconditional, interior assent which the Church demands to the Divine authority of revelation is incompatible with any doubt as to its validity. Gregory XVI, by the Brief “Dum acerbissimas”; 26 Sept., 1835, condemned the teaching of Herbart, but left the demand to establish it based on positive doubt (Dezinger, 10th ed., no. 1619); and the Vatican Council declared (Sess. II, ch. xxxi.): “revelata verae esse credimus, non propter intrinsecum rerum veritatis naturalibus rationibus lumine perspectam, sed propter auctoritetum ipsius Dei revelantis, qui nee falli nee fallere potest”, i.e. we believe the things that are revealed on the authority of an intrinsic truth which reason perceives, but because of the authority of God Who is the Author of Revelation, and Who can neither deceive nor be deceived.

Heresies have, however, generally had the character rather of dogmatic assertion than of mere doubt, though they arose from a more or less prevalent state of doubt as to doctrines imperfectly understood or not yet authentically defined. For devotion to classical studies which followed upon the fall of Constantinople in 1453 and the dispersion of its literary treasures gave rise to the humanism, or literary revival, of the Renaissance, and in many cases resulted in a sceptical attitude towards religion. This scepticism, however, was by no means universal among the Humanists; and was due rather to lack of interest in theological, as compared with literary and philosophical, study, than to any reasoned criticism of religious doctrine. (See
Pastor, "History of the Popes", chapters on the Renaissance.) It helped to prepare the way, however, for the Reformation, which, beginning with a revolt against ecclesiastical authority, called all the doctrines of Christianity in question, rejecting those which failed to gain the approval of the different leaders of the movement. Thus among Protestants in general there is great variety of opinion on religious doctrines, those which are firmly held by some being considered doubtless by others, and by others again, rejected as false. Anglicanism, especially, leaves open many of the tenets which the Catholic Church holds as of faith, and thus endeavours to comprehend within its boundaries persons who differ widely from one another in important subjects. The Catholic Church, on the other hand, pronounces authoritatively as to the truth or falseness of opinions, by means of general councils, professions of faith, infallible decisions of the supreme pontiff, and the ordinary teaching of her pastors. As St. Augustine, in the sixth century, declared, "it is the law of the councils that if any doubt have arisen in matters which regard the study of the Church, we are to have recourse to the chief priest of the Roman Church" (Ep. xxxvi in P. L., LIX, 253). Doubt as to the Faith is thus impossible in the Catholic Church without infringing the principle of authority on which the Church itself depends. The field, however, which is open to a variety of opinions on questions not directly affecting the essence of Christian truths, is still a very wide one; and though its extent may be further limited by future dogmatic decisions, it is probable on the other hand that it will be increased in the future, as in the past, by the emergence of doubtful questions as to the exact bearing of dogmatic truth upon fresh discoveries or theories of all kinds.

It will be evident from what has been said that doubt cannot coexist either with faith or knowledge in regard to any given subject; faith and doubt are mutually exclusive, and knowledge which is limited by a doubt, becomes, in regard to the subject or part of a subject to which the doubt applies, no longer knowledge but opinion. A moral certainty—that is, one which is founded on the normal course of human action—does not strictly exclude doubt, but, however, excluding prudent doubt, must be considered a sufficient practical guide (cf. Butler, "Apologetics of Religion"; introduction, and pt. II, ch. vi). Thus doubt is sometimes said to imply belief; though such belief or practical certainty cannot properly be held to rise above the most probable kind of opinion. The rhetorical conception of doubt as a limitation on faith (Terence, In Memoriam) must be taken to signify that truthful and serious habit of mind which refuses to submit to deception on motives furnished by intellectual sloth or the desire of worldly advantage. Catholic philosophy is entirely opposed both to the Pyrrhonian doubt of external reality and to that form of Idealism which is closely connected with the Kantian method side of the philosophical school. It would reduce all dogmas to the mere expression of subjective religious conceptions, relegating the objective facts with which dogma is concerned to the domain of symbol and parable. In the view of the Scholastic system, human experience is a true perception of external reality through the senses and the intellect; phenomena being the object of knowledge, it being important for science that there be a certain degree of intellectual agreement, and, after a different manner, of the intellect, which apprehends through sensible impressions the true nature and principles of the reality which causes those impressions. The facts of revelation to which the Church bears witness are in this sense real and objective, and may neither be explained away nor set aside by any system of historical or scientific criticism. Such is the purport of the Encyclical "Pascendi Dominici gregis" (1907), which both controverts and condemns the attempt to evacuate dogma of its true significance made by the method of religious speculation known as Modernism.

Practical Doubt, or doubt as to the lawfulness of an action is, according to the teaching of moral theology, incompatible with right action; since to act with a doubt as to the lawfulness of an action is contrary to the moral law. To act with a doubtful conscience is, therefore, sinful; and the doubt must be removed before any action can be justified. It frequently happens, however, that the solution of a practical doubt is not attainable, while some decision is necessary. In such cases the conscience may obtain a "relative," or certain, or a prudential, or a common, or an apparent, or a possible, or an unavoidable, or a probable, or possibly probable, or merely probable in itself, even though less so than its contrary. (See Moral Theology; Probabilism.) The last, however, is the theory generally accepted for all practical purposes; and the principle that lex dubia est non obligavit—i. e. that a law which is doubtful in its application to the case in hand does not bind—is universally admitted. It is in the practical field of life that the position is not one merely of positive law but of securing a certain practical result, only the "safer" course may be followed. No opinion, however probable, is allowed to take precedence of the most certain means of securing such ends; e. g. in providing for the validity of the sacraments, in discharging obligations of justice, or in avoiding injury to one's friends or relations, the opinion must be conditioned. (See Agnosticism; Certitude; Epistemology; Faith; Heresy; Infallibility; Scepticism.)

For doubt in ancient philosophy see Zeller, Phil. der Griechen, Tyttenham, 1873, etc. (especially 371); and Schelling, Grundlinien der Philosophie (Freiburg, 1842). For modern philosophy see Nachlass Schelling, ed. C. G. Carstanjen (Freiburg, 1880); and H. P. Kuno, Geschichte der Philosophie (1902); and especially the chapter on "Doubt and Assent" in Descartes, Prinzipii Philos. Amsterdam, 1644; Malebranche, Recherche de la vérité (Paris, 1687); Pascal, Pensées (Paris, 1670); V. G. Fries, de la vérité, Hist. de la philosophie moderne (1789); Kant, Stu. der reichs Vernunft und Kritik der praktischen Vernunft (1788); and Criticism, (1787); Bourgeois, Fragments Philosophiques (1807); Hamilton, Lectures on the General Criticism of the English and the French (1808).

Douglas, GAVIN, Scottish prelate and poet, b. about 1474; d. 1522; he was the third son of Archibald, Fifth Earl of Angus, known as "Bell-the-Cat". Educated for the Church at the universities of St. Andrews, and for a time a hostage in the Netherlands and in East Lothian, and during this period composed most of the poetical works which have made his name famous. In 1501 he became provost of the collegiate church of St. Giles, Edinburgh, and subsequently, through the influence of Queen Margaret, who had married his nephew, the young Earl of Angus, he succeeded his uncle John as abbot, and was consecrated Bishop of Dunkeld. The Queen's efforts to have him promoted to the primacy were unsuccessful; and when the popular indignation at her marriage with
Angus resulted in her being deprived of the regency, Douglas was brought to trial by the new regent, the Duke of Albany, for intriguing with the queen to obtain ecclesiastical promotion without the consent of Parliament. He was imprisoned for a year in Edinburgh Castle, and after his release continued for a time in the administration of his diocese. When, however, Margaret separated from her husband and sided with Albany against the Douglases, Gavin was deprived of his see. He fled to England in 1521 and was kindly received by Henry VIII, but he died of plague in the following year. He was buried in the Scott Church in London.

It was unfortunate for Douglas's future reputation that his high birth and family connections plunged him into the political turmoil of his time, and thus prematurely closed his career as a poet and scholar of the first order. His participation in the internal divisions by which Scotland was torn during most of his life ended, as far as he was concerned, in failure, exile, and death; and it is as a literary genius, rather than a churchman or a statesman, that he lives in Scottish history. It was during his quiet life as a country parson that he wrote the gorgeous allegory called the "Palace of Honour", whose wealth of illustration and poetical embellishments at once won renown for its author; and a little later he produced the translation of Virgil's "Aeneid", which justifies him in his claim to literary immortality. The translation is a rather free adaptation of the Roman poet, written in the "Scottis" language then current, while each book is prefixed an original prologue in verse. It was printed (for the third time) by the Bannatyne Club in 1839. Douglas wrote two other poems, "King Hart" and "Conscience", and translated also Ovid's "Metamorphoses". His works were first collected and published in Edinburgh (ed. Small), in 1874.

Dove (Lat. columba).—In Christian antiquity the dove appears as a symbol and as a Eucharistic vessel. As a Christian symbol it is of very frequent occurrence in ancient ecclesiastical art. (1) As a symbol of the Holy Spirit it appears especially in representations of the baptism of Our Lord (Matt., iii, 16) and of Pentecost. St. Gregory the Great (590-604) is generally shown with a dove on his shoulder, symbolizing inspiration or rather Divine guidance. A dove of gold was hung up in the baptistery at Rome in 612, a few months after the baptism of Clovis; in general the symbol occurs frequently in connexion with early representations of baptism. In ancient times the dove—a vessel was frequently suspended over the baptismal font and in that case was sometimes used to contain the holy oils (Arignil, RomaSUBterr., II, 326). (2) As a symbol of martyrdom it indicated the action of the Holy Spirit in bestowing on the fortitude necessary for the endurance of suffering. (3) As a symbol of the Church, the agent through which the Holy Spirit works on earth. When two doves appear, the baptismal symbolism may represent, according to Maecurus (Hagiographa, 222), the Church of the circumcision and that of the Gentiles.

On a sarcophagus or on other funerary monuments the dove signifies (a) the peace of the departed soul, especially if, as is often the case in ancient examples, it bears an olive branch in its beak; (b) the hope of the Resurrection. In each case the symbolism is derived from the story of Noe and the Flood. Such is the meaning of the dove (columbula, palumba sine Jelle) in numerous epitaphs of the Roman catacombs. Occasionally funeral lamps were made in the shape of a dove. Two doves on a funeral monument sometimes signify the conjugal love and affection of the parties buried there. The dove in flight is the symbol of the Ascension of Christ or of the entry into glory of the martyrs and saints (cf. Ps. cxxiii, 7: "Our soul is escaped as a bird from the snare of the hunters, the snare is broken and we are delivered."). In like manner the caged dove signifies the human soul yet imprisoned in the flesh and held captive during the period of mortal life. In general, the dove as a Christian emblem signifies the Holy Spirit either personally or in His works. It signifies also the Christian soul, not the human soul as such, but as indwelt by the Holy Spirit; especially, therefore, as freed from the toils of the flesh and entered into rest and glory. As a Eucharistic Vessel.—The reservation of the clay lamp from Cologne showing Dove and Olive Branch.
Holy Eucharist for the use of the sick was, certainly since early medieval times, effected in many parts of Europe by means of a vessel in the form of a dove, suspended by chains to the baldachino and thus hung above the altar. Mention may be made here of the (two) doves occasionally represented in the Roman catacombs as drinking from a Eucharistic chalice (Schnyder, "Die Darstellungen des eucharist. Kehes auf altehr. Grabinschriften", in "Stromation Archæologicon", Rome, 1900, 97–118). The idea of the Eucharistic vessel was probably taken from the dove-like receptacle used at an early period in the baptisteries and often suspended above the fonts. These vessels were usually made of gold or silver. This was no doubt always the case if the vessel was designed to be the immediate holder of the Blessed Sacrament, since the principle that no base material ought to be used for this purpose is early and general. But when, as seems generally to have been the case in later times, the dove was only the outer vessel enshrining the pyx which itself contained the Blessed Sacrament, it came about that any material might be used which was itself suitable and dignified.

Ambrose Coyle.

**DOWDALL**

Dowdall, James, martyr, date of birth unknown; executed for his faith at Exeter, England, 20 September, 1600. He was a merchant of Drogheda, Ireland, though several authorities, including Challoner, describe him as a native of Wexford. Further confusion is added by reason of the fact that another contemporary, James Dowdall, died a confessor. According to Rothe, however, the martyr belonged to Drogheda, and it was to the rising dissipation of the country.

In the summer of 1598, when returning from France, his ship was driven by stress of weather onto the coast of Devonshire, and he was arrested by William Bourchier, Earl of Bath, who had him under examination. Dowdall publicly avowed that he rejected the queen’s supremacy, and only recognized that of the Roman pontiff. The Earl forwarded the examination to Rome, who at this time was in a state of open schism and the sturdy Irishman was committed to Exter jail. Whilst in prison he was tortured and put to the rack, but continued unchanged in his fidelity to the ancient faith. Or 18 June, 1599, the Earl of Bath wrote to Sir Robert Cecil for instructions in regard to James Dowdall, who had been detained in prison almost a year. Accordingly he was tried at the Exeter assizes, and was ordered to be hanged, drawn, and quartered.

Among the martyrs of the Apostolic Process of the Irish Martyrs whose cause is at present (1908) before the Congregation of Sacred Rites.

**DOWER**

Dower (Lat. doarium; Fr. douaire), a provision for support during life accorded by law to a wife surviving her husband. Being for the widow and being accorded by law, dower differs essentially from a conventional marriage portion such as the dos of the old Roman law and the French jurist dower. Dower is thought to have been suggested by the marriage gift which Tacitus found to be usual among the Germans. This gift he terms dos, but contrasts it with the dos of the Roman law, which was a gift on the part of the wife to the husband, while in Germany the gift was made by the husband to the wife (La-rousse, Grand dictionnaire universel, Paris, 1870, §. Dowaire). The German law what was termed donatio propter nuptias, a gift from the family of the husband, but this was only re...
quired if the *dos* were brought on the part of the wife. So too in the special instance of a widow (herself poor and undotated) of a husband rich at the time of his death, an ordinance of the Christian Emperor Justinian secured her the right to a part of her husband's property, of which no disposition of his could deprive her.

But the general establishment of the principle of dower in the customary law of Western Europe, according to Maine (Ancient Law, 3rd Amer. ed., New York, 1861, 237), and the tracing of the English Church, and to be included perhaps among its most arduous triumphs. Dower is an outcome of the ecclesiastical practice of exacting from the husband at marriage a promise to endow his wife, a promise retained in form even now in the marriage ritual of the Established Church in England. (See Blackstone, "Commentaries on the Laws of England," II, 131, note p.) An ordinance of King Philip Augustus of France (1214), and in the almost contemporaneous Magna Charta (1215), dower is referred to. But it seems to have already become customary law in Normandy, Sicily, and Naples, as well as in England. The object of both ordinance and charter was to regulate the amount of the dower where this was not provided for by the marriage contract. The dower, English law consisting of a wife's life estate in one third of the lands of the husband "of which any issue which she might have had might by possibility have been heir" (Blackstone, op. cit., 131).

During the pre-Reformation period, a man who became a monk and made his religious profession in England was deemed *civilely* dead, "dead in *law*" (Blackstone, op. cit., II, 131, note p.), and at a less remote period it was said to be with life and liberty one of three things which the *law* favored. But an English statute of the year 1363 has impaired the inviolability of dower by empowering husbands to cut off by deed or will their wives from dower. It was the law of dower uninjured by statute, which according to the American commentator, Chanceller Kent, has been "with some modifications everywhere adopted as part of the municipal jurisprudence of the United States" (Commentaries on American Law, IV, 36). But while the marriage portion, *dowry*, is, yet dower is not, known to the law of Louisiana, and it has now been expressly abolished in some other States and in some territories. The instances of legislative modifications are numerous and important.

Of dower (*joaune*) as it existed in the old French law no trace is to be found in the existing law of France. But brought to Canada from the mother country in pre-Revolutionary times, customary dower accruing by operation of law is yet recognized in the law of the former French Province of Quebec. The civil death which by English law seems to have applied to men only, might be by the French law incurred by women. In the case of a woman's widow, therefore, thus entering into religion, would lose her dower, although in some regions she was allowed to retain a moderate income. (See Larousse, op. cit.) And now by the law of Quebec a widow joining certain religious orders of the province is deemed *civilely* dead and undoubtedly would suffer loss of dower.

Dower, Religious (Lat. *dowenia*).—Because of its analogy with the dower that a woman brings to her husband to purchase religious mov.ires, the name "religious dower" has been given to the right of retain the property that a religious woman, or nun (*religionis*), brings, for her maintenance, into the convent where she desires to make her profession. It is not a question here of the more or less generous donations made by the young woman or her family either to the convent or to some of the good works that it carries on, nor of the amount of the sum that the nun has agreed to pay or to have paid to her, but only of the amount of the dower or of the property that is occupied by the convent. It is this right that has been recognized by canon law throughout the ages, and has been maintained, if not more actively decreed by the courts, in the majority of cases. The same rule has been laid down for the religious of the religious order, and in course of time has been applied to the religious who, by her profession, has become a member of the community.

The custom of religious dower was not in vogue in the ancient Church. Introduced occasionally for nuns under solemn vows (the only vows that existed in ancient times), it became gradually the rule in all communities, particularly in congregations under simple vows, these being now the most numerous. According to common ecclesiastical law, every convent had formerly to be provided, at the time of its foundation, with the resources necessary for the maintenance of a fixed number of nuns, not less than twelve. These were reckoned gratuitously by the founder, or by the endowment of his property, and in no wise prohibited from presenting the monastery with a portion of their property, were supported out of the revenue assigned to the monastery for this purpose. That is why the Council of Trent (Sess. XXV, c. iii, Dec. regul.) established in this regard the following rule: Let only such a number [of religious] be determined, and henceforth supported, as can be fittingly supported, either by the proper revenue [of each house] or by the customary alms [in the case of mendicant orders]. The determination of this number belongs to the bishop, who, if there be occasion, will act together with the regular superior (Gregory XIII, Constitution, De sacris, 15 Dec., 1572). The Council of Trent does not speak of religious dower. However, from the end of the sixteenth century the prescription relative to the fixed number of religious had fallen into desuetude, and the dower came into use; and this for two reasons. The first was the acceptance of "supernumerary" religious, that is of a larger number than the resources of the convent warranted; hence it was but just that the amount required for their maintenance should be demanded of them. The second reason lay in the decrease of the resources of the ancient convents and in the absence of property for the many new houses founded towards the end of the sixteenth century. An evidence of the simultaneous existence of these two causes is found in the general decree of the Sacred Congregation of Bishops and Regulars, 6
Sept., 1604 (in Bizzarri, Collectanea, 369), ordaining that the supernumerary religious should deposit a dower equal to twice that of the others and amounting to at least 400 £cws (about $100). This was the minimum, and each house was to set its own figure, to be regulated according to circumstances. Though deposited at the time of receiving the habit, the convent did not acquire possession of it for the ceremony of profession, and if the novice left before being professed, it was restored to her (cf. Council of Trent, Sess. XXX, cap. xvi). Dispensation from solemn vows was, it may almost be said, unknown, and the obligatory restitution of dower had not been provided for in the case of a religious leaving her community; it was the result of equity rather than of law. But since the promulgation ofCanon 28, 1901, which requires of all religious under solemn vows a probationary period of three years under simple vows, this restitution has become a rule. Article X says: “The dower established for each monastery should be deposited before the profession of simple vows”; and Article XII continues: “If a sister who has professed simple vows retires from the monastery, either after being dismissed from her vows by the Holy See or after sentence of dismissal (before the solemn vows), the capital of her dower is to be restored to her, but not the interest.”

Such is also the general rule for congregations under simple vows. Stipulations concerning the dower are very clearly set forth in the “Normes”, rules in use by the Sacred Congregation of Bishops and Regulars for the approbation of religious under simple vows, published 28 June, 1901, ch. vii, articles 91-94. Each congregation of nuns should set out in its statutes the dower, equal in all cases, for the choir religious; it should even establish a lesser dower (but the same for each one) to be deposited by the lay, or assistant, sisters. The superior cannot receive a religious without a dower or with an insufficient dower, except by permission of the bishop, if the congregation be diocesan, or by that of the Congregation of Religious, if the institute be approved by Rome. The required dower must be duly pledged to the congregation prior to the taking of the habit and must be deposited shortly before the profession. Thus deposited, such a dower cannot be alienated, that is, it cannot be used by the congregation in whatever way it may deem fit, as, for instance, to meet building expenses or discharge debts, but must be prudently and advantageously invested. Even though the funds be administered by the mother-house or the provincial, the income from each dower must be given to the house where the religious resides who brought in that dower. Although no longer the property of the nun, the dower becomes entirely the property of the institute only at the death of the subject, for whom, until then, it must remain set apart, so that, should a religious withdraw from a community either on the expiration of her temporary vows, or after a dispensation, or finally on account of dismissal, the capital of her dower must be restored to her.

Dowling, Joseph Thomas. See Hamilton, Diocese of.

Down and Connor, Diocese of (Dunensis et Conorenensis), in Ireland. A line drawn from Whitehouse on Belfast Lough due west to the Clady River, thence by the river itself to Muckamore and Lough Neagh, marks the boundary between the Diocese of Down and the Diocese of Connor. North of this line to the sea and the Bann, including the greater part of the County Antrim and a small portion of Derry, is the Diocese of Connor. South of the line, the remainder of Antrim, except the parish of Aghalane, belonging to Dromore, belongs to the Diocese of Down, as also the whole of the County Down, except the baronies of Iveagh and part of Kinleithy. The extent of the united dioceses is 397,400 Irish acres (about 576 sq. miles).

Each diocese was a collection of ancient sees. Within the limits of Down, and founded in St. Patrick’s time, there were: Raholp, founded by St. Tassaert, Gor-tgrib by Vinoch, Bright by Loarn, Mahee Island by St. Mochay, Maghera by St. Donard. There were also: Moville, founded by St. Finnian, and Bangor by St. Comgall, the latter an abbey, but often ruled in aftertimes by a bishop. St. Fergus is named as first Bishop of Down. In ancient times the place was called Dun Celtair, Celtair being one of the Red Branch knights. Afterwards it was called Dun-da-Leth-Glaise, “the fort of the two half-chains”. According to tradition two young chiefs had long pined in King Laeghaire’s prison. St. Patrick miraculously struck off the chain which bound them, and the prisoners, thus released, hastened to their father’s residence at Dun Celtair, flinging from them the pieces of the severed chain; hence the new name. A further change occurred after St. Patrick’s death. Dying at Saul (189), he was buried at Down, which then contained no church. Subsequently the remains of St. Brigid were brought there from Kildare, as were some relics of St. Columba from Iona. Meanwhile the ancient Dun Celtair had become Downpatrick, a town overshadowing all the neighbouring towns, the capital also of the Diocese of Down, which in process of time absorbed all the surrounding sees.

Like Down, Connor, founded in 480 by St. Macnisse, was a collection of smaller sees. These were Kilroot, Drumtullagh, Culleightraine, Coleraine, Inispolen, Ar- moy, and Rashee. The date of the founding of each of these sees is uncertain, as also the dates of their absorption; nor can a regular succession of bishops be discovered. By the twelfth century all the sees had ceased to exist except Connor. Its western boundary then was the Roe; but by the Synod of Rath-Breasail (1118), when the number and limits of the Irish dioceses were fixed, the Bann was made the western boundary of Connor, and Down was joined to it, but only for a brief period. In 1124 St. Malachy became Bishop of Connor, which was separated from Down. The two dioceses were again united in 1134, when Malachy became Archbishop of Armagh; but when he resigned the primacy, in 1137, he became Bishop of Down, again dividing the two sees. This separation was recognized by the Synod of Kells (1152), and continued till 1441, when John Cely, Bishop of Down, was deprived for having violated his vow of chastity. Meanwhile the annals record the death of many distinguished men, bishops and others, connected with

Church of Coleraine, Killowen
both dioceses. It is further recorded that in 831 Connor was plundered by the Danes, and Down in 942; that in 1177 Downpatrick was captured by John de Courcy, who imprisoned the bishop; that in 1183 de Courcy turned the secular canons out of the cathedral and replaced them by Benedictine monks from Chester; that in 1186 the relics of St. Patrick, St. Brigid, and St. Columba were discovered there and reinterred with great solemnity; that in 1315 a great battle was fought at Connor; and that the whole extent of the two dioceses suffered grievously during the invasion of Edward Bruce.

The primates John Prene resisted the union of Down with Connor in 1441, and it did not finally take effect till 1671, that date both dioceses, recognized as one, remained under the rule of one bishop. During the troubled times of the Reformation and the wars of the O'Neills, the Ulster counties suffered much, though the old Faith was still maintained. The plantation of Ulster replaced the greater number of the Catholics by English Protestants and Scotch Presbyterians. Later on, in the contests of the seventeenth century, the tide of war frequently rolled over Antrim and Down, with consequent destruction of Catholic property. The penal laws followed; and such was the combined effect of plantation and proscription that in 1670 in the whole of Down and Connor there were but 2500 Catholic families. For nearly sixty years subsequently the diocese was ruled by vicars. When at length the pressure of penal legislation was removed, Catholicism revived rapidly. In the period from 1810 to 1840 no less than forty new Catholic churches were built. The progress thus made under Dr. Crolly (1825–1835) and Dr. Denervir (1835–65) was continued under Dr. Dorrian (1865–86) and Dr. MacAlister (1886–95); nor did any of his predecessors show greater energy and zeal than Dr. Henry, whose death occurred with such tragic suddenness early in 1908. During the nineteenth century splendid churches were built at Newtownards, Hollywood, Ballymoney, and Belfast, and on every side visible signs of Catholic progress appeared.

This prosperity is largely due to the rapid growth of Belfast. Situated on the estuary of Belfast Lough, its site was occupied in the sixteenth century only by a strong castle, then in the hands of the O'Neills of Clannaboy. From them it passed at the close of the century to the British Government, and in 1603 the castle and land adjoining were granted by King James to Sir Arthur Chichester. He laid out and planted a small town, which, in 1613, was made a corporation by royal patent. Its growth was slow, and during the seventeenth century it was entirely overshadowed by the neighbouring town of Carrickfergus. About 1700, Belfast had a population of 2000, and a good deal of trade; in 1757 a population of 8000. Henceforth its rise was rapid and continuous. Its population in 1871 was 174,000; in 1881, 208,122; in 1891, 253,930; in 1901, with an enlarged city area, 318,750. It sends four members to Parliament, and is ruled by a lord mayor, fifteen aldermen, and forty-five councillors. In commerce and shipping, in trade and manufactures, it is the first city in Ireland. Catholicism has more than kept pace with the general advance of the city. In 1708 there were but seven Catholics in Belfast, and not till 1783 was there a Catholic church. Belfast is now the episcopal seat, with ten city parishes, a flourishing diocesan seminary, and many educational and charitable institutions.

Among the remarkable men of the diocese the following may be mentioned: St. Macenise, the patron saint of Connor, and St. Malachi, the patron saint of Down; St. Tassach, who attended St. Patrick in his last illness; St. Comgall, who founded the monastery of Bangor; St. Finnian, founder of Mo-ville; St. Colman Elia, founder of Maltrim; St. Mochad, Bishop of Nendrum; St. Donard, Bishop of Maghera; St. Dochona, Bishop of Connor. In the sixteenth century the notorious Miller Magrath was Bishop of Down and Connor; and in the next century the martyrly Cornelius O'Devanny, and the fighting bishop, Heber MacMahon, who also met a martyr's fate.

Statistics (1905): Parishes, 60; secular clergy, 167; regular clergy, 21; churches, 114; colleges, 2; monasteries, 5; convents, 16; total Catholic population (1901), 156,693; total population of all creeds, 671,266.

E.A. D'ALTON.

DOWNES (alias Bedingfeld, Mountford and Muffo), Spital, near Wapping, London.

Thomas, son of Thomas Downes of Bodney in Norfolk, b. in 1617; d. 21 December, 1678. His mother was Mary, daughter of John Bedingfeld of Redligdon in Suffolk. He was educated at St. Omer, but completed his studies at the English College, Douai, and entered the Society of Jesus, 3 January, 1639. From the novitiate he passed to the college of the English Province at Liége, but went for his theology to Pont-à-Mousson and was professed of the four vows 16 January, 1656. In 1671 he was chaplain to the Duke of York, afterwards James II. When the duke as admiral of the fleet went on the active service of 'Father Mumford' as confessor on board his flagship. During an encounter between the two fleets Father Downes won for himself a great reputation by exposing himself for many hours to a heavy fire while ministering to the wounded and dying. In 1678 he fell a victim to the infamous Oates conspiracy by means of forged letters delivered to him at Windsor but intended to be intercepted and reported to have been written by the provincial and Fathers of the Society. He handled the letters to the Duke of York who showed them to the king. The
latter was convinced of the fraud, and testified openly to Father Downes’s innocence, but was unable to protect him from the malice of the plotters who succeeded in getting him arrested and sent to the Gatehouse prison where he died.

J. M. STONE.

Downside Abbey, near Bath, Somersetshire, England, was founded at Douai, Flanders, under the patronage of St. Gregory the Great, in 1605 by the Venerable John Roberts, first prior, and some other English monks who had received the habit and taken vows in the Spanish Benedictine Congregation. In 1611 Dom Philip de Caverel, Abbot of Saint Vaast’s at Arras, built a monastery for the community in Douai, and consequently is revered as its founder. For some years the foundation was embroiled in attacks from without, and also in disputes as to a union with other English Benedictines, all of which were settled in 1633 by the Bull “Plantata” of Urban VIII.

From the first a school or college for lay pupils, sons of English Catholic gentry, has been an integral part of these institutions. This undertaking, conducted on traditional English public school lines, has always absorbed much of the energies of the community, whose other chief external work has consisted in supplying various missions or parishes in England. When Charles II established for his queen a Catholic chapel royal at St. James’s palace, the community to serve it was supplied from St. Gregory’s at Douai, and certain relics and church-plate then presented are still in existence at Downside. On the outbreak of the French Revolution the school was disbanded and the monks put in prison, where they remained nearly two years. At length in March 1795, they were allowed to proceed to England where an asylum was supplied by Sir Edward Smyth, fifth Baronet, a former pupil, who lent his Shropshire seat of Acton Burnell to his old masters for use as a monastery and school. In 1814 the establishment was moved to Mount Pleasant, Downside, a small manor-house with sixty-six acres of land, bought for £7000, largely the savings of the economy of the previous nineteen years. In 1823 Dr. Baines, Vicar Apostolic of the Western District, proposed to the community that they should abandon the monastic state and become a kind of diocesan seminary under himself. This extraordinary suggestion being rejected, the bishop applied to the Holy See for the suppression of the monastery on the ground of some alleged flaw in its canonical erection; after much litigation the pope decided in favour of the monks on every point. Since then the establishment has increased steadily in size and importance, new buildings being added in 1823, 1833, and almost continually since 1870. In 1899 Pope Leo XIII raised the priory to abbatial rank, the forty-fifth prior, Dom Edmund Ford, being elected first abbot, on whose resignation in 1906, Dom Cuthbert Butler was chosen to succeed him.

Six monks of St. Gregory’s have died martyrs for the Catholic Faith and are already pronounced Venerable, viz. Dom George Gervaise, martyred 1608; Dom John Roberts, the first prior, 1610; Dom Maurus Scot, 1612; Dom Ambrose Barlow, 1641; Dom Philip Powell, 1646; and Brother Thomas Pickering, 1679. Besides these the community has given to the Church three archbishops, Dom Bede Polding and Dom Bede Vaughan, the first two archbishops of Sydney, New South Wales, and Dom Bernard Ullathorne, first Bishop of Birmingham and titular Archbishop of Cahasa, well known as an ascetical writer. Also six bishops, Dom Philip Ellis, Dom Laurence York, and Dom Gregory Sharrock, all three successively Venerable Apostolic of the Western District; more recently, Dom Placid Morris, Vicar Apostolic of the Northern District; Dom John Huddlestone, who was instrumental in saving Charles II after Worcester and reconciled him to the Church on his death-bed; the Abbot Sweeney, the well-known preacher; Dom Jerome Vaughan, founder of the Abbey of Fort Augustus; Dom Aidan Gasquet the historian, Abbot President of the English Benedictines and also head of the Pontifical Commission for the revision of the Vulgate. Among the alumni of St. Gregory’s School, though not monks in the community, were Bishop Charles Walmesley, who consecrated Dr. Carroll the first bishop of Baltimore, U. S. A.; John Steevens, editor of Dugdale’s “Monasticon”; Henry Carey, author of “God save the King”; Sir John Day, one of the best known English judges; and Bishop Patrick J. Donahue, of Wheeling, U. S. A.

The abbey buildings now consist of a monastery for about fifty monks; school buildings for 1300 boarders and guests, the original building bought in 1814; and the abbey church, for exterior view of which see THE...
DOXOLOGY

Catholic Encyclopedia, I, 14. The last-named building consists at present of transepts, choir, and fifteen side chapels only; it is 230 feet long, and 70 feet high internally. Even in its unfinished state it ranks as one of the finest modern Gothic buildings in England, and contains the tomb of the Irish martyr, Ven. Oliver Plunket, Archbishop of Armagh. The community numbers eighty-four choir monks; there are no lay brothers. About half the monks work on the twenty-two missions or parishes in various parts of England which are dependent on the abbey. Besides the school attached to the monastery, Downside has two other schools, at Ealing, London, W, and at Gorey, Co. Wexford, Ireland; a house of studies for it name, founded by Bishop R. Whiting, martyr, the last abbot of the neighbouring Abbey of Glastonbury.

G. ROGER HUDLESTON.

DOXOLOGY

In general this word means a short verse praising God and beginning, as a rule, with the Greek word Δέης. The custom of ending a rite or a hymn with such a formula comes from the Synagogue (Acts xiii, 31, etc.; Matthew vi, 32, etc.); but the oldest in secularum. Amen) of St. Paul uses doxologies constantly (Rom., xii, 36; Gal., i, 5; Eph., iii, 21, etc.). These earliest examples are addressed to God the Father alone, or to Him through (διὰ) the Son (Rom., xvi, 27; Jude, 25; I Clem., xii; Mart. Polyc., xx, etc.) and in (ἐν) or with (σὺν, μετὰ) the Holy Ghost (Mart. Polyc., xvi, xx, etc.). The New Testament (Rom., xiii, 19) had set in example of naming the three Persons in parallel order. Especially in the fourth century, as a protest against Arius subordination (since heretics appealed to these prepositions; cf. St. Basil, De Spirit. Sancto, ii-v), the custom of using the form: “Glory to the Father, and to the Son, and to the Holy Ghost”, became universal among Catholics. From this time onward and down to the present, doxologies, a greater (doxologia maior) and a shorter (minor). The greater doxology is the Gloria in Excelsis Deo (q.v.) in the Mass. The shorter form, which is the one generally referred to under the name “doxology”, is the Gloria Patri. It is continued by an answer to the effect that this glory shall last for ever. The form, εἰς τὸν ἀιῶνα τῶν αἰώνων εἰς τὸν μεσσήν (Rom., i, 23; Gal., i, 5; I Tim., i, 17; Heb., xiii, 21; I Peter, iv, 11; I Clem., xx, xxxii, xxxvii, xlii, xiv, etc.; Mart. Polyc., xxii, etc.). It is a common Hebraism (Tob., xiii, 23; Ps. lxxxvii, 5, repeated in the Apocalypse: i, 6, 18; xiv, 11; xix, 3, etc.) meaning simply “for ever”. The simple form, εἰς τὸν αἰῶνα εἰς τὸν μεσσήν (Rom., xii, 3; Doct. XII Apost., ix, x; in the Liturgy of the Apostolic Constitutions, præamb.), Parallel formulae are: εἰς τὸν μεσσήν (Mart. Polyc., xiv; ἀπὸ γενέσεως εἰς γενέσεως (ibid.); etc. This expression was soon enlarged into: “now and ever and in ages” (cf. Heb., xi, 8; Mart. Polyc., xiv, etc.). In this form it occurs constantly at the end of prayers in the Greek Liturgy of St. James (Brightman, Eastern Liturgies, pp. 31, 32, 33, 34, 41, etc.), and in all the Eastern rites. The Greek form then became: Δέης παρὰ καὶ ἀγίῳ πνεύματι, καὶ τῶν καὶ δεῖ και εἰς τὸν αἰῶνα τῶν αἰώνων, ἀμήν. In this shape it is used in the Eastern Churches at various points of the Liturgy (e.g. in St. Chrysostom’s Rite; see Brightman, pp. 354, 364, etc.) and as the last two verses of psalms, though not so invariably as with us. The second part is occasionally slightly modified and other verses are sometimes introduced between the last verse of psalm and the last verse of Latin Rite. It seems originally to have had exactly the same form as in the East. In 529 the Second Synod of Vasio (Vaison in the province of Avignon) says that the additional words, Sicur erat in principio, are used in Rome, the East, and Africa as a protest against Arianism, and orders them to be said likewise in Gaul (can. v). As far as the East is concerned the synod is mistaken. These words have never been used in any Eastern rite and the Greeks complained of their use in the West [Walfred Strabo (ninth century), De rebus eccl, xxv]. The explanation that sicur erat in principio was meant as a denial of Arianism leads to a question whose answer is less obvious if one considers the form the reference is. One now understands gloria as the subject of edat: “As it [the glory] was in the beginning”, etc. It seems, however, that originally they were meant to refer to Filius, and that the meaning of the second part, in the West at any rate, was: “As He [the Son] was in the beginning, so is He now and so shall He be for ever.” The in principio, then, is a clear allusion to the first sentence of the second verse, and this sentence is obviously directed against Arianism.

There are medieval German versions in the form: “Als er war im Anfang”.

The doxology in the form in which we know it has been used since about the seventh century all over Western Christendom, except in one corner. In the Mozarabic Rite the formula is: “Gloria et honor Patri et Filio et Spiritui sancto” and in the Missal of this rite; see P. L., LXXV, 109, 119, etc.). The Fourth Synod of Toledo in 633 ordered this form (can. xv). A common medieval tradition, founded on a spurious letter of St. Jerome (in the Benedictine edition, Paris, 1706, V, 415) says that Pope Damasus (366-384) introduced the Gloria Patri in the Mass, and that this was as a special custom of the Western Church (De inst. coen., II, viii). The use of the shorter doxology in the Latin Church is this: the two parts are always said or sung as a verse with response. They occur always at the end of psalms (when several psalms are joined together as one, as the sixty-second and sixtieth and again the one hundred and forty-eighth, one hundred and twenty-sixth and one hundred and fifty-first, etc., at Lauds, the Gloria Patri occurs once only at the end of the group; on the other hand each group of sixteen verses of the one hundred and eighteenth psalm in the day Hours has the Gloria) except on occasions of mourning. For this reason (since the shorter doxology, like the greater one, Gloria in Excelsis Deo, is naturally joyful, sung at the beginning of Holy Week; in the Office for the Dead its place is taken by the verses: Requiem aeternam, etc., and Et lux perpetua, etc. It also occurs after canticles, except that the Benedictine has its own doxology (Benedicimus Patrem... Benedicimus et Domine, etc.—the only alternative one left in the Roman Rite). In the Mass it occurs after three psalms, the “Judica me” and at the beginning, the fragment of the Introit-Psalms, and the “Lavabo” (omitted in Passiontide, except on feasts, and at requiem Masses). The first part only
occurs in the responsoria throughout the Office, with a variable answer (the second part of the first verse) instead of “Sicut erat,” the whole doxology after the “Deus in adulatoriis,” and in the preces at Prime; and again, this time as one verse, at the end of the invita-
torium at Matins. At all these places it is left out in the Office for the Dead and at the end of Holy Week. The Gloria Patri is also extremely commonly used in extra-
liturgical services, such as the Rosary. It was a common custom in the Middle Ages for preachers to end sermons with it. In some countries, Germany especially, people make the sign of the cross at the first part of the doxology, considering it as chiefly a profession of faith.

ADRIAN FORTESCUE

Doyle, James Warren, Irish bishop; b. near New Ross, County Wexford, Ireland, 1786; d. at Carlow, 1834. He belonged to a family, respectable but poor, and received his early education at Clonleigh, at Rathenoonogue, and later at the Augus-
tinian College, New Ross. Shortly after 1800 he joined the Augustinian Order and was sent to Coimbra in Portugal, and there, at the university, he first manifested his great intellectual powers. In the univer-
sity library he read everything, Voltaire and Rousseau among the rest. As a consequence his faith became unsetted; but his vigorous intellect soon asserted itself, and subsequently he became the fearless champion of the Church in which he was born. During the French invasion he did sentry work at Coimbra, and according to his own story, his Irishness, and such was the impression he made at the Portu-
guese Court that he was offered high employment there. He declined the offer, however, and, returning to Ireland in 1808, was ordained priest the following year. Then for eight years he taught logic at the Augustinian College, New Ross. In 1817 he became professor at Carlow College, and two years later the priests of the Diocese of Leighlin offered him the vacant see. Their choice was approved at Rome, and thus, in 1819, Doyle became bishop. At that date the effects of the Penal Laws were still visi-
ble in the conduct of the Catholics. Even the bishops, as if despairing of equality and satisfied with subjection, often allowed Protestant bigotry to assail with impunity their office and person. This attitude of timidity and acquiescence was little to Dr. Doyle's taste, and over the signature of “J. K. L.” (James, Kildare and Leighlin) he vigorously repelled an attack made on the Catholics by the Protestant Archbishop of Dublin. He also published an extremely ample pamphlet on the religious and civil principles of the Irish Catholics; and a series of letters on the state of Ireland in a copy of the Rerum Belgicarum. The exac-
tion of the landlords, the corrupt administration of justice were lashed with an unsparring hand. The clearness of style, the skillful marshaling of facts, the wide range of knowledge astonished all. And not less remarkable was his examination before two Parliamentary committees in London. Seeing his readiness and resourcefulness, the Duke of Wellington, who was the chairman of the com-
tehs, rather than was examined by them. He joined the Catholic Association, and when O'Connell was about to contest Clare, Doyle addressed him a public letter hoping “that the God of truth and justice would be with him.” After Emancipation these two great men frequently disagreed, but on the tithe question they were in accord, and Doyle's exhortation to the people to hate tithes as much as they loved justice became a battle-cry in the tithe war. Meantime nothing could exceed the bishop's zeal in his diocese. He established confraternities, temperance societies, and parish libraries, built churches and schools, conducted retreats, and ended many abuses which had survived the penal times. He also waged unceasing and incessant war on secret societies. He died young, a martyr to faith and zeal.

puence, London, 1883; Doyle, J. K. L. (Dublin, 1825); Evidence Taken Before the Select Committee of the House of Lords and Commons, 1825-5 (London, 1825).

E. A. D'ALTON

Doyle John, b. in Dublin, Ireland, 1797; d. in London, 2 Jan., 1868; English portrait-painter and caricaturist. This clever artist studied under Gill-
elli, and Comerford, the miniature-painter. He came to London in 1821 and started as a portrait-painter, but gave his attention to drawing caricatures in 1827 or 1828, and developed his well-known signature, “H. B.,” by means of two acts of initials “J. D.” placed one above the other. In 1829 he commenced his famous series of drawings which he completed to 1831, carrying on a brilliant style all the political movements of the day. His drawings differ completely from the caricatures which preceded them, notably those of Rowlandson and Gillray, inasmuch as they are marked by reticence, courtesy, and a sense of good breeding. They are extraordinarily clever and at times stinging in their bitter epigrammatic expression. Doyle held this position to the last, and few people were aware of the fact that the initials on the caricatures formed his signature. He produced several pencil sketches of well-known personages and made use of his studies in this way in his caricatures, but the sketches themselves constitute in several instances the most life-like representations of the personages questioned. He is a contemporary of HENRY 
EVERT, English Caricaturists (1886); PAGE, Puzzles (1854); BINYON, Drawings in the British Museum (1900); DONSON in Dict. Nat. Biog., s. v.; BRYAN, Dict. of Painters and Engravers, II, 87.

GEORGE CHARLES WILLIAMSON

Doyle, Richard, English artist and caricaturist, b. in London, September, 1821; d. there 11 December, 1888. The second son of John Doyle (q. v.), he inherited much of his father's talent and exceeded the elder Doyle in skill and in power as a draughtsman. From a very early age he amused himself with making drawings. He prepared an account of the Eglinton Tournament when he was but fifteen, and at the age of sixteen was appointed to the Royal Academy, having served in the British Museum. The journal is a manuscript book containing many small sketches in pen and ink, executed with skill and brilliance, and marked by powers of observation and by a sense of humour hardly equalled and certainly not exceeded in later years. This extraordinary work was re-
produced in facsimile in 1885 with an introduction by H. B. Goodall, and is a remarkable proof of Richard Doyle's precocity as an artist. In 1843 he became a contributor to "Punch" and continued on the staff of that paper till 1850. He produced many cartoons, but his name will be especially remembered from the fact that he designed the cover for "Punch," which has continued in use down to the present time. He also wrote for "Punch," a series of articles enti-
titled "Manners and Customs of ye Englyshe." A
very devout Catholic, he resigned his position on the staff of the paper in 1830 in consequence of its hostility to what was termed "papal aggression," and devoted the remainder of his career to preparing drawings for book illustration and to painting in water-colour. His chief series of illustrations were those for "The New Testament," "The King of the Golden River," "In Fairyland," and "The Foreign Tour of Brown, Jones and Robinson". His water-colour drawings were marked by much poetic feeling, and were executed in harmonious low-toned schemes of colour. His genius has been well described as "kindly, frolicsome, graceful and sportive". He was full of imagination and delighted in romantic fancy, while his countrymen, who generally draw forcefully, lacking perhaps the strength of his father's works but far exceeding them in charm and in quality of amusement. There are many of his drawings in the British Museum, and some of his sketch-books are in the Fitzwilliam Museum at Cambridge.

The Month (March, 1881); Everett, English Caricaturists (London, 1886); Binyon, Drawings in the British Museum (London, 1900); Dobson, in Dict. Nat. Biog., s. v. George Charles Williamson.

Drach, David Paul, convert from Judaism, b. at Strasbourg, 6 March, 1791; d. end of January, 1868, at Rome. Rosenthal's "Convertitenbilder" (III, 48) prefaces the autobiography of Drach with the following words: The conversion of this learned Jewish parvenu is unparalleled. He began his conversions by the grace of God during this century in France and became the source of salvation to many of his coreligionists. This conversion, affecting one who enjoyed the highest esteem as an author and a learned rabbi, produced a most profound impression on all active and earnest minds of the rising generation, and excited them in the study of the mysteries of Christianity. His death was the saddest event to lead his coreligionists to the living fountain of truth, to the acknowledgment of Jesus as the real and true Messiah, crystallized in numerous writings and were blessed by God. Herein lies the net result of this scholar's conversion.

Drach received his first instruction at the hands of his father, a renowned Hebraist and Talmudic scholar, whose linguistic talents the son inherited. At the age of twelve Drach entered the first division of the Talmudic school in Edendorf near Strasbourg. This course of study, lasting ordinarily for three years, he completed in one year, and entered the second division of the Talmudic school in Bischheim in the following year. He graduated in eighteen months and then matriculated to a Talmudic school to study the Talmud. When only sixteen years of age he accepted the position of instructor at Rappoltsweiler, remaining there three years; afterwards he followed the same profession in Colmar. Here the ambitious youth devoted himself zealously to the study of secular sciences to which he had already seriously applied himself. In 1829, having obtained the desired unwilling permission of his father, he went to Paris, where he received a call to a prominent position in the Central Jewish Consistory and at the same time fulfilled the duties of tutor in the household of a distinguished Jew. The marked results of his method of teaching induced even Christian families to entrust their children to his care. It was under these circumstances that he received the first impulse towards a change of his religious views which ultimately resulted in his conversion. He writes: "Stirred by the edifying examples of Catholic piety continually set before me to the furtherance of my own salvation, the tendency towards Christianity, born in earlier life, acquired such strength that I resisted no longer." He now applied himself studiously to patristic theology and specialized in the study of the Septuagint with a view towards ascertaining the truth of the unanimous reproach of the Fathers, viz. that the Jews had falsified the Hebrew text. These studies resulted in his unquestioned belief in the Divinity and Messiahship of Jesus Christ. On Maundy Thursday, 1823, he renounced Judaism in the presence of Arethiphus Quelen, in Paris, was baptized the following (Holy) Saturday, and on Easter morning received his Holy Communion and the Seal of Confirmation. Two daughters and an infant son were also baptized. His wife, the only member of the family who adhered stanchly to the old faith, abjured the children. They were returned, however, after two years.

After a few years Drach went to Rome, where he was appointed as head of the German Jews (1827), which office he held at his death. Among those who converted to Drach for his sound advice and active assistance in the establishment of the "Congregation of the Immaculate Heart of Mary". Of Drach's numerous writings the following are of particular mention: "Levites d'un rabin converti aux Israelites, ses freres" (Paris, 1825). He also published the "Bible de Venet", with annotations (Paris, 1827-1833) in 27 volumes octavo. He remodelled the Hebrew-Latin Dictionary of Gesenius, and published a Catholic Hebrew-Chaldaic dictionary of the Old Testament (ed. Migne, 1864); "Le mur d'un juif, Where is the synagogue" (Rome, 1840); "Harmonie entre l'eglise et la synagogue" (Paris, 1841); and "La Cabale des Hebreux" (Rome, 1864).

Paul Augustin, son of the preceding, b. 12 Aug., 1817; d. 29 Oct., 1895; canon of Notre-Dame and exegete of importance. He studied at the Propaganda College in Rome and was ordained priest there in 1840. He was secretary of the Consistory (1846); rector of the monastery (La Sainte Bible, Paris, 1869) in which he himself wrote on the Pauline Epistles (1871), the Catholic Epistles (1879), and the Apocalypse (1879). Rosenthal, "Convertitenbilder", III, 48; Grove in Kirchenlex., III, 2011; Huettr, Nomenculator; Petri, Life of the Ven, Servant of God, Franz Maria Paul Libermann, Ger. II. Muller (Stuttgart, 1893).

N. Scheid.

Drachma (Gr. δραχμή), a Greek silver coin. The Greeks derived the word from δραχμός, "to grip", "to take a handful"; cf. δράμα, μαντίπυς, "a handful". Thus the term originally signified a handful of grain (Liddell and Scott; cf. Riehm, "Handwörterbuch", s. v. "Drama"). "Drama" is mentioned in the Coptic "Historia de la Bible", the term is derived from darag-mana, the name of a Persian coin equivalent to the Hebrew פֶּלֶypsum, darakón. The Persian word darag, Assyrian darku, means "degree", "division". Thus the words darag-mana and drachma would signify a part of a mina. The darag-mana was also called a Diræ because it was first struck by the emperor Darius Hystaspes (486-465 B.C.). The darag-mana is a fourth part of a stater, the hundredth part of a mina, and the six-thousandth part of a talent. The precise value of the drachma differed at various times. The two principal standards of currency in the Greek states were the Attic and the Æginetan. The Attic drachma had the greater circulation after the time of Alexander the Great. Its weight was about 40 grains, its value was a little less than twenty cents (nine pence three farthings), and its size was about that of a quarter. On the one side it had the head of Minerva, and on the reverse her emblem, the owl, surrounded by a crown of laurels. The Æginetan drachma weighed about 93 grains and was equivalent to one and two third Attic drachmas. It was current in the Peloponnesus (Corinth excepted, Rhæm, "Handwörterbuch") and in Macedonia until Alexander the Great. The drachma is mentioned in the Old Testament (II Machabea,
the royal counts man

Dracoitus, Blossius Emilias, a Christian poet of the fifth century. Dracoitus belonged to a distinguished family of Carthage and was the pupil of a noted grammarian named Felicianus. He was called clarissimus (most illustrious), won the favour of the proconsul Puddeus, and led a prosperous life by means of inherited riches and the income of his law practice until he incurred the ill will of the Vandal king, Gunthamund. The cause of this misfortune seems to have been the expression of sentiments of Romano-Byzantine patriotism; for these utterances Dracoitus suffered a long imprisonment. Nothing more is known of his history except that he was still alive when Thrasamund ascended the throne in 496. There is a short life of him by the monk Eutychius (De laudibus Dei), and a poem entitled "Satissatio". The latter two were written in prison; the first-mentioned is a collection of pieces composed at various times and written in the style of rhetorical school-exercises. Thus, one of these poems represents a rich man and a poor man as enemies; as a reward for the exploits of the rich man his statue is erected in the public square and accorded the right of sanctuary. Later, in recompense for additional services, the rich man asks for the head of the poor one, whereupon the latter flees to the statue for safety and a formal process ensues. In another poem Achilles deliberates as to whether or not he shall sell the body of Hector. When Dracoitus deals with themes of his own day, as in the eulogy on his former teacher, and the "Epithalamium" for two couples who were friends, his style is occasionally less conventional. The writings forming the "Romulea" contain but little suggestion of a Christian poet; on the other hand, the "Satissatio" and the "De laudibus Dei" manifest an ardor and sometimes eloquent faith. The "Satissatio", written about 490, was intended to be "instrumental in obtaining the release of the De laudibus Dei". The poem between 486 and 496, is a recital of God's benefits. The first book of the "De laudibus Dei" has for its main contents a description of the creation; the chief theme of the second is the Incarnation and the Redemption, it also contains vehement attacks on Arianism; the third compares, by appropriate examples, the hope of the Christian with the benefactions of the emperor. By writing in an epic style in order to love God with the cheerless prospect of the pagan who counts on no future reward. This poem, like the others, is full of ideas taken from other sources; the episodes drawn from the Bible, profane history, and mythology are as varied as the textual reminiscences of the Latin poets, both Christian and pagan. However, the excellent pupil of Felicianus was not a thorough master of the art of living or writing; his writings give frequent evidence in their form of the surrounding barbarism.

The collection named "Romulea" is incomplete. Probably it should also contain two small poems, one on the months and the other on the origin of the rose; perhaps, further, the "Orestes tragedia", which is called tragedia, though in reality it is an epic poem of some thousand verses, wherein the author follows a unique ancient version of the myth; finally, though with less certainty, the "Egriutido Perdic" (Perdica's Melody). The subject of this little poem of 290 hexameters is interesting from the point of view of folklore. Perdica, a student of Athens, has neglected the worship of Venus and by way of revenge this god-dess inspires him with a guilty love for his mother, Castalia. Perdica falls into a decline and his physicians are unable to understand his ailment, but Hippocrates, who ascertains that Perdica's heart beats more violently when Castalia approaches, recognizes the real nature of the malady. There is no remedy for the trouble and Perdica hangs himself (see Robbe, Der griech. Rom. Myth., Rome, 1866, p. 54). The works of Dracoitus were not known in their real form until 1791 and 1873. His Christian poems were very popular in the sixth and seventh centuries. They were revised by Eugenius, Bishop of Toledo (d. 657), but these revisions made great changes in the author's statements. What Eugenius failed to understand he altered; moreover, he corrected the doctrine of Perdica. Pusey has said that God deliberately created good and evil at the same time (Satissatio, 15); Eugenius made him say that God tolerated evil. It was in this recension that both the Christian poems were known until 1791. The larger part of the secular poems of Dracoitus were first published in 1873.

Paul Lejay.

Drane, Augusta Theodore, in religion Mother Francis Raphael, O.S.D.; b. at Bromley near London, in 1823; d. at Stone, Staffordshire, 29 April, 1886. Her parents were her father being managing partner in an East India mercantile house. Her remarkable natural gifts were developed by wide reading at a very early age. In 1837 she moved with her family to Babacombe, Devonshire, where she read much of the early literature of the Oxford Movement. Burnet's "History of the Reformation", she declared, was the real cause of her conversion. It was not, however, till 1847 that she grew uneasy as to her religious beliefs, whereon she consulted Keble and Pusey, but without satisfaction. The influence of Maskell, then Vicar of St. Mary Church, helped her more and she confided to him a scheme called "Ideal of a Religious Order". He told her that such an order existed in the Catholic Church, naming the North American College. This made a profound impression on her mind and gradually she was drawn to the Church. She was received at Tivetworth, 3 July, 1850, and in 1852 entered the Third Order of St. Dominic at Clifton. On 8 Dec., 1853, she was professed at the new convent of Stone, Staffordshire, and was there employed in teaching and in writing various books, meanwhile making great spiritual progress. In 1854 she was appointed mistress of novices, but in 1863 became mistress of studies instead, thus obtaining more leisure for writing. In 1872 she became prioress under her friend, Mother Imelda poole, and on the death of the latter in 1881 succeeded her as provincial (25 Nov., 1881), thus taking charge of the whole congregation and the convents which were on-the-English side. Her character was well summed up by Bishop Ullathorne when he described her as "one of those many-sided characters who can write a book, draw a picture, rule an Order, guide other souls, superintend a building, lay out grounds, or give wise and practical advice with equal facility and success." She continued to grow in remarkable sanctity till her death, which took place a fortnight after she had ceased to be provincial.

Her works include: "The Morality of Tractarianism" (1850), published anonymously; "Catholic Legends and Stories" (1855); "Life of St. Dominic" (1857); "Knights of St. John" (1858); "Three Chancellors, Wykeham, Waynfhete and More" (1859); "Historical Tales" (1862); "Tales and Traditions" (1862); "History of England for Family Use" (1864);
"Christian Schools and Scholars" (1867); "Biographical Sketch of Hon. H. Dormer" (1868); "Songs in the Night" (1876); "New Utopia" (1876); "History of St. Catherine of Siena" (1880); "History of St. Dominic" (1891); "The Spirit of the Dominican Order" (1896), and some smaller pieces. She translated the "Inner Life of Pere Lacordaire" (1868), edited a "Life of Mother Mary Mantoux" (1869), "Archbishop Ullathorne's Autobiography" (1891), and "Letters of Archbishop Ullathorne" (1892).

EDWIN BURTON.

Dreams, Interpretation of.—There is in sleep something mysterious which seems, from the earliest times, to have impressed man and aroused his curiosity. What philosophy of sleep sprang from the observation of the phenomenon, we do not know; but, like all phenomena the causes of which are not obvious, sleep came, in the course of time, to be considered as an effect of the Divine agency and as something sacred. We should very likely see a vestige of this simple and primitive philosophy in the reverence shown at all times by the Arabs to a man sleeping. But the mystery of sleep is enhanced by the phenomenon of dream which accompanies it. Primitive people, unable to explain the psychology of dreaming or to discover the causes of sleep, observed that, whereas man can, when awake, control his thoughts and fancies, yet he is unable to keep his spirit, after his wakening from sleep, such dreams as he might wish, or of directing and ruling those that offer themselves to his faculties; hence they were led to attribute dreams to outside and supernatural agencies. The gods, whose power was believed to manifest itself in natural effects, such as thunderstorms and earthquakes, whose messages were sent by signs in the heavens, could as well send their commands through dreams as through other phenomena. Hence the persuasion arose that persons favored by frequent dreams were sacred and chosen intermediaries between the deity and man. Far from being cast aside by advancing civilization, these ideas developed with it, and were to a certain extent even systematized, as appears in particular from the records of the ancient Egyptians. East and West, it may be granted that every dream expressed a Divine message. Most dreams came unsought; but occasionally supernatural communications were solicited by "incubation." The person desirous of obtaining a prophetic dream then betook himself to the temple of the deity from whom he expected instructions, and there slept, after some ritual preparation. Among the shrines known in antiquity for vouchsafing dreams to their worshippers, the temple of Asclepius at Epidaurus, where dreams were obtained in which remedies were revealed to cure diseases, the cave of Trophonius, the temple of Serapis, and that of Hathor, near the turquoise mines of the Sinai Peninsula, are the best known. As a last means to wrest the dream from a reluctant deity or spirit, if not arrived at by the example of magical formula used for this purpose is contained in a Gnostic papyrus of relatively late date preserved in the Leyden Museum; it is entitled "Agathocles' Recipe for sending a dream," and may be read in Wiedemann's "Religion der alten Ægypten" (p. 144).

The meaning of the Divine message conveyed in dreams was sometimes obvious and unmistakable, as when the facts to be known were plainly revealed either by the deity himself or through the ministry of some messenger. Thus Thothmes IV was instructed by Ra Iremakhu in a dream to dig out of the sand the statue of the Great Sphinx, near the place where he was sleeping. In like manner the early Babylonian king Gudea, received the command to erect the temple Eanna to Ninh. Of this description also were the dreams recorded in the annals of King Assurbanipal. From these documents we learn that Asshur appeared in a dream to Gyyes, King of Lydia, and said to him: "Embrace the feet of Assurbanipal, King of Assyria, and thou shalt conquer thy enemies by his name." Forthwith Gyyes dispatched messengers to the Assyrian ruler to narrate this dream and pay him homage, and he proceeded in conquering the Kimmerians. Another passage relates that, in the course of an expedition against Elam, as the Assyrian troops were afraid to cross the Itti River, Ishtar of Arba-El appeared to them in their sleep and said: "I go before Assurbanipal, the king whom my hands have made." Encouraged by this vision, the army crossed the river and routed the enemy. (H. Smith, "Hist. of Assurbanipal," II, 307, 308.)

The Divine message was supposed at times to foretell some coming event. Moreover, its meaning was not always clear and might be shrouded in symbols, or, if conveyed through oral communication, wrapped up in figures of speech. In either case, the knowledge of the significance of the dream would depend on the interpretation. And as most dreams portended no clear message, the task of unfolding dream symbols and figures gradually grew to a science or less associated with soothsaying. Elaborate rules were laid down and handbooks compiled for the guidance of the priests in explaining the portent of the visions and symbols perceived by the inquirer in his sleep.

But by such manuals have been found in Assyria and Babylonia, the contents of which enable us to understand the principles followed in dream-interpretation. From Dan., ii, 2 sqq., it would seem that the potherim, or dream-interpreters, might be called upon even to discharge the perplexing task of recalling dreams forgotten by the dreamer. The instance here recorded cannot, however, be much insisted upon, as the connexion, if distinct, to the Divine task, impossible "except to the gods," yet imposed upon the Ephorean diviners by a whim of the king, was beyond their acknowledged attributions. Most of the Egyptian magic books likewise contain incantations either to procure or to explain dreams. These incantations had to be recited according to fixed cantilulations, and the soothsayer's art consisted in knowing them thoroughly, and offering to explain them properly. Side by side with this religious view of dreams, which regarded them as the expression of the will of the god or gods, there existed the superstitious view, according to which all dreams were considered as omens. Assuming "that things causally connected in thought are causally connected in fact" (Jevons), people blindly believed that their dreams had a bearing on their own fate, and eagerly strove to discover their significance.

Like the Eastern peoples, the Greeks and the Romans attached a religious significance to dreams. Of this belief many traces may be found in classical literature. Homer and Herodotus thought it natural that the gods should send dreams to men, even to deceive them, and they cast no doubt whatever on the higher ends (Agamemmnon's dream). The same indications may be found also in the works of the dramatists (e.g. Clytemnestra's dream in the "Agamemnon" of Eschylus). Plato, whilst regarding it as inconceivable that a god should deceive men, admitted nevertheless that dreams may come from the gods (Tim., 32. 504 C, 507 D,). Aristotle, in his "Rhet.," 13. 1487, attributed to dreams there is a divinatory value in dreams (De Divin. per somn., ii). The teaching of the Stoics was along the same lines. If the gods, they said, love man and are omniscient as well as all-powerful, they certainly may disclose their purposes to man in sleep. Finally, in Greece and Rome, as well as in the East, the popular views of dreams went a great deal farther and developed into superstition. It was in accordance with these views, and to gratify the cravings which they
created, that Daldianus Artemidorus compiled his "Oneirocritica", in which rules were laid down whereby any one could interpret his own dreams.

In the light of the belief and practices of the ancient peoples, we are better able to judge the belief and practices recorded in the Bible. That God may enter into communication with man through dreams is asserted in Num., xii, 6, and still more explicitly in Job, xxxiii, 14 sq.: "God speaketh once... By a dream in a vision by night, when deep sleep falleth upon men, and they are sleeping in their beds: then he openeth the ears of men, and noaching instructeth them in right paths..."

As early as the Old Testament the revelation through dreams occurs frequently in the Old and in the New Testament. In most of the cases the recorded dream is expressly said to come from God; of this description are, e. g., the dreams of Abimelech (Gen., xx, 3); of Jacob (Gen., xxviii, 12; xxxii, 10); of Solomon (III K, iii, 5-15); of Nebuchadnezzar (Dan., ii, 19); of Daniel (Dan., vii, 1); of Joseph (Matt., i, 20; ii, 13); of St. Paul (Acts, xxii, 11; xxvii, 23), unless we should interpret these passages as referring to visions granted to the Apostle while awake.

God is said to appear Himself only in a few instances, as to Abimelech, to Jacob, to Solomon, and to Daniel, if, as is generally admitted, the "Ancient of days", spoken of in this connexion, should be understood to be God. A prophecy is declared (Gen., xlix, 1) of "an angel, as in the dreams narrated by St. Matthew and St. Paul. The Bible records other dreams, which, though prophetic, are not distinctly said to come from God (Gen., xxxvii, 6; xl, 5; xli, 1; Judges, vii, 13; I Mach., xv, 11). It appears, however, from the circumstances and from their prophetic import, that their Divine origin cannot be doubted; at least their interpretation is declared (Gen., xlix, 1) "to belong to God". Accepting the historical truth of these facts, there is no reason indeed why God should not use dreams as a means of manifesting His will to man. God is omnipotent and all-powerful, and He loves man; He may, therefore, in order to disclose His purposes, choose natural as well as supernatural means. Now dreaming, as a natural psycho-physiological phenomenon, has undoubtedly its laws, which, however obscure they may be to man, are established by God, and obey His bidding. But since man may be easily deceived, it is needful that God in using natural causes should supply such evidences as will make His intervention unmistakable. Sometimes these evidences are manifested to the dreamer, at other times to the interpreter, if one be necessary; but the deliverer of the dream, the interpreter of the dream, and the chosen one of the Divine secrets, must be absolutely divinely inspired. Thus the evidence of the authenticity of dreams is readily perceived. In fact, there is here more than a mere analogy; for communication by dreams is but one of the many ways God may select to manifest His designs to man; there is between them a relation of species to genus, and one could not deny either without denying the possibility of a supernatural revelation.

All the dreams actually recorded in Holy Writ were unsought. Some scholars infer from the words of Saul (I K., xxviii, 15): "God is departed from me, and would not hear me, neither by the hand of prophets, nor by dreams", that the practice of deliberately seeking supernatural dreams was not unknown in Israel. That such interpretation be not inferable from the statement of Saul, is evident from the very text; the expression "neither by the hand of prophets, nor by dreams", does not imply such a meaning, but may as well be interpreted of unsought prophetic dreams. Still less can it be asserted that the Israelites would seek prophetic dreams by resorting to a well-known sanctuary and sleeping there. The two instances sometimes adduced in this connexion, namely the dream of Jacob at Bethel (Gen., xxviii, 12-19) and that of Solomon at Gabaon (III K., iii, 5-15), do not bear out such an affirmation. In both cases the dream, far from being sought, was unexpected; moreover, with regard to the former, it is evident from the narration that Jacob was quite unaware beforehand of the holiness of the place he slept in. His inference on the next morning as to its sacredness was inspired by the object of the dream, and his conduct in this circumstance seems even to betray some fear of having unknowingly defiled it by sleeping there.

It should not be concluded from the above remarks that there were no errors with regard to dreams and dream-interpretation in the minds of individual Israelites. Like their neighbours, they had a tendency to consider all dreams as omens, and attach importance to their significance. But it is a manifestation of their superstition. As in the case of many other Jewish practices, this superstition was constantly held in check by the more enlightened and more religious part of the nation. Besides the prohibition to "observe dreams", embodied in the Law (Lev., xix, 26; Deut., xviii, 10), the Prophets, from the eighth century B.C. onwards, repeatedly warned the people against giving "heed to their dreams which they dream" (Jer., xxix, 8). "Dreams follow many cares", says Ecclesiastes (v, 2); and Ben Sira adds that "dreams have deceived many, and they have failed that put their trust in them" (Eccles., xxvii, 7). This, according to II Par., xxxiii, 6, one of the faults which brought about the downfall of Manasseh. Above all, the Israelites were warned in every manner against trusting in the pretended dreams of false prophets. "Behold, I am against the prophets that have lying dreams, saith the Lord" (Jer., xxix, 32; cf. Zach., x, 2, etc.). From these and other indications it appears clear that the religion of Israel was kept pure from superstition connected with dreams. True, a mere glance at the respective dates of the above-quoted passages suggests that the zeal of the prophets was of little avail, at least for certain classes of people. For example, the clue given by the prophet to the "new way", in vogue down to the Exile, and even after the Restoration; but it is scarcely necessary to remark how unjust it would be to hold the Jewish religion responsible for the abuses of individual persons. Neither did there exist at any time in Israel a class of diviners making it their business to interpret the dreams of their countrymen; there were no podberim among the temple-officials, nor later around the synagogues. The few dream-interpreters spoken of in the Bible, as Joseph and Daniel, were especially commissioned by God in exceptional circumstances. Nor did they resort to natural skill or art; their interpretations were suggested to them by the Divine intellect enlightening their minds. "Interpretation belongs to God", as Joseph declared to his fellow-prisoners, and to God alone it belonged to have among the people some soothsayers ever ready to profit by the curiosity of weaker and credulous minds; but as they possessed no authority and as they were condemned both by God and by the higher religious consciousness of the community, they practised their art in secret.

That certain dreams may be caused by God seemed to be acknowledged without controversy by the early Fathers of the Church and the ecclesiastical writers. This opinion they based mainly on Biblical authority; occasionally they appealed to the authority of classical writers. Agreeably to this doctrine, it was admitted likewise that the interpretation of supernatural dreams belongs to God who sends them, and who must manifest it either to the dreamer or to an authorized interpreter. That the interpretation of the dreamer's dreams is an exceptional occurrence; dreaming, on the contrary, is a most common fact. We may inquire, therefore, how the official guardians of the Faith viewed ordinary and natural dreams. In general they repeated to the Christians the prohibitions and warnings of the Old Testament, and denounced in particular the superstitious tendency to consider dreams as omens. It may suffice in this connexion to recall the names of St. Cyril of Jerusalem, St. Gregory of Nyssa, and St. Gregory the Great, whose teaching on the
question at issue is clear and emphatic. A few, however, held opinions somewhat at variance with the traditional view. Among them the most noteworthy is Synesius of Cyrene (about 370–413), who is the author of a very strange treatise on dreams. Starting from the Platonian anthropological trichotomy, and from certain psychological hypotheses of Plato and Plotinus, he attributed to the imagination a manifestly exaggerated rôle. Above all the arts of divination, the lawful use of which he did not seem to doubt, he extolled dreaming as the simplest and surest mode of prophesying. We know that he had accepted the episcopacy only on the condition that he might continue to hold certain favourite philosophic ideas; and it is reasonable to suppose that his theories on dreams were included in the compact.

Medieval theologians added to the reasonings of their predecessors a more careful, and to some extent more scientific, study of the phenomena of sleep; but they found no reason to depart from the moral principles contained in the writings of the Fathers. Sufficient to it here to quote St. Thomas Aquinas, who summarizes the best teaching of the Schoolmen. To the query: Is divination through dreams unlawful?—he replies: The whole question consists in determining the cause of dreams, and examining whether the same may be the cause of future events, or at least come to the actual knowledge of them. Dreams come sometimes from internal, and sometimes from external, causes. The native dream was caused indirectly by the action of the soul upon the brain, inasmuch as such images remain in a sleeping man's fantasy as were dwelt upon by him while awake; the other found in the body: it is indeed a well-known fact that the actual disposition of the body causes a reaction on the fantasy. Now it is self-evident that neither of these causes has any influence on individual future events. Our dreams may likewise be caused by a two-fold external cause. This is corporeal when external agencies, such as the atmospheric conditions or others, act on the imagination of the sleeper. Finally dreams may be caused by spiritual agents, such as God, directly, or indirectly through his angels, and the devil. It is easy to conclude thence what chances there are to know the future from divination with the laws of dreams, to be unlawful (II–II, Q. 95, a. 6). Modern theologians, whilst profiting by the progress of psychological research, continue to admit the possibility of dreams supernatual in their origin, and consequently the possibility of dream-interpretation depending on supernatural communications. As to ordinary dreams, they readily grant that, because the imaginative faculties of man acquire sometimes a keenness which they do not possess otherwise, it is possible in such cases to conjecture with a certain degree of probability some future events; but in all other cases, by far the most common, it is useless and illogical to attempt any interpretation. As a matter of fact dreams are now— we speak of civilized peoples—seldom heeded; only very ignorant and superstitious persons ponder over the dictionaries of dreams and the keys to the interpretation of dreams once so much in favour. "As idle as a dream" has become a proverb expressive of the popular mind on the subject, and indicating sufficiently that there is little need nowadays to revive the laws and canons enacted in past ages against divination through dreams.

Charles L. Souvay.

Drechsel (also Drexelius or Drexeel), Jeremia, ascetic writer, b. at Augsburg, 15 August, 1581; entered the Society of Jesus 27 July, 1598; d. at Munich, 19 April, 1638. He was professor of humanities and rhetoric at Augsburg and Dillingen, and for twenty-three years court preacher to the Elector of Bavaria. His writings enjoyed an immense popularity. Chief among them are his "Considerations de l'Éternité" (Munich, 1620), of which there were nine editions; in addition to these, Leyser printed 3200 copies in Latin and 4200 in German. It was also translated into English (Cambridge, 1632; Oxford, 1661; London, 1710 and 1844) and into Polish, French, and Italian. His "Zodiakus Christianus" or "The Twelve Signs of Predestination" (Munich 1622), is another famous book, but there seems to have been an edition anterior to this; in 1642 eight such books had been printed, and the work was translated into several European languages. "The Guardian Angel's Clock" was issued first at Munich, 1622, and went through seven editions in twenty years; it was also translated extensively. "Nicetas seu Triumphata conscientia" (Munich, 1624) was dedicated to the sodalists of a dozen or more cities which he named on the title-page as "the noblest and most obedient in the same year and place: "Helvetriopium" or "Conformity of the Human with the Divine Will" came out in 1627; "Death the Messenger of Eternity" also bears the date of 1627. His fancy for odd titles shows itself in other books also. Thus there are the "Gymnasium of Patience"; "Orbis Phaeton, hoc est de universi vitis Langue". The only work he wrote in other than Latin is "Drey Dreselii, Emblemata et Schauspiele von Dresden" (Munich, 1636). He has also a "Cenaretum Poeticum"; "Rose selectissimarum virtutum"; "Rhetorica Celestis"; "Gazophylactum Christi". There are in all thirty-four such books. Other works are: "Res bellicae expeditionis Maximiliani" (1620), and some odes and sermons.

T. J. Campbell.

Dresden, the capital of the Kingdom of Saxony and the residence of the royal family, is situated on both sides of the Elbe, which is here crossed by five bridges. Including the suburbs which now form a part of it, the city contained 1 (December, 1905) 516,996 inhabitants, of whom 462,108 were Evangelical Lutherans, 2885 Evangelical Reformed, 44,079 Catholics, 3314 Jews, etc. Dresden is the residence of the vicar Apostolic for Saxony, and is the seat of the Catholic ecclesiastical administration and of the provincial synods. The principal churches were in Dresden 24 ecclesiasties, including the vicar Apostolic, who is a titular bishop, 7 rectors, 4 court preachers, and 1 military chaplain. Dresden has 6 Catholic parish churches, of which 2 are only chapels, 1 Garrison church, which is also used for Protestant worship, the church attached to St. Joseph's Institute, built in 1746, and 6 chapels. The most important of the other ecclesiasties is the community of the Prince Roccoco structures of Germany. It was built by the Italian master-builder, Gaetano Chiaveri, in the years 1739-51, for Frederick Augustus II (1733-63). The church has a finely painted ceiling, a high altar with altar-painting by Raphael Mengs, and valuable silver ornamentation; since 1823 the members of the royal family have been buried in it. The other churches should be mentioned the parish church of Dresden-Neustadt, built, 1852-53, in Romanesque style and containing finely painted windows, and the chapel in the royal palace.

The Catholic schools of Dresden consist of a pro gymnasium with 4 ecclesiastical teachers and about 70 enrolled scholars, 1 middle-class school with about 297 enrolled students, and 3 primary schools with 3300 pupils. For girls there are also St. Joseph's Institute, founded in 1746 by Maria Josepha, wife of King Augustus III, to give poor Catholic girls food, clothing, and instruction,
and the institution for noble young ladies, founded in 1761 by Freiherr von Burkersroda, in which Catholic young women of noble birth receive a home and an education. As houses of male orders are forbidden throughout Saxony, Dresden has only convents of female congregation: these are 2 houses of Grey Sisters who have charge of a hospital, St. Joseph's Institute, a home for servants, 2 kitchens for the poor, etc.; 1 convent of the Sisters of St. Charles Borromeo who conduct the Amalia home and a boarding home for working-women. Among the Catholic societies of Dresden should be mentioned: the Catholic Press Association, the Teachers' Association, 2 working-men's societies, the People's Association (Volksverein) of Catholic Germany, the journeymen's society (Gesell-
DREVES, Lebrecht BLicher, poet, b. at Hamburg, Germany, 12 September, 1815; d. at Feldkirch, 19 Dec., 1874. The famous Prussian General Blicher was his baptismal sponsor, whence his name. At fifteen he wrote German and Latin poems faultless in rhyme and metre. Four years later he submitted a good-sized volume of poems to the critical judgment of A. von Chamisso and Gustav Schwab, and both expressed favourable opinion. Blicher's work was followed shortly by a volume entitled “Lyrische Anklänge” (Lyric Melodies), and although these “melodies” were cast on the music of his favourites, Chamisso, Uhland, Heine, Rückert, Schwab, and others, they were not devoid of a sweetness all their own. His studies in jurisprudence, prosecuted during the three succeeding years and rewarded by the degree of doctor of laws, led him to the love of his favourite study of poetry. Another volume, entitled “Vigilien” (Vigils), fulfilled the earlier promises of this child-phenomenon. About this time, however, the seamy side of life presented itself to him, trouble growing apace with financial difficulties in the young lawyer’s family. Hitherto, although a strict Protestant, his leaning for religion had been summed up in the word poetry. Impending poverty destroyed this rather roseate view. His mental and bodily troubles, however, were more or less dissipated by his reception into the Catholic church on Candlemas Day, 1846. A subsequent appointment as notary raised him above immediate want. It was during these darker periods that he was most prolific as an author. In 1843 he had already published anonymously a third volume of poems “Selbtehie Lieder” (“Unpretending Lyrical Embodying his battle-songs, “Lieder eines Hanseaten”. Previous to this, when unhampere by the dread of poverty, he had written (1868) the two-act comedy “Der Lebensretter” (“The Life-Saver”) inscribing it: “A manuscript printed for (improved) private theatricals.”

The change of view involved in his conversion brought him two advantages, a loftier conception of his literary work and an enlarged circle of friends. His “Lieder der Kirche” (Church Hymns) paved his way to becoming a model translator of hymns (24 ed., 1868). He also dedicated his virile pen to the cause of religion in his native town by writing a “History of the Catholic Congregations in Hamburg and Altona.” He likewise translated the “Nachtigallen” of the Pseudo-Bonaventura and St. Rembert’s life of St. Ansar, Apostle of the North. He undertook the thankless task of editing (1867) the important sources of the history of his native city in the “Annuar Missions Hamburgensis 1589-1781”. About this time he revised and republished his own poetical works. This work, which he dedicated solely to his friend von Eichendorff, who had become his warm friend. Meantime he had become the father of a happy family, and to secure for his promising son a good education he determined to remove to Feldkirch in the Vorarlberg. To compensate for the loss of his friend von Eichendorff he gained a new one, the poet, Father Gall Morel. The most distinguished of his children is his son, Dr. G. Drevet, editor of the “Analecta hymnica mediæ aevi”, a vast collection of medieval hymnology, which has already reached its fiftieth volume.

DREVENT, Lebrecht Drevet, eua Lebensbild (Freiburg im Br., 1897); SCHEN, Dietrichsamen der Gegenwart (1903).

N. SCHEN.

DREVET Family, the, were the leading portrait engravers of France for over a hundred years. Their fame began with Pierre, and was sustained by his son, Pierre-Imbert, and by his nephew, Claude. Pierre DREVET, the elder, b. at Loire in the Lyonnais in 1663; d. in Paris, 1738, was the son of Estienne Drevet, a member of one of the great families of the Lyonnais, the Germain Audran at Lyons, continuing them with Gérard Audran in Paris. So rapid was his progress, so quickly did he imbibe and assimilate knowledge, and with such precision and delicacy did he manage the graver, that in 1690 he was made court engraver. In 1707 he was admitted to membership in the Académie des Beaux-Arts, his reception picture being an engraving of a young woman. Rigaud’s portraits were in high favour at the end of the seventeenth century and Drevet was the first to encounter and surmount the difficulties of translating into black and white the natural appearance of texture and materials which the brilliant oils readily presented. He was an excellent draughtsman, and he treated flesh and fabric with a fine shimmer of steel, with painter-like realism, surpassing all his predecessors in these effects. With all his elegance of detail he produced an harmonious ensemble, combining artistic feeling with skilful technic. Although his work with the burin was like that of the great Nanteuil, he attained a style of his own. Previous engravers sacrificed to the exigencies of religious subjects, but Drevet made everything salient, though never violently so. Always engraving after oil-paintings, Drevet was at times uneven, but this was because the originals were uneven.
THE COURT CHURCH, DRESDEN
poured in upon him faster than he could fill them, and throughout his life he had command of every important work produced in France. His engravings were mainly the portraits of distinguished people. Among his many superb plates a portrait of Colbert (1700) marks the acme of his art; and next in point of excellence come the portraits of Louis XIV and Louis XV, both after Rigaud. Other celebrated works of his are a Crucifixion, after Coret, and a portrait of Charles II of England. During the last years of his life Drevet worked with his son and they produced plates together.

Pierre-Imbert Drevet, called the Younger Pierre, was born in Paris, 1697; died there, 1739. His father, the elder Drevet, gave him such rigorous instruction that at the age of thirteen he produced a superlative plate which indicated his future eminence. At first he engraved after Lobrun, but he soon developed a style of his own, spontaneous, sincere, and brilliant. Under his facile and soft graver every detail was rendered, every shade of colour and every variety of texture. The result was always an harmonious unit. He was his father's constant companion and worked with unwearying patience with him. In 1723 Pierre-Imbert finished his portrait of Bossuet after Rigaud (see CATHOLIC ENCYCLOPEDIA, II, s. v. Bossuet), "perhaps the finest of all the engraved portraits of France" (Lippman). In 1724 the portrait of Cardinal Dubois was engraved. Both of these are treated broadly and freely, show magnificent handling of draperies, and possess exquisite finish. The great plate of Adrienne Lecourveur (1730) and that of Samuel Bernard are by many authorities ranked with the Bossuet. For Bernard's portrait Rigaud himself made the drawing, a most unusual event in eighteenth-century engraving. Besides his masterly portraits, Pierre-Imbert produced many religious and historical plates, chiefly of Coret. A sunstroke (1726) resulted in intermittent imbecility, and the talented and hardworking master—the last of the pure-line men—died thirteen years of such madness before his death. He kept on engraving, however, until the end. He was a member of the Académie de Peinture and the king assigned him apartments in the Louvre. Among his pupils were François and Jacques Chéreau and Simon Vallée.

The following are among his principal works: "Presentation of the Virgin", after Le Brun; "Presentation in the Temple", after L. Boullongne; portraits of the Archbishop of Cambrai (after Vivien); and René Pucelle, his last work, after Rigaud.

Claude Drevet, a French engraver, b. at Lyons, 1705; d. in Paris, 1782. He was a nephew and pupil of Pierre the Elder and at first followed the traditions of the two Pierres, forming about him a coterie of engravers who endeavoured to keep alive their great traditions. Later he became very hard and precise with the graver, and his work lost all its artistic and painter-like quality, everything being sacrificed for a brilliant technic. Nevertheless, many of his plates possess great charm and delicacy. Claude seemed indifferent to his art and produced but little compared with the other members of the family. When Pierre-

Inbert died, his rooms in the Louvre were given to Claude, who proceeded to squander nearly all the money left him by his uncle and his cousin.

He engraved portraits of Henri Oswald, Cardinal d'Avouergue, after Rigaud, and of De Vintimille, Archbishop of Paris, also after Rigaud.

Drexel, Francis Anthony, banker, b. at Philadelphia, U. S. A., 20 June, 1824; d. there 15 Feb., 1885. He was the oldest son of Francis Martin Drexel, a Tyrolean by birth, and by profession a portrait-painter and musician, who in 1837 turned his attention to finance, and founded the house of Drexel & Co. in Philadelphia with connections with the firms of J. S. Morgan & Co. of New York, and Drexel, Harjes & Co. of Paris. Associated with him were his sons Francis Anthony, Anthony Joseph, and Joseph William. Francis Anthony began his financial career at the age of thirteen, and at his father's death in 1853 became the senior member of the firm, and was the head of the house for nearly thirty years. The house of Drexel & Co. was in the public estimation unalterably associated with the strictest integrity and the most broadminded liberality. At critical periods it came generously to the support of the public credit. Francis A. Drexel's growing fortune did not alienate him from religion or harden his heart against the appeals of charity. He remained to the end poor in spirit, and regarded his vast wealth merely as a Divinely lent instrument for doing good. In his exercises of piety and his copious distribution of charities, he was ably seconded by his second wife, Emma Bouvier Drexel, who died before him. His children by his first wife, who was Hannah J. Langstroth, were Elizabeth, who died 26 September, 1860, and was the wife of Walter George Smith, of Philadelphia, and Katharine, who entered religion and founded the congregation of the Sisters of the Blessed Sacrament for Indians and Coloured People (see CATHOLIC ENCYCLOPEDIA, II, p. 589). Another daughter, Louise, wife of Edward Morrell, was the only child of his second marriage.

In his will Mr. Drexel followed the Biblical injunctions of bequeathing a tithe ($1,500,000) of his great estate to religious and charitable purposes, with the further proviso that in case his daughters should not marry, the entire estate should be distributed among the institutions specified in the will. His daughters continued to walk in the footsteps of their father. Among their own benefactions, Mrs. Smith and Mrs. Morrell founded the St. Francis Industrial School at Eddington, Pennsylvania. The Francis A. Drexel Chair of Moral Theology in the Catholic University of America was founded by his daughters in honour of Mr. Drexel.

Drey, Johann Sebastian von, professor of theology at the University of Tübingen, b. 16 Oct., 1777, at
Killingen, in the parish of Rödingen, in the then ecclesiastical principality of Ellwangens; d. 19 Feb., 1853. The parish priest of Rödingen, an ex-Jesuit, noting the boy's talents, instructed him in the elements of Latin, and persuaded his parents to send him, in 1787, in spite of their extreme poverty, to the gymnasium of Ellwangens. There he lived partly on the charity of the townsmen and partly by tutoring, especially in Latin, mathematics, and physics. He studied theology, 1797–1799, at Augsburg; after 1799 he lived in the diocesan seminary at Pfaffenhausen and was ordained in the summer of 1801. During his five years as assistant in his native place, Drey studied the then paramount philosophy of Kant, Fichte, and Schelling, and the philosophical erudition which he acquired in this study appears clearly in his scientific works. His position, from 1806, as professor of philosophy of religion, mathematics, and physics in the Catholic academy of Rottweil, formed a good preparation for his subsequent academic career. When in 1812 King Frederick I of Württemberg founded the University of Ellwangens as a Catholic national university for his recently acquired Catholic territory, Drey was called to lecture there on dogmatics, history of dogma, apologetics, and introduction to theology. There he published two Latin dissertations: "Observationes quaedam in illustrandam Justini M. de regno millenario sentimentum" (1814), and "Dissertatio historico-theologica originem et viessitudinem exomologosceos in ecclesiâ catholicae ex documentis ecclesiasticiis illustrans" (1815), the latter of which was denounced to Rome, but without serious consequences for its author, at least for the time being. When King William I (1817) incorporated the University of Ellwangens with the old national University of Tübingen as its Catholic faculty of theology, Drey with his colleagues, Gratz and Herbst, joined the staff of the new school and founded (1819), together with them and his new colleague, Hirscher, the "Theologische Quartalschrift" of Tübingen, all of whom took an active part in its publication and wrote for it a number of essays and reviews. In the same year he published: "Kurze Einleitung in das Studium der Theologie mit Rücksicht auf den wissenschaftlichen Standpunkt und das katholische System" 1. An effort to make Drey first bishop of the newly founded Diocese of Rottenburg failed, among other reasons because of the court with which he was regarded in Rome owing to his above-named work on confession. Somewhat as a recompense the first position at the cathedral was reserved for him, which, however, he never filled. In 1832 appeared his "Neue Untersuchungen über die Konstitutionen und Kanones der Apostel"; a work of such thoroughness that only recently have the opposite parts of the question been able to have gone beyond it. After convalescing from a severe illness, he was relieved from his office as teacher of dogmatic theology (1838). Just then his principal work, in three volumes, appeared: "Die Apologetik als wissenschaftliche Nachweisung der Gottliebigkeit des Christentums in seiner Erscheinung" (1838–1847). Still comparatively robust, though well advanced in years, Drey was pensioned in 1846, almost against his will; he continued, however, to write for Wetzer and Welte's "Kirchenlexikon" and for the "Theologische Quartalschrift" of Tübingen. With Möhler, Drey was the founder of the so-called Catholic School of Tübingen. Like Möhler, Hefele, and von Funk, he was a truly critical historian. But Drey also gave to the systematic theology of this school its peculiar stamp, equi-distinct from Traditionalism and Rationalism, recognizing on the one hand the objective facts in the history of Revelation and the tradition from generation to generation, maintaining on the other the rights of our natural reason and of philosophical speculation, with all due loyalty to dogma. Kuhn and Schanz faithfully followed in the path marked out by Drey.

Dromore, Diocese of (Dromorensis, and in ancient documents Dromomensis), one of the eight suffragans of Armagh, Ireland. It includes portions of the counties of Down, Armagh, and Antrim, and contains eighteen parishes, of which two, Newry and Clonallon, are mesenal parishes. It takes its name from Dromore (Dram Mor, great ridge), a small town in the north-west of County Down, sixty-three miles north of Dublin, twenty-five miles east of Armagh, and fourteen miles south-west of Belfast, which is built on the same river, the Lagan. The See of Dromore was founded in the sixth century by St. Colman (called also Moncholme), one of the thirty holy men (more than a hundred) bearing that name in the calendars of Irish saints. From a prophecy said to have been uttered by St. Patrick sixty years before, Archbishop Healy ("Life and Writings of St. Patrick", p. 494) infers that St. Patrick claimed no immediate spiritual jurisdiction over the territory of Iavegh which forms mainly the Diocese of Dromore, but willed that territory to be reserved for a bishop of the native race of Dal-Araide—namely, St. Colman, who founded his see there about the year 514, some sixty years after St. Patrick founded the See of Armagh. Dromore has had its own independent jurisdiction ever since. The old cathedral of Dromore, which had been taken by the Protestants, was burnt down by the Irish insurgents in 1641, and rebuilt by Bishop Taylor twenty years later; but it has been far surpassed by the Catholic church recently erected. The cathedral, however, was transferred some two hundred years ago to Newry, the largest town of County Down, and a place of great historical interest, situated at the head of Carlingford Lough. In this town, when the severity of the Penal Laws began to relax, in the latter half of the eighteenth century, the Catholics built in a retired suburb a very plain church which is still in use; but just before Catholic Emancipation an edifice worthy of the name of cathedral was begun in 1825 and completed by Dr. Michael Blake (1833–1860).
who had been Vicar-General of Dublin and the restorer of the Irish College at Rome. This cathedral was greatly enlarged and beautified by Bishop Henry O'Neill, who succeeded Bishop McGovern in 1901.

Under Dr. McGovern's predecessor, Dr. John Pius Leychy, C.B. (1854-1910), a Latinian priory was founded on the Armagh side of Newry, and a very handsome church erected. The Poor Clares, who went to Newry from Harold's Cross, Dublin, in 1830, were for many years the only nuns north of the Boyne. The Sisters of Mercy founded a convent at Newry in 1855, and have now flourishing establishments in Lurgan, Rostrevor, and Warrenpoint. There is a large diocesan college at Veil Hall near Newry which is under the patronage of St. Colman. To this patron saint of the diocese and its first bishop, besides the church at Dromore already referred to, are also dedicated the parish churches at Tullyliss, Kilvarlin, in the parish of Magheralin, and Bannmee near Rathfriland in the parish of Drumgath. Few ecclesiastical antiquities have survived the ravages of time, war, and heresy. Abbey Yard in Newry marks the site of the Cistercian abbey founded in the year 1114 by St. Bernard's friend, St. Malachy O'Morgair, and endowed in 1157 by Maurice O'Loughlin, King of All Ireland. It is called in the annals Monasterium de Viridi Ligno—a name given to Newry from the yew-tree said to have been planted there by St. Patrick, the Irish Saint, who spent many years (some say a very long time, "the yew at the head of the strand") which is latinated Ivorium or Nevouacum, but more commonly as above Viride Lignum. There are the ruins of an old church half a mile east of Hilltown. In the adjoining parish of Kilbroney (church of St. Bronach, a virgin saint of the district) half a mile north-east of Rostrevor is a graveyard with the venerable ruins of a church, the altar of which is on the western side of St. Brigid's well. Imbedded in a tree in this graveyard, a very antique bell was found about a hundred years ago and is now carefully preserved.

The first Protestant Bishop of Dromore was John Tod, on whom it was bestowed in commendaum in 1606, while he was at the same time Bishop of Down and Connor. It was an unfortunate beginning, for the Puritans in the following years (1641 and 1642) invaded the diocese and degraded for incontinence and poisoned himself in prison at London. Two of his successors distinguished themselves more creditably: Jeremy Taylor, who was bishop of these three dioceses from 1661 to 1667, an eloquent preacher and a writer of genius, and Thomas Percy, Bishop of Dromore from 1782 to 1811, whose "Reliques of Ancient Poetry" was a great and enduring influence on English literature.

There are 18 parishes, 42 churches, and 53 priests, a diocesan seminary and a convent of Dominicans at Newry; also 5 convents of Sisters of Mercy, one of Poor Clares, and a college of the Christian Brothers (Newry). The Catholic population is (1908), 13,014; non-Catholic, 71,157.

Drostan. (Drostan, Dustan, Throstan), Saint, a Scottish abbot who flourished about A. D. 600. All that is known of him is found in the "Breviary Aberdonense" and in the "Book of Deir", a ninth-century MS, now in the University Library of Cambridge, but these two accounts do not agree in every particular. He appears to have belonged to the royal family of the Scotti, his father's name being Coegmen. Showing signs of a religious vocation he was entreated at an early age to the care of St. Columba, who trained him and gave him the monastic habit. He accompanied that saint when he visited Aberdeen (Aberdeen) in Buchan. The Pictish ruler of that country gave them the site of Deir, fourteen miles farther inland, where they established a monastery, and when St. Columba returned to Iona he left St. Drostan there as abbot of the new foundation. On the death of the Abbot of Dalquhongale (Holywood) some few years later, St. Drostan was chosen to succeed him. Afterwards, feeling called to a life of greater seclusion, he resigned his abbacy, went farther north, and became a hermit at Glenesk. Here his sanctity attracted the poor and needy, and many beggars were admitted to him, including the restoration of sight to a priest named Cyprian. After his death his relics were transferred to Aberdeen and honourably preserved there. The "Breviary of Aberdeen" celebrates his feast on 15 December. The monastery of Deir, which had fallen into decay, was rebuilt for Cistercian monks in 1213 and so continued until the Reformation.

DROSTAN, Hist, Eccl. Gent, Scot. (Edinburgh, 1829); Brevi- arium Aberdonense (London, 1854); INNES, Scotland in the Mid- dle Ages (Edinburgh, 1860); FORBES, Calendar of Scottish Saints (Edinburgh, 1873); DAMMKE in Diet. of Christ. Biog. (London, 1877).

Droste-Vischering, Clemens August von, Archbishop of Cologne, b. 21 Jan., 1773, at Münster, Germany; d. 19 Oct., 1845, in the same city. Besides attending the University of Münster, he had as private tutor the well-known church historian Theodor Katerkamp (d. 1834). At an early age he was introduced into the circle of learned men that gathered round the court of the ruling Elector of Cologne, Count of Berg, and refined Princess Amelia von Gallitzin, where he imbued the thoroughly Catholic principles which characterized him while Archbishop of Cologne. After completing his studies he began, in June, 1796, an extensive educational journey under the direction of Katerkamp, through Germany, Switzerland, and Italy, returning to Münster in Aug., 1797. The following year he was ordained priest, his brother Caspar Maximilian, then Auxiliary Bishop of Münster. In accordance with the wish of the aged Baron von Fürstenberg, Vicar-General and Administrator of the Diocese of Münster, the cathedral chapter elected Clemens August as his coadjutor on 18 Jan., 1807, and when Fürstenberg resigned six months later, Clemens August was elected by a great and enduring influence on English literature.

He was ordained priest, his brother Caspar Maximilian, then Auxiliary Bishop of Münster. In accordance with the wish of the aged Baron von Fürstenberg, Vicar-General and Administrator of the Diocese of Münster, the cathedral chapter elected Clemens August as his coadjutor on 18 Jan., 1807, and when Fürstenberg resigned six months later, Clemens August was elected by a great and enduring influence on English literature.

When he was ordained priest, his brother Caspar Maximilian, then Auxiliary Bishop of Münster. In accordance with the wish of the aged Baron von Fürstenberg, Vicar-General and Administrator of the Diocese of Münster, the cathedral chapter elected Clemens August as his coadjutor on 18 Jan., 1807, and when Fürstenberg resigned six months later, Clemens August was elected by a great and enduring influence on English literature.

Under Prussian rule the administrator repeatedly came into conflict with the Government on account of his attitude towards mixed marriages and the supervision of theological studies. When by an agreement between the Holy See and the Prussian Government the diocesan colleges in the diocese were again supplied with bishops, Clemens August, who was not persona grata to the Prussian Government, withdrew from public life and devoted himself to works of piety and charity. He remained in seclusion even after being consecrated Auxiliary Bishop of Münster with the titular See of Calama in 1827.

After the death of Baron von Spiegell, the incumbent of the metropolitan See of Cologne, the Prussian Government, to the surprise of Catholics and Protestants alike, desired Clemens August as his successor.
This unexpected move on the part of the Government was intended to conciliate the Catholic nobility of Westphalia and Rhenish Prussia as well as the Catholic clergy and laity, who began to lose confidence in the fairmindedness of the Government and justly protested against the open favouritism shown to Protestants in civil and ecclesiastical affairs. The cathedral chapter of Cologne, which had always been accustomed to act as a check on Government influence in the hands of the Government, elected Clemens August as Archbishop of Cologne on 1 Dec., 1835. He received the papal confirmation on 1 Feb., 1836, and was solemnly enthroned by his brother, Maximilian, Bishop of Münster, on 20 May. Soon after this he came into conflict with the adherents of Hermes (d. 1831), which was an innovatory tendency carried forward by the former Archbishop, and he was publicly denounced by Pope Gregory XVI on 26 Sept., 1835. When many professors at the University of Bonn refused to submit to the papal Bull, Clemens August refused the imprimatur to their theological magazine, forbade the students of theology to attend their lectures, and drew up a list of anti-Hermesian theses to which all candidates for sacred ordination and all pastors who wished to be transferred to new parishes were obliged to swear adherence. The Government was angered because the archbishop had enforced the papal Bull without the royal approbation, but gave him to understand that it would allow him free scope in this affair, provided he would accede to its demands concerning mixed marriages. Before Christmas von Spiegel and Minister Bunsen drew up a protocol which had been condemned by Pope Gregory XVI on 26 Sept., 1835, as an agent of the Government whether, if he should be set free on 22 April, 1839. He was permitted to retain the title of Archbishop of Cologne, but, in order to uphold the authority of the State in the public eye, was prevailed upon to select a coadjutor in the person of Johann von Geissel (q. v.), Bishop of Speyer, who henceforth directed the affairs of the archdiocese. The slanderous accusations of the above-mentioned "Darlegung" were publicly retracted by Frederick William IV, 15th March, 1839, and the Archbishop was thus enabled to continue his work of upholding the rights of Church and State entitled "Lieber den Herrn der Kirche und den Staaten", published at Münster in 1843.

Druidism.—The etymology of this word from the Greek ὄξεως, "oak", has been a favourite one since the time of Pliny the Elder; according to this the Druids would be the priests of the god or gods identified with the oak. It is true that the oak plays an important part in their worship, and that it was the sacred tree of a number of Aryans of Europe, and this etymology is helped out by the Welsh word for druid, viz. derwedd. But there is a difficulty in equating the synonymous Irish draoi and Welsh derwedd. Probably the best-substantiated derivation of the word is from the root vid, "to know", and the intensive prefix dru. According to this etymology, the Druids would be the very wise and learned ones. But this is a pure conjecture, and it has been surmised that the word as well as the institution was not of Celtic origin. Although the Druids are mentioned with more or less fullness of account by a score of ancient writers, the information to be derived from their statements is very meagre, and very little of it is at first hand. Even Cesar, who probably came in more contact with the Druids than any other writer, does not seem to speak of the Druids of his time in particular, but of the Druids in general. With the ancient writers the word druid had two meanings: in the stricter sense it meant the teachers of moral philosophy and science: in the wider sense it included the priests, diviners, judges, teachers, physicians, astronomers and philosophers of a class apart and kept the people, who were far inferior to them in culture, in subjection. They were regarded as the most just of men, and disputes both public and private were referred to them for settlement. Thus their influence was much more a social than a religious one, in spite of the common opinion that they were exclusively a priestly order. These Druids had certain privileges, such as exemption from military service and the payment of taxes; and the ancient authors are unanimous in speaking of the great honours which were shown them.

Above all, the Druids were the educators of the nobility. Their instruction was very varied and extensive. They taught the alphabet, grammar, philosophy, arithmetic, algebra, astronomy, and religion. They improved the course of the Archbishops of Cologne and solemnly protested against the action of the Government. The slanderous "Darlegung", or exposé, in which the Government attempted to defend its course by accusing the archbishop of treason, was refuted by Joseph Görres in his great apologetical work "Athanasius", and a declaration of the true state of affairs was published at Rome by order of the pope. The Government saw its mistake and the archbishop was
Mela is the first author who says that their instruction was secret and carried on in caves and forests. It is commonly believed that the druids were the stubborn champions of Gaulish liberty, and that they took a direct part in the government of the nation, but this is an hypothesis which, however probable, is not supported, for the early period at least, by any text or by the statement of any ancient author. "The principal point of their doctrine," says Caesar, "is that the soul does not die and that after death it passes from one body into another." But, as is well known, the belief in the immortality of the soul was not peculiar to the teachings of the philosophers of Gaul. Just what was the nature of that second life in which they believed is not quite clear. Some of the Greek authors, struck by the analogy of this doctrine with that of Pythagoras, believed that the druids had borrowed it from the Greek philosopher or from one of his disciples. The practice of human sacrifice, which has often been imputed to the druids, is now known to have been a survival of a pre-druidic custom, although some members of the druidic corporation not only took part in, but presided at, these ceremonies. Nor has it been proved that the druids had gods of their own or had introduced any new divinity or rites into Gaul, with the exception perhaps of the Dispater, who, according to Caesar, was regarded by the druids as the head of the nation, and who may have owned his origin to their belief. The druids, in addition to teaching, which was their most important occupation, seem to have been content to preside over the traditional religious ceremonies and to have acted as intermediaries between the gods, such as they found them, and men. It is certain that they had a philosophy, but it is very unlikely that their doctrines had penetrated into the great mass of the population.

Although the only positive information we possess on the druids is to the effect that their institution existed in Gaul and Britain between the years 53 B.C. and A.D. 77, there is evidence to show that it must have existed from a much earlier time and lasted longer than the limits fixed by these dates. It seems reasonable to suppose that the influence of the druids was already at its decline when Caesar made his campaigns in Gaul, and that to them was due the civilization of Gaul in the fifth and fourth centuries B.C. We may affirm that references to the druids and signs of the existence of their institution, in the germ at least, are found which would date them as early as the third century B.C. With the Roman conquest of Gaul the druids lost all their jurisdiction, druidism suffered a great decay, and there is no reason to believe that it survived long after A.D. 77, the date of the last mention of the druids as still in existence. The opening of the schools of Marseilles, Bordeaux, and Lyons put an end to their usefulness as teachers of moral philosophy; and if some of them remained scattered here and there in Gaul, most of them were obliged to emigrate to Britain. The Emperors Tiberius and Claudius abolished certain practices in the cult of the druids, their organization, and their assemblies, but their disappearance was gradual and due as much to the romanization of the land as to any political measure or act of violence or persecution on the part of Rome. Yet there can be no doubt that Rome feared the druids as teachers of the Gallo-Roman youth and judges of trials. In Gaul in the third century of the Christian Era there is mention of women who predicted the future and were known as druidesses, but they were merely sorcerers, and we are not to conclude from the name they bore that druidism was still in existence at that late date. According to Caesar, it was a tradition in Gaul in his time that the druids were of British ori-
gin and that it was to Great Britain that they went to make a thorough study of their doctrine, but the authors of antiquity throw very little light on the institution and practices of Druidism in the island of Britain.

Our information concerning the Druids of Ireland is drawn from what the Christian hagiographers have written of them and what can be gathered from the scattered references in the epic literature of Ireland. We have only fragmentary notices of the matter of their teachings, but it is clear that there were the most striking resemblances between the Druids of Ireland and those of Gaul. In both lands they appear as magicians, diviners, physicians, and teachers, and not as the representatives of a certain religion. In the sense that Gauls they appeared as adherents of the service of kings, who employed them as advisers because of their power in magic. In the exercise of this they made use of wands of yew, upon which they wrote in a secret character called ogham. This was called their "keys of wisdom." In Ireland, as in Gaul, they enjoyed a high reputation for learning, and some Irish Druids held a rank even higher than that of the king. But they were not exempt from military service nor do they seem to have formed a corporation as in Gaul. In the earliest Christian literature of Ireland the Druids are represented as the bitterest opponents of Christianity, but even the Christians of the time seem to have believed in their supernatural power of prophecy and magic. The principal thesis of Alexander the Great's book on the origin of the Druids is that Druidism was not an isolated institution in antiquity, without analogy, but that its parallel is to be looked for in the lamaseries which still survive in Tibet.

He maintains that great Druidic communities flourished in Gaul, Britain, and Ireland many centuries before the Christian Era, and that the same Gauls of Ireland they were as much esteemed by the Eastern monks as by the Western monks. In this way he would explain the literary and scientific superiority of the monasteries of Ireland and Wales in the early Middle Ages. However ingenious and attractive this hypothesis may be, it is not supported by any historical documents, and many negative arguments might be brought to bear against it. JOSEPH DUNN.

Druillettes (of Druillettes), Gabriel, missionary, b. in France, 29 September, 1610; d. at Quebec, 8 April, 1681. Druillettes entered the Society of Jesus at Toulouse, 28 July, 1629, and went to Canada in 1643. After studying the Algonquin tongue, he accompanied the Indians on their winter hunting expeditions, sharing in all their privations. Parkman calls attention to the extraordinary piety of those Montagnais, who were mostly Christians, as well as to the great sufferings undergone by the missionary. On the same day that Jogues was sent to the Mohawks, 29 June, 1642, Druillettes was given a mission among the Abnaki, on the Kennebec. He ascended the Chaudière, reached what is now Moosehead Lake by portage, and then entered the Kennebec. Continuing down the river he arrived at the English post of Cowancou, now Augusta, where he met the agent, John Winslow, who became his life-long friend. From Cowancou he journeyed on until he reached the sea and then travelled along the coast as far as the Penobscot, where he was welcomed by the Capuchins who had established a mission there. Druillettes was the first white man to make this remarkable journey from the St. Lawrence. Retracing his steps, he established a mission on the Kennebec about a league above Cowancou. Subsequently it grew into the famous Norridgewock, where Father Rastel was slain. He returned to Quebec in June, but as the Capuchins considered that the entire district of Maine was under their jurisdiction, the Jesuits resolved to abandon the mission. In 1648, however, both the Capuchins and Abnaki asked Druillettes to return. But he did not resume his work until 1650, and when he left Quebec the second time he returned as envoy of the Capuchins to negotiate a treaty at Boston with the Puritans of New England for commercial purposes, as well as for mutual protection against the Iroquois. He was received with great kindness by the principal men in the English colonies, notably by the famous missionary John Eliot, and by Major-General Gibbons, who kept him at his house. Druillettes speaks in the highest terms of Eliott, saying that the English were as remarkable for the care they took of the Indians as they were for their treatment of their prisonners of war, and that the English people were more religious than the French people. He returned to the Kennebec in January, and in the following June was again sent as French commissary to attend a meeting of the representatives of the English colonists at New Haven, September, 1651. Failing to induce the deputies to make a treaty, he resumed his labours among the Abnaki, returning finally to Quebec in March, 1652.

After this date he laboured among the Montagnais Indians, and at Sillery and Three Rivers. In 1658 he embarked with Father Garreau on an Indian flotilla to go to the Ottawa near Lake Superior; but the party was attacked near Montreal, Garreau was slain, and the expedition soon after was abandoned. Druillettes and Father Dablon then started to reach the North Sea. In 1660 they paddled up the Saguenay, reached Lake St. John and continued their course up a tributary, which they called the River of the Blessed Sacrament, finally coming to Nekouba, which was twenty-nine days from Tadoussac. As the Indians refused to go any farther north and the course of the river had also been abandoned, Druillettes returned to Quebec. In 1670 he was at Sault Sainte Marie and was one of those who participated with Alonze and Marquette in the famous "taking possession" of the country by Saint-Lusson in May, 1671. He laboured chiefly among the Mississaugas, besides attending to other dependent missions towards Green Bay. Druillettes was regarded as a man of great sanctity, and miracles are attributed to him. He was remarkable for his knowledge of the Indian languages, and Marquette, before going West, was sent to study Algonquin under his direction at Three Rivers. His work among the Indians extended over a period of thirty-eight years. There is a great diversity in the spelling of his name; Charlevoix writes it Druillettes. He is also called Druillettes and even Brouilettes.

T. J. CAMPBELL.

Drumgoole, John C., priest and philanthropist, b. at Granard, Co. Longford, Ireland, 15 August, 1816; d. in New York, 28 July, 1881. He emigrated to New York in 1824, and to support his widowed mother worked as a shoemaker. His piety and zeal attracted the notice of the pastor of St. Mary's church who made him the sexton of that parish in 1814. He had always cherished an aspiration to study for the priesthood, and to provide the means for this and to maintain his mother. In 1863 he left St. Mary's to carry out his intention of entering the seminary; after making preliminary studies at St. Francis Xavier's and St. John's Colleges, he was admitted as an ecclesiastical student at the seminary of Our Lady of Angels, Suspension Bridge, New York, in 1865. He was ordained priest there 21 May, 1869, and assigned as an assistant at St. Mary's, where he had formerly been sexton.
From here he was appointed to take charge of a lodging-house for boys which the St. Vincent de Paul Society had opened some time previously. The caring for homeless and destitute children appealed to him specially, and he volunteered to take up the direction of this work which had languished until then. Under his sympathetic care and prudent management success was at once assured. He started St. Joseph's Union for the support of the institution and soon extended its membership all over the world. The first location of the lodging-house became inadequate to the needs and he purchased land at Great Jones Street and Lafayette Place and built an imposing structure which as the Mission of the Immaculate Virgin in December, 1851. In the following year a farm was bought on Staten Island, and Mount Loreto, the country-place of the Mission, where trade schools and other buildings were built, their care being given to a community of Franciscan Sisters. These buildings cost more than a million dollars and were large enough to care for 2000 destitute children annually; at his death, which occurred after a very short illness, Father Drumgoole left them entirely free of debt. He accomplished all this without any great personal talents apart from a simplicity and earnestness of charity that won him friends everywhere. He had singular success in organizing, and he liked the great prototype, Don Bosco, he believed and said that it was all due to his rule: "in looking after the interests of the child it is necessary to cultivate the heart."

Bede Camm

John C. Drumgoole

Drury, Robert, Venerable, Martyr (1567-1607), was born of a good Buckinghamshire family and was received into the English College at Reims, 1 April, 1588. On 17 September, 1590, he was sent to the new College at Valladolid; here he finished his studies, was ordained priest and returned to England in 1593. He laboured chiefly in London, where his learning and virtue made him much respected among his brethren. He was one of the opponents against the archbishop Blackwell, and his name is affixed to the appeal of 17 November, 1600, dated from the prison at Wisbech. An invitation from the Government to these priests to acknowledge their allegiance and duty to the queen (dated 5 November, 1602) led to the famous loyal address of 31 January, 1603, drawn up by Dr. William Bishop, and signed by thirteen of the leading priests, including the two martyrs, Drury and Cadwaller. In this address they acknowledged the queen as their lawful sovereign, repudiated the claim of the pope to release them from their duty of allegiance to her, and expressed their abhorrence of the forcible attempts already made to restore the Catholic religion and their determination to reveal any further conspiracies against the Government which should come to their knowledge. In return they ingenuously pleaded that as they were ready to render to Caesar the things that were Caesar’s, so they might be permitted to yield to the successor of Peter that obedience which Peter himself might have claimed under the commission of Christ, and so to distinguish between their several duties and obligations as to be ready on the one hand "to spend their blood in defence of her Majesty", but on the other "rather to lose their lives than infringe the lawful authority of Christ’s Catholic Church". This bold repudiation of the pope’s depos-
suaed a Jewess, who had shown attachment to her religion, to be divorced from her husband and marry a pagan, the unscrupulous governor had recourse to the arts of a Jewish magician from Cyprus whose name, according to some MSS. of Josephus, was Atomas, according to others, Simon. The ill-advised Drusilla was persuaded to accede to the solicitation of Felix. She was about twenty-two years of age when she appeared at the side of the latter, during St. Paul's captivity at Caesarea (Acts, xxiv, 24-25). Like her husband, she must have listened with terror as the Apostle "treated of justice, and chastity and of the judgment to come". It is said that during the reign of Titus a son of Felix and Drusilla perished together with his wife in the eruptions of Vesuvius. But there is no information about the life of Drusilla herself after the scene described in Acts.

W. S. Reilly.

Drusipara, a titular see in Thrace Prima. Nothing is known of the ancient history of this town, which, according to Ptolemy, III, 11, 7, and Itiner. Anton., was situated on the route from Adrianople to Byzantium. Under Maximian, St. Alexander suffered martyrdom there (Acta Sanct., May, III, 15). In the time of Emperor Mauritius the city was captured by the Khaids and destroyed. The church and the relics of the martyr (Theophyl. Simocatta, VII, 14, 15). Drusipara was at first an episcopal see, suffragan of Heraclea (Lequien, Or. Christ., I, 1131, etc.); in the eighth and ninth centuries it became an independent archbishopric, which must have been suppressed during the Bulgarian invasions. In two Notitiae Episcopatuum of S. Meinardus (a. d. 1885) and Drusipara appears as the last name of Drusipara; at Mesene in 1453 died the wife of the famous Grand Duke Notaras (Ducas, Hist. Byz., IV, 42). Mesene is to-day a little village, with 500 inhabitants, east of Karish torn in the velayet of Adrianople.

S. Petriides.

Druys (Lat. DRUSUS), JEAN, thirtieth Abbot of Pare near Louvain, Belgium, b. at Campthel, near Tirlemont; d. 25 March, 1635. He studied successively at St-Trond, Liège, Namur, and Louvain, and entered the Norbertine Abbey of Pare in 1587. Ordained priest, he was sent to the Norbertine College at Louvain and obtained his licentiate in 1595. Recalled to the abbey, he was made sub-prior and professor of theology to the young religious at the abbey, chaplain to Abbot Ambrose Loots at the Refuge, which the abbey possessed at Brussels during the troublous times at the end of the sixteenth century, and at the death of Abbot Loots his successor. Four years later he was appointed vicar-general to the Abbot-General of Prémontré, and was later named Archbishop of Brussels and abbot of the privy council. The University of Louvain having suffered much from the religious and political disturbances of the time, Druys was appointed, with a layman, visitor to the university, with full power to reform abuses, a task which was not completed until 1617. He was also made visitor to the University of Douai, 1616, and to the Colleges of the Congregation of Treint, 1618. In addition he restored and enlarged his own abbey, which had suffered much from the vaudism of the soldiers, and provided better educational advantages for his religious. At the general chapter held at Prémontré in 1628, Abbot Druys was commissioned to revise the statutes of the order and conform them to the prescriptions of the Council of Trent, a task which was approved at the general chapter of 1630. Druys prefixed a prologue, "Prefatio ad omnes candidissimi et canonici ordinis religiosos", which Foppens characterizes as longam, piam, erudidam. He had a tree of the saints of the order made by the skilful engraver, C. Mallery. He also published a small work entitled "Exhortatio ad candidi ordinis religiosos", Abbot Druys was appointed by the general chapter of 1630 to bring back several abbeys of Spain into union and observance, but was unsuccessful. While on this mission he conferred with Phillip IV on the sad state of affairs in Brabant. A ring presented to him by this monarch is preserved at Parc, as is also a letter from Henrietta Maria, Queen of England.

Martin Geudens.

Druzbicki, Gaspard, ascetic writer, b. at Sieradz in Poland, 1589; entered the Society of Jesus, 20 August, 1600; d. at Posen, 2 April, 1662. After some years of teaching he became master of novices, and subsequently rector of the colleges of Kalisz, Ostrog, and Posen. He was twice provincial and was in the seventh and tenth general congregations. He published all his works under the name of 'Pseudomus' and have been drawn from his "Opera Asecta". It has been found impossible to arrange them in chronological order. Among them are a brief defence of the Society against a writer in the Caecew Academy (1632); books of meditations on the Life and Passion of Christ, some in Polish, some in Latin; "The Tribunal of Conscience", translated into English for the "Quarterly Series", edited by the English Jesuits (London, 1885); and "Provisiones Senectutis" (Inigoletz, 1732). There are also "Considerations for Every Sunday and Feast of the Year" (Kalisz, 1679); "The Sacred Heart, the Goal of Hearts" (Angers, 1683), translated for the English "Messenger"; probably by Father Digan (1680); "Exercitationes pro Novice" (Prague, 1687); "Religious Vows" (Posen, 1690), translated into Spanish and found in the Library of Guadalajara, Mexico; "Solid Jesuit Virtue" (Prague, 1696); "Lapis Lydus" (Mainz, 1783), translated into French by the Redemptorist Father Ratti (Paris, 1866) and into German by the Benedictine Gütbrabier (Salzburg, 1740). A complete list of Druzbicki's works occupies three columns in Sommervogel's Catalogue.

De Backer, Bibl. de l'éc. de J., 1, 469-64, III, 2149; Sommervogel, Bibl. de la c. de J., 3, 212.

T. J. Campbell.

Druzes, a small Mohammedan sect in Syria, notorious for their opposition to the Maronites, a Catholic people dwelling on the slopes of the Lebanon. Their name is derived as a plural from Dorazy, the proper name of a Persian at the court of El Hakim in Egypt (about a.d. 1015). They subsequently repudiated all connexion with this Mohammed Ibn Ismail el-Dorazy, and, styled themselves Unitarians or Mawhakis on account of the emphasis they lay on the unity of God. Their history begins with the arrival of Dorazy in the Wady el-Teim after his flight from Egypt. This Persian had had the audacity to read to a large multitude gathered in a mosque a book tending to prove that El Hakim, the mad Fatimite caliph, was an incarnation of God. Escaping from the crowd, who were enraged at this blasphemy, he fled to the valley between Hermon and the Southern Lebanon, and with the support of his master preached his doctrine to these mountaineers, already given to Batenite doctrines and therefore predisposed to accept a further incarnation of the Deity. He was soon superseded by another Persian, Hamzeh Ibn Ahmed El Hady, who became the real founder of the sect and the author of its sacred books. After the assassination of El Hakim, Hamzeh wrote a treatise to prove that El Hakim had not really died but only disappeared to test the faith of his followers. This disappearance and ulti-
mate return of El Hakim are cardinal points of the Druze faith to-day. The sacred books of the Druzes, successfully hidden from the world for eight centuries, have since the middle of the last century found their way into European libraries. They are written in Arabic and affect the style of the Koran. They consist of six volumes containing 111 treaties of a controversial character or explanatory epistles to individual persons. Each book takes its name from its first treatise. Their speculations strongly reflect their Persian origin.

The Druze doctrine concerning God is characterized by its abstraction from all Divine attributes; these attributes, if declared, would imply limitation in the Supreme Being. God, however, manifested Himself first in the Universal Mind, then in the Universal Soul, and again in the Word. These three form the first great manifestation. The second great manifestation began with the residence of the Universal Mind in Adam for a thousand years; after which Eloch took his place, and in turn was followed by the Seven Ministers, Noe, Abraham, Moses, Jesus, Mohammed, Ibn Ismael; the seventh is unknown. God appeared ten times in human form, for the last time in El Hakim. The Druzes teach a distinction between Jesus, the son of Joseph, and the Christ. Christ instructed Jesus; but finally Jesus disobeyed Christ and was crucified in consequence. Christ, who was concealed under the form of one of the Disciples of Jesus, stole the body of Jesus from the grave and gave out the report that Christ had risen, in order that the true Druzes might be concealed for awhile in the religion of Jesus. The Druzes are firm believers in the transmigration of souls, and this transmigration will never end; after the Judgment Day death it will continue, but will be painless for the saved, who will live to the age of 120 years, and whose souls will forthwith be reborn and re-enter a life of peace and pleasure. The Druzes are unshakably convinced that the whole of China is peopled with adherents of their religion. The Judgment Day, or rather the golden age for the Druzes, will be at hand when the Christians wax greater than the Muslims, and our Druzes, who have been fair to the Druzes, will be able to free their religion from the restraint of Islam. The Druze religion contains seven moral precepts: veracity, love of the brethren, forsaking of idolatry, repudiation of devils, acknowledgment of God's unity at all times, secrecy in religion, and resignation to the will of God.

The Druzes are divided into two main classes: the Ukkal, or initiated, and the Jahhal, or uninitiated; amongst the former, the Iwayid profess the strictest Druze principles. They meet on Thursday evenings for worship, which consists almost exclusively in reading their sacred books. They often comply with the outward observances of Islam and even make pretence of being Mohammedans, but they are officially designated as unbelievers. They live mostly in the Lebanon, but are also found in the Hauran and in the districts near Damascus; their total number is estimated at 100,000 or a few thousand more. Encouraged by Turkish authorities, the Druzes in 1860 attacked the Catholic Maronites, and are said to have massacred some ten thousand of them. The massacres were stayed mainly through English and French intervention.

Dryburgh Abbey, a monastery belonging to the canons of the Premonstratensian Order (Norbertine or White Canons), situated four miles south-east of Melrose, Scotland. It was founded about 1150 by Hugo de Morville, Constable of Scotland, who brought with him two canons from Arundel, and the University willed to it. The extent of the situation is beautiful, a wooded promontory, around three sides of which sweeps the River Tweed. The monastery was dedicated to the Blessed Virgin. The monastery was burnt to the ground by Edward II, who encamped in the grounds when retreating from Scotland in 1322; but it was restored under Robert I, and at the succeeding Confessor the Benedictines on it was created a temporal lordship, and conferred by James VI on the Earl of Mar, who made it over to his third son, ancestor of the Earl of Buchan. It has again come into the hands of the last-named family in recent times by purchase.

The general style of the existing remains of Dryburgh is Early English, with some older (Norman) work. Of the church only the western gable, the ends of the transept, and part of the choir remain; but considerable portions of the conventional buildings have been preserved, including the refectory, with a beautiful rose window. James Stuart, of the Darnley family, is buried under the high altar; and various members of the Buchan family lie in one of the chapels. Several important subjects of research remain, as the tomb of Sir Walter Scott, in St. Mary's Aisle (part of the north transept). Sir Walter's maternal ancestors, the Hailburtons, at one time owned Dryburgh. His wife and eldest son are also interred here.

Dryden, John, poet, dramatist, critic, and translator; b. 9 August, 1631, at Oldwinkle All Saints, Northamptonshire, England; d. at London, 30 April, 1700. He was the youngest of six children of John Dryden (died 1684) and Mary Pickering, daughter of the Rev. Henry Pickering. Erasmus Dryden was the son of Sir Erasmus Dryden, and was a justice of the peace under Cromwell. On both sides Dryden's family were of the Parliamentary party. He received his early education as a king's scholar at Westminster and while there his first public work appeared. This was an elegy contributed in 1649 to "The Embassy to Russia." Mentioned in the collection of tributes in memory of Henry, Lord Hastings. He entered Trinity College, Cambridge, 18 May, 1650, being elected to a scholarship on 2 October. He graduated as Bachelor of Arts, January, 1653–4, and after inheriting from his father a small estate worth £60 annually, he returned to Cambridge, where he graduated as Bachelor of Arts, January, 1653–4, and after inheriting from his father a small estate worth £60 annually, he returned to Cambridge, where he graduated as Bachelor of Arts, January, 1653–4, and after inheriting from his father a small estate worth £60 annually, he returned to Cambridge, where he graduated as Bachelor of Arts, January, 1653–4, and after inheriting from his father a small estate worth £60 annually, he returned to Cambridge, where he graduated as Bachelor of Arts, January, 1653–4, and after inheriting from his father a small estate worth £60 annually, he returned to Cambridge, where he graduated as Bachelor of Arts, January, 1653–4, and after inheriting from his father a small estate worth £60 annually, he returned to Cambridge,
are not meanly so. There is no attack on royalty and no mention of Cromwell's religion. Dryden always was in favour of authority and of peace from civil strife, and consequently when disorders broke out upon Cromwell's death, he, with the rest of the nation, welcomed the return of Charles II. He celebrated the king's return with his poem of "Astraea Redux" (1660), in which he already showed his mastery of the rhymed couplet. Then followed his poems on the "Coronation" (1661); "To Lord Clarendon" (1662); "To Dr. Charleton" (1663); "To the Duchess of York" (1663); "To the Mirabilis" (1665). His great prose poem "Essay on Dramatick Poesie" appeared in 1668. Meantime, in 1662, Dryden had been elected to the Royal Society, and on 1 December, 1663, he was married to Lady Elizabeth Howard, eldest daughter of the Earl of Berkshire.

In 1662 he began his dramatic career with "The Wild Gallant", a comedy of humours, influenced by Spanish sources. In 1663 appeared "The Rival Ladies", a tragicomedy, also from a Spanish model. To this Dryden prefixed the first of the famous prefaces in which he laid down his principles of dramatic criticism, "The Indian Emperor", a heroical play, his first original drama, appeared in 1665. In 1667 he produced "The Maidens Queen", a comedy in which some blank verse is seen alongside of the rhymed couplet and prose; "Sir Martin Mar-all", a prose comedy based on "L'Etourdi" of Molière; and an adaptation of "The Tempest" with Davenant. "The Mock Astrologer" (1668) was an imitation of "Le feint astrologue" of Thomas Corneille, influenced by Molière's "Dépit amoureux". About this time Dryden entered into an agreement with the King's Theatre Company. According to this he was to produce three plays a year, for which he was to receive one and one-quarter shares out of a total of twelve and three-quarters. In the winter of 1668-9, "Tyrannic Love, or the Royal Martyr", a rhymed heroic tragedy, was played, and in 1670 his greatest heroic tragedy, the first and second parts of "Achitophel" and "Almahide", or the Conquest of Granada".

Dryden was given the degree of M. A. by the Archbishop of Canterbury in 1668; in 1670 he was made poet laureate and royal historiographer, which brought him an annual income of £200. In 1671 he was satirized in "The Rehearsal", a play written by Buckingham, Butler, and others. "Marriage à la Mode", a comedy by Dryden, was played in 1672, as well as "The Assegnation, or Love in a Nunnery", a prose comedy, interspersed with a little blank verse. "Ambonyra" (1673) was a prose tragedy on the subject of the Dutch outrages, and "The State of Innocence" (1674) was an unsuccessful attempt to treat the theme of Paradise Lost. "Aurengzebe" (1676) is a rhymed tragedy in which the run-on lines show a tendency toward blank verse, which becomes triumphant in the next play, "All for Love" (1675). This is Dryden's masterpiece, a play based on the story of Anthony and Cleopatra which he wrote to satisfy his own standards. It is a play worthy of comparison with Shakespeare's "Anthony and Cleopatra", surpassing it in unity of time and motive, and in the part of Ventidius adding one of the great characters of the English drama. "Lombardus" (1678), a prose comedy, was unsuccessful and was withdrawn after three nights. After the production of "Edipus", a tragedy in blank verse written in collaboration with Lee in 1679, Dryden seems to have quarrelled with the King's Company, and his next play, "Troilus and Cressida" (1679), an adaptation in blank verse and prose of Shakespeare's play, was produced by a private company. With the "Spanish Friar" (1681) he closed for a time his dramatic career. He had in the meantime suffered as well as profited by his fame. The Earl of Rochester, suspecting that Dryden had sided Lord Mulgrave in his attack on Rochester in the "Essay on Satire", caused Dryden to be beaten by hired ruffians as he passed through Rose Street, Covent Garden, while returning from Will's coffee house to his own house in Gower Street.

In November, 1681, Dryden began, in the first part of "Achitophel", the series of satires in the rhymed couplet which placed him at the head of English satirical poets. "Absalom and Achitophel" was the most important literary expression of the party which prevented the exclusion of the Duke of York from the succession to the throne. It is also one of the greatest of English satires, especially in its portraiture of the characters of the Duke of Monmouth and the Earl of Shaftesbury, both of whom the author has represented allegorically in the title of the poem. Then followed, in March, 1682, "The Medal", an assault upon Shaftesbury. These poems occasioned many attacks on Dryden, and to one of them, the "Medal of John Bayes" by Thomas Shadwell, Dryden replied, in October, 1682, by "Mac Flecknoe", a vigorous satire which made Shadwell as the "last great prophet of tautology". In November, 1682, appeared the second part of "Absalom and Achitophel", in which Nahum Tate collaborated. In "Religio Laici" (1682) Dryden presented an argument for the faith of the Church of England, and in 1685, on the death of Charles II, he wrote an ode called "Threnodia Angustallis"; in answer to Charles' request he had also translated "The History of the League" from the French of Mainvillain. Dryden's position at the death of Charles was not an enviable one. His income from play-writing had ceased, his pensions were not regularly paid, though they were continued by James II, and in answer to his appeal for some of the arrears, which amounted to £1000 in 1683, he had received £75 and an appointment as collector of customs of the port of London, the emoluments of which office are not known. He was converted to Catholicism in 1686. This step was the natural outcome of his investigation into theology,
Dryden's position in the history of English literature is one of supreme importance. He brought the rhymed couplet as a means of satire to a brilliancy and a point never surpassed before or since his time; as a poet, he has never been equalled. As a dramatist he did much good work and in some cases, as in "All for Love" or "Don Sebastian", he achieved supreme distinction as a lyric. He has left many exquisite songs and at least two of the finest odes in the language. As a translator and adaptor he ranks high, while as a prose writer he not only produced in his lifetime but established himself among the greatest of English critics, but he also clarified English prose and marked the way for future development. As a man, he shared the faults of his time, but the scandals heaped upon him by his enemies have fallen away under critical examination, and the impression remains of a brave, honest Englishman, earnest in every cause he championed, who loved to praise those who befriended him, and who could suffer reverses in silence and dignity. The standard edition of Dryden's works is that edited by Walter Scott in 18 volumes in 1808 and re-edited by George Saintsbury (Edinburgh, 1852–93).

CHARLES DRYDEN, eldest son of John Dryden the poet, b. at Charlton, in Wiltshire, England, in 1665 or 1666; d. in 1764. He was educated at Westminster, and at the Middle Temple, but could not enter, being a Catholic. He contributed to the second volume of his father's "Miscellanies" of 1685, and turned into English the seventh satire for the translation of Juvenal in 1692. He then went to Italy and became chamberlain to Pope Innocent XI, coming back to England in 1697 or 1698. He was drowned in the Thames and was buried at Windsor, 20 August, 1704.

ARTHUR H. QUINN.

Dry Mass. See Mass.

Dualism (from Lat. duo, two), like most other philosophical terms, has been employed in different meanings by different schools.—First, the name has been used to denote the religious or theological system which would explain the universe as the outcome of two eternally opposed and coexisting principles, conceived as good and evil, light and darkness, or some other form of conflicting powers. We find this theory widely prevalent in the East, and especially in Persia, for several centuries before the Christian Era. The Zend-Avesta, ascribed to Zoroaster, who probably lived in the sixth century B. C. and is supposed to be the founder or reformer of the Medo-Persian religion, explains the world as the outcome of the struggle between Ormuzd and Ahriman. Ormuzd is infinite light, supreme wisdom, and the author of all good; Ahriman is darkness, the cause of all evil. In the third century after Christ, Manes, for a time a convert to Christianity, developed a form of Gnosticism, subsequently styled Manichæism, in which he sought to fuse some of the elements of the Christian religion with the dualistic creed of Zoroastrianism (see MANICHÆISM and ZOROASTER). Christian philosophers expounded with minor differences by theologians and philosophers from St. Augustine down, the view that the world holds generally that physical evil is the result of the necessary limitations of finite created beings, and that moral evil, which alone is evil in the true sense, is a consequence of the creation of beings possessed of
free wills, and is tolerated by God. Both physical and moral evil are to be conceived as some form of privation or defect of being, not as a positive entity. Their existence is thus not irreconcilable with the doctrine of theistic monism.—Second, the term dualism is employed in opposition to monism, to signify the ordinary view that the existing universe contains two radically distinct kinds of being or substance—matter and spirit, body and mind. This is the most frequent use of the name in modern philosophy, where it is generally opposed to the doctrine that must not be forgotten that dualism in this sense is quite reconcilable with a monistic origin of all things. The theistic doctrine of creation gives a monistic account of the universe in this sense. Dualism is thus opposed to both materialism and idealism. Idealism, however, of the Berkeleyan type, which maintains the existence of a multitude of distinct substantial minds, may, along with dualism, be described as pluralism.

Historically, in Greek philosophy as early as 500 B.C. we find the Eclectic School with Parmenides as their chief, teaching a universal unity of being, thus exhibiting a certain affinity with modern German monism. Being alone exists. It is absolutely one, eternal, and unchangeable. There is no real becoming or beginning and end. All things that exist are mere appearances. To this unity of being Plato opposed an original duality—God and unproduced matter, existing side by side from all eternity. This matter, however, was conceived as indeterminate, chaotic, fluctuating, and governed by a blind necessity, in contrast with mind which acts according to plan. The order and arrangement are due to God. Even the resistances of matter which God has not altogether vanquished. Here we seem to have a trace of the Oriental speculation. Again there is another dualism in man. The rational soul is a spiritual substance distinct from the body within which it dwells, somewhat as the charioteer in the chariot. Aristotle is careful to distinguish two fundamental conceptions of matter and form—of a potential and an actualizing principle—runs through all branches of his system. Necessarily coeternal with God, Who is pure actuality, there has existed the passive principle of matter, which in this sense, however, is mere potentiality. But further, along with God Who is the Prime Mover, there must also have been a secondary efficient cause in the resistance of matter which God has not altogether vanquished. In his treatment of cognition Aristotle adopts the ordinary common-sense view of the existence of individual objects distinct from our perceptions and ideas of them. Man is an individual substantial being resulting from the coalescence of the two principles—form (the soul) and matter.

Christianity rejected the forces of a dual origin of the world which erected matter, or evil, or any other principle into a second eternal being coexistent with God; and it taught the monistic origin of the universe from one, infinite, self-existing spiritual Being who freely created all things. The unfamiliar conception of free creation, however, met with considerable opposition in the schools of philosophy and was abandoned by several of the earlier heresies. The Neoplatonists sought to lessen the difficulty by emasculating forms of pantheism, and also by inserting intermediate beings between God and the world. But the former method implied a materialistic conception of God, while the latter only postponed the difficulty. From the thirteenth century, through the influence of Albertus Magnus and St. Thomas Aquinas, the philosophy of Aristotle, though subjected to some important modifications, became the accredited philosophy of the Church. The dualistic hypothesis of an eternal world existing side by side with God was of course rejected. But the conception of spiritual being as opposed to matter received fuller definition and development. The distinction between the human soul and the body which it animates was made clearer and their separability emphasized: but the ultra-dualism of Plato was avoided by insisting on the intimate union of soul and body to constitute one substantial being under the conception of form and matter.

The problem of dualism, however, was lifted into quite a new position in modern philosophy by Descartes (q.v.). Indeed, since his time it has been a topic of central interest in philosophical speculation. His handling of the question was of an theological, the other metaphysical, brought this about. The mind stands in a cogitational relation to the external world, and in a causal relation to the changes within the body. What is the precise nature of each of these relations? According to Descartes the soul is res cogitans. Its essence is thought. It is simple and unextended. It has nothing in common with the body, but is connected with it in a single point, the pineal gland in the centre of the brain. In contrast with this, the essence of matter lies in extension. So the two forms of being are utterly disparate. Consequently the union between them is of an accidental or extrinsic character. Descartes thus approximates to the Platonic conception of charioter and chariot. Souls that are intrinsically distinct from the material world, in which they are certainly distinct from one another. How do they then interact? Real reciprocal influence or causal interaction seems impossible between such disparate things. Gellinix and other disciples of Descartes were driven to invent the hypothesis of occasionalism and Divine assistance, according to which it is God Himself who effects the appropriate change in either body or mind on the occasion of the corresponding changes in the other. In this system of miraculous interferences Leibniz substituted the theory of pre-established harmony according to which God has coupled pairs of bodies and souls which are destined to run in parallel series of changes like two clocks started together. The same insoluble difficulty of psycho-physical parallelism remains on the question of interaction. In philosophy at the present day who reject the doctrine of the soul as a real being capable of acting on the body it informs. The ultra-dualism of Descartes was immediately followed on the Continent by the pantheistic monism of Spinoza, which identified mind and matter in one infinite substance of which they are merely "modes."

The cogitational question Descartes solves by a theory of knowledge according to which the mind immediately perceives only its own ideas or modifications. The belief in an external world corresponding to these ideas is of the nature of an inference, and the guaranteeing of this inference or the construction of a reliable bridge from the subjective world of thought to the objective world of material being, was therefore the main problem of modern philosophy. Locke similarly taught that the mind immediately apprehends only its own ideas, but he assumed a real external world which corresponds to these ideas, at least as regards the primary qualities of matter. Berkeley, accepting Locke's assumption that the mind immediately cognizes only its own ideas, raised the question: What grounds have we for supposing there to be any independent material world corresponding to these ideas? He concludes there are none. The external cause of these ideas is God Who awakens them in our minds by regular laws. The dualistic opposition between mind and matter is thus got rid of by denying an independent material world. But Berkeley still postulates a multitude of real spiritual materialists from each other and manifestly from God. We have thus idealistic pluralism. Hume carried Berkeley's scepticism a step further and denied the existence of permanent spiritual substances, or minds, for grounds similar to those on which Berkeley rejected material substances. All we know to exist are ideas of greater or
less vividness. Kant repudiates this more extreme scepticism and adopts, at least in the second edition of his chief work, a form of dualism based on the distinction of phenomena and noumena. The mind immediately perceives only its own representations. These are modified by innate material forms. They present to us only phenomena. But the noumena, the things in-themselves, the external causes of these phenomenal representations, are beyond our power of cognition. Fichte rejected things-in-themselves outside the mind, and reduced the Kantian dualism to idealistic monism. The strongest and most consistent defenders of dualism in modern philosophy have been the Scotch Scholastics Reid, Stuart, and Hamilton. Among English writers C. S. Peirce, Martinute, McCosh, Mivart, and Case have carried on the same tradition on similar lines.

The problem of dualism, as its history suggests, involves two main questions: (1) Does there exist a material world outside of our minds and independent of our thought? (2) Supposing such a world to exist, how does the mind attain to the cognition of it?—The former question belongs to epistemology, material logic, or general philosophy; the latter to psychology. It is true that dualism is ultimately rejected by the materialist who reduces conscious states to functions or "aspects" of the brain; but objections from this standpoint will be more suitably dealt with under materialism. The idealist theory since Berkeley, in all its forms, maintains that the mind not only knows its own states or representations, and that what we suppose to be an independent material world is, in the last analysis, only a series of ideas and sensations plus belief in the possibility of other sensations. Our conviction of the objective reality of a vivid consistent dream is analogous to our conviction of the validity of the dualism. Like the idealism in opposition to all forms of idealism, the independent extramental reality of the material world. Among its chief arguments are the following: (1) Our belief in the existence of other minds is an inference from their bodies. Consequently the denial of an external material world involves the rejection of all evidence for the existence of other minds, and lands the idealist in the position of a monist. (2) It assumes the existence of a material world, existing when unperceived, possessing various properties, and exerting various powers according to definite constant laws. Thus astronomy describes the movements of heavenly bodies moving in space of three dimensions, attracting each other with forces inversely proportioned to the square of the distance. It postulates the movement and action of such bodies when they are invisible as well as when they are visible through long periods of time and over vast areas of space. From these assumptions it deduces future positions and foretells eclipses and transits many years ahead. Observations carried out by subsequent generations verify the predictions. Were there not an extramind material world, then a series of space and time truly mirrored by our cognitions and ideas, such a result would be impossible. The branches of science dealing with sound, light, heat, and electricity are equally irreconcilable with idealism. (3) The teachings of physiology and psycho-physics become peculiarly absurd in the idealist theory. What, for instance, is meant by saying that memory is determined in the nervous substance of the brain, if all the material world, including the brain, is but a collection of mental states? (4) Psychology similarly assumes the extramental reality of the human body in its account of the growth of the senses and the development of perception. Were the idealist hypothesis true its language would be meaningless. All branches of science thus presuppose and confirm the dualistic view of common sense.

Granted, then, the truth of dualism, the psychologi- cal question emerges: How does the mind come to know the material world?—Broadly speaking there are two answers. According to one the mind immediately perceives only its own representations or ideas and from these it infers external material objects as the cause of these ideas. According to the other, in some of its acts it immediately perceives extended objects or part of the material world. As Hamilton says: "What we directly apprehend is the Non-ego, not some modification of the Ego". The theory which maintains an immediate perception of the non-ego he calls natural dualism or natural realism. The other, which holds a mediate cognition of the non-ego, as the inferred cause of a representation immediately given, he calls "hypothesis of apparent dualism," a hypothetic realism. The doctrine of immediate or presentative perception is that adopted by the great body of the Scholastic philosophers and is embodied in the dictum that the idea, concept, or mental act of apprehension is non id quod percepiit sed medium quo percepiit—not that which is perceived but the medium by which the object itself is perceived. This seems to be the only account of the nature of knowledge that does not lead logically to idealism; and the history of the subject confirms this view. But affirmation of the mind's capacity for immediate perception of the non-ego and insistence on the distinction between id quod and id quo perceiptur, do not dispose of the whole difficulty. Modern psychology has been a great step forward. We have already seen the growth and development of cognition from the simplest and most elementary sensations of infancy. Analysis of the perceptive processes of a later age, e.g. apprehension of size, shape, solidity, distance, and other qualities of remote objects, proves that operations seemingly instantaneous and immediate may involve the activity of memory, imagination, judgment, reasoning, and sub-conscience reflection on the past experience of other senses. There is thus much that is indirect and inferential in nearly all the percipient acts of mature life. This should be frankly admitted by the defender of natural dualism, and the chief psychological problem for him at the present day is to sift and discriminate what is immediate and dualistic from mediate or representative, the admittedly complex cognitive operations of adult life.

MICHAEL MAHER.

Dublin (Dublinim), Archdiocese of (Dublinensis), occupies about sixty miles of the middle east coast of Ireland, and penetrates inland about forty-six miles, including all the County of Dublin, nearly all of Wicklow, and parts of Kildare and Wexford, with three suffragans: Kildare and Leighlin, Ferns, and Ossory. It covers an area of 689,277 statute acres. The city, which flourished in the first half of the second century A.D., on a magnificent site in a fertile river valley under the same parallel of latitude as the present city of Dublin. The first mention of Dubhlinn in any extant Irish chronicle is found in the "Annals of the Four Masters", under date of 291, where the name, which in English signifies a black pool, is quoted as that of a river on the bank of which a battle was fought by the King of Ireland against the Leinstermen. A river still empties into the Liffey at Dublin, now known as the Poddle River, but formerly designated the Pool
or Pole, clearly a survival of the earlier Black-Pool.

The natives distinguished the locality as 4th-Cliath, i.e. “The Ford of Hurdles”; from the wicker bridge or ford by which the great road from Tara was conducted across the Liffey into Cualann (South County Dublin and Wicklow).

In 532, when Aulaf (Olafr) the Dane invaded Ireland and subjected all the contending tribes of Danes, he erected a fortress on the hill of Dargle and thereby formed by the confluence of the Dubhlinn with the Liffey, a site now occupied by Dublin Castle. This fortress, taking its name from the river over which it stood, was called in Scandinavian Dublín. In Anglo-Norman charters of the time of Henry II it became Duretina; the legal serfs of King John brought it from England and in that form it was rendered in Irish as Dubhlinn or Dublin. Thus the name became associated with the Apostle of Ireland, the See of Dublin looks as to its founder. His first visit after brief landings at Wicklow, Mahalide, and Holmpatrick, was to his old slave-master in the northern parts of the country. But so soon as he was able to gain the sanction of Leogaire, King of Ireland, to preach the Gospel throughout the land, he visited every part of it, and was thus able to address himself as the Apostle of Ireland, the See of Dublin regarded as the Apostle of Ireland. The see of Dublin was founded as the Apostle of Ireland. The see of Dublin looks as to its founder. His first visit after brief landings at Wicklow, Mahalide, and Holmpatrick, was to his old slave-master in the northern parts of the country. But so soon as he was able to gain the sanction of Leogaire, King of Ireland, to preach the Gospel throughout the land, he visited every part of it, and was thus able to address himself as the Apostle of Ireland, the See of Dublin

Early Christian History.—The Christian Faith was preached in this territory, first by Palladius and then by St. Patrick. The stay of Palladius in Ireland was very short, scarcely a year, yet during that brief space he established three Christian communities, Teach-Renan (Tigoney), and Donard in County Wicklow, with Cell-Finne in County Kildare. When the death of Palladius was known at Rome in 431, Patrick was immediately selected and consecrated bishop for this Irish mission. The first bishop of Dublin, who was regarded as the Apostle of Ireland, the See of Dublin is regarded as the Apostle of Ireland. The see of Dublin looks as to its founder. His first visit after brief landings at Wicklow, Mahalide, and Holmpatrick, was to his old slave-master in the northern parts of the country. But so soon as he was able to gain the sanction of Leogaire, King of Ireland, to preach the Gospel throughout the land, he visited every part of it, and was thus able to address himself as the Apostle of Ireland, the See of Dublin

The “Annals of the Four Masters” tell us that in 849 the Dubhghoill or “black foreigners” arrived at 4th Cliath and made a great slaughter of the Finnogoll or “white foreigners”. In 850 the former gained a still more decisive victory. Finally in 852 Aulaf (Olafr) invaded Ireland, and all the foreign tribes submitted to him. Thus was founded the Dublin city and the first bishop of Dublin was Patrick, who was consecrated about 870, and as the latter was at the same time King of Northumbria, this dual sovereignty of the Danish kings of Dublin was with occasional brief interruptions maintained throughout a period of nearly a century and a half. Paganism was of course the cult of these rude Norsemen. They sedulously practised the worship of Thor and Woden, and thus during a great portion of their prolonged rule in Dublin its Christian history becomes a blank, varied at intervals by doleful recitals of the burning and plundering of celebrated monasteries, such as Glendalough, Lusk, Swords, Clondalkin, etc. The first of the Danish kings to embrace Christianity was Sitrí, who was baptized in England, and married King Alfred’s sister, Cynethryth. But he lived too short a life. He was a convert and died a Christian. His son, however, Aulaf Cuarán, on visiting England, was there converted in 943, and received at baptism by King Edmund. He remained firm in the Faith, and going to Iona on a pilgrimage in 950, died there “after penance and a good life”. It was the conversion of this Aulaf and his family, aided by the efforts of Northumbrian monks, whom he had brought over with him, that led to the conversion of the Danes of Dublin which chroniclers assign to 948.

The great victory won by King Brian Boru on the plain of Clontarf in 1014 broke for ever the power of the Danes in Ireland, but it did not dispossess them of Dublin. Their kings continued to rule there for a century and a half; nevertheless, the completeness of the victory, together with the civilizing effects of
Christianity, disposing the contending races to more friendly intercourse, and enabled Celt and Dane henceforward to live together in comparative peace. In 1038, little more than twenty years after the battle of Clontarf, we find another King Sitric (II) at Dublin, who, seeing that his subjects had all become Christians, was moved to organize the Church on a proper hierarchical basis. Wherefore in that year he founded and endowed a cathedral dedicated to the Holy Trinity (since Queen Elizabeth's time appropriated to Protestant worship and known as Christ Church). To minister in his cathedral he had a bishop appointed and consecrated; with this first bishop of the Danish Christians in Dublin, the See of Dublin may be said to have been founded. Having received their Christianity from Northumbria, the Danes looked to Canterbury for their spiritual government; and had their first bishop, Donatus, consecrated by the Archbishop of Canterbury. Except in faith and general discipline they were in no way identified with the rest of Christian Ireland.

Donatus died in 1074 and was succeeded by Patrick, who bore commendatory letters to Lanfranc and was consecrated by him in St. Paul's, London. After ruling the dioceese for about ten years he perished at sea in 1084. Donat O'Haingly, evidently an Irishman, came next. He was a Benedictine monk in Lanfranc's monastery at Canterbury. By consent of the king and of the clergy of Dublin, he was consecrated by Lanfranc in 1085; he died of the plague in 1095. To him succeeded his nephew Samuel O'Haingly, a Benedictine monk of St. Alban's. He was consecrated at Winchester by Saint Anselm on the Sunday after Easter, 1096, and died in 1121. It was to this prelate that St. Anselm administered the sharp rebuke for having removed the monks from his church, from which we may infer that it was at this period that a chapter of secular canons was established in the cathedral, their clergy having been previously monastic. Gregory was chosen as successor. He is described as a wise man and well skilled in languages. He was consecrated at Lambeth by Ralph, Archbishop of Canterbury.

Twelfth-century Reforms.—During Gregory's incumbency great and far-reaching changes were wrought in the ecclesiastical organization of Ireland. Up to this time, except in the Danish towns of Dublin, Waterford, and Limerick, the old system of centring jurisdiction in the monastery of the clan with a bishop resident, almost universally prevailed, but Gillebert (Gilbert), Bishop of Limerick, who had travelled much, and had made the acquaintance of St. Anselm, received a strong letter from the latter exhorting him to do his utmost, in union with the Irish bishops, to reform certain abuses and bring the system of ecclesiastical government more into conformity with the prevailing practice of Christendom. Whereupon Gillebert having received legateine powers from Paschal II convoked a synod which met at Rath-Breasail in 1118. At this synod the number of sees was fixed at twenty-four, Dublin excluded. Glendalough, the church founded by St. Kevin in the sixth century, was definitely erected into a diocese, but the Danish See of Dublin was ignored, or if referred to, it is described as being in the Diocese of Glendalough, for the latter came up to the very walls of Dublin and surrounded them on all sides. St. Malachy, consecrated Bishop of Connor about 1127, followed up the work of Gillebert, and on the occasion of a journey to Rome, besought Innocent II to constitute the Bishops of Armagh and Cashel metropolitans and transmit the pallium to them. Before his request could be fully considered, Malachy on a second journey fell sick on the way, and died at Clairvaux in the arms of St. Bernard (1148). The object of his journey, however, was not lost sight of, and in 1151, Eugene III commissioned Cardinal Pallaro to proceed to Ireland and establish there four metropolitans, giving him the pallium with which each was to be invested. The cardinal on his arrival convoked a general synod at Kells in 1152. At this synod Armagh, Dublin, Cashel, and Tuam, were created archiepiscopal sees, with canonical jurisdiction over their suffragans, and each of the new archbishops received the pallium. In this way Gregory became the first Archbishop of Dublin, and had assigned to him the Sees of Kilkadey, Ossory, Leighlin, Ferns, and Glendalough. In a document drawn up by the then Archbishop of Tuam, in 1211, the cardinal is described as finding on his arrival in Ireland, a bishop dwelling in Dublin, who at the time exercised his episcopal office without any visible church in the mountains, which likewise had the name of a city [Glendalough] and had a certain chiroepiscopus. But he delivered the pallium to Dublin which was the best city and appointed that the diocese [Glendalough] in which both these cities were should be divided, and that one part thereof should fall to the metropolitan. This severeth the North County Dublin known as Fingall, from Glendalough Diocese and annexed it to Dublin. Thus was the Church in Ireland reorganized in strict hierarchical form, and all dependence upon Canterbury was brought to an end.

Archbishop Gregory died in 1161 and was buried in the Holy Trinity Cathedral. To him succeeded Loran (latinized Laurentius) O'Toole, son of Muriartacht, Prince of Ua-Micuil. His mother was an O'Byrne, so that he was Irish of the Irish. Enamored at a very early age to the care of the Bishop of Glendalough he grew up a pious and exemplary youth and eventually became a monk there. When but twenty-five years old he was elected abbot and a few years later bishop of the see. This choice, however, he successfully withstood. But his resistance did not long avail him. As soon as the See of Dublin was vacated both clergy and people turned their eyes on the Abbot of Glendalough and would not be refused. He was consecrated in Dublin cathedral by Gelasius of Armagh in 1162. His first act was to induce the canons of his chapter to become canons regular according to the rule of the priory of Aronst. He himself assumed the religious habit with them and scrupulously conformed to the rule. He was indefatigable in his work and boundless
in his charity. In 1167 he attended a great convention held at Athboy at the request of King Roderic O’Conor, and helped there to enact several decrees affecting ecclesiastical discipline. In the following year the ill-starred Dermot MacMurrough set out for England to negotiate the betrayal of his country. In 1169 the first expedition of the Anglo-Normans landed in Ireland, and Wexford and Waterford soon fell before them. They then marched on Dublin, and in this expedition Strongbow was joined by the army of Dermot, Hasculf, the Danish king, made a sturdy defence, but eventually the city was captured and Hasculf and his followers escaped to their ships. In 1171 they returned with a number of Norwegians collected at Orkney and the isles, and attacked the eastern gate of the city. St. Laurence implored King Roderic to come to their aid; the latter did assemble an army, but their operations were ineffective, and the grip of the Norman fastened on Dublin, never again to be relaxed. King Henry II of England landed this same year, and received at Dublin the fealty of most of the native princes. Thenceforward Ireland became an appanage of the English Crown.

Early in the following year a synod was held in Cashel by order of Henry, at which Laurence assisted and where among other disciplinary regulations, the system of tithes was introduced, as is commonly believed. With the aid of Strongbow and other Norman chiefs he was enabled to enlarge and beautify Christ Church, i.e. Holy Trinity Cathedral, and the transepts and one bay of the choir remain to this day evidences of his work. In 1177 Cardinal Vivian arrived in Ireland as papal legate, summoned a meeting of bishops and abbots, and inculcated obedience to the conquerors. In 1179 Archbishop Laurence went to Rome to attend the Third General Council of the Lateran under Alexander III. The pope received him with marked kindness, took his see under his protection, confirmed its possessions, and extended its boundaries on the south as far as Bray. He also appointed him his legate in Ireland. Some time in 1180 the archbishop again crossed to England for the purpose of interviewing King Henry in the interests of his people, but Henry had no wish to see him and fled into Normandy. Laurence, nothing daunted, quickly pursued him, but had scarcely landed on the Norman coast when he fell seriously ill. He asked to be brought to Dublin to attend the Third General Council of St. Canons Regular established at Eu, and there died peacefully 14 November, 1180. He was canonized by Honorius III in 1226, and his relics, being transferred, were placed over the high altar in a costly shrine where they are still devoutly venerated. His feast is celebrated in Dublin each year on 11 November with great pomp and solemnity, and a parish church in that city is specially dedicated to him.

Norman-English Archbishops.—With the passing of St. Laurence, the Irish character of the newly constructed hierarchy, as far as Dublin was concerned, was brought to a premature close. The conquerors brought with them a colony of Bristol men and settled them in Dublin, and also brought all their feudal privileges and customs, prominent among which was the right of the English monarch to nominate to vacant sees within his dominion, this with the concurrence of the Holy See. In the exercise of this prerogative, Henry II named John Comyn, an Englishman, as successor to Laurence O’Toole. Henceforward, for full four centuries, the see was occupied by an unbroken line of Englishmen, born, bred, and benefited in England. Comyn proceeded to Rome where he was first ordained priest, and then consecrated bishop, by Lucius III at Velletri. He did not take up his residence in Dublin until 1184. The king conferred additional lands upon him to be held in barony tenure, by virtue of which he became a Lord of Parliament. In 1185 he received Prince John on his landing in Ireland, and in the summer the Diocese of Glendalough was united to Dublin; this union, however, was not to take effect until after the death of the governing bishop, William Piro. In 1186 he assembled a provincial synod in Christ Church cathedral at which several important canons were enacted. In 1190 he undertook the work of building a new church just outside the walls of Dublin on the site of an old Celtic church dedicated to St. Patrick, but preserved the original dedication and opened it with great solemnity on Patrick’s Day, 1191. In connexion with this church he founded and endowed a collegiate chapter of thirteen canons and erected an episcopal residence close by, which became known as St. Paul’s. Archbishop Comyn died in 1212 and was succeeded by Henry de Loundres, Archdeacon of Stafford. Two years later William Piro, Bishop of Glendalough, died, whereupon the union of the sees promised by King John took place. De Loundres’ principal work was the conversion of the collegiate chapter established by his predecessor in connexion with St. Patrick’s, into a cathedral chapter, with a four dignities and an increased number of prebendaries. This change presented the singular spectacle of a city having two cathedrals, with two chapters, one monastic, the other secular, an arrangement which led to a good deal of friction and gave much trouble to succeeding archbishops. In 1228 de Loundres was succeeded by Archbishop Luke, brought over from England by the archbishop as he was able to act as papal legate. In the period of cathedral building, we need not be surprised to learn that he caught the infection, and practically re-erected St. Patrick’s as we have it to-day, and put the nave to Christ Church as we see it in its restored condition. It is scarcely necessary to go through nominatim the series of English bishops who filled the see during the medieval period. Suffice it to say that most of them held some government post, such as lord chancellor, or lord treasurer, in conjunction with the archbishopric, their spiritual influence was thereby rendered obnoxious to the native clans of the O’Brynes and O’Tooles, when they shook off the English yoke during the fourteenth and fifteenth centuries. The Holy See, not to let anything matter, was compelled to provide a bishop for them, particularly of Glendalough, and the rubricelle in the Vatican Library furnish a list of six such bishops who presided over the mountainous region of the diocese well into the reign of Henry VIII.

The Anglican Schism.—This monarch, unhappily as is well known, dislocated everything in Church and State. The final murder of Archbishop Alan, author of the valuable “ Liber Niger” and “Repertorium Viride”, by the followers of Silken Thomas in 1534, afforded the king the much desired opportunity of introducing
his religious vagaries into Ireland. He kept the see vacant for nearly a year, and then filled it without any reference to the pope, by the appointment of George Browne. Browne had been provincial of the suppressed Augustinian Hermits in England, and was the bond slave of Henry, ready to do his master's bidding. He was consecrated by Cranmer, 19 March, 1535-6, and took up his residence in Dublin in August, 1536. The antecedents of Browne and the schismatical char-

acter of his appointment did not recommend him to the Dublin clergy. He complained of their resistance to his injunctions and was compelled to send round his own servants in order to cancel the pope's name in the service-books. A sharp warning from the king stirred him up to more demonstrative action, and forthwith he had all holy relics preserved in Christ Church cathedral, including St. Patrick's crozier known as the "Staff of Jesus", gathered into a heap and burned. He co-operated only too gladly in the suppression of all the religious houses, in changing the prior and convent of Christ Church into a secular dean and chapter, and in the total suppression of St. Patrick's chapter. Under Edward VI he introduced that monarch's new liturgy, as found in his first "Book of Common Prayer", into the cathedral, and finished by taking a wife.

With the accession of Queen Mary all things Catholic were restored, and Browne, being convicted of being a married bishop, was deposed. The queen filled the vacant see by nominating Hugh Curwen, Dean of Hereford, yet another Englishman, and the royal nominee Browne at Rome. She also re-established the dean and chapter of St. Patrick's. While the queen survived, unhappily not long, Curwen behaved as a Catholic, but on the accession of Elizabeth, he was ready to worship the rising sun, to accept her royal supremacy and Act of Uniformity, and eventually a transfer to the See of Oxford as its Protestant bishop. This apostasy, coupled with the severe persecution of Catholics which continued through the whole of Elizabeth's reign, left the See of Dublin without a Catholic bishop for full forty years. The compensations were, however, a firm and faithful clergy and people, and a long roll of martyrs and confessors.

Era of Persecution—Some attention was made by the Holy See to provide a bishop in 1585 by appointing a certain Donald or Donatus, but he did not live to take possession, and not until 1600 was his successor appointed in the person of Matthew d'Oviedo, a Spanish Franciscan. Though he came to Ireland, he dared not set foot in his diocese, but governed it through vicars-general, three of whom successively ended their days in prison. Finally about 1611 d'Oviedo returned to Spain and resigned the see, being succeeded by Dr. Eugene Matthews, transferred from Clogher. Dr. Matthews laboured hard and in most difficult times. In 1615 he called a provincial synod in Kil-
varegative of nominating to vacant sees; the claim being
admitted, he named Peter Creagh, Bishop of Cork, as
Archbishop of Dublin. Dr. Creagh was an exile in
France, and was obliged to govern through a vicar-
general. He went himself as auxiliary to the Bishop
of Strasburg where he died in 1705. Of the six arch-
bishops who filled the see in the seventeenth cen-
tury, two could never set foot in the diocese, two died in
exile, and two in prison. When the penal laws com-
menced their ferocious career (1705) Ireland was re-
duced to a single bishop, the Bishop of Dromore, and
he was confined in Newgate Prison, Dublin. The new
hierarchy sprang from his prison cell. Therein was
consecrated (1707) Dr. O’Rorke, Bishop of Killala, and
once established in the Apostolic office, he imposed
hands on the newly chosen Archbishop of Dublin, Dr.
Edmund Byrne, parish priest of St. Nicholas.

The population and extent of Dublin had been
steadily increasing ever since the Restoration, and
new quarters had grown up. Dr. Byrne’s first care
was to erect these into parishes. To him owe their
origin St. Mary’s, St. Paul’s, and St. Andrew’s. In
1710 the oath of abjuration, aimed against the
Stuarts, but full of other objectionable matter, raised
a new storm of persecution, and Dr. Byrne for a time
was forced to hide with his relatives in Kildare. With

varying vicissitudes he continued to rule the diocese
until his death in January, 1723. 4. He was succeeded
by Dr. Edward Murphy, transferred from Kildare. This
archbishop continued to date his letters, according to
the well-known formula of hunted bishops; e loco ref-
gui nostri, i.e. from our place of refuge. He died in
1729 and was followed by Dr. Luke Fagan, trans-
lated from Meath, who died in 1734, and had for his
successor Dr. John Linegar, a native of Dublin, who
lived until 1757, when his coadjutor Dr. Richard
Lincoln, also a native of the city, succeeded him.
In 1763 he died, and was followed by Dr. Patrick Fitz-
simon who governed the see until 1770, when Dr. John
Carpenter succeeded. With him may be said to com-
memorate the modern history of the diocese, for he was the
first of the archbishops, since Archbishop Alan’s time,
who left behind him, carefully compiled, detailed
records of the diocese. He died on 20 October, 1786.

RESTORATION OF CATHOLIC LIFE.—With a rapidity
extraordinary for that time, Dr. John Thomas Troy,
a Dominican, was transferred 9 December, 1786, from
Ossory to the Archbishoprie of Dublin. For thirty-
seven years he governed the Church of Dublin well
and wisely. He witnessed the first assertion of Catho-
lic rights, took part in the foundation of Maynooth
College, and laid the foundation stone of the metropol-
tian church in Marlborough Street, which still does duty
as pro-cathedral. Archbishop Troy saw the begin-
ings of the Christian Brothers and the restoration of
the Jesuits, while churches and schools multiplied
under his eyes. He died in 1823 and was buried in the
vaults of the new metropolitan church not yet quite
ready for use.

His coadjutor, Dr. Daniel Murray, a native of Wick-
low, succeeded him. Educated in Salamanca, he was an
eloquent, cultured, and pious ecclesiastic, de-
scribed by his panegyrist as “the Francis de Sales of
Ireland.” To him belongs the completion of the pro-
cathedral, the founding of the Irish Sisters of Charity,
and the communities of Loretto. He witnessed the
achievement of Catholic Emancipation in 1829, the
wonderful career of the Liberator, Daniel O’Connell,
of the great temperance movement under Father
Mathew, and the establishment of a system of national
(papal) primary education, and pointed a commissioner.
The awakening of a nation and of a church to a new life and increased respon-
sibilities was accomplished in his time. He died in 1852
regretted by all, and was buried in the Marlborough
Street vaults, where in the church above them, a beau-
tiful kneeling statue by Sir Thomas Farrell, adorns the
western transept. Archbishop Murray was
followed by Dr. Patrick Currie (q. v.), then
Archbishop of Armagh, who in June, 1852, was solemnly
enthroned in Dublin. He founded the diocesan semi-
inary and the Mater Misericordiae Hospital. He in-
augurated innumerable new churches, colleges, and
schools, and became the recognized champion of Cath-
olic education all the world over. In 1866 he was
named cardinal–Ireland’s first cardinal. In
1867 he took a distinguished part in the Vatican Council,
and in 1875 presided over the National Synod of
Maynooth. In 1878 he went to Rome to assist at the conclave
which elected Leo XIII, but arrived late, and in Octo-
ber of that year passed to his reward. He is interred
in the crypt of the church college at Clonliffe; a fine
marble statue perpetuates his memory in the pro-
cathedral.

In October, 1878, Dr. Edward McCabe, consecrated
assistant bishop in 1877, was raised to the archiepiscopal
office. His administration was short. In
1882 Pope Leo conferred on him the dignity of car-
dinal. Never in very robust health, he died in Feb-
uary, 1885. He was interred at Glasnevin where a
handsome mausoleum is erected (q. v.). Bishops:
70; July, 1883, the Most Rev. William J. Walsh was ap-
toined to succeed him.

STATISTICS.—The status of the diocese (1908) is as
follows: archbishop 1; bishop (of Canea) 1; par-
tishes, 74; parish priests, 70; administrators, 4;
curates etc., 190; in diocesan seminary, 9; chaplains,
21; secular clergy, 293; regular clergy, 247; public
churches, chapels, etc., 2,979; libraries, 56; hospital
charities, asylums, refuges, for the aged poor, for the
blind, and for deaf-mutes of both sexes, industrial
schools, homes, refuges, lunatic asylums, etc.).

The religious orders are very well represented in
Dublin by houses of Augustinians, Capuchins, Carmel-
ils, Dominicans, Franciscans, Holy Ghost Fathers,
Jesuits, Lazarists, Marists, Oblates, and Pas-
scians. Dublin is the residence of the Superior Gen-
eral of the Irish Christian Brothers and the seat of their
novitiate. Numerous sisterhoods, both within and
without the city (Sisters of Charity, Mercy, Loreto,
Dominican, Presentation, Carmelite, Holy Faith,
Sacred Heart, Poor Clares, Assumption, Bon Secours,
Poor Servants, Heart of Mary, etc.) devote themselves
to the usual works of education and charity (hospi-
tals, orphanages, asylums for the aged poor, for the
blind, and for deaf-mutes of both sexes, industrial
schools, homes, refuges, lunatic asylums, etc.).

The Catholic University of Ireland, founded in
1854, consists (since 1882) of the following (6) col-
eges located for the most part near Dublin: St.
Patrick’s College, Maynooth; University College, St.
Stephen’s Green, in the heart of Dublin; University
College, Maynooth; University College, Limerick;
University College, Cork; University College, Gal-
way; University College, Dublin; University College,
Maynooth; University College, Galway; University
College, Cork; University College, Dublin; University
College, Maynooth; University College, Galway; Univer-

St. Patrick’s Cathedral, Dublin

Dublin
own independent organization. (For the history of this university see Cullen; Machale; Newman; Ireland.) Other colleges are conducted by the Jesuits (Belvedere College), the Holy Ghost Fathers (Rathmines), the Carmelites (Terenure), and the Lazarists (Castlenuck). The Holy Cross College (Clonliffe) is the diocesan college or seminary for aspirants to the priesthood. For the ecclesiastical seminary of St. Patrick's, Maynooth, see Maynooth College.

By the New University Act passed in 1908, the official existence of the Catholic University of Ireland was brought to a close. This Act suppressed the Royal University of Ireland, and created two new universities in Ireland, both strictly undenominational.

One had its seat in Belfast, and absorbed the Queen's College already existing there; the other had its seat in Dublin, with a new college founded there, and absorbing the Queen's Colleges in Cork and Galway. The new Colleges of Dublin, Cork, and Galway, although undenominational under the Act, principally preserve Catholic interests, Dublin University (Trinity College) being left undisturbed and mostly frequented as well as governed by members of the Protestant Church. The Archbishop of Dublin is nominated, though not ex officio, a member of the Senate of the new university having a seat in Dublin, and also a member of the Statutory Commission charged by the Crown with the duty of revising and approving of the statutes of the several colleges comprised in the university.

NICHOLAS DONNELLY.

Dubno. See Mostar.

Dubois, Guillaume, French cardinal and statesman, b. at Brive, in Limousin, 1550; d. at Versailles, 1732. He was the son of an honourable physician and received his first education from the Fathers of the Christian Doctrine in his native place, whence he went in 1672, as beneficiary, to the Collège Saint-Michel in Paris. He had been engaged some nine years in private teaching when he was appointed (1683) sub-preceptor to the Duke of Chartres, nephew of Louis XIV, the French Academy following four years later. When the Duke of Chartres became Duke of Orléans (1700), Dubois was made his secretary. During the regency of Philippe d'Orléans he rose in rapid succession to the high positions of state councilor (1716), secretary of foreign affairs (1717), Archbishop of Cambrai (1720), cardinal and surintendant des postes (1721), member of the Conseil de riance, and soon after, ministre principal (1722). The French Academy admitted him the same year and the Assembly of the French Clergy elected him president in 1723, the year of his death.

Owing to his humble birth, his staunch opposition to Jansenism, and his bold reversal of the aristocratic regime prevalent under Louis XIV, Dubois was disliked by the noblemen of his day. On the authority of contemporary libels and Saint-Simon's memoirs, historians of France have long repeated against him such charges as corrupting the morals of his pupil, accepting money from England, seeking, though unworthy, ecclesiastical dignities, etc. The publication by Sévélignes of Dubois's memoirs and correspondence together with the careful study of contemporary documents by Seilha, Wiesener, and Blier (e.g, graceful diplomatic papers preserved in the archives of the French, English, and Spanish foreign offices—have thrown a new light on the subject and partly verified the words of Fontenelle at the time of the reception of Cardinal Dubois into the French Academy: "Les siècles suivants en sauront davantage; fiez-vous à eux". Far from catering to his pupil's wantonness, Dubois did what he could to check it, and his Plan d'éducation des Étudiants de Paris. The Chartres shows a competent and conscientious tutor. The expediency of his foreign policy, resulting in the Triple Alliance of France, England, and Holland against Spain, like the contrary policy of his son and grand-son, must be largely a matter of opinion. In so far as Dubois was concerned, it was the best way of serving the interests of France and counteracting the intrigues of Alberoni. Stair, in a letter addressed to Sir John Stuart, Sir John Stuart, a high regard, almost amounting to friendship, for the minister of France, but on both sides the charge that bribery was resorted to is untrue. That Dubois was not set against the natural unity of France and Spain was shown later, when, after Alberoni's fall and the restoration of peace, he successfully negotiated the treaty of 1721 and the marriage of Louis XV with the Infantine and that of the Prince of the Asturias with Mlle de Montpensier. Dubois's career as a churchman is not above reproach. While there is no foundation for the oft-repeated assertion of his secret marriage, his gross licentiousness, and notorious impiety even at the hour of his death, still it cannot be denied that he sought and did achieve ecclesiastical dignities principally as props to his political prestige. Tonsured at the age of thirteen he betook himself of sacred Orders only in his old age, when, the better to secure the long coveted and long denied red hat, he asked for the Archbishopric of Cambrai merely as a stepping stone to the cardinalate.

The Memoirs of Cardinal Dubois "published by P. Lacroix (Paris, 1829) are apostrophical. His genuine writings were edited by Sévélignes: "Mémoires secrets correspontance inédite du cardinal Dubois" (Paris, 1815).

SAINTE-SIMON, MEMOIRS, ed. CHAULÉ (Paris, 1858), with remarks of CHAULÉ; Relations de Saint-Simon et de l'Abbé Dubois in Rev. Hist., 1, 149; SELLÉ, L'Abbé Dubois, premier ministre de Louis XV (Paris, 1847); WIESENER, LE RÉPÈRE, L'Abbé Dubois et les Anglais (Paris, 1863); BILLARD, Dubois, cardinal et premier ministre (Paris, 1902), reviewed by SHAHIN in Catholic Uni.
Dubois, Jean-Antoine, French missionary in India, b. in 1765 at St. Remèze (Ardeche); d. in Paris, 17 Feb., 1848. The Abbé Dubois was a director of the Seminary of the Foreign Missions, a member of the Royal Societies of Great Britain in Paris, and of the Literary Society of France. At the outbreak of the French Revolution he went to India to preach Christianity to the natives, whose favour he soon won by his affability and patience. For their instruction he composed elementary treatises on Christian doctrine which won general commendation. Though he remained twenty-two years in that arduous field, his labors were not fruitless and he returned convinced that the conversion of the Hindus with the deep-rooted prejudices of centuries was impossible under the existing conditions. This opinion which he broached in "Letters on the State of Christianity in India" etc. (London, 1823), was vigorously attacked in England. Two Anglican missionaries, James Hough and H. Townley, published respectively, "A Reply to the Letters of Abbé Dubois" (London, 1824) and "An Answer to the Abbé Dubois" (London, 1824). "The Friend of India", a journal of Calcutta (1825), contained a refutation of his letters, to which the Abbé rejoined in a letter of much gravity and moderation. It found its way into the "Bulletin des Sciences", May, 1825, and the first volume of the "Asiatic Journal" (1841). Besides these two volumes were: "Description of the Character, Manners and Customs of the People of India, and of their Institutions, religious and civil" (London, 1816). This work was bought by the East India Company for twenty thousand francs and printed at their expense. The author published an enlarged edition in French under the title "Mémoires de diverses institutions, et cérémonies des peuples de l'Inde" (Paris, 1823, 2 vols.), which is considered the best and most complete work on the subject. "Exposé de quelques-uns des principaux articles de la théologie des Brahmes" (Paris, 1825); "Le Pantche-tantra ou les cinq ruses, fables du Braham Vichnou-Sarma" (Paris, 1826). Abbé Dubois was one of the collaborators of the "Bulletin Universel des Sciences" of the Baron de Férussac, "Journal des Savants" (1848), I, 466; Biog. des Contemp.; "Journal des Sciences" (1826); Bulletin Universel des Sciences, VII, Vol. I, pp. 317. "Revue Assiétique" (1826), 7, 243; "Revue Encyclopédique" (1827), 1, 135-147; (1828), I, 491, II, 170; (1829), II, 566; (1830), I, 794; Biog. Univ. (Paris, 1852), V, 635.

EDWARD P. SPILLANE.

Dubois, John, third Bishop of New York, educated and missionary, b. in Paris, 24 August, 1764; d. in New York, 20 December, 1842. His early education was received at home until he was prepared to enter Collège Louis-le-Grand, when he had taken for fellow-students Robert d'Estournelles. Ordained priest at the Oratorian Seminary of St-Magloire, 22 Sept., 1787, by Archbishop de Juigné, of Paris, he was appointed an assistant to the cure of St-Sulpice, and chaplain to the Sisters of Charity (Hospice des Petits Maisons). Forced in May, 1791, by the French Revolution, to leave France, he escaped in disguise to America, and landed at Norfolk, Virginia, 18 Aug., 1791, bearing confiscated letters from the Marquis de Lafayette to James Monroe, the Randolphs, Lees, Beverlys, and Patrick Henry. He was cordially received, residing for some time in the house of Mr. Monroe, received instruction in English from Patrick Henry, and even celebrated Mass in the State House at Richmond. When Bishop Carroll assigned the young priest to missionary work, first at Norfolk and later at Richmond. In 1794 he became pastor of Frederick where he built the first church and ministered to Western Maryland and Virginia. His career as an educator began in 1808, when, joining the Society of St-Sulpice, he withdrew from the Frederick mission and opened a school on the mountain at Emmitsburg, as a petit séminaire. This he soon discovered impracticable, and, in its place, founded there the present Mt. St. Mary's College. Father Dubois was also of invaluable assistance, material and spiritual, to Mother Seton, foundress of the American Sisters of Charity, when she established (1809) a convent of her community a short distance from their college. On the death of the Rt. Rev. John Connolly, second Bishop of New York, 6 Feb., 1825, Father Dubois was chosen his successor and consecrated the third Bishop of New York by Archbishop Maréchal in Baltimore, 29 Oct., 1826. Three days later he took possession of his diocese, which covered the whole State of New York, and half the State of New Jersey, with a Catholic population of about 150,000, eighteen priests, and some twelve churches. A visitation of his diocese revealing the pressing need of priests and of a seminary, he went to France and Rome for aid in 1829, and obtained substantial help from the Society for the Propagation of the Faith and the Congregation of Propaganda. He made three unsuccessful efforts to establish a seminary at New York. The fire destroyed one when just completed at Nyaak; another projected on a site chosen in Brooklyn was never begun; and a third at Lufafferville, in the northern part of the State, was closed because too remote and inaccessible. Another serious problem confront the bishop in the lay trustee system controlling the church - in his diocese, which, with the title of the diocesan head, he was bound to hold his salary, he made this memorable reply—"I am an old man, and do not need much. I can live in a basement or in a garret. But whether I come up from the basement or down from the garret, I shall still be your Bishop" (see Trusteeship, New York, Archdiocese of). Enfeebled by age and hard work, he asked for a pay raise, and when this was granted to him, the bishop had sought to dismiss him of his stipend of 783 churches, 12 stations, and 40 priests, and the Rev. John Hughes of Philadelphia was appointed titular Bishop of Basilinpolis and coadjutor of New York in 1837. Bishop Dubois's infirmities increasing, Bishop Hughes was made administrator in 1839, and the old bishop passed the last days of a life of apostolic zeal in retirement at his residence in the crypt of St. Patrick's Old Cathedral, New York.

P. J. HAYES.

Dubourg, Louis-Guillaume-Valentin, second Bishop of Louisiana and the Floridas, Bishop of Montana, Archbishop of Besançon, b. at Cap François, Santo Domingo, 16 February, 1766; d. at Besançon, France, 12 December, 1833. His theological studies were made at Paris, where he was ordained in 1788 and entered the Company of Saint Sulpice. He was successively the seminary of Bay and then the French Revolutions broke out, and retired at first to Bordeaux. In 1794 he emigrated to the United States where he was welcomed by Bishop Carroll. He was president of Georgetown College from 1796 to 1799. After an unsuccessful trip to Havana where he attempted to open a school, he returned to Baltimore and became the first superior of Saint Mary's College. On 18 August, 1812, he was appointed Apostolic Administrator of the Diocese of Louisiana and the Floridas to succeed Bishop Penalver y Cardenas promoted (1801) to the archiepiscopal See of Guatemala. The position was by no means an easy one and Father Dubourg was forced, at the beginning of his administra-

D. S. HAYES.
tion to take up his residence outside New Orleans. However, he gradually overcame his opponents. On 23 January, 1815, on the threshold of the New Orleans cathedral, he bestowed on General Jackson the laurels of victory.

After settling in a satisfactory way the affairs of the diocese Father Dubourg proceeded to Rome where he was consecrated Bishop of Louisiana and the Floridas, 21 September, 1815. He returned to America in 1817 and took up his residence in St. Louis where he founded a theological seminary and college at "The Barrens". He also founded the St. Louis Latin Academy which developed into the present well-known St. Louis University. The Religious of the Sacred Heart simultaneously opened their first American convent, St. Charles's Academy (1818), and soon after a second one at Florissant. The same year, 1817, Bishop Dubourg consecrated the first of the leading American Jesuit missionaries and coadjutors who continually opposed him; therefore he tendered his resignation of the See of New Orleans (November, 1826), thinking that another incumbent would be more successful.

He was not, however, allowed to live in retirement, but was transferred, 2 October, 1826, to the Diocese of Montauk; then on 15 February, 1832, he was promulgated to the See of Benzoni. Bishop Dubourg was one of the first patrons and benefactors of the Society for the Propagation of the Faith, but was not, as has been said, its founder. This society was organized at a meeting held at Lyons by the Abbé Inglesi, Bishop Dubourg's vicar-general, but the chief rôle in its creation is due to a pious woman of Lyons, Pauline de Marie, who was the founder (v. infra).

Dubourg, CÉLESTIN M. CHAMBRON.

Dubric (DYFRIG, DUBRICUS), Saint, bishop and confessor, one of the greatest of Welsh saints; d. 612. He is usually represented holding two crosiers, which signify his jurisdiction over the Sees of Caerleon and Llandaff. St. Dubric is first mentioned in a tenth-century MS. of the 'Annales Cambriæ'; where his death is assigned to the year 612, i.e. in the earliest life of the saint that has come down to us. It was written about 1133, to record the translation of his relics, and is to be found (in the form of "lectiones") in the "Liber Landavensis". It may contain some genuine traditions, but as it appeared at least five hundred years after St. Dubric's death, it cannot claim to be historical. According to Annals of Oescenac (which was written by the daughter of Peba Chaforgw, prince of the region of Ergyn (Enchenfield in Herefordshire), and was born at Madley on the River Wye. As a child he was noted for his precocious intellect, and by the time he attained manhood was already known as a scholar throughout Britain. He founded a college at Henllan (Hentland in Herefordshire) and returned to it in 1157 and remained there for seven years. He then moved to Muchests (perhaps Moccas), on an island farther up the Wye, where he founded an abbey. Later on he became Bishop of Llandaff, but resigned his see and retired to the Isle of Barlesey, off the coast of Carnavonshire. Here with his disciples he lived as a hermit for many years, and here he was buried. His body was translated by Urban, Bishop of Llandaff, to a tomb before the Lady-altar in "the old monastery" of the cathedral city, which afterwards became the cathedral church of St. Peter.

A few years after the "Liber Landavensis" was written, there appeared the "Historia Regnum Britanniae" of Geoffrey of Monmouth, and this romantic chronicle is the source of the later and more elaborate legend of St. Dubric, which describes him as "Archbishop of Caerleon" and one of the great figures of Breton and Anglo-British history. It is said by John de Timmough (as adapted by Capgrave) developed the fictions of Geoffrey, but their accounts are of no historical value. There is no record of St. Dubric's canonization. The "Liber Landavensis" assigns his death to 14 November, but he was also commemorated on 4 November. The translation of his body, which the same authority assigns to 25 May, is usually said to have been that of May 27.

Dubricus, See RAGUSA.

Dubuque, ArchdioceSE OF (DUBUQUESiS), established, 28 July, 1837, created an archbishopric, 1893, comprises that part of Iowa, U. S. A., north of Polk, Jasper, Poweshiek, Iowa, Johnson, Cedar, and Scott, and east of Kossuth, Humboldt, Webster, and Boone Counties; an area of 18,084 sq. miles. The city is picturesquely situated on the Mississippi, at the base of noble bluffs that rise 300 feet above the river; many of the eminent residences are on these bluffs, and many of the parishes and fine residences. The city is named after Julien Dubuque, a Canadian, who lived there from 1788 to 1811, mining lead and trading with the Indians. His grave was marked by a cross and recently has been adorned with a rugged round tower of native limestone. The first white men to visit Iowa were the Jesuit Marquette and the Franciscan Henepin. Later missionaries sent from Quebec laboured among the Indians of Wisconsin and Iowa, and kept alive the Faith among the scattered pioneers. Iowa became United States territory by the Louisiana Purchase, and in 1833, after treaty with the Indians, was opened to settlement. The lead mines at Dubuque attracted many, the fertile prairies many more, and the population increased rapidly. The earliest Catholic settlers were French, German, and Irish, coming directly from their native lands or from the Eastern States; soon the whole State was dotted with thriving villages and prosperous farms. The attitude of non-Catholics has been uniformly friendly; the coming of a priest and the building of a church were generally met with indifference, and when the first Catholic church was founded in Dubuque in 1837, the Catholic institutions and the Catholic press were accepted. The Catholic Church in Dubuque is now divided into four deaneries: Dubuque, Cedar Rapids, Marshalltown, Waterloo, Dyersville, Mason City, Lansing, Ackley, Cascade, New Vienna, and Waukon.

The Diocese of Dubuque was created in 1837 by division of that of St. Louis, and embraced the area north of Missouri to Canada, and east of the Mississipi to the Missouri. One priest, a zealous Dominici, Samuel Mazzuchelli, ministered to a scattered population of less than 3000; three churches had been built; St. Raphael's at Dubuque, one at Davenport,
and one at Sugar Creek, Lee County. Today in that same territory the Church numbers nearly 1,000,000 souls with two archbishops, a score of bishops, and thousands of priests and religious workers.

Bishops.—(1) PIERRE-JEAN-MATHIAS LORAS, the first bishop, was born at Lyons, France, 30 August, 1792; his father and uncle were guillotined during the Revolution. Mathias, who had as a schoolmate the Blessed Curé d’Ars, was ordained priest 12 November, 1815, and for years was superior of the seminary of Largentière. His zeal led him in 1829 to Mobile, Alabama, U. S. A., where he laboured as pastor of Sand Spring Hill until 1837. Consecrated Bishop of Dubuque, at Mobile, 10 December, 1837, by Bishop Porter of Mobile, he familiarized himself with the work of the diocese, and went to France for priests; he returned 21 April, 1839, with six men of heroic mould, whose names are inseparably linked with the Catholic North-West: Joseph Crétin, who in 1851 was consecrated first Bishop of St. Paul, A. Ravoux, a noted Irish missionary, Archibald Pelamourgues, the patriarch-priest of Davenport, L. Galtier, R. Petiot, and J. Cauvin. On the first of November, 1839, the bishop was received, 19 April, 1839, with great joy by all classes. His administration was marked by piety, zeal, and providential prudence. He multiplied his priests, encouraged immigration from the crowded cities of the East, welcomed the Trappists and various orders of sisters, chose and purchased tracts of land for the future, and doubled the diocesan seminary opened, which flourished for five years; among its students was Henry Cosgrove, who became Bishop of Davenport. In 1854 Bishop Loras visited Ireland and France in quest of priests. In 1855 he requested and obtained as coadjutor the Rev. Clement Smyth, superior of the Trappists community at New Melleray, and bishop of the priests of Dubuque. Where he founded one priest and a scattered little flock, he left 48 priests with 60 churches and 54,000 Catholics.

(2) CLEMENT SMYTH was b. 24 February, 1810, at Finlea, County Clare, Ireland; educated at Trinity College, Dublin, he entered the Cistercian Order and was ordained, 29 May, 1841. He was sent to the United States and founded New Melleray monastery, twelve miles from Dubuque, in 1840. He began to build parishes, and by 1857, the same year in which he was consecrated, he had 26 parishes, nine priests, and 600 churches. He multiplied his clergy, doubled the faculty and buildings of St. Joseph’s College, the preparatory seminary of the archdiocese, which now enrols 250 classical students, established a missionary band of diocesan priests, welcomed the Sisters of the Good Shepherd and the Sisters of Charity and the Sisters of Mercy. Thus with indefatigable zeal he continued the work of his predecessors. In 1902 the western portion of the archdiocese was erected into the new Diocese of Sioux City.

The Rt. Rev. John Hennessy, M. J. (then Father Hennessy) went to Dubuque in 1841 from Philadelphia. The mother-house is now located there and they conduct two academies and eleven schools in various centres, besides having sent communities to four other states. The Sisters of Mercy located in 1868 in Davenport, and now have independent houses at Dubuque, Cedar Rapids, and Independence. The Presentation Nuns arrived from Ireland in 1850, and have had 85 members. The Presentation Nuns conduct an academy in Dubuque; they number 31 members. The Sisters of St. Francis came from Westphalia, Germany, and 320 of them are employed in schools throughout Iowa. Other sisterhoods represented in the archdiocese are Third Order of St. Dominic, Franciscan Sisters of Perpetual Adoration, Sisters of St. Francis, Sisters of the Holy Ghost, Sisters of the Holy Humility of Mary, and the School Sisters of Notre Dame.
DUC

DUCCIO

STATISTICS.—Official reports for 1908 give these figures: 222 diocesan and 9 regular priests; 165 parish churches; 63 mission churches; 50 chapels (in religious institutions); 1 college for men with 350 students; 25 academies for the higher education of young women, attended by 4000; 96 parochial schools, with 25,000 pupils; 1 orphanage with 225 inmates; 7 hospitals each accommodating from 30 to 150 patients; one industrial home with 50 inmates; one home for the Good Shepherd. Catholic population, 111,112 in a total of 693,400. About 650 sisters of religious communities are engaged in teaching, and about 130 are in hospitals and other charitable work.

S. (Milwaukee, 1898).

J. C. STUART.

DUC, FRONTON DU (called in Latin DUCIEUS), a French theologian and Jesuit, b. at Bordeaux in 1558; d. at Paris, 25 September, 1624. At first he taught in various colleges of the Society and wrote for the dictionnaire de l'académie; among his works were the "Histoire tragique de la pucelle de Domrémy, autrement d'Orléans" (Nancy, 1581), which was acted at Pont-à-Mousson before Charles III, Duke of Lorraine. At a later date he took part in the theological discussions of the age and is the author of "Inventaires des fautes, contradictions, fautes allégoriques des travaux de Luther," &c. (Bordeaux, 1599-1601). This is one of the many refutations of the treatise on the Eucharist issued in 1586 by the Huguenot theologian Du Plessis-Mornay. The Protestant publicist made a reply to which Fronton du Duc rejoined in 1602.

At the suggestion of Casaubon, Henry IV consented to the publication of manuscripts of the royal library. The clergy of France decided to confide the revision of the Greek Fathers to the Jesuits, and Fronton du Duc was chosen by the Society to labour on this project. Accordingly he published the works of St. John Chrysostom (Paris, 1609—24) and a "Bibliotheca veterum Patrum" (Paris, 1624, 2 vols. in folio). The "Bibliotheca" contains many of the Greek Fathers with Latin translations (see the list in Sommervogel, III, 245), and serves as a supplement to the great collection of Margarin de la Bigne known as "Sacra Bibliotheca Sanctorum Patrum". After the death of Fronton du Duc there was issued an edition of Nicephorus Callistus (Paris, 1630, 2 vols. in folio) which he had undertaken. This edition is based on a Vienna manuscript that had belonged to the library of Matthias Corvinus; its publication had been delayed by a series of curious complications in which the political schemes of Richelieu were involved. Fronton du Duc had also occupied himself with the Greek texts of the Bible and had begun a revision of the text, but this was not completed. Librarian from 1620 to 1642, Fronton du Duc died at Paris, 17 May, 1668. He reorganized the library, which had been scattered during the period in which the Jesuits had been obliged to abandon the school. While holding this position he also taught (1618—23) positive theology.

OWN, in NICÉRON, Mémoires pour servir à l'histoire des hommes illustres (Paris, 1727—1745), VIII; Notice des ouvrages manuscrits de M. Du Cange in Journal des Savants (October—December, 1740) and Dufresne d'Aubigné, Mémoire historique sur les manuscrits de M. Du Cange (Paris, 1752).

PAUL LEJAY.

Duccio di Buoninsegna, painter, and founder of the Siennese School, b. in 1255 or 1260, place not known; d. 3 August, 1319. About this time Sienna was at the zenith of her political power. She had just defeated Florence on the field of Montaperti (4 September, 1260), and an era of marvellous development followed this conquest. Then was begun the huge task of building the cathedral, where, in 1266, was commenced the incomparable pulpit sculpted by Du Cange and his pupils. There was much discussion about the condition of Du Cange. He received his artistic education in Northern countries. His genius consisted in giving exquisite expression to the refined sentiment of the masters of Byzantium, reconciling its original meaning despite the fantastic, hideous imitations made by a degenerate school.

Du Cange is first mentioned in 1278, when he was engaged upon minor work, such as painting the coffers of the archives and the tablettes (memorandum-books) of the Biccherna, one of them for the year 1293 now in the Industrial Museum of Berlin. But his great work at this time was the famous "Madonna del Russellet," one of the most illustrious specimens of Italian painting—preserved at Florence in a side-
Duchesne, Philippine-Rose, founder in America of the first houses of the Society of the Sacred Heart, b. at Grenoble, France, 29 August, 1799; d. at St. Charles, Missouri, 18 October, 1879. She was the daughter of Pierre-François Duchesne, an American lawyer. Her mother was a Pérèr, ancestor of Casimir Pérèr, President of France in 1894. She was educated by the Visitandines, entered that order, saw its dispersion during the Reign of Terror, vainly attempted the re-establishment of the convent of Ste-Marie-d'en-Haut, near Grenoble, and finally, in 1804, ached to teach the poor Indians, and old and broken as she was, went to labour among the Pottowatomies at Sugar Creek, thus realizing the desire of her life. Stirred by the recitals of Father De Smet, S.J., she turned her eyes towards the Rocky Mountain missions; but Providence led her back to St. Charles, where she died. Thirty-four years of mission toil, disappointment, endurance, self-denial, did not improve the worth of this valiant daughter of Mother Barat. She had opened the road, others might walk in it; and the success hidden from her eyes was well seen later by the many who rejoiced in the rapid spread of her order over North and South America. Sincere, intense, generous, austere yet affectionate, endowed with large capacity for suffering and work, Mother Duchesne’s was a stern character that needed and took the moulding of Mother Barat. Preliminary steps for her beatification have already been taken.

Duchett, James, Venerable, Martyr, b. at Gilfortrigs in the parish of Skelmersworth in Westmoreland, England, date uncertain, of an ancient family of that county; d. 9 April, 1601. He was a bookseller and publisher in London. His godfather was the well-known martyr James Leybourne of Skelmers. He seems, however, to have been brought up a Protestant, for he was converted while an apprentice in London by reading a Catholic book lent him by a friend. Before he could be received into the Church he was twice imprisoned for not attending the Protestant service,
and was obliged to compound for his apprenticeship and leave his master. He was finally reconciled by a venerable priest named Weekes who was imprisoned in the Gatehouse at Westminster. After two or three years he married a Catholic widow, but out of his twelve years of married life, no less than nine were spent in prison, owing to his zeal in propagating Catholic literature and his wonderful constancy in his new-found faith. His last apprehension was brought about by Peter Bullock, a bookbinder, who betrayed him in order to obtain his own release from prison. His house was searched on 4 March, 1601, Catholic books were found there, and Ducquet was at once thrown into Newgate. At his trial, Bullock testified that he had brought the Catholic books to Ducquet by which the martyr acknowledged to be true. The jury found him not guilty, but Judge Popham at once stood up and bade them consider well what they did, for Ducquet had had bound for him Bristowe's "Motives", a controversial work peculiarly odious to Anglicans on account of its learning and cogency. The jury thereupon reversed their verdict and brought in the prisoner guilty of felony. At the same time, priests, Page, Tichborne, and Watkinson, were condemned to death. Bullock did not save himself by his treachery, for he was conveyed in the same cart with Ducquet to Tyburn, where both were executed, 19 April, 1601. There is an account, written by his son, the Prior of the English Carthusians at Nieuport (Flanders), of James Ducquet's martyrdom. In the way to Tyburn he drank a whole cup of wine; he drank and desired his wife to drink to Peter Bullock, and freely to forgive him. At the gallows his last thoughts were for his betrayer. He kissed him and implored him to die in the Catholic Faith.

John Ducquet, Venerable, Martyr, probably a grandson of Venerable James Ducquet, b. at Underhill, Essex, in 1553; d. 7 September, 1644. He was ordained priest in 1639 and afterwards went to Paris where he studied three years in the College of Arras. He had an extraordinary gift of prayer, and while yet a student would spend whole nights in contemplation. On his way to the English mission, he spent two months in spiritual exercises, under the direction of the order of the thursdays before Nieuport. He laboured for about a year in Durham, and was taken near Wolsingham on his way to baptize two children, 2 July, 1644. The place which tradition declares to be that of his arrest is now marked by a tall stone cross. Carried to Sunderland, he was examined by a Parliamentary Committee of sequestrators, and placed in chains. He confessed his profession, and voted up to the end. He was then sent to London, and after a few months was brought to Tyburn. He was there executed on 7 September, 1644, or rather, as is thought, that a few days earlier. The question has been much debated whether the executioner had the permission of King Charles I. It matters little now. Ducquet was a priest of the little Irish College at Paris, and was the only one of its number who was not sent on any mission to England. When the Carthusians at Paris were expelled in 1629, he took refuge in the old irish College of the Philippine Islands, and thence emigrated to England. He had been in London less than a year when he was arrested. He was a good preacher and writer, and one of the best known of the Irish priests in London at that time. He was a man of prayer, a patient sufferer, a man of noble spirit and great sanctity. He was one of the first to be put to death during the rebellion. He died for his profession, and not merely as a priest. He is not regarded as a martyr in Ireland.

Du Coudray, Philippe-Charles-Jean-Baptiste-Thronson, soldier, b. at Reims, France, 8 September, 1758; d. at Philadelphia, U. S. A., 11 September, 1777. He was educated for the army and showed great merit as an engineer. He was adjutant-general of artillery and considered one of the best military experts in France when, in 1776, he volunteered to go to America to assist the colonists in their struggle against England. Silas Deane and Benjamin Franklin, the American agents, promised him a commission as major-general with command of the artillery. This stipulation gave great offence to the officers already attached to the army when he arrived from France, in May, 1777, with twenty-nine other officers and twelve sergeants of artillery. Several of the more prominent threatened to resign. As a compromise he was made inspector-general 11 August, 1777, with the rank of major-general, and assigned to command the works along the Delaware. On 11 Sept., 1777, he was drowned while crossing the Schuylkill River at Philadelphia, the horse on which he was seated being frightened and dragging him overboard. Congress gave him an official funeral and attended his burial. His widow, niece, and daughter went to France. This was one of the four occasions on which Congress was officially present at Mass during the Revolution, the others being the requiem on 8 May, 1780, for Don Juan de Miraíles, the agent of the Spanish Government, and the Te Deums on 4 July, 1779, and 4 November, 1781, all being celebrated at St. Mary's, Philadelphia. Du Coudray was buried in St. Mary's churchyard, but the grave is now unknown.

THOMAS F. MEEHAN.

Ducure, Francis BENNOX, missionary in Mexico, b. at Munich, Bavaria, of French parents, 10 June, 1721; d. there 30 March, 1779. He became a member of the Society of Jesus in 1738, and ten years later was sent to California, where he labored zealously until the expulsion of the order in 1767. When that untoward event took place, Ducure was the superior of all the California missions. He submitted uncomplainingly to the decision of expulsion and cooperated with the royal commission in enforcing its provisions. The Jesuits withdrew, taking with them only their clothing and a few books; this was all the wealth they carried away from California after seventy years of work in its missions. Ducure eventually returned to his native land. He wrote in Latin "A Journey from California through the district of Mexico to Europe in the year 1767" which was translated into German for the "Nachrichten von verschiedenen Ländern des spanischen Amerika" of Christoph von Murr (Halle, 1809, 2d pt., p. 459-530). H. H. Bancroft regards this as "a standard work on the subject so far as California is concerned" (Works, XV. 475). He left also a "Relation of the Expulsion of the Society of Jesus from Mexico and in particular from California in 1767" which was translated into French and published by Fr. Carayon in his "Documents Inédits." (Paris, 1876). Ducure also gives some interesting speciments of the language of California, which were communicated to him by Ducure.

SOMMERVOGEL, Bibl. de la c. de J., III, 333, and Supplement; MURR, Biog. Mex. (Paris, 1901), p. 343; also JACOB, Mémoires Inédits (Poitiers, 1876); DE BACIER, Bibl. des écrits de la c. de J., 1, 1677; BANCROFT, North Mexican States and Texas (San Francisco, 1884); 1, 478, 478; GUNIC, California and Its Missions (San Francisco, 1884), 1, ch. ix., 178 sqq.

Edward P. Spillane.
DUDIK, Beda Franciscus, Moravian historian, b. at Kojetin near Kremsier, Moravia, 29 January, 1815; d. as abbot and titular bishop at the monastery of Raigern, 18 January, 1890. After studying at the philosophical school at Brunn he attended the University of Olmutz. In 1836 he entered the Benedictine Order and in 1840 was ordained priest at Raigern. From this latter date until 1854 he taught first philosophy and then theology at the gymnasium of Brunn. In 1855 he became Privatdozent for historical research at the University of Vienna; in 1859 he was appointed historiographer of Moravia, and in 1865 was made a member of the Academy of Sciences of Vienna. For purposes of historical research he went in 1851 to Sweden, in 1852 to Rome, in 1866 to the Waldsteinisches Korrespondenzämter, and from 1867 to Russia, a country which he later repeatedly visited. Between the years 1853 and 1859 he established at Vienna the main historical library of the Teutonic Order. Dudik was a prolific writer and diligent investigator; his works have a lasting value on account of the sources from which he drew. His chief works in chronological order are: "Geschichte des Benefiziums des Benediktinerstiftes Raigern" (2 vols., Brunn, 1819, 1839; 2nd ed., Vienna, 1868); "Mährisches Geschichtsquellen" (Brunn, 1850); "Forschungen in Schweden für Mährisches Geschichte" (Brunn, 1852); "Iter Romanum" (2 vols., Vienna, 1855); "Des Herzogtums Troppau" (2 vols., Vienna, 1866); "Korrespondenz aller Enthebung bis zur abmaligen Uebernahme des Armeekommandos" (Vienna, 1858); "Des hohen Deutschen Ritterordens Münzsammlung in Wien" (Vienna, 1859, a special edition with 32 copper plates); "Kleineuden des deutschen Ritterordens" (Vienna, 1860); "Archive im Kongreis Galizien und Lodomerien in Wien" (Vienna, 1868); "Sess. 1829 bis 1854 und 1847 bis 1860" (Vienna, 1867); "Preussen in Mähren im Jahre 1742" (Vienna, 1869); "Schweeden in Böhmen und Mähren 1640-1660" (Vienna, 1879); "Geschichtliche Entwickelung der Buchdruckerkunst in Mähren von 1186 bis 1621" (Brunn, 1879).

Dudik's most important publication is: "Mährisches allgemeine Geschichte" (12 vols., Brunn, 1849-1850); it treats the history of Mähren from 1130 to 1848. Volume VIII-X, which give an account of Moravia during the period of the Przemyslian dynasty, have been translated into Czech. He also published several papers in the transactions of the Academy of Sciences; in vol. LIV it appeared: "Korrespondenz Ferdinands II. mit seinen Bischöfinnern Becanus und Lamormain".

Rouze: Benediktiner, VII, 179.

PATRICK SCHLAGER.

Duel (duellum, old form of bellum).—This word, as used both in the ecclesiastical and civil criminal codes to-day, generally signifies every contest with deadly weapons which takes place by agreement between two persons on account of some private quarrel. Thus a death which is essentially due to the consequences of a duel. Further, the contest must take place by agreement, and the weapons used must be capable of inflicting deadly wounds. Although generally demanded by custom, similarity of weapons is not essential, neither are witnesses, seconds, etc. Finally, it is essential to a duel that it take place on account of some private matter, such as wounded honor, etc. The custom of the duel of to-day differs from those public duels which took place for some public reason by the arrangement of the authorities, as the conflict between David and Goliath. Between contending nations there is no higher court than the appeal to arms; therefore war must decide, and there may be instances in which it is allowable to substitute for a battle between two armies a contest between two persons selected for the purpose.

History.—Dueling was unknown to the civilized nations of antiquity. The contests of the Roman gladiators were not, like the duels of to-day, a means of self-defence, but bloody spectacles to satisfy the curiosity and cruelty of an effeminate and degenerate people. On the other hand the custom of duelling existed among the Gauls and Germans from the earliest era, as Dio Cassius records (in his Ist. hist., Lib. V, ch. xii, 11), Velletio Paterculus (Histor. regum Belgicarum, 16), and others relate. The duel is, therefore, undoubtedly of heathen origin, and was so firmly rooted in the customs of the Gauls and Germans that it persisted among them even after their conversion. The oldest known law of Christian times that permitted the judicial duel is that of the Burgundian law of Gundobald, in which four forms of judicial duel are mentioned. In all German laws the custom of the judicial duel is mentioned in all old German laws as a legal ordeal. It rested on a twofold conviction. It was believed, first, that God could not allow the innocent to be defeated in a duel; hence it was held that the guilty party would not dare primarily to appeal to the judgment of God in proof of his innocence and then enter upon the fight under the weight of perjury; the fear of Divine wrath would discourage him and make victory impossible.

The Church soon raised her voice against duelling. St. Avitus (d. 518) made an earnest protest against the law of the above-mentioned Gundobald, as is related by Agobard (d. 840), who in a special work on the subject points out the opposition between the principles of the Gospel; God might very easily permit the defeat of the innocent. The pope also at an early date took a stand against duelling. In a letter to Charles the Bald, Nicolas I (585-67) condemned the duel (monomachia) as a tempting of God. In the same century his example was followed by Stephen VI, later by Alexander II and Alexander III, and many others. In addition to the judicial, non-judicial combats also occurred, in which men arbitrarily settled private grudges or sought to revenge themselves. The tournaments, especially, were often used to satisfy revenge; on account of this misuse the Church early issued ordinances against the excesses committed at the tournaments which were not obeyed. The more the judicial combat fell into disuse, the more the old instinct of the Germanic and Gallic peoples, by which each man sought to gain his rights with weapon in hand, showed itself in personal contests and at tournaments. From the middle of the fifteenth century duelling over questions of honour increased so greatly, especially in the Roman court, that the popes were obliged to enact the severest penalties against it. It decreed that "the detestable custom of duelling which the Devil had originated, in order to bring about at the same time the ruin of the soul and the violent death of the body, shall be entirely uprooted from Christian soil" (Sess. XXIV, De reform., c. xix). It pronounced the severest penalties against all those princes who should permit duelling between Christians in their territories. According to the council those who take part in a duel are ipso facto excommunicated, and if they are killed in the duel they are to be deprived of Christian burial. The seconds and all those who advised the duel or were present at it are also excommunicated. These ecclesiastical penalties were at a later date repeatedly renewed and even in parts made more severe. Benedict XIV decreed that duelists should also be denied burial by the Church, even if they did not die on the duelling ground and had received absolutio before death. All these penalties are substantially in force to-day. Pius IX, in the "Constitutio Apostolica Sedis" (1869), decreed the penalit"
to the duel or who in any way abet or encourage the same; and finally against those who are present at a duel as spectators [de industria spectantium], or those who permit the same, or do not prevent it, whatever their rank, even if they are kings or emperors".

Like the Church, the State also took steps against the evil of duelling. In 1680 an edict against the practice was issued by Henry IV of France. Whoever killed his opponent in a duel was to be punished with death; severe penalties were also enacted against the sending of a challenge and the acceptance of the same. Unfortunately transgressors against this law were generally pardoned. In 1629, Henry's successor, Louis XIII, the laws against duelling were made more stringent and were strictly carried out. Notwithstanding these measures the custom of duelling increased alarmingly in France. The great number of French noblemen who fell in duels about the middle of the seventeenth century, is shown by the statement of the contemporary writer Théophile Raynaud that within thirty years more men of rank had been killed in duels than would have been needed to make up an entire army. Olier, the founder of the Congregation of Saint-Sulpice, with the aid of St. Vincent de Paul, formed an association of distinguished noblemen, the members of which signed the following obligation: "The undersigned publicly and solemnly make known, as a mutual obligation, the nature of their oath, refusal in every form of challenge, will for no cause whatever enter upon a duel, and will in every way be willing to give proof that they detest duelling as contrary to reason, the public good, and the laws of the State, and as incompatible with salvation and the Christian religion, without, however, relinquishing the right to avenge in every legal way any insult offered them as far as possible with munificence and moderation." "Fatory." Louis XIV aided these efforts at reform by the severe enactment against duelling which he issued early in his reign. For a long time after this duelling was infrequent in France.

In other countries too severe measures were taken against the constantly spreading evil. In 1081 the Emperor Leopold I forbade the fighting of duels under the severest penalties; Maria Theresa ordered not only the challenger and the challenged but also all who had any share in a duel to be beheaded, and in the reign of the Emperor Joseph II duellists received the punishment of murderers. Frederick the Great of Prussia tolerated no duellists in his army. The present penal code of Austria makes imprisonment the punishment of duelling in a private capacity. The French Code Général provides for condemnatory terms of confinement in a fortress. The penalty is, without doubt, entirely insufficient and constitutes a form of privilege for the person who kills his adversary in a duel. Theoretically these penal laws are also applicable to the respective armies, but unfortunately in the case of officers they are not carried out; indeed, up to the present time, an officer who refuses to fight a duel in an army is usually considered fit to be dismissed from the army. In 1896 when, in consequence of the fatal issue of a duel, the Reichstag by a large majority called upon the Government to proceed by all the means in its power against the practice of duelling, as opposed to the criminal code, the emperor issued a cabinet order on 1 January, 1897, which established formal orders to the army concerning questions of honour. Unfortunately the decree leaves it open to the court of honour to permit or even to command a duel to take place. Furthermore, on 15 January, 1906, General von Einem, Prussian Minister of War, stated that the principle of the duel was still in force, and Chancellor von Bulow added to this: "...the corps of army officers can tolerate no member in its ranks who is not ready should necessity arise to defend his honour by force of arms". In the army, as a result of this principle, a conscientious opponent of duelling is constantly exposed to the danger of being expelled for refusing to fight. In England duelling is almost unknown, and no duel has occurred, it is said, in the British army for the last eighty years. English jurisprudence contains no special ordinances against duelling; the wounding or killing of another in a duel is punishable according to common law. On the Continent also public opinion on the subject of duelling seems to be gradually changing. The demand for the abolition, even in the army, of this abuse is growing louder and louder. Some years ago, at the instance of the Infante Alfonso of Bourbon and Austria-Este, an anti-duelling convention was held, which met with no systematic opposition to duelling. A preliminary convention, held at Frankfort-on-the-Main in the spring of 1901, issued an appeal for support in its struggle against this evil. In a few weeks a thousand signatures were received, mostly those of men of influence from the most varied ranks of society. A convention to draw up a constitution met at Casel 11 January, 1902, and Prince Carl zu Lüwenstein was elected president. A committee was also appointed to direct affairs and to conduct the agitation. The league has made most satisfactory progress; in 1905 it established a permanent bureau at Leipzig. Concerning the aims of the league the declaration subscribed by the members states the following: "The undersigned, therefore, declare, as a first principle, of duelling as a custom repugnant to reason, conscience, the demands of civilization, existing laws, and the common good of society and the State."

**WRONGFULNESS OF DUELING.—**After what has been said above there can be no doubt that duelling is contrary to the ordinances of the Catholic Church and of most civilized countries. By the wording of its constitution, the Council of Trent plainly indicated that duelling was essentially wrong and since then theologians have almost universally characterized it as a sinful and reprehensible course of action. However there were always a few scholars who held the opinion that cases might arise in which the unlawfulness of duelling could not be proved with certainty by mere reason. But this opinion has not been tenable since Pope Benedict XIV in the Bull "Detestabiliem" of the year 1752 condemned the following propositions: (1) "A soldier would be blameless and not liable to punishment for sending or accepting a challenge if he would be considered timid and cowardly, worthy of contempt, and unfit for military duty, were he not to send a challenge or accept a challenge when he would lose the position which supported him and his family, or who would be obliged to give up forever the hope of befitting and well-earned advancement." (2) "Those persons are excusable who to defend their honour or to escape the contempt of men accept or send a challenge when they know positively that the duel will not take place but will be prevented by others." (3) "A general or officer who refuses to fight a duel in his army is not considered to be discharged from his duty of protecting the public order and the peace, or of contributing to the morals of his officers and soldiers, or of preventing duelling, But if the loss of his reputation and his position does not come under the ecclesiastical punishment decreed by the Church for duellists." (4) "It is permissible under the natural conditions of man to accept or send a challenge in order to save one's fortune, when the loss of it can not be prevented by any other means." (5) This permission claimed for natural motives can also be granted in cases in which, especially, justice is openly denied by the remissness or malevolence of the authorities." Like his predecessors, Leo XIII in his letter "Pastoralis offici", of 12 September, 1891, to the German and Austro-Hungarian bishops, laid down the following principles: "From two points of view the Divine law forbids a man as a private person to wound or kill another, excepting when he is forced to it by self-defence. Both natural reason and the inspired Holy Scriptures proclaim this Divine law,"
The intrinsic reason why duelling is in itself sinful and reprehensible is that it is an arbitrary attack on God's right of ownership as regards human life. Only the owner and master of a thing has the right to pleasure to destroy it or expose it to the danger of destruction. But man is not the owner and master of his life; it belongs, instead, entirely to his Creator. Now man can only call that his property and treat it as such which is intended by himself for his own benefit, so that he has the right to exclude others from the use of the same. Man, however, is not created primarily for himself but for the glory and service of God. Here below he is to serve his Creator and Lord as long as the Lord wills and thus attain his own salvation. For this end God has given man life, maintains it for him, and has been pleased to give him the means of self-preservation. But if man is not the master of his life, he has not the right to expose it at pleasure to destruction or even deliberately to seek such danger. In order rightfully to expose the life to danger there must be a justifiable reason, and even then the risking of life is only permissible, not the end to be sought in itself. What is said of one's own life applies also to the life of another, that is to say, in case of necessity forcibly to defend himself against an unlawful attack on his life, even if it cost the life of the assailant; this is a requirement of public safety; but apart from such defence no man has the right as a private individual to injure the life of his fellow-man or at pleasure to expose his own to similar danger. If a man is guilty of gross personal injury, he is in- ably exposes both his own life and that of his fellow-man, consequently is guilty of a wrongful assumption of the right of God, the Lord of life and death. To make this clear it is only necessary to examine the pretexts used to palliate duelling, or, what is the same, to look into the aims sought to be attained by this custom. One of the principal reasons given in justification of duelling is something of satisfaction. A man is in- suited or injured in reputation, and in order to obtain satisfaction challenges the defamer. But besides the offence against civil law in seeking to establish one's rights with weapons, thus evading the authority of the State, a duel is totally unsuited to the attainment of satisfaction and in addition is wrongful. Satisfaction consists in the offender withdrawing his insult and publicly offering due reparation. This end cannot, however, be attained by duelling. When the one who has given the provocation accepts the challenge he does not thereby withdraw the insult; he intends, rather, to maintain it by weapons and shows himself, moreover, ready to add other and greater wrongdoing to the first, inasmuch as he may severely wound or even kill the challenger. Moreover, who would allow to the man whom he wishes to compel to make good a wrong the same chance of victory as to himself, i. e. who would give the offender the opportunity to add to the wrong he has already done an even more heinous injury? Yet this is what the chal- lenged does in granting his adversary the same weapons and the same chance for success as he claims for himself.

Another reason offered in justification of duelling is self-defence. The duel list desires to avoid the loss of the respect of his peers and thus to retain his office and his income, or, as is said, to defend his honour and his social position. It is unfortunately only too true that to-day the conscientious opponent of duelling, especial- ly in the army, must often suffer great losses. Nevertheless duelling cannot be justified as self-def- ence. Honour and the respect of others cannot be preserved by the use of arms, nor in a duel is there any actual vindication of these. The duel implies that the honour of the challenger has already been injured, and consequently that this injury is an accomplished fact; besides, the duel takes place according to agreement, so that it is not a case of self-defence against sud- den attack. But the word self-defence is used in a broader sense. According to the prejudices existing in certain circles, the person who does not answer an insult by a challenge or who declines a challenge is held to be dishonourable and cowardly; thus it may be that a man's entire social position is at stake. Yet, from its very nature, a duel is an unsuitable and illicit method of preserving or rehabilitating honour. Look at a duel first from the point of view of the person injured. He must, it is said, send a challenge because he has been insulted. Two cases, however, are here possible. Either his moral character and good name have been attacked, or the specific charge of cowardice has been made against him. If the former be the case, the duel is manifestly unsuited to defend the injured person's honour; it has no hold either to the person attacked is a man of honour, is not a simpleton, has not committed adultery, or the like. A man without character or morals can be just as skilful in handling weapons as his honourable opponent. If the quarrel hinges on the charge of cowardice, a duel is apparently a proper means of disproving the same. But in this instance the challenger directly endangers the life of his opponent, for in case of injury he has no hold; consequently he cannot say that he only suffers his life to be endangered, he deliberately seeks this danger in order to show his courage. And, according to our former statements, this is to dispose of one's life unlawfully. It cannot be said in reply that the injured person merely intends the rehabilitation of his honour. Indirectly the means to a man's end is his own courage, and direct aim is to prove one's courage by fighting the duel. Is it permissible, however, to risk one's own life and that of one's fellow-man merely as a means of proving one's courage? If this be correct, it would be equally allowable to enter a lion's cage, sword in hand, if public opinion demanded such proof of per- sonal bravery. Hence it follows that the duel is not in reality a proper means to demonstrate one's courage for true courage is a moral virtue which is not blind and foolhardy, but exposes itself to danger only if reason demand it. What has been said of the injured party is applicable also to the party giving the provocation, the one who is challenged. If he has acted unjustly he should as a man of honour offer reparation; that is his duty, and the refusal to make this offer only gives more cause for the injured party to fight a duel with his opponent. If he is not in the wrong he ought to refuse the challenge. The only ground for which a chal- lenge might be accepted would be fear of the accusation of cowardice; that this reason is, however, not tenable has already been shown. It surely is the basest cowardice to do, through fear of being accused of want of courage, what sober reflection would lead any man of sense to condemn as immoral and wrong.

The conclusion necessarily to be drawn from the above is: whoever is killed in a duel is indirectly guilty of self-murder, because he has for no justifiable reason risked his life, and whoever slays his adversary in a duel is guilty of unjustifiable homicide, because he has taken the risk of causing death without any right or reason for so doing; this holds true despite the indi- rectly intend his opponent's death. The above applies not only to duels undertaken by private individuals of their own free will, but also to duels fought on account of personal grievances by order of State authorities. Those in authority have not the right to dispose at their pleasure of the life of the subject. Should a dispute be laid before them, they should ex- aminate the matter judicially and punish the guilty party. If the guilt cannot be proved the accused should be acquitted; in such case the authorities have no right to command a duel and thus expose the innocent to the same peril as the guilty. This has all the more force, as duels often take place on account of wrongs which are not to-day punished with death by civil law.
DUFFY, SIR CHARLES GAVAN, politician and author, b. at Monagham, Ireland, 12 April, 1816; d. at Nice, France, 9 Feb., 1903. Educated in his native town, he contributed, at an early age, to the "Northern Herald," and in 1836 joined the staff of the Dublin "Morning Register" of which he shortly afterwards became sub-editor. In 1839, being appointed editor of the newly established Ulster Catholic paper, "The Vindicator," he went to Belfast, where he resided till 1842. Going to Dublin in the summer of that year, he met two young barristers, Thomas Davis and John Dillon, and in conjunction with them he founded "The Nation," the first number of which appeared in October. Duffy was editor, Dillon and Davis were among its contributors, and what with the ability of the editor and the sagacity, firmness and vigour of style, and the manly and militant tone adopted upon public questions, the paper soon became a power. Its whole-hearted support of Repeal filled the meetings and the coffers of the Repeal Association, and O'Connell gratefully recognized its assistance. Peel also noted its influence, and when O'Connell was prosecuted in 1841, Duffy was with him in the dock, and subsequently his fellow-prisoner in Kilmainham. Later, in the struggles between the Young and the Old Ireland, Duffy took sides with the former against O'Connell, and was one of those who helped to found the Irish Confederation. He specially resented O'Connell's alliance with the Whigs, as he did the intolerance and presumption of John O'Mahony. In 1849, Duffy reverted to constitutional agitation, and with Lucas and others established in 1850 the Tenant League, which at the general election of 1852 returned forty members of parliament pledged to Tenant Right and Independent Opposition, Duffy himself being returned for New Ross, County Wexford. The treachery of the place-hunters, Knoop and Sadlier, soon wrecked the plan when Lucas died, Duffy vacated his seat and left for Melbourne, Australia, where he arrived early in 1856. Though determined to avoid politics, he was induced to write the Victorian Parliament, where his great abilities made him at once a prominent figure. He filled in succession the position of minister of public works and minister of public instruction. For a brief period was prime minister. Ultimately he became speaker. He received also the honour of knighthood. His honours and dignities he reached without ever denying either his country or faith, or ever failing to defend them when assailed. He consistently championed the labourers and the farmers against the capitalists and the squatters, and when he left Victoria in 1860 the whole colony regarded him as one of the ablest and most useful of her public men. His last years were devoted to writing several valuable historical works: "Young Ireland" (Dublin, 1884); also his "Four Years of Irish History" (London, 1883); "The League of North and South" (London, 1886); and "My Life in Two Hemispheres" (London, 1903). DUFFY, Life of Cardinal Sadler (London, 1887); MITCHELL, The Last Conquest of Ireland (Perhaps) (New York, 1890); O'CONNELL, Correspondence (London, 1885).

E. A. D'ALTON.

Duhamel, Jean-Baptiste, a French scientist, philosopher, and theologian, b. at Vire, Normandy (now in the department of Calvados), 11 June, 1624; d. at Paris, 6 August, 1706. He began his studies at Caen and completed them at Paris. In 1642, being only eighteen years of age, Duhamel published an explanation of the work of Theodosius called "De Sphère," to which he added a treatise on trigonometry. The following year he entered the Congregation of the Oratory, which he left ten years later to take charge of the parish of Neully-sur-Marne. Resigning this position in 1663, he became chancellor of the church of Bayeux. When Colbert founded the Académie des Sciences (1666), he appointed Duhamel its first secretary. Duhamel held this office until he resigned, when his position on recommendation, was succeeded by Newton. With Colbert's brother, the Marquis de Croissy, he went, in 1668, first to Aix-la-Chapelle for the peace negotiations, and later to England, where he came in touch with the foremost scientists, especially with the physicist Boyle.

Duhamel's works are: Philosophia moralis christiana (Paris, 1652); "Astronomia physica" (Paris, 1659); "De meteoris et fossilibus" (Paris, 1659); "De consensu veteris et novae philosophiae" (Paris, 1663), a treatise on natural philosophy in which the Greek and scholastic theories are compared with those of Descartes; "De corporum affectionibus" (Paris, 1670); "De mente humana" (Paris, 1672); "De corporate animato" (Paris, 1673); "Philosophia scholastica et novae" (Paris, 1678). This last work, composed by order of Colbert as a textbook for colleges, ran through many editions. He also published: "Theologia speculatrix et practica" (7 vols., Paris, 1690), abridged in five volumes for use as a textbook in seminaries (Paris, 1694); "Regiae scientiarum Academiae historia" (Paris, 1688); "Inscriptiones sacrae" (Paris, 1698), in which he examined the questions of the authority, integrity, and inspiration of the Bible, the value of the Hebrew text and of its translations, the style and method of interpretation, Biblical geography, and chronology; "Biblia sacra Vulgatae editionis" (Paris, 1705), with introductions, notes, chronological, historical, and geographical tables. In his choice of opinions, Duhamel shows great skill, and unbiased judgment. His admiration for empirical science does not make him despise the speculations of his predecessors, but he examines and criticizes both sides carefully, tries to reconcile them, and, if this be impossible, gives his own opinion. Brucker, in his history of philosophy, calls him "vir et judicis laudabilis et doctrinae copia celeberrimae" and praises his noble character and his disinterestedness; his charity, which "was exercised too frequently not to become known, notwithstanding his care to conceal it"; his humility, which was not only on his lips, but was "a feeling based on science itself.

Du Lhut (Duluth), Daniel Greysonol, Sieur, b. at St. Germain-en-Laye about 1640; d. at Montreal, 26 Feb., 1710. He first served in the French army, becoming a lieutenant in 1657 and a gendarme of the King's Guard in 1664. He also took part in the campaign in Flanders and was present at the battle of Steenkerke in 1674. He went to Canada whither he had been preceded by several members of his family, amongst them his cousins, the Tontys. At first he settled in Montreal, but in 1675 left for the West accompanied by his brother, La Tourette, and six soldiers. In 1679 he took possession of the Sioux country in the name of the King of France. He also explored Lake Superior and the high inland plateau where the Mississippi, the Red River, and the St. Lawrence rise, erected the fortified post of Kamistiquin (now Fort William) and afterwards built Fort La Tourette on Lake Nepigen. Du Lhut was the first Canadian to explore the West and it was his privilege to save Father Hennepin from captivity when this famous Recollect missionary, having become separated from the post of Detroit, was wandering about in the wilderness near Saint-Antoine. On account of his intrepidity, Du Lhut had great influence over the savages, who admired and feared him; he kept them loyal to France and obliged them to join the expeditions which La Barre and Denonville organized against the Iroquois in 1681 and 1687. In 1686 he laid the foundation of the post of Detroit and in 1696 he had been made captain after twenty years of service, in command of Fort Frontenac. Here, in 1707, he was succeeded by Tonty, his cousin. He died three years later and was buried in the church of the Recollets at Montreal.

Du Lhut was one of the most dauntless pioneer rangers (coureurs de bois) in Canada during the French régime. For thirty years he succeeded in keeping the country to the west of the Great Lakes under French control. Notwithstanding that he had every chance of becoming wealthy, he died poor and Governor Vaudreuil testified to him having been a very upright man. The city of Duluth, Minnesota, takes its name from him. Du Lhut wrote accounts of his journeys (1678-87), and these have been lost; however, we have a plan that he designed for a chain of posts to be erected for the purpose of keeping the lake-route clear of savages and thus facilitating communication between Canada and the western and southern parts of the continent (1683-93). This plan was published by Margry (Découvertes et Établissements, V, 3-72). In the Library of Congress at Washington may also be found extracts from his account of Detroit.

Dulée in La Revue Canadienne (1893), 480-489, 541-556; McLennan in Harper's Magazine (September, 1893); Transactions Royal Soc. Canada (1904), new series, IX, 39.

J. EDMOND ROY.

Dulua (Gr. ὁ δοῦλος; Lat. servitus), a theological term signifying the honour paid to the saints, while latraia means worship given to God alone, and hyper-
dulua the veneration offered to the Blessed Virgin Mary. St. Augustine (De Civ. Dei, X, i, 1) distinguishes two kinds of servitus: "one which is due to men ... which in Greek is called dulua; the other, latraia, which is the service pertaining to the worship of God". St. Thomas (II-II, Q. ciii, a. 3) bases the distinction on the difference between God's supreme dominion and the power of the hands of men. Catholic theologians insist that the difference is one of kind and not merely of degree; dulia and latraia being as far apart as are the creature and the Creator. Leibniz, though a Protestant, recog-
nizes the "discrimen infinitum atque immensum be-
tween the honour which is due to God and that which is shown to the saints, the one being called by theo-
logians, after Augustine's example, latraia, the other dulua"; and he further declares that this difference should "not only be inculcated in the minds of prepa-
rers and learners, but should also be manifested as far as possible by outward signs" (Syst. theol., p. 184). A further distinction is made between dulia in the abso-
late sense, the honour paid to persons, and dulia in the relative sense, the honour paid to inanimate objects, such as images and relics. With regard to the latter, St. Thomas distinguishes between the outward; the former being the honour paid directly to them, the latter having primarily in view the peti-
tioner's advantage. More detailed explanation of dulia and the reasons for which it is shown to persons or things will be found in the articles Images, Relics, Saints. See also Adoration and Worship.

E. A. PAGE.

Duluth, Diocese of (Duluthensis), established 3 Oc., 1889, suffragan of the Archdiocese of St. Paul, U. S. A., comprises the counties of Aitkin, Becker, Beltrami, Carlton, Cass, Clay, Clearwater, Cook, Crow Wing, Hubbard, Itasca, Kittson, Lake, Marshall, Norman, Pine, Polk, Roseau, Red Lake, Mahnomen, Koochiching, and St. Louis. It was erected in 1883 as an ecclesiastical district, and in 1889 became a diocese, having a territory of 39,459 square miles. The first white men and the first Catholics to visit this region were the French fur-traders who, under Groseilliers, are recorded as having shipped furs from there in 1660. Daniel Greysonol Du Lhut, the French officer, adven-
turer, and fur-trader after whom the see city is named, was there in 1679. After a varying existence as trad-
ings-post and military post, the first frontier station was erected at a town in May, 1857. The first priest in Minnesota was the famous Father Hennepin, who in 1680 was a prisoner among the Sioux. He explored the Mississippi and at St. Paul named the falls in honour of St. Anthony, writing a glowing description of them in 1683. Wandering missionaries made in-
frequent visits to the Indian tribes and scattered Catho-
lics of the region down to 1839, when the Rev.
Joseph Crétin (q.v.), a zealous French priest, began an active and successful missionary career.

The Seventh Provincial Council of Baltimore (1849) recommended to Rome the erection of a new see at St. Paul for the Territory of Minnesota and the appointment of Father Crétin as its first bishop, which plan was carried into effect. Father Crétin remained a vicar for some time, trying to revive the old Indian missions and evangelize the Canadian voyageurs who went there for the fur trade. The numerous Indians roaming in the wilderness had nearly forgotten the doctrines of Christianity preached to their ancestors by the Recollets and Jesuits more than a century be-
fore, but they were still anxious to have the "black-
robes" come among them once more. In 1875 the Vicariate Apostolic of Northern Minnesota was estab-
lished, and these two divisions of the whole State were-
tained until 4 May, 1888, when St. Paul was raised to the rank of an archdiocese with the four suffragan sees of Duluth, Winona, Jamestown (now Fargo), and St. Cloud, the last-named being the new title for the Vicariate of Dakota. Father Crétin, who had been vicar for thirty years in the vicariate, was within these few limits of the vicariate. In 1866 the few Catho-
lics there were brought together by a visiting missionary. They numbered only about two dozen families in 1870, and Father John Chebul, an Austrian by birth, attended them as a mission from Superior and built the first frame chapel for their use. Other priests and Father McGolrick, a German, G. Keller, a German, J. B. M. Goin, a French Oblate, Joseph Buh, Charles Verwyst, Joseph Staub, Christo-
pher Murphy, and G. J. Goebel.

The Rev. James McGolrick, a member of the
council of Bishop Ireland of St. Paul and rector of the church of the Immaculate Conception, Minneapolis, was nominated as the first bishop of the new see and consecrated at St. Paul, 27 Dec., 1889. He was born 1 May, 1841, at Borrisokane, County Tipperary, Ireland, and ordained for the American mission at All Hallows Seminary, near Dublin, 11 June, 1867. Emigrating to the United States, he began his work at St. Paul as an assistant at the cathedral. He was next appointed to establish a parish in the then rising town of Minneapolis and remained there for twenty-two years as pastor of the church of the Immaculate Conception. He found, on taking charge of his new diocese, a Catholic population of about 19,000, of which 36,000 were Indian students, 35 priests, 15 resident, 5 regular; 34 churches, 10 stations, and 8 Chipewa Indian missions attended by Benedictine, Franciscan, and Jesuit missionaries.

The first railroad from Duluth to St. Paul ran only in 1870, and in 1882 the first iron-race road, on which industry the chief reliance for material prosperity rested. The commercial panic of 1872 and 1893 were a reaction to this situation, but it was then that the priests had increased to 38 and the missions and stations to 74 with 30 Indian missions and stations. The Sisters of St. Benedict had been introduced and were in charge of 9 parish and 2 Indian schools, with 1400 children. They also managed 2 hospitals and a home for the aged. The Catholic population had also increased. The data are not yet gathered, but the statistics of the dioese for 1905 give these figures: priests 65, 44 secular, 21 regular; churches with resident priests 50; missions with churches 36; stations 45; chapels 15; academies for girls, with 395 pupils; parish schools 10, with 1386 pupils; Indian industrial schools 2, with 192 pupils; orphan asylum 1; hospitals 6; Catholic population 57,050; Indian 4300. The religious communities represented in the dioese are the Benedictine and the Oblate Fathers, the Christian Brothers, the Benedictine Sisters, and the Sisters of St. Joseph. The Benedictine Fathers have charge of the Indian missions, and the Benedictine Sisters attend to the needs of the schools established for the benefit of the Indian children in the Territory of the Dakotas. Red Lake and White Earth reservations being especially successful in spite of scant means and other disadvantages. The constant good done by these institutions, to the ends of the tribes especially, has been manifested by every test applied to their operation. The Christian Brothers have a high school attached to the cathedral in Duluth.

Dumas, Jean-Baptiste, distinguished French chemist and senator, b. at Alais, department of Gard, 11 July, 1800; d. at Cannes, 10 April, 1884. Like many other distinguished chemists, Dumas began his career as a pharmacist, and at Geneva, where he went when a very young man, he obtained a position in the Le Royer pharmacy. Here in connexion with Prévost he published a memoir on the physiology of the nervous system, which attracted attention and is still well known. This led to an invitation to go to Paris, where he became tutor of Thénard's course of lectures in chemistry at the Ecole Polytechnique and was appointed professor at the Athénée. While engaged in these positions he published researches concerning the vapour density of the elements, those on the formulae of alcohols and ethers, his memoirs on the law of substitution in organic compounds, and his work on chemical types gave him an illustrious position in chemical investigation. The first researches on the replacing of hydrogen by chlorine in organic bodies is due to him; this was supplemented by researches as to the atomic weight of carbon, his labours doing much to establish the relations of the hydro-carbon compounds in organic chemistry. With Boussingault he studied the composition of water and of the atmosphere. With Thénard he investigated the composition of carbon dioxide, and later his memoirs on hydrogen and the amide compounds brought him at once into the first rank among the chemists of the nineteenth century.

In 1829 he founded the Ecole Centrale des Arts et Manufactures with Pénet, Lavallée, and Olivier. Brilli-

Dumetz, Francisco, date of b. unknown; d. 14 Jan., 1511. He was a native of Mallorca (Majorca), Spain. He entered the Franciscan Order. On May, 1770, he went to Mexico with forty-eight other Franciscans to join the famous Franciscan missionary college of San Fernando in the City of Mexico. On volunteering for the Indian missions, he was sent to California in October, 1770. Sailing from San Blas, Jalisco, with ten friars in January, 1771, he reached Monterey in May and was assigned to Mission San Diego. In May, 1772, he was transferred to Mission San Carlos, and in May, 1782, was appointed for Mission San Buenaventura, where he continued his unostentatious labours for the Indians until August, 1797, when he was directed to found Mission San Fernando. Father Dumetz remained there from its founding on 3 Sept. to the end of 1805, except during 1803 and 1807 when he apparently rested at San Gabriel. From January, 1806, to the time of his death, Father Dumetz was stationed at San Gabriel. His remains were buried in the mission church on 15 January. Dumetz was the last of the pioneer friars who did so much for California, where he toiled without interruption for forty years.

ZEPHYRIN ENGELHARDT.

Dumfries, Diocese of. See GALLOWAY.

Dumont, Hubert-André, Belgian geologist, b. at Liège, 15 Feb., 1809; d. in the same city, 28 Feb., 1857. When only twenty years old he received the gold medal of the Academy of Brussels for his "Description géologique de la province de Liège". This memoir marked an important advance in stratigraphical geology. In 1836 he won a doctorate in mathematical and physical science and in the same year was appointed professor of geology and mineralogy at the University of Liège. He held this position till his death, serving also for a time as rector of the university. His native city has erected a statue in his honour. Dumont was a devout Catholic, and one of his sons entered the Society of Jesus. His principal achievement was his geological map of Belgium, the preparation of which engaged his attention for a number of years. The first edition was issued in 1849. Later and more complete editions followed, the last being "La carte géologique de la Belgique et des contrées voisines représentant les terrains qui se trouvent en dessous du limon hesbayen et du sable campinien au 800,000".

Dumont's work, together with that of Gosselet on the palaeozoic rocks of Belgium, served as a foundation for a subsequent research in that country. The greater in 1848 had divided the Terrain Ardennaïs into the Devilvillien, Revinien, and Salmiens groups, the Terrain Rhénan into the Gedinien, Coblenzien, and Ahrien groups, and the Terrain Anthracifere into the Eifelien, Condruisen, and Houlfier groups. This classification, though based on purely local characteristics, was an excellent one both from a lithological and a stratigraphical point of view. He did not, however, deem it necessary to make any extended comparison between the subdivisions which he had distinguished in Belgium and similar groups in other countries. It was his opinion that the same fauna never extended over the whole earth, so that extreme caution was necessary in establishing a parallel between widely separated rocks on the basis of fossils contained in them. Besides the works already mentioned, Dumont was the author of a number of papers characterized by careful observation and great clearness. Among them the following "Note sur la cendre phosphorique" (Bull. de l'Acad. de Belgique, V); "Observations sur la constitution géologique des terrains tertiaires de l'Angleterre comparés à ceux de la Belgique" (Ibid., XIX); "Mémoire sur les terrains triasique et jurassique de la province de Luxembourg" (Mem. de l'Acad., XV). "Étude sur les terrains ardenais et rhétien de l'Ardenne, du Rhin, du Brabant, et du Condroz" (Ibid., XX—XXII).

HENRY M. BROCK.

Dumoulin (or DUMOLIN; latinized MOLLINEUS), Charles, French jurist, b. at Paris in 1500; d. there 27 December, 1560. He was a descendant of a noble family related to Anne Boley, the mother of Elizabeth of England. The family was renowned for its piety and vicissitudes. After taking the degree of Doctor of Law, he first lectured on that subject at Orleans in 1521, and afterwards became an advocate of the Parliament of Paris (the highest court of France). He soon abandoned this position, devoted himself exclusively to the study of law, and gained a great reputation by his works on jurisprudence. He liked to call himself the jurisconsult of France and Germany. It is related that he said: "Ego qui nemini cede nec a nemine doceo possum" (I yield to no one nor is anyone able to teach me). His hatred for the papacy led him into apostasy. In 1542 he embraced Calvinism, but soon passed over to Lutheranism. His violent attacks on the papacy compelled him to seek refuge in Germany. In 1543 he lectured on law at Tübingen, and afterwards at Strasbourg, Dôle, and Besançon; returning to Paris in 1557, he was soon obliged to quit that city and went successively to Orleans and Lyons. From 1561, he resided again in Paris; on his death-bed he abjured his heresy and was reconciled to the Church. The following are his principal works upon civil law: Commentaries ad editum Henrici II, contra parvas datas et abusus curie Romanae" (1552); "Conseturur fuit du Conde de Trente, reception ou rejet d'ielii" (1564), which work caused him to be cast into prison; "Consilium super commodis et incommodis novae sectae Jesuitarum" (1604). His "Opera omnia" were published in three volumes at Paris, in 1612; the best edition, however, is that of Paris, 1681, in five volumes.

VAN HOVE.

Dunbar, William, Scottish poet, sometimes styled the "Chaeuer of Scotland", born c. 1460; died c. 1520). He graduated B.A. at St. Andrews University in 1490. Elected fellow of the University according to his own statement he became a Franciscan novice, and as such traversed the whole of England, preached in various towns, and crossed over for a time to Picardy in France. About 1490 he returned to Scotland and entered the service of James IV, who employed him on various embassies to Paris and elsewhere, and settled
a small pension on him. He celebrated James's marriage to Margaret of England by his well-known poem “The Thrissil and the Rois” (The Thistle and the Rose, 1503), symbolizing the amity between the two kingdoms. The poet received gifts in money from the king on this and on other occasions, such as the celebration of his first Mass in 1504, but though he often petitioned both the king and queen for a benefice (limiting his wishes, as he said, to a small country Kirk covered with heather) he never obtained one, and seems always to have lived in poverty. The best known of his other poems were the “Goldyn Targe”, an allegory illustrating the victory of love over reason; a “Dance” (of the seven deadly sins), a work of much gloomy power; and many other pieces, some humorous and disquieting, and others the coarsest of the time, others of a religious and ascetic type. A few were printed during his lifetime; and in 1834 an admirable edition of his complete works was published, edited by Dr. David Laing.

In 1511 Dunbar is mentioned among Queen Margaret's train on one of her journeys; but nothing is heard of him after 1513, the year of the battle of the Flodden. Laing conjectures that he may have fallen as a knight, but other writers suppose him to have survived until about 1520.

Laing, Works of Dunbar, with biography and notes (Edinburgh, 1834; supplement (1876).

Dunboyne Establishment. See St. Patrick's College (Maynooth).

Dunchad (DUNCHAD, DUNCAD, DONATUS), Saint, confessor, Abbot of Iona; date of b. unknown, d. in 717. He was the son of Cennachael and grandson of Maelcobha of the house of Conall Gulban. He is first heard of as Abbé of Kilmurry, at the request of S. F. Ulster (perhaps Killough, County Down). There is considerable dispute as to the year in which he became Abbé of Hy (Iona). The “Annals of Ulster” first mention him in that capacity under the year 706 (really 707); but Conamhail was abbott from 704 to 710. It may be that St. Dunchad was coadjutor to Conamhail (the phrase is príncépadum báin). Or perhaps there was some schism in the monastery over the pastach question, for though St. Dunchad is said to have ruled from 710 till 717, in 713 the death of “St. Dorbne Foda, Abbot of Ia” is recorded by the “Annals of the Four Masters”; and the same authority relates the appointment of “Faelchu, son of Dorbene” to the abbacy in 714. It was this Faelchu who is mentioned in 717. Towards the end of these, however, may have been really coadjutors to St. Dunchad, or priors, or even bishops, for there were certainly bishops in Iona at that period, and the phrase employed is cathedram inae obtinuit. However this may be, the paschal controversy was settled at Iona by the adoption of the Roman usage, while St. Dunchad was abbott. This bishop placed the instance of the Irish Marian priest, who had been educated in Ireland. He came to Iona in 710, and was at once successful in persuading the community to abandon the Celtic Easter and tonsure.

LESLIE A. ST. L. TOKE.

Dundrennan, Abbey of, in Kirkcudbrightshire, Scotland, a Cistercian house founded in 1142 by King David I and Fergus Lord of Galloway for monks brought from Rievaulx in Yorkshire. The name (Dun-nan-droicheadh) means “fort of the thornbushes”, and the monastery commands a fine view of the Solway Firth. Queen Mary fled to Dundrennan after the battle of Langside and spent her last night in Scotland there before embarking for England from the neighbouring Port Mary. In 1557 the abbey and lands passed to the Crown, and in 1651 it was annexed to the royal chapel at Stirling. For many years the buildings were used as a quarry for the erection of houses in the vicinity, but in 1812 steps were taken to repair and preserve what was left of them. The cruciform church had a nave of six bays 100 feet long and 55 feet wide; in the last bay there was a central tower 200 feet high. The style is transition between Norman and First Pointed. Among the tombs which remain is that of Alan Lord of Galloway (c. 1250), much mutilated, in the east aisle of the north transept, as well as those of several of the abbots and priors. The finest remains architecturally are those of the chapter house, which has an interesting octagonal arched doorway between two windows, and its roof supported by octagonal columns, of which only fragments are left. Of the domestic buildings of the abbey nothing but a remnant has been preserved. The abbey estate now belongs to the family of Maitland of Dundrennan.

THOMSON, Memorials of the Abbey of Dundrennan (Exeter, 1857); MAXWELL, Dundrennan Abbey and Its History (Castle Douglas, 1875).

D. O. HUNTER-BLAIR.

Dunedin, Diocese of (DUNEDINensis), comprises the provincial district of Otago (including the Otago part, Southland, and Stewart Island, as well as other adjacent islands). The diocese contains the most picturesque lake and fiord scenery in New Zealand. Its area is about 24,000 sq. miles, of which some 4000 sq. miles are gold-fields, and 2340 forest. This part of New Zealand was visited (perhaps discovered) by Captain Cook in 1770. Beyond a few traders, there was however, no white settlement in the Otago provincial district till 1840, when some families settled on land at Waikouati. In 1848 the district was first colonized systematically and on a considerable scale by the Otago Association, under the auspices of the Free Church of Scotland. It was desired to retain the province as a Free Kirk reserve, and the immigration of Catholics was at first resisted. The last barriers of religious exclusiveness were, however, swept away by the rush of population that flowed into the province from all parts of Australasia when, in 1861, rich gold was discovered at Gabriel's Gully and elsewhere. The new conditions thus brought about led to a rapid development of the mineral, pastoral, agricultural, and forest resources of Otago. All New Zealand formed part of the district of Dunedin from 1847 to 1852, which was erected in 1855. The first vicar, Dr. Pom- pallier, arrived in the country, with the pioneer (Marist) missionaries, in 1838. All New Zealand remained within his spiritual charge till 1818.

From 1818 till 1859 the territory now comprised in the Diocese of Dunedin was included in the episcopal See of Wellington. In the latter year the Diocese of Dunedin was established, with Dr. William Rights as the first Right Rev. Patrick Moran, translated thither from the Cape of Good Hope, 3 December, 1809; d. 22 May, 1835. He was succeeded by the Right Rev. Michael Verdon, consecrated 3 May, 1896. In 1840 Dr. Pom- pallier, with Fathers Comte and Pezet, visited and instructed the native villagers and a few white Catholic whalers at Otakou and Moeraki. Up to 1859, however, there were no Catholic priests in the whole southern province, and only about ninety scattered Catholics, who were periodically visited, on foot, by the saintly Marist, Father Petijean. Early in the gold-rush of the sixties, another devoted Marist missionary, Father Moreau, was appointed resident priest in Dunedin, with charge of the whole province. He built, at Dunedin, the first Catholic church and presbytery in that part of New Zealand. Soon after the arrival of Bishop Moran, in 1871, Father Moreau and a few of his fellow-religious
DUNFERNLINE 192

who had been for some time labouring in Otago, were recalled to the Diocese of Wellington.

The Dominican nuns and the secular clergy were introduced by the new bishop in 1871, the Christian Brothers in 1874. The “New Zealand Tablet” was established in 1873, and strenuous work was done in extending the facilities for religion and education, a sum of over $20,000 (about $85,000) having been spent for these purposes during the first fifteen years of the episcopate of Bishop Moran. When the secular system of public instruction was established by law in 1876, he became, and remained to the close of his life, an eloquent champion of the rights of the Catholic schools to a share in the moneys devoted by the State to the education of youth. The extension of the external organization of religion has more than kept pace with the growth of Catholicism in Otago, and Dunedin in particular. The first Sisters of Mercy were introduced in 1890, the second and largest division in 1897, the Marist Brothers in 1897, the Sisters of St. Joseph in 1897-8, and the Little Sisters of the Poor in 1904. A provincial ecclesiastical seminary for all New Zealand was opened at Dunedin in 1898, and in 1900, and has been greatly enlarged in later years.

At the beginning of 1906 there were in the diocese 20 parochial districts, 63 churches, 32 secular priests, 8 brothers, 160 nuns, 1 ecclesiastical seminary, 4 boarding schools for girls, 6 superior day schools, 20 primary schools, 1 orphanage, 1 home for aged poor, and at the census of 1906 there were 22,685 Catholics in a total white population of 190,974.

HENRY W. CLEARY.

Dunfermline, Abbey of, in the south-west of Fife, Scotland. Founded by King Malcolm Canmore and his queen, Margaret, about 1070, it was richly endowed by him and his sons, and remodelled as a Benedictine abbey by his successor, David I, who brought an abbot and twelve monks from Canterbury. The monastic buildings, which were of such extent and splendour that three sovereigns and their retinues might (says Matthew Paris) have been lodged there together, were set on fire by King Henry I in 1104, but were afterwards restored. The tombs of Malcolm and Margaret are still to be seen within the ruined walls of the Lady chapel, and were repaired and enclosed by order of Queen Victoria. Dunfermline Abbey was one of the richest Scottish houses, owning almost all Western Fife, as well as property in other counties. It possessed, within its own domains, civil and criminal jurisdiction equal to that of the Crown. The church succeeded Iona as the burial-place of kings, and was thus the Westminster Abbey of Scotland. Besides Malcolm and Margaret, David I and Robert Bruce, with his queen and daughter, were interred there. After the Dissolution, the property passed through the hands of the Pitearna family, Lord O'Neil, and then to the Marquises of Tweeddale. The splendid church was destroyed in 1560 by the Reformers, all but the nave, which they refitted for Presbyterian worship. It is a fine example of Anglo-Norman architecture, with a beautiful western doorway. The remains of the church and palace are now Crown property.

Anglic., VII, 1152-1154.

D. O. HUNTER-BLAIR.

Dungal, Irish monk, teacher, astronomer, and poet who flourished about 520. He is mentioned in S11 as an Irish priest and scholar at the monastery of St.-Denis near Paris. In that year he wrote a letter to Charlemagne explaining the eclipse of the sun which was supposed to have taken place in S10. In one of Alcuin’s letters (M. G., Epp., IV, 477) he is alluded to in most convenient form. He is mentioned in the capitular of Lothair, and in S25 in an imperial decree by which he was appointed “master” of the school at Pavia. This is the last mention of Dungal in the public records of the empire. In S27 or S28 he appeared against Claudius, Bishop of Turin, in a work defending the veneration of images. From the fact that he began his life as a monk to the day of his last_resp., some scholars have inferred that he spent his last days in the Irish monastery on the Trebbia. The date of his death is unknown. His books, many of them at least, were transferred by Cardinal Federigo Borromeo to the Ambrosian Library in Milan, where they now are.

Some historians doubt whether the Dungal of St.-Denis and the “adversary of Aldericus” is the same person. The prevalent opinion, however, is that they are one and the same. In his letter to Charlemagne Dungal brings to bear on the question of eclipses a knowledge of astronomy far beyond the current ideas of the time. His “Reply” to Claudius is enriched with many citations from the Greek and Latin Fathers and from the liturgical hymns of the Church. The poems that modern critics attribute to Exul Hibernicus are believed by Dümmler, editor of the “Poets Exúe Carolíni”, to have been written by Dungal, who like many of his fellow-exiles from Ireland styles himself, pergeminus, eu, pauper et pergeminus. Only three of them bear the name Dungal. They are interesting from many points of view, especially from that of the historian who wishes to research the history of the monastic movement, for the all too scanty references to the personal feelings and the attitude of mind of the Irish scholars who flocked to the Continent of Europe in the ninth century. Yet they do not enable us to determine when and where Dungal was born, though from the fact that among the books which he presented to the Library of Bobbio is the “Antiphonary of Aldericus”, it is inferred that he spent many years of his student life in Ireland at the famous Bangor school. Mabillon published a ninth-century poem from which it appears that Dungal enjoyed among his contemporaries a reputation for more than ordinary learning.

WILLIAM TUNER.

Dunin, Martin von, Archbishop of Gnesen and Posen, b. 11 Nov., 1774, in the village of Wat near the city of Iawa, Poland; d. 26 Dec., 1842, in the city of Posen. He studied theology in the Collegium Germanicum at Rome (1793–97), and was ordained priest in Sept., 1797. After some service in the Diocese of Cracow, he was made a canon of Wloclawek by the Bishop of Cujavia, in 1805, and 1815 chancellor of its cathedral chapter, in 1824 canon of Posen and counsellor to the Government in matters of education. On the death of Archbishop Theophilus von Wolieki (1829) Von Dunin became administrator of the Archdiocese of Gnesen and Posen, was appointed archbishop in 1831, and consecrated 10 July of the same year. He endeavoured at once to reorganize his vast diocese, a work rendered necessary by the vicissitudes of Poland in the eighteenth century, the consequent reunion of the Dioceses of Gnesen and Posen, his jurisdiction over the Secular Canons of Cathedral and collegiate monasteries. He reconstructed on a new plan the ecclesiastical seminaries of Gnesen and Posen, travelled throughout the two dioceses administering the Sacrament of Confirmation and dedicating new
churches, and discharged faithfully the other duties of his pastoral ministry. In the exercise of these duties he came into conflict with the Prussian Government on the question of mixed marriages. The conditions laid down by Benedict XIV (1740-58) in the Constitution "Magnae nobis" (29 June, 1748), by which marriages between Catholics and members of other Christian denominations became lawful, had been well observed in Catholic Poland. But in a treaty concluded on 27 June, 1837, between Prussia and the papal States, the powers the Prussian Government undertook to enforce another order of things. Mixed marriages were no longer forbidden; male children born of such marriages were to be brought up in the religion of their father, the female offspring in that of the mother. The marriage was to be blessed by the ecclesiastical minister, under whose jurisdiction the bride was; if a Catholic was unwilling to solemnize the marriage, the minister of the other party was to officiate. Similar provisions were contained in the code of Prussian law extended to Prussian Poland in 1797. By a royal decree of King Frederick William III (1797-1840), 21 Nov., 1803, they were further modified in an anti-Catholic sense: all the children of mixed marriages were to be raised in the religion of the father. Such legislation was unquestionably hostile to Catholic interests. It often happened, therefore, that Catholic priests blessed mixed marriages without first requiring the usual promise concerning the free exercise of religion for the Catholic party and the education of all offspring in the Catholic Faith. The bishops were silent; both priests and bishops seemed to believe that they must obey the law, or they could not prevent penalties were inflicted by the Government on all priests who refused to bless mixed marriages contracted without any of the above conditions. The Catholic conscience was finally aroused by the Brief "Litterae altera abhinc" of Pius VIII (1829-30), 25 March, 1830, forbidding priests to bless a mixed marriage if no promise were given relating to the education of the children in the Catholic Faith. In case of such refusal Pius VIII agreed to tolerate a passive assistance (assistentia passiva) on the part of the priest. Realizing the harm done to the Catholic religion by the lax practice observed so far, Archbishop Von Dunin resolved to break with it. In January, 1837, he requested from the Ministry of Ecclesiastical Affairs in Berlin permission to publish the Brief of Pius VIII, or at least to direct his clergy to observe its provisions. His request was refused. A petition sent directly to Frederick William III, 26 Oct., 1837, was similarly treated. Determined not to betray his high office he sent an instruction to his priests, 30 Jan., 1838, in which he inculcated the principles of the Church relating to mixed marriages; soon after (27 Feb.) he suspended ipso facto any priest of his diocese who should henceforth bless a mixed marriage without previous assurance as to the Catholic education of the offspring. The king was notified of these acts, 10 March, 1838. While the instructions of the archbishop were well received throughout his diocese, the Government was highly indignant and sought by all means to render them ineffectual. They were declared null and void; the archbishop was asked to recall them, and finally to bless a mixed marriage without previous consent, and then to leave him in the Court of Posen, to which, however, he always objected as conducted by a non-competent authority. In the midst of this struggle he received much consolation from the unimposing support of his clergy, and from an Allocution in his favour by Gregory XVI, 13 Sept., 1838. At the conclusion of his trial in 1839 he was summoned to Berlin, where he arrived 5 April. A last ineffectual attempt was made to have him recant; finally the sentence of the court proclaiming his deposition from office, inability ever to hold one, and a confinement of six months in a fortress, was read to him. He appealed directly to the king for clemency, but nothing was changed except that he was detained in Berlin instead of being sent to a fortress. Meanwhile the archbishop began to think of the needs of his diocese, and being unable to obtain permission to return, he departed secretly from Berlin and arrived in Posen, 4 October. In less than two months he was taken to the fortress of Colberg, where he remained until the death of Frederick William III (7 June, 1840). After his departure the diocese put on public mourning; the bells and the organs remained silent during the celebration of the Holy Mysteries; on all Sundays and feast days public prayers were said for the speedy return of the archbishop; and both the clergy and the nobility of Posen made several fruitless attempts to obtain his release. With the accession of the peaceful king, Frederick William IV (1840-61), matters changed. On 3 Aug., 1840, Von Dunin was set free, and on the 5th of the same month he arrived in Posen amid the rejoicing of his faithful flock. According to an agreement reached with the Government he issued a pastoral letter, 25 Aug., in which his previous instructions were modified, without detriment; however, to Catholic principle. He recommended his clergy not to insist absolutely on the fulfilment of the usual conditions required for mixed marriages, but at the same time to abstain from all active participation in such marriages, if the usual promises were not given. No mention was made of any punishment in the case of contravention. Later on (21 Feb., and 26 Sept., 1842) he issued new instructions relating to the manner of dealing in confession with the husband or wife of a mixed marriage. The priests were directed to be indulgent towards those who tried their best to influence their children in favour of the Catholic Faith, and to distinguish them from those who were altogether careless in the discharge of this sacred duty. With this the whole controversy ceased. Archbishop Von Dunin did not long survive these conflicts. His memory is held in respect for his unsparing loyalty to Catholic principles, and for his courage, frankness, and prudent moderation displayed in their defence.

FRANCIS J. SCHEAFFER.

Dunkeld, Diocese of (Dunkeldensis), in Scotland, constituted, as far back as the middle of the ninth century, the primatial see of the Columban Church by King Kenneth Mac Alpine, who rebuilt the church and monastery founded by King Constantine (afterwards destroyed by the Danes), and translated thither St. Columba's relics. The first official mention of it is in a letter of the Annals of Ulster (A.D. 865) Bishop of Fortriu, concerning the extermination of the kingdom of the Southern Picts was then known. He was also Abbot of Dunkeld, with jurisdiction, formerly enjoyed by Iona, over the other Columban monasteries in Scotland. The seat of the primacy was, however, subsequently transferred to Abernethy, and then to St. Andrews, and Dunkeld became subject to lay abbots, of one of whom, Crian, sprang Malcolm III and his successors on the throne of Scotland. In 1127 King Alexander, who had already founded the Diocese of Moray farther north, erected Dunkeld into a cathedral church and replaced the Columban monks by a chapter of secular canons. The new bishopric included a great part of what afterwards became the Dioceses of Argyll and Dunblane, and retained its jurisdiction over various churches representing old Columban foundations. The Abbeys of Iona remained, as heretofore, subject to the ancient primacy.
tial See of Dunkeld, until Iona became the seat of the Bishop of the Isles at the end of the fifteenth century. About the same time Dunkeld (together with Dunblane, Galloway, and Argyll) became a suffragan of the newly-elected Archbishopric of Glasgow; but during the primacy of Archbishop Foreman of St. Andrews (1513–1552) it was restored to the metropolitan province. Thirty-five bishops occupied the See of Dunkeld from its foundation in 1107 until the extinction of the ancient hierarchy in the year 1560. The most distinguished were James Kennedy (1438–1440), illustrious for his birth, learning, and piety, who was translated, after two years at Dunkeld, to the Bishopric of St. Andrews; the famous poet-prelate Gavin Douglas (1516–1521), who died in exile in England; and John Hamilton (1545–1547), who succeeded the murdered Cardinal Beaton at St. Andrews, and closed his troubled career on the scaffold at Stirling in 1571. The last pre-Reformation Bishop of Dunkeld was Robert Crichton (nephew of a former occupant of the see), who survived until 1586.

For close on three centuries, the Diocese of Dunkeld, like the other Scottish bishoprics, remained vacant; until, on 4 March, 1578, it was restored to the see of St. Andrews, and included the counties of Perth, Forfar, Clackmannan, Kinross, and the northern part of Fife. Since the revival of the see, it has been held by three bishops: George Rigg (d. 1887); James G. Smith (d. 1900); and the present Bishop, Right Rev. Angus Macfarlane, consecrated 1901. The bishop's pro-cathedral is in Dunkeld, the residence of the bishop and the See chapters, erected in 1895, consists of a provost and eight canons. The total number of secular priests in the diocese (1908) is 35; regulars (Redemptorists), 12. The missions and cluniacine number 17, the child clubs, Apostles and St. Mary's, 21, and the parochial schools 15. There are two monasteries of men (Redemptorists and Marists), four convents of women (Sisters of Mercy, Little Sisters of the Poor, Ursulines, and Sisters of Charity), and the Catholic institutions comprise a home for aged poor, a house of mercy for servants, and a working girls' home. The Catholic population of the diocese is estimated to be rather more than 30,000. The old cathedral of Dunkeld, beautifully situated on the Tay amid wooded hills, was erected between 1220 and 1500. The building was much damaged in the reign of Robert II, and suffered later at the hands of the Earl of Buchan, styled the "Wolf of Badenoch". It fell partly into ruins in the sixteenth century, since when the choir has been used for Presbyterian worship. The Duke of Atholl, long the owners of the building, have spent a good deal on its preservation and repair, and an extensive restoration of the choir was carried out in 1908, chiefly at the cost of Sir Donald Currie. There is now no Catholic church or resident priest in the village of Dunkeld.

Duns Scotus, JOHN, named Doctor Subtilis, d. 8 Nov., 1306; he was the founder and leader of the famous Scotist School, which had its chief representatives among the Franciscans. Of his antecedents and life very little is definitely known, as the contemporary sources are silent about him. It is certain that he died rather young, according to earlier tradititons at the age of thirty-four years (cf. Wadding, Vita Scoti, in vol. I of his works); but it would seem that he was somewhat older than this and that he was born in 1270. The birth-place of Scotus has been the subject of much discussion, but the most generally accepted as the contemporary in favour of any locality has been advanced. The surname Scotus by no means decides the question, for it was given to Scotchmen, Irishmen, and even to natives of northern England. The other name, Duns, to which the Irish attach so much importance, settles nothing; there was a Duns also in Scotland (Berwick). Moreover, it is impossible to determine whether Duns was a family name or the name of a place. Appeal to supposedly ancient local traditions in behalf of Ireland's claim is of no avail, since we cannot ascertain just how old they are; and their age is the pivotal point.

This discussion has been strongly tinged with national sentiment, especially since the beginning of the nineteenth century after the French Revolution, and with a suspicion of the Scotus of Ireland. The diocese, as then re-constituted, is one of the suffragan sees of the archiepiscopal province of St. Andrews, and includes the counties of Perth, Forfar, Clackmannan, Kinross, and the northern part of Fife. Since the revival of the see, it has been held by three bishops: George Rigg (d. 1887); James G. Smith (d. 1900); and the present Bishop, Right Rev. Angus Macfarlane, consecrated 1901. The bishop's pro-cathedral is in Dun-
permission only to eight; among those who were refused was "Ioannes Dounus". It is quite certain, too, that he went to Paris about 1304 and that there he was at first merely a Bachelor of Arts, for the general of the Franciscans, Gonsalvus de Valleboma, wrote (18 Nov., 1304) to the guardian of the college of the Franciscans at Paris to present John Scotus at the university for the doctor's degree. The general's letter mentions that John Scotus had distinguished himself for some time past by his learning ingenioque subtilissimo. He did not teach very long in Paris; in 1307 or 1308 he was sent to Cologne, probably as a professor at the university. There he died, and was buried in the monastery of the Minorites. At the present time (1908) the process of his beatification is being agitated in Rome on the ground of a cultus immemorabilis.

Duns Scotus's writings are very numerous and they have often been printed; some, in fact, at a very early date. But a complete edition, in 12 folio volumes, was published only in 1639 by Wadding at Lyons; this, however, included the commentaries of the Scotists, Lycebutus, Petrus Cavellus, and Hiquetus. A reprint of Wadding's edition, with the treatise "De perfectione statum" added to it, appeared 1891-95 at Paris (Vives) in 20 vols. 4to. Whether all the writings contained in these editions are by Duns Scotus himself is doubtful; it is certain, however, that many changes and additions were made by later Scotists. A critical edition is still wanting. Besides these printed works, some others are attributed to Scotus, especially commentaries on several books of Scripture. The printed writings deal with grammatical and scientific, but chiefly with philosophical and theological, subjects.

Of a purely philosophical nature are his commentaries and questiones on various works of Aristotle. These, with some other treatises, are contained in the first seven volumes of the Paris edition. The principal work of Scotus, however, is the so-called "Opus Oxoniense", i.e. the great commentary on the "Sentences" of Peter Lombard, written in Oxford (vol. VIII–XXII). It is primarily a theological work, but it contains many treatises, or at least digressions, on logical, metaphysical, grammatical, and scientific topics, so that nearly his whole system of philosophy can be derived from this work. Volumes XXII–XXIV contain the "Reportata Parisiensi", i.e. a smaller commentary, for the most part theological, on the "Sentences" of Duns Scotus; the "Quæstiones Quodlibetales", chiefly on theological subjects, one of his most important works, and the above-mentioned essay, "De perfectione statum", fill the last two volumes. As to the time when these works were composed, we know nothing for certain. The commentaries on Aristotle were probably his first work, then followed the "Opus Oxoniense" and some minor essays, last the "Quæstiones Quodlibetales", his dissertation for the doctor's degree. The "Reportata" may be notes written out after his lectures, but this is merely a surmise.

Scotus seems to have changed his doctrine in the course of time, or at least not to have been uniformly precise in expressing his thought; now he follows rather the sententia communis as in the "Quæstiones Quodlibetales"; then again, he goes his own way. Many of his essays are unfinished. He did not write a summum philosophica or theologiae, as did Alexander of Hales and St. Thomas Aquinas, or even a compendium of his doctrine. He wrote only commentaries or treatises on disputed questions; but even these commentaries are not continuous explanations of Aristotle or Peter Lombard. Usually he writes about the text or presupposes it as already known, then he takes up various points which in that day were live issues and discusses them from all sides, at the same time presenting the opinions of others. He is sharp in his criticism, and with relentless logic he refutes the opinions, or at least the arguments, of his opponents. In his fervour he sometimes forgets to set down his own view, or he anticipates the reasons for various tenable opinions, and puts them forward as more or less probable; this he does especially in the "Collationes". Hence it is said that he is no systematizer, that he is better at tearing down than building up. It is true that none of his writings plainly reveals a system; while several of them, owing no doubt to his early death, betray lack of finish. His real teaching is not always fully stated where one would naturally look for it; often enough one finds instead the discussion of some special point, or a long excursus in which the author follows his critical bent. His own opinion is to be sought elsewhere, in various incidental remarks, or in the presuppositions which serve as a basis for his treatment of other problems; and it can be discovered only after a lengthy search. Besides, in the heat of controversy he often uses expressions which seem to go to extremes and even to contain heresy. His language is frequently obscure; a maze of terms, definitions, distinctions, and objections through which it is by no means easy to thread one's way. For these reasons the study of Scotus's works was difficult; when undertaken at all, it was not carried on with the requisite thoroughness. It was hard to find a unified system in them. Not a few unsatisfactory, one-sided, or even wrong opinions about him were circulated and passed on unchallenged from mouth to mouth, and from book to book, growing more erroneous as they went. Nevertheless, there is in Scotus's teaching a rounded-out system, to be found especially in his principal work, a system worked out in minutest details. For the present purpose, only his leading ideas and his departures from St. Thomas and the sententia communis need be indicated.

**System of Philosophy.** The fundamental principles of his philosophical and theological teaching are his distinctio formalis, and his idea of being. The dis
tinctio formalis is intermediate between the distinctio rationis tantum, or the distinction made by the intellect alone, and the distinction made by the intellect and the will, or the formalis, or that which exists in reality. The former occurs, e.g., between the definition and the thing defined, the latter, within the realm of created reality, between things that can exist separately or at least can be made to exist separately by Divine omnipotence, as, e.g., between the different parts of a body or between substance and accident. A thing is "formally distinct" when it is such in essence as to be separable from another thing; and this it certainly is not by itself, when it is not another thing, though with that other it may be so closely united that not even omnipotence can separate it, e.g., the soul and its faculties and these faculties among themselves. The soul forms with its faculties only one thing (res), but conceptually it is not identical with the intellect or the will, nor are intellect and will the same. Thus we have various realities, entities, or formalities of one and the same thing. So far as the thing itself exists, these entities have their own being; for each entity has its own being or its own existence. But existence is not identical with subsistence. The accident, e.g., has its own being, its own existence, which is different from the existence of the substance in which it inheres, just as the existence of the substance is not the same as the substance. But it has no subsistence of its own, since it is not a thing existing by itself, but inheres in the substance as its subject and support; it is not an independent being. Moreover, only actually existing things have real being; in other words, being is identical with existence. In the state of mere ideality or possibility, before their realization, things have an essence, and are identical with the real being but not actually one; else they could not be created or annihilated, since they would have had an existence before their creation. And since being is eo ipso also true and good, only those things are really good and true which actually exist. If God, therefore, by an act of His will gives existence to the essences, He makes things which are real but which also to some extent of a sense, it is quite correct to say that according to Scotus things are true and good because God so wills. By this assertion, however, he does not deny that things are good and true in themselves. They have an objective being, and thence also objective truth and goodness, because they are in the likeness of God, Whose being, goodness, and truth they imitate. At this point in the argument it is best to consider the ideas of them are not produced by the Divine will, but by the Divine intellect, which, without the co-operation of God's will, recognizes His own infinite essence as imitable by finite things, and thus of necessity conceives the ideas. In this ideal state God necessarily wills the things, since they cannot but be pleasing to Him as images of His own essence. But from this it does not follow that He must will them with an effective will, i.e., that He must realize them. God is entirely free in determining what things shall come into existence.

God alone is absolutely immaterial since He alone is absolute and perfect actuality, without any potentiality for becoming other than what He is. All creatures, animate and inanimate, are material not because they are changeable and may become the subject of accidents, but from this it does not follow that souls and angels are corporeal; on the contrary, they are spiritual, physically simple, though material in the sense just explained. Since all created things, corporeal and spiritual, are composed of potentiality and actuality, the same materia prima is the foundation of all, and therefore all things have a common substratum, a common material basis. This materia, in itself quite indeterminate, may be determined to any sort of thing by a form—a spiritual form determines it to a spirit, a corporeal form to a material body. Scotus, however, does not teach an extreme Realism; he does not attribute to the universals or abstract essences, e.g., genus and species, an existence apart from or independent of the things on which they are founded and which they realize. It is true, he holds that materia prima, as the indeterminate principle, can be separated from the forma, or the determining principle, at least by Divine omnipotence, and that it can then exist by itself. Conceptually, the materia is altogether different from the forma; moreover, the same materia can be determined by entirely different forms and thus the same materia can be given entirely different forms; it is, as is evident from the processes of generation and corruption. For this reason God at least can separate the one from the other, just as in the Holy Eucharist He keeps the accidents of bread and wine in existence, without a substance in which they inhere. It is no less certain that Scotus teaches a plurality of forms in the same thing. The human body, e.g., taken by itself, without the soul, has its own form, the forma corporis. It is transmitted to the child by its parents and is different from the rational soul, which is infused by God himself. The forma corporis gives the body a sort of human form, though quite imperfect, and remains after the rational soul has departed. If the body in death is not decomposed into its constituent parts which is the essential form of the body of or man; this constitutes with the body one being, one substance, one person, one man. With all its faculties, vegetative, sensitive, and intellectual, it is the immediate work of God, Who infuses it into the child. There is only one soul in man, but we can distinguish in it the one soul that follows from the First Form, and the other one is not the other; the individuality is added to the human nature and with it constitutes the human individual. In this sense the property or existence, or the haeceitas, is the principium individualitatis. Hence it is clear that there are many points of resemblance between matter and form on the one hand and universal and individual on the other. But Scotus is far from teaching extreme Realism. According to his view, matter can exist without form, but not the universal essence without individuation; nor can the different forms of the same thing exist by themselves. He does not maintain that the uniform matter underlying all created things is the absolute being which exists by itself, independent of the individuals, and is then determined by added forms, first to genera, then to species, and lastly to individuals. On the contrary, materia prima, which according to him can exist without a form, is already something individual and numerically determined. In reality there is no materia without form, and vice versa. The materia which God created had already a certain form; for because He created a particular matter by itself and form by itself, but both would then be something individual, numerically, though not specifically, different from other matter and other forms of the same kind. This matter, numerically different from other matter, could then be united with a form, also numerically different from other forms of the same kind; and the result would be a compound individual, numerically different from other individuals of the same kind. From such individualized matter, form, and compound we get by abstraction the idea of a universal matter, a universal form, a universal compound, e.g. of a universal man. But by themselves universal matter and universal form cannot exist. The universal as such is
DUNS 197

their distinction is not annulled by His infinity; on the other hand it remains true that God is only one re.
The process constituting the Blessed Trinity takes place without regard to the external world. Only after its completion the three Divine Persons, as one principle, produce by their act of cognition the ideas of things. But quite apart from this process, God is independent of the world in His knowledge and volition, for the obvious reason that dependence of any sort would imply imperfection.
The cognition, volition, and activity of the angels is more akin to ours. The angels can of themselves know things; they do not need an infused species. The reverse is in fact true of the human race. The devil is not necessarily compelled, as a result of his sin, always to will what is evil; with his splendid natural endowments he can do what in itself is good; he can even love God above all things, though in fact he does not do so. Sin is only in so far an infinite offence of God as it leads away from Him; in itself its malice is no greater than is the goodness of the opposite virtue.
In his Christology, Scotus insists strongly on the reality of Christ’s Humanity. Though it has no personality and no subsistence of its own, it has its own existence. The unio mystica and the communicatio idiomatum are explained in accordance with the doctrine of the Church, with no leaning to either Nestorianism or Adoptionism. It is true that Scotus explains the interposition of the Trinity as an actual help in the human nature of Christ and upon His work differently from St. Thomas. Since this union in no way changes the human nature of Christ, it does not of itself impart to the Humanity the beatific vision or impeccability. These prerogatives were given to Christ with the fullness of grace which He received in consequence of that union. God was given to grace and property, not of himself, since He willed that in Christ humanity and the world should be united with Himself by the closest possible bond. Scotus also defends energetically the Immaculate Conception of the Blessed Virgin. All objections founded on original sin and the universal need of redemption are solved. The merits of Christ are infinite only in a broader sense, but of themselves they are entirely sufficient to give adequate satisfaction to the Divine justice; there is no deficiency to be supplied by God’s mercy. But there is needed a merciful acceptance of the work of Christ, since in the sight of God there is no real merit in the strictest sense of the word.
Gracce is something entirely supernatural and can be given only by God, and, what is more, only by a creatura divina; hence, the secondary gratia is, so to speak, the physical or instrumental cause of grace. For God alone can create. Sanctifying grace is identical with the infused virtue of charity, and has its seat in the will; it is therefore conceived rather from the ethical standpoint.
The sacraments give grace of themselves, or ex opere operato, if man places no obstacle in their way. The real essence of the Sacraments consists in the absolution; but this is of no avail unless the sinner repent with a sorrow that springs from love of God; his doctrine of attraction is by no means lax. As to his eschatology it must suffice to state that he makes the essence of beatitude consist in activity, i.e. in the love of God, not in the Beatific Vision; this latter is only the necessary condition.
In ethics Scotus is still less dogmatized; he denies emphatically that the morality of an act requires an object which is good in its nature, its end, and its circumstances, and according to the dictate of right reason. It is not true that he makes God’s free will decide arbitrarily what is good and what is bad; he only asserts that the Commandments of the second table of the Decalogue are not in such strict sense laws of nature as are those of the first table; because God cannot grant a dispensation from the laws of the first, whereas He can dispense from those of the second, as in fact He did when He com-

a mere conception of the mind; it cannot exist by itself, it receives its existence in and with the individual; in and with the individual it is multiplied, in and with the individual it loses again its existence. Even God cannot separate in man the universal nature from the individuality, or in the human soul the intellectual from the sensitive part, without destroying the whole. In reality there are only individuals, in which, however, we can by abstraction formally separate both the abstract human nature from the individuality and the several faculties from one another. But the separation and distinction and formation of genera and species are mere processes of thought, the work of the conceptus intellectus.
The psychology of Scotus is in its essentials the same as that of St. Thomas. The starting-point of all knowledge is the sensory or outer experience, to which must be added the inner experience, which he designates as the ultimate criterion of certitude. He lays stress on induction as the basis of all natural sciences. He denies that sense-perception, and a fortiori intellectual knowledge, is merely a passive process; moreover, he asserts that not only the universal but also the individual is perceived directly. The adequate object of intellectual knowledge is not the spiritual in the material, but being in its universality. In the whole realm of the soul the will has the primacy since it can determine itself, while it controls more or less completely and therefore in a manner to a great extent freely the intellect, which, taken as freedom of choice, is emphasized and vigorously defended. In presence of any good, even in the contemplation of God, the will is not necessitated, but determines itself freely. This doctrine does not imply that the will can decide what is true and what is false, what is right and what is wrong, nor that its choice is blind and arbitrary. God’s plan determines his thought, and his thought has a great influence upon the will, and incline it to choose one thing rather than another. Yet the final decision remains with the will, and in so far the will is the one complete cause of its act, else it would not be free. With regard to memory, sensation, and association we find in Scotus many modern views.

SYSTEM OF THEOLOGY.—It has been asserted that according to Scotus the essence of God consists in His will; but the assertion is unfounded. God, he holds, is the ens infinitum. It is true that according to him God’s love for Himself and the spiration of the Holy Ghost by Father and Son are not based upon a natural instinct, so to say, but upon God’s own free choice. Every will is free, and therefore God’s will is also. But His free will is not His essence so infinitely good that His free will cannot but love it. This love, therefore, is at once free and necessary. Also with regard to created things Scotus emphasizes the freedom of God, without, however, falling into the error of merely arbitrary, unmotivated indeterminism. It has been asserted, too, that according to Scotus, being can be attributed univocally to God and creatures; but this again is false. Scotus maintains that God is the ens per se essentium, creatures are entia per participacionem—they have being only in an analogical sense. But from the being of God and the being of creatures, a universal idea of being can be abstracted and predicated univocally of both the finite and the infinite; otherwise we could not infer from the existence of finite creatures the idea of God’s existence, as every syllogism would contain a quaternio terminorum. Between God’s essence and His attributes, between the attributes themselves, and then between God’s essence and the Divine Persons, there is a formal distinction along with real identity. For conceptually Divinity is not the same as wisdom, intellect not the same as will; Divinity is not identical with paternity, since Divinity neither begets, as does the Father, nor is begotten, as is the Son. But all these realities are formally in God and

DUNS
manded Abraham to sacrifice his son. But the precepts of the second table also are far more binding than the other positive laws of God. The first order of things God cannot permit manslaughter universally, taking the property of others, and the like. There are also indifferent actions in *individuo*. Absolutely speaking, man should direct all his actions towards God; but God does not require this, because He does not wish to burden man with so heavy a yoke. He obliges only to observe the ten commandments. Thus Scotus is removed from Kant and the modern *Gejübtheologen*, not by a single line of thought but by the whole range of his philosophical speculation. Scotus is no precursor of Kant; he emphasizes ecclesiastical tradition and authority, the freedom of the will, the power of our reason, and the co-operation with grace. Nor is he a precursor of Kant. The doctrine regarding primacy of the will and the practical character of theology has quite a different meaning in his mind from what it has in Kant's. He values metaphysics highly and calls it the queen of sciences. Only as a very subtle critic may he be called the Kant of the thirteenth century. Nor is he a precursor of the Modernists. His writings indeed contain many entirely modern ideas, but the stress he lays on freedom in scientific and also in religious matters, upon the separateness of the objective world and of thought, the self-activity of the thinking subject, the dignity and value of personality; yet in all this he remains within proper limits, and in opposition to the Modernists he asserts very forcibly the necessity of an absolute authority in the Church, and that our authority is derived from God will; and he rejects absolutely any and every monistic identification of the world and God. That he has so often been misunderstood is due simply to the fact that his teaching has been viewed from the standpoint of modern thought.

Scotus is a genuine Scholastic philosopher who works out ideas taken from Aristotle, St. Augustine, and the preceding masters. He has been recognized as a deep thinker, an original mind, and a sharp critic; a thoroughly scientific man, who without personal bias proceeds objectively, stating his own doctrines with modesty and with a certain reserve. It has been asserted that he did more harm than good to the Church, and that by his destructive criticism, he prepared the ruin of Scholasticism, indeed that its downfall begins with him. These accusations originated to a great extent in the insufficient understanding or the false interpretation of his doctrines. No doubt his dictum lacks elegance; it is often obscure and unintelligible; but the same must be said of many earlier Scholastics. The ten subtle discussions and disquisitions which to this age are meaningless, abound in his works; yet his researches were occasioned for the most part, by the remarks of other Scholastic philosophers, especially by Henry of Ghent, whom he attacks perhaps more than he does St. Thomas. But the real spirit of scholasticism is perhaps in no other Scholastic so pronounced as in Scotus. In depth of insight, breadth of view, and range of imagination, he is not surpassed by any of his contemporaries. He was a child of his time; a thorough Aristotelian, even more so than St. Thomas; but he criticizes sharply even the Stagirite and his commentators. He tries always to explain them favourably, but does not hesitate to differ from them. Duns Scotus's teaching is paradoxical. Catholics and Protestants have charged him with sundry errors and heresies, but the Church has not condemned a single proposition of his; on the contrary, the doctrine of the Immaculate Conception which he so strongly advocated, has been declared ad damnum.

Parthenius Minges.

Dunstan, Saint, archbishop and confessor, one of the greatest saints of the Anglo-Saxon Church, b. near Glastonbury on the estate of his father, Herestan, a West Saxo noble. His mother, Cynethryth, a woman of saintly life, was miraculously forewarned of the sudden death of her child within her. She was in the church of St. Mary on Candlemas Day, when all the lights were suddenly extinguished. Then the candle held by Cynethryth was suddenly relighted, and all present lit their candles at this miraculous flame, thus foreshadowing that the boy "would be the minister of eternal light" to the Church of England. In what year St. Dunstan was born has been much disputed. Osbern, a writer of the late eleventh century, fixes it at "the first year of the reign of King Aethelstan", i. e. 924–5. This date, however, cannot be reconciled with other known dates of St. Dunstan's life and involves many obvious absurdities. It was rejected, therefore, by Mabillon and Lingard; but on the strength of "two manuscripts of the Chronicle" and "two ancient Anglian Annals," Dr. Stubbs argued in favour of it, and his conclusions have been very generally accepted. Careful examination, however, of this new evidence reveals all three passages as interpolations of about the period when Osbern was writing, and there seem to be very good reasons for accepting the opinion of Mabillon that the saint was born long before 925. Probably his birth dates from about the earliest years of the tenth century.

In early youth Dunstan was brought by his father and committed to the care of the Irish scholars, who then frequented the desolate sanctuary of Glastonbury. We are told of his childish fervour, of his vision of the great abbey restored to splendour, of his nearly fatal illness and miraculous recovery, of the enthusiasm with which he absorbed every kind of human knowledge, and of his manual skill. During the whole of his life he was noted for his devotion to learning and for his mastery of many kinds of artistic craftsmanship. With his parents' consent he was tonsured, received minor orders, and served in the ancient church of St. Mary. So well known did he become for devotion and learning that he is said to have been summoned by his uncle, the Archbishop of Canterbury, to offer his service. By one of St. Dunstan's earliest biographers we are informed that the young scholar was introduced by his uncle to King Aethelstan, but there must be some mistake here, for Athelstan probably died about 923, and Aethelstan did not come to the throne till the following year. Perhaps there is confusion between Athelstan and his successor Wulfhelm. At any rate the young man soon became so great a favourite with the king as to excite the envy of his kinsfolk. They accused him of studying heathen literature and magic, and so brought on the king that St. Dunstan was ordered to leave the court. As he quitted the palace, the Anglo-Saxons attacked him, beat him severely, bound him, and threw him into a filthy pit (probably a cesspool), treating him down in the mire. He managed to crawl out and make his way to the house of a friend, whence he journeyed to Winchester and entered the service of Bishop Aelfheah the Bald, who was his relative. The bishop endeavoured to persuade him to become a monk, but St. Dunstan was at first doubtful whether he had a vocation to that course, but an attack of swelling tumours all over his body, so severe that he thought it was leprosy, which was perhaps some form of blood-poisoning caused by the treatment to which he had been subjected, changed his mind. He made his profession at the hands of St. Aelfheah, and returned to live the life of a hermit at Glastonbury.

Against the old church of St. Mary he built a little cell only five feet long and two feet deep, where he studied and worked at his handicrafts and played on his harp. Here the devil is said (in a late eleventh-century legend) to have tempted him and to have been seized by the face with the saint's tongs.

While Dunstan was living thus at Glastonbury he became the trusted adviser of the Lady Aethelflaed, King Aethelstan's niece, and at her death found himself in control of all her great wealth, which he used in
latter life to foster and encourage the monastic revival. About the same time his father Hecorstan died, and St. Dunstan inherited his possessions also. He was now become a person of much influence, and on the death of King Aethelstan in 940, the new king, Eadmund, summoned him to his court at Cheddar and numbered him among his councillors. Again the royal favour caused strong jealousy among the courtiers, who contrived so to enrage the king against him that he bade him depart from the court. There were then at Cheddar certain envoys from the "Eastern Kingdom", by which term may be meant either East Anglia or, as some have argued, the Kingdom of Saxony. To these St. Dunstan applied, imploring them to take him with them when they returned. They agreed to do so, but in the event their assistance was not needed. For, a few days later, the king rode out to hunt the stag in Mendip Forest. He became separated from his attendants and followed a stag at great speed in the direction of the Cheddar cliffs. The stag rushed blindly over the precipice and was followed by the hounds. Eadmund endeavoured vainly to stop his horses and halt his death to be imminent, he remembered his harsh treatment of St. Dunstan and promised to make amends if his life was spared. At that moment his horse was stopped on the very edge of the cliff. Giving thanks to God, he returned forthwith to his palace, called for St. Dunstan and bade him follow, then rode straight to Glastonbury. Entering the church, he threw himself first in prayer before the altar, then took St. Dunstan by the hand and gave him the kiss of peace, led him to the abbot's throne and, seating him thereon, promised him all assistance in restoring Divine worship and regular observance.

St. Dunstan at once set vigorously to work at these tasks. He had to re-create monastic life and to rebuild the abbey which had been abandoned, the building of which he established at Glastonbury seems certain. It is true that he had not yet had personal experience of the stricter Benedictism which had been revived on the Continent at great centres like Cluny and Fleury. Probably, also, much of the Benedictine tradition introduced by St. Augustine had been lost in the Saxon period. This is why the period of the Rule of St. Benedict was not definitely stated by his first biographer, who knew the saint well, but is also in accordance with the nature of his first measures as abbot, with the significance of his first buildings, and with the Benedictine prepossessions and enthusiasm of his most prominent disciples. And the presence of secular clergy in the service of monks at Glastonbury seems to be no solid argument against the monastic character of the revival. St. Dunstan's first care was to re-erect the church of St. Peter, rebuild the cloister, and re-establish the monastic enclosure. The secular affairs of the house were committed to his brother Wulfred, "so that neither himself nor any of the professional clergy should have authority over him."

The policy of Dunstan was supported by the queen-mother, Eadgifu, by the pri-}

mate, Oda, and by the East Anglian party, at whose head was the great ealdorman, Aethelstan, the "Half-king". It was a policy of unification, of conciliation of the Danish half of the nation, of firm establishment of the royal authority. In ecclesiastical matters it favoured the spirit of reunion, the building of churches, the moral reform of the secular clergy and laity, the extirpation of heathendom. Against all this ardour of reform was the West-Saxon party, which included most of the saint's own relations and the Saxon nobles, and which was not entirely disinterested in its preference for established customs. For nine years St. Dunstan's influence was dominant, during which period he twice refused a bishopric (that of Winchester in 951 and Crediton in 953), affirming that he would not leave the king's side so long as he lived and needed him.

In 955 Eadred died, and the situation was at once changed. Eadwig, the elder son of Eadmund, who then came to the throne, was a dissolute and headstrong youth, who devoted to the reactionary party and entirely under the influence of two unprincipled women. These were Aethelgifu, a lady of high rank, who was perhaps the king's foster-mother, and her daughter Aelfgifu, whom she desired to marry to Eadwig. On the day of his coronation, in 956, the king abruptly quitted the royal feast, in order to enjoy the company of these two women. The indignation of the assembled notables was voiced by Archbishop Oda, who suggested that he should be brought back. Seeing, however, that the attempt to save St. Dunstan and his kinsman Cynesige, Bishop of Lindfield, entering the royal chamber they found Eadwig with the two harlots, the royal crown thrown carelessly on the ground. They delivered their message, and as the king took no notice, St. Dunstan compelled him to rise and replace his crown on his head; then, taking the harlots with them, he led him back to the banquet-hall. Aethelgifu contrived to be revenged, and left no stone unturned to procure the overthrow of St. Dunstan. Conspiring with the leaders of the West-Saxon party she was soon able to turn even his own scholars against the abbot, and before long induced Eadwig to confiscate all Dunstan's property in her favour. At first Dunstan took refuge with him, but was afterwards compelled to leave the kingdom. Then, seeing his life was threatened, he fled the realm and crossed over to Flanders, where he found himself ignorant alike of the language and of the customs of the inhabitants. But the ruler of Flanders, Count Arnulf I, received him with honour, and lodged him in the Abbey of Mont Damiens, near Tournay. This was the great turning point of the Dunstan's life. It ended the first stage of his life's work, and laid the foundations of the dominant English church of St. Dunstan's time. The Dunstan's presence in Flanders gave a new impulse to the national Church. Dunstan's influence, and his policy of unification, were spread over the whole Continent. His influence in Flanders has been compared to that of St. Boniface in Germany. His energy and perseverance were boundless. He founded monasteries and abbeys wherever he went. He was the founder of the Abbey of Mont Damiens, near Tournay, where he died, and of Mont St. Piéral. He was the founder of the Abbey of Oignies, near Tournai, and of the Abbey of St. Peter's, near Ghent. He was also the founder of the Abbey of St..Botolph's, near London, and of the Abbey of St. Peter's, near Antwerp. He was the founder of the Abbey of St. Peter's, near Antwerp, and of the Abbey of St. Peter's, near Antwerp. He was also the founder of the Abbey of St. Peter's, near Antwerp, and of the Abbey of St. Peter's, near Antwerp.
That same evening he was offered the hospitality of a neighbouring abbey.

Throughout the realm Rome Dunstan at once regained his position as virtual ruler of the kingdom. By his advice Aelfstan was appointed to the Bishopric of London, and St. Oswald to that of Worcester. In 963 St. Aethelwold, the Abbot of Abingdon, was appointed to the See of Winchester. With their aid and with the ready support of King Edgar, St. Dunstan pushed forward his reforms in Church and State. Throughout the land, wherever there was good order untrammeled and respect for law. Trained bands policed the north, a navy guarded the shores from Danish pirates. There was peace in the kingdom such as had not been known within memory of living man. Monasteries were built; in some of the great cathedral monks took the place of the secular canons; in the rest the canons were obliged to live according to rule. The parish priests were compelled to live chastely and to fit themselves for their office; they were urged to teach their parishioners not only the truths of the Catholic Faith, but also such handicrafts as would improve their position. So for sixteen years the land prospered. In 973 the seal was put on St. Dunstan's statesmanship by the solemn coronation of King Edgar at Bath by the two Archbishops of Canterbury and York. Throughout the land during the next year King Edgar had been forbidden to wear his crown, in penance for violating a virgin living in the care of the nunery of Wilton. That some severe penance had been laid on him for this act by St. Dunstan is undoubted, but it took place in 961 and Edgar wore no crown till the great day at Bath in 973. Two years after his crowning Edgar died, succeeded in his elder son Edward. His accession was disputed by his stepmother, Ethelruth, who wished her own son Aethelred to reign. But, by the influence of St. Dunstan, Edward was chosen and crowned at Winchester. But the death of Edgar had given courage to the reactionary party. At once there arose a determined attack upon the monks, the protagonists of reform. Throughout Mercia they were persecuted and deprived of their possessions by Aelfhred, the ealdorman. Their cause, however, was supported by Aethelwine, the ealdorman of East Anglia, and the realm was in serious danger of civil war. Three meetings of the Witan were held to settle these disputes, at Kyrlington, at Calne, and at Amesbury. At the second place the floor of the hall (solarium) where the Witan was sitting was brought down, so that all eagerly sprang to clung to a beam, fell into the room below, not a few being killed. In March, 978, King Edward was assassinated at Corfe Castle, possibly at the instigation of his stepmother, and Aethelred the Redless became king. His coronation on Low Sunday, 978, was the last action of state in which St. Dunstan took part. When the young king took the usual oath to govern well, the primates addressed him in solemn warning, rebuking the bloody act whereby he became king and prophesying the misfortunes that were shortly to fall on the realm. But Dunstan's influence at court was ended. He retired to Canterbury, where he spent the remainder of his life. Thrice only did he emerge from this retreat: once in 980 when he joined Aelfhred of Mercia in the solemn transaction by which he established the authority of King Edward from their mean grave at Wareham to a splendid tomb at Shaftesbury Abbey; again in 984 when, in obedience to a vision of St. Andrew, he persuaded Aelfred to appoint St. Aelfheah to Winchester in succession to St. Aethelwold; once more in 986, when he induced the king, by a donation of 100 pounds of silver, to desist from his persecution of the See of Rochester.

St. Dunstan's life at Canterbury is characteristic; long hours, both day and night, were spent in private prayer, besides his regular attendance at Mass and the
DUPANLOUP

DUPANLOUP, FÉLIX-AUGUSTE-PHILIBERT, Bishop of Orléans, France, b. at Saint-Félix, Savoie, 2 June, 1804; d. at Lœzombe, Isère, 11 October, 1877. He was the son of Antoine Déschosal, to whom he ever remained tenderly devoted, gave him his early education. The better to screen his future from the disgrace of his illegitimate birth, she took him when only seven years old to Paris where, by dint of work and privations, she succeeded in keeping him for some time at the Collège Sainte-Barbe. After various attempts in other directions, Félix chose the clericalistic career, studying grammar at the Petite Communauté, humanities at the preparatory seminary of Saint-Nicolas du Chardonnet, philosophy at Issy, and theology at Saint-Sulpice. Ordained priest 1 Dec., 1825, he went as curate to the Madeleine where he founded the famous Catéchismes de l’Assomption and the Académie de St-Hyacinthe, being at one time at the same time the religious education of the Due de Bordeaux and of the Princes d’Orléans. The novelty and success of his catechizing methods drew upon him the ill will of his pastor. Transferred to Saint-Roch (1831), he soon won a reputation as pulpit orator and director. As superior of the preparatory seminary of Saint-Nicolas (1837–45), he so completely transformed the institution that admission there was the ambition of parents of the best families of France. “During those few years”, says Renan, himself a pupil of Saint-Nicolas (Souvenirs d’enfance et de jeunesse), “the old house of the rue St-Victor became the school in France which sheltered the greatest number of historical or well-known names.” At Saint-Nicolas Dupanloup was truly the ideal educator later described by Félix-Antoine-Philibert, in his famous book “La haute éducation intellectuelle”. Absorbed as he was in his professional work, he did not completely give up the direction of souls. Through one of his penitents, Pauline de Pergé, he brought about the conversion of Talleyrand (1838). A course in sacred eloquence which he had brilliantly inaugurated at the Sorbonne was discontinued after the eleventh lecture, owing to the intervention of a critic of Voltaire and Villemin’s unwillingness to enforce order. In 1841, in connexion with the Villemain educational bill, which was so marey satisfac-
tory to the Catholics than its numerous predecessors, Dupanloup inaugurated with Montalembert and Ravigan that long struggle for liberty of education which resulted in the loi Fould. It was at his suggestion that Ravigan wrote “De l’existence et de l’institution des jésuites”, in order to put down the still active bugbear of the hommes noirs called up by Bérer-

DUPANLOUP

DUPANLOUP

quire”, a moderate but clear assertion of Catholic claims. As the Salvandy project of 1847 fell short of these claims, he again published a series of pamphlets, “Du nouveau projet de loi”, “Des petits-séminaires” among others; and the better to control public opinion, he undertook the work of a Catholic daily paper, finally purchasing “L’ami de la religion”. In 1848 Dupanloup yielded to the French public, the work of a Catholic daily paper, finally purchasing “L’ami de la religion”. In 1848 when Falloux, yielding to Dupanloup’s persuasion, accepted a portfolio under President Louis Napoleon, he appointed a commission to draft an educational bill, and made Dupanloup a member. Dupanloup’s course of work was completely followed by the Catholic view such men as Thiers and Cousin, thus insuring the enactment of 1850. “He made me minister against my will”, said Falloux speaking of Dupanloup: “I have made him bishop against his will.” Appointed to the See of Orleans, he took possession of it 11 Dec., 1849, and during the twenty-eight years of his episcopate showed incredible activity. His administration, minute by minute described by Cochard, touched on every vital interest of the diocese: the holding of synods, parish visitsations, organization of catechisms and petits-séminaires along the lines adopted in Paris, development of charitable works, encouragement of ecclesiastical or scientific studies among priests, completion of the cathedral of Ste-Croix, introduction of the Roman Liturgy, etc. Still his energy was not exhausted. Wherever the interests of religion were at stake, he gave them vigorous support. In the question of the classics he stood for the broader view and entered upon a lively discussion with Louis Veuillot. Profiting by his membership in the French Academy, to which he had been elected 5 May, 1854, Dupanloup prepared and defended the award of the prix Bodin to Taine’s “History of English Literature” and opposed the admission of Littére into that body. The reorganization of “Le Correspondant”, with Falloux, Foissart, Cochin, and de Broglie at its head, was also largely his work. The Pucelle d’Orléans (Jeanne d’Arc) found in him an ardent champion; twice he pronounced her panegyric at Orleans, and it was he who introduced in Rome the cause of her beatification and raised the first funds towards a new monument in her honour.

of appealing, in behalf of the Catholic cause, to common
law and public liberties before a generation no
longer able or willing to recognize the Divine right of
the Church. The criticisms passed on him by Catholics
of a different school were more than offset by numer-
ous papal Briefs of encouragement and episcopal let-
ters of appointment. As a skilled diplomatist, he
acted, he was also a prolific writer. A complete list
of his writings is given by Lagrange, his biographer.
Some of his polemical pamphlets have already been
noticed. In his educational writings Dupanloup en-
courages some of the most important principles which are
now generally accepted. Among these are his concep-
tion of education as a process of developing mental
acumen in harmony with the impulses of interior
life and his insistence on the duty of the teacher to re-
spect the freedom of the pupils and to cultivate in them
a spirit of honor. He advocates physical education by
means of games, and warns against the danger of forc-
ing precocious children. Education, he holds, is in-
tellectual, moral, religious, and physical; but it is es-
pecially one, and to neglect any of its purposes would be fatal.

His more important works are:—catechetical:
"L’oeuvre par excellence" (1869); educational:
"L’éducation en général","La haute éducation in-
tellecluelle" (1850), "La femme studieuse" (1869),
and "Les lettres de l’education des filles" (1878); historical:
"Vie de Mgr Borderies" (Paris, 1904); oratiolar:
"proverbes françois" (Paris, 1895); pamphlets: "J.W.
Tin" (1842), and St. Vincent de Paul (1863); funeral
orations of Père de Ravignan (1858), the volunteers
(1860), Mgr Menjuad (1861), and Lamoricière (1865);
pastoral: "Lettres pastorales et mandements" (in the
archives of the episcopal palace of Orleans).

Duperron, Jacques-Davy, theologian and diplo-
mat, b. 25 Nov., 1556, at St-Lô (Normandy), France;
d. 5 Sept., 1618, at Batignolles, a suburb of Paris. His
parents were Calvinists and on account of persecution
sought refuge in Switzerland soon after his birth.
Having received a thorough literary, scientific, and
philosophical education, he applied himself to the
study of the Fathers and ecclesiastical writers, espe-
cially St. Augustine and St. Thomas Aquinas, and in
1577 or 1578 was converted to the Catholic Faith. He
enjoyed the favour and confidence of King Henry III,
to whom he had been presented in 1576, and later that
of Henry IV. The latter’s conversion was to a great
extent due to him. And as he was authorized by his super-
hiors to go about his mission, and his absolution from heresy was obtained from the
pope by Duperron and Cardinal d’Ossat (1595).
While in Rome for that purpose, Duperron was con-
secrated Bishop of Evrueil, a see to which King Henry IV
had already appointed him in 1591, though he was not yet in Holy orders. Immediately after his con-
version Duperron began to work with untried zeal for the cause of the reformed faith. He exploited this circum-
stance, and power of argument he won many victories in
controversies and conferences with ministers of the
reformed sects. In 1600 the famous Fontainebleau conference took place with the leader of French Cal-
vinism, Duplessis-Mornay, who had been accused by
Duperron of mutilating, falsifying, and misinterroting
texts from the Fathers in his work on the Exegetist.
Of the judges three were Catholics, and three Calvin-

DUPANLOUP, Paris, 1894, 11, 347-48; III, 317. His “Let-
ter on Slavery”, written on the occasion of the Civil
War in the United States, is another evidence of
Dupanloup’s broad sympathy, and helps to account
for his popularity in English-speaking countries.

Dupanloup’s main efforts, however, were directed
towards the defence of the Holy See, menaced in its in-
dependence by the ambition of the House of Savoy and
the ill-diagnosed connivance of Napoleon III. Salo-
on says (Mgr Dupanloup, p. 58): “For eight years, he
did not lay down his arms. From Villarfranca to
Mentana, he never took off his breast-plate.” During
this phase of his life, besides endeavouring to enlist ponti-
fical zouaves and to increase the Peter’s-pence, he
wrote the "Protestation" against the impending
spoliation of the pope; the “Lettre a un catholique sur
la brochure ‘Le pape et le congrés’” and “La souverainete
pontificale”, in which he cited a declaration made by
Cousin in favour of the temporal power of the pope;
two other pamphlets, one against the Convention of 15
Sept., 1861, and the other in defence of the Encyclical
of 8 Dec. and of the Syllabus; several letters to Ra-
tazza, Mgr Dupanloup, The Franco-Prussian War exhibit Dupanloup in two very
different lights. At the council he was the leader of
that minority which for political reasons stood, if not
against the papal infallibility itself, at least against the
opportuneness of its definition. The papal Bull of in-
diction, in which no mention was made of infallibility, he
welcomed with joy and transmitted to his flock in
simple words from the pulpit; and this spiritual testi-
ment, voiced by such organs as the “Civilita Catholica”
and the “Universe”, began to petition for the defini-
tion, he appended to his pastoral letter certain observa-
tions which, by making known in advance the position
he intended to take, involved him in a petty con-
travention with Louis Veuillot. Once in Rome he never
swerved from his position but used all the resources
of his fiery nature to win others over to his views. It
was he who, on the eve of the final vote, advised the
minority to vote neither placet nor non-placet, but
to abstain and withdraw. That he appealed to the secu-
lar arm and threatened the council with diplomatic in-
tervention has been both asserted and denied. This
much is vouched for by Ollivier, then minister of Napol-
elon; “No bishop of the minority, Dupanloup or
other, ever demanded the evacuation of the pontifical
territory” (Le Correspondant, 10 Dec., 1892). In jus-
tice to him it should be added that, once the dogma
was defined, he was neither slow to acquiesce in what he
called “the victory of truth and of God” nor half-
hearted in declaring his adherence. During the
Franco-Prussian War Dupanloup showed himself a
worthy successor of Saint-Aignan and like him won the
title of defensor civiliatis. His prestige enabled him
to have the severe conditions imposed by the victors on
the city of Orleans either withdrawn or mitigated.
In gratitude his people sent him to the National Assem-
by. As a member he took an effective part in secur-
ing the passage of the law which restored the military
chaplaincies and which placed the city outside the
catholic institutes (1875). He was made Senator in
1875, and one of his last public acts was to deter the
French Government from officially taking notice of the
centenary of Voltaire (1878). A malady which had
long undermined his health resulted in his death while at
the chateau de Lacome. His remains were laid to
rest in the cathedral of Orleans and his heart conveyed to
Saint-Felix, his birthplace. A biographer of his, Ravignan
pronounced only a few words of eulogy, the oration
being delivered in 1888 by Bishop Besson at the
unveiling of Dupanloup’s monument.

Dupanloup was without question one of the ablest
French bishops of his day. He repeatedly refused
higher positions. In many things a conservative and
even a legitimist, he was one of the first who thought
In 1656 there appeared the first volume of the “Nouvelle bibliothèque des auteurs ecclésiastiques”, covering the first three centuries. In it Dupin had treated simultaneously biography, literary criticism, and the history of dogma; in this he was a pioneer leaving far behind him all previous efforts, Catholic or Protestant, which were still under the influence of the Scholastic method. He was also the first to publish such a collection in a modern language. Unfortunately he was young and worked rapidly. In this way errors crept into his writings and he did not correct them. M. de Petit-Didier, a Benedictine, published an anonymous volume of “Remarques sur la bibliothèque des auteurs ecclésiastiques de M. Du Pin” (Paris, 1691), and this was followed by two other volumes to which the author’s name was appended (Paris, 1692 and 1696). Dupin answered him in his fifth volume and Petit-Didier replied in the fore part of his second volume of “Remarques”. Petit-Didier’s observations were often inspired by contemporaneous prejudice. Thus Dupin had placed in the fourth century, to which indeed he rightly belongs, St. Macarius the Egyptian. Petit-Didier discovered Semi-Pelagianism in this author’s works, in reality ideas professed by many before St. Augustine, but from which the adversary of Dupin concluded that St. Augustine would certainly have condemned them after Pelagius’s days. It is true that St. Augustine (11, 198).

A more formidable enemy appeared in Bossuet, who, during a public thesis at the College of Navarre in 1692, condemned the audacity of the critic. Dupin answered him and Bossuet appealed to the civil authority, denouncing Dupin to Chancellor Boucharet and to Archbishop de Harlay. Bossuet simply enumerated the points that he had approved in the “Bibliothèque” concerning original sin, purgatory, the canoninity of the Sacred Scriptures, the eternity of hell’s torments, the veneration of saints and of their relics, the adoration of the Cross, grace, the pope and the bishop’s, Lent, divorce, the celibacy of the clergy, tradition, the Eucharist, the theology of the Trinity, and the Council of Nicea. He demanded a censure and a retraction.

Like Petit-Didier Bossuet would not admit that any of the Greek or Latin Fathers differed from St. Augustine on the subject of grace, nor that this matter could be called subtle, delicate, and abstract. Between Dupin and Bossuet there was a still wider difference. “The liberty M. Dupin takes of so harshly condemning the greatest of the Church Fathers, and of denouncing, from aPelagian point of view, the most venerable fathers of the Church, is a crime which surpasses the limits of any law.” (Bossuet, OEuvres, XXX, 513). On the other hand Bossuet strongly contended that heretics could not be too severely dealt with: “It is dangerous to call attention to passages that manifest the firmness of these people without also indicating wherein this firmness has been overrated: otherwise they are credited with a moral steadfastness which elicits sympathy and leads to their being excused” (ibid., XXX, 633).

Dupin submitted but was nevertheless condemned by the Archbishop of Paris (14 April, 1696). He continued his “Bibliothèque”, which was put on the Index long after his death (10 May, 1757), though other works of his were condemned at an earlier date. He had also to suffer the criticism of Richard Simon (Paris, 1750, 1st ed.). Since then Dupin had similar views and methods so that when Bossuet was writing the “Défense de la Tradition et des Saints Pères” (which did not appear, however, until 1743), he included both in his invectives against the “haughty critics who inclined to rabbinism and the errors of Socinians. Although Dupin spoke favourably of Arnauld and signed the “Cas de discernement”, he was not a Jansenist. On these matters he rather shared the opinion of Launoy who “had found a way to be at once both semi-Pelagian and Jansenist” (Bossuet, OEuvres, XXX, 509). Dupin was pre-eminent a Gallican. It was probably on this account that Louis XIV had him
exiled to Châtelerault, on the occasion of the "Cas de conscience". Dupin retreated and returned, but his chair in the College of France was irrevocably lost. Later Dubois, who aspired to the cardinalate and sought therefore the favour of Rome, made similar accusations against Dupin. Dupin was on friendly terms with Wake, the Anglican Archbishop of Canterbury, who hoped for a union of the two Churches. The correspondence was looked on with suspicion, and in 1718 the regent had Dupin's papers seized. This act led to calumnies against the writer, who really had had no other aim than the reconciliation of the separated Anglicans. A similar purpose animated the "mémoires" he presented to Peter the Great during the latter's residence in France. Dupin died shortly after.

Besides the "Nouvelle bibliothèque ecclésiastique" (58 vols. Svo with tables), the "Rémarques" by Pelt-Didier, and the "Critique" by R. Simon reprinted in Holland (19 vols. 4to), Dupin edited the works of Gerson (Paris, 1703), Optatus of Mileve (Paris, 1700), the Psalms with annotations (1691), and published "Notes sur le Pentateuque" (1701), an abridgment of "L'histoire de l'Eglise" (1712), "L'histoire profane" (17-18), "Pentateuque" (1705, under the name of M. de Clairac), a "Traité de la paissance ecclésiastique et temporelle", a commentary on the Four Articles of the clergy of France(1707), the "Bibliothèque universelle des historiens" (1716), numerous works and articles on theology, reprints of former works, etc. Dupin was no pedant. Etienne Jordan, a contemporary who saw him, said: "He met evening over glasses of port, and in the afternoon over cards in the pleasant company of ladies. His library and adjoining apartment were marvellously well kept."

PAUL LEJAY.

Dupin, PIERRE-CHARLES-FRANÇOIS, known as BARON CHARLES DUPIN, a French mathematician and economist, b. at Varzy, Nièvre, 6 October, 1754; d. at Paris, 18 January, 1873. At the age of twenty-three he entered the École polytechnique, and after three years of successful studies under the famous Monge, he received the degree of naval engineer. He then served in that capacity in the navy and showed so much ability that he was later appointed inspector-general of the navy. In 1813 he published a pamphlet, "Développement de géométrie pour faire suite à la géométrie pratique de Monge" (Paris, 1813), containing many new and brilliant theorems, the most important of which were one relating to the indicatrix of curved surfaces and another on orthogonal surfaces. He was elected to the Academy of Sciences in 1815, a member of the Academy of Sciences, and a ship at the Conservatoire des arts et métiers; during this period he wrote various pamphlets on scientific topics, such as: "Applications de géométrie et de mécanique à la marine" (Paris, 1822); "Diverses leçons sur l'industrie, le commerce, la marine" (Paris, 1825), and also numerous memoirs for the Academy of Sciences, which were highly spoken of. Notwithstanding his position as a mathematician, he soon preferred to devote himself to political economy. His "Voyages en Grande Bretagne de 1816 à 1819" (6 vols., Paris, 1820-1824), which were the result of a personal inquiry into the commerce and industry of England, placed him in the foremost rank of statisticians. In his "Carte de la France éclairée" (Paris, 1824), he was the first to use different colours to show the development of education in various parts of France. Charles X gave him the title of baron in 1824. Dupin gradually turned to politics and for forty years was a member of legislative assemblies. Under the Restoration, in spite of the honour bestowed upon him by the Bourbons, he sided with the Liberals and took his seat at the Left of the Chamber; under the Monarchy of July, he sat with the Centre, and finally with the Right, under the Republic of 1848. He rallied to the Liberal party, and was appointed senator by Napoleon III. In his political career he showed himself a man of ability, of great industry and activity, and never failed to assert his Catholic convictions. Although a less brilliant man than his brother the elder Dupin, he may have a more lasting reputation on account of his discoveries in geometry.

ANONYMOUS, Notice historique sur le baron Charles Dupin (Paris, 1857); Les Mondes (Paris, 1873), XXX, 135; Revue des questions historiques (1851), IX, 217-290.

Duponceau, PETER STEPHEN, jurist and linguist, b. at St-Martin de Ré, France, 3 June, 1760; d. at Philadelphia, U. S. A., 1 April, 1844. Educated in a Benedictine college, he exhibited a marked taste for languages, and in 1777 accompanied Baron Stangel to the United States. Duponceau was an active member of the Revolutionary army, with rank of captain, and was wounded at the Battle of Monmouth. He settled in Philadelphia, studied law, and was admitted to the Bar. Throughout a long life he was identified with public affairs and was also author or translator of a number of legal or historical treatises, but his fame rests chiefly upon his studies of the native American languages. Duponceau's greatest work, the "Histoire de la langue indienne du Néographe" (Philadelphia, 1835), was the Volney prize of the French Institute in 1835.

DUNGLISON, Public Discourse in Commemoration of Peter S. Duponceau (Philadelphia, 1844); FIELDING, Bibliography of American Languages (Washington, 1891).

JAMES MOONEY.

Duprat, ANTOINE, Chancellor of France and Cardinal, b. at Issoire in Auvergne, 17 January, 1463; d. at the Château de Nantouillet near Meaux, 9 July, 1555. Educated for the law he won a high position in his profession and in 1507 became first president of the Parlement of Paris (the highest court of France). In 1515 Francis I made him chancellor and prime minister. In 1517, after his wife's death, he took sacred orders and gradually rose in the hierarchy: first bishop of Paris, then primate of France, and finally, in 1527, and legate a latere, 1530. Duprat's influence extended much beyond the departments of justice and finance placed under his direct control. Hano-taux, in the introduction to his "Recueil des instructions", calls Duprat "one of the most notable men of ancient France, second only to Richelieu in the domestic influence he exercised in the destiny of his country". This influence was constantly exerted to strengthen royal absolutism; it was felt in the stern measures he took against the grands seigneurs, and in his elaborate fiscal system. Duprat's influence was also manifested, together with his perfect orthodoxy, in those measures which affected the relations of France with the Church, namely, the signing of the Concordat of 1516, and the checking of nascent Prot-
estanism. The Concordat, which Duprat himself negotiated with Leo X at Bologna, did away with the schismatical principles of the "Pragmatic Sanction"; on the other hand, by causing the appointment of the French hierarchy on royal nomination instead of the civil, and in the civil elections, and the Minister du Bellay failed to move him. The Sorbonne and the Parliament were instructed to exclude the writings of the innovators; in 1534 the posting of subservient pamphlets at the door of the royal apartments cost the perpetrators their lives. Duprat left no writings, but took a leading part in the compilation of the "Coutumes d'Avignon"; he also did much to encourage the remuneration of letters.

(2) Guillaume, son of the foregoing, b. at Issoire, 1507; d. at Beauregard, 1550. Appointed Bishop of Clermont in 1529, he led a zealous and saintly life and is favourably known by the leading part he took in the last sessions of the Council of Trent as well as by his patronage of the Jesuits. Not only did he receive the Jesuits in his city, but they were placed in charge of the colleges of Billem and Mauriac, but, in face of much opposition, he helped them financially and in other ways to found in Paris the Collège de Clermont, so called after Duprat's episcopal city.

J. F. SOLLIÈRE

DUPUYTREN, GUILLAUME, BARON, French anatomist and surgeon, b. 6 October, 1777, at Pierre-Butière, a small town in the Limousin, France; d. in Paris, 8 February, 1835. His parents were so poor that he received his education at the Collège de la Marche through charity. By competitive examination he gained the position of prosecutor in anatomy at the newly established Ecole de Médecine, and lost it when he was but eighteen. In 1803 he was appointed assistant surgeon to the Hôtel-Dieu. In 1811 he became professor of operative surgery, and in 1815 professor of clinical surgery at the Ecole de Médecine and head surgeon to the Hôtel-Dieu. He was indefatigable in his devotion to his profession and had one of the largest surgical practices of all time. He amassed a fortune estimated at $1,500,000. He succeeded in accomplishing all this in spite of a consumptive tendency against which he had to battle all his life and which finally carried him off. In his will he endowed the chair of anatomy at the Ecole de Médecine and established a home for physicians in distress. A curious contradiction of the fascia of the palm of the hand, which cripples the fingers, is still called after him, and the anatomical museum of the Ecole de Médecine bears his name. The most important of his writings is his treatise on artificial anus. He published also a treatise on gunshot wounds and clinical lectures on surgery. Dupuytren was not an original investigator in surgical subjects, but he was an excellent observer and a great worker, who knew how to adopt and adapt others' labours very excellently.

DUQUESNOY, François (called also Françoys Flamando, and in Italy Il Flamengo), b. at Brussels, Belgium, 1501; d. at Leith, Italy, 12 July, 1616. Duquesnoy was the son of an excellent Dutch sculptor from whom he received his first lessons. At an early age he carved the figure of justice on the portal of the chancellery at Brussels, and two angels for the entrance of the Jesuit church of that city. In 1619, at the age of twenty-five, he was sent by the Archduke Albert to study in Rome, and there he resided many years, executing various works of importance. To him we owe thebesant halsadachium over the high altar in St. Peter's, the colossal statue of St. Andrew with his cross, also in St. Peter's, and the Santa Sussanna in the church of S. Maria di Loreto. In the cathedral of Ghent is his rocco tomb for Bishop Triest, a good work in its own style. Duquesnoy was a contemporary of Bernini and a friend of Le Pous- sain, who recommended him to Cardinal Richelieu. The sculptor was about to start for Paris when death overtook him at Leith. It is reported that he was poisoned by his own brother, Jérôme, who was also a clever sculptor (b. 1612; burned for unnatural crime, 24 Oct., 1654). François is famous for his beautiful sporting children in marble and bronze, his ivory carvings for drinking-cups, etc. The figure known to the populace of Brussels as the "Manneken" is commonly attributed to him.

M. L. HANDLEY.

DURAN, Narcísco, b. 16 Dec., 1776, at Castellon de Ampurias, Catalonia, Spain; d. 1 June, 1846. He entered the Franciscan Order at Gerona, 5 May, 1792, volunteered for the Indian Mission, and was sent into the Franciscan Missionary College of San Fern- nando in the City of Mexico, and in 1806 came to Cali- fornia. He was assigned to Mission San José and toiled there among the Indians until April, 1833, when he retired to Mission Santa Barbara. As early as 1817 Father Sarriá, the comisario prefecto, recommended Duran for higher offices. Father Payeras, the co- misario prefecto in 1820, likewise held him worthy and capable of any office. Towards the end of 1824 the College of San Fernando elected him presidente de las missiones, which post he held with the exception of one term (1828-1831) until 1838. From 1831 till his death in 1846 he again held this office, and from 1837 to 1843 he was also comisario prefecto of the Fernandi- nos, i.e. Fransics, who were in charge of the missions in Southern California. During the troublous times of the secularization and sale of the missions it was Father Duran who fought the pillagers step by step, though in vain, and fearlessly unmasked the real aims of the despoo- lers. His numerous letters to the Government on the subject are masterpieces of close reasoning, pungent sarcasm, and unanswerable argument. Governor Piquer recommended the exile of Father Duran, but the Mexican Government allowed him to remain un- molested at Mission Santa Barbara until his death. Six weeks previous to this the dying Bishop of California had appointed Father Duran vicar-general, and for a month he held the office of administrator of the dio- ceses. His body was placed in a plain coffin, and he was buried beneath the sanctuary of the mission church. He was one of the last survivors of the Fernandinos, and for virtue, learning, and missionary zeal ranks with the most brilliant of his predecessors.

DURAND DE MAILLANE, PIERRE TOUSSAINT. See GALICIANISM.

DURAND URSIN, a Benedictine of the Maurist Congregation, b. 20 May, 1682, at Tours; d. 31 Aug., 1771, at Paris. He took vows in the monastery of
Durandus (Duranti, Durantis), William, canonist and one of the most important medieval liturgical writers; b. about 1237 at Pumiison in the Diocese of Béziers, Provence, d. at Rome, I Nov., 1296. He was called "Speculator" from the title of one of his works, "Speculum Judiciale". He studied law at Bologna under Bernard of Parma and then taught it at Modena. Clement IV (Guy Foulques, 1265-1268, also a Provençal) summoned Durandus to Rome, ordained him subdeacon, and gave him titular canonries at Beauvais and Chartres. He was then attached to the papal curia as Auditor generalis causarum sacri palati. He accompanied Gregory X (1271-1276) to the Second Council of Lyons (1274) and, as the pope's secretary, drew up its decrees. In 1279 he was made dean of Chartres, but did not reside there. At about the same time he went to Romagna as papal governor and succeeded in subduing a rebellion under Guy of Montefeltro. He destroyed Guy's fortress della Ripa and founded in its place the town of Urbino. In 1286 he was elected bishop by the chapter of Mende (Minutam) in the province of Narbonne, but did not go into residence till 1291. Meanwhile his diocese was torn by contention between his nephew and the younger. In 1295 he was again in Italy (under Boniface VIII, 1294-1303) as governor of Romagna and Ancona, where the Gibellines were again in rebellion. He refused the pope's offer to make him Archbishop of Ravenna, came to Rome, and died there. There is no reason to suppose that Durandus belonged to any religious order, though he has been claimed by both the Dominicans and the Austin Canons. He is buried at Rome in Santa Maria Sopra Minerva, where a long epitaph tells the story of his life and gives a list of his works.

Of these works the most famous is the "Speculum divinorum officiorum" (first ed. by Fust and Schoefer, Munich, 1477; and later ed. by John Zainer, 1473; latest ed. at Naples, 1839). It was written in 1286. Its eight books contain a detailed account of the laws, ceremonies, customs, and mystical interpretation of the Roman Rite. Book I treats of the church, altar, pictures, bells, churehyard, etc.; II of the ministers; III of vestments; IV of the Mass; V of Holy Hours; VI of the Proprium Temporis; VII of the Proprium Sanctorum, of the astronomical calendar, manner of finding Easter, Epacts, etc. Durandus's "Rationale" is the most complete medieval treatise of its kind; it is still the standard authority for the ritual of the thirteenth century and for the symbolism of rites and vestments. The allegorical explanation of vestments, for instance, as signifying virtues of the garments worn by Christ in His Passion, is taken from its third book. Other works are "Speculum Legatorium", afterwards enlarged into "Speculum Judiciale" (four books), a treatise on the canonical rights of legates and the forms of canonical processes (first ed. at Strasbourg in 1173; Frankfort, 1665); "Breviarium, sive Reper- terium juris canonici" (Rome, 1174); "Breviarium glossariorum" (extant only in Parisian (Papal)) both commentaries on the decretals, arranged in the same order; and "Commentarius in canones Concilii Lugdunensis II" (Fano, 1569, with a life of the author by Simon Majolins), a semi-official exposition of the canons of the Second Council of Lyons. Durandus's epitaph also mentions a "Pontificale", which is now lost. It was written for him to see Schulte (op. cit. infra), II, 155-156.

ADRIAN FORTESE.
Durandus of Saint-Pourçain, philosopher and theologian, b. at Saint-Pourçain, Auvergne, France; d. 13 September, 1322, at Meaux. He entered the Dominican Order at Clermont and obtained the Doctor's degree at Paris in 1313. John XXII called him to Avignon as Master of the Sacred Palace, where he expounded the Scriptures. In 1318 he was consecrated Bishop of Le Puy-en-Velay and was transferred to Meaux in 1326. He is known as Doctor Resolutissimus owing to his strenuous advocacy of certain opinions held by this day. His writings include commentaries on the "Sentences" of Peter Lombard (1508); "De origine jurisdictionum" (Paris, 1506); and a treatise on the condition of holy souls after their separation from the body. His nominalism was so much opposed to the contemporary philosophic realism that the third period of Scholasticism is made to begin with him. He rejects both the sensible and the intelligible species, introduced he says, to explain sense-perception, as also the active intellect. He denies the principle of individuation as distinct from the specific nature of the individual. In theology he argues for a separation of natural knowledge from that obtained through faith and revelation. Certain dogmas, as that of the Trinity, cannot be shown not to contain impossibilities without believing them, while even the merit of faith. But God, who gives the power to act, but this is no immediate influx of the Creator upon the actions of the creature. The sacraments are only causes without which grace is not conferred. Marriage is not strictly a sacrament. He also inates that Christ could be present in the Eucharist with the substances of bread and wine remaining. Throughout, Durandus shows admirable submission to the corrective prerogative of the Church, the exercise of which was unnecessary. By order of John XXII, the treatise "De statu animarum" was examined and was found to contain eleven errors. See Quetif and Richard, Script. O. P., I, 586; Stöckel, Geschichte der dogmatischen Theologie, Munich, 1870, II, 218-241; Mortier, Histoire des maîtres généraux de l'Ordre des Frères Précheurs (Paris, 1907), III, 83-86. See also Durandus, Oeuvres, in the Bibliotheca Patrum et Theologorum, I, 113-408.

Thos. M. Schwertner.

Durandus of Troarn, French Benedictine and ecclesiastical writer, b. about 1012, at Le Neubour near Evreux; d. 1059, at Troarn near Caen. Affiliated from early childhood to the Benedictine community of Mont-Sainte-Catherine and of Saint-Vincent, he was made abbot of the newly founded Saint-Martin of Troarn by William, Duke of Normandy, in whose ecclesiastical state he held a benefice from Lanfranc, who consecrated him with Saint Gerbert. Ordericus Vitalis calls him ecclesiasticus canthus et dogmaticus doctor peritissimus. Of his achievements in sacred music we know nothing beyond that mention, but we have his "Liber de Corpore et Sanguine Domini" (P. L., CXLIX, 1375) against Berengarius. The ninth and last part of it contains precious historical information about the heresiarx. In Durandus's mind Berengarius is a figuster pure and simple, after the manner of Scotus Erigena, whose now lost book he is said to have possessed and used. In the rest of his book Durandus follows Paschasius, whom he somewhat emphatically styles Divini sacramenti scrutator diligentissimus discursorum catholici, and from whom he borrows both his patristic apparatus and his theological methodology. However, much of the text that Durandus quotes new texts of Bede, Amalarius, Fulbert de Chartres, and St. John Chrysostom. His presentation of the Eucharistic dogma is frankly Ambrosian, i.e., he maintains with Paschasius and Gerbert the conversion of the bread and wine into the identical body and blood of Christ, thus excluding the Augustinian theory of the "Presencia Spiritualis" still held by some of his contemporaries and contributors to prepare the definition of the Fourth Lateran Council (1215). Durandus explains with skill the Augustinian texts, chiefly in the "De doctrina christiana" and the "Letter to Boniface", misused by Berengarius; but in the last analysis he appeals to the argument of authority already used by Guimond (P. L., CXLIX, 1145): "The saintly Doctor of the Church, whose use of composition, fails at times to clearly bring out his thought. Hence he may appear obscure to the unlearned and even become a source of error. If perchance he should have erred in so great a mystery, we should then bethink ourselves of the Apostolic saying: 'But though an angel from heaven preach a gospel to you besides that which you have received, let him be anathema'" (loc. cit., 1145). Durandus wrote also against Berengarius a poem of 900 verses, of which twenty-five prefac the above treatise and thirteen are quoted in Mabillon's "Annales" (LXIV, 119), the rest being unpublished. Migne (loc. cit.) appends to the "Liber" two epitaphs composed by Durandus, one for Abbot Amalarius, and another for Countess Mabile. (See Berengarius of Tours.)

J. F. Sollier.

Durango (Durangum), Archidioceze of, located in north-western Mexico. The see was created 28 Sept., 1620, seventy-two years after the Friars Diego de la Cadena and Gerónimo de Mendoza had established the San Juan Bautista de Analco mission in the valley of the Sierra Madre. The city of Durango was founded in 1534 by the Spanish captain Ibarra, and served at once as a centre for numerous missionaries, whose efforts to convert the natives were so successful that under Philip III the Diocese of Guadalajara was divided by Paul V, and Durango was raised to episcopal rank. The first bishop, Gonzalo Hernandez y Hermosillo, devoted much time to the evangelization and spiritual welfare of the Indians. In the beginning the Diocese of Durango included New Mexico (Santa Fe, Chihuahua, and Sonora), which was made independent sees. Durango was made an archdiocese by Leo XIII (23 June, 1904), and now includes all the State of Durango and part of Zacatecas, with Sonora, Chihuahua, and Sinaloa for suffragans. The first archbishop was Vicente Salinas. Among the remarkable bishops of the see were the scholarly Gorospe, to whom the city owes its canal; the famous writer Le gaspi, who began the cathedral that was finished and consecrated by Antonio Zubiria y Escalante, and lately decorated anew by Archbishop Santiago Zubiria y Manzana. The Catholic press is represented by "El Domingo" and the "Boletin Eclesiástico". Besides the Escuelas Guadalupanas there are two colleges, the Colegio Guadalupano and a College of the Brothers of Mercy with Lagrange hall, known as the house is quite mountainous and is watered only by a few streams, but is well adapted for grazing. There are many rich mines of gold, silver, and iron. In 1900 the population of the State of Durango was 307,274, that of the city 31,092. The latter, known also as Guadalupe and Ciudad de Victoria, stands picturesquely at 6700 feet above sea-level, and has several important industries and a large trade in cattle and leather.

Reginaldo Güereca.
Durazzo, Archdiocese of (Dyrrachiniensis), in Albania, situated on the Adriatic, has a good port, and is the chief town of a sandjak in the vilayet of Scutari; the population is about 9000. According to Appian, it was founded by a barbarian king, Epidamnus, after whom it was called Epidamnum; it then took the name of Dyrrachium, from Dyrrachus, nephew of a daughter of Epidamnus, to whom was due its port. According to Thucydides and Strabo it was more probably a colony of Corcyra. It was one of the causes of the Peloponnesian War. Conquered by the kings of Illyria, when attacked by the Romans it surrendered to the latter and received from Rome many privileges. Its port was important for communication with Greece. Cicero and Pompey in their disgrace took refuge at Dyrrachium. When towards the end of the fourth century the empire was divided into two parts, the city fell to the Eastern Empire. The Byzantine emperors made it a strong fortress, and Anastasius I was born there. After the seventh century it was the centre of a theme; in 1011 its governors received the title of dukes. Under Michael the Paphlagonian (1014–1041) it was occupied by the Bulgarians; in 1042 it was retaken by the Greeks. In 1082 it was captured by Robert Guiscard, who defeated Alexius Comnenus under its walls; at the death of Robert it fell again into the power of the Greeks, who reoccupied Constantinople by the help of the Latins (1204). From 1206 to 1294 it belonged to the despotate of Epirus. It was then conquered by the Angevin kings of Naples, who gave it as a fief to princes of their family; the descendants of these rulers kept the title of "Duras" even when they no longer held the city. The effective lordship passed to the Thopias about the middle of the fourteenth century. In 1573 the city was occupied by the Russians of the Zeta; in 1586 by the Venetians, and finally, in 1591, by the Turks.

The church of Durazzo is the most ancient in Albania. According to local tradition the first bishop of the country was St. Cassarius, one of the Seventy Disciples. St. Astius, his successor, is said to have suffered martyrdom under Trajan about A.D. 100. A list of the Greek bishops is in Lequien (Oriens Christianus, II, 240–257), but it is very incomplete. Durazzo is even yet a metropolis for the Greeks. Under Eucharius, who attended the Council of Ephesus, 431, it was the metropolis of Epirus Nova or Illyria Graeca. The see, long disputed between the Greeks, the Bulgarians, and Serbs, remained finally in the hands of the first named. Its bishops, who as early as 519 had sided with the Arians, Patriarch of Constantinople, against Pope Hormisdas, followed the schism of Michael Cerularius in the eleventh century. At the beginning of the thirteenth century, after the Latin conquest of Constantinople, a Latin see was established there (1290). The Latin succession was often interrupted, on account of political changes; the actual (1908) archbishop is the fifty-second of the line (Lequien, O.C., II, 133–135; Galli, I, 37; II, 87; Eubel, I, 241; II, 164). The episcopal residences are subject to several revenues; after the Turkish conquest the archbishops transferred it to Corbina (1509). Then to Canova; to-day they reside at Delbenisti. Durazzo had originally but one suffragan, Cernica or Tzernicium, site unknown. Later it had Prise, Croia, Aixos, and Canova. To-day Aixos only is a suffragan. Archdiocese of Dyrrah, he has retained his power over it has been so limited by Propaganda that he may be considered an archbishop without a suffragan.

There are in the archdiocese about 250,000 inhabitants, of whom about 110,000 are Musulmans (Turks and chiefly Albanese), 95,000 Greeks or Grecoized Albanians, 14,000 Catholics (Albanese, except a few Italians and Austrians). There are also at Elbasan about 150 recently converted Greeks. The diocese has no seminary, but some students are sent to the seminary of Scutari. It has 20 priests, of whom 13 are secular priests, 22 parishes or churches, 47 priests, 30 teachers, and workers (the latter conducted by Sisters of Charity of Agram). Franciscan friars have charge of several parishes.

L. Petit.

Durbin, Elisha John, the "patriarch-priest of Kentucky", b. 1 Feb, 1800, in Madison Co., in that State, of John D. Durbin, son of Christopher Durbin, pioneer, and Patience Logsdon; d. in 1887 at Shelbyville, Kentucky. In 1816 he was sent to the preparatory seminary of St. Thomas, in Nelson Co., where he remained four years. He was afterwards placed under such distinguished missionaries as David Flaget, Felix de Andreis, and Joseph Rosati; thence he went to the near-by Seminary of St. Joseph, at Bardstown, where, in 1821–1822, he had as instructor Francis Patrick Kenrick, later Bishop of Philadelphia and Archbishop of Baltimore. He was ordained priest in Bardstown, by Bishop David, 21 Sept., 1822. With Bishop Flaget he performed the pastoral care of western and south-western Kentucky, about thirty counties, with an area of over 11,000 square miles, nearly one-third of the State. Then began a missionary career of over sixty years hardly paralleled in the United States, and that subsequently won for him the names of "Apostle of Western Kentucky" and "Patriarch-Priest of Kentucky missions", and the monopoly was the centre of his mission. From it he journeyed on horseback over his vast territory, erected churches, established stations, formed congregations, and visited isolated families. In the beginning duty called him beyond his mission proper into Indiana, and once a year to Nashville, Tennessee. He traversed his extensive and sparsely settled mission incessantly for over sixty years, his chariot of fortune and the rude homes of his poor flock his only abiding places. Occasionally a communication from him would appear in the press, and then only in defence of truth or outraged justice. When he did write, he wrote cogently and elegantly. Enfeebled by age, his sturdy constitution gave way in 1884, when his bishop, yielding to his entreaties, assigned him the small mission at Paris, Kentucky. A stroke of paralysis was added. He was given, in 1885, the chaplaincy of an academy, at Shelbyville, Ky., where he died.

LOUIS G. DEPPEN.

Dürer, Albrecht, celebrated painter and engraver, b. at Nuremberg, Germany, 21 May, 1471; d. there, 6 April, 1528. Dürer left his native city, then famous for its commerce, learning, and art, at the age of fifteen, when undertaken after he had completed his apprenticeships both to his father, a goldsmith, and to the painter and engraver Wohlgemut; on this occasion he travelled through Germany and visited at Colmar and Basle the family of the recently deceased Schongauer; in 1505–07 he spent some time in Venice; in 1520–21 he went to the Netherlands, visiting especially Antwerp.

First Period: 1505—After the earliest works of his youth (portraits, Madonnas, coats-of-arms, landscape-sketches) he set up in 1494 a studio of his own. In the same year he married Agnes Frey but they had no children. Among his Nuremberg friends the learned humanist Willibald Pirckheimer held the first place. Besides great advance in learning, Dürer owed to Pirckheimer the happiness of a lifelong friendship...
and the acquaintance with classical antiquity which he occasionally drew upon in his work. Dürer's art, however, with its sources in the German Middle Ages, remained essentially German; the influence of the art of Italy and the Netherlands was merely supplementary. In his own country there were few chances for mural paintings; but the demand for altar-pieces and portraits was all the greater. His woodcuts were eagerly sought after by the general public, his engravings on copper by connoisseurs. Among his fine compositions are: the Baumgärtnert altar-painting, the central panel of which represents the Adoration of the Child Christ, the wings, the donors as Sts. George and Eustachius; the "Lamentation of Christ", in which the pathos is noteworthy; and the remarkable picture of himself (1500). These are preserved in the Old Pinakothek in Munich. The portrait of himself just mentioned is greatly idealized as is also that of a lady of the Fürsteg family. On the other hand, in the portraits of his father and mother realism predominates. But here, as in the "Prodigal Son" and in his drawings, Dürer seeks to elevate his naturalism by

sweet simplicity, depth of feeling, and grandeur of conception. The "Adoration of the Magi" in the Uffizi at Florence will bear comparison, at least for German taste, with the masterpieces of Italy and the Netherlands. Dürer's woodcuts have a quality entirely their own; though without colouring, they yet produced the effect of colour. The "Apocalypse" (15 cuts) is distinguished by its daring fancy and grandeur of conception. The most striking of the series are: the "Four Riders", the "Angels of the Euphrates", the "Battle of the Angels with the Dragon". To the same period belong, for the most part, the powerful "Larger Passion" (7, later 12, cuts) as well as the beautiful "Life of the Virgin" (16, later 20, cuts), in which the scenes from the life of the Holy Family in Egypt have all the sweetness of a charming idyll. Mention should be made of the so-called "Green Passion" in the Albertina Museum at Vienna, a series of twelve drawings with the pen on green paper, also of the "Smaller Passion" of a later date in 37 woodcuts, and of the 17 copperplate engravings on the same subject. For the fifth time the artist came back to the Passion of Christ eight years before his death; a few sketches are to be found in the Uffizi at Florence and in the Albertina at Vienna. Wood and copperplate engraving were brought to great perfection by Dürer; the latter, and etching as well, by his own work; the

former by his directions to the wood-engravers who carried out his designs.

SECOND PERIOD: 1505 to 1520.—In the "Festival of the Rosary", painted in Venice for German merchants residing there, he competes, not unsuccessfully, with the Italian colourists, though it may be said that colour was not his strong point. The painting (Abbey of Strahov, Prague) is damaged, but a good copy is preserved in the Imperial Museum at Vienna. An oil-painting of the same period, "Christ on the Cross", and other works that followed, e. g. "Adam and Eve" (Madrid and Florence), show that Dürer's trip to Italy and the acquaintance made there with Giovanni Bellini were not without profit to his art; but Dürer's nationality and the independence of his genius are always evident. Another work much admired was the so-called Heller altar-piece, destroyed at Munich in 1674 by fire. Valuable studies for this picture and an indistinct copy are still extant. One of the finest examples of German art is the "Adoration of the Trinity" or "All Saints" (1511). Placed beside the "Disputa" of Raphael or the Sistine paintings of Michelangelo pro-

DURER DURER

duced in the same year, it would not suffer from the comparison. God the Father sits upon a throne and holds forth the Cross with the Crucified; above both of them, in the form of a dove, the Holy Ghost hovers. About them the saints of heaven in two companies with the Mother of God and John the Baptist at their head kneel in adoration. In the upper part of the picture, above the blessed hosts, choirs of angels surround the Holy Trinity; in the lower part, the Church Militant, led by the powerful figures of a pope and an emperor, takes part in the adoration. As an idealization of the world this multitude stands above the clouds. At the very bottom and to one side, as though left behind, is seen the humble figure of the painter. This work deserves no less praise for its perfection of finish than for its sublimity of conception. The frame, carved in renaissance style from drawings by Dürer, is still preserved at Nuremberg. In the same year, 1511, Dürer produced the "Virgin with the Pearl", one of the finest of his Madonnas. In the years 1513-14 he executed three great copperplate engravings; these may, perhaps, be looked upon as ideal representations of a fearless knight, an unsatisfied searcher for knowledge, and a saint happy in God and are called: "The Knight with Death and the Devil"; "Melancholia"; "St. Jerome in his Study". To these must be added various paintings, e.g. of Charle-
magne, Sigismund, and Albrecht of Brandenburg; further, the marginal drawings, displaying great fancy and humour, made for Maximilian's "Prayer Book", and the "Triumphant Arch of Maximilian" belong to the same time. Later, Dürer worked also on the "Triumphant Car", for the emperor.

The Catholic church of LINDISFARNE was founded by St. Cuthbert (q. v.) became Bishop of Lindisfarne the diocese was only a fragment of what it had been under St. Aidan. In the ninth century, when the Danes repeatedly harassed Northumbria, the Diocese of Hexham ceased to have a separate existence, and about 820 was merged in that of York. In 875, Eardulf, Bishop of Lindisfarne, was driven from his see, and taking the body of St. Cuthbert with him was fléed from the Danes. After surrendering seven years they found a resting place at Chester-le-Street (882); and from here Eardulf and his eight immediate successors ruled the see. In 995 Bishop Aldhun again found himself defenceless before the Danes and fled with St. Cuthbert's body to Ripon. When peace was restored, he was returning to Chester-le-Street when miraculous signs were given that the body of the saint was to remain at Dunholme, the place where the city of Durham now stands. A stone chapel was built to receive St. Cuthbert's body and Aldhun began a great church where the cathedral now is, which was finished and consecrated in 999. In this way Aldhun became the first Bishop of Durham.

The following is the list of bishops with the dates of their accession. Those marked thus (f) held the office of Lord Chancellor:

**Bishops of Lindisfarne**

**The Cathedral**

The first Norman bishop, Walcher, was murdered by the people in 1080, and was...
succeeded by William de S. Carilef, who began the present cathedral, the foundation being laid 29 July, 1093. He also replaced the secular cathedral clergy by Benedictine monks from Jarrow and Wearmouth. The situation of the cathedral is very remarkable, as it stands high on the cliff overlooking the river, and the building itself is most imposing, with its noble proportions, and what Dr. Johnson calls its appearance of "rocky solidity and of indeterminate duration". Bishop Carilef died shortly after beginning it; but the building was carried on with energy by the next bishop, the infamous Rainulf Flambard. He built the nave and aisles and the lower part of the west front, and in 1104 the shrine of St. Cuthbert was transferred to the new cathedral. In 1143 the see was usurped by William Cumin, chancellor of the King of Scotland, who for sixteen months violently kept the rightful bishop out of possession. This interfered with the building, but the next bishop, Hugh de Pusey, was a great builder, and among his additions is the "Galilee Chapel", a unique specimen of transitional work. Another special feature of Durham cathedral is the eastern transept, known as the "Chapel of the Nine Altars", built by Bishop Poor about 1230. The central tower (214 feet) was rebuilt towards the end of the fifteenth century. The bishops also built their own half-regal residence, Durham Castle, and the extensive buildings of the monastery, portions of which still remain. The relations between the bishops and the monks were frequently very strained, especially in the time of the warrior-priest, Antony Beck, though bishops like Richard Poor, Richard de Kellaw, or the scholar, Richard de Bury, lived in harmony with them.

**Civil Jurisdiction of the Bishops of Durham.**—The twofold jurisdiction of the bishops of Durham was clearly recognized by law from early times. In the reign of Edward I the Rolls of Parliament state: "Episcopus Dunelmensis duos habet status, videlicet, statum episcopi quod spiritualia et statum comitis palaei quadem teneimenta sua temporalia." But the origin of this civil jurisdiction has never been ascertained. According to one theory it represents a local survival of the old Northumbrian Kingdom. According to another view it was conferred by grant of some king. Alfred or, more plausibly, William the Conqueror. There is, however, no historical trace of any such grant, and recent research makes it more probable that it is a development of immunities granted to the Bishopric of Durham. Even before the Conquest the bishops held large endowments of land known as the patrimony of St. Cuthbert, *Terra patrimoniae S. Cuthberti*. Therefore the diocese possessed large franchises immunity against the sovereign power of the King of England and the local rights of the Earl of Northumberland. Thus the bishopric was not included in Domesday Book, and even at the time of the Conquest the county of Durham was governed by the bishop with almost complete local independence. These extensive rights were strengthened by the fact that the bishops frequently had to repel Scottish invasions, by their own forces and at their own expense, which fostered both the military and financial independence of the palatinate. The strong local feeling of Northumbrian independence also prevented the formation of any firm ties with the English sovereigns, until the masterful policy of Henry II brought Durham into subordination to the central government. But this subordination was exceedingly limited even then, and the bishopric escaped the deprivation of its privileges which befell many other franchises at that time. This was due to Bishop Hugh de Pusey, who was the king's cousin and personal friend, and who took care as time went on to obtain the charters necessary to safeguard the liberties of his see.

These were most considerable. First, the bishop had within the bishopric every right that the king had in the country: *Quicquid rex habet extra episcopus habet intra*. He was therefore the head of the civil government, with appointment of all civil officers. The bishop's writ, not the king's, ran within the bishopric, and the "Bishop's peace" was regarded as different from the "King's peace" of Henry VIII. Offenders and law-breakers were tried in the bishop's court and if necessary punished by his officials. Forfeitures for treason and forfeitures of war were both his right, and he could create corporations, and erect fairs and markets. He did not, however, have the right of making treaties with foreign princes, though some instances of attempted secret entry with Scotland are not wanting. The bishops had their own mint, and their coinage bears their initials on the reverse of each coin. From the feudal point of view the bishop was very strong, as he was the universal landlord, and all land was held mediately or immediately of him and not of the king. From this followed his rights of wardship, rights to all mines and to treasure-trove, as well as his extensive forest rights. At law he could stay procedure against offenders, grant pardons and even suspend the application of a statute. He had courts of common law, equity, and admiralty, besides his spiritual courts; and he regulated the relations between the latter and the temporal courts.

In theory, the bishop was as a king in his bishopric, but in practice his power was limited by the sovereign. In some instances the king actually infringed upon his rights, and in other cases there was conflict of jurisdiction. Up to the end of the thirteenth century the episcopal power developed in every way, then followed a period during which the kings somewhat unwillingly tolerated the position for the sake of the convenience of having what amounted to a buffer state between England and Scotland, and also because it was difficult to solve a problem so beset with complications both ecclesiastical and feudal. Although it is sometimes stated that the bishops had a council in the nature of a parliament, it is becoming increasingly clear that we have
here a confused tradition of two separate bodies—the assembly and the council. The assembly (communitas) was practically the same gathering as the shire-moot in other counties. It raised money by taxation at the request both of the king and of the bishop, and sometimes for its own purposes. But it was not a legislative assembly, since all general legislation applied to the palatinate, although Durham was not represented in Parliament till the time of the Stuarts. When Acts were not proceeded by Catholic baron, press exemption was stated. The council was in origin a feudal body, chosen from the bishop's immediate followers and officials, the functions entrusted to it being the general administration of the palatinate, financial affairs, and the duty of advising the bishop. The judicial courts of the palatinate arose out of this body. Much of the civil and judicial independence of the bishopric during the reign of Henry VIII passed in 1536, at the will of Henry VIII. By this act the bishop's semi-regal power was abolished.

GALLÉE CHAPEL, DURHAM CATHEDRAL

The see at this time was held by Cuthbert Tunstall, the venerated prelate who was the last Catholic bishop and who lived to witness the suppression of monasteries, the Pilgrimage of Grace (1536), and finally the surrender of Durham Abbey (1540), which involved the spoliation of St. Cuthbert's shrine. During the reign of Edward VI he was imprisoned and an Act of Parliament was passed dissolving the bishopric and forming it into a county palatinate. After the brief respite of Mary's reign, Bishop Tunstall was deprived of his see by Elizabeth, July, 1559. With his death in consequence of a rapid and cruel method of execution Ten years later during the "Rising of the North" the Catholics seized Durham cathedral, restored the altar, and publicly celebrated Mass, thus making it the last of the old English cathedrals in which Mass has been said.

In the bishopric there were six collegiate churches, Auckland, Durham, Chester, Lichfield, Lanchester, Norton, and St Albans. The Benedictine monks held Durham Abbey, with the dependent houses of Jarrow, Wearmouth, and Finchale. There were Augustinians at Hexham and Brinkburn; Cistercians at Newminster; and Premonstratensians at Blanchland. Durham College (now Trinity), at Oxford, was greatly protected and helped by various bishops and priors of Durham; and the college was originally a foundation. The arms of the see are: azure, a cross between four lions rampant, or. The mitre over the arms is surmounted by a ducal coronet.

EDWIN BURTON.

Durham Rite.—The earliest document giving an account of liturgical services in the Diocese of Durham is the so-called "Rituale ecclesiae Dunelmensis", also known as the Ritual of King Ælfrith (the King of Durham) who succeeded his brother Egfrith in 682, and who was a pietas pluris durcis dutius (Bede, Hist. Eccl., IV, xxvi). The MS. in the library of Durham cathedral, A, IV, 19 is of the early ninth century. It contains caput, chants, and especially collects, from the Epiphany to Easter, then a propriam sanctorum, a commune sanctorum, and many forms for blessings. The greater part has an interlinear Anglo-Saxon translation. Many of the later scribes have used up the blank pages to write out a miscellaneous collection of hymns and exorcisms and a list of contractions used in books of canon law. Its connexion with Durham and Northumberland is shown by various allusions, such as that to St. Cuthbert in a collect (intrecipite beato Cudbertho Sacerdoti; p. 185 of the Surtees Soc. edition). This fragment represents the fusion of the Roman and Anglo-Saxon liturgies that had taken place all over North-Western Europe since the Emperor Charles the Great (768-814) or even earlier (Duchesne, Origines du culte chrétien, 2nd ed., 89-99). Many parts of it exactly correspond to the Gregorian Sacramentary sent by Pope Adrian I to the emperor (between 784 and 791; Duchesne, op. cit., 119).

The great Benedictine monastery of Durham was founded by William of St. Carleph in 1083; he brought monks from Wearmouth and Jarrow to fill it. These monks served the cathedral till the suppression in 1538. The foundation of the cathedral was laid in 1093 and St. Cuthbert's body was brought to its shrine in 1104. A catalogue drawn up at Durham in 1395 gives a list of the books used for the monks for various services. Of such books not many remain. A Gradual of about the year 1500 with four leaves of a Tornarium is at Jesus College, Cambridge (MS. 22; Q. B. S.), and a Durham Missal written in the fourteenth century is in the British Museum (Harl. 5289). The parts of this Missal that correspond to Holy Week and Easter are printed in vol. III of the Surtees Society's publications (p. 172-191; see also the "Westminster Missal", III, 124, Henry Bradshaw Soc., 1897, where the Durham variants are given). The most important document of this kind is the volume called "The Ancient Monuments, Rites and Customs of the Monastic Church of Durham before the Suppression". This book, written in 1593, exists in several manuscripts, and has been printed and edited on various occasions, lastly by the Surtees Society (vol. CVII, 1903; see bibliography). It is a detailed description, not only of the fabric of the cathedral, but also of the various rites, ceremonies, and special customs carried out by the monks who served it. From it we see that the Durham Rite was prac-
tically that of the North of England (corresponding in all its main points to that of York), with a few local modifications such as one would expect to find in a great and flourishing monastic church. The treatise begins with a description of the famous ring of altars (ed. Surtees Soc., p. 7) and of the choir and high altar. The Blessed Sacrament was reserved in a silver pelican hung over the High Altar. It should be noted that a pelican in her piccy was assumed as his arms by Richard Fox (Bishop of Durham, 1494–1502) and was constantly introduced into monuments built by him (see Surtees Society and Oxford College Records). The great paschal candlestick was a conspicuous and splendid feature of Easter ritual at Durham; it and the rite of the paschal candle are described in chapter iv (ed. cit., p. 10). The Office for Palm Sunday does not differ from that of Sarum and the other English uses (ed. cit., p. 179). On Maundy Thursday there was a procession with St. Cuthbert’s relics. A special feature of the Good Friday service was the crucifix taken by two monks from inside a statue of Our Lady, for the Creeping to the Cross. On the same day the Blessed Sacrament was enclosed in a great statue of Christ on a side altar and candles were burned before it till Easter Day. The Holy Saturday service in the Durham Missal is given on pp. 185–187. The Surtees Society Proceedings note: “Missuere”, while they went in procession to the new fire. When the paschal candle is lit they sing a hymn, “Inventor rutili”, with a verse that is repeated each time. There are only five Prophecies, and then follow the litanies. When “Omnis Sancti” is sung those who are to serve the Mass go out. The word Accendite is said and the candles are lighted at this time. At the third repetition the bishop comes out to begin the Mass. All the bells (sigina) are rung at the Kyrie eleison, the Gloria, and the Alleluia. Between three and four o’clock in the morning of Easter Day the Blessed Sacrament was brought in procession to the high altar, while they sang an antiphon, “Christus resurgens ex mortuis, iam non moritur”, etc. Another statue of Christ Risen remained on the high altar during Easter week. On Ascension Day, Whit-Sunday, and Trinity Sunday processions went round the church, on Corpus Christi round the palace green, and on St. Mark’s Day to Bow Church in the city (chs. lv, lvi). The rogation-days (three cross-dales) also had their processions. In all these the relics of St. Bede were carried by the monks in baldacchino-shaped copes. The prior, especially, wore a cope of cloth of gold so heavy that he could only stand in it when it was supported by “his gentlemen” (ed. cit., p. 83). The prior had the right of wearing a mitre since Prior Berrington of Walworth (ch. lvi, ed. cit., p. 107).

Throughout the year the chapter Mass was sung at nine o’clock, Vespers at three p.m. On Thursdays, except in Advent, Septuagesima, and Lent, the Office of St. Cuthbert was sung in choir (ed. cit., p. 191). On Fridays there was a “Jesus-Mass” (a votive mass of the Holy Name), and the “Jesus-Antiphon” was sung after Complin (ed. cit., p. 220). This was also the custom at York, Lincoln, Lichfield, and Salisbury. On St. Cuthbert’s Day (20 March) there was, naturally, a special procession. The author x (ed. cit., p. 11) describes the great book containing names of benefactors (Liber Vitae) that was kept on the high altar, chapter xxi the forms for giving sanctuary to accused persons. They had to use the knocker, still shown to visitors, and, when they were received, to wear a black gown with a yellow cross of St. Cuthbert on the left shoulder (ed. cit., p. 41). No woman was allowed to approach the altar beyond a line of blue marble traced on the floor. To explain this, chapter xxvii tells a legend about a king’s daughter who falsely accused him and was eventually swallowed up by the earth. In the “Galilee” was a chapel of Our Lady for women (chs. xxii, ed. cit., p. 42). When a monk died his body was carried to St. Andrew’s chapel, two monks watched before it all the time; after the dirge and the requiem Mass it was buried in the sanctuary garth with a chalice of wax laid on the breast. The coffin was carried in the abbey church (xxv) and bishops in the sanctuary (xxvii). (See Durham, Diocese of.)

The Anglo-Saxon Rituale ecclesiae Dunelmensis is published (from the MS. at Durham) by the Surtees Society (vol. X, 1889), and is now edited by the Oxford College Records (vol. 1885). The Ancient Monuments, Rites and Customs of the Monastic Church of Durham on the 17th of April was published in a MS. of 1620 in the Canon library at Durham (MS. B, 11, 11) and in a MS. of 1636 belonging to Sir John Lawson, Bart., of Durham Hall (ed. Riles Soc., ed. cit., p. 141). In the edition of the Surtees Society has been printed (vol. CLVII, Rites of Durham, 1903). Other editions are: one curtailed and modernized by Davies (London, printed for W. Hensman in 1672); Hunter, Durham Cathedral as it was before the dissolution of the monasteries (Durham, by J. Ross for Mrs. Waghorn, 1728, reprinted Durham, 1733); and Stevenson, The Antiquities of the Abbey or Cathedral Church of Durham (Newcastle-on-Tyne, 1767). The Durham Ordinall Rite (c. 1488) was edited by John Bower (1555). The Surtees Society (vol. XLI, 1837) has published an account of the monasteries, bound up with a peal, hymnary, and journal, of 1394 and 1395, which is part of the Missal of the fourteenth century in the British Museum: Harl. 5271, and is printed in vol. xiii of the Surtees Society (pp. 172–191). Occasional references to the Durham Rite will be found in the folios of 1416, 1417, 1418, 1419, etc., in Hart and Frere (4 vols., London, 1904), and in Wormswoth and Littlecote, The Old Service-books of the English Church (London, 1904).

Adrian Fortescue

Durrow (Iris Dhaimhgh, Plain of the Oaks), School of, is delightfully situated in the King’s County, a few miles from the town of Tullamore, St. Cormac’s Church (built about the year 1070) is among the most magnificent of these oak-groves, because of their natural beauty, as well as perhaps to divert them of their Druidic associations, found here, as in Derry, a site just after his heart. It was freely given to him by Aedh, son of Brendan, lord of the soil, in 553, and the saint lost no time in founding his monastery, which, with more or less constant personal supervision, he ruled till 563. When, in that year, either as a matter of precedence, or as Adomnan says, “of choice for Christ’s sake”, he became an exile in the wilds of Scotland, he appointed a most estimable monk, Cormac Ua Liathain, to take his place. But owing to the jealousies that existed between the northern and the southern tribes, especially on the borderland, Cormac found it impossible to retain the office of Abbot of the foundation. He now left his charge, leaving in charge a first cousin of Columba, Laisren by name, who, acceptable to both sides, governed the institution with consequent success. Durrow, during Columba’s life and for centuries after his death, was a famous school, at one time being esteemed second to none in the country. The Venerable Bede styles it Monasterium naibile in Hibernia, and, at a later period, Armagh and itself were called the “Universities of the West”. It will be ever noted for the useful and admirable practice of copying manuscripts, especially of the Sacred Scriptures, which had become quite a fine art amongst the masters and disciples there. Columba himself, who was an expert scribe, is generally credited with having written with his own hand the manuscript copy of the Fourth Gospel now known as the “Book of Durrow”. It is a piece of the most exquisite workmanship, charming the mind as well as the eye with its intricate and highly ornamental details. An entry on the back of one of the folios of this remarkable book, which is now to be seen in Trinity College, Dublin, prays for a “remembrance of the scribe, Columbanus, who wrote this evange in the space of twelve years.”

Columba dearly loved Durrow. It held a place in his affections next to his own Derry, and while in Iona he manifested the tenderest interest in everything that concerned its welfare. When he was urging Cormac Ua Liathain to return to the monastery there,
he recounted for him the manifold beauties of that "city devout, with its hundred crosses, without blemish, and without transgression", and added, "I pledge thee my unerring word, which may not be impugned, that death is better in reproachless Erin than life forever in Alba." Durnow, like Colnard, Derry, and the rest, was frequently ravaged by the Danish invaders, but its complete devastation was left for the fierce Northmen, the invader, Hugh de Lacy. In 1186 he began the building of a castle for himself out of the stones of the dismantled monastery, but the axe of an Irish labouring man cut him short in his unholy work. The church and the school are long since gone; not a stone of the original building may now be found. There are, however, still to be seen at Durnow a churchyard, probably the site of a Colnomn, and a Convent, a holy well, which will serve to keep the name and the fame of St. Columba fresh in the minds of the people forever.

Adaman, Life of Columba, ed. Reeves (Dublin, 1837); also by Fowler (London, 1903): Life of St. Columba; Healy, Ireland's Ancient Schools and Scholars (Dublin, 1860); Gilbert, Preachers of Irish National MSS.; Whitley Stokes in Anecdota Hibernica (Oxford, 1890).

John Healy.

DUTCH

DUTY

The definition of the term duty given by lexicographers is: "something that is due"; "obligatory service"; "something that one is bound to perform or to avoid". In this sense we speak of a duty, words express an essential actual or virtual of these duties denoted by the abstract term in the singular. The word is also used to signify that unique factor of consciousness which is expressed in the foregoing definitions by "obligatory", "bound", "ought", and "moral obligation". Let us analyse this datum of consciousness. When, concerning a contemplated act, one forms the decision to "ought" to be done by the words "duty", the principle is a moral judgment. But unlike speculative judgments, this one is felt to be not merely declaratory. Nor is it merely preferential; it asserts itself as imperative and magisterial. It is accompanied by a feeling impelling one, sometimes effectively, sometimes ineffectively, to square his conduct with it. It presumes that there is a right way and a wrong way open, and that the right is better or more worthy than the wrong. All moral judgments of this kind are particular applications of a universal judgment which is postulated in each one of them: right is to be done; wrong is to be avoided. Another phenomenon of our moral consciousness is that we are aware from our consciousness that nature has constituted a hierarchical order among our feelings, appetites, and desires. We instinctively feel, for example, that the emotion of reverence is higher and nobler than the sense of humour; that it is more worthy of us as rational beings to find satisfaction in a noble drama than in watching a dog-fight; that the sentiment of benevolence is superior to that of selfishness. Furthermore we are conscious that, unless it has been wrenched from us by the laws, it is easier for man attending moral judgments asserts itself as the highest of all; awakens in us the feeling of reverence; and demands that all other sentiments and desires, as motives of action, shall be reduced to subordination to the moral judgment. When action is conformed to this demand, there arises a feeling of self-approbation, while an opposite course is followed by a feeling of self-reproach. Starting from this analysis we may expose the theory of duty according to Catholic ethics.

Duty in Catholic Ethics.—The path of activity proper and congenial to every being is fixed and dictated by the nature which the being possesses. The cosmic order which pervades all the non-human universe is predetermined in the natures of the innumerable variety of things which make up the universe. For man, too, the course of action proper to him is indicated by the constitution of his nature. A great part of his activity is, like the entire movements of the non-human world, under the iron grip of determinism, there are large classes of vital functions, over which he has no volitional control; and his body is subject to the physical laws of matter. But, unlike all the lower world, he is himself the master of his action over a wide range of life which we know as conduct. He is free to choose between two opposite courses; he can elect, in circumstances immeasurable, to do or not to do; to do this action, or to do that which is incompatible with it. Does, then, his nature furnish no index for conduct? Is every form of conduct equally congenial and equally indifferent to human nature? By no means. His nature has a deeper meaning than this, which is proper, and the line which is abhorrent to it. This demand of nature is delivered partly in that hierarchical order which exists in our feelings and desires as motives of action; partly through the reflective reason which decides what form of action is consonant with the dignity of a rational being; comprehensively, and with immediate practical application to action, in those moral judgments involving the "ought". This function of reason, aided by good will and practical experience, we call conscience (q. v.).

We have now reached the first strand of the bond which we know as moral obligation, or duty. Duty is a debt owed to the rational nature of which the spokesmen and representative is conscience, which imperatively demands from it to do what is right. Is this the be-all and the end-all of duty? The idea of duty, of indebtedness, involves another self or person to whom the debt is due. Conscience is not another self, it is an element of one's own personality. How can one be said, except through a figure of speech, to be indebted to oneself? Here we must take into consideration another characteristic of moral actions. It is that every action involving a right, which is indefensible, but very real way, seems to set itself over against the rest of our personality. Its intimations awake, as no other exercise of our reason does, feelings of awe, reverence, love, fear, shame, as are called forth in us by other persons, and by persons only. The universality of this experience is testified to by the expressions men commonly employ when speaking of conscience; they say, as a judge, a speaker, a judge; they say that they must answer to conscience for their conduct. Their attitude towards it is as to something not completely identical with themselves; its whole genesis is not to be accounted for by describing it as one function of life. It is the effect of education and training, some say. Certainly education and training may do a great deal to develop this impression that in conscience there is another self implicated beyond ourselves. But the quickness with which the child responds to its instructor or educator on this point proves that he feels within himself something which confirms his teacher's lesson. Ethical philosophers, and conspicuously among them Newman, have argued that to him who listens reverently and who, in the dictates of some voice, takes to himself as emanating originally, from "a Supreme Governor, a Judge, holy, just, powerful, all-seeing, retributive". If, however, we accept Newman's view as universally true, we cannot easily admit that, as is generally asserted and believed, many men obey conscience and love righteousness, who nevertheless, do not believe in the existence of the universe. We may not the least uncomprising theist admit that the moral guide which the Creator has implanted in our nature is powerful enough successfully to discharge its function, at least in occasional cases, without fully unfolding its implications? One of the leading Unitarian moralists has eloquently expressed this opinion. The profound sense of the authority and even sacredness of the moral law is often conspicuous among men whose
thoughts apparently never turn to superhuman things, but who are penetrated by a secret worship of honour, truth and right. Were this noble state of mind brought out of its impulsive state and made to unfold its implicit contents, it would indeed reveal a source higher than human nature for the august authority of righteousness. But it is undeniable that that authority may be felt where it is not seen—felt as if it were the mandate of a Perfect Will, while yet there is no overt recognition of such a Will: i.e., conscience may act as human, before it is discovered to be divine. To the agent himself its whole history may seem to lie in his own personality and his visible social relations; and it shall nevertheless serve as his oracle, though it be hidden from the other who is to be his witness” (Mackay, A Study of Religion, Intro. p. 21)

Nevertheless it must be admitted that such persons are comparatively few; and they, too, testify to the implication of another self in the intimations of consciousness; for they, as Ladd says, "personify the conception of the sum-total of ethical obligations, they are fain to spell the words with capitals and swear allegiance to that purely abstract conception. They hypothesize and defy an abstraction as though it were itself existent and divine." (Ladd, Philosophy of Conduct, p. 385)

The doctrine that conscience is autonomous, independent, sovereign, a law-giver deriving its authority from no higher source, will neither, logically speaking, satisfy the idea of duty, nor sufficiently safeguard moral motives, to a man who is his own debtor to himself; he cannot lay a command on himself. If moral judgments can claim no higher origin than one's own reason, then under close, severe inspection they must be considered as merely preferential. The portentous magisterial tone in which conscience speaks is a mere delusion; it can show no warrant or title to the authority which it assumes. Its exercise, by one under the temptation, a man who believes in no higher legislator than conscience, finds arising in his mind the inevitable question, Why am I bound to obey my conscience when my desires run in another direction? he is perilously tempted to adjust his moral code to his inclinations; and the device of spelling duty with a capital will prove but a slender support to it against the temptation.

Reason solves the problem of duty, and vindicates the sanctity of the law of righteousness by tracing them to their source in God. As the cosmic order is a product and expression of the Divine Will, so, likewise, is the moral law which is expressed in the rational nature. God wills that we shape our free action or our free choice, and so the conception of free action is founded on the Creator, and acknowledging His indefeasible majesty, power, goodness, and sanctity, teaches us that we owe Him love, reverence, obedience, service, and, consequently, we owe it to Him to observe that law which He has implanted within us as the ideal of conduct. This is our first and all-comprehensive duty in which all other duties have their roots. In it is the essence of truth on the one hand, and is transfused. It is the accredited representative of the Eternal; He is the original Imponent of moral obligation; and disobedience to conscience is disobedience to Him. Infraction of the moral law is not merely a violence done to our rational nature; it is also an offence to God, and this aspect of its malice is deserving of especial note. In reason, self-appropriation, and self-reproach, are reinforced by the supreme sanction, which, if one may use the expression, acts automatically. It consists in this, that by obedience to the law we reach our perfection, and compass our supreme good; while, on the other hand, the transgressor condemns himself to miss that good in the attainment of which he fell short. To obviate a possible misapprehension it may be remarked here that the distinction between right and wrong hangs not upon any arbitrary decree of the Divine Will. Right is right and wrong is wrong because the prototype of the created order, of which the moral law forms a part, is the Divine Nature itself, the ultimate ground of all truth intellectual and moral.

Erroneous Ethics.—We have already touched upon the main weakness of the Kantian theory, which is to treat conscience as autonomous. Another mistake of Kant is that in his system duty and right are made coterminous. A moment's reflection is sufficient to perceive that this is an error. There are many conceivable good actions which one can do, and which it would be highly praiseworthy to perform, yet which no reasonable person, however rigorous his ideal of conduct, would call right. But if we construe duty and right as one form. Duty and right are two concentric circles. The inner one, duty, embraces all that is to be observed under penalty of failing to live rationally. The outer contains the inner, but, stretching far beyond, permits an indefinite extension to the paths of virtue that lead to consummate righteousness and sanctity. Every philosophic system which, confining itself as one of its tenets the doctrine of determinism thereby commits itself to the denial of the existence of moral obligation. Duty implies that the subject of it possesses the power to observe the law, or to disobey, and the power to choose between these alternatives. What reproach can a determinist mentor logically address to one who has committed an act for which he "ought not to have had any hand so"? The culprit can reply: "But you have taught me that free will is a delusion; that no one can act otherwise than he does. So, under the circumstances in which I found myself, it was impossible for me to refrain from the action which you condemn. What, then, can you mean by saying that I ought not to have acted as I did?" You reprehend me, not my actions, but my environment, for you consider my act as one of a volcano for having ruined a village.

With regard to the existence of duty every form of pantheism, or monism, logically finds itself in the camp of determinism. When man is looked upon as one with the Infinite, his actions are not really his own, but belong properly to the Universal Being. The part assigned to him, in his activities, at times, as one of his natural or moral constitution. He is, so to speak, a robot, or a carbonic battery with relation to the electric current generated by a dynamo. The Divine power passing through him clothes itself with only a seeming individuality, while the whole course of action, the direction which it takes, and the results in which it culminates, belong to the Supreme Being. If this were true, then lying, debauchery, theft, murder were equally as worthy as truthfulness, chastity, benevolence; for all would be equally manifestations of the one universal Divinity. Then a classification of conduct into two opposite categories might still be made from the standpoint of results; but the idea of moral worth, which is the very core of the moral life and the first postulate of duty, would have vanished. Heistonism—such was the name of the dogmatic, astralistic, evolutionary—which builds on one or another form of the "greatest happiness" principle and makes pleasure and pain the discriminating norm of right and wrong, is unable to vindicate any authority for duty, or even to acknowledge the existence of moral obligation. No combination of impulses, if they are estimated from the merely biological or purely empirical standpoint, can, by any logical words, be converted into a moral hierarchy. The heistonist is doomed to find all his endeavours to establish the basis of the moral order terminate in "is", but never in "ought", in a fact, but never in an ideal. Lecky has neatly summed up the heistonist solution of the problem of duty: "That is meant by saying we ought to do an action is that if we do not do it we shall suffer."
accordingly as they produce a surplus of pleasure over pain, or contribute to or diminish welfare. Then, if we ask, must I always pursue what seems to me the most pleasurable or the most remunerative? If the answer is yes, we are again landed in determinism. If the reply is that I can choose, but that I ought to choose what produces the most happiness, then I ask, why ought I to choose the course which produces most happiness or pleasure if I prefer to do otherwise? To this question the epicurean and the egotist have no answer; but the utilitarian, the most to be feared, will answer that it must be one that all reasonable men condemn as wrong, because it is injurious to some one else. Here the egotist is compelled to hand the difficulty over to the altruist. The latter endeavours to dispose of it by pointing out that the object of good conduct is not merely the agent's own happiness, but that of everybody concerned. But again, why am I bound to take into account the welfare of others? and the altruist is silent. The evolutionist of the Spencerian type intervenes with a ponderous theory that in gauging the measure in which actions produce welfare or diminish it, not merely the immediate, but also and more especially, the remote results must be considered. He then proceeds to show that, as an hereditary conception, remote results are more important than immediate, we have to fancy that remote results have a certain authoritative ness. Also, from unpleasant experiences of our ancestors, we inherit a tendency, when thinking of injurious actions, to think too of the external penalties which were attached to such actions. These two elements, blending into one, give rise, we are told, to the feeling of moral obligation. So the common conviction that moral obligation has really any binding authority is a mere delusion. Spencer is honest enough to draw the inevitable corollary of this doctrine which is that our sense of duty and moral obligation is transitory and destined to disappear. Ethical writers of the "independent morality" schools have devised a beautifully simple way of effacing this: the embodiment of the fact that the authority of moral obligation has been replaced by a new and more binding moral law, the laws of society. They ignore the subject altogether and refer the disappointed inquirer to the metaphysician. Ethics, they blandly declare, is a descriptive, not a normative science; hence that imposing array of works professing to treat scientifically of morals, yet calmly ignoring the pivotal factor of the moral life.

The Idea of Duty.

To trace the development of the concept of duty would be to review the history of the human race. Even in the lowest races there is to be found some moral code, however crude and erroneous. Another universal fact is that the race has, everywhere and always, placed morals under a religious, or quasi-religious, sanction. The savage, in a measure corresponding to his crude moral and intellectual development, witnesses to this universal impulse by observing innumerable customs because he believes them to have some sanction higher than that of his fellow tribesmen or their chief. The great nations of antiquity, Chinese, Chaldean, Babylonian, Egyptian, saw in their deities the source or sanction of their moral codes—at least until the spirit of inquiry and the human mind became simultaneously corrupted. In Greece and Rome, likewise, religion and morals were intimately associated, until religion proved false to its trust. The same phenomenon is found in the Aryan race of India and Persia, while the Semitic peoples, especially the Jews, always continued to look to religion for the reason of their moral codes. When classic paganism had introduced among gods and men the idea of moral law, and the moral ideal became simultaneously sanctioned, the instinctive reverence of the races, and the tremendeous development of the concept of duty, began. The concept of duty lost its force and philosophy became the guardian of morality, a conflict of rival schools, none of which possessed sufficient authority to make its tenets prevail with the mass of the people, was the inevitable result; and as religious faith declined, the tendency to find a non-religious basis for duty became more pronounced. The consequence was that the idea of duty faded; and systems arose, which, like our present day "independent morality", had no place for moral obligation.

The unity of the moral and religious idea was restored and rendered perfect by Christianity. The Gospel vindicated the Divine origin of duty, and declared that its fulfilment constituted the very essence of religion. This idea has been the chief motor force to raise the Western world out of the moral chaos into which decaying paganism had dragged it. The doctrine that every man is an immortal being created by God to be united with Himself in an endless existence provided that he observe the law of righteousness, in which God's will is expressed, sets forth the dignity of man and the sacredness of duty in their full nobility. The wickedness of moral delinquency reveals itself in this, that it is a sin against the Most High—an idea scarcely known to antiquity outside the Hebrew people. The Christian faith, moreover, is taught and taught with the authority of God, the code of the natural law, much of which unaided reason developed only in hesitating accents and without the authority necessary to impose it effectively as obligatory on all. The Christian was taught that the fulfilment of duty is the one supreme concern of life to which all other interests must be made to bow, and that its fulfilment is enforced by the most tremendous sanctions conceivable. The Gospel gave a satisfactory solution to the anomaly which had perplexed philosophers and misled them to erroneous doctrines concerning the meaning of the moral life. How can virtue be man's perfection, good, and end, when the fulfilment of duty means in many cases, the frustration of many natural desires and wants? The history of duty, in the strict sense, lies not all within the confines of earthly life; its ultimate goal is beyond the grave. The Christian doctrine of the Fatherhood of God and the sonship of man leads to a clearer perception of the chief duties and of their importance. Human life is seen to be a sacred, inviolable thing in ourselves and in others; woman is the equal, not the slave of man; the family is ordained of God, and its happiness becomes the direct aim of duty. The State, too, is placed on a firmer basis, since Christian doctrine teaches that it draws the warrant of its existence not from force, or a mere consensus of human wills, but from God. Finally, the Christian law of love correlates the outer circle of rightousness with the inner one of strict duty. Love of God becomes the adequate motive for striving after the highest personal sanctity; love of our neighbour for the widest exercise of benevolence far beyond the limits of strict duty. In the person of the Master, Christianity offers to us the flawless Exemplar of the moral idea, the perfect conformity of will and action to the Divine Will. His example has proved potent enough to inspire with heroic loyalty to duty the millions who, countless and nameless, the "stern hard path have trod". The moral standards of our civilization have been developed and maintained by the efficiency of the Christian idea of duty. Contemporary conditions furnish unmistakable indications that these standards become debased and discredited when they are torn from the ground whence they sprang.

Duties.—The obligation of living according to our rational nature is not primarily for the doing of particular duties. These are generally divided into three groups—(1) duties to God, (2) duties towards ourselves, and (3) duties to others.—(1) To God, the Supreme Master of the universe, our Creator, the All Holy, All Good, we owe honour, service, obedience, and love. These
duiies are comprehended under the general term religion. Since He is Truth itself, we owe it to Him to believe whatever He has revealed to us in a super-
natural manner; to worship Him in the way which, in
revelation, He has taught us is most pleasing to Him;
and to obey the authority which He has constituted
(see Church). Reverence due to Him forbids all pro-
fanity and blasphemy of Him or whatever is sacred to
Him. Lying is an offence against His Divine nature,
which is Truth itself. These duties constitute all
the specific duties that we owe to God, and besides,
those duties which devolve upon us as members of
the Catholic Church.—(2) Our duties towards ourselves
may all be included under one principle: life, the
goods of person, mental and physical, have been
given to us in trust, with the obligation of using them
to obtain our supreme good and end. Hence we may
not destroy them, or abuse them, as if we were inde-
pendent master of them. Therefore suicide, abuse
of our faculties, mental or physical, exposing our life or
health without a reasonable motive, are prohibited;
as also are all actions incompatible with the
reverence that we owe to our moral nature. We are
bound to strive for the development of our intel-
lect and for the use of our faculties as far as these are
necessary to the fulfillment of the moral law. As duty is
a debt to some one other than ourselves, we cannot,
strictly speaking, use the term duties to ourselves.
They are due to God; they regard ourselves.—(3) All
our duties towards others are implicitly contained in
the Christian precept: "Thou shalt love thy neighbour
as thyself, and love all men": hence the obligation of
making His will the rule of our life binds me to will their welfare, and to order my conduct
towards them with a due respect to the rational
nature which they possess, and to the obligations which
that nature imposes upon them. The application of this
principle gives birth to duties towards the minds and wills
of others (prohibition of scandal and lying); to the
bodies of others (prohibition of murder, etc.); to their
good reputation (prohibition of insult, detraction, or
defamation of character).

As material goods are necessary to us in order to live
according to the rational law, evidently God in
imposing moral obligation wills also that we have at
our disposal the means necessary to fulfill our duty.
It is in the control over things which is called a right.
The needs of all living beings require that some things should be permanently under our
control; hence the rights of ownership. Now a right in
one person is nugatory unless others are bound to
accept it. So to every right there is a corresponding
duty.

Thus far we have sketched the line of duty incumbent
on each one towards others as individuals. Be-
sides these there are social duties. The primary so-
ciety, the family, which is the unit of civil society, has
its foundation in our nature; and the relations which
constitute it give rise to two groups of rights and cor-
relative duties—conjugal and parental. Besides the
family, a wider, broader, association of man with his
fellows, generally speaking, in order that he may
develop his life with all its needs and potencies, in
accordance with the dictates of reason. God has in-
tended man to live in civil society, and man becomes
the subject of duties and rights with regard to the
society of which he is a member. The society, too,
aquires a moral unity or personality which is also the
subject of rights and duties. This system of social
rights and duties has for its extrinsic object right potencies,
by the society to impose laws which constitute a bind-
ing obligation. This right, called authority, is derived
from the natural law, ultimately from God. For,
since He wills civil society as a means for the due
development of human nature, He wills that authority
without which it cannot exist. As the lower animals
cannot be the subject of rights we do not owe them
any duties; but we owe duties to God in their regard
(see Ethics; Law; Obligation).

JAMES J. FOX.

DUVERGIER de Hauranne (or Du Verger), Jean
(also called Saint-Cyrank from an abbey he held in
Jansenism, one of the novices of Jansenism, at
Bayonne, France, 1651; d. in Paris, 1643. After
studying the humanities in his native place, and
philosophy at the Sorbonne, he went to Louvain, not
to the university but to the Jesuit college, where he
graduated, 1604, with a brilliant theisn admired by
Justus Lipsius. His acquaintance with the future
theologian of the Jansenist sect, Cornelius Jansen
(Jansenism), through his friend, the Jesuit Jacques
Janson, probably began at Louvain. In 1605 the
two were in Paris, attending together the lessons of
the Gallican, Edmond Richer, and studying Christian
antiquity with a view to restoring it to its place of
honour, usurped, as they claimed, by Scholasticism.
These studies of patristic and especially Augustinian
literature were pursued with incredible energy for
weeks at a time, as when, in 1615, he spent the winter
at Campiprê (Cantpré), the home of Hauranne,
under the protection of Bertrand d'Eschaux, Bishop
of Bayonne, who made Duvergier canon of his ca-
thedral, and Jansen principal of a newly-founded
college. Owing, no doubt, to the translation of d'Es-
chaux from Bayonne to Tours, the two friends left
Bayonne in 1617, Jansen returning to Louvain and
Duvergier going to Poitiers where Bishop de la Roch-
eposy, a disciple of Scaliger and an enthusiastic
humanist, received him as a friend, appointed him
to a canonry and the priory of Bonville, and later,
1620, resigned in his behalf the Abbey of Saint-Cyr-
en-Brenne. The new commendatory prelate resided
little in his abbey. In 1622 he returned definitively
to Paris, the metropolis affording him better oppor-
tunities to further his plans. In 1626—1635 an assiduous correspondence was kept up be-
tween Duvergier and Jansen, of which there remain
only "Lettres de Jansénistes à Duverger de Hauranne",
seized at the time of Saint-Cyrank's incarceration.
These letters, wherein conventional ciphers are fre-
quently used, constantly mention the affaire prin-
cipale, projet, cabale, that is, first and foremost, the
composition of the "Augustins" by Jansen, Saint-
Cyran employing himself to enlist patrons for the
so-called Augustinian system (see Jansenism).

For greater security the two innovators occasion-
ally met to discuss the progress of their joint work.
One of these meetings probably gave rise to the much-
debated Projet de Bourg-Fontaine. In his "Relation
juridique de ce qui s'est passé à Poitiers touchant la
nouvelle doctrine des Jansénistes" (Poitiers, 1654),
Filicau stated on the authority of one of the conspira-
tors then repentant, that six persons had secretly met
in 1621 at the chartreuse of Bourg-Fontaine, near
Paris, for the purpose of overthrowing Christianity
and establishing desum in its stead. The names of the conspirators, only initialed by Filicau, were given
in full by Bayle (Dictionnaire des Arnaud C. 1659)
“Feuilles” of Saint-Cyrank heads the list. The Jansenists always
protested against this story. Arnauld called it a
diabolical invention”, and Pascal ridiculed it in his
"Sezème lettre à un provincial". The Jesuit Father Sauvage's argument in his "Réalité du projet de
Bourg-Fontaine démontrée par l'EXECUTION"
DUVERGIER

(Paris, 1755) was refuted by D. Clémenceot in "La vérité et l'innocence victorieuses de la calomnie ou huit lettres sur le projet de Bourg-Fontaine" (Paris, 1755). Although Clémenceot's book was burned by order of the Parlement of Paris, still it never was answered. Guizot's remark that "the adeptes of Jansenism passed insensibly from the tenets of Saint-Cyr and Montgeron to atheism and the worship of reason" (Civilisation en Europe, Lec. xii) may apply to some of the later Jansenists, but the charge of rationalism is obviously untenable when brought against the Jansenists of the first generation. His supported details and deductions, Filléau's narrative and Sauvage's arguments show, what is borne out by the letters of Jansenius and other documents of the time, a covert yet definite purpose, as early as 1621, to deeply modify the dogmas, moral practices, and constitution of the Church, St. Augustine being made responsible for such changes.

As noticed above, Duvergier's share was to win high influence in favour of the religious revolution. While at Poitiers he had met Richelieu, de Condron, and Arnauld d'Andilly. At Paris he sought out such men as Vincent de Paul, founder of the Congregation of the Mission; Olier, founder of St-Sulpice; Bérulle, superior of the French Oratory; Tasière, superior of the Masons; de Buthéon, superior of St-Nicolas, and many more. It cannot be denied that these men were at first attracted by Saint-Cyr's affected asceticism, but when they understood his true aim they recoiled from him. The terse expression applied in the Roman Breviary to St. Vincent de Paul, Sensit simul et excorruit (he shuddered on hearing), could be said of them all, with the exception of Bérulle and Arnauld d'Andilly. Bérulle never shared the errors of Duvergier and Jansen, but, being indebted to these two for the establishment of the French Oratory in the Netherlands, he failed to detect their real purpose and gave them a hold on his order which they never released. Owing to his Gallicanism and strong prejudices against the Jesuits, Arnauld d'Andilly fell an easy prey to Saint-Cyr's wiles and declamations, and even brought with him the whole Arnauld family, along with the Bernardine nuns of Port-Royal (q. v.). Adroitly and persistently Saint-Cyr pushed his way into this celebrated monastery, till, in 1636, he became its sole director. Not only were his innovations and rigorism eagerly accepted by the nuns, but Port-Royal became the centre of all the noisiest movements lawyers, writers, etc., all rallying with one another to place themselves under the "spiritual domination" of the Abbé de Saint-Cyr. His incredible success and nefarious work are well described by M. Sépét (in Rev. des quest. hist., xlv, 534): "Taking advantage of the moral enthusiasm aroused by the religious awakening, an ardent and sombre sectarian, Saint-Cyr undertook to win souls over for the proud doctrine of absolute predestination to either salvation or damnation, also to an excessive rigorism to which the initiated easily accommodated themselves, while simple-hearted folk like Pascal risked life and reason in its practice."

Saint-Cyr was at the summit of his influence when, at the request of his patron, he sent him (1638) to the donjon of Vincennes. His incarceration has been variously explained by both friends and enemies. Richelieu gave the true reason when he said: "Saint-Cyr is more dangerous than six armies.... If Luther and Calvin had been arrested when they began to dogmatize, much trouble would have been spared the nations." (See Marandé, "Inconvénients d'état précédent du Jansenisme," Paris, 1833).)

It is perhaps best to insist on the rigour of Saint-Cyr's captivity. As a matter of fact, he was given liberty enough to receive his friends, to read the first printed copy of "Augustinus," to collaborate with Antoine Arnauld on the "Fréquente Communion," published in 1643, to write his "Théologie familiale" and the voluminous "Lettres chrétiennes et spirituelles," and even to make new recruits. In 1643, after the death of the old parish priest of Saint-Jacques du Haute-Pas, in a note quoted by Rapi (Hist. du Jansen., p. 305), testified that Saint-Cyr died while being anointed, but had asked for neither absolute nor Viaticum, notwithstanding a certificate to the contrary, delivered by Mulsey, when importuned and bribed by the Jansenists.

Saint-Cyr was a prolific writer. His manuscripts, seized at the time of his arrest, formed no less than thirty-two thick folios. Amid the numerous writings ascribed to him by the "Dictionnaire des livres Jansénistes" (Antwerp, 1755), it is difficult to distinguish his genuine works, for he generally wrote anonymously, or under a false name, or in collaboration with others. Apart from two frivolous pamphlets, "Qu'il s'agit de..., l'estime de la lettre avec la lettre" (Paris, 1653), an apology for suicide under certain circumstances, and "Apologie pour... de la Loqueposy" (Poitiers, 1615), a thesis intended to show that bishops have a right to use arms, his principal works are: (1) "Somme des fautes... du P. Garasse" (Paris, 1620), with several additional pamphlets in support of it; the book itself was a vile attack on the Jesuits on occasion of a somewhat incautious book written by one of them, the heroic Father Garasse; (2) "Petrus Aurelius de hierarchiæ ecclesiæticæ," (Paris, 1631), written in collaboration with Duvergier's nephew, Barco, and others. This book purports to be a defence of Richard Smith, vicar Apostolic in England, against the alleged machinations of the English Jesuits; in fact, it aims at winning over to the Jansenist error the Catholic hierarchy whose prerogatives it exaggerates to the detriment of the Roman See. The scientific portion of it is taken from the "De republicâ christiana" (1617) of the apostate Marc' Antonio de Dominis; the rest consists mainly of abuse of the Jesuits. By a singular inconsistency, Saint-Cyr bases the episcopal power not so much on the establishment of Orders as on the interior spirit. The Enquéve intérieur, remarks Sainte-Beuve, is simply the Directeur, a name and office much coveted by Saint-Cyr. The clergy of France, taken by surprise, paid the expenses of the book but later ordered Saint-Marthe's eulogy of Duvergier expunged from the "Gallia Christiana." (3) "Chaplet secret du très Saint-Sacrement" (Paris, 1692), a series of devotional devotions, the Jansenists' catechism, teeming with errors on nearly every subject, condemned by the Holy Office, 25 April, 1647, "Heretiques, et sottises..." (Paris, 1645); another series (Paris, 1714); Bossuet calls them dry and over-wrought (spiritualité sèche et alambiquée). With the "Théologie familiale," they exhibit a fair specimen of Saint-Cyr's galimatias and obscure asceticism. Saint-Cyr's writings were collected in his "Oeuvres" (Lyons, 1679).

Besides a mass of unreliable Jansenist memoirs, e. g. by Lecoy de la Marche (1723), and by Raoul d'Andilly (1751), see Lettres de J. Jansen. à J. D. De Verger de Houarrosse, ed. Collet (Cologne, 1702); Saint-Cyr in Diction. des Jansenistes, ed. Monet (Paris, 1817); Rapi, Hist. du Jansenisme (Paris, 1906); ibid.,
DUVERNAY

Montréal, N. Trois-Rivières,” Quebec, founded 1871), the He was a French-Canadian historian and journalist, b. at Verchères, Quebec, 22 Jan., 1799; d. 28 Nov., 1852. A printer by trade, he founded and edited successively at Three Rivers, Quebec, “La Gazette des Trois-Rivières” (1817), “Le Constitutionnel” (1823), and “L’Argus” (1826). In 1827, with A. N. Morin, he founded in Montreal “La Minerve”, one of the prominent papers of French Canada. He was imprisoned (1832) for protesting with Dr. Daniel Tracey, editor of the “Vindicat”, against the arbitrariness of the Legislative Council. A medal was presented him in acknowledgment of his devotedness to the public good. Duvernay’s chief title to fame is the foundation of the Society of St. John the Baptist (1834). The choice of the Precursor for the patron saint of the French-Canadians accorded with a time-honoured tradition mentioned in the Jesuit “Relations” (1649) as contemporary with the legitimisation of French Canada and inherited from the mother country. The maple leaf, now accepted by Canadians of every origin, was chosen as the national emblem and the motto adopted by Duvernay was “Notre langue, nos institutions et nos lois”. Elected for Lachenaie in 1837, he was forced to leave the country for participating in the Canadian Rebellion, and he took up his residence at Burlington, Vermont, where he founded “Le Patriote Canadien” (1841). The union of the two Canadas having been voted by the British Parliament and the principle of responsible government adopted, peace was restored and political exiles were allowed to return. Duvernay began again the publication of “La Minerve”, in which he extolled the introduction of responsible government, and criticized the Act of Union destined, by its authors, to absorb Lower Canada.

La Minerve (Montreal, 3 Dec., 1852); Le Jour de Quebec (Dec., 1853); CHOINARD, Feé Nat. des Canad. fran. (Quebec, 1851).

LIONEL LINDSAY.

Dyck, Antoon (Anthonis) van, usually known as Sir Anthony van Dyck, Flemish portrait-painter, h. at Antwerp, 22 March, 1599; d. in London, 9 December, 1641. This great painter was the seventh child of a family of twelve, being the son of Frans van Dyck, merchant in silk, linen, and kidnapped materials, and of Maria, daughter of Dirk Cuypers and Catharina Coninex. While still a boy he was placed, on the ad-

vice of Jan Brueghel, as a pupil in the studio of Hendrick Van Balen, who had been a pupil of Rubens. The young artist’s development as a painter was rapid, for it is recorded that at the age of fourteen he painted a portrait of an old man, and a lawsuit in 1600 revealed the fact that he had also produced when quite a youth a series of heads exceedingly well painted. A proof of his skill is the fact that in 1618, before he was twenty, he was admitted to the freedom of the guild of St. Luke in Antwerp, an unusual distinction for a youthful painter. The tradition that Van Dyck was apprenticed to Rubens or was ever his pupil must be dismissed. Investigations have proved that he was regarded as a master and editor when he was introduced to the studio of Rubens. Here Van Dyck made one of the group of young men who assisted the master in his decorative works, which it would have been quite impossible for him to complete by himself.

In 1620, at the request of the Countess of Arundel, Van Dyck appears to have come to England, and was received commissions from James I for which he was paid in February, 1621. After executing these orders he returned to Antwerp and then determined to visit Italy, leaving in October, 1621, and remaining abroad for five years. He spent some time at Genoa, moved on to Rome, and then visited Florence; from here he went to Bologna, and later by way of Mantua to Venice. After this he was at Milan and finally in 1623 in Rome. The records of this journey remain in the famous “Chatsworth Sketch Book”. Returning to Rome was unsatisfactory, for he made many enemies, and soon left the Eternal City and settled in Genoa, where he was exceedingly popular. His portraits of the great nobility of Genoa rank among the finest in the world and form a magnificent and unrivalled series. In 1624 he visited Palermo, painting the portrait of Emmanuel of Savoy, Viceroy of Sicily, and some church pictures, but returning to Genoa in 1626 left for Antwerp, probably on account of some complications with regard to the division of his father’s estate. He visited Aachen and is believed to have gone on to Paris, while tradition states that he made a second visit to England. However, nothing definite is known of his movements until 1630 when he was at The Hague, and shortly afterwards at his native town. Another tradition, which speaks of the rivalry between Rubens and Van Dyck, has to be disregarded. Mr. Lionel Cust and others have shown that the two painters were not only on terms of equality with regard to their art, but that a generous and cordial friendship existed between them.

In 1632 Van Dyck went to England and was graciously received by Charles I. He appears to have passed into the king’s service immediately, as a warrant was issued on 21 May, 1632, for the payment of
CHARLES I IN ARMOUR

HENRIETTA MARIA, WIFE OF CHARLES
THE HERMITAGE, ST. PETERSBURG
a pension of £200 a year to be paid quarterly. From the moment of his arrival commenced his great success as a portrait-painter in England. The king and queen sat to him frequently, and he was overwhelmed with commissions. In 1634-5 he received a pressing invitation to visit the court at Brussels and accepted it, but in 1635 he was back at Antwerp and in the same year returned to England, taking again his position at the English Court to paint Henry Maria. Of the king he painted no less than thirty-six portraits and about twenty-five of Queen Henrietta Maria, but perhaps the most beautiful works executed for the royal family were those in which he depicted the children of the royal pair. To this period belong the wonderful portraits of members of the English aristocracy to be found in so many of the great English houses. He prepared a scheme for decorating the walls of the banqueting-house at Whitehall, the sketches for which still exist, but the royal exchequer could not afford the work. In 1640 he decided to return to Antwerp. Rubens had died and Van Dyck was acknowledged the head of the Flemish School and entertained with great magnificence. A commission was ordered to him at Antwerp, but first went to Paris, desiring to obtain the commission to decorate the gallery of the Louvre. The work was, however, given to French artists and Van Dyck returned to London for a while, later on in the year, however, visiting Antwerp and Paris, and then coming back to London. When he arrived his health was in a critical condition, and despite the attentions of the royal physician he died at his house in Blackfriars eight days after his wife had given birth to a daughter. He was buried in St. Paul's Cathedral, and a monument was erected to his memory by order of the king, but the grave and monument perished with the cathedral in the great fire of 1666.

In portraiture Van Dyck is the greatest artist of Europe after Titian, and in works of decorative splendour perhaps only rivalled by Rubens. He was a man of luxurious and somewhat indolent habits, ambitious, proud, sensitive, and quick to take offence. In his portraits the elegance of the composition, the deliberate expression of the heads, the truth and purity of his colouring, and the strong lifelike quality of expression give him the very highest position, and he is one of the few few painters to have earned the lasting fame of the front rank. In a consideration of his art the brilliant and vigorous etchings must not be overlooked.

GEORGE CHARLES WILLIAMSON.

DYING, PRAYERS FOR THE. See DEATH.

Dymoke, Robert, Confessor of the Faith, date of birth uncertain; d. at Lincoln, England, 11 Sept., 1550. He was the son of Sir Edward Dymoke (d. 1566) of Serckleby, Lincolnshire, hereditary King's Champion, who received the martyr-prize. Blessed Richard Kirkby, Sonet's companion, maintained him as schoolmaster to his sons. He was himself, at the time, an occasional conformist to the State religion but was reconciled in 1550 either by Kirkman or by Blessed Edmund Campion. In July, 1550, Dymoke and his wife, the Lady Bridget, eldest daughter and coheir of Edward Clinton, Earl of Lincoln, were indicted for hearing Mass and for recusancy. Though he was quite helpless owing to paralysis, Dymoke was ordered by Bishop Cooper of Lincoln to be carried off to gaol, where he died, faithful to the end. He was much tormented in his last hours by the Protestant ministers who endeavoured to pervert him, and who, even when the dying man was half-unconscious, refused to leave him in peace. He left several children, his eldest son, Edward, being more than twenty-one years of age at the time of his father's death.

BEDE CAMM.

Dympha (Dympna), Saint, virgin and martyr. The earliest historical account of the veneration of St. Dympna dates not from St. Patrick's time but from the consecration of a monastery under Bishop Guy I of Cambrai (1238-47). Pierre, a canon of the church of Saint-Aubert at Cambrai, wrote a “Vita” of the saint, from which we learn that she had been venerated for many years in a church at Ghed (province of Antwerp, Belgium), which was dedicated to her. The author expressly states that he has drawn his biography from oral tradition. According to the narrative Dympha, the daughter of a pagan king of Ireland, became a Christian and was secretly baptized. After the death of her mother, who was of extraordinary beauty, her father desired to marry his own daughter, who was just as beautiful, but she fled with the priest Gerebernus and landed at Antwerp. Thence they went to the village of Ghel, where there was an old building, which was turned into a church for their abode. The messengers of her father, however, discovered their whereabouts; the father betook himself thither and renewed his offer. Seeing that all was in vain, he commanded his servants to slay the priest, while he himself struck off the head of his daughter. The corpses were put in sarcophagi and entombed in a cave, where they were found later. The body of St. Dympha was disinterred and conveyed to the church of her father where it remained until the bones of St. Gerebernus were transferred to Xanten. This narrative is without any historical foundation, being merely a variation of the story of the king who wanted to marry his own daughter, a motif which appears frequently in popular legends. Hence we can conclude nothing from it as to the history of St. Dympna and the time in which she lived. That she is identical with St. Damlam of Ireland cannot be proved. There are at Ghel fragments of two simple ancient sarcophagi in which tradition says the bodies of Dympna and Gerebernus were found. There is also a quadrangular brick, said to have been found in one of the sarcophagi, bearing two lines of letters read as Dympna. The discovery of this sarcophagus with the brick caused the veneration of the saint, which, however, probably dates only from the thirteenth century. In Christian art St. Dympna is depicted with a sword in her hand and a lettered devil at her feet. Her feast is celebrated 15 May, under which date she is also found in the Roman martyrology.

From time immemorial, the saint was invoked as patroness against insanity. The Bollandists have published numerous accounts of miraculous cures, especially between 1601 and 1685. As a result, there has long been a colony for lunatics at Ghel; even today there are sometimes as many as fifteen hundred, whose relatives invoke St. Dympna for their cure. The insane are treated in a peculiar manner; it is only in the beginning that they are placed in an institution for observation; later they are given shelter in the homes of the inhabitants, take part in their agricultural labours, and are treated very kindly. They are watched without being conscious of it. The treatment produces good results. The old church of St. Dympna in Ghel was destroyed by fire in 1189. The new church was consecrated in 1532 and is still standing. Every year on the feast of the saint and on the Tuesday after Pentecost numerous pilgrims visit her shrine. In Ghel there is also a fraternity under her name. For an interesting account of Ghel, see Mrs. Byrne, “The City of the Simple” (London, 1869).
DYNAMISM

Dynamism, a general name for a group of philosophical views concerning the nature of matter. However, the name is not in general use, and a few of the views agree in making matter consist essentially of simple and indivisible units, or forces. Dynamism is sometimes used to denote systems that admit not only matter and extension, but also determinations, tendencies, and forces intrinsic and essential to matter. More properly, however, it means exclusive systems that do away with the dualism of matter and force by reducing the former to the latter. Here we shall limit ourselves to this strict form of dynamism, first, indicating its chief advocates and its characteristic presentations, secondly, comparing these in order to see the points of agreement and of difference.

I. We have but a vague and incomplete knowledge of the doctrines held by the Pythagorean School, but it is safe to assume that their views were in agreement with at least the forerunners of modern dynamism. From Aristotle's "Metaphysics" we gather that the Pythagoreans, imbued with a mathematical spirit and accustomed to mathematical methods, came to look upon the principles (δυνάμεις) of numbers as the principles of things themselves, to assert that the elements (κρύσταλλα) of numbers were also the elements of reality, and that the whole heaven was a harmony and a number. Various geometrical figures are but different combinations of numbers, the unit being a point; from points are formed lines, from lines, surfaces; and from surfaces, solids; and geometrical figures are the very substance of things. Hence, finally, "physical bodies are composed of numbers". Among the Arabian philosophers, the mathematicians were atomists. The atom is the only substance, and all atoms are perfectly identical in nature. The identity, however, is not of a positive, but of a merely negative character, for these primitive elements of matter are simple substances and nothing else. They have no determinations whatever, no weight, no shape, no quantity, no extension; they are indivisible, and would remain indivisible if the universe were reduced to a point, the necessary subject of all accidents or determinations, and incapable of existing without them.

Leibniz's doctrine is a reaction against both the material mechanicism of Descartes and the substantial monism of Spinoza. The essence of matter cannot be extension. The laws of mechanics cannot themselves be understood without using the notion of force. Moreover, "a substance is a being capable of action", and "what does not act does not deserve the name of substance". Hence substance implies unity and individuality, and the real substance cannot be the "material" atom (atom de matière). Having extension, such an atom is composed of parts and divisible without limit; it has no real unity. The elements which compose it, therefore, are not the "substantial" atoms (atomes de substance), simple and without parts. They are called monads. Bodies are "multitudes" and "aggregates", and the simple substances are units and elements. As they have no parts, monads have "neither extension, nor shape, nor possible divisibility. They are the true atoms of nature, and, in a word, the elements of things. Since it is impossible for any force to act upon another which is in reality different from every other, monads have no external, but only an internal, activity, which is twofold: perception and appetite. All monads are, in various degrees, representations of the whole universe, but this representation or perception becomes clearly conscious (appereception), and is accompanied with attention, memory, and reflection, only in higher monads. Apperception is the activity of the internal principle by which the passage from one perception to another is effected. The relative perfection of the monads depends on the degree of clearness of their perceptions. Some unite to form an organism whose centre of unity is a higher monad or soul. This system is completed by the supposition of a pre-established harmony. The order and harmony of the world are the result not of an interaction between monads, but of a pre-arranged plan of God. Therefore, there is no possibility of free will, but all events are predetermined and the world is the result of an internal evolution. In the main, Christian Wolff reproduced and systematized Leibniz's theory.

According to Boscovich (q. v.) the first elements of matter are points absolutely indivisible and without any extension. They are spread throughout an immense vacuum in such a way as to always be at some distance from one another. The distance may increase or decrease indefinitely, but can never disappear completely without a compensation of the points themselves, for contact between them is impossible. (Theoria Philosophica Naturalis, n. 7). Hence there can be no continuous extension. The elements are all homogeneous, and, by their numbers, distances, arrangements, activities, and relations produce the diversity of matter, substance, forces, and their interactions.

In his pre-critical period, Kant admitted physical monads, that is, simple and indivisible substances. His later views may be summed up as follows: matter is divisible without limit, but not actually divided into separate atoms. Matter is what fills up a space, and to fill up a space is to defend it against any mobile which would try to penetrate it. Hence matter is essentially resistant and force. It is not impenetrable, in the absolute or mathematical sense of the Cartesians, but in a relative sense and in varying degrees; it may be compressed and condensed. There are two distinct forces, repulsion and attraction. The former is the primary constituent of matter, since by it other things are excluded from the space it occupies. It produces resistance and force. It is not impenetrable, to a geometrical point. However, attraction is also essential to the occupancy of an assignable space, for otherwise matter would be scattered without limit. Repulsion can act only by contact; attraction may also act at a distance. From these two forces Kant derives all the properties of matter. It must be remembered that this theory is an explanation of the phenomena of attraction, repulsion, and gravity as they appear to our mind. This idealistic feature was carried still further by the German Transcendentalists; among them Schelling proposes a view the main lines of which agree with that of Kant. In more recent times,
DYSIBOD

Herbert, Lotze, von Hartmann, Renouvier, to mention only a few names among many, also hold dynamic theories modified by their special points of view and philosophical systems. To these may be added some Catholic philosophers, e. g. the Sulpician Brandeureau, and the Jesuits Carbonnelle and Paimieri. Among scientists, Ampère, Cauchy, Faraday, and others are also in favour of dynamism. Faraday's theory is substantially the same as that of Boscovich. That theory, namely, the mutual attraction and repulsion of forces or powers, not particles of matter in which the powers themselves reside’, has “a great advantage over the more usual notion”, “A mind just entering on the subject may consider it difficult to think of the powers of matter independent of a separate something to be called the matter, but it is certainly far more difficult, and indeed impossible, to think of or imagine that matter independent of the powers. Now the powers we know and recognize in every phenomenon of the creation, the abstract matter in none; why, then, assume the existence of that of which we are ignorant, which we cannot conceive, and for which there is no philosophical necessity?” (A Speculation touching Electric Conduction and the Nature of Matter, pp. 269, 270).

To-day there is a tendency to substitute the concept of energy for that of force. Hence Professor Ostwald's "energetic theory". Matter is to be looked upon as a complex of energies arranged together in space. The concept of matter resolves itself into that of energy, since the manifestations of energy are all we know of the external world. Energy is the common substance, force is that which is in space and time; it is also the differentiating principle of whatever exists in space and time. Recent scientific discoveries, especially those in the field of radio-activity, seem to strengthen philosophical reason and lead to a more specific dynamism. The atom (q. v.) can no longer be considered as being what its name implies, namely indivisible. Atoms of different chemical elements are spires of positive electrification enclosing a number of corpuscles, all homogeneous, having identical properties, and negatively electrified. Some physicists still attribute to these corpuscles a real, though infinitesimal, extension; they admit a nucleus or carrier of the electric charge, and this nucleus alone is what we call matter. But this is denied by others for whom the concept of both mass and inertia, the one which we commonly use that term. It is all electricity and nothing but electricity. Indeed the only reason for admitting anything else would be the necessity of explaining the mass and inertia of the corpuscle. But electricity itself possesses mass and inertia; or rather the mechanical inertia of matter is identical with the self-induction of the electric current, and the mass results from the velocity of the current. It has been calculated that the whole mass and inertia of the corpuscle are accounted for by its electrical charge alone and its velocity. Hence the name "electron" given to the corpuscle; it is the ultimate unit of so-called matter. This is known as the electronic theory of matter.

II. The preceding outline shows that the term dynamism, like all other general philosophical systems, is very vague and applies to a number of widely different views originating from different considerations and supported by different arguments, namely: (1) Extension being essentially divisible, the ultimate unit must lack extension, otherwise it would be itself composed of parts, divisible and not one. (2) Matter is essentially active; to reduce it to mere extension is to ignore one of its fundamental aspects. (3) Even extension manifests itself exclusively through forces, and (4) matter as such is unknowable and unthinkable. (5) Scientific facts lead to an electronic theory. (6) Matter is, therefore, to say the least, absolutely useless, and dynamism, being a simpler, yet adequate, explanation, is preferable. Without entering into a discussion of the system, we may note briefly that the extension which is infinitely divisible is abstract, not concrete, mathematical, not physical, extension. For Aristotle and the Scholastics, physical matter is composed of two essential and inseparable principles, primary matter and substantial form (q. v.), the latter being the principle of unity and activity. Moreover, to admit the essential activity of matter does not necessarily imply that matter is nothing but activity. And, as so far as a man can as of the senses except through forces and energies, it does not follow that it is not the necessary subject and carrier of these forces. In order to establish dynamism, it is not sufficient to overthrow materialism. If there is no matter, it is difficult to understand the forces themselves; for then, what is attracted? what moves, rotates, vibrates, etc.? Do not forces require a subject? It is clear that simple elements cannot give real extension. Can they even explain the phenomenon itself of extension, when not only physical bodies but the organism itself and the sense-organs are denied real extension? The facts and nature of radio-activity are not as yet sufficiently explored to furnish a safe basis for a definite theory of matter. Further, the necessity for attributing a certain dynamism to any form of matter is an objection against some forms at least of dynamism.

Dynamism is opposed to the objective dualism of matter and energy, and also to mechanical materialism, according to which, matter, endowed with extension, is of itself an inert and indifferent vehicle of motion. It is not opposed to atomism in general, but only to forms of it. Some dynamists, denying the continuity of the forces constituting matter, but the majority admit centres or atoms of forces acting on one another. Atomism, therefore, is either material or dynamic, and dynamism may admit atomism or continuity. How far even dynamism is irreconcilable with hylomorphism (q. v.) in its most general meaning is it difficult to determine. Leibniz speaks of primary matter and of substantial form, or eternity, and the common elements of all things must be conceived as being only in potentia with regard to the actual diverse substances which they constitute. Again, the dynamic elements may be purely physical, or, as with Leibniz, they may have, in various degrees, a psychical nature, thus implying a sort of panpsychism. Leibniz also considers them as continuum, and can conceivably they are regarded as identical in nature. Dynamism in general may be adapted to and modified by such philosophical systems as determinism or freedom, substantialism or phenomenalism, idealism or realism, monism or theism, etc. In itself, it is not inconsistent with any essential Catholic doctrine.

In conclusion, it may be interesting to note the contrast between the modern and the Aristotelian terminologies. Aristotle's ωμος and νασια (see Actus et Potentialia) are essentially opposed. To-day, they have come to be almost synonymous, and energetism is one of the dynamic views of matter.

Eadfrid, Bishop of Lindisfarne. See Cuthbert, Saint; Lindisfarne Gospels.

Eadmer, precentor of Canterbury and historian, b. 1061 (?); d. 1124 (?). Brought up at Christ Church ab infantia, he became after St. Anselm's consecration, the theological pupil of, and engaged, and from these he compiled his chief works, the "Historia Novorum" and the "Vita S. Anselmi" (ed. M. Rule, 1884, in Rolls Series). Eadmer's "Opuscula" comprise verses on Sts. Dunstan and Edward, the lives of Sts. Wilfrid, Odo, Dunstan, Oswin, Bregwin (printed in Wharton, Anglo-Saxa). Of his theological works, the "Conception Sanctae Marie", a tract of much importance for the development of the doctrine of the Immaculate Conception (see Thurston's ed., Freiburg, 1904, and "The Month", July and August, 1904, for the discussion of the date of his death). In 1121 he was elected to the See of St. Andrews, but by refusing to be ordained except by the Archbishop of York, he put an insuperable bar to his own promotion.

Notices of this important writer are found in all treatises on Anglo-Saxon and ecclesiastical writers. Besides the works cited above, see: LEBEMANN, Enzyklopädie anglo-normannische Geschichtsquellen (Strasburg, 1879); RAGET, Eadmer (Paris, 1892).

J. H. POLLEN.

Eanbald, the name of two Archbishops of York.—EANBALD I, date of birth unknown; d. 10 August, 796. Most of his life was probably spent in the monastery of York. As one of the officials in the monastery, he, conjointly with Aelcin, superintended the rebuilding of the minster. Albert, in his declining years, chose Eanbald to be his coadjutor and successor. He succeeded to the archbishopric in 782 (some say 778). His first care was to obtain the pallium and Aelcin went to Rome to bring it; on his return Eanbald was solemnly confirmed in his office. He lived in troublous times. Nevertheless Eanbald carried on the School of York and treasured its great library. In August and of the consecrated Baldred Bishop of Whithorne. His last public act was on 25 June, 796, when he crowned Eardulf King of Northumbria. He died at the monastery of Ettele or Edete. His body was taken to York and buried in the minster.

EANBALD II, date of birth unknown; died 810 or 812. He received his education in the famous School of York where he was Aelcin's pupil. In the death of Eanbald I he was chosen his successor. On 8 Sept., 797, having received the pallium from Rome, he was solemnly confirmed in the archbishopric.

He assisted Ethelard, Archbishop of Canterbury, to recover the prerogatives of which he had been deposed by Offa. In 798 he assembled his clergy in synod at Penchehale (Finchale, near Durham) and then enacted a number of wise regulations relating to the ecclesiastical courts and the observance of Easter. Some think he was the author of a volume of decrees and that he was the first to introduce the Roman Ritual in the church of York.

Earth, Age of the. See MAN.

Easter.—The English term, according to the Ven. Bede (De temporum ratione, i. v), relates to Easter, a Teutonic goddess of the rising light of day and spring, which deity, however, is otherwise unknown, even in the Edda (Simrock, Mythol., 362); Anglo-Saxon, easter, easteron; Old High German, òstrâ, òstrara, òstrarun; German, Ostern. April was called easter-monadóm. The plural easteron is used, because the feast lasts seven days. Like the French plural Pâques, it is a translation from the Latin Pascha Paschali, the entire octave of Easter. The Greek term for Easter, πάσχα, has nothing in common with the verb πάσχω, "to suffer", although by the later symbolic writers it was connected with it; it is the Aramaic form of the Hebrew word pesach (transitus, passover). The Greeks call Easter the πάσχα ἀνωτάτου; Good Friday the πάσχα ἀνωτάτου; the respective terms used by the Latins are Pascha resurrectionis and Pascha crutisio- tons. In the Roman and Monastic Brevaries the feast bears the title Dominica Resurrectionis; in the Mozarabic Breviary, In Lutatione Diei Pascha Resurseri- tionis; in the Ambrosian Breviary, In Die Santo Pascha. The Romance languages have adopted the Hebrew-Greek term: Latin, Pascha; Italian, Pasqua; Spanish, Pasqua; French, Pâques; German, Ostern. The Teutonic and Teutonic nations use it: Scotch, Pask; Dutch, Paschen; Danish, Paske; Swedish, Pask; even in the German provinces of the Lower Rhine the people call the feast Paasken not Osten. The word is, principally in Spain and Italy, identified with the word "solem- nity" and extended to other feasts, e. g. Sp., Pascua de Palm Sunday; Pascua de Pentecostes, Pentecost; Pascua de la Natividad, Christmas; Pascua de Epifanía, Epiphany. In some parts of France also First Communion is called Pâques, whatever time of the year administered.

The Feast.—Easter is the principal feast of the ecclesiastical year. Leo I (Sermon xlvii in Exordum) calls it the greatest feast (festum festerum) and says that Christmas is celebrated only in preparation for Easter. It is the centre of the greater part of the ecclesiastical year. The order of Sundays from Septuagena to the last Sunday after Pentecost, the feast of the Ascension, Pentecost, Corpus Christi, and all other movable feasts, from that of the Prayer of Jesus in the Garden (Tuesday after Septuagesima) to the feast of the Sacred Heart (Friday after the octave of Corpus Christi), de- pend upon the Easter date. Commemorating the slaying of the true Lamb of God and the Resur- ection of Christ, the corner-stone upon which faith is built, it is also the oldest feast of the Christian Church, as old as Christianity, the connecting link between the Old and the New Testament. That the Apostolic Fathers do not mention it and that we first hear of it principally through the controversies of the Quartodecimans are purely accidental. The connexion between the Jewish Passover and the Christian feast of Easter is real and ideal. Real, since Christ died on the first Jewish Easter Day; ideal, like the relation between type and reality, because Christ's death and Resurrection had its figures and types in the Old
Law, particularly in the paschal lamb, which was eaten towards evening of the 14th of Nisan. In fact, the Jewish feast was taken over into the Christian Easter form (the liturgy, renamed) during the passage of Israel through the Red Sea, the paschal lamb, the column of fire, etc. Apart, however, from the Jewish feast, the Christians would have celebrated the anniversary of the death and the Resurrection of Christ. But for such a feast it was necessary to know the exact calendar date of Christ’s death. To know this day was very simple for the Jews: it was the day after the 14th of the first month, the 15th of Nisan, on their calendar. But in other countries of the vast Roman Empire there were other systems of chronology. The Romans from 45 B.C. had used the reformed Julian calendar; there were also the Egyptian and the Syro-Macedonian calendar (see Calendar). The foundation of the Jewish calendar was the lunar year of 354 days, whilst the other systems depended on the solar year. In consequence the first days of the Jewish months and years did not coincide with any fixed days of the Roman solar year. Every fourth year of the Jewish system had an intercalary month. Since this month was inserted, not according to some scientific method or some definite rule, but arbitrarily, by command of the Sanhedrin, a distant Jewish date can never be calculated on a day that may be the corresponding Julian or Gregorian date (Idler, Chronologie, 1, 570 sq.). The connexion between the Jewish and the Christian Pasch explains the movable character of this feast. Easter has no fixed date, like Christmas, because the 15th of Nisan of the Semitic calendar was shifting from date to date on the Julian calendar. Since Christ, the true Paschal Lamb, had been slain on the very day when the Jews, in celebration of their Passover, imitated the figurative lamb, the Jewish Christians in the Orient followed the Jewish method, and commemorated the death of Christ on the 15th of Nisan and His Resurrection on the 17th of Nisan, no matter on what day of the week they fell. For this observance they claimed the authority of St. John and St. Philip.

In the rest of the empire another consideration predominated. Every Sunday of the year was a commemoration of the Resurrection of Christ, which had occurred on a Sunday. Because the Sunday after 14 Nisan was the historical day of the Resurrection, at Rome this Sunday became the Christian feast of Easter. Easter was celebrated in Rome and Alexandria on the first Sunday after the first full moon after the spring equinox. This was the first Sunday of the observance the authority of Sts. Peter and Paul. The spring equinox in Rome fell on 25 March; in Alexandria on 21 March. At Antioch Easter was kept on the Sunday after the Jewish Passover. (See Easter Controversy.) In Gaul a number of bishops, wishing to escape the difficulties of the paschal computus, seem to have assigned Easter to a fixed date of the Roman calendar, celebrating the death of Christ on 25 March, His Resurrection on 27 March (Marinus Dumiensis in P. L., LXXII, 47-51), since already in the third century 25 March was considered the day of the Crucifixion (Computus Pseudoecyprianus, ed. Lorsch, Chronologie, II, 61). This practice was of short duration. Many calendars in the Middle Ages continued to assign Easter to a purely calendrical, not liturgical, reason (Grotefend, Zeitrechnung, II, 46, 60, 72, 106, 110, etc.). The Montanists in Asia Minor kept Easter on the Sunday after 6 April (Schm id, Osterfestberechnung in der abendländischen Kirche). The First Council of Nicaea (325) decreed that the Roman practice should be observed throughout the Church. But even at Rome the Easter feast was elided considerably. Many who continued to keep Easter with the Jews were called Quartoceimans (14 Nisan) and were excluded from the Church (see Quartoceimans). The computus paschalis, the method of determining the date of Easter and the dependent feasts, was of old considered so important that Durandus (Rit. div. s. v. Paschalis) declared a priest unworthy of the name who did not know the computus paschalis. The movable character of Easter (22 March to 25 April) gives rise to inconveniences, especially in modern times. For decades scientists and other people have worked in vain for a simplification of the computus, assigning Easter to the first Sunday in April or to the Sunday nearest to the 7th of April. Some have tried to introduce into the Church, e.g. beginning with New Year’s always on a Sunday, etc. (See L. Günther, “Zeitschrift Weltall.” (1903); Sandhage and P. Dueren in “Pastor bonum.” (Trier, 1906); C. Tondini, “L’Italia e la questione del Calendario.” (Florence, 1905.).

The Easter Office and Mass.—The first Vespers of Easter are connected now with the Mass of Holy Saturday, because that Mass was formerly celebrated in the evening (see Holy Saturday); they consist of only one psalm (Exvi) and the Magnificant. The Matins have only one Nocturn; the Office is short, because the clergy were busy with catechisms, the reconciliation of sinners, and the distribution of alms, which were given plentifully by the rich on Easter Day. The celebration of the First Nocturn was extended by some churches from the octave of Easter to the entire paschal time, and soon to all the feasts of the Apostles and similar high feasts of the entire ecclesiastical year. This observance is found in the German Breviaries far up into the nineteenth century (“Brev. Monasterius,” 1380; Bannier, “Brevier,” 312). The octave of Easter ceases with None of Saturday and on Sunday the three Nocturns with the eighteen psalms of the ordinary Sunday Office are recited. Many churches, however, during the Middle Ages and later (Brev. Monasterius, 1380), on Low Sunday (“Dominica in Albis”) repeated the short Nocturn of Easter Week. Before the usus Romanus Curiae (Bannier, Brevir., 349) was spread by the Franciscans over the entire Church the eighteen (or twenty-four) psalms of the regular Sunday Matins were, three by three, distributed over the Matins of Easter Week (Bannier, 301). This observance is still one of the peculiarities of the Carmelite Breviary. The simplified Breviary of the Roman Curia (twelfth century) established the custom of repeating Psalms i, ii, iii, every day of the octave. From the ninth to the thirteenth century, in most dioceses, during the entire Easter Week the Matins were celebrated, of abstaining from servile work were observed (Keller, Heortologie, 17); later on this law was limited to two days (Monday and Tuesday), and, since the end of the eighteenth century, to Monday only. In the United States even Monday is no holiday of obligation. The first three days of Easter Week are doubles of the first class, those only of sensible antiphons, and the great lessons of Matins. Only the “Vii tem Paschali” was adopted in most of the churches and religious orders in the Second Vespers. The Mozarabic and Ambrosian Offices use the Ambrosian hymn “Hic est dies verus Dei” in Lauds and Vespers, the Monastic Breviary, “Ad eamnam Agni providi” at Vespers, “Chorus novi Jerusalem” at Matins, and “Aurora lucis exitus” at Lauds. The Monastic Breviary has also three Nocturns on Easter Day. Besides the hymns the chapter is omitted and the Little Hours have no antiphons; the place of the hymns,
EASTER 226

capital stones, and liturgical movement was a significant feature of the period. The liturgy of Easter Week was a time of great celebration, with processions and ceremonies that reflected the joy of the resurrection of Christ. The liturgy was performed in both Latin and the vernacular languages, with many authors discussing the use of the vernacular in the liturgy.

Chapter 6: The Liturgy of Easter Week

The liturgy of Easter Week was a significant part of the Christian year, and was celebrated in many different ways. In the centuries following the Byzantine liturgy, many new elements were added to the liturgy, such as the use of the vernacular languages.

Chapter 7: The Antiphon

The antiphon was an important part of the liturgy, and was used to introduce new elements into the liturgy. The antiphon was often sung during the processions and ceremonies of Easter Week, and was an expression of the joy of the resurrection of Christ.

Chapter 8: The Procession

The procession was an important part of the liturgy of Easter Week, and was a time of great celebration. In the centuries following the Byzantine liturgy, the procession was often accompanied by music and singing, and was a way of expressing the joy of the resurrection of Christ.

Chapter 9: The Easter Antiphon

The Easter antiphon was an important part of the liturgy of Easter Week, and was a way of expressing the joy of the resurrection of Christ. The antiphon was often sung during the processions and ceremonies of Easter Week, and was a way of expressing the joy of the resurrection of Christ.

Chapter 10: The Easter Procession

The Easter procession was an important part of the liturgy of Easter Week, and was a time of great celebration. In the centuries following the Byzantine liturgy, the procession was often accompanied by music and singing, and was a way of expressing the joy of the resurrection of Christ.

Chapter 11: The Easter Antiphon

The Easter antiphon was an important part of the liturgy of Easter Week, and was a way of expressing the joy of the resurrection of Christ. The antiphon was often sung during the processions and ceremonies of Easter Week, and was a way of expressing the joy of the resurrection of Christ.

Chapter 12: The Easter Procession

The Easter procession was an important part of the liturgy of Easter Week, and was a time of great celebration. In the centuries following the Byzantine liturgy, the procession was often accompanied by music and singing, and was a way of expressing the joy of the resurrection of Christ.

Chapter 13: The Easter Antiphon

The Easter antiphon was an important part of the liturgy of Easter Week, and was a way of expressing the joy of the resurrection of Christ. The antiphon was often sung during the processions and ceremonies of Easter Week, and was a way of expressing the joy of the resurrection of Christ.
EASTER

antiqu. Eccl. rit., c. xxx, 5.) The Armenian Church during the entire time from Easter to Pentecost celebrates the Resurrection also by other recreation of the saints. On Easter Monday they keep All Souls' Day, the Saturday of the same week the Decollation of St. John, the third Sunday after Easter the founding of the first Christian Church on Sion and of the Church in general, the fifth Sunday the Apparition of the Holy Cross at Jerusalem, then on Thursday the Ascension of Christ, and the Sunday after the feast of the Virgin. On the Ascension the Armenians never fast nor do they abstain from meat (C. Tondini de Quarrangh, Calendrier de la Nation Arménienne).

In the Mozarabic Rite of Spain, after the Pater Noster on Easter Day and during the week the priest intones the particula "Regnum" and sings "Vivit Leo de Tribu Juda radix David Al-leuja". The people answer: "Qui sedes super Chal- ubim radix David. Alleluja". This is sung thrice times (Missale Mozarab.). In some cities of Spain before sunrise two processions leave the principal church; one with the image of Mary covered by a black veil; another with the Blessed Sacrament. The processions move on in silence until they meet at a predetermined place; then the veil is removed from the image and the procession continues on. The chief of the "Regnum" is (Guéranger, Kirchenjahr, VII, 166). For the sanctuary at Emmaus in the Holy Land the Holy See has approved a special feast on Easter Monday, "Solemnitas manifestationis D. N. I. Chr. Requ., Titul. Eccles. dupl. I Cl.", with proper Mass and Office (Cal. Rom. Seraph. in Terrae S. Custodia, 1907).

peculiar Customs of Easter Time.—1. Ritus Paschalibus. This custom originated in Bavaria in the fifteenth century. The priest inserted in his sermon funny stories which would cause his hearers to laugh (Ostermärlein), e. g. a description of how the devil tries to keep the doors of hell locked against the descending Christ. Then the speaker would draw the moral from the story. This Easter laughter, giving rise to grave abuses of the word of God, was prohibited by Clement X (1667-1676) and in the eighteenth century by Maximilian III and the bishops of Bavaria (Wagner, De Ritus Paschali, Königserg, 1705; Linne-meyer, Predigt in Deutschland, Munich, 1886).

2. Easter Eggs.—Because the use of eggs was forbidden during Lent, they were brought to the table on Easter Day, coloured red to symbolize the Easter joy. The Easter egg was a symbol of the resurrection of the Oriental Churches. The symbolic meaning of a new creation of mankind by Jesus risen from the dead was probably an invention of later times. The custom may have its origin in paganism, for a great many pagan customs, celebrating the return of spring, gravitated to Easter. The egg is the emblem of the germinating life of early spring. Easter eggs, the children are told, come from Rome with the bells which on Thursday go to Rome and return Saturday morning. The sponsors in some countries give Easter eggs to their god-children. Coloured eggs are used by children at Easter in a sort of game which consists in testing the strength of the shells (Kraus, Real-Encyclopädie, s. v. Ei). Both coloured and uncoloured eggs are used in some parts of the United States for the Easter egg hunt. Another practice is the "egg-rolling" by children on Easter Monday on the lawn of the White House in Washington.

3. The Easter Rabbit lays the eggs, for which reason they are hidden in a nest or in the garden. The rabbit is a pagan symbol and has always been an emblem of fertility (Simrock, Mythologie, 551).

4. In France, houblons, a "hanging" one of the Easter amusements, found also in Germany (Simrock, op. cit., 575). The bull may represent the sun, which is believed to take three leaps in rising on Easter morning. Bishops, priests, and monks, after the strict discipline of Lent, used to play ball during Easter week (Belchet, Expl. Div. off., 120). This was called libertas Decem-bria, because formerly in December the masters used to play ball with their scholars. The ball game was connected with a dance, in which even bishops and abbots took part. At Aixerre, Besançon, etc., the dance was performed in church to the strains of the "Victima paschali". In England, also, the game of ball was a favourite Easter sport in which the municipal corporation engaged with due parade and dignity. And at Bury-St. Edmunds, with- out any special licence. Great excitement was kept up by twelve women. After the game and the dance a banquet was given, during which a homily on the feast was read. All these customs disappeared for obvious reasons (Kirchenlex., IV, 1414).

5. On Easter Monday the women had a right to strike their husbands, on Tuesday the men struck their wives, as in December the servants secured their masters. Husbands and wives did this in "ut ostendant sece mutuo debere corrigere, ne illo tempore alter ab altero thuri debitum exigat" (Belchet, I, c. cix; Dur- andus, I, c. vi, 80). In the northern parts of Eng- land the men parade the streets on Easter Sunday and claim the privilege of lifting every woman three times from the ground, receiving in payment a kiss or a stamp. Eastern is the custom of the men to keep the women on the mattress. In the Neumark (Germany) on Easter Day the men servants whip the maid servants with switches; on Monday the maids whip the men. They secure their release with Easter eggs. These customs are probably of pre-Christian origin (Reinsberg-Düringsfeld, Das festliche Jahr, 118).

6. The Easter Fire is lit on the top of mountains (osternachtfeuer, Osternachtfeuer). It must be kindled from new fire, drawn from wood by friction (nodjur); this is a custom of pagan origin in vogue all over Eu- rope, signifying the victory of spring over winter. The bishops issued severe edicts against the sacrilegious Easter fires (Conc. Germanicum, a. 742, c. 4; Council of Leestins, a. 743, n. 15), but did not succeed in abolishing them everywhere. The Church adopted the observance into the Easter ceremonies, referring it to the fiery column in the desert and to the Resurrection of Christ; the new fire on Holy Saturday is drawn from flint, symbolizing the Resurrection of the Light of the World from the tomb closed by a stone (Missale Rom.). In some places a figure was thrown into the Easter fire, symbolizing winter, but to the Christians of Bohemia, Rumania and elsewhere it must be kept hidden. This is known as the Easter fire (Reinsberg-Düringsfeld, Das festliche Jahr, 112 sq.).

7. At Puy in France, from time immemorial to the tenth century, it was customary, when at the first Psalm of Matins a canon was absent from the choir, for some of the canons and vicars, taking with them the processional cross and the holy water, to go to the house of the absentee, sing the "Hac Dies", sprinkle him with water, if he was still in bed, and lead him to the church. In punishment he had to give a breakfast to his conductors. A similar custom is found in the fifteenth century at Nantes and Angers, where it was prohibited by the diocesan synods in 1431 and 1448. In some parts of Germany parents and children try to surprise each other in bed on Easter morning to apply the health-giving switch (Friedrich, Oster in deutscher Sitten, 1834). In England (1833).

8. In both the Oriental and Latin Churches, it is customary to have those victuals which were prohib- ited during Lent blessed by the priests before eating them on Easter Day, especially meat, eggs, butter, and cheese (Ritualbücher, Paderborn, 1904; Maxi- millianus, Liturg., or. 117). Those who ate before the food was blessed, according to popular belief, were punished by God, sometimes instantaneously (Migne, Liturgie, s. v. Pâques).

9. On the eve of Easter the homes are blessed (Rit. Rom., tit. 8, c. iv) in memory of the passing of the angel in Egypt and the signing of the door-posts
EASTER

with the blood of the paschal lamb. The parish priest visits the houses of his parish, the papal apartments are also blessed on this day. The room, however, in which the people is found by the visiting cardinal is blessed by the pontiff himself (Moroni, Dizionario, s. v. Pasqua).

10. The Greeks and Russians after their long, severe Lent make Easter a day of popular sports. At Constantinople the cemetery of Pero is the noisy rendezvous of the Greeks; there are music, dances, and all the pleasures of an Oriental popular resort; the same custom is observed in Rome. After the Resurrection Day anyone can enter the belfries on Easter and ring the bells, a privilege of which many persons avail themselves.

FREDERICK G. HOLWEE.

EASTER CONTROVERSY.—Ecclesiastical history preserves the memory of three distinct phases of the dis- pute regarding the proper time of observing Easter. It is difficult to say if we in the first place still know what is certain regarding the date and the nature of these three controversies.

FIRST PHASE.—The first was mainly concerned with the finality of celebrating Easter on a weekday. We read in Enseibus (Hist. Ecle., V, xxiii): “A question of no small importance arose at this time [i. e. the time of Pope Victor, 190], not only in the East, but in the West, and in all Asia, as from an older tradition, held that the fourteenth day of the moon, on which day the Jews were commanded to sacrifice the lamb, should always be observed as the fast of the life-giving pasch [ἀπελευθερωτήτικον Πάσχα], contending that the fast ought to end on that day, whatever day of the week it might happen to be. However it was not through the decision of this feast and the fast that the controversy ended at this point, as they observed the practice, which from Apostolic tradition has prevailed to the present time, of terminating the fast on no other day than on that of the Resurrection of Our Saviour, Synods and assemblies of bishops were held on this ac- count, and all with one consent through mutual corres- pondence drew up an ecclesiastical decree that the mystery of the Resurrection of the Lord should be cele- brated on no other day but the Sunday, and that we should observe the close of the paschal fast on that day only.” These words of the Father of Church History, followed by some extracts which he makes from the controversial letters of the time, tell us almost all that we know concerning the paschal controversy in its first phase. All an ecclesiastical historian is among the extracts just referred to, and this shows that the diversity of practice regarding Easter had existed at least from the time of Pope Sixtus (c. 120). Further, Irenæus states that St. Polycarp, who, like the other Asiatics, kept Easter on the fourteenth day of the moon, whatever day of the week that might be, followed this custom which he claimed to have de- rived from St. John the Apostle, came to Rome c. 150 about this very question, but could not be persuaded by Pope Anicetus to relinquish his Quartodeciman ob- servance. Nevertheless he was not debarred from communion with the Roman Church, and St. Irenæus, while condemning the Quartodeciman practice, never-
was the main difficulty which was decided by the Council of Nicea. Even among the Christians who calculated Easter for themselves there had been considerable variations (partly due to the difference of the lunar cycle adopted, partly to a divergent reckoning of the date of the equinox), and as recently as 314, in the Council of Arles, it had been laid down that in future Easter should be kept *una die et una temporae per annum orbetem*, and that to secure this uniformity the pope should send out letters to all the Churches. The Council of Nicea seems to have extended this rule, but not the provision of the Council of Alexandria; we have not its exact words, but we may safely infer from scattered notices that the council ruled: (1) That Easter must be celebrated by all throughout the world on the same Sunday; (2) that this Sunday must follow the fourteenth day of the paschal moon; (3) that this moon was to be accounted the paschal moon whose fourteenth day followed the spring equinox; (4) that some provision should be made, probably by the Church of Alexandria as best skilled in astronomical calculations, for determining the proper date of Easter and communicating it to the rest of the world (see St. Leo to the Emperor Marcian in Migne, P. L., LIV, 1053). This ruling of the Council of Nicea did not remove all difficulties nor at once win universal acceptance, and the Christians of Syria and Egypt, with the strongly worded canon i of the Council of Antioch (A. D. 341; see Hefele-Lcedere, "Concilios", I, 714), as also from the language of the Apostolic Constitutions and Canons (see Schmid, Osterfrage, p. 63), the Syrian bishops co-operated in carrying into effect the decision of the Council of Nicea. In Rome and Alexandria the lunar cycle by which this occurred remained, as the date of Easter was determined were not uniform. Rome, after the hundred-and-twelve-year cycle of Hippolytus, adopted an eighty-four-year cycle, but neither gave satisfactory results. Alexandria adhered to the more accurate nineteen-year cycle of Meton. But it seems to be clearly established by the most recent researches (see Schwartz, op. cit., pp. 28-29) that the lunar cycles were never understood to be more than aids towards ascertaining the correct date of Easter, also that where the calculations of Rome and Alexandria led to divergent results, compromises were made upon both sides and that the final decision always lay with accepted ecclesiastical authority.

The Easter Phase. — It was to the divergent cycles which Rome had successively adopted and rejected in its attempt to determine Easter more accurately that the third stage in the paschal controversy was mainly due. The Roman missionaries coming to England in the time of St. Gregory the Great found the British Christians, the representatives of that Christianity which had been introduced into Britain during the period of the Roman occupation, still adhering to an ancient system of Easter-computation which Rome itself had laid aside. The British and Irish Christians were not Quartodecimans, as some unwarrantably accused them of being, for they kept the Easter festival upon a Sunday. They are supposed (e. g. by Krusch) to have observed an eighty-four-year cycle and not the five-hundred-and-thirty-two-year cycle of Victorinus which was adopted in Gaul, being the only remaining adherent of the Easter cycle. And yet the imitator of the question (Schwartz, p. 103) declares it to be impossible to determine what system they followed and himself inclines to the opinion that they derived their rule for the determining of Easter direct from Asia Minor. (See, however, the very opposite conclusions of Joseph Schmid, "Die Ostertafelberechnung auf denbritischen Inseln", 1907.) The stop of this controversy, together with the difference in the shape of tuns and its relation to the question of the date of Easter, seems to have prevented all fraternization between the British Christians and the Roman missionaries, is told at length in the pages of Bede. The British appealed to the tradition of St. John, the Romans to that of St. Peter, both sides with little reason, and neither without the suspicion of forgery. It was not until the Synod of Whitby in 661 that the Christians of Northern Britain, who had derived their instruction in the Faith from the Scottish (i. e. Irish) missionaries, at last at the instance of Bishop Wilfrid and through the example of King Oswy accepted the Roman system and came into friendly relations with the bishops of the South. Even then in Ireland and in parts of the North some years passed before the adoption of the Roman system. The same generation of the British, Essays on the Origin, Doctrines and Discipline of the Early Irish Church, Dublin, 1864).

Points of Obscurity.—These are the facts regarding the Easter controversy which are now generally admitted. Many other subsidiary details have an important bearing on the ease but are more matters of conjecture. There is, for example, the perplexing question whether the Crucifixion of Christ took place on the fourteenth or fifteenth of Nisan. The Synoptists seem to favour the latter, St. John the earlier date. Clearly we should expect to find that according to the answer given to this question, the position of the earliest possible Easter Sunday in the lunar month would also change. Again, there is the problem, much debated by modern scholars, whether the Pasch was the only day of the Passion or the Resurrection of Christ. Upon this point also our data do not admit of a very positive answer. It has been very strongly urged that the writers of the first two centuries who speak of the Pasch have always in view the pascha strophion, the Crucifixion Day, when Jesus Christ Himself was offered as the Victim, the only type of the Pasch. Supporters of this opinion often contend that the Resurrection was held to be sufficiently commemorated by the weekly Sunday, on the vigil of which the night-watch was kept, the Liturgy being celebrated in the morning. In any case it must be admitted that while in the New Testament we have definite mention of the observance of the Pasch, or "Lord's day", there is no positive evidence in the first century or more of the keeping of the Pasch as a festival. Some are inclined to think that the Christian Easter first appears as setting a term to the great paschal fast which, as we learn from Irenæus, was very variously kept in the sub-Apostolic Age. Another class of obscure and rather intricate questions, about which it is difficult to speak positively, regards the limits of the paschal period, i.e. by the computation of Rome before the tables of Dionysius Exiguus and the Metonic cycle were finally adopted there in 525. According to one system Easter Day might fall between the fourteenth and twentieth inclusive of the paschal moon; and although this implies that when Easter fell on the fourteenth it coincided with the Jewish Pasch, the Roman Church, observing its eighty-four-year cycle, at one time permitted this (so at least Krusch contends; see "Der 84.-jahrige Ostercyclus und seine Quellen", pp. 20 and 65). Certain it is that the date of the supplication Romanae did not always agree with those of Alexandria, and in particular it seems that Rome, rejecting 22 March as the earliest possible date of Easter, only allowed the 23rd, while, on the other hand, the latest possible date was 21 April. This sometimes brought about an impasse which was relieved only by accepting the Alexandrian solution. Other computations allowed Easter to fall between the fifteenth and twenty-first day of the paschal moon and others between the sixteenth and the twenty-second.

What is perhaps most important to remember, both in the solution adopted in 525 and in that officially put forward at the time of the reform of the calendar by Gregory XIII, is that the Church throughout held that the determination of Easter was primarily a matter of ecclesiastical discipline and not of astronomical science. As Professor De Morgan long ago clearly
recognized, the moon according to which Easter is calculated is not the moon in the heavens nor even the moon we see, i.e., a moon travelling with the apparent motion of the real moon, but simply the moon of the calendar. This calendar moon is admittedly a fiction, though it departs very little from the actual astronomical facts; but in following the simple rule given for the dependence of Easter upon the moon of the calendar, uniformity is secured for all countries of the world. According to this rule, Easter Sunday is the first Sunday after the first full moon (or more accurately after the first fourteen day of the moon) following the 21st of March. As a result, the earliest possible date of Easter is 22 March, the latest 25 April.

The bibliography of this subject is vast, and most ecclesiastical historians devote a good deal of space to it. For practical purposes the text and notes of Hefele-Leclercq, Conciles, I, 133-151 and 140-148, supply all that is necessary; though Leclercq refers to the articles Comptu paschal and d'Archologie in the Dictionnaire

Among the more important contributions to the subject the following may be named: Krusch, Studien zur christlich-

The Easter question: a more or less schismatical division is recognized, i.e., a church which, while preserving, or at least professing, to be in communion with Rome, has been divided from Rome by a schism. This division has taken place, and is still taking place, in the various churches, Eastern and Western. The root of this division is, roughly and broadly speaking, the division of the Roman Empire made first by Diocletian (284-305), and again by the sons of Theodosius I (Arcadius in the East, 395-408; and Honorius in the West, 395-423), then finally made permanent by the establishment of a rival empire in the West (Charles the Great, 800). The division of the Eastern and Western Churches, then, in its origin corresponds to that of the empire. Western Churches are those that either gravitate around Rome or broke away from her at the Reformation. Eastern Churches depend originally on the Eastern Empire at Constantinople; they are those that either find their centre in the patriarchate of that city (since the centralization of the fourth century) or have been formed by schisms which in the first instance concerned Constantinople rather than the Western world. Another distinction, that can be applied only in the most general and broadest sense, is that of language. Western Christendom till the Reformation was Latin; even now the Protestant bodies still bear unmistakably the mark of their Latin ancestry. It was the great Latin Fathers and Scholastics, e.g., Augustine (d. 430) most of all, who built up the traditions of the West; in ritual and canon law the Latin or Roman school formed the West. In a still broader sense the East may be called Greek. True, many Eastern Churches know nothing of Greek; the oldest (Nestorians, Armenians, Abyssinians) have never used Greek liturgically nor for their literature; nevertheless they too depend in some sense on a Greek tradition. Whereas these Eastern Fathers have never even heard of our schoolmen or canonists, they still feel the influence of the Greek Fathers, their theology is still concerned about controversies carried on originally in Greek and settled by Greek synods. The literature of those that do not use Greek is formed on Greek models, is full of words carefully chosen or coined for its special purpose, and corresponds even of Greek derivatives. The root of the distinction, then, in the broadest terms, is that a Western Church is one originally dependent on Rome, whose traditions are Latin; an Eastern Church looks rather to Constantinople (either as a friend or an enemy) and inherits Greek ideas.

The point may be stated more scientifically by using the old division of the patriarchates. Originally (e.g. at the Council of Nicea, a.d. 325, can. vi) there were three patriarchates, those of Rome, Alexandria, and Antioch. Further legislation formed two more at the expense of Antioch: Constantinople in 381 and 451; Jerusalem in 415. In any case the Roman patriarchate was always enormously the greatest, and was, as it were, the standard of the Eastern Church. As the Romish Church took over Constantinople more or less (as the Roman patriarchate and all Churches that have broken away from it. All the others, with schismatical bodies formed from them, make up the Eastern half. But it must not be imagined that either half is in any sense one Church. The Latin half was so (in spite of a few unimportant schisms) till the Reformation. To find a time when there were two Churches and not lately the Anglican schism has created yet another; indeed it seems as if two more, in Cyprus and Syria, are being formed at the present moment (1908).

We have now a general criterion by which to answer the question: What is an Eastern Church? Looking at a map, we see that, roughly, the division between the Roman patriarchate and the rival empire runs down somewhere to the east of the River Vistula (Poland is Latin), then comes back above the Danube, to continue down the Adriatic Sea, and finally divides Africa west of Egypt. Illyricum (Macedonia and Greece) once belonged to the Roman patriarchate, and Greater Greece (Southern Italy and Sicily) was intermittently Byzantine. But both these lands eventually fell back into the branches that surrounded them (except for the thin remnant of the Uniat Italo-Greeks). We may, then, say that any ancient Church east of that line is an Eastern Church. To these we must add those formed by missionaries (especially Russians) from one of these Churches. Later Latin and Protestant missions have further complicated the tangled state of the ecclesiastical East. There appears everywhere belong of course to the Western portion.

II. Catalogue of the Eastern Churches.—It is now possible to draw up the list of bodies that answer to our definition. We have already noted that they are by no means all in communion with each other, nor have they any common basis of language, rite, or faith. All are covered by a division into the great Orthodox Church, those formed by the Nestorians and Monophysite heresies (the original Monothelites are now all Uniates), and lastly the Uniat Churches corresponding in each case to a schismatical body. Theologically, to Catholics, the vital distinction is between Catholic Uniates, on the one hand, and, schismatics or
heretics, on the other. But it is not convenient to start from this basis in cataloguing Eastern Churches. Historically and archaeologically, it is a secondary question. Each Uniat body has been formed from one of the schismatical ones; their organizations are comparatively late, dating in most cases from the sixteenth and seventeenth centuries. Moreover, although all these Uniates of course agree in the Catholic Faith that we profess, they are not organized as one body. Each branch keeps the rites (with in some cases modifications made at Rome for dogmatic reasons) of the corresponding schismatical body, and has an organization modelled on the same plan. In faith a Uniat Armenian, for instance, is joined to Uniat Chaldees and Copts, and has no more to do with Tatars or Armenians than with Nestorians or Abyssinians. Nor does he forget this fact. He knows quite well that he is a Catholic in union with the Pope of Rome, and that he is equally in union with every other Catholic. Nevertheless, national customs, languages, and rites tell very strongly on the superfcies, and our Uniat Armenian would certainly feel very much more at home in any non-Uniat church of his own nation than in the Uniat Church of another. Outwardly, the bond of a common language and common liturgy is often more apparent than what everyone knows to be the essential and radical division of a schism. Indeed these Uniat bodies in many cases still faintly reflect the divisions of their schismatical relations. What in one case is a schism (as for instance between the Catholic and Uniat Churches since the eleventh century) is in another schismatical, and the leaders of the Uniat Churches, as well as all their more intelligent members and all their well-wishers, earnestly strive to repress it. Nevertheless, quarrels between various Uniat bodies fill up too large a portion of Eastern Church history to be ignored; still, to take another instance, anyone who knows Syria knows that the friendship between Melkites and Maronites is not enthusiastic. It will be seen, then, that for purposes of tabulation we cannot conveniently begin by cataloguing the Catholic bodies on the one side and then classing the schismatics together on the other. We must arrange these Churches according to their basic division—larger and older schismatical Churches; then, side by side with each of these, the corresponding Uniat Church formed out of the schismatics in later times.

A. SCHISMATIC CHURCHES.

I. The first of the Eastern Churches in size and importance is the great Orthodox Church. This is, after that of the Catholics, the largest body in Christendom. The Orthodox Church now counts about a hundred millions of members. It is the main body of Eastern Christendom, that remained faithful to the decrees of Ephesus and Chalcedon when Nestorianism and Monophysitism cut away the national Churches in Syria and Egypt. It remained in union with the West till the great schism of Photius and his successors. Thus the Church of Constantinople is one of the oldest Churches in Christendom. In spite of the short-lived reunions made by the Second Council of Lyons (1274) and the Council of Florence (1439), this Church has been in schism ever since. The "Orthodox" (it is convenient as well as courteous to call them by the name they use as a technical one for themselves) originally comprised the four Eastern patriarchates: Alexandria and Antioch, then Constantinople and Jerusalem. But the balance between these four patriarchates was soon upset. The Church of Cyprus was taken away from Antioch and made autocephalous (i.e. extra-patriarchal) by the Council of Ephesus (431). Then, in the fifth century, came the great upheavals of Nestorianism and Monophysitism, of which the result was that enormous numbers of Syrians and Egyptians fell away into schism.

So the Patriarchs of Antioch, Jerusalem (this was always a very small and comparatively unimportant centre), and Alexandria, losing most of their subjects, inevitably sank in importance. The Moslem conquest of their lands completed their ruin, so that they became the merest shadows of what their predecessors had once been. Meanwhile Constantinople, honoured by the presence of the emperor, and always sure of his favour, rose rapidly in importance. Itself a new see, neither Apostolic nor primitive (the first Bishop of Byzantium was Metropolitan, in 325), it succeeded so well in its ambitious career that for a short time after the great Eastern schism it seemed as if the Patriarch of New Rome would take the same place over the Orthodox Church as did his rival the Pope of Old Rome over the Catholic one. For a while it was this insatiable ambition of Constantinople that was chiefly responsible for the schism of the ninth and eleventh centuries. The Turkish conquest, strangely enough, still further strengthened the power of the Byzantine patriarch, inasmuch as the Turks acknowledged him as the civil head of what they called the Roman nation" (Rum millet), meaning thereby the whole Orthodox Latin churches in Asia Minor. For about a century Constantinople enjoyed her power. The other patriarchs were content to be her vassals, many of them even came to spend their useless lives as ornamentals of the chief patriarch's court, while Cyrus protested faintly and ineffectually that she was subject to no patriarch. The bishop who had climbed to so high a place in the Church could not afford to be too small a factor in Constantinople.

II. It was the Russian czar Ivanovitch, declared the "Holy Synod"; while high over all looms the shadow of Russia. The separation of the various national Orthodox Churches from the patriarchate of Constantinople forms the only important chapter in the modern history of this body. The principle is always the same. More and more has the idea obtained that political modifications should be followed by the Church, that is to say that the Church of an independent State must be itself independent of the Church of the State. The czar of Russia by the end of the sixteenth century had reduced the See of Moscow into a Patriarchate, and after 1598, the state Church of Russia, and so for the eastern Christians, the Church of the Tsar. The czar St. Peter the Great abolished the Russian patriarchate (of Moscow) and set up a "Holy Governing Synod" to rule the national Church in 1721. The Holy Synod is simply a department of the government that controls the Church, and has as its leader the czar, and in case of his death or infirmity is usually as over his army and navy. The independence of Russia and its Holy Synod have since been copied by each Balkan State. But this independence does not mean schism. Its first announcement is naturally very distasteful to the patriarch and his court. He often begins by excommunicating the new national Church root and branch. But in each case he has been obliged to give in finally and to acknowledge one or more "Sister in Christ" in the Holy Synod that has displaced his authority. Only in the specially difficult and bitter case of the Bulgarian Church has a permanent schism resulted. Other causes have led to the establishment of a few other independent Churches, so that now the great Orthodox communion consists of sixteen independent Churches, each of which (except
that of the Bulgars) is recognized by, and in commun-
ion with, the others.

These Churches are (1) The Great Church, that is, the patriarhate of Constantinople that takes prece-
dence of the others. It enjoys Turkey in Europe (except where its jurisdiction is disputed by the Bul-
garian Exarch) and Asia Minor. Under the (Eccle-
siastical) Patriarch are seventy-four metropolitans and
twenty other bishops. Outside this territory the Patriarch of Constantinople has no jurisdiction. He
still has the position of civil head of the Roman Nation throughout the Turkish Empire, but still
must be regarded as including some sort of ecclesiastical jurisdiction—he is doing so at this
moment in Cyprus—but in modern times especially each attempt is at once met by the most pronounced
opposition on the part of the other patriarchs and
national Churches, who answer that they acknow-
ledge no head but Christ, no external authority but the
seven (Ecclesiastical) Patriarchs. The Ecumenical Patri-
arch, however, keeps the right of alone consecrating
the chrismon (myron) and sending it to the other Ortho-
doctrines, except in the cases of Russia and Ru-
mania, which prepare it themselves. Bulgaria gets
hers from Russia, Greece has already mooted the
question of consecrating her own myron, and there
seems no doubt that Antioch would do too when the
present archbishop is exchanged. So even this shadow
of authority is in a precarious state.

(2) Alexandria (covering all Egypt as far as it is
Orthodox) with only four metropolitans. (3) Anti-
och, extending over Syria from the Mediterranean to
the Euphrates as far as any Orthodox live so far East,
touching the Great Church along the frontier of Asia
Minor to the north and Palestine to the south, and
in the fourteen eighteenth-century, and two or three titular bishops who form the patriarchal curia.
(4) Jerusalem, consisting of Palestine, from Haifa to the Egyptian frontier, with thirteen metropolitans.
(5) Cyprus, the old autocephalous Church, with an archbishop [whereby succession (1908), after eight years, rends the whole
Orthodox world] and this,, Tithe, The Patriarch of
the new national Churches, arranged here according to
the date of their foundation, since they have no
precedence. (6) Russia (independent since 1559).
This is enormously the preponderating partner, about
eight times as great as all the others put together.
The Holy Synod consists of three metropolitans
(Kiev, Moscow, and Petersburg), the Exarch of Geor-
gia, and the Nuncio of the Holy See. The archbishop,
his metropolitan, and twelve metropolitans and two or three titular bishops who form the patriarchal curia.
(7) Carlovitz (1763), formed of Orthodox Serbs in
Hungary, with six suffragan sees. (8) Czernegora
(1765), the one independent diocese of the Black
Mountains. (9) The Church of Sinai, consisting of one
monastery recognized as independent of Jerusalem in
1782. The hegumenos is an archbishop. (10) The
Greek Church (1550): thirty-two sees under a Holy
Synod on the Russian model. (11) Herrnemstadt
(Nagy-Szeben, 1864), the Church of the Vlachs in
Hungary, with three sees. (12) The Bulgarian
Church under the exarch, who lives at Constantin-
ople, and is in Bulgaria eleven sees with a Holy
Synod. The exarch, however, claims jurisdiction
over all Bulgars anywhere (especially in Macedonia)
and has set up rival exarchiat metropolitans against
the patriarchist ones. The Bulgarian Church is rec-
ognized by the Porte and by Russia, but is excom-
uniate, since 1872, by the Great Church and is
considered heretical by all Greeks. (13) Czernov
(1851), the Bishop of the Vlachs, with one see. (14)
Servia (1879), the national Church of that
country, with five bishops and a Holy Synod. The
Serbs in Macedonia are now agitating to add two
more sees (Uskub and Monastir) to this Church, at the
further cost of Constantinople. (15) Rumania (1853),
again a national Church with a Holy Synod and eight
sees. (16) Herzegovina and Bosnia, organized since
the Austrian occupation (1550) as a practically in-
dependent Archdiocese with a vague recognition of Con-
stantinople as a sort of titular primacy. It has four sees.
This ends the list of allied bodies that make up the
Orthodox Church (see Fortescue, "Orthodox Eastern
Church", x, 273-357). Next come, in order of date,
the old heretical Eastern Churches.

2. The Nestorians are now only a pitiful remnant of
what was once an active Church. Long before the
heresy from which they have their name, there was a
flourishing Christian community in Chaldea and
Mesopotamia. According to their tradition it was
founded by Addai and Mari (Addaeus and Maris),
two of the seventy-two Disciples. The present Nestorians
count War Mari as the first Bishop of Ctesiphon and
predecessor of their patriarch. In any case this com-
pany was originally subject to the Patriarch of An-
tioch. As his vicar, the metropolitan of the twin-
cities of Seleucia and Ctesiphon (on either side of the
Tigris, north-east of Babylon) bore the title of
archbishops. One of these metropolitans was present
at the Council of Nicaea in 325. The great distance
of this Church from Antioch led in early times to a state
of semi-suffragan, and later, some semi-independent,
diocese. Already in the fourth century the Patriarch of Antioch waived his right of ordaining the
archbishops of Seleucia-Ctesiphon, and allowed him to
be ordained by his own suffragans. In view of the
great importance of the right of ordaining, as a sign of
jurisdiction throughout the East, this fact is impor-
tant. But this does not mean that Nestorians was
acknowledged or even claimed till after the
schism. In the fifth century the influence of the
famous Theodore of Mopsuestia and that of his school
at Edessa spread the heresy of Nestorius throughout
this extreme Eastern Church. Naturally, the later
Nestorians deny that their fathers accepted any new
doctrine at that time, and they claim that Nestorius
learned from them: rather than they from him ("Nes-
torius eos secutus est, non ipsi Nestorium"). Ebed-Jesu
of Nisibis, about 1300. Assemani, "Bibl. Orient.",
III, 1, 355). There may be truth in this. Theodore
and his school had certainly prepared the way for
Nestorius. In any case the rejection of the Council of
Ephesus (431) by these Christians in Chaldea and
Mesopotamia produced a schism between them and
the Church of Antioch. When Babaeus, himself a
Nestorian, became cathedral, in 498, there were prac-
tically no more Catholics in those parts. From
Ctesiphon the Faith had spread across the frontier into
Persia, even before that city was conquered by the
Persian king (224). The Persian Church, then,
always depended on Ctesiphon and shared its heresy.
From the fifth century this most remote of the East.
ern Churches has been cut off from the rest of Christen-
dom, and till modern times was the most separate and
forgotten community of all. Shut out from the Roman
Empire (Zeno closed the school of Edessa in 458), but,
for a time at least, protected by the Persian kings, the
Nestorian Church flourished around Ctesiphon, Nisibis
(where the school was reorganized), and elsewhere
throughout the whole of the Persian Empire. Nestorians occasionally
assumed the title of patriarch. The Church then
spread towards the East and sent missionaries to
India and even China. A Nestorian inscriptions of the
year 781 has been found at Singan Fu in China (J. Hef-
er, S.J., "Prolegomena zu einer neuen Ausgabe der
nestorianischen Inschrift von Singan Fu", in the "Ver-
handlungen des VII. internationalen Orientalistencon-
gress", Vienna, 1886, pp. 37 sqq.). Its greatest ex-
tent was in the welfth century, when twenty-five
metropolitans obeyed the Nestorian patriarch. But
since the end of the fourteenth century it has gradu-
ally sunk to a very small sect, first, because of a fierce
persecution by the Mongols (Timur Leng), and then through internal disputes and schisms. Two great schisms as to the patriarchal succession in the sixteenth century led to a reunion of part of the Nestorian Church with Rome, forming the Uniats Chaldean Church. At present there are about 150,000 Nestorians living chiefly in highlands west of Lake Urmia. They speak a modern dialect of Syriac (Maelean, "Grammar of the Dialects of Verneulac Syriac"), Cambridge, 1865; Noldeke, "Grammatik der neuzischen Sprache", 1869). The patriarchate descends from until the 4th century or from the family of Manna; each patriarch bears the name Simon (Mar Shimun) as a title. Ignoring the Second General Council, and of course, strongly opposed to the Third (Ephesus), they only acknowledge the First Nicene (325). They have a Creed of their own (Hahn, "Bibliothek der Sprache", p. 744). Formed from an old Antiochene Creed, which does not contain any trace of the particular heresy from which their Church is named. Indeed it is difficult to say how far any Nestorians now are conscious of the particular teaching condemned by the Council of Ephesians, though they still honour Nestorius, Theodore of Mopsuestia, and other undoubted heretics as saints and doctors. The patriarch rules over twelve other bishops (the list in Silly, "Elmam"), forming the higher hierarchy, consisting of the patriarch, metropolitan, bishops, chroepiscopi, archdeaconos, priests, deacons, subdeacons, and readers. There are also many monasteries. They use Syriac liturgically written in their own (Nestorian) form of the alphabet. The patriarch, who now generally calls himself "Patriarch of the East", resides at Kochar, a remote valley of the Kurdish mountains on the border of Persia and Turkey. He has an undefined political jurisdiction over his people, though he does not receive a benediction from the Sultan. In many ways this most remote Church stands alone; it has kept a number of curious and archaic customs (such as the perpetual abstinence of the patriarch, etc.) that separate it from other Eastern Churches almost as much as from those of the West. Lately the Archbishop of Canterbury's mission to the Nestorians has aroused a certain interest about them in England.

All the other separated Eastern Churches are formed by the other great heresy of the fourth century, Monophysism. There are first the national Churches of Egypt, Syria, and Armenia, the so-called Church of Egypt. Monophysism was in a special sense the national religion of Egypt. As an extreme opposition to Nestorianism, the Egyptians believed it to be the faith of their hero St. Cyril of Alexandria (d. 444). His successor, Dioscorus (445-53), was deposed and excommunicated by the Council of Chalcedon (451). From this time the Monophysite party gained ground very quickly among the Copts, and became popular once it became the expression of their national feeling against the Imperial (Melchite, or Melkite) garrison and government officials. Afterwards, at the Moslem invasion (641), the opposition was so strong that the native Egyptians threw in their lot with the conquerors against the Greeks. The two sides are still represented by being called Monophysites and the Orthodox party. The Monophysites are sometimes called Jacobites here as in Syria; but the old national name Copt (Gr. Αἰγυπτός) has become the regular one for their Church as well as for their nation. Their patriarch, with the title of Alexandria, succeeds Dioscurus and Timothy the Copt, a fanatical Monophysite. He lives at Cairo, ruling a large diocese (Silmiyag, p. 288) and about 500,000 subjects. For him, too, the law is perpetual abstinence. There are many monasteries. The Copts use their old language liturgically and have in it a number of liturgies all derived from the original Greek rite of Alexandria (St. Mark). But Coptic is a dead language, so much so that even most priests understand very little of it. They all speak Arabic, and their service books give an Arabic version of the text in parallel columns. This Church is, on the whole, in a poor state. The Copts are mostly felahene who live by tilling the ground, in a state of great poverty and ignorance. And the clergy share the same conditions. Lately there has been something of a revival among them, and certain rich Coptic merchants of Cairo have begun to found schools and seminaries and generally to promote education and such advantages among their nation. One of these is Gabriel Labib, who is editing their service books, promises to be a scholar of some distinction in questions of liturgy and archeology.

4. The Church of Abyssinia, or Ethiopia, always depended on Egypt. It was founded by St. Frumentius, who was ordained and sent by St. Athanasius in 326. So Abyssinia has always acknowledged the supremacy of the Patriarch of Alexandria and still considers its Church a daughter-church of the See of St. Mark. The same causes that made Egypt Monophysite affected Abyssinia equally. She naturally, almost inevitably, shared the schism of the mother Church. So Abyssinia is still Monophysite, and acknowledges the Coptic patriarch as her head. There is now only one bishop of Abyssinia, he is the Patriarch of Abyssinia (Our Father) and resides at Adeva (the old see was Axum). He is always a Coptic monk consecrated and sent by the Coptic patriarch. It does not seem, however, that there is now much communication between Cairo and Adeva, though the patriarch still has the right of deposing the Abuna. Abyssinia has about three million inhabitants, nearly all members of the national Church. Between the Abyssinian and the enormous number of priests, whom the Abuna ordains practically without any previous preparation or examination. The Abyssinians have liturgies, again, derived from those of Alexandria in the old (classical) form of their language. The Abyssinian Church, being the religion of a more than half barbarous people, cut off by the schism from relations with any other Christian body except the poor and backward Copts, is certainly the lowest representative of the great Christian family. The people have gradually mixed up Christianity with a number of pagan and magical elements, and are specially noted for strong Jewish tendencies (they circumcise and have on their altars a sort of Ark of the Covenant containing the Ten Commandments). Lately Russia has developed Abyssinians and has begun to undertake schemes for educating them, and, of course, at the same time, converting them to Orthodoxy.

5. The Jacobites are the Monophysites of Syria, here, too, chiefly out of political opposition to the imperial court, Monophysism spread quickly among the native population, and here, too, there was the same opposition between the Monophysite nation in the country and the Greek Melkites in the cities. Severus of Antioch (512-18) was an ardent Monophysite. After his death the Emperor Justinian (527-65) tried to cut off the succession by having all bishops suspect of heresy locked up in monasteries. But his wife Theodora was herself a Monophysite; she arranged the downfall of many members of that party, Theodore and James. It is from this James, called Zanzalos and Baradai (Jacob Baradai, that they have their name (Jagoba, "Jacobite"); it is sometimes used for any Monophysite anywhere, but has not almost been kept for the national Syrian Church. James found two Coptic bishops, who with him ordained a whole hierarchy, including one Sergius of Tella as Patriarch of Antioch. From this Sergius the Jacobite patriarchs descend. Historically, the Jacobites of Syria are the national Church of their country, as much as the Copts in Egypt; but they by no means form so exclusively the religion of the native popula-
tion. Syria never held together, was never so compact a unity as Egypt. We have seen that the Eastern Syrians expressed their national, anti-imperial feeling by adopting the extreme opposite heresy, Nestorianism, which, however, had the same advantage of not being the religion of Cesar and his court. Among the Western Syrians, too, there has always been a lack of cohesion. The old Manichee, the Monophysite theses (Antioch and Jerusalem) have been revived lately and nearly all the non-Uniat Thomas-Christs may be counted as Monophysites since the eighteenth century. But the Jacobite patriarch seems to have forgotten them, so that after 1751 they chose their own hierarchy and were an independent Church. In the nineteenth century, after they had been practically rediscovered by the English, the Jacobites in Syria tried to reassert authority over Malabar by sending out a metropolitan called Athanasius. Atha-

6. The Malabar Christians in India have had the strangest history of all these Eastern Churches. For, having been Nestorians, they have now veered round to the other extreme and have become Monophysites. We hear of Christian communities along the Malabar coast (in Southern India from Goa to Cape Comorin) as early as the sixth century (Silbermagl, op. cit., 317; see below). They have never been in communion with the Syrian patriarchs, and they conform to the laws of the Jacobite Church, baptize, fast, receive all sacraments and Christian burial. They are only under various names, and one every one knows that they still observe the old pagan rites in secret. There are about one hundred families of these people, still called Shamsisiq (people of the Sun).

7. The Armenian Church is the last and the most important of these Monophysite bodies. Although it agrees in faith with the Copts and Jacobites it is not in communion with them (a union arranged by a synod in 726 came to nothing) nor with any other Church in the world. This is a national Church in the strictest sense of all: except for the large Armenian Uniat body that forms the usual pendant, and for a very small Armenian Chalcedonian with the Armenian Catholicos, it has no members who are not Armenians. So in this case the name of the nation and of the religion are really the same. Only, since there are the Unias, it is necessary to distinguish whether an Armenian belongs to them or to the schismatic (Monophysite) Church. Because of this distinction it is usual to call the others Gregorian Armenians after St. Gregory the Illuminator, and to distinguish them from Uniat Armenians, who bear the name of the Uniat patriarch, Nerses, in the Synod of Duin, formally rejected the Council of Chalcedon. The schism became quite manifest in 552, when the primate, Abraham I, excommunicated the Church of Georgia, and all others who accepted the decrees of Chalcedon. From that time the national Armenian Church has been isolated from the rest of Christendom. But the continual attempts at reunion made by Catholic missionaries, however, have established a considerable body of Armenian Unias. The Armenians are a prolific and widespread race. They are found not only in Armenia, but scattered all over the Levant and in many cities of Europe and America. As they always bring their Church with them, it is a large and important community, second only to the Orthodox in size among Eastern Churches. There are about three mil-

EASTERN 234 EASTERN
lions of Gregorian Armenians. Among their bishops four have the title of patriarch. The first is the Patriarch of Etchmiadzin, who bears as a special title that of catholicos. Etchmiadzin is a monastery in the province of Erivan, between the Black and the Caspian Seas, near Mount Ararat (since 1828 Russian territory). It is the cradle of the race and their chief sanctuary. The catholicos is the head of the Armenian Church and to a great extent of his nation also. Before the Russian occupation of Erivan he had unlimited jurisdiction over all Gregorian Armenians and was something very like an Armenian pope. But since he sits under the shadow of Russia, and especially since the Russian Government has begun to interfere in his election and administration, the Armenians of Turkey have made themselves almost independent. The second rank belongs to the Patriarch of Constantinople. They have had a bishop at Constantinople since 1507. In 1461 Mohammed II gave this bishop the title of Patriarch of the Armenians, so as to rivet their loyalty to his capital and to form a millet (nation) on the same footing as the Roman millet (the Orthodox Church). This patriarch is the person responsible to the Porte for the Armenians in Turkey, and as such speaks in their name on all diplomatic occasions. They are kept by the use of archbishops from bysops by a honorary prerogative; and have an upper class of priests called Vartapeds, who are celibate and provide all the higher offices (bishops are always taken from their ranks). There are, of course, as in all Eastern Churches, many monks. In many ways the Armenian (Gregorian) Church has been influenced by Rome, so that they are among Eastern schismatists in the only case in which it may well be denied that they form a Unit Church. An Italo-Greek may best be defined as a member of the Roman patriarchate in Italy, Sicily, or Corsia, who, as a member of older arrangements, is still allowed to use the Byzantine Rite. With regard to the fundamental distinction of patriarchate, it must be noted that it is no longer purely geographical. A Latin in the East emerges as a Roman patriarchate as much as if he lived in the West; Latin missionaries everywhere and the new dioceses in Australia and America count as part of what was once the patriarchate of Western Europe. So also the Melkites in Leghorn, Marseilles, and Paris belong to the (Unit) Byzantine patriarchate, though, as foreigners, they are temporarily subject to Latin bishops. A short description of the Uniat Churches. The Eastern Churches before the schisms. They are entirely and uncompromisingly Catholic in their strictest sense of the word, quite as much as Latins. They accept the whole Catholic Faith and the authority of the pope as visible head of the Catholic Church, as did St. Athanasius, St. Basil, St. John Chrysostom. They do not belong to the pope's patriarchate, nor do they use his rite, any more than did the great saints of Eastern Christendom. They have their own rites and their own patriarchs, as had their fathers before the schism. Nor is there any idea of compromise or concession about this. The Catholic Church has never been identified with the Western patriarchate. The pope's position as patriarch is distinct from his papal rights as is his authority as local Bishop of Rome. It is no more necessary to belong to his patriarchate in order to acknowledge his supreme jurisdiction than it is necessary to have him for diocesan bishop. The Eastern Catholic Churches in union with the West have always been as much the ideal of the Church Universal as the Latin Church. If some of these Eastern Churches fall away from the schism, that is a misfortune which does not affect the others who remain faithful. If all fall away, the Eastern half of the Church disappears for a time as an actual fact; it remains as a theory and an ideal to be realized again as soon as they, or some of them, come back to union with Rome.
This is what has happened. There is at any rate no certain evidence of continuity from time before the schism in any of these Uniat Churches. Through the bad time, from the various schisms to the sixteenth and seventeenth centuries, there are traces, isolated cases, of bishops who have at least wished for reunion with the West; but it cannot be claimed that any considerable body of Eastern Christians have kept the union throughout. The Maronites think they have, but they are mistaken; the only real case is that of the Italo-Greeks (who have never been schismatic). Really the Uniat churches were formed by Catholic missionaries in those that seemed to be lacking of such organizations. And so as soon as any number of Eastern Christians were persuaded to reunite with the West, the situation that had existed before the schisms became an actual one again. They became Catholics; no one thought of asking them to become Latins. They were given bishops and patriarchs of their own as successors of the old Catholic Eastern bishops before the schism, and they became what all Eastern Christians had once been—Unians. That the Unians are comparatively small bodies is the unfortunate result of the fact that the majority of their countrymen prefer schism. Our missionaries would willingly make them larger. But, juridically, they stand exactly where all the East once stood, before the Greek schism, or any others for that matter. And they have as much right to exist and be respected as have Latins, or the great Catholic bishops in the East had during the first centuries. The idea of latinizing all Eastern Catholics, sometimes defended by people on our side whose zeal for uniformity is greater than their knowledge of the historical and juridical situation, is diametrically opposed to authority to the Catholic, united and ecclesiastical organization, and to the policy of all popes. Nor has it any hope of success. The East may become Catholic again; it will never be what it never has been—Latin.

1. The Byzantine Uniates are those who correspond to the Orthodox. They all use the same (Byzantine) Rite; but they are not all organized as one body. They form seven groups: (a) the Melkites in Syria and Egypt (about 110,000), under a Patriarch of Antioch who administers, and bears the titles of, Alexandria and Jerusalem too. They have eleven dioceses and use Arabic liturgically with fragments of Greek, though any of their priests may (and some do) celebrate entirely in Greek. The old name of Melkite is used for those of Chalcedon (and the imperial laws), as against the Jacobites and Uniates, is now used only for these Uniates. (b) There are a few hundred Uniates of this Rite in Greece and Turkey in Europe. They use Greek liturgically and depend on Latin delegates at Constantinople and Athens. (c) One Georgian congregation of Constantinople (last remnant of the old Georgian Church destroyed by Russia), who use their own language and obey the Latin Delegate. (d) The Ruthenians, of whom there are nearly four millions in Austria-Hungary and hidden still in corners of Russia. They use Old Slavonic. (e) The Bulgarian Uniates (about 13,000), under two vicars Apostolic, who also use Old Slavonic. (f) Rumanian Uniates (about a million and more) are recognized by Rome to live in Transylvania. They have four bishops and use their own language in the liturgy. (g) The Italo-Greeks, (about 50,000), a remnant of the old Church of Greater Greece. They are scattered about Calabria and Sicily, have a famous monastery near Rome (Grottaferrata) and colonies at Leghorn, Malta, Algiers, Marseilles, and Corsica, besides a church (St-Julien le Pauvre) in Paris. Uniates use Greek liturgically but, living as they do surrounded by Latins, they have considerably latinized their rites.

This completes the list of Byzantine Uniates, on whom it may be said that the chief want is organization among themselves. There has often been talk of restoring a Uniat (Melkite) Patriarch of Constantinople. It was said that Pope Leo XIII intended to arrange this before he died. If such a revival ever is made, the patriarch would have jurisdiction, or at least a primacy, over all Catholics of his Rite: in this way the scattered unities of Melkites in Syria, Ruthenians in Hungary, Italo-Greeks in Sicily, and so on, would be linked together as are all other Uniat Churches.

2. The Chaldees are Uniates from Nestorianism. In the sixteenth and seventeenth centuries a considerable number of Nestorians were persuaded to reunite with the Holy See. Since that time there has always been a Uniat Patriarch of the Chaldees, though several times the person so appointed fell away into schism again and had to be replaced by another. The Chaldees are said now to number about 70,000 souls (Silbernagl, op. cit., 354; but Werner, "Orbis Terr. Cath.", 166, gives the number as 33,000). Their primate lives at Mosul, having the title of Patriarch of Babylon. Under him are two archbishoprics and ten other sees. There are monasteries whose arrangements are very similar to those of the Nestorians. The liturgical books (in Syriac, slightly revised from the Nestorian ones) are printed by the Dominican Fathers. There depends on the Bull of Pius IX, "Reversurus" (12 July, 1867), published for the Armenians and extended to the Chaldees by another Bull, "Cum eclesiastica" (31 Aug., 1869). They have some students at the Propaganda College in Rome.

3. The Uniat Copts have had a vicar Apostolic since 1781. Before that (in 1412 and again in 1713) the Coptic patriarch had suffragans to Rome, but in neither case was the union of long duration. As the number of Catholics of this Rite has increased very considerably of late years, Leo XIII in 1890 restored the Uniat patriarchate. The patriarch lives at Cairo and rules over about 20,000 Catholic Copts.

4. The Abyssinians, too, had many relations with Rome in past times, and Latin missionaries built up a considerable Uniat Abyssinian Church. But repeated persecutions and banishment of Catholics prevented this community from becoming a permanent one with a regular hierarchy. Now that the Government is tolerant, some thousands of Abyssinians are Uniates. They have an Apostolic vicar at Keren. If there are not under the vicar of Keren, which is the See of the Abyssinians, but which is under a Uniat Abuna who should depend on the Uniat Coptic patriarch. Their liturgy, too, is at present in a state of disorganization. It seems that the Monophysite Abyssinian books will need a good deal of revision before they can be used by Catholics. Meanwhile the priests ordained for this rite have a translation of the Roman Mass in their own language, an arrangement that is not meant to be more than a temporary expedient.

5. The Catholic Syrian Church dates from 1781. At that time a number of Jacobite bishops, priests, and lay people, who had agreed to reunite with Rome, elected one Ignatius Girarve to succeed the dead Jacobite patriarch, George III. Girarve sent to Rome asking for recognition and a pallium, and all things to the pope's authority. But he was then deposed by those of his people who clung to Jacobitism, and a Jacobite patriarch was elected. From this time there have been two rival successions. In 1830 the Catholic Syrians were acknowledged by the Turkish Government as a separate millet. The Uniat patriarch lives at Beirut, most of his flock in Mesopotamia. Under him are nine monasteries, and six other bishops, five monasteries, and about 25,000 families.

6. There is also a Uniat Church of Malabar formed by the Synod of Diamper in 1599. This Church, too, has passed through stormy periods; quite lately, since
The Eastern Church, a new schism has been formed from it of about 30,000 people who are in communion with neither the Catholics, nor the Jacobites, nor the Nestorians, nor any one else at all. There are now about 200,000 Malabar Uniates under three vicars Apostolic (at Trichur, Changanacherry, and Ernakulam).

7. The **Uniat Armenians** are an important body numbering altogether about 130,000 souls (Silbernagl, 344). Like their Gregorian compatriots they are scattered about the Levant, and they have congregations in Austria and Italy. There have been several more or less temporary reunions of the Armenian Church since the fourteenth century, but in each case a rival Gregorian party set up rival patriarchs and bishops. The head of the Catholic Armenians is the Uniat Armenian Patriarch of Constantinople (since 1830), in whom is joined the patriarchate of Cilicia. He always takes the name Peter, and rules over three titular archbishops and fourteen sees, of which one is Alexandria and one Isphahan in Persia (Werner, 151; Silbernagl, 346). After much dispute he is now recognized by the Pope as the head of a separate *millet*, and he also represents before the Government all other Uniat bodies that have as yet no political organization. There are also many Uniat Armenians in Austria-Hungary who are subject in Transylvania to the Latin bishops, but in Galicia to the Armenian Archbishop of Lemberg. There is also Cilician Uniatism. The See of Artvin immediately subject to the pope.

The Mechitarists (founded by Mechitar of Sebaste in 1711) are an important element of Armenian Catholicism. They are monks who follow the Rule of St. Benedict and have monasteries at San Lazzaro outside Venice, at Vienna, and in many towns in the Balkans, Armenia, and Russia. They have missions all over the Levant, and their fathers and grandfathers were intrepid travelers and missionaries of the Eastern Church, especially in Persia, Armenia, and Persia and Mesopotamia. They have been active in the production of historical, liturgical, and theological works. Since 1869 all Armenian Catholic priests must be celibate.

8. Lastly, the **Maronite Church** is entirely Uniat. There is much dispute as to its origin and the reason of its separation from the Syrian national Church. It is certain that it was formed around monasteries in the Lebanon founded by a certain John Maro in the fourth century. In spite of the indifferent protests of all Maronites (Assemani, "Bibl. Orient.", II, 291 sqq.; J. Debs, Maronite Bishop of Beirut, "Les Maronites du Liban, leur constante persévérance dans la Foi catholique", etc.), there is no doubt that they were separated from the old See of Antioch by the fact that they were Monothelites. They were reunited to the Roman Church in the twelfth century, and then (after a period of wavering) since 1216, when their patriarch, Jeremiah II, made his definite submission, they have been unwaveringly faithful, alone among all Eastern Churches.

As in other cases, the Maronites, too, are allowed to keep their old organization and titles. Their head is the Maronite "Patriarch of Antioch and all the East", successor to Monothelite rivals of the old See of Antioch. Before, in the days of the original patriarchate (Duchesne, "Origines du culte chrétien", second ed., p. 65, note), he is also the civil head of his nation, although he has no *berat* from the sultan, and lives in a large palace at Bkerki in the Lebanon. He has under him nine sees and several titular bishops. There are many monasteries and colleges. The present law of the Maronite Church was drawn up by the great national council held in 1736 at the monastery of Our Lady of the Almond Trees (Deir Saida-lat-Luza), in the Lebanon. There are about 300,000 Maronites in the Lebanon and scattered along the Syrian coast. They also have colonies in Egypt and Cyprus, and numbers of them have lately begun to emigrate to America. They have a national college at Rome.

This completes the list of all the Eastern Churches, whether schismatical or Uniat.

In considering their general characteristics we must first of all again separate the Uniates from the others. Uniates are Catholics, and have as much right to be so treated as Latins. As far as faith and morals go they must be numbered with us; as far as the idea of an Eastern Church, which may seem to complete schism or a state of opposition to the Holy See, they repudiate it as strongly as we do. Nevertheless, their position is very important as being the result of relations between Rome and the East, and as showing the terms on which reunion between East and West is possible.

III. CHARACTERISTICS OF THE SCHISMATICAL EASTERN CHURCHES. The idea of a religiously and politically separate Eastern Church has been hereditary among them, and although many of them are bitterly opposed to the others, there are certain broad lines in which they may be classed together and contrasted with the West.

The first of these is their *national feeling*. In all these groups the Church is the nation; the vehemence and often intolerant ardour of what seems to be their religious conviction is always really national pride and national loyalty under the guise of theology. This strong national feeling is the natural result of their political circumstances. For centuries, since the first ages, various nations have lived side by side and have carried on bitter opposition against each other in the Levant. Syria, Egypt, Mesopotamia, and the Balkans have never had one homogeneous population in any of their religious parties. The question of nationality in these parts has been a question not of the soil, but of a community held together by its language, striving for supremacy with other communities. The Roman contest accentuated this. Rome and then Constantinople was always a foreign tyranny to Syrians and Egyptians. And already in the fourth century of the Christian Era they began to accentuate the distinction between native and alien races. They set up an anti-imperial form of religion, by which they could express their hatred for the Government. Such an attitude has characterized these nations ever since. Under the Turk, too, the only possible separate organization was and is an ecclesiastical one. The Turk even increased the confusion. He found a simple and convenient way of organizing the Christians by taking their religion and nationality. So the Turk recognizes each sect as an artificial nation (millet). The Orthodox Church became the "Roman nation" (*Rum millet*), inheriting the name of the old Empire. Then there were the "Armenian nation" (*Armeni millet*), the "Coptic nation", and so on. Blood has nothing to do with it. Any subject of the Porte who joins the Christian religion (at any time) recognizes the Government politically as the corenemical patriarch; a Jew who is converted by Armenians becomes an Armenian. True, the latest development of Turkish politics has modified this artificial system, and there have been during the nineteenth century repeated attempts to set up one great Ottoman nation. But the effect of centuries is too deeply rooted, and the opposition between Islam and Christianity in Turkey is such that it is impossible to make this possible. A Mohammedan in Turkey, whether Turk, Arab, or negro, is simply a Moslem, and a Christian is a Roman, or Armenian, or Maronite, etc. Our Western idea of separating politics from religion, of being on the one hand loyal citizens of our country and on the other, as a quite distinct thing, members of some Church, is unknown in the East. The *millet* is what matters; the *millet* is a religious, not a national idea. So obvious does this identification seem to them that till quite lately they applied it to us. A Catholic was (and still is to the more remote and ignorant people) a "French Christian", a Protestant an "English Christian"; in speaking French or Italian, Levantines constantly use the word *religion* for religion. Hence it is, also, that there are practically no conversions from one to another. Theology, dogma, or any kind of religious conviction counts for little or nothing. A man
keeps to his millet and hotly defends it, as we do to our fatherlands; for a Jacobite to turn Orthodox would be like a Frenchman turning German.

We have noted that religious discrimination counts for little. It is hard to say how much any of these bodies (Nestorian or Monophysite) are now even conscious of what was once the cardinal issue of their schism. The bishops and more educated clergy have no doubt a general and hazy idea of the question—Nestorians think that everyone else denies Christ's real manhood, Monophysites that all their opponents “divide Christ.” Little. It is the conviction that the doctrine of the physical problem; it is the conviction that one cannot believe is the faith of their fathers, the heroes of their “nation” who were persecuted by the other millet, as they are to-day (for there everyone thinks that everyone else persecutes his religion). Opposed to all these little millet (plural of millet) there looms, each decade mightier and more dangerous, the West, Europe, Frangistan (of which the United States, of course, forms part to them). Their lands are overrun with Frengis; Frengi schools tempt their young men, and Frengi churches, with eloquent sermons and attractive services, their women. They frequent the schools assiduously; for the Levantine has discovered that arithmetic, French, and physical science are useful helps to earning a good living. But to accept the Frangistaner in a church is a matter of course to them that we are Catholics or Protestants, these are our millet; but an Armenian, a Copt, a Nestorian does not become a Frengi. Against this barrier argument, quotation of Scripture, texts of Fathers, accounts of Church history, break in vain. Your opponent listens, is perhaps even mildly interested, and then goes about his business as before. Frangis are very clever and learned; but the Frangistaner is an Armenian, or whatever it may be. Sometimes whole bodies move (as Nestorian dioceses have lately begun to coquet with Russian Orthodoxy), and then every member moves too. One cleaves to one’s millet whatever it does. Certainly, if the heads of any body can be persuaded to accept reunion with Rome, the rank and file will make no difficulty, unless there be another party strong enough to proclaim that those heads have deserted the nation.

The second characteristic, a corollary of the first, is the intense conservatism of all these bodies. They cling fanatically to their rites, even to the smallest custom—because it is by these that the millet is held together. Liturgical language is the burning question in the Bulgar Church. Of course, in the question of the Eastern Church there are various millet—Bulgars, Vlachs, Serbs, Greeks, whose bond of union is the language used in church. So one understands the uproar made in Macedonia about language in the liturgy; the revolution among the Serbs of Uskub in 1896, when their new metropolitan celebrated in Greek (Orth, Eastern Church, 320); the ludicrous scandal at Monastir, in Macedonia, when they fought over a dead man’s body and set the whole town ablaze because some wanted him to be buried in Greek and some in Rumanian (op. cit., 339). The great and disastrous Bulgarian schism, the schism at Antioch, are simply questions of the nationality of the clergy and the language they use.

It follows then that the great difficulty in the way of reunion is the question of the nationality. Theology counts for very little. Creeds and arguments, even when people seem to make much of them, are really only shibboleths, convenient expressions of what they really care about—their nation. The question of nature and person in Christ, the Filioque in the Creed, azyme bread, and so on do not really stir the hearts of these racial schismatics; millet will not become a Frengi. Hence the importance of the Uniat Churches. Once for all these people will never become Latins, nor is there any reason why they should. The wisdom of the Holy See has always been to restore union, to insist on the Catholic Faith, and for the rest to leave each millet alone with its own native hierarchy, its own language, its own rites. When this is done we have a Uniat Church.

IV. Rome and the Eastern Churches.—The attempts at reunion date from after the schism of Michael Cerularius (1054). Before that Rome was little concerned about the older Nestorian and Monophysite schisms. The conversion of these people might well be left to their neighbours, the Catholics of the Eastern Empire. Naturally, in those days the Greeks set about this conversion in the most disastrous way they could imagine. The Greek Church of Alexandria that tried to convert them back along the most impossible line, by destroying their nationality and centralizing them under the patriarch of the imperial city. And the means used were, frankly and cruelly, persecution. Monophysite conventicles were broken up by imperial soldiers, Monophysite bishops banished or executed. Of course this confirmed their hatred of Cesar and Cesar’s religion. The East, before as well as after the great schism, did nothing towards pacifying the schismaticas at its gates. Only quite lately has Russia taken a more reasonable and conciliatory attitude towards Nestorians in Persia and Abyssinians, who are outside her political power. Her attitude towards people she can persecute may be seen in her attitude towards those with whom she is in joint possession. It was, in the first instance, with the Orthodoxy that Rome treated with a view to reunion. The Second Council of Lyons (1274) and the Council of Ferrara-Florence (1438–39) were the first efforts on a large scale. And at Florence were at least some representatives of all the other Eastern Churches; as a kind of supplement to the great affair of the Orthodox reunion with Rome. And in them were a considerable number of Unions were stable. Nevertheless they were, and they remain, important facts. They (the union of Florence especially) were preceded by elaborate discussions in which the attitudes of East and West, Orthodox and Catholic, were clearly compared. Every question was examined—the primacy, the Filioque, azyme bread, purgatory, celibacy, etc. The Council of Florence has not been forgotten in the East. It showed Eastern Christians what the conditions of reunion are, and it has left them always conscious that reunion is possible and is greatly desired by Rome. And on the other hand it remains always as an invaluable precedent for the Roman Court. The attitude of the Holy See at Florence was the only right one: to be quite unsympathetic to every compromise, to demand the earliest possible concession, no more than that possibly can be conceded. There is need of uniformity in rites or in canon law; as long as practices are not absolutely bad and immoral, each Church may work out its own development along its own lines. Customs that would not suit the West may suit the East very well; and we have no right to quarrel with such customs as long as they are not forced upon us. So, at Florence, in all these matters there was no attempt at changing the old order. Each Church was to keep its own liturgy and its own canon law as far as that was not incompatible with the Roman primacy, which is de jure. The very decree that proclaimed the primacy added the clause, that the pope guides and rules the whole Church of God “without prejudice to the observance of the rites of the Orient”. And the East was to keep its married clergy and its leavened bread, was not to say the Filioque in the Creed, nor use solid statues, nor do any of the things they resent as being Latin. This has been the attitude of Rome ever since. Many popes have published decrees, Encyclicals, Bulls that show they have really forgotten the Filioque. But Rome has by no means cut off from us by these schisms; in all these documents consistently the tone and attitude are the same. If there has been any latinizing movement among Uniates, it has sprung up among themselves; they have
occasionally been disposed to copy practices of the far richer and mightier Latin Church with which they are united. But all the Roman documents point the other way. If any Eastern customs have been discouraged or forbidden, it is because they were obviously abuses and immoral like the quasi-hereditary patriarchate of the Nestorians, or sheer paganism like the superstitions forbidden by the Maronite Synod of 1736. True, their liturgical books have been altered in places; true also that in the past these corrections were made sometimes by well-meaning officials of Propaganda whose liturgical knowledge was not equal to their pious zeal. But in this case, too, the criterion was not conformity with the Roman Rite, but purification from supposed errors and the introduction of what the Maronites use. The Maronite Rite is so latinated as to be due to its own clergy. It was the Maronites themselves who insisted on using our vestments, our azyme bread, our communion under one kind, till these things had to be recognized, because they were already ancient customs to them prescribed by the use of generations.

A short survey of papal documents relating to the Eastern Churches will make these points clear. Before Pius IX, the most important of these documents was Benedict XIV's Encyclical "Allata sunt" of 2 July, 1755. In it the pope is able to quote a long list of his predecessors who had already cared for the Eastern Churches and their rites. He mentions acts of Innocent III (1198-1216), Honorius III (1216-27), Innocent IV (1243-52), Alexander IV (1253-54), Gregory X (1271-76), Nicholas III (1277-80), Eugene IV (1343-47), Leo X (1513-21), Clement VII (1523-34), Pius IV (1559-65), all to this effect. Gregory XIII (1572-85) founded at Rome colleges for Greeks, Maronites, Armenians. In 1602 Clement VIII published a decree allowing Russian priests to celebrate their rite in Latin churches. In 1624 Urban VIII forbade the Latin College of Rome and of Pisa to receive Eastern churchmen, and in 1669, published the same order for Uniat Armenians (Allata sunt, 1). Benedict XIV not only quotes these examples of former popes, he confirms the same principle by new laws. In 1742 he had re-established the Russian Church with the Byzantine Rite after the national Council of Zamosc, confirming again the laws of Clement VIII in 1385. When the Council of Lyons I had approved the use of the Presanctified Liturgy in its Rite, Benedict XIV answered: "The ancient rubrics of the Greek Church must be kept unaltered, and your priests must be made to follow them" (Cardinal Ben. XIV, Tom. I). He ordains that Melkites who, for lack of a priest of their own Rite, had been baptized by a Latin, should not be considered as having changed to our Use: "We forbid absolutely that any Catholic Melkites who follow the Greek Rite should pass over to the Latin Rite" (ib., cap. xviii). The Encyclical "Allata sunt" forbids missionaries to convert schismatics to the Latin Rite; when they become Catholics they must join the corresponding Uniat Church (XI). In the Bull "Etsi pastoralis" (1742) the same pope orders that there shall be no decline in the use of the Rite, but that each prelate shall have rank according to the date of his ordination; in mixed dioceses, if the bishop is Latin (as in Southern Italy), he is to have at least one vicar-general of the other Rite (IX).

Most of all did the two last popes show their concern for Eastern Christendom. Each by a number of Acts carried on the tradition of conciliation towards the schismatical Churches and protection of Uniat Rites. Pius IX, in his Encyclical "In Suprema Petri" (Epiphany, 1848), again assures non-Uniates that "we will not change your liturgies, which indeed we greatly honour"; schismatic clergy who join the Catholic Church are to keep the same rank and position as they had before. In 1853 the Uniat Rumanians were given a bishop of their own Rite, and in the Allocution made on that occasion, as well as in the one to the Armenians on 2 February, 1854, he again insists on the same principle. In 1860 the Bulgars, disgusted with the Phanar (the Greeks of Constantinople), approached the Catholic Armenian patriarch, Hassan; he, and the pope confirming him, promised that there should be no latinating of their Rite. Pius IX founded, 6 January, 1862, a separate department for the Oriental Rites as a sort of special secretariat of Propaganda. Leo XIII in 1888 wrote a letter to the Armenians (Paterna charitas) in which he exhorts the Gregorian Pontiffs, always on the same terms. But his most important act, perhaps the most important of all documents of this kind, is the Encyclical "Orientalium dignitas ecclesiarum" (26 August, 1895), in which he views and confirms and approved all similar acts of his predecessors and then strengthened them by yet severer laws against any form of latinizing the East. The first part of the Encyclical quotes examples of the care of former popes for Eastern Rites, especially of Pius IX; Pope Leo remembers also what he himself has already done for the same cause: the foundation of colleges at Rome, Philippopolis, Adrianople, Athens, and St. Ann at Jerusalem. He again commands that in these colleges students should be exactly trained to observe their own rites. He praises these venerable Eastern liturgies as representing most ancient and sacred traditions, and quotes again the text that has been used so often for this purpose, circundata varietate supplied to the queen, who is the Church (Ps. xiv, 10). The Constitutions of Bennecourt should be in force, at least one who uses the same kind of bread. No length of use can prescribe a change of Rite. A woman in marrying may conform to her husband's Rite, but if she becomes a widow she must go back to her own.

In the Encyclical "Praedicta gratulationis", of 20 January, 1894, that has been often described as "Leo XIII's testament", he again turned to the Eastern Churches and invited them in the most courteous and the gentlest way to come back to communion with us. He assures schismatics that no great difference exists between their faith and ours, and repeats once more that he would provide for all their customs without narrowness. In an important letter to the Uniat Synod in Adrianople, he points out that he had no wish to interfere with the freedom of the Eastern rites. Leo XIII in his Allocution, after the now famous celebration of the Byzantine Liturgy in his presence on 12 February, 1908, again repeated the same declaration of respect for Eastern rites and customs and the same assurance of his intention to preserve them (Encyclical of November 10, 1908, 129-31). Indeed this spirit of conservatism with regard to liturgies is in our own time growing steadily at Rome with the increase of liturgical knowledge, so that there is reason to believe that whatever unintentional mistakes have been made in the past (chiefly with regard to the Maronite and Uniat Armenian rites) will now gradually be corrected, and that the tradition of the most entire acceptance and recognition of other rites
in the East will be maintained even more firmly than in the past.

On the other hand, in spite of occasional outbursts of anti-papist feeling on the part of the various chiefs of the Eastern Churches, the idea of a Christian unity is beginning to make itself seen very clearly in the East. In the first place, education and contact with Western Europe inevitably breaks down a great part of the old prejudice, jealousy, and fear of us. It was a Latin missionary who said lately: "They are finding out that we are neither so vicious nor so clever as they had thought." And with this intercourse grows a knowledge of the whole of Christendom, not by contact with the West. Once they realize that we do not want to eat them up, and that their mild are safe, whatever happens, they cannot but see the advantages we have to offer them. And with this feeling goes the gradual realization of something larger in the way of a Church than their own mild. Hitherto, it was difficult to say what the various Eastern schisms understood by the "Catholic Church" in the creed. The Orthodox certainly mean their own communion only ("Orth. Eastern Church"); 366–370; the other smaller bodies certainly hold that they alone have the true faith; every one else—especially Latin—is a heretic. So, presumably, for them, too, the Catholic Church is only their own body. But this is part of a more knowledge of the whole of Christendom, and a juster sense of perspective. The Nestorian who looks at a map of the world can hardly go on believing that his sect is the only and whole Church of Christ. And with the apprehension of larger issues there comes the first wish for union. For a Church consisting of mutually excommunicate bodies is a monotony that is rejected by everyone (except perhaps some Armenians) in the East.

The feeling out towards the West for help, and, perhaps eventually communion, is in the direction of Catholics, not of Protestants. Protestantism is too remote from all their theology, and its principles are too destructive of all their system for it to attract them. Harnack notes this of Russians: that their more friendly feeling towards the West tends Romeward, not in an Evangelical direction (Reden und Aufsätze, II, 279); it is at least equally true of other Eastern Churches. When the conviction has spread that they have everything to gain by becoming again members of a really universal Church, that union with Rome means all the advantages of Western Churches—ability and hand—and that their local position, and that, on the other hand, it leaves them the national and untouchable, un-latinized, and only the stronger for so powerful an alliance, then indeed the new shadowy and remote issues about nature and person in Christ, the entire artificial grievances of the Foliole, and our ayme bread will easily be buried in the dust that has gathered over them for centuries, and Eastern Christians may some day wake up and find that there is nothing to do but to register again a union that ought never to have been broken.

Schenck, Separate Churches.—Forteau, The Orthodox Eastern Church (London, 1907), and works mentioned in the bibliography.

G. E. HIND.

Easton, Adam, Cardinal, b. at Easton in Norfolk; d. at Rome, 15 Sept. (according to others, 20 Oct.), 1397. He joined the Benedictines and probably accompanied Archbishop Langham to Rome and, being a man of learning and ability, obtained a post in the Curia. He was made Cardinal-priest of the title of St. Cecilia by Urban VI, probably in Dec., 1381. On 7 March, 1384 or 1382, he was nominated Dean of York. In 1385 he was imprisoned by Urban on a charge of conspiring with five other cardinals against the pope and was deposed at Norwich, then archbishop, and deanery. The next pope, Boniface IX, restored his cardinalate 18 Dec., 1389, and for a time Easton returned to England, where he held a prebend in Salisbury cathedral, which he subsequently exchanged for the living of Heygham in Norwich. He wrote many works, none of which are extant, and is stated to have composed the Visitation of Our Lady, Lacioc, and the Papacy (London, 1882), I, viii; Cremona, L'opera dell'organo, vols. i. and ii; Poole in Diet. Nat. Bio., s. v.

EBBO

EBENDORFER

Returning to the synod at Thionville, Ebbo was deposed by the emperor and the assembled bishops and brought back as prisoner to the Abbey of Fulda. Somewhat later he was given in custody to Bishop Fréulf of Liseux and afterwards to Abbot Boso of Fl erroy. When Lothair became emperor, Ebbo was restored to the See of Reims, in December, 840, but a year later, when Charles the Bald invaded the north-eastern part of France, he was again driven from his see. Many had considered Ebbo’s reinstatement by Lothair unlawful, and Hincmar, who became Archbishop of Reims in 845, refused to recognize the ordinations administered by him after his reinstatement. The Council of Soissons (853) declared the ordinations invalid. There seems to be little doubt that the decisions of these 11th-century councils were in favor of the ecclesiastics ordained by Ebbo after his reinstatement. Ebbo found shelter at the court of Lothair, who gave him the incomes of several abbey and used him for various legations. In 841 Ebbo requested Pope Sergius II to restore him to the See of Reims but was admitted only to lay communion. A few other attempts to regain his former see were likewise unsuccessful.

When a serious attempt was made to remove the further see of Ebbo he discarded him, but Ebbo found a supporter in Louis the St. Pope, who appointed him Bishop of Hildesheim some time between April, 845, and October, 847. Ebbo is the author of the “Apologeticum Ebbonis”, a short apologetical narrative of his deposition and reinstatement. It is published in Mansi, “L’insanna e l’Apostolico Consilium”, XIV, 770–9, and in Migne, P. L., CXVI, 11–16.

E. MACPHERSON

EBBO (Eno), Archbishop of Reims, b. towards the end of the eighth century; d. 20 March, 851. Though born of German serfs, he was educated at the court of Charlemagne who gave him his liberty. After his elevation to the priesthood he became librarian of Louis the Debonnaire and was his counsellor in the government of Aquitaine. When Louis became emperor he appointed Ebbo archbishop of the vacant See of Reims in 816. Acting on the suggestion of the emperor, he went to Rome in 822, in order to obtain permission from Pope Paschal I to preach the Gospel to the Danes. The pope not only gave his sanction but also appointed Ebbo papal legate for the North. In company with the latter he went to Ireland, where he was made Bishop of Cambrai (817–831), and Willerich, Bishop of Bremen, he set out for Denmark in the spring of 823, and after preaching with some success during the following summer he returned to France in the autumn of the same year. Twice again he returned to Denmark, but each time his stay was of short duration and without any lasting effect on the pagan Danes whose Christianization was brought about a few years later by St. Ansgar. When, in 830, the sons of the emperor rose in rebellion against their father, Ebbo supported the emperor; but three years later he turned against him and on 13 November, 833, presided at the shameful scene enacted in the Church of St. Mary at Soissons, where the aged emperor was deposed, stripped of all his robes, and thrown into jail in the cell of the church near Paris, but was found out and sent as prisoner to the Abbey of Fulda. On 2 February, 835, he appeared at the Synod of Thionville, where in the presence of the emperor and forty-three bishops he solemnly declared the monarch innocent of the crimes of which he had accused him at Soissons, and on 28 February, 835, made a public recantation from the pulpit of the cathedral of Metz. between Frederick III and Albert of Brandenburg he tried to act as mediator but only fell into greater disfavor with Frederick. His last years were clouded by the disturbances of the years 1461–1463 during which time Austria was again in retreat. George of Podiebrad, king of Bohemia, from internal conflicts.

Eberdorfer is one of the most prominent chroniclers of the fifteenth century. His "Chronicon Austriace" is a dull but frank and very detailed history of Austria to 1463. From 1400 on it is an indispensable authority (ed. Pech in "Scriptores rerum Austriacarum", II, Leipzig, 1868–1872; this edition all of Book I and part of Book II were omitted). His account of the Council of Basle appears in the "Diarium gestorum concilii Basileensis pro reductione Bohemorum" (ed. Birk in Monumenta concilii Basileensis, Scriptores, I, Vienna, 1875, 701–783). He also wrote a history of the Roman emperors, "Chronica regum Romanorum". Books VI and VII, which are of independent value as sources, were edited by Pribram in the "Mitteilungen des Instituts für österreichische Geschichtsforschung", third supplementary volume (Innsbruck, 1890–94), 38–222. Many of his writings are as yet unedited, among them commentaries on Biblical books, sermons, "Liber de schismaticis", "Liber Pontificum Romanorum" (see Levimion), "Liber Eberhardus" and "Liber Pontificum" in "Mitteilungen des Instituts für österreichische Geschichtsforschung", XX, 1890, 69–99.

Eberhard, Matthias, Bishop of Trier, b. 15 Nov., 1815, at Trier (Germany), d. there 30 May, 1876. After successfully completing the gymnasium course of his native town, he devoted himself to the study of theology, was ordained in 1838, and soon after made assistant at St. Castor's in Coblenz. In 1842 Bishop Arnoldi made him his private secretary, and, at the end of the same year, professor of dogmatics in the seminary of Trier. From 1849 to 1862 he was director of the seminary and also preacher at the cathedral; in 1850 he became a member of the chapter; from 1852 to 1856 he was representative of his fel low-churchmen, later Chancellor of the Diocese, and so joined the Catholic section. On 7 April, 1862, he was proconsularized as auxiliary Bishop of Trier; after Arnoldi's death he was proposed for the episcopal see, but the Prussian Government acknowledged him only after the death of Arnoldi's successor, Feldgram, 16 July, 1867. Having chosen St. Charles Borromeo for his ideal, he spared no exertion, on the one hand, to make his clergy learned, zealous, devout, and thoroughly cultured, and on the other to cultivate a truly Christian and religious spirit in the people. To attain this double end, he bestowed very great care upon his seminary and demanded a conscientious observation of his rules on the pastoral conferences and the annual retreat. In the parishes he insisted on the instruction in the catechism giving it with special stress that religious associations were established, especially among the youths and men, and tried to find everywhere good libraries for the people. At the Vatican Council he appeared several times as a speaker; he belonged to the minority of the bishops, who considered the definition of the pope's infallibility as inopportunely introduced, but when the matter had been decided, he published the constitution at once. When, in the beginning of the seventies, the Prussian Government wished to fetter bishops and priests by its ecclesiastical-political legislation, Bishop Eberhard unflinchingly defended the rights of the Church and thus became one of the first victims of the so-called Kulturkampf. At first he was fined an exorbitant sum, but since he could not pay it, he was retained in the prison of Trier from 6 March to 31 December, 1874. New persecutions began after he had been dismissed; the florishing institutions which belonged to the Church were closed and the appointment of priests was made impossible; the grief at the unhappy condition of his diocese accelerated his death. He is the author of a dissertation "De tituli Sedis Apostolicae studioi normam usui antiquae et eis singulari" (Trier, 1846). His sermons, masterpiece of oratory, were edited after his death by Ditscheid in 6 vols. (Trier, 1877–1883; Freiburg, 1894–1903). Müller, Matthias Eberhard (Wurzburg, 1874); Kraft, Matthias Eberhard (Trier, 1878); Ditscheid, Matthias Eberhard in "Kulturkampf" (Trier, 1890).

Patricius Schlager.

Eberhard of Ratizbon (or Salzburg; also called Eberhardus Altamensis), a German chronicler who flourished about the beginning of the fourteenth century. Hardly anything is known of his life; only positive facts are obtained from documents of the years 1291–1305, which show that within this period he was active as a magister, Augustinian canon, and archdeacon. He is the author of a chronicle that begins with the election of Rudolf of Hapsburg and extends to 1305. He desired to give an account of Bavarian history only, but was unable to fully execute this intention. In reality he describes more or less fully events occurring in other parts of Germany, but this is not to him seem of importance. The value of the chronicle is increased by the greater detail with which he treats the last five years, and in this part are also added important letters which serve to make the narrative more life-like. There is no doubt that the work was influenced by Hermann, the celebrated Abbot of Niederaltaich, the founder of the new and brilliant period of annalistic writing and to whom is due a wonderful development in the art of historical writing in Bavaria during the latter half of the thirteenth century. The "Annales" of Eberhard were formerly held to be a direct continuation of Hermann's chronicle, but in the introduction to his edition of the "Annales" Jaffé has disproved this hypothesis. Eberhard's chronicle is rather a new and brilliant connected with its continuations (the so-called "Continuatio Altamensis" and the "Continuatio Ratiosropicensis") only by their occasional paraphrases of what Eberhard has said or by information they occasionally add to his statements. The earliest edition of the "Annales" is that of H. Canisius in his "Lectiones antique", I, 307–358. An improved edition was published by Bohner, "Fontes", II, 526–553, and another by Jaffé in "Mon. Germ. Hist. Scriptores", XVI, 592–605.

Patricius Schlager.

Ebonites. By this name were designated one or more early Christian sects infected with Judaistic errors.

The word Ebonites, or rather, more correctly, Ebonizans, Ebonizamus, is a translation of the Arabic NID4N, meaning "poor men". It first occurs in Irenæus, Adv. Haer., I., xxvi, 2, but without designation of meaning. Origen (C. Celsum, I., i, 14, 1; Pliny, IV, i, 22) and Eusebius (Hist. Eccl., III, xxvii) refer the name of these sectaries either to the poverty of their understanding, or to the poverty of the Law to which they clung, or to the poor opinions they held concerning Christ. This, however, is obviously not the historic origin of the name. Other writers, as Tertullian (De Præsc.., xxxi; De Carne (Crh., xiv, 18), Hippolytus (cfr. Pseudo-Tert., Adv.)
Hær., III, as reflecting Hippolytus’s lost “Syntagma”), and Epiphanius (Hist., xxxiv, 243), derive the name of the sect from its principal or presumed founder. Epiphanius even mentions the place of his birth, a hamlet called Cochabe in the district of Bashan, and relates that he travelled through Asia and even came to Rome. Of modern scholars Hilgenfeld has maintained the historical existence of this Ebion, mainly on the ground of some passages ascribed to Ebion by St. Jerome (Comm. in Gal., ii, 14), which he thought of as part of the authentic section against the Monothelites. But these passages are not likely to be genuine, and Ebion, otherwise unknown to history, is probably only an invention to account for the name Ebionites. The term may have been self-imposed by those who gladly claimed the beatitude of being poor in spirit, or who claimed to live after the pattern of the first Christians in Jerusalem, who laid their goods at the feet of the Apostles. Perhaps, however, it was first imposed by others and is to be connected with the notorious poverty of the Christians in Palestine (cf. Gal., ii, 10). Recent scholars have plausibly maintained that the term did not originally designate any heretical sect, but merely the orthodox Jewish Christians of Palestine who continued to observe the Mosaic Law, and who clung to the Jewish tradition within the bulk of the Christian world, who gradually have drifted away from the standard of orthodoxy and become formal heretics. A stage in this development is seen in St. Justin’s “Dialogue with Trypho the Jew,” chapter xvii (about a.d. 140), where he speaks of two sects of Jewish Christians estranged from the Church: those who observe the Mosaic Law, but do not require observance thereof from others; and those who hold it of universal obligation. The latter are considered heretical by all; but with the former St. Justin would hold communion, though not all Christians would show them the same indulgence. St. Justin, however, does not use the term Ebionites, and when this term first occurs (about a.d. 175) it designates only the sect of the Nazarenes.

The doctrines of this sect are said by Irenæus to be like those of Cerinthus and Carpocrates. They denied the Divinity and the virginal birth of Christ; they clung to the observance of the Jewish Law; they regarded St. Paul as an apostate, and only used a Gospel according to St. Matthew (Adv. Hær., I, xxvi, 2; III, xxi, 2; IV, xxxii, 4; V, i, 3). Their doctrine of the Mosaic Law is described by Tertullian (De carne Chr., xiv, 18), but their observance of the Law seems no longer so prominent a feature of their system as in the account given by Irenæus. Origen is the first (Cels., V, ixi) to mark a distinction between two classes of Ebionites, a distinction which Eusebius also gives (Hist. Eccl., III, xxvii). Some Ebionites accept, and others reject, the virginal birth of Christ, though all reject His pre-existence and His Divinity. Those who accepted the virginal birth seem to have had more exalted views concerning Christ and, besides observing the Sabbath, to have kept the Sunday as a memorial of His Resurrection. The milder sort of Ebionites were probably fewer and less important than their stricter brethren, because the denial of the virginal birth was commonly attributed to all. (Origen, Hom. in Lue., xviii.) St. Epiphanius calls the more heretical section Ebionites, and the more Catholic-minded, Nazarenes. But we do not know whence St. Epiphanius obtained his information or how far it is reliable. It is very hazardous, therefore, to maintain, as is sometimes done, that the distinction between Nazarenes and Ebionites goes back to the earliest days of Christianity.

Besides these merely Judaistic Ebionites, there existed a later Gnostic development of the same heresy. These Ebionite Gnostics differed widely from the main schools of Gnosticism, in that they absolutely rejected any distinction between Jehovah the Demiurge, and the Supreme Good God. Those who regard this distinction as essential accounted the Gnostics an object to classing Ebionites as Gnostics. But on the other hand the general character of their teaching is unmistakably Gnostic. This can be gathered from the Pseudo-Clementines and may be summed up as follows: Matter is eternal, and an emanation of the Deity; nay it constitutes, as it were, God’s body. Creation, therefore, is but the transformation of pre-existing material. God thus “creates” the Universe by the instrumentality of His wisdom which is described as a “divine hand” (χείρ δημιουργοῦσα) producing the world. But this Logos, or Sophia, does not constitute a different person, as in Christian theology. Sophia produces the world by a successive evolution of syzygies, the female in each case preceding the male but being finally overcome by him. This universe is, moreover, divided into two realms, that of good and that of evil. The Son of God rules over the realm of the good, and to him is given the world to come, but the Prince of Evil is the prince of this world (cf. John, xiv, 30; Eph., i, 21; vi, 12). This Son of God is the Christ, a middle-being between God and creation, not a creature, yet not equal to, nor inferior to, the Deity. In the midst of the Christian world, which was gradually divided away from the standard of orthodoxy and became formal heretics, a stage in this development is seen in St. Justin’s “Dialogue with Trypho the Jew,” chapter xvii (about a.d. 140), where he speaks of two sects of Jewish Christians estranged from the Church: those who observe the Mosaic Law, but do not require observance thereof from others; and those who hold it of universal obligation. The latter are considered heretical by all; but with the former St. Justin would hold communion, though not all Christians would show them the same indulgence. St. Justin, however, does not use the term Ebionites, and when this term first occurs (about a.d. 175) it designates only the sect of the Nazarenes.

The doctrines of this sect are said by Irenæus to be like those of Cerinthus and Carpocrates. They denied the Divinity and the virginal birth of Christ; they clung to the observance of the Jewish Law; they regarded St. Paul as an apostate, and only used a Gospel according to St. Matthew (Adv. Hær., I, xxvi, 2; III, xxi, 2; IV, xxxii, 4; V, i, 3). Their doctrine of the Mosaic Law is described by Tertullian (De carne Chr., xiv, 18), but their observance of the Law seems no longer so prominent a feature of their system as in the account given by Irenæus. Origen is the first (Cels., V, ixi) to mark a distinction between two classes of Ebionites, a distinction which Eusebius also gives (Hist. Eccl., III, xxvii). Some Ebionites accept, and others reject, the virginal birth of Christ, though all reject His pre-existence and His Divinity. Those who accepted the virginal birth seem to have had more exalted views concerning Christ and, besides observing the Sabbath, to have kept the Sunday as a memorial of His Resurrection. The milder sort of Ebionites were probably fewer and less important than their stricter brethren, because the denial of the virginal birth was commonly attributed to all. (Origen, Hom. in Lue., xviii.) St. Epiphanius calls the more heretical section Ebionites, and the more Catholic-minded, Nazarenes. But we do not know whence St. Epiphanius obtained his information or how far it is reliable. It is very hazardous, therefore, to maintain, as is sometimes done, that the distinction between Nazarenes and Ebionites goes back to the earliest days of Christianity.

Amongst the writings of the Ebionites must be mentioned (a) their Gospel. St. Irenæus only states that they used the Gospel of St. Matthew. Eusebius modifies this statement by speaking of the so-called Gospel according to the Hebrews, which was known to Hegesippus (Eus., Hist. Eccl., IV, xxvii, 8), Origen (Euseb., De vir., ill., ii), and Clem. Alex. (Strom., II, ix, 5). This Gospel is described by Eusebius as being Gnostic, Theosophic, and Judaistic, and forming part of the Hebrew original of St. Matthew, written in Hebrew characters. But St. Epiphanius attributes this to the Nazarenes, while the Ebionites proper only possessed an incomplete, falsified, and truncated copy thereof (Adv. Hær., xxix, 9). It is possibly identical with the Gospel of the Twelve.

(b) Their Apocrypha: “The Circuits of Peter” (περιοδοί Πέτρου) and Acts of the Apostles, amongst which the “Ascents of James” (ἀναβασθένια Ιακώβου). The first-named books are substantially contained in the Clementine Homilies under the title of Clement’s “Compendium of Peter’s itineraries’ sermons”, and also in the “Recognitions” ascribed to the same. They form an early Christian didactic novel to propagate Ebionite views, i.e. their Gnostic doctrines, the supremacy of James, their connexion with Rome, and their antagonism to Simon Magus. (See Clementines.)

(c) The Works of Symmachus, i.e. his translation of the Old Testament (see Versions of the Bible; Symmachus the Ebionite), and his “Hyponomata,” against the canonical Gospel of St. Matthew. The

(d) The book of Eclesiah, or of “The Hidden Power” (אכלייסיא), purporting to have been written about a.d. 100.
and brought to Rome about A.D. 217 by Alciati of Apanea. Those who accepted its doctrines and its new baptism were called Ebeneites. (Hipp., "Philos.", IX, xxi, f. 189; "Hery," v. ix, 12.)

Of the history of this sect hardly anything is known. They exerted only the slightest influence in the East, and none at all in the West, where they were known as Symmacchii. In St. Epiphanius' time small communities seem still to have existed in some hamlets of Syria and Palestine, but they were lost in obscurity. Farther east, in Babylonia and Persia, their influence is perhaps traceable among the Mandaeans, and it is suggested by Uhlhorn and others that they may be brought into connexion with the origin of Moham-

Uhlhorn in Realencyc. i. prof. Theol. (1898), s. vv. Ebion-

J. P. ARENDZEN.

Ebner, the name of two German mystics, whom historical research has shown to have been in no wise related.

(1) Christina, b. of a patrician family on Good Fri-

day, at Nuremberg, 1277; d. at Engelthal, 27 Decem-

ber, 1355. From her mother she inherited a deeply religious spirit, which early manifested itself in a fondness for prayer and mortification. Hardly had she made her First Communion when her parents acceded to a desire, which she had expressed since her seventh year, of entering the Dominican convent at Engelthal in the vicinity of Nuremberg. At the end of her year of novitiate she was stricken with a dangerous illness, which reappeared three times annually from her thir-

teenth to her twenty-third year. Each year, for the remainder of her life, she suffered a relapse of this mysterious sickness. Christina did not, however, on this account relax her penitential practices, nor fail in her duties as superior, to which she had been early elected. In her thirteenth year she began to enjoy frequent visits from the Master, from whose words she drew light and counsel for her own direction. As a result she was misunderstood by all save her con-

fessor, Father Konrad of Fussen, O.P., at whose com-

mand, in the Advent of 1317, she began to write a di-

ary of her spiritual experiences in chronological order. As a result of which she wrote her ten-volume autobi-

ography, in an unaffected manner the whole history of her life till 1317, this touching piece of mystical literature is car-

ried on till 1353. She speaks of herself in the third person as von dem menschen. Most of this diary was written by her own hand save when she dictated on account of illness. It is preserved, in a complete version of the fifteenth century, in a manuscript (cod. 90) at Nuremberg. Excerpts are to be found also at the same place (cod. 89, 91), at Stuttgart (cod. 90), and Medingen. We learn from this source that Christina played an important part by her prayers in the settlement of the difficulties arising from the riots at Nuremberg in 1318; from the earthquake of the same year; the Black Death; and the Franciscans' de-

nunciations of 1349; and the long quarrel between Louis the Bavarian and the Holy See. She also tells us of the absence of a director from the removal of Konrad to Freiburg in 1324 till 1351, when Henry of Nördlingen visited her and gave her advice sufficient for the remainder of her life. The treatise "Von der gemaden übelster" which the Stuttgart Literary Society edited of Christina's works, was published in 1859.

(2) Margaretha, b. of rich parents at Donauworth, 1291; d. 20 June, 1351. She received a thorough clas-

sical education in her home, and later entered the Dominican convent at Maria-Medingen near Dillingen,

where she was solemnly professed in 1306. In 1312 she was dangerously ill for three years, and sub-

sequently for a period of nearly seven years she was most of the time at the point of death. Hence she could exercise her desire for penance only by abstinence from wine, fruit, and other flesh. On her return from home, whether she had gone during the campaign of Louis the Bavarian, her nurse died, and Mar-

garetha grieved inconsolably, until Henry of Nördlingen assumed her spiritual direction in 1332. The corre-

spondence that passed between them is the first collection of this kind in the German language. At his command she wrote with the hand a full account of all her revelations and intercourse with the Infant Christ, as also all answers which she received from Him even in her sleep. This diary is preserved in a manu-

script of the year 1353 at Medingen. From her letters and diary we learn that she never abandoned her ad-

hesion to Louis the Bavarian, whose soul she learned in a vision had been saved.

Eschelabismus. See ABRAHAM ECHELAB.

Ecclesiarch. See SACHRANT.

Ecclesiastes (Sept. ἐκκλησιαστής, in St. Jerome also CONCIONATOR, "Preacher") is the name given to the book of Holy Scripture which usually follows the Proverbs; the Hebrew Qoheleth probably has the same meaning. The word preacher, however, is not meant to suggest a congregation nor a public speech, but only the solemn announcement of sublime truths (ъяπηζων, passive το)Lat. congregare, I (III K), viii, 1, 2, nπηζων, in publico, polum, Prov., v., 14; xxvi, 26; nπηζων to be taken either as a feminine participle, and would then be either a simple abstract noun, praecomnium, or in a poetical sense, tuba clangens, or must be taken as the name of a person, like the proper nouns of similar formation, Esd., ii, 55, 57; corresponding to its use, the word is always neuter, and a noun (Josephus). Solomon, as the herald of wisdom, proclaims the most serious teaching. His teaching may be divided as follows.

Introduction.—Everything human is vain (i, 1-11); for man, during his life on earth, is more transient than all things in nature (i, 1-7), whose unchangeable course he admires, but does not comprehend (i, 8-11).

Part I.—Vanity in all human life (i, 12-iii, 15); life is human wisdom (i, 12-18); vanity is pleasures and pomp (ii, 1-23). Then, rhetorically exaggerating, he draws the conclusion: "Is it not better to enjoy life's blessings which God has given, than to waste your strength useless?" (ii, 24-26). As epilogue to this part is added the proof that all things are im-

mutably predestined and are not subject to the will of man (iii, 1-15). In this first part, the reference to the writer himself, the self-accusation, on account of the excessive luxury described in 11 Kings, x, is placed in the foreground. Afterwards, the author usually prefixed his meditations with an "I saw", and explains what he has learned either by personal obser-

vation or by other means, and on what he has medi-

tated. Thus the exposition proceeds.

Part II.—Sheer vanity also in civil life (iii, 16-vi, 6). Vain and cheerless is life because of the iniquity which reigns in the halls of justice (iii, 16-22) as well as in the intercourse of men (iv, 1-3). The strong expressions
in iii, 18 sqq., and iv, 2 sqq., must be explained by the writer's tragic vein, and this does credit to the writer, who, speaking as Solomon, deplores bitterly what has often enough happened in his kingdom also, whether through his fault or without his knowledge. The despotic rule of the kings was described in advance by Samuel, and Solomon cannot be cleared of all guilt (see below). But even the best prince will, to his grief, find by experience that countless wrongs cannot be prevented in a large empire. Qoheleth does not speak of the despotic rule of the kings only, but of the kingship as such, of which others sustained. Another of life's vanities consists in the fact that mad competition leads many to fall into idleness (iv, 4–6); a third causes many a man through greed to shun society, or even to lose a throne because his unwisdom forbids him to seek the help of other men (iv, 7–16).

Qoheleth then turns once more to the three classes of men named: to those who groan under the weight of injustice, in order to exhort them not to sin against God by murmuring against Providence, for this would be tantamount to dishonouring God in His temple, or to breaking a sacred vow, or to denying Providence (iv, 17–v, 8); in the same way he gives a few salutary counsels to the miser (v, 9–19) and describes the misery of the supposed foolish king (vi, 1–6). A long oratorical amplification of these two themes is added (vi, 7–29). The inevitable predestination of all things by God must teach man contentment and modesty (vi, 7–vii, 1, Vulg.). A serious life, free from all frivolity, is best (vii, 2–7, Vulg.). Instead of passionate outbursts (vii, 8–15), he recommends a golden mean (vii, 16–23). Finally, Qoheleth inquires into the deepest and last reason of “vanity” and finds it in the fact that there is nothing that is taught in this life (vii, 24–30). This in his part, also, Qoheleth returns to his admonition to enjoy in peace and modesty the blessings granted by God, instead of giving oneself up to anger on account of wrongs endured, or to avarice, or to other vices (iii, 22; v, 17 sqq.; vii, 15).

Part III begins with the question: “Who is as the wise man?” (In the Vulg., these words have been wrongly placed in chap. vii.) Qoheleth here gives seven or eight important rules for life as the quintessence of true wisdom. Submit to God’s (“the king’s”) will (viii, 1–8). If you observe that there is no justice on earth, contain yourself, “eat and drink” (viii, 9–15). Do not attempt to solve all the riddles of life, for it is impossible, in the main, to understand the blessings of life and to work according to one’s strength, but always within the narrow limits set by God (viii, 16–ix, 12.—In the Vulg. ad aiust must be dropped). In this “singe” of your city (by God) seek help in true wisdom (ix, 13–x, 3). It is always most important not to lose your temper because of wrongs done to you (x, 4–15). Then follows the repetition of the advice not to give oneself up to idleness; cloth destroys countries and nations, therefore work diligently, but leave the success to God without murmuring (x, 16–xi, 6). Even amid the pleasures of life do not forget the Lord, but think of death and judgment (xi, 7–xii, 8).

The epilogue Qoheleth again lays stress upon his authority as the teacher of wisdom, and declares that the pith of his teachings is: Fear God and keep the Commandments; for that is the whole man.

In the above analysis, as must be expected, the writer of this article has been guided in some particulars by his conception of the difficult text before him, which he has set forth more completely in his comments (pp. 245–247). This explains the connexion of ideas at all. Zapletal regards the book as a collection of separate aphorisms which form a whole only exteriorly: Bickell thought that the arrangement of the parts had been totally destroyed at an early date; Siegfried supposed that the book had been supplemented and enlarged in strata; Luther assumed several authors. Most commentators do not expect that they can show a regular connexion of all the “sayings” and an orderly arrangement of the entire book. In the above analysis an attempt has been made to do this, and we have pointed out what means may lead to success. Several parts must be taken in the sense of parables, e.g. what is said in ix, 14 sqq., of the siege of a city by a king. And in viii, 2, and x, 20, “king” means God. It appears to me that iv, 17, is not to be taken literally, and the king’s imprisonment (v, 22 sqq.) is to be understood as a metaphor. It appears to me that iv, 17, is not to be taken literally, and the king’s imprisonment (v, 22 sqq.) is to be understood as a metaphor. Few will hesitate to take xi, 1 sqq., figuratively. Chap. xii must convince every one that bold allegories are quite in Qoheleth's style. Chap. iii would be very flat if the proposition, “There is a time for everything”, carried no deeper meaning than the words discourse at first sight. The strongest guarantee of the unity and sequence of thoughts in the book is the theme, “Vani tas vanitatum”, which emphatically opens it and is repeated again and again, and (xii, 8) with which it ends. Furthermore, the constant repetition of vidi or of similar expressions, which connect the arguments for the same truth; finally, the sameness of verbal and rhetorical turns and of the writer’s tragic vein, with its hyperbolical language, from beginning to end. In order to make the repetition of the same statements in the same book or what seem contradictions of manifest truths of the religious or moral order, ancient commentators assumed that Qoheleth expresses varying views in the form of a dialogue. Many modern commentators, on the other hand, have sought to remove these discrepancies by omitting parts of the text, in this way to obtain a harmonious collection of enigmas, from which we can evidently obtain the whole of the first woman, through which, against the will of God (30), misery entered the world (vii, 24–30). In this part, also, Qoheleth returns to his admonition to enjoy in peace and modesty the blessings granted by God, instead of giving oneself up to anger on account of wrongs endured, or to avarice, or to other vices (iii, 22; v, 17 sqq.; vii, 15).
29, Heb). Just as little does he contest the freedom of God's decrees, for God is spoken of as the source of all wisdom (ii, 26; v, 5). His views of life do not lead Qoheleth to stoical indifference or to blind hatred; on the contrary he shows the deepest sympathy with the misery of the suffering and earnestly deprecates opposition against God. In contentment with one's lot, in the quiet enjoyment of the blessings given by God, he discovers the gold of many experience: quietness and rest are the best of all. The man who prevents the vagaries of passion. Neither does he thereby recommend any kind of epicurism. For the ever-recurring phrase, "Eat and drink, for that is the best in this life", evidently is only a typical formula by which he recalls man from all kinds of excesses. He recommends not idle, but moderate enjoyment, accompanying the Lord, the true faith, and not the miseries of the wicked, in order to guard against the iniquity of others, or of his own passions; that God has shut him up within narrow limits, lest he become overweening, but that He does not deny him a small measure of happiness if he does not "seek things that are above him" (vi, I, Vulg.), if he enjoys what God has bestowed on him, in the fear of the Lord and in instituted order. The hope of a better life to come grows the stronger the less this life can satisfy man, especially the man of high endeavour. Now Qoheleth does not intend this doctrine for an individual or for one people, but for mankind, and he does not prove it from supernatural revelation, but from pure reason. This is his cosmopolitan standpoint, which Kuenen rightly recognized; unfortunately, this commentator inquires into the place and time of the composition in Hellenistic times. Nowack refuted him, but the universal application of the meditations contained therein, to every man who is guided by reason, is unmistakable.

The Author of the Book.—Most modern commentators are of the opinion that Qoheleth's style points not to Solomon, but to a later writer. About this the following may be said:—

(I) As a matter of fact, the language of this book differs widely from the language of the Proverbs. Some think that they have discovered many Aramaisms in it. What can we say on this point?—It cannot be gainsaid that Solomon and a great, if not the greatest, part of his people understood Aramaic. (We should not follow the moderns in regarding the Aramaic closely related to the Biblical Hebrew.) Abraham and Sara, as well as the wives of Isaac and Jacob, had come from Chaldea; it is therefore probable that the language of that country was preserved, beside the language of Palestine, in the family of the Patriarchs; at any rate, in Moses' time the people still used the Aramaic language in their daily affairs. So far as the Hellenistic time is concerned, Philo gives us the language of Hellenistic times. This is the language, the name of the miraculous food, however, remained ע_criteria. A large portion of David's and Solomon's empire was peopled by Arameans, so that Solomon reigned from the Euphrates to Gaza (I III K., v, 4, Heb.; II Sam. (K.), x, 19; cf. Gen., xv, 18). He was conversant with the speech of the "sons of the orient", as the book of the common language is called, which, besides the Hebrew, was also used among the Philistines. He is an author of books, for his speech, even in the case of a speech, is free from ambiguity. What Aramean speech, if reason or mere inelimination moved him. As a skilful writer, he may have intended, especially in his old age, and in a book whose style is partly oratorical, partly philosophical, partly poetical, to enrich the language by new turns. Goethe's language in the second part of "Faust" differs greatly from the first, and introduces many neologisms. Now Solomon seems to have had a more important reason for it. As it lay in his very character to remove the barriers between pagans and Israelites, he may have had the conscious intention to address in this book, one of his last, not only the Israelites but his whole people; the Arameaic colouring of his language, then, served as a means to introduce himself to Aramean readers, who, in their turn, understood Hebrew sufficiently. It is remarkable that the name of God, Jehovah, never-
which are shown to be Hebraic by clear proofs or manifest analogies from other books. There are hardly any unquestionable Aramaisms which can neither be found in other books nor regarded as Hebraisms, which perchance have survived only in Ecclesiastes (for a detailed demonstration cf. the present writer's Commentary, pp. 23-31). We repeat here Wele's words: "Only the language remains as the principal argument that it was written after Solomon; but how fallacious in such cases is the merely linguistic proof, need not be mentioned after what has been said."

It is alleged that the conditions as described in Ecclesiastes do not agree with the time and person of Solomon. They are, however, not inconsistent with the language of the book. Solomon, speaks of the oppression of the weak by the stronger, or one official by another, of the denial of right in the courts of justice (iii, 16; iv, 1; v, 7 sqq.; viii, 9 sqq.; x, 4 sqq.). Now many think that such things could not have happened in Solomon's realm. But it surely did not escape the wisdom of Solomon that oppression occurs at all times and with everybody; the glaring colours, bold thr, in which he describes them originate in the tragic tone of the whole book. Besides, Solomon himself was accused, after his death, of oppressing his people, and his son confirms the charge [I (III) K., xii, 4 and 14]; moreover, long before him, Samuel spoke of the despotism of the future kings [I Sam. (K.), viii, 11 sqq.]. Many miss in the books the presentisation of such a novel and urgent repentance of the king, or, on the other hand, wonder that he discloses the mistakes of his life so openly. But if these readers considered vii, 27-29, they could not help sharing Solomon's disgust at women's intrigues and their consequences; if obedience towards God is inculcated in various ways, and if this (xii, 13) is regarded as man's sole destination, the readers saw that the tale was for them to learn. It may be, in chap. ii, sensuality and luxury are condemned so vigorously that we may regard this passage as a sufficient expression of repentance. The openness, however, with which Solomon accuses himself only heightens the impression. This impression has at all times been so strong, precisely because it is the experienced, rich, and wise Solomon who is the narrator, and a mixture of many "vanity of vanities". Again, what Qoheleth says of himself and his wisdom in xii, 9 sqq., cannot sound strange if it comes from Solomon, especially since in this passage he makes the fear of the Lord the essence of wisdom. The passages iv, 13; viii, 10; ix, 13; x, 4, are considered by some as referring to historical persons, which seems to me incorrect; at any rate, indications of so general a nature do not necessarily point to definite events and persons. Other commentators think they have discovered traces of Greek philosophy in the book; Qoheleth appears to be now a sceptic, now a stoic, now an epicurean; but these traces of Hellenism, if existing at all, are nothing more than remote reminiscences too weak to serve as arguments. Cheyne (Job and Solomon) sufficiently refutes the view. The use of K. in v, 12, is a linguistic Gracism, has not been proved, because the common meaning of בָּשֶׂם יִשְׂרָאֵל is retained by many commentators; moreover, in 11 Sam. (K.), xii, 18 שֶׂרֶץ means "to be sorry"; the verb, therefore, has about the same force as if we translated בְּשֵׁמֶר סַרָּאת תָּם by ὑπό μισεῖν. As all the other internal proofs against the authorship of Solomon are not more convincing, we must listen to the voice of tradition, which has always attributed Ecclesiastes to him. The Jews doubted not its composition by Solomon, but objected to the reception, or rather retention, of the book in the canon; Hillel's School decided definitely for its canonicity and inspiration. In the Christian Church Theodoret of Mopsuestia and some others for a time obscured the tradition; all other witnesses previous to the sixteenth century favour the Solomonic authorship and the in-
The book itself bears testimony for Solomon, not only by the title, but by the whole tone of the discussion, as well as in i, 12; moreover, in xii, 9, Qoheleth is expressly called the author of many proverbs. The ancients never so much as suspected that here, as in the Book of Wisdom, Solomon only played a fictitious part. On the other hand, the attempt is made to prove that the details do not suit Solomon, and to contest his authorship with this single internal argument. The reasons adduced, however, are based upon textual explanations which are justly repudiated by others. Thus Hengstenberg sees (x, 10) in the king, "who is a child;" an allusion to the king of Persia; Gritz, to Herod the Idumean; Reuss rightly maintains that the king in all books of Solomon is written for Solomon, and general. From ix, 13—15, Hitzig concludes that the author lived about the year 200; Bernstein thinks this ridiculous and opines that some other historical event is alluded to. Hengstenberg regards this passage as nothing more than a parable; on this last view, also, the translation of the Septuagint is based (it has the subjective; ἤδη παρέχεσθαι, "there may come a king"). As a matter of fact, Qoheleth describes only what has happened or may happen somewhere "under the sun" or at some time; he does not speak of political situations, but of the experience of the individual; he has in view not his people alone, but mankind in general. If internal reasons are to decide the question of authorship, it seems to me that we might more justly prove genuine authorship up to man xvi, 31. From the remarkable passage about the snares of woman (vii, 27), a passage the bitterness of which is not surpassed by the warning of any ascetic; or from the insatiable thirst of Qoheleth for wisdom; or from his deep knowledge of men and the unusual force of his style. Considering everything we see no decisive reason to look for another author; on the other hand, which is all that has been advanced against this view are far more decisive reasons that the question of authorship is clearly discernible.

The time of the composition of our book is variously set down by the critics who deny the authorship of Solomon. Every period from Solomon to 200 has been suggested by them; there are even authorities who date it as late as 1500. But the historical evidence is conclusive. From the Masoretic text, we have the first mention of Solomon, the last qabbal (500 A.D.). Solomon was converted to God becomes highly probable. Then we also understand why his last book, or one of his last, consists of three thoughts: the vanity of earthly things, self-accusation, and emphatic admonition to obey the immutable decrees of Providence. The last was well suited to save the Israelites from despair, who were soon to behold the downfall of their power.

There is an unmistakable similarity between Ecclesiastes and the Canticle of Canticles, not only in the pithy shortness of the composition, but also in the emphatic repetition of words and phrases, in the boldness of the language, in the obscure construction of the whole, and in certain linguistic peculiarities (e.g. the use of the relative "who"). The loose succession of sententious thoughts, however, reminds us of the Book of Proverbs, whence the epilogue (xii, 9 sqq.) expressly refers to Qoheleth's skill in parables. In the old lists of Biblical books, the place of Ecclesiastes is between Proverbs and the Canticle of Canticles: Sept., Talmud (Bab. Bathra xiv, 2), Orig., Mel., Concil. Laodic., etc., also in the Vulgate. Its position is different only in the Masoretic Bible, but, as is generally admitted, for literary reasons.

As to the contents, the critics attack the passages referring to the judgment and immortality: iii, 17; xii, 9; xii, 7; furthermore the epilogue, xii, 9 sqq., especially verses 13, 14; also some other passages. Bickell expressed the opinion that the folios of the original, while being stitched, were deranged and completely confused; his hypothesis found few advocates, and Eunanger (M-roll, thirteenth century) maintained, in opposition to him, that books had not at that early date taken the place of rolls. There is not sufficient evidence to assume that the text was written in verse, as Zapiel does.

Owing to its literalism, the translation of the Septuagint is frequently unintelligible, and it seems that the translators used the correct Hebrew text of the LXX, and the Coptic translation follow the Septuagint. The Peshito, though translated from the Hebrew, is evidently also dependent on the text of the Septuagint. This text, with the notes of Origen, partly forms the Greek and Syriac Hexapla. The Vulgate is a skillful translation made by Jerome from the Hebrew and far superior to his translation from the Greek (in his commentary). Solomon is frequently mistaken (in vi, 9, he most likely wrote quid euisip, and in vii, 12, ex eo quod pecator). (See the remainants of the Hexapla of Origen in Field, Oxford, 1875; a paraphrase of the Greek text in St. Gregory Thaumaturgus, Migne, X, 987.) The Chaldean paraphrase is useful for controlling the Masoretic text; the Midrash Qoheleth is without value. The commentary of Olympiodorus is also serviceable (seventh century). M. Schlegel, "Quohelet," (Venice, 1811), and Ed. Reusch, "Qohelet," (Paris, 1866). A careful translation from the Hebrew was made about 1400 in the "Greca Veneta" (ed. Gebhardt, Leipzig, 1875).

In the Latin Church important commentaries were written, after the time of Jerome, on whom many depend, by Bonaventura Nicol., Lombardeis; etc., and by Fleury, and by Moretus, etc. I respect a later period, by Pinerus (seventeenth cent.), by Naldonatus, Cornelius a Lapide, and Bossuet.

Protestant commentaries: Zöckler, tr. Taylor (Edinburgh, 1837); Bullock's "A Critical Survey," (London, 1874); Cambridge Bible (1881); Wright (London, 1853); Leimbacher (Hamburg, 1892); Siegfried (Gottingen, 1898); Wildeber (Freiburg in Br., 1898).

G. Gietmann.

Ecclesiastical Art.—Before speaking in detail of the developments of Christian art from the beginning down to the present day, it seems natural to say something in regard to the vexed question as to the source of its inspiration. It would not be proper to refer to the literature on the subject which has been propounded, but the essentials of the controversy may be given in a few words. Afterwards there will be some mention of the principal works which Christian antiquity has left to us and a setting forth of the influence of the Catholic Church in stimulating and directing that artistic spirit which for so many centuries it has been developed and fostered.

Origin of Christian Art.—There has been much discussion of late years as to the influences which were predominant in the development of early Christian art. Professor Wickhoff in a striking essay (Roman Art, tr., 1900) has contended that in the first century after Christ a distinctively Roman style was evolved both in painting and sculpture, the salient features of which he characterizes as impressionist or "illusionist." He marks several stages in the growth of this
style, and claims for it especially the creation of what he calls the "continuous" method of composition, i.e. a method by which several successive stages of the same history are depicted together in a single painting. Further, he contends that this Roman style was adopted by the first Christian artists and that, though obscured and weakened, it pervaded the Roman world and maintained its identity throughout the Middle Ages, until eventually it quickened again into fuller life with the stimulus of the Renaissance. This view, an exaggeration of the Romanist hypothesis which long held the field, has been severely criticized by many competent authorities and notably by Strzygowski ("Orient oder Rom", 1901, and "Kleinasiens", 1903), who attributes the predominant influence in the development of Christian art to the recrudescence of purely Oriental feeling. This, as he maintains, had always survived at Byzantium, Antioch, and Alexandria, and it became operative once more when the Graeco-Roman artistic tradition at Rome had exhausted itself after the effort of a few centuries. Though Strzygowski may go too far when he claims that even the art of the Romanized provinces like Gaul came from the East direct and not through Rome, it seems highly probable that the art of his time was influenced in some degree by the art of the countries in the East. It is significant that Professor André Michel in the monumental "Histoire de l'Art" (1905—) distinctly lends his support to the theory that the Christian art of the Middle Ages was Byzantine rather than Roman in its origin. To Rome no doubt must be assigned the prevalence of the basilica type of church and the first effective conception of the world, while the seal was a hundred years after the invention of the seat of government by Honorius in 404 from Rome to Ravenna and the confusion that arose in the Western Roman Empire, had far-reaching consequences upon the development of art. If Rome was at all times the seat of the papacy, the vicars of Christ had not at this early date acquired any preponderating influence in the social and civil affairs of the West. The soul, to be sure, was pagan enough, but beginning with the seventh century, no less than thirteen pontiffs who occupied in succession the chair of St. Peter were of Greek or Syrian origin. But what is perhaps most important of all, the Latin stock who occupied what was once the great city, but what now became only a provincial town, were morally and intellectually effete. The motive power for a new development after the Reformation was furnished by the Teutonic tribes from the North, the energy of the Teutonic tribes of the North was full of latent possibilities for the arts of peace, when that energy was once diverted from the strenuous occupations of a time of war. Once again "Gracia capta ferum victorem cepit"; but it was Greece enriched this time with the inheritance of Antioch, Ephesus, and Alexandria, and the culture. Now travelled west and north found fortunately a more responsive soil than it had ever met with in Latium. In its adoption by Goths, Franks, and Saxons the art of Byzantium lost its rigidity, and something of its formalism. It was a living germ which soon developed an independent growth, and long before the Renaissance once more directed the minds of men to classic models; not only architecture, but decoration indeed, but it is only in a negative sense that it can be called Christian art, for while the abundant frescoes seen in the cemetery of Domitilla and notably in the cubilicum of Ambalclus exclude such pagan elements as would be uncanny, the character of the painting is in every respect the counterpart of the ornamentation of the contemporary private houses buried at Pompeii. There is nothing distinctively Christian. Perhaps the frequent recurrence of the vine as a principal element in the scheme of decoration may have been meant to suggest the thought of Christ, the true vine, but even this is doubtful. Symbolism occurs early, but it can only be recognized with confidence in the more public cemeteries of the second century, e. g. that of St. Calchas; here, under the influence of the "Donum Secretum", it is hardly wrong to recognize the true beginnings of a distinctively Christian art. No doubt this art in a most marked degree was imitative of the more decent forms of pagan decoration familiar at the period. It seems constantly to have been forgotten by those who discuss this subject that it was the deliberate object of the early Christians, during the ages of suspicion and persecution, to exclude from their places of sepulture all that would by its conspicuousness or strange- ness attract the notice of the casual pagan intruder. No wonder that the theme of the Good Shepherd is introduced again and again in the fresco decorations of the early catacombs. This is no indication, as rationalist critics have sometimes pretended, of the survival of the old national religious rite. It was the symbolic introduction of the beardless Good Shepherd to the type of the pagan Hermes Kriophorus—a likeness, which is never so exact as to lead to real confusion—constituted its recommendation to those who wished to hide their distinctive practices from the prying eyes of the people around them. In the same way the Orante, or praying figure, symbolical of the Church or the individual soul, might be the generalized form of the figure of Pietas, familiar enough to the ordinary Roman citizen, while the dove, which was to the Christian eloquent of the grace of the Holy Spirit, would not have been distinguished by his pagan neighbour from the birds consecrated to Venus. The deeper mysteries of the Eucharist and of the other sacraments were still more artfully veiled in the frescoes of those early centuries. No doubt a difficulty was to offer fatumfathar enough in all kinds of pagan decoration, but that very fact rendered it most suitable for the purpose of the Christian when he wished to symbolize the marvellous workings of Christ (Ἰερόν Χρωτός Θεος Τὸς Σωτήρ Ἰησοῦς, the fish) in the waters of baptism. What again was more common in decoration than some form of banqueting scene—a theme also often utilized by the painter to conceal his identity—the fresco of the walls of a sepulchral chamber had a far other and deeper significance for the Christian, who by some minute sign, the little cross, it may be, impressed upon the loaves, or the fishes which decked the frugal board, was quick to discern the reference to the life-giving mystery of the Blessed Eucharist. There are also human figures of Biblical scenes, especially those connected with the liturgy for the departed—for example, the miraculous restorations of Jonah and Daniel and Lazarus—and in one or two isolated instances we may perhaps recognize a presentiment of the Madonna; but the reference is always cryptic and only interpretable by the initiated. It was under these circumstances that the instinct of religious symbolism was developed in the art of those early Christian centuries still in its infancy, but the tradition thus created has never departed from true religious art throughout the ages.

With the triumph of the Church under Constantine the necessity for the sedulous hiding of the mysteries of the Faith in large measure disappeared. From A. D. 313 to the end of the fifth century was a period of transformation and development in Christian art, and it may be cautiously recognized upon the walls of the Roman catacombs. Biblical scenes abound, and the figure of Christ, no longer so frequently as the beardless Good Shepherd, but crowned with a nimbus and sitting or standing in the attitude of authority, is fearlessly introduced. The nimbus is also extended to
others beside Christ, for example to Our Lady and some of the saints. Sculpture again, though in the catacombs the traces it has left are relatively few, now for the first time becomes the helpmate in the service of the Church. This is the age of the great Christian sarcophagi so wonderfully decorated with the figures of Christ and His Apostles and with biblical scenes still full of symbolic meaning. The old ways of the period of persecution had, it is plain, become not only familiar but dear to the body of the faithful. The allegorical method of representing the mysteries of the Faith did not disappear at once. But though with the triumph of Constantine the outline of the “chrisme”, or the Greek monogram of Christ, was universally held in honour and introduced into all Christian monuments and even into the coinage, the Crucifixion of a Christian emblem was as yet practically unknown. For more than a century the memory of the Sacrifice of Calvary was recalled to the minds of the faithful only by some such device as that of a plain cross impressed with the figure of a lamb. The first representations of the figure of the Saviour nailed upon the Rood, as we see it upon the carved doors of Sta Sabina in Rome and in the Baptistery at Pisa, date back to the third or fourth century, but for a long period after that subject is very rarely found, and its occurrence in frescoes or mosaics is hardly recorded anywhere before the time of Justinian (527-565).

MOSAICS AND OTHER EARLY CHRISTIAN ARTS.—To find the beginning of the use of colour in the Roman Empire to anything like an important extent, we must look to the third or fourth century, when we find the frescoes composed of myriads of tessere and representing in a flat and somewhat uninteresting manner mystic beings, extraordinary animals, fruits, flowers, and designs. Between these Roman pavements and one branch of the earliest Christian art, that of mosaic, there is a close connection. It seems also possible that some of the early efforts of the mosaic workers, which are to be found in the decoration of gold on glass which have been discovered in the catacombs. Upon these glasses, dating from the third to the fifth century, are found representations of Christ and of the Apostles, as well as drawings in gold-leaf, partly symbolic and partly realistic, referring to the miracles of Christ, the emblems of the Seven Spirits, a future life, and the like. Having discovered such examples, and having judged them to be, as yet many of them show considerable beauty. The primitive Church included within itself, not only the poor and humble, but persons of distinction, rank, and attainment, and it is clear from an examination of these drawings that some were executed by those who were in possession of considerable artistic skill, and who had been trained in a knowledge of Greek and Roman art. Contemporaneous with these, and earlier, are frescoes painted upon the walls of the catacombs, including portraits of the Apostles and of Christ, representations of the martyrs, naive pictures of the scenes from Holy Writ, and simple illuminatory symbolism. Then, between the fourth and tenth centuries, there is a long series of mosaics, in which the best work appears of a sense of colour. A few specimens of these mosaics adorned the catacombs, afterwards they are found in the oratories and places of worship of the primitive Church. It was speedily recognized that mosaic decorations possessed certain strong claims to attention, such as other methods of decoration lacked. While the artist himself must be responsible for fresco work, very much of the labour in mosaic decoration could be left to persons of subordinate position, and once the artist had drawn out the pattern and scheme which was to cover, for instance, the apse of the church, the actual manual labour of fitting in the tesserae could be done by workmen; then, again, there was the quality of imperishability; the mosaic was permanent, an actual part of the structure which it decorated; it did not vary in colour by reason of light or atmosphere, and could be cleansed from time to time. It was also capable of strong, broad effects, rendering it peculiarly suitable to positions at the end of a building, somewhat above the line of sight, and its colour could be made so emphatic and so brilliant that the darkest of curves or hollows could be lit up by its luminous beauty. It is small wonder, therefore, that from the very earliest period the Church drew herself to the faithful workers in mosaic, and employed them, as can be seen by the wonderful remains at Ravenna, in Siély, on Mount Athos, near Constantinople, and notably at Rome, to decorate the interiors of the basilicas, and to portray upon their walls the emblems of the Divine tragedy, of the sufferings of Christ and of His saints, or to represent in hieratic script the Saviour’s name, or His glory, or in benediction, so that the scenes might be well in sight of all the worshippers within the little churches.

From the representation of single figures at the end of the church, the work speedily spread to more elaborate adornment of the walls, and from the simplicity of a single emblem, a single figure, the artistic spirit grew until the whole building was swept by the effect of the miracles and miracles of Christ, or spread long triumphant processions of virgins, Apostles, martyrs, along the walls of the aisles and transepts of the larger churches. There is no city in Europe in which this earliest Christian art can be so well studied as at Ravenna. The difficulty of approaching the place in its out-of-the-way position has done to it what time and the artistic spirit would not have done, and the artistic spirit has never been more remarkable in effect. Another circle of mosaic decorations in the same building represents the four Books of the Gospels open upon four altars, and between them four thrones of dominion with crosses; these mosaics have never been restored, and are in the condition in which their makers left them. The huge font intended for baptism by immersion, which stands before them, and the mosaic decoration, is of the first order; the inscription of dedication with its date still exists on the metal cross surmounting the building. In the chapel of the archbishop in the archiepiscopal palace are mosaics of the fifth century made during the reign of Archbishop St. Peter Chrysologus, while in the tomb of the Empress Gallia Placidia are mosaic decorations of her period; unfortunately, many of these latter works have been restored. The very finest mosaics in Ravenna, however, relate to the great heresy of Arianism. In the time of Theodoric, the old heresy was beginning once more to make itself felt. Arians had long been dead, Athanasius had fought his courageous battle against the Arian heresy, the Councils of Nicea and Constantinople had been held, and had pronounced against it, in which the Church had been confirmed, so that within the Church the heresy could no longer exist, but outside the Catholic Church there were still those who accepted it. When Theodoric, King of the Ostrogoths, came into power, Arianism became once more a force to be reckoned with, and the emperor erected a cathedral and a baptistery at Ravenna for his Arian bishop. It is in the church now called Sant’ Apollinare Nuovo, which was new more than a thousand years ago, that the great rhythmic array of saints and virgins alluded to above exists, the greater part of it as it was when Theodoric erected the church four centuries ago. In the baptistery of the Arians, near by, the mosaics upon the roof were put in place practically after the baptistery became Catholic, and therefore date from about 550. It is not only, however, in mosaics, that Ravenna
illuminates the early art of the Church; one of its great treasures, the ivory chair of St. Maximianus (546-550), made in the first half of the sixth century, has been in the city since it was first carved, with the exception of a very short time when it was carried to Venice in 1001. It is perhaps the finest example in existence of such ivory carving, and was the work of Oriental craftsmen, who entered into the service of the Church and carved this chair with its delicate and beautiful illustrations of the miracles of Christ and the history of Joseph. The same city can illustrate other branches of applied art, for the orphreys and textile fabrics made for San Giovanni in the fifth century, the sixth-century altar-cross of the archbishop, St. Agnellus (552-563), the porphyry of his cathedral chair, are still preserved in the cathedral, while the art of carving in marble of the same period is exceedingly well exemplified by the splendid stone sarcophagi existing in various churches of the city. Following the time of Theodoric, the rule of the Emperor Justinian (527-565), and the episcopate of St. Ecclesiastical (523-534), while the mosaic decoration in the church of San Vitale, done in the early and middle part of the sixth century, illustrate the change from Arian heresy to Catholic truth, and the exquisite beauty of the mosaic work the Church was able to make use of at that time. A little journey outside Ravenna to the church of Sant' Apollinare in Classe will enable the student to bring his study of ecclesiastical art into contact with actual mosaics done in an early period, as in that church there is the great mosaics erected by Archbishop Reparatus c. 671, the carved throne of St. Damianus (688-705), and the sarcophagi of various archbishops, extending in date to the end of the seventh century, and bearing religious emblems of very considerable importance. Attention should also be drawn to the pictures on unprepared linen cloth, executed in a rather laboured style, a young man, another in Genoa, a third in the church of San Silvestro in Rome, and others in various European shrines. The metal work executed during the Ostrogothic occupation of Italy was often work commissioned by the Church for use in the ceremonial of the service, and figures of Christ and of the saints, ornaments for copes, chasses in which to put relics, and vessels for use at the altar, belonging to this period of primitive art, are the direct result of the teaching of the Church. As, however, the religious feeling spread more and more, the desire arose among Christians to have artistic representations of the great events of the Faith in their houses, and it is possible that the beginnings of what we may term portable pictorial art arose in this way. In the earlier periods of the Eastern and Byzantine character, some of which are actually ascribed to the hand of the Apostle St. Luke himself, may very likely have been executed, not entirely as decorations for the Church, but that the wealthier members of the community, at least, might have in their houses, in the privacy of their own oratories, some cherished representation of the Man of Sorrows Himself, or some saint or saintess from whom the owner was named, or towards whom he had some particular affection. In this way may perhaps be traced the beginning of the history of the icons, which are so important a feature in the life of the Eastern Church, and which adorn every house, in many cases being found in all the rooms occupied by the various members of the family.

Ecclesiastical Art in the Middle Ages.—Leaving primitive times, the period of the Middle Ages is one of enormous artistic importance, and it is an era in which the influence of the Church is practically paramount. To this period there does not belong any very long series of artistic objects relating exclusively to domestic life. There were, of course, articles of domestic interest marked by artistic skill, there were objects of personal decoration, and appliances for use in the home; but the choicest talent and the efforts of the most supreme genius were almost invariably given to the work of the Church, and even where the commissions related to domestic ornamentation, there was generally a religious element in the decorations and the use of religious symbols. To this period belong the magnificent manuscripts, and paintings and sculpture, and the glass and enamels, and metal work. There are the tall prickets candlesticks, superb chasses and reliquaries, altar-crosses, crosiers, shrines, censers and incense boats, crucifixes, morses for cope, and medallions for sacred vessels, tripod censers and polypytches for use on the altar, plaques for book-covers, especially for the adornment of the Book of the Gospels, croziers, basins, chalices, and book-binding in metal engraved with jewels. The very first British enamels were merely a kind of coarse decoration, applied to the adornment of shields and helmets, but later on to cups, vases, and drinking-vessels, but, when mention is made of the Ardagh Chalice and the Alfred Jewel, it will be realized that a period in enamel work has been reached when the Church laid its hand upon the craft. Concerning the choicest examples of Irish, German, and English work, it may be said that broadly stated the most probable theory is that it was the ornament applied to the head of an ivory pointer used by the deacon when reading the Book of the Gospels, and that therefore this exquisite object now in the Ashmolean Museum at Oxford is one of the earliest examples of ecclesiastical enamel work. The Ardagh Chalice, of translucent enamels on silver and gold, and the German group of Irish shrines, reliquary, and missal-covers, crosiers, and crosses, similarly decorated, and it would appear likely that these Irish or Celtic enamels, of which half a dozen adorn the altar of Sant’ Ambrogio in Milan, are perhaps among the earliest existing examples of the art in connexion with ecclesiastical possessions. In the first part of the eleventh century, Byzantium began to lose its lead over the rest of Europe, and the work of ecclesiastical enamelling, and the pectoral cross in the South Kensington Museum may be taken as an example of early Byzantine work. The art of the enameller was also in existence in Germany at an early date, and here also was applied exclusively to ecclesiastical objects. Towards the middle of the twelfth century the workers of Limoges came into prominence, and from that time down to the end of the sixteenth Limoges was the centre of production. In Italian enamelling, the wonderful translucent reliquary, dated 1385, the work of Ugolino of Siena, in which is preserved the great relic of the Holy Corporal at Orvieto, is a masterpiece of the craft. The altar-frontal at Pistoja belongs to about the same period, and a little later comes the marvellous reliquary or reliquary, the work of the whole of the fourteenth and fifteenth centuries the enamellers were kept hard at work in Italy producing objects intended for Church work in two or three distinct processes, either that called champlevé, or another method, that of floating transparent enamels, known by the name of basse-taille, or still another process called encrusting. At the end of the fourteenth century, and the beginning of the sixteenth, in the early part of the Renaissance, the art left Italy, and, taking a new form, that of painted enamels, or more strictly, painting in enamels, had a renaissance in France, in the very same place, Limoges, in which the old enamels had been produced.

In another division of applied art are the remarkable embroideries which adorned all the sacred vestments, representing, in the most wonderful pictorial
effect, groups of saints, sacred scenes, and religious symbols. On the chasubles, copes, albs, stoles, mantles, burses, veils, mitres, frontals, super-frontals, and altar-covers, palls, bags, and panels of that period, are to be seen triumphs of artistic excellence, worked with exceeding beauty, and with a glorious richness of colour, by the hands of the faithful women of the day and designed by the men of supreme genius whom the Church had attracted to her side. Some of the very finest of this embroidery work was English, and references are found to the dignity of English embroidery before the end of the seventh century, as, St. Alhelmi, Bishop of Sherborne, entitled his home to the title of Abbey of St. Alhelmi for the sake of its embroidery, and the most remarkable of these workrooms in the Abbey of St. Albans. Indeed, at one time, rather too much attention in the convents for women seems to have been given to this fascinating needlework, for a council held in 747 recommended that the reading of books and psalm-singing by the nuns should receive greater attention, and that not quite so many hours should be spent in needlework. As early as 853, the Anglo-Saxon King Ethelwulf, when journeying to Rome took with him as presents silken vestments richly embroidered in gold, executed in his own country, and there are fragments of a stole and mantle, found in the tomb of St. Cuthbert (d. 687), which were produced under the auspices of the wife of Edward the Elder in 916 and placed in the sixteenth century. One might almost imagine that in the sixteenth century there was a constant demand for the work of the skilled embroideresses, and this section of art, so particularly suitable to ecclesiastical purposes, was one of perennial richness. It is well that some stress should be laid upon the question of embroidery, inasmuch as in the Middle Ages it was almost exclusively a branch of ecclesiastical art, and newly formed churches were richly embroidered with fine embroidery, especially in fine English embroidery previous to the fifteenth century, was executed for the Church. Enormous labour was given to the production of these beautiful vestments, and as an example it may be mentioned that a frontal presented to the Abbey of Westminster in 1271 took the whole labour of sixty persons and nine months to complete. Lincoln Cathedral in the fourteenth century possessed over six hundred vestments in its sacristy, while the Abbey of Westminster had nearly double as many, and even the English churches were far behind those of Spain in the sumptuous manner in which they were supplied with vestments. There was therefore every possible necessity for the craftsmen and men of skill who brought into being during the fourteenth and fifteenth centuries than has this one of embroidery. Fortunately, a sufficient number of the old vestments have come down to the present day to give a satisfactory idea of their importance and beauty, and the records and inventories of church goods prior to the sixteenth century afford still further information concerning this branch of art. The spirit of devotion which has ever given the instinct to decorate the house of God with the very finest works of which man is capable led to this lavish display of artistic genius in the service of the Catholic Church, but it must also be borne in mind that there were other, subordinate causes to account for the work. The Church, following the example of the Eastern Church, continued to encourage charitable endowments, and the importance of good works, and it has ever encouraged the faithful to give to its service of their best. If their skill was in metal-work, in embroidery, in carving wooden figures or wonderful choir-stalls, in stained glass, in jewellery, in fresco or in mosaic, such skill was to be devoted to God's service, as the choicest gift the artist had had laid upon him. The Church was able to make demands upon the faithful. Even beyond that, there came the occasions in which the penance for sin took the form of the devotion of artistic gifts to the work of the Church, and the other and very numerous cases in which this artistic labour was the constant employ-
their cloisters, each at his own work; each generation of monks in the footsteps of the former, hiding the individual identity in the name of the order and content, as the work was done for the greater glory of God, that while the work should remain, the monks themselves should be forgotten. Few things are more striking in considering this period than the singleness of aim and devotion to duty which characterized these men, and led them to enrich their own churches, but simply to carry out to the best of their ability the allotted task for the glory of God and His Church. Partly, of course, the reason was that the dignity of personal labour was not fully realized, but the reason for this anonymity lies mainly in the facts already stated, that the work was religious work, that the aim was a religious aim, and that the identity of the person did not matter, so long as the Church was properly served by her faithful. There is one other aspect of the artistic work of the pre-Renaissance time to be alluded to. It is by no means confined to the pre-Renaissance period, but extends through the succeeding centuries, and it should extend to all the artistic labour of the present day, but it is more especially a feature of the period under discussion. The German monk was satisfied with the work which has been done, but which is always striving forward for finer and better work. It is that element of untiring energy and ever-quickening desire for perfection which has always characterized the greatest art-workers of the world, and it finds its earliest and perhaps its strongest development in the Church.

The early Italian painters fall into two groups: the first, which may be called the group of the miniaturists or illuminators, as, for example, Enrico, Berlinghieri, and Oderico; the second, the very primitive painters, such as Margaritone, Spinello, Uccello, Cimabue, Doccio, Memmi, Lorenzetti, and the various early masters of the schools of Siena, Padua, and Verona. The predecessors of these artists, for the most part, worked without any reference to nature, under Byzantine influence, copying slavishly the methods fixed by the Greek Church. Their pictures, whether they illustrated scenes from the Sacred Writings, the legends of the Church, or the lives of the saints, were designed and painted according to fixed rules. Their work was inferior to that of the Byzantine workers in mosaic, but they were associated with it; there was, however, no way, in attitudes, compositions, types of face, folds of drapery, and even as regards colour, it was guided by the definite rules of tradition, so that the painter was little more than a mechanic. Still, despite what may be termed the unfitness of this particular school, there was a strong spirit of devotion exercising the minds of the artists, and this enabled them to impart a certain amount of sympathy into their hard, angular productions, thus showing that their works were painted with religious sentiment, and with a desire to evoke that sentiment in others. Margaritone was one of the first to break through the hard crust of rules, and although his work does not show any very striking advance upon that of his predecessors, yet in his pictures and in that of the earliest painters of Sienese art, the desire to paint a Mother of God bearing some living semblance to a Mother of Man. There is a struggling towards tenderness and sweetness of countenance, a desire to represent raiment gently floating in easy curves, and a greater command of sentiment, together with a simplicity in story-telling, which mark this primitive school, and prepare the way for the foreRunner of natural treatment, and for the attempt to find, in the desire to paint a Mother of God bearing some living semblance to a Mother of Man.

Period of the Renaissance.—The great era of transition from the Middle Ages to modern times which is called the Renaissance may be divided into the three periods of the Early Renaissance, Full Renaissance, and Late Renaissance. Here again the influence of the Church is found just as strong and as definite as in the past. The growing desire to have magnificent churches created the necessity for other workers in art. The first years of this period give in Italy the earliest workers known by name in fresco, and in portable pictures, Cimabue, Orcagna, Giotto, and others. In their frescoes they decorated the churches of Assisi, Siena, Fiesole, and other parts of Italy, is seen the beginning of the long list of painters whom the Church employed to paint altars and to introduce in their churches new types of devotion. Giotto produced the gates of the Baptistery at Florence, and with the appearance of Brunelleschi a new school of architecture for ecclesiastical buildings arose. In this period belongs also the introduction of printing, and here again, just as emphatically, the Church took the lead. The earliest printers were churchmen, belonging to a religious order, the earliest books those of religion—the first actual printed sheet being the indulgence of Pope Nicholas V—followed by a long list of religious and liturgical works, Sacred Scriptures, and patristic literature. In the Low Countries the Van Eyck developed the methods of oil-painting and there arose a great school of artists, among whom were Van der Goes, Van der Weyden, Bouts, Cristus, Memling and others, who found the transition from the Gothic school. Their most important works are altars, or altar-pieces, and in some cases all their paintings were of a religious character, while in others the paintings not religious were portraits of the various patrons who had commissioned the altar-pieces, or who had had their own private chapels decorated by these artists; therefore the intimate connexion between art and the Church was as close as ever.

Towards the close of the Early Renaissance period is found the work in sculpture of Donatello and those of his school, Desiderio da Settignano, the Rossellini, Doccio, Verrochio, and Mino da Fiesole; almost all the fine work of these men was for ecclesiastical purposes. Here and there are single detached statues, as for example the one of St. George by Donatello, but then it must be remembered that these were figures of saints, and intended for buildings more or less of a religious character, or for those erected by guilds distingly religious, while some of the sculptors named, as for example Doccio of Perugia, were only known by the work they executed for the decoration of churches. During this period among the workers in Germany were Adam Kraft, Veit Stoss, and the Vischers, who worked at Nuremberg, and at that time the Stations of the Cross and the great bronze shrine in Nuremberg, all objects intimately connected with religious work. In England, the tomb of Henry V, and that of Henry VII by Torrigiano, both at Westminster, must not be overlooked. Every branch of artistic craftsmanship was at this time employed for the benefit of the Church—Potigny, Ghiberti, and others were at work at the great silver altar of the Florentine baptistery. The jewellers, Ghirlandajo, Verrochio, and Francia were making jewels for altar vestments, medals for the great ecclesiastics, and pictures for the churches, Luca della Robbia was preparing his vitrified enamal medallions, that he might present the Blessed Virgin and her Child in attitudes of the most tender affection, and even in those which he had to select for the shrines at Coventry, and on the corners of the streets, while other potters were marking the sacred emblems on their finest productions, or painting religious scenes upon their vases and majolica plates. The Arras tapestries of France, the English tapestries of Coventry, and the Van Eyck tapestries of Flanders, were being woven for the hangings of the churches, while Benevento da Maiano was adding his likeness as the perfect form of the auguries, and of the Church to the decoration of the choir-stalls in the great churches of Italy. It was at this time that the great monastic painter Fra Angelico decorated the cells of San Marco with his perfect representations of the great events in the Divine Tragedy, while Gozzoli, Lippi, and Ghirlandajo adorned the churches, and Perugino, Pin-

towards the family itself, and to make a suitable offering in recompense for crimes committed. Another course sometimes adopted was to call in two painters, rivals in their profession, to decorate different walls of a church, or the two sides of an altar-piece, or again, when some great addition was made to the fabric, on account of an important event, such as the canonization of a local saint, or a marked interposition of Providence on behalf of the town, different influential persons in the place would undertake to be responsible for portions of the building, each calling in his own favourite painter, and in this way the work would be completed. Or it might be that an order desired to decorate a church dedicated to its own saint, and the commission would be given to some notable artist, who perhaps was unable to complete the task, or who died before its completion. In such cases, others were called in to complete it, and in this way the fabric was beautified by various successive hands.

The number of definitely personal commissions which the sixteenth-century artist had was small, as even when he had ordered a picture, it was generally an altar-piece for the family chapel, or else the decoration of some building belonging to the trade guild to which he was attached, and this trade guild being nearly always a religious association, the commission came under the category of religious work. It is all this which marks the great distinction between art and craft. In the previous period, the guilds were the centre of all the activity and after it. In the period from the triumph of Christianity to about 1260 in Italy, and about 1460 in Northern Europe, the dominant art is architecture, chiefly employed in the service of the Church, and the arts of painting and carving were only applied subordinately for its enrichment. During the Renaissance period the imitative arts, sculpture, painting, and the various arts inherent in them, were developed by the artists themselves, to exist and strive after perfection on their own account, and while architecture still held an important position, it was no longer dominant; the arts which supplied the interior decoration of the building, and the objects needed in the service of the Church, ceased to be considered as subordinate, but were taking in the own hands position under the guidance of workers of supreme genius. From the period, however, of the Full Renaissance, the great dignity of architecture begins to diminish, especially as regards ecclesiastical buildings, and architects devoted themselves almost exclusively to domestic and civic work. Architecture ceased to be personal, democratic, local, and became professional and more or less uniform throughout the countries of Europe. But this development was severely because the designing of detail became in many cases the work of others than the executant workmen. The same sort of difficulty was baffling the pictorial art and the arts of the craftsmen. The personal element was no longer the main strength of an art. The ecclesiastical side of the work was almost non-existent, and the crafts suffered by reason of the fact that personal elements vanished, and the adornment of the house, the palace, and the person was considered of far greater importance than the adornment of the church, and the sacrifice of the life of the worker for the greater glory of God.

POST-RENAISSANCE PERIOD.—There are certain political explanations of this great change between the art and the arts of the sixteenth century and the seventeenth. There were several forces at work which were hostile or indifferent to artistic development, such as the religious, dynamic, and commercial wars, the difficulties of the Reformation, and constitutional problems, while the grouping together of small towns into larger provinces and countries was doing away with the rivalry of the craftsmen in the smaller places, and permitting a spirit of greater uniformity in style to spread throughout a large section of Europe. Add to all these colonial expansion, huge enterprise, and great commercial prosperity, constantly broken into by ravaging wars, and the causes for the decay of that spirit of religious activity in art characterizing earlier periods are apparent. Spain and Italy were, in the seventeenth century, almost the only two countries in which any close connexion between art and the Church was kept up. England was troubled with the religious question, and struggling with great constitutional problems, while it had given itself over to the faith of the Reformers, and such art as it was producing was the great architectural triumph of Sir Christopher Wren in the rebuilding of the churches of London, and the various sections of craftsmanship concerned with the permanent outwork, and some there were still some great goldsmiths at work, and some even greater workers in wrought iron, preparing the rejas for the Spanish cathedrals, while pictorial art was at its very highest in that country, and its masterpieces, with the exception of those of the very greatest artist of all, Velazquez, were devoted to subjects suggested by the Church. Yet there had been no country in which the painter had been so trammelled by traditional restrictions as in Spain. The very manner in which each saint was to be represented, the method in which his or her clothing was to be painted, and the colouring which was to be applied to each garment, had been a matter of stern decree, it had needed the profound genius of a Velazquez to break through the traditional mantle of the military or ecclesiastical fashion, especially for Murillo, a period of greater freedom. Commencing with such painters as Pantoja della Cruz and Vicente Carducci, the great Spanish School had produced the Ribaltas and Ribera, and then the majestic Velazquez. In Spain the only great painter to follow Velazquez was Murillo, but there were many whose works were marked by distinction, excellence, and certainty. Such as Ferrando, Tadeo, Valdes, Alonso Cano, and Orrente. The seventeenth century, was, in various countries of Europe, one of the important periods of artistic production, and although the Italian schools, the Realists, and the painters of the Second Revival were men whose productions at the present time are out of favour, yet they deserve more than a passing notice, while contemporary with them there are others who rank among the veritable giants of the artistic craft. The late Italian artists, the Carracci, Caravaggio, Sasso Ferrato, Carlo Dolci, Domenichino, Luca Giordano, Carlo Maratta, Guido Reni, Salvator Rosa, and others, show in their work melodramatic style, love of magnificent colouring, and intense shades. The draughtsmanship of these artists shows even stronger trait, that is, a materialism which is more than they are at present, for they certainly represent an important epoch in the art history of the world, and one which must never be overlooked. Many of their works were altar-pieces painted for churches, or were intended for church decoration, but at the same time they were greatly influenced by the Humanistic movement, and by the eager desire to represent the story of the Old Testament and the New Testament by scenes of Everyday Life. Commercial prosperity of Holland, at a time when other nations were lacking in material wealth, was one of the reasons for the existence of a veritable crowd of artists just at this time. The Church had ceased to commission pictures in Holland, and very seldom were stories, either from Holy Writ, or from the lives of the saints, represented in the pictures of paintings. In dealing with the arts and crafts of the eighteenth century, a new and destructive factor which had arisen must be taken into consideration. "The genius of handicraft", as has been well said, "passes now into invention", and the commencement of a system now appears that was eventually to strike at the very roots of the manner in which supreme works of genius had been produced in the preceding centuries. It must also be noticed that, in painting especially, the artistic centre of gravity had shifted from Italy to
England, and to a lesser extent to France, and that Italy, Germany, Spain, and the Netherlands took but a very small share in the artistic development of the eighteenth century, instead of, as in preceding periods, being the great centres of development themselves. The triumph of the home, however, in contradistinction to that of the Church, was now complete, and portraiture, whether concerning itself with the great decorative single figures or family groups of Reynolds and Gainsborough, or with the productions of the leading miniature painters, Cosway, Engleheart, Plimer, Smart, Hone, Wood, and their numerous followers, under the influence of Gainsborough, was more and more a matter of accessions of portraits of those persons who were able to afford to employ the artist, and who desired to possess and distribute to others such delightful representations as would adorn the home and the person. Ecclesiastical art, or art for the decoration of the church, had hardly any existence.

In England towards the middle of the nineteenth century a new movement having in it some of the instincts of earlier Italian art began to arise. The foremost artist of this new school was Sir Edward Burne-Jones. In the wonderful succession of poetic visions which he presented, marked by a play of fancy, a fertility of inventiveness, tender withery of inspiration, exquisite colour, and grace and harmony of line and group, he broke through the art and method of the Renaissance towards a far fuller extent than he himself had intended, and to vivify the old legends of primitive times which had formed part of his inheritance from Celtic ancestors. His appearance on the horizon of art was to a great extent coincident with the blossoming forth of what has been termed the Oxford Movement in religion, a growing desire for a deeper and firmer foundation, a determination to return to earlier and purer lines of thought in religion, to set faith free from the restrictions of statecraft, and to rise from the dreary monotony of a Geneva theology to something approaching closer to the fiery enthusiasm and the sumptuous ceremonial of the passionate faith of earlier days. The progress of this movement within the Protestant Church led to a considerable number of ascensions to the Catholic Faith, but in the Church of its origin it worked a complete revolution. Once more there arose the determination that the house of God should be beautiful, and once again art, with all the various crafts closely connected therewith, entered into the service of religion, very much in the manner they had done in preceding centuries. Tapestries, the stained-glass painters, under the influence of Burne-Jones, were set to work to prepare panels of glowing colour for the decoration of churches. The stained-glass painters, under the influence of these craftsmen, sought out old designs, originated new schemes of colour, and worked hard to discover old secrets of technique. The earlier schools of embroidery were studied, and all over the country women set to work to make vestments and to execute needlework of rare distinction and great beauty. A revival took place in the art of the metal-worker and in that of the stone-mason. Many fine wrought-iron grilles were made, and the claim of the artist to prepare the design and to superintend the carrying out of its execution to the last detail was a standard of workmanship. Quite apart from the religious aspect of the movement, there was in this Oxford revival the origin of the effort towards greater refinement, greater beauty, and more attention to handicraft, which, commencing in the middle of the nineteenth century, has by no means reached its culmination in the early years of the twentieth. Out of the first and most important of the movements which aimed to break away from the artistic traditions of the eighteenth century took place in the early part of the nineteenth century in Germany, and was led by Overbeck. The Academy of Vienna, at the time that he entered it, was under the direction of Füger, a talented miniature painter, but a follower of the pseudo-classical school of David, and a firm believer in the tenets of these opinions, too conservative to vary from them in the least degree. Overbeck felt that he was among great masters, that every noble thought was suppressed within the academy, and that Christian art had been diverted and corrupted until nothing Christian remained in it. The differences between him and his followers and their fellow-students were so serious that the upholders of Overbeck and their leader were expelled from the academy; Overbeck journeying to Gainsborough, and bringing it in 1810, and remaining there for fifty-nine years. Here he was joined by such men as Veit, Cornelius, Schadow, with others of less importance; together they formed a school which was known as the Nazarenes, or the Church-Romantic painters. They built up a severe revival on simple nature and the serious art of the Umbrian and Bolognese painters, and although for a long time they laboured under great difficulties, yet, after a while, they were able to exert considerable influence, and their success led to memorable revivals throughout Europe. Overbeck was a Catholic, as were several of his friends. He was a man of high purity of motive, of deep insight, and abounding knowledge, a very saintly person, and a perfect traitor to all the art and the art practised in the open air, with not only a strict adherence to realism in choice and treatment of subject, but also the subordination of colour to tone gradation. These ascensions in England were, however, very much the result of the movement in France which had preceded them, and which was connected with the name of Millet.

In Catholic countries there are arising some signs that the old practice of enlisting the services of art for the purposes of religion may be developed, but the signals of an approaching movement are not very strong as yet, and the Church has a good deal to learn with regard to decoration, to design, and to craftsmanship from the earlier periods of its history. Foremost among the signs of the new spirit must be placed the foundation of the Upholder School in Vienna, and the building of the most perfect buildings in England, erected after the truest and most careful study of the past and with every desire to give full play to the spirit of the present and to the original talent of its designer, while avoiding anything that could be called a slavish copying of the past. This building affords an example of the revived use of mosaic properly applied, in method following the work of Ravenna, and planned by a great artist, Bentley. It affords the most perfect scheme of interior decoration that could well be conceived. In other countries of Europe the signs of progress are not quite so clear, but the Church which has fostered and encouraged art from its very birth has so many glorious examples in its midst of the great achievements of medieval art that there is a demand in time before its ancient use of the fine arts is revived. A close study of the past would enable the Church to once more set about the task of employing the craftsmen of the world to produce their finest work in the domain of ecclesiastical art.

Illustrations explanatory of the different branches of Ecclesiastical art were taken under the special articles: IVORIES; MANUSCRIPTS, ILLUMINATION OF; METAL-WORK; PAINTING; REliquIARIES; SCULPTURE; WOOD-CARVING.

KRAUS, Geschichte der christlichen Kunst (Freiburg im Br., 1895-1900); MICHEL, Histoire de l'art depuis les premiers temps...
Ecclesiastical Architecture.—The best definition of architecture that has ever been given is likewise the shortest. It is “the art of building” (Violet-le-Duc, Dict., I, 116). The art, be it observed, and not merely the act of building. And when we say the art of building, the term must be held to imply the giving to buildings of whatever beauty is consistent with their primary purpose and with the resources that may be requisite to effect it. “The art of building,” it hardly be held that there is one art of making things well, and another of making them badly. . . . Good architecture is the art of building beautifully and expressively; and bad architecture is the reverse. But architecture is the art of building in general” (Bond, Gothic Architecture in England, 1). Since, however, the word building is apt to suggest, primarily, “the actual building of materials by manual labour and machinery,” it may be desirable to amend or restrict the definition given above by saying that architecture is the art of planning, designing, and drawing buildings, and of directing the execution thereof (Bond, op. cit., 2). And in this art as in all others, including that of life itself, the fundamental principle should always be that of subordinating means to ends. If this principle is or has been abandoned or lost sight of, the result may indeed be, or may have been, a building which pleases the eye, but it must needs be also one which offends that sense of the fitness of things, which is the criterion of the highest kind of beauty. Now a church, primarily, a building intended for the purpose of public worship; and in all sound ecclesiastical architecture, the idea of space should guide the whole composition. To build a church for the admiration of “the man in the street,” who sees it from outside, or of the tourist who pays a passing visit, or of the artist, or of anyone else whatsoever except that of the faithful who use the church for prayer, the hearing of Mass, and the reception of the sacraments, is to commit a solecism in the noolest of all the material arts. Even the needs of the liturgy itself are in a sense subsidiary to the needs of the faithful. Sacramenta proper homines is an old and sound saying. But, on the other hand, among the needs of the faithful must be reckoned, under normal circumstances, the adequate carrying out of the liturgy. It is, of course, perfectly true to say that a church is not only a building in which we worship God but also itself the expression of an act of worshipful homage. This, however, it ceases to be, at least in the highest degree, unless, as has been said, the aesthetic qualities of the building have been entirely subordinated to its primary purpose. It only needs a little reflection to see that these preliminary remarks have a very practical bearing on modern church-building. The church is, after all, a building, and the chief uses of the study of the history of ecclesiastical architecture is that it directs attention to a number of buildings more or less beautiful in themselves, but that it cannot bring to home to us that all true architectural development was inspired, primarily, by the desire to find a solution of some problem of practical utility. Roughly speaking, in any case, the church may be said to have been evolved from two distinct germ-cells, the oblong and the circular chamber. From the simple oblong chamber to the perfect Gothic cathedral the steps can be plainly indicated and admit of being abundantly illustrated from the actual course of architectural development in Western Europe (Brown, “From Schola to Cathedral,” passim), while the links which connect the simple circular church with a gigantic cruciform domed church, like St. Peter’s in Rome or St. Paul’s in London, are still more obvious, though the actual course of development in the case of domed churches has been far less continuous and regular.

The Origins of Ecclesiastical Architecture.—That the first places set apart for Christian worship were in the ordinary way as humble as the houses of men; and, although it is at least doubtful whether all the texts from the New Testament which have been alleged in support of the statement will bear the interpretation that has been put upon them, the statement itself hardly needs proof (Messner in “Zeitschr. f. christl. Arch.”, 1859, 212 sqq.; corrected by Lange, “Haus u. Halle,” 273 sqq.). It may be assumed, further, that such rooms would for the most part have a simple oblong form, with a door in one of the narrower sides. From the first, however, there must have been some kind of division between the portion of the room occupied by the officiating clergy (the ἱεραρχία, sanctuary, or presbytery) and the space allotted to the faithful; and this division, we may feel sure, was from a very early date marked by at least a low-lying barrier or screen. At the same time, there is at least a sufficient counter of the sufficient classic of S. Clemente, Rome, and also by a curtain which veiled the altar from view during certain portions of the Liturgy. And here we find the suggestion of a first step in the development of a distinctively ecclesiastical architecture. When the first churches or chapels were erected as independent structures, an obvious economy would suggest that, especially in the case of smaller churches, the sanctuary need not be built so broad or so high as what may already be called the nave; and an equally obvious regard for stability would suggest that the division should be marked by an arch, supporting the gable wall at the further end of the nave (Scott, English Church Architecture, 3). Moreover, both structural and liturgical needs would
alike be served if the piers which support the dividing arches were concentrated inwards, somewhat beyond the side walls of the sanctuary; for the narrower the span the easier it would be to construct the arch, and to suspend a curtain from pier to pier. Thus, then, that rudimentary type of church or chapel would be reached of which archaic examples still survive in England and Ireland. Mr. Scott notes that in many of our oldest English churches there are clear indications that the plan for the church was placed into the sanctuary was originally much narrower than it is at present. He further notes that in the persistent adherence to the square-ended type of sanctuary which manifests itself throughout the history of English ecclesiastical architecture, may possibly be found a surviving indication of the very early introduction of Christianity in the islands (Scott, op. cit., 4).

The earliest improvement on the crude form of the oblong chamber with its rectangular annex, and one which may well have become usual even while the liturgy was confined to a single room in a private house, was to throw out a semicircular apse at the end of the chamber opposite the door, or to select for the purposes of worship a room thus built. And this would thus may be the funda-ment of the basilica as established in Rome, as soon as the Christian communities began to possess separate buildings in which to hold their religious meetings. These buildings would be, in the eyes of the public and perhaps of the law, schola or guild-rooms; and for such buildings the form most commonly adopted appears to have been that of an oblong terminated by an apse (Brown, op. cit., 29 sq.; Lange, op. cit., 291 sq.). In the case of course, was placed the seat of the bishop; round the walls on either side were the subesilia of the assistant clergy, while the altar stood beneath the arch formed by the opening of the apse, or slightly in advance of it. On the lower side of the altar would be a space reserved for the clergy of inferior rank, and for the schola cantorum, as soon as an organized body of sing-ers, under whatever name, came into existence. Out- side the boundary of this space, however it may have been marked, the general body of the faithful would have their place, and at the lower end of this chamber, or in some kind of ante-room or narthex, or possibly even in an outer court, would be placed the catechumiens and—when ecclesiastical discipline was suffi-ciently developed—the penitent.

This particular form of the domestic church, removed by just one degree, architecturally speaking, from a quite primitive simplicity, deserves special attention. For there would seem to be good grounds for the assertion that it had become at least not uncommon, even within Apostolic times. In fact, as several writers on the subject have quite independently pointed out, the main feature of the arrange- ment would seem to be indicated in the New Testa- ment itself. The visions recorded in the Apocalypse are, of course, Divine revelations; but, as the vision of Ezekiel was cast in the mould of the Jewish ritual, so also those of St. John may be reasonably thought to reflect the liturgy of his own times (Scott, op. cit., 4, 5, 8, 9 sq.; Lange, op. cit., 298 sq.). There, then, in the midst, we see the throne, whereon there sits One enthroned, of whom the Christian bishop is the representative; and with Him are four and twenty presbyters, who are priests (Lev., ranged in a semicircle, twelve on either hand (Apoc., iv, 10). Within the space bounded by these seats is a pavement of glass “like to crystal” (possibly of mosaic), and in the centre the altar (Apoc., iv, 10, vi, 9; viii, 3; ix, 13; xi, 7). On the hither side of the latter are the one hundred and forty-four thousand “signed”, or “sealed”, who “sing a new canticle”, and who incidentally bear witness to the very early origin of the schola cantorum, at least in some rudimentary form (Apoc., vii, 4; xiv, 1–3). Farther removed from the altar is that “great multitude, which no man could number, of all nations, and tribes, and tongues”, the heavenly counterpart of the catus jude- lium (Apoc., vii, 9).

To lateral columns and aisles there is indeed no allu-sion, but it is at least possible that in the mention of the outer court which is “given unto the Gentiles” we may find the earliest traces of the atrium or parvis, in which, as we see, the room was divided into the sanctuary was originally much narrower than it is at present. He further notes that in the persistent adherence to the square-ended type of sanctuary which manifests itself throughout the history of English ecclesiastical architecture, may possibly be found a surviving indication of the very early introduction of Christianity in the islands (Scott, op. cit., 4).

The earliest improvement on the crude form of the oblong chamber with its rectangular annex, and one which may well have become usual even while the liturgy was confined to a single room in a private house, was to throw out a semicircular apse at the end of the chamber opposite the door, or to select for the purposes of worship a room thus built. And this would thus may be the funda-ment of the basilica as established in Rome, as soon as the Christian communities began to possess separate buildings in which to hold their religious meetings. These buildings would be, in the eyes of the public and perhaps of the law, schola or guild-rooms; and for such buildings the form most commonly adopted appears to have been that of an oblong terminated by an apse (Brown, op. cit., 29 sq.; Lange, op. cit., 291 sq.). In the case of course, was placed the seat of the bishop; round the walls on either side were the subesilia of the assistant clergy, while the altar stood beneath the arch formed by the opening of the apse, or slightly in advance of it. On the lower side of the altar would be a space reserved for the clergy of inferior rank, and for the schola cantorum, as soon as an organized body of sing-ers, under whatever name, came into existence. Out- side the boundary of this space, however it may have been marked, the general body of the faithful would have their place, and at the lower end of this chamber, or in some kind of ante-room or narthex, or possibly even in an outer court, would be placed the catechumiens and—when ecclesiastical discipline was suffi-ciently developed—the penitent.

This particular form of the domestic church, removed by just one degree, architecturally speaking, from a quite primitive simplicity, deserves special attention. For there would seem to be good grounds for the assertion that it had become at least not uncommon, even within Apostolic times. In fact, as several writers on the subject have quite independently pointed out, the main feature of the arrange-ment would seem to be indicated in the New Testa-ment itself. The visions recorded in the Apocalypse are, of course, Divine revelations; but, as the vision of Ezekiel was cast in the mould of the Jewish ritual, so also those of St. John may be reasonably thought to reflect the liturgy of his own times (Scott, op. cit., 4, 5, 8, 9 sq.; Lange, op. cit., 298 sq.). There, then, in the midst, we see the throne, whereon there sits One enthroned, of whom the Christian bishop is the representative; and with Him are four and twenty presbyters, who are priests (Lev., ranged in a semicircle, twelve on either hand (Apoc., iv, 10). Within the space bounded by these seats is a pavement of glass “like to crystal” (possibly of mosaic), and in the centre the altar (Apoc., iv, 10; vi, 9; viii, 3; ix, 13; xi, 7). On the hither side of the latter are the one hundred and forty-four thousand “signed”, or “sealed”, who “sing a new canticle”, and who incidentally bear witness to the very early origin of the schola cantorum, at least in some rudimentary form (Apoc., vii, 4; xiv, 1–3). Farther removed from the altar is that “great multitude, which no man could number, of all nations, and tribes, and tongues”, the heavenly counterpart of the catus jude-lium (Apoc., vii, 9).

To lateral columns and aisles there is indeed no allu-sion, but it is at least possible that in the mention of the outer court which is “given unto the Gentiles” we may find the earliest traces of the atrium or parvis, in which, as we see, the room was divided into the

...
of so many early Christian churches, the more or less incongruous and heterogeneous spoils of older and non-Christian edifices. Of this church, in its original form, no one—however boldly his tastes may incline to some more highly developed system or style of architecture—will call in question the stately and majestic beauty. The general effect is that of a vast perspective of lines of noble columns, carrying the eye forward to the altar, which, with its exvory or canopy, forms so conspicuous an object, standing, framed, as it were, within the arch of the terminal apse, which forms its immediate and appropriate background.

S. Maria Maggiore is considerably smaller than were any of the basilicas of the East, but its layout and design are suggestive of that of the basilicas of St. Peter’s, St. Paul’s, and the Lateran. Each of these, in addition to a nave of greater length and breadth, was furnished (as may still be seen in the restored St. Paul’s) with a double aisle. This, however, was an advantage which was not unattended with a serious drawback from a purely aesthetic point of view. For a great space of blank wall intervening between the top of the lateral colonnade and the clerestory windows was of necessity required in order to give support to the pent-house roof of the double aisle. And it is curious, to say the least, that it should not have occurred to the builders of these three basilicas to utilize a portion of the space thus enclosed, and at the same time lighten the burden of the wall above the colonnade, by laying in the clerestory windows a single aisle.

It is true, of course, that such a gallery is found in the church of S. Agnese, where the low level of the floor relatively to the surface of the ground outside may have suggested this method of construction; but whereas, in the East, the provision of a gallery (used as a gynaeceum) was usual from very early times, it never gained so much vogue than exactly in these chief basilicas of the church.

Taking East and West together, we find among early and medieval basilican churches examples of all the combinations that are possible in the arrangement of aisles and galleries. They are (1) the single aisle without gallery, which is, of course, the commonest type of all; (2) the double aisle without gallery, as in the three great Roman basilicas; (3) the single aisle with gallery, as in St. Demetrius at Thessalonica; and finally, as in St. Julian at Bolsena; and, finally, as in the Duomo at Pisa.

These, however, are modifications in the general design of the building. Others, not less important, though they are less obviously striking, concern the details of the construction. Of these the first was the substitution of the arch for the horizontal entablature, and the second that of the pillar of masonry for the monolithic column. The former change, which had already come into operation in the first basilican of St. Paul Without the Walls, was so obviously in the nature of an improvement in point of stability that it is no matter for surprise that it should have been adopted with universal and enthusiastic acceptance (as clearly appears from the number of churches which were, in the following and succeeding centuries, on the ruins of the old). The change from column to pillar, though in many cases it was no doubt necessitated by lack of suitable materials—for the supply of ready-made monoliths from pagan buildings was not inexhaustible—proved, in fact, the germ of further development; for from the plain square support to the recessed pillar, and from this again to the grouped shafts of the Gothic cathedrals of later times, the progress can be quite plainly traced.

Mention should here be made of a class of basilican churches, in which as in S. Miniato, outside Florence, and in S. Zenone, Verona, pillars or grouped shafts alternate, at fixed intervals, with simple columns, and serve the purpose of affording support to transverse arches spanning the whole width of the nave; a first step, it may be observed, to continuous vaulting.

Romanesque Types.—Something must now be said of the very important alterations which the eastern end of the basilican church underwent in the process of development from the Roman to what may conveniently be grouped together under the designation of Romanesque types. In studying the ground-plan of a Roman basilica, it is certain that there is no nave and aisles to what lies beyond them, only two forms of design present themselves. In the great majority of instances the terminal apse opens immediately on the nave, with the necessary result, so far as internal arrangements are concerned, that the choir, as we should call it, was an enclosure, quite unconnected with the architecture of the building, protruding forwards into the body of the church, as may still be seen in the church of S. Clemente in Rome. In the four greater basilicas, however, as well as in a few other instances, a transept was interpolated between the nave and the apse, affording adequate space for the choir in its central portion, while its arms (which did not project beyond the aisles) served the purpose intended in the original design, that is, to give support to the apse. It is noteworthy that the transept of a Roman basilica is, architecturally speaking, simply an oblong hall, crossing the nave at its upper extremity, and forming with it a T-shaped cross, or *crux immissa*, but having no organic structural relation with it. But it was only necessary to equalize the breadth of transept and nave so that their division is marked by a transeptal arch, in order to give to this crossing a definite structural character, by strengthening the pieces at the four angles of the crossing, and making them the basis of a more or less conspicuous tower. And this was one of the most characteristic innovations or improvements introduced by the Romanesque builders of Northern Europe.

In fact, however, before this stage of development was passed, the central point of the Romanesque style had undergone another modification. For the simple apse, opening immediately into the transept, church builders of all parts of Europe had already in the eighth century substituted a projecting chancel, forming a fourth limb of the cross, which now definitely assumed the form of the *crux commissa*, by contrast with the *crux immissa* of the Roman basilica. The earliest example of a perfectly quadrangular crossing, with a somewhat rudimentary tower, appears to have been the minster of Fulda, built about A.D. 800. It was quickly followed by St. Gall (S30), Hersfeld (S31), and Werden (S75); but nearly two centuries were to elapse before the cruciform arrangement, even in the case of more important churches, can be said to have gained firmly established acceptance (cf. Steilemann, Die kirchliche Baukunst des Abendlandes, I, 161).

The differences which have already been mentioned were, however, by no means the only ones which distinguished the Romanesque from the Roman transept. The transept of a Romanesque church, especially of those which were attached to monasteries, was usually provided with one or more apses, projecting from the nave and altar. On the point of the chancel, at the crossing, and perhaps in the centre of the transept, if there is this it appears, plainly enough, that the purpose, or at least a principal purpose, of the medieval transept, was to make provision for subsidiary altars and chapels. A pair of transept apses, projecting eastwards, already makes its appearance at Hersfeld and Werden. At Bernay, Boscheville (St.-Georges), and Cerisy-la-Foret (St.-Vigor), each arm of the transept has two eastern apses, corresponding respectively to the aisle and to the projecting arm. The same arrangement is found also at Tarragona. At La Cha-
rité, a priory dependent on Cluny, each arm had three apses, so that there were seven in all, immediately contiguous to one another, and varying in depth from the central to the northern and southern members of the system. The plan of Cluny itself was that of a cross "tympanum," with two transverse axes. Of the western transept each arm had two apses; of the eastern each had three, two projecting eastwards and one terminal. Saint-Benoît-sur-Loire had likewise a double transept, furnished on the same principle with six subsidiary apses. Among English cathedrals—it may here be mentioned—both Canterbury and Norwich have a single chapel projecting from each arm of the chevet; and at Ely the "Galilee" porch, which has the form of a western transept, opens eastwards into two apsidal chapels, contiguous on either side to the main walls of the cathedral.

Far more important in their bearing on the later history of architecture than these developments of the transept were certain changes which gradually took place in connexion with the chancel. It is not unusual in Romanesque churches, to find the chancel flanked, like the nave, with aisles, terminating in apsidal or square-ended chapels. But in more considerable edifices, especially in France, the aisle is often carried round as an ambulatory behind the chancel apse; and when this is the case, the ambulatory most commonly forms a great circle, or, at most, two circles.

These are, in the earliest examples, entirely separate from one another, being sometimes two or four, but more usually three or five, in number. In later examples the number of chapels increases to seven or even nine; and they are then contiguous, forming a complete corona or chevet.

The first branching of this system go back to so early a date as the fifth century. De Rossi has argued, apparently on good grounds, that some early Roman, Italian, and African basilicas were furnished with an ambulatory round the apse. This form of design, however, was soon abandoned in Italy, and in the Romanesque pre-Gothic period it cannot be said to have been usual anywhere except in France, where it proved a seed rich with the promise of future developments. The earliest instance of its adoption there was almost certainly the ancient church of St. Martin of Tours, as rebuilt by Bishop Perpetuus in A.D. 470. This edifice, as Quicherat has shown, had a semicircular ambulatory at the back of the altar, in which, a few years later, was placed the tomb of Perpetuus himself. From Tours the type seems to have passed to Clermont, which extends, roughly speaking, from 1000 to 1049. Many centuries later, to Orléans (St-Aignan, 1029). Meanwhile, in 997, the church of St. Martin had been rebuilt, and in the foundations of this edifice, which can still be traced, we find what is probably the earliest example of a chevet or corona of radiating chapels. It served, in its turn, in the course of the following century, as the model, in this respect, of Notre-Dame de la Couture at Le Mans (c. 1000), St-Remi at Reims (c. 1020), St-Savin at Saint-Savin (1020–30), the cathedral at Vannes (c. 1030), St-Hilaire at Poitiers (1049), and the abbey church at Cluny, as rebuilt in 1089. Shortly before 1100 the church of St. Martin was once more rebuilt, on a scale of greater splendour; and once more the new building became the model for other churches. This is the church of St-Sernin at Toulouse (1096), of Santiago at Compostela (c. 1105), and of the cathedral at Chartres (1112).

**Romanesque Vaulting.**—The history of ecclesiastical architecture in Western Europe during the relatively short period which alone deserves to be regarded as one of more or less continuous and steady advance, and which, in some branches, extends from 1000 to 1300, may be described as the history of successive and progressive attempts to solve the problem, how best to cover with stone vaulting a basilican or quasi-basilican church, that is to say, a building of which the leading feature is a nave flanked with aisles and lighted with clerestory windows (Dehio and v. Bezold, op. cit., I, 296; Bond, op. cit., 6). It was the condition of this problem, and the failure, more or less complete, of all previous attempts to solve it satisfactorily, and by no means a mere aesthetic striving after beauty of architectural form, which led step by step to the development of the Gothic architecture of the thirteenth century in its unsurpassed and unsurpassable perfection.

The advantages of a vaulted, as compared with a timber, roof are so obvious that we are not surprised to find that in the form of vaulting the Romans and the early Christians, and particularly the monastic community, were the first to adopt. Witness, for instance, the beginning of the eleventh, examples of basilican churches with vaulted aisles (Violet-le-Duc, Dict., I, 177). Indeed these first attempts at continuous vaulting would probably have been made much earlier but for the invasions of Saracens and Northmen, which delayed till that period the first beginnings of a steady development in ecclesiastical architecture, and which by their wholesale destruction of pre-existing buildings may be said to have prepared the way for that same development. The vaulting of the nave, however, in the case of any church of considerable size, was a very different matter; and it was not until the eleventh century was well advanced that the problem was seriously faced. And when at last it was definitively taken up, it was by the use of a principle quite foreign to the dire necessity. Everyone who is at all conversant with medieval chronicles, or with the history of the cathedrals of Western Europe, must be aware how extremely frequent were the disasters caused by conflagrations (Dehio and v. Bezold, op. cit., I, 296), and it was natural enough that the church-builders of the later Middle Ages should be apt to make their buildings, at least relatively, fire-proof.

The simplest form which the vaulting of a rectangular chamber can take is, of course, the cylindrical barrel-vault; and this is, in fact, the form which was adopted in many of the earliest examples of vaulted roofs, especially in the south of France; a form, too, which was extensively used in Italy during the age of the Renaissance. But, though simplest alike in conception and in construction, the cylindrical barrel-vault is in fact the least satisfactory that could be devised for its purpose; and the objections which militate against its employment are equally valid against that of the barrel-vault whose cross section forms a pointed arch. Of these objections the chief is that the horizontal thrust of a barrel-vault is distributed throughout its entire length. Theoretically, then, this thrust requires to be met, not by a series of buttresses, but by a continuous wall of sufficient thickness to resist the outward pressure at any and every point along the line. Moreover, the higher the wall, the greater is the thickness needed, assuming of course that the wall stands free, like the clerestory wall of an aisle of church. It is more, however, that there depend on the thickness of the wall, and on the exigencies of stability. Of aisleless churches, indeed, we must forbear here to speak. But of an important group of buildings which German writers have designated *Hallenkirchen* (hall-churches) a word must be said, as they unquestionably played a part in preparing the way for the final solution of the problem of vaulting.

The most rudimentary form of hall-church is that in which the nave and aisles are roofed with three parallel barrel-vaults, those of the aisles springing from the same level as those of the nave. Examples
are found at Lyons (St-Martin d’Ainay), at Lestersps, Vivay, and Carcassonne (St-Nazaire) (Dehio and v. Bezold, op. cit., Pl. 122, figs. 3–6). An improvement on this design, in view of the illumination of the nave, consists in giving to the vaulting of the aisles the form of a “rampant” arch, as at Silvaacane, and from this it was but a step to the arrangement by which the section took the form of a simple quadrant, as at Parthenay-le-Vieux, Premilly, and Fontfoirde. This method of quadrant vaulting, as Viollet-le-Duc and others have observed, provided a kind of rood screen, or “flying buttress”, though it is by no means certain that the idea of the flying buttress in the Gothic architecture of Northern France was actually suggested by these Southern buildings (Viollet-le-Duc, Dict. I, 173). In point of stability, the hall-churches of the eleventh century left nothing to be desired. Their great defect is want of light (Viollet-le-Duc, Dict. I, 176). And this defect almost equally affects a class of buildings which may be described as two-storied hall-churches, and which are found principally, if not exclusively, in Auvergne and its neighbourhood. These are furnished, like a few of the Roman basilicas and certain Byzantine churches, with a gallery, which is not a mere triforium contrived in the thickness of the wall, but is a separate building, encircling a central aisle. This arrangement not only affords additional space, but also, by reason of the greater height of the edifice, might seem to facilitate the provision of a more liberal supply of light, unimpeded by neighbouring buildings. This last-mentioned advantage is, however, almost entirely negatived by the circumstance that, in this class of buildings, each bay of the gallery is supplied with a pair of coupled columns, so that the additional obstructions offered to the passage of the light almost entirely counterbalance the possible gain through additional fenestration. We say “the possible gain” because, in fact, the galleries of these churches are but sparingly provided with windows. In these churches (which to the English reader should be of special interest by reason of their affinity in point of construction to the Westminster cathedral) the aisle is usually cross-vaulted, while the gallery has a quadrant vault abutting in the wall of the nave just below the springing of the transverse arches. The most noteworthy examples are found at Clermont-Ferrand (Notre-Dame du Port), Issore (St-Paul), and Conques. To the same family belongs, moreover, the church of St-Tienne at Tournus, already mentioned, which is distinguished from those previously named by having a double aisle. At Conques the church of St-Etienne resembles those at Clermont, Issore, and Conques, except that it is provided with a range of upper windows which break through the barrel-vaulting, somewhat after the fashion which afterwards became so common in Italy in churches of the Renaissance period.

The inherent shortcomings of the barrel-vault, especially when used as a roof for the nave of an ailed church, have been sufficiently illustrated. These disadvantages, so far as structural stability and fenestration are concerned, might indeed be overcome by adopting the system of a succession of transverse barrel-vaults, such as are seen in the unique instance of the church of Sankt Veit at Altötting, where a construction is, however, “ponderous and inelegant, and never came into general use” (Moore, Gothic Architecture, 42). The system of cross-vaulting, which has now to be considered, may be regarded as a combination of longitudinal with transverse barrel-vaulting, inasmuch as it may be described as consisting of a central barrel which is penetrated or intersected by a series of transverse vaults, corresponding of course to the successive bays or compartments of the nave. The advantages of cross-vaulting are threefold. In the first place the total amount of the outward lateral thrust is very greatly diminished, since one-half of it is now replaced by longitudinal thrusts, which, being opposed in pairs, neutralize one another. Secondly, all that is left of the lateral thrust, as well as the longitudinal thrusts, and the whole of the vertical pressure, instead of being distributed throughout the whole length of the building, is now collected and delivered at definite points, namely the summits of the columns or pillars. Thirdly and lastly, a perfectly developed system of cross-vaulting makes it possible so to heighten the clerestory windows that their archivols shall reach the utmost height of the building, and so to broaden that their width between reveals may approximate very closely to the interval between column and column below. By these improvements (as ultimately realized in the perfected Gothic of the thirteenth century) the somewhat rudimentary design of the ancient Roman basilica may be said to have reached the highest development of which it is capable. The gradual development of cross-vaulting, it is to be observed, did not take place in those districts of Southern and Central France which had already become the home of the barrel-vault and to a less degree of the cupola, but first in Lombardy, then in Germany, and finally in Northern France and in England. In these countries the evolution of the Romanesque foundations was accompanied by a development, with local variations of course—reached a far more advanced stage than was ever attained in those regions in which the adoption of barrel-vaulting at a relatively early date had in a manner put a check on architectural progress. And it is noteworthy that in Lombardy and Germany, when cross-vaulting was first adopted, its development was far less complete than in these two French districts. In Lombardy and in Germany the advance towards perfection was both less rapid and less complete in Normandy than in Picardy and the Ile-de-France. These two districts were the last to adopt the system, but it was here that it was, within the brief space of less than fifty years (1170–1220), brought to its final perfection. The reason may probably have been, as Dehio and von Bezold suggest, that the architects of the Ile-de-France, in the days of Philip Augustus and St. Louis, were less tramelled than those of Normandy by the traditions of a school. The comparative lack of important architectural monuments of an earlier date left them, say these writers, a more open field for their inventive enterprise (op. cit., I, 418).

The simplest form of cross-vaulting is of course that which is formed by the intersection of two cylindrical barrel-vaults of equal span. And this, without the use of ribbed groining, was the method mostly adopted by the Roman builders in their civic edifices. In the case of a pillared or columnned church, however, this method had its disadvantages. In particular, having regard to the dimensions of the aisle and its vaulting, the builders of Northern Europe had all but universally adopted the plan of so spacing the columns and pillars which flank the nave that the intervals between them should be one-half the width of the church. Now the only means by which an equal height could be given to vaults of unequal span was the use of the pointed arch; and so it came about that the pointed arch was adopted, not primarily for aesthetic reasons, but because of its better application. Such a use of the pointed arch is to be said of the use of ribbed groining. The medieval builders, who, as has been said above, possessed neither a treacherous mortar nor the command of an abundant supply of rough labour, and who therefore could not—even had they wished it—have adopted the massive concrete masonry of the Romans, were driven by the very necessities of the case to abandon lightness in the construction of their vaults, and at the same time to depend for stability not on the cohesion of the materials, but on the reduction of thrusts to a minimum, and on their skilful transmission to points where they could be effectively resisted. It was, then,
plainly desirable to substitute for a vaulting of uniform thickness a framework of ribs on which a comparatively thin layer of stones (cut to the requisite curvature) could be laid, and as far as possible to lighten the whole construction by moulding the ribs and likewise the columns which supported the vaulting. The same principle of aiming at lightness of construction led to the diminution, as far as possible, of all masses of solid masonry above the columns and arches of the nave. This was done by the enlargement of the windows and the development of the triforium, till the entire building, with the exception of the buttresses, and of the spandrels below the triforium, became a graceful framework of grouped shafts and arches of varying dimensions. The last stage in the evolution of architecture of the pointed arch was not, however, reached, until, for the solid Romanesque buttresses, which rested on the vaulting of the aisles, and which were not only clumsy but often proved inadequate for their purpose, the genius of the Gothic builders hit upon the epoch-making device of the flying buttress. By means of this device the whole weight of the spandrels was transferred to a force of vertical arches, a device which, as has been too often said, “met by a counter-thrust”, but was transmitted to the solid buttresses, mostly weighted with pinnacles, which were now built outwards to a greater distance from the aisles, and the spaces between which were sometimes utilized, and might with advantage have been more often utilized, for a range of lateral chapels. (Bond, op. cit., 754; cf. Moore, op. cit., 262.) From the subject of Gothic architecture in its development is, however, one that needs separate treatment, and for present purposes this very inadequate indication of some of the general principles involved in its development must suffice.

The Circular Church and its Derivatives.—It was stated at the outset of this article that all ecclesiastical architecture may be said to have been developed from two primitive germs, the oblong and the circular chamber. Of those very numerous churches principally, but by no means exclusively, Eastern or Italian, which may be regarded as the products of the second line of development, we shall speak very briefly. That a circular chamber without any kind of annex was unsuitable for the ordinary purposes of public worship is at once evident. In the medieval period no great number of churches was circular, though it is evident that there must have been some of which the plan was circular in form, as at last-named, which served for burial-vaulting over the limbs of the cross, as at St. Marco, Venice, St.-Front, Périgueux, and S. Antonio, Padua, or even to employ domical vaulting for a nave divided into square bays, as in the cathedral at Angoulême and other eleventh-century churches in Périgord, in S. Salvatore at Venice, in the London Oratory, and (with the difference that squarish domes are here employed) in the Westminster Cathedral. Nor should it be forgotten that in the nave of St. Paul’s, London, the architect had shown that domical vaulting is possible even when the bays of nave or aisles are not square, but pronouncedly oblong. Indeed, if account be taken of the manifold disadvantages of barrel-vaulting as a means of roofing the nave of a large church, it may safely be inferred that the employment of some form of circular cupola is as necessary to the logical and structural perfection of the architecture of the round arch as ribbed groining and the use of flying buttresses are necessary to the logical and structural perfection of the architecture of the pointed arch.

Systems and Styles of Architecture in Relation to Modern Needs.—A word must now be said, in conclusion, as to the merits of the several systems and styles of architecture, more especially in relation to the needs of our own day. Of systems, indeed, there are in truth only three, the trabeate or that of which the horizontal lintel may be regarded as the generating element, and which of necessity postulates a timber roof; that of the round arch, which by virtue of the circular curvature of its members, and the use of domical rather than barrel-vaulting; and that of the pointed arch, which, if carried to perfection, postulates ribbed groining and the use of the flying buttress. The second system, however, admits of two methods of treatment which are sufficiently distinctive to be classed as two “styles”, viz. the neo-classical, or Renaissance, and the Byzantine, and which shall be described in the course of the following article.

Now the trabeate system, or that of the timber roof, may be very briefly dismissed. In the great majority of cases we must, indeed, of necessity be content with such a covering for our churches; but no one would choose a wooden roof who could afford a vaulted building. Again, the various types of Romanesque architecture, with their imperfect and tentative methods of vaulting, though historically of great interest, should
ECCLESIASTICS

be regarded as finally out of court. On the other hand, of the Gothic architecture of the thirteenth century, as exemplified in the great cathedrals of Northern France and of Cologne, it may be quite fearlessly asserted: (1) that every single principle of construction employed therein was the outcome of centuries of practical experience. Gothic Art, in the form of successive and progressive attempts to solve the problem of the pointed vault; (2) that the great loftiness of these buildings was not primarily due (as has been sometimes suggested) to any mere Emporstreben, or “upward-soaring” propensity, but was simply the aggregate result of giving to the windows of the aisles and of the clerestory a height in suitable proportion to their width, and to the triforium a height sufficient for the abutment of the aisle roof; and (3) that every subsequent attempt to modify, in any substantial particular, this perfected Gothic style, was of its nature retrogressive and decadent, as might be illustrated from the English Perpendicular and the Italian and Spanish varieties of Gothic architecture. Nevertheless it must be admitted that thirteenth-century Gothic, though perfect of itself, was not a unlimited construction, but a science, in which — in relation to modern needs — is the necessarily restricted width of the nave. When the architect of the Milan cathedral attempted to improve on his French predecessors by exceeding their maximum width of fifty feet, and to construct a Gothic building with a nave measuring sixty feet across, it was found impossible, as the building proceeded, to carry out the design, and the result was not only a loss of height (that in the case of a cathedral of first-class importance, a nave of far greater width is by all means desirable; and in order to secure this greater width it is necessary either to fall back on the unsatisfactory compromise of Italian proportions, as the cathedral of Florence, or the scheme of Milan, Florence, or Gerona, or else to adopt the principle of the round arch, combined, by preference, with domical vaulting. This, as everyone knows, is what Mr. Bentley has done, with altogether conspicuous success, in the case of the Westminster Cathedral. Of the design of this noble edifice it is impossible to speak. It may be worth while to indicate one main reason for its success, and that is (in comparison with the churches of Byzantium) the absence of the round arch — or, if one prefers the term, the neo-classic or Renaissance treatment of the round-arch system. The principal difference between the two is this: that, whereas the neo-classical style, by its use of pilasters, treats every pier as though it were a cluster of huge, flat-faced columns, the Byzantine boldly distinguishes between piers and columns, and employs the latter exclusively for the purposes which monolithic shafts are suited to fulfill, for instance the support of a gallery; while the piers in a Byzantine building make no pretense of being other than what they are, viz., the main supports of the vaulting. The Byzantine method of construction, as employed at Westminster, has the further advantage that it brings within the building the whole of the spaces between the piers and the columns, and hence within the interior dimensions and avoiding the awkward appearance of ponderous external supports. Nor is the Byzantine style of architecture suitable for a great cathedral alone; and one may venture to hope that the great experiment which has been tried at Westminster will be fruitful of results in the future development of ecclesiastical architecture.

HERBERT LUCAS.

IT. Title.—The usual title of the book in Greek MSS. and Fathers is Σωφία Ἰωσὴν Ἥλιων, "the Wisdom of Jesus, the son of Sirach", or simply Σωφία Σειραχ, "the Wisdom of Sirach". It is manistically connected with, and possibly derived from, the following sub.

published,—the Mishna (Parobeh), of Jesus of Sirach. Perhaps in the original Hebrew there were different titles at different times: in point of fact, the simple name Ἡλίῳ, "Wisdom", is applied to it in the Talmud, while Rabbinic writers commonly quote Ecclesiasticus as Bēn Sirā. Among the names which are given to Ecclesiasticus in patristic literature, may be mentioned the simple title of Σωφία, "Wisdom", the designation τοῦ Ἡλίῳ,  "all-virtuous Wisdom", which was as well be expected, Latin writers have applied to Ecclesiasticus titles which are derived from its Greek names, such as "Sapientia Sirach" (Rufinus); "Jesus, "Sirach" (Junius); "Sapiencia Jesu" (Codex Choromontanus); "Liber Sapiencia" (Roman Missal). It can hardly be doubted, however, that the heading "Paralamo Sapiens" is prefixed at times in the Roman Breviary to sections from Ecclesiasticus, to be traced back to the Hebrew title spoken of by St. Jerome in his prologue to the Solomonic writings. Be this as it may, the book is most commonly designated in the Latin Church as "Ecclesiasticus", itself a Greek word with a Latin ending. This title is equally that by which it is commonly denominated in Ecclesiasticus (Eccles.) — is the one used by the Council of Trent in its solemn decree concerning the books to be regarded as sacred and canonical. It points out the very special esteem in which this didactic work was formerly held for the purpose of general reading and instruction in church meetings: this book alone, of all the deuterocanonical writings, which are also called Ecclesiasticus by Rufinus, has been granted by way of pre-eminence the name of Ecclesiasticus (Liber), that is a church reading-book.

II. Contents.—The Book of Ecclesiasticus is preceded by a prologue which professes to be the work of the Greek translator of the original Hebrew and the genuineness of which is doubted. In this prologue to his translation, the writer describes, among other things,
his frame of mind in undertaking the hard task of rendering the Hebrew text into Greek. He was deeply impressed by the wisdom of the sayings contained in the book, and therefore wished, by means of a translation, to place those valuable teachings within the reach of anyone desiring to avail himself of them for living in more perfect accord with the law of God. This was a most worthy object, and there is no doubt that in setting it before himself the translator of Ecclesiasticus had well realized the general character of the contents of that sacred writing. The fundamental thought of the author of Ecclesiasticus is that of wisdom as understood and inculcated in inspired Hebrew literature; for the contents of this book, however variously grouped in other writings, are more closely associated under the general heading of "Wisdom". Viewed from this standpoint, which is indeed universally regarded as the author's own standpoint, the contents of Ecclesiasticus may be divided into two great parts: chs. i-xiii, 14; and xlv-1, 26. The sayings, which chiefly make up the first part, tend directly to inculcate the fear of God and the fulfillment of His commands, wherein consists true wisdom. This they do by pointing out, in a concrete manner, how the truly wise man shall conduct himself in the manifold relationships of practical life. They afford a most varied fund of thoughtful rules for self-government "in joy and sorrow, in prosperity and adversity, in sickness and health, in struggle and temptation, in social life, in intercourse with friends, in contact with uncertain, low, rich and poor, with the good and the wicked, the wise and the foolish, in trade, business, and one's ordinary calling, above all, in one's own house and family in connection with the training of children, the treatment of men-servants and maid-servants, and the way in which a man ought to behave towards his own wife, his "wife, spiritually" (see W. F.), and as to these maxims, which resemble closely both in matter and form the Proverbs of Solomon, the first part of Ecclesiasticus includes several more or less long descriptions of the origin and excellence of wisdom (cf. i; iv, 12-22; vi, 18-37; xiv, 22-xxv, 11; xxiv). The contents of the second part of the book are of a decidedly more uniform character, but contribute no less effectually towards the fulfillment of the task of Ecclesiasticus. They first describe at length the Divine wisdom so wonderfully displayed in the realm of nature (xlii, 15-xliii), and next illustrate the practice of wisdom in the various walks of life, as made known by the history of Israel's worthies, from Enoch down to the high priest Simon, the writer's holy contemporary (xlv-i, 26). At the close of the book (l, 27-29), there is first, a short conclusion containing the author's subscription and the express declaration of his general purpose; and next, an appendix (l) in which the writer thanks God for His benefits, and especially for the gift of wisdom, and to which are subjoined in the Hebrew text recently discovered, a second subscription and the following pious ejaculation: "Blessed be the name of Jehovah from this time forth and for evermore."

III. ORIGINAL TEXT.—Until quite recently the original language of the Book of Ecclesiasticus was a matter of considerable doubt among scholars. They, of course, knew that the Greek translator's prologue states that the work was originally written in Hebrew and that the writer himself in the prologue signified of this term, which might mean either Hebrew proper or Aramaic. They were likewise aware that St. Jerome, in his preface to the Solomonic writings, speaks of a Hebrew original as in existence in his day, but it still might be doubted whether it was truly a Hebrew text, or not rather a Syriac or Aramaic translation in Hebrew characters. Again, in their eyes, the citation of the book by rabbinical writers, sometimes in Hebrew, sometimes in Aramaic, did not appear decisive, since it was not certain that they came from a Hebrew original. And this was their view also with regard to the quotations, this time in classical Hebrew, by the Bagdad gaon Saadia of the tenth century of our era, that is of the period after which all documentary traces of a Hebrew text of Ecclesiasticus practically disappear from the Christian world. Still, most critics were of the mind that the primitive language of the book was Hebrew, not Aramaic. Their chief argument for this was that the Greek version contains certain errors: for example, xxiv, 37 (in Gr., verse 27), "light?" for "Nile" (κνίο); xxv, 22 (Gr., verse 15), "head?" for "poison" (θυμός); xli, 21 (Gr., verse 18), "Tyrians" for "enemies" (πορφοι); etc.; these are best accounted for by supposing that the translator altered or even added to the original Hebrew text before him. And so the matter stood until the year 1896, which marks the beginning of an entirely new period in the history of the original text of Ecclesiasticus. Since that time, much documentary evidence has come to light, and it tends to show that the book was originally written in Hebrew. The first fragments of a Hebrew text of Ecclesiasticus (xxvii, 15-xl, 6) were brought from the East to Cambridge, England, by Mrs. A. S. Lewis; they were identified in May, 1896, and published in "The Expositor" (July, 1896) by S. Schechter, reader in Talmudic at Cambridge University. About the same time, in a box of fragments acquired from the Cairo genizah through Professor Sayce for the Bodleian Library, Oxford, nine leaves from a Hebrew manuscript containing xi, 9-xl, 11, were found by A. E. Cowley and Ad. Neubauer, who also soon published them (Oxford, 1897). Next followed the identification by Professor Schechter, first, of seven leaves of the same Codex (B), containing xx, 11-xl, 11; xlv, 1b-xlvi, 3; xxv, 11-xlvi, 21; xlv, 30-xlvi, 226; xlv, 14e-20, 20; xxvii, 13-xlvi, 24; and presenting ii, 1, 36, 24; and, and xlvi, 21, 8; xxv, 30-xlvi, 24. These eleven leaves had been discovered by Dr. Schechter in the fragments brought by him from the Cairo genizah; and it is among matter obtained from the same source by the British Museum, that G. Margoliouth found and published, in 1899, four pages of the MS. B, containing xx, 12-xlvi, 14; xl, 1-xlvi, 22; Early in 1900, Lord topo published a manuscript (C), xxvi, 29-xlvi, 29, that is, a passage already contained in Codex B; and two from a fourth MS. (D), presenting in a defective manner, vi, 18-xlvi, 27b, that is, a section already found in Codex A. Early in 1900, too, E. N. Adler published four pages of MS. A, viz. vii, 29-xlvi, 11, and S. Schechter, four pages of MS. C, consisting of mere excerpts from iv, 8-xlvi, 14, 15-xlvi, 21, 16-xlvi, 2a. Lastly, two pages of MS. D were discovered by Dr. M. S. Gaster, and contain a few verses of chapters xviii, xix, xx, xxv, of some of which already appear in MSS. B and C. Thus by the middle of the year 1900, more than one-half of a Hebrew text of Ecclesiasticus had been identified and published by scholars. (In the foregoing indications of the newly discovered fragments of the Hebrew, the chapters and verses given are according to the numbering in the Latin Vulgate.)

As might naturally be anticipated, and indeed it was desirable that it should so happen, the publication of these various fragments gave rise to a controversy as to the originality of the text therein exhibited. At a meeting of the British Association, held in 1900, it was noticed that although the Hebrew language of the fragments was apparently classical, it nevertheless contained readings which might lead one to suspect its actual dependence on the Greek and Syriac versions of Ecclesiasticus. Whence it manifestly imported to determine whether, and if so, to what extent, the Hebrew fragments reproduced an original text of the book, or on the contrary, simply presented a late retranslation of Ecclesiasticus into Hebrew by means of the versions just named. Both Dr. G. Bickell and
Professor D. S. Margoliouth, that is, the two men who but shortly before the discovery of the Hebrew fragments of Ecclesiastus had attempted to retranslate small parts of the book into Hebrew, declared themselves openly against the originality of the newly found Hebrew text. It may indeed be admitted that the efforts naturally entailed by their own work of retranslation had especially fitted Margoliouth and Bickell for noticing and appreciating those features which even now appear to many scholars to tell in favour of a certain connexion of the Hebrew text with the Greek and Syriac versions. It remains true, however, that, with the exception of Israel Lévi and perhaps a few others, the most prominent Biblical and Talmudic scholars of the day are of the mind that the Hebrew fragments present an original text. They think that the arguments and inferences most vigorously urged by Professor D. S. Margoliouth in favour of his view have been disposed of through a comparison of the fragments published in 1899 and 1900 with those that had appeared at an earlier date, and through a close study of nearly all the facts now available. It is, however, certain that the Hebrew text of Ecclesiasticus, as we now possess it, is primitively Greek. This, as long ago as 1898, was admitted by T. Schlogl, and it is still accepted as a fact by the Hebrew scholars, as Schlogl's researches, in which he compared the Hebrew with the Greek and Syriac, an extensive mass of the latter has been published since then. Schlogl found that the Hebrew text of Ecclesiasticus, as we now possess it, is primitively Greek, and that a comparison of its extant MSS.—all apparently derived from a single Greek exemplar—shows that the primitive translation has been very often, and in many cases seriously, tampered with. The great uncial codices, the Vatican, the Sinaitic, the Ephraemi, and partly the Alexandrian, though comparatively free from the interpolations which have thus in a measure affected the text, are, on the whole, translated from the Greek text that seems to have been preserved in the Venetus Codex and in certain cursive MSS., though these have many glosses. Undoubtedly, a fair number of these glosses may be referred safely to the translator himself, who, at times, added one word or even a few words to the original before him, to make the meaning clearer or to guard the text against possible misunderstanding. But the great bulk of the glosses resemble the Greek additions in the Book of Proverbs; they are expansions of the thought, or hellenizing interpretations, or additions from current collections of gnomic sayings. The following are the best-ascertained results which flow from a comparison of the Greek version with the text of our Hebrew fragments. Oftentimes, the corruption of one or other copy may be discovered by a comparison of the fragments with the Greek; and, conversely, the Greek text is proved to be defective, in the line of additions or omissions, by reference to parallel places in the Hebrew. At times, the Hebrew discloses considerable freedom of rendering on the part of the Greek translator; or enables one to perceive how the author of the version mistook one Hebrew letter for another; or, again, affords us a means of discovering the nature and extent of the Greek additions. Lastly, the Hebrew text confirms the order of the contents in xxx—xxxvi which is presented by the Syriac, Latin, and Armenian versions, over against the unnatural order found in all existing Greek MSS. Like the Greek, the Syriac version of Ecclesiastus was made directly from the original Hebrew. This is well-nigh universally admitted; and a comparison of its text with that of the newly found Hebrew fragments should settle the point forever: as just stated, the Syriac version gives the same order as the Hebrew text for the contents of xxx—xxxvi; in particular, it presents mistaken renderings, the origin of which, while inexplicable by supposing a Greek original as its basis, is easily accounted for by reference to the Hebrew text. The Hebrew text from which it was made must have been very defective, as is proved by the numerous and important blanks in the Syriac translation. It seems, likewise, that the Hebrew has been rendered by the translator himself in a careless, and at times even arbitrary, manner. The Syriac version has all the less critical value at the present day, because it was considerably revised at an unknown date, by means of the Greek translation.

Of the other ancient versions of Ecclesiastus, the Old Latin is the most important. It was made before St. Jerome's time, although the precise date of its origin cannot now be ascertained; and the holy doctor apparently revised its text but little, previously to its adoption into the Latin Vulgate. The unity of the Old Latin version, which was formerly doubted,
has been of late seriously questioned, and Ph. Thiel-
mann, the most recent investigator of its text in this
respect, thinks that chs. xlv-l are due to a translator
other than that of the rest of the book, the former part
being of European, the latter and chief part of African,
origin. Conversely, the view formerly doubted by
Cornelius a Lapide, P. Sabatier, E. G. Bengel, etc.,
namely that the Latin version was made directly from
the Greek, is now considered as altogether certain. The
version has retained many Greek words in a latinized
form: eremos (vi, 3); eremi (v, 3); acheraios (xx, 33);
dieraios (xxiv, 41); perderes (xxvii, 9); etc., together with certain Gre-
cisms of construction; so that the text rendered into
Latin was unquestionably Greek, not the original He-
brew. It is indeed true that other features of the Old
Latin—notably its order for xxx-xxxvi, which
agrees with the Greek translation, and agrees with the
Hebrew text—seem to point to the conclusion that
the Latin version was based immediately on the origi-
nal Hebrew. But a very recent and critical examina-
tion of all such features in i-xili has led H. Her-
kenne to a different conclusion; all things taken into
consideration, he is of the mind that: “Nittitur Vetus
Latina textu vulgari graeco ad textum hebraeum alter-
us recensionis, post hoc scripta, in idem anno, ut
dictum est, anno 90 a.n.e. in Antiochii.” (In Ecclesiasticum, p. 34 sq.)
Together with greekized forms, the Old Latin translation of Ecclesiasticus presents many barbarisms and sole-
cisms (such as defunctio, i, 13; religiositas, i, 17, 18, 26; comptior, i, 24; receptibilis, ii, 5; peries, pericit, viii, 15; xxxvi, 7; odueto, ii, 2; v, 1, 10; etc.), which, to the ex-
tent in which they can be actually traced back to the origi-
nal form of the Greek text, show that the transla-
tor had but a poor command of the Latin language.
Again, from a fair number of expressions which are
certainly due to the translator, it may be inferred that,
at times, he did not catch the sense of the Greek, and
that at other times he was too free in rendering the text before him. The Old Latin version abounds in additional parallelisms not found in the Greek, but also to the Hebrew text. Such important additions—which often appear clearly so from the fact that they interfere with the poetical parallelisms of the book—are either repetitions of preceding statements under a slightly different form, or glosses inserted by the translator or the copists. Owing to the early origin of the Latin version (probably the second cen-
tury A.D.) it is not of entire parallelism with the Greek, but is in the same way corrected. The fact that both the Greek and Hebrew texts, a good edition of its primitive form, as far as this form can be ascertained, is one of the chief things to be desired for the textual criticism of Ecclesiasticus. Among the other ancient versions of the Book of Ecclesiasticus which are de-
ribed from the Greek, the Ethiopic, Arabic, and Cop-
tic are worthy of special mention.

X. AUTHOR AND DATE.—The author of the Book of
Ecclesiasticus is not King Solomon, to whom, as St.
Augustine bears witness, the work was oftentimes as-
scribed "on account of some resemblance of style" with
that of Proverbs, Ecclesiastes, and the Canticle of Can-
ticles, but to whom, as the same holy doctor says, "the
more learned" (apparently among the church writers of
the 3rd century) "know nothing at all that should not be re-
ferred" (On the City of God, Bk. XVII, ch. xx). At the present
day, the authorship of the book is universally
and rightly assigned to a certain "Jesus," con-
cerning whose person and character a great deal has
indeed been surmised but very little is actually known.
In the Greek prologue to the work, the author's proper
name is "Iassaph", and it is probably that this name is cor-
rected by the subscribions found in the original He-
brew: i, 27 (Vulg., i, 29); li, 30. His familiar surname
was Bôn Sirâ, as the Hebrew text and the ancient ver-
sions agree to attest. He is described in the Greek and Latin versions as "a man of Jerusalem" (l, 29), and internal
evidence (cf. xxiv, 13 sqq.; l) tends to confirm
the statement, although it is not found in the Hebrew.
His close acquaintance with "the law, the Prophets,
and the other books delivered from the fathers ", that
is, with the three classes of writings which make up
the Hebrew Bible, is distinctly borne witness to by
the prologue to the work; and the 367 idioms or phrases,
which the study of the Hebrew fragments has shown
to be derived from the sacred books of the Jews, are
an ample proof that Jesus, the son of Sirach, was thor-
oughly acquainted with the Biblical text. He was a
philosophical and ascetical writer, who wrote from
the nature of his thought, and he himself speaks of
the wider knowledge which he acquired by traveling
much, and of which he, of course, availed himself in
writing his work (xxxiv, 12). The particular per-
diod in the author's life to which the composition of the
book should be referred cannot be defined, whatever
conjectures may have been put forth in that regard by
some recent scholars. The data to which others have
appealed (xxx, 22 sqq.; xxxviii, 1-15; etc.) to prove
that he was a physician are insufficient evidence; while
the similarity of the names (Jason-Jesus) is no excuse
for those who have identified Jesus, the son of Sirach,
a man of manifestly pious and honourable character,
with the ungodly and hel lenizing high priest Jason
(17, 172 n. c. or concerning Jason's wicked deeds, see
II Mach., iv, 7-20).

The time at which Jesus, the author of Ecclesi-
asticus, lived has been the matter of much discussion in
the past. But at the present day, it admits of being
given with tolerable precision. Two data are particu-
larly helpful for this purpose. The first is supplied by
the Greek prologue, where Jesus, the son of Sirach of
Jesus of Sirach came into Egypt in the 20th year of
Ptolemy I Soter, long after which he rendered into Greek his grandfather's work.
The "thirty-eighth year" here spoken of by the translator does not mean that of his own age, for
such a specification would be manifestly irrelevant.
It naturally denotes the date of his arrival in Egypt with its reference verse, the xvi of rule of the thir-
teenth year of the Egyptian Ptolemy I Soter. The
Egyptian Ptolemy I Soter: and in point of
fact, the Greek grammatical construction of the pas-
sage in the prologue is that usually employed in the
Septuagint version to give the year of rule of a prince
(cf. Ageges, i, 1; ii, 1, 10; Zach., i, 7, 7; iv, 1 Mach.,
xxiv, 12; xiv, 27; etc.). There were indeed two Ptol-
emy's of the surname Soter, and Ptolemy III and Ptolemy VII (Phiesen). But to
decide which is the one actually meant by the author
of the prologue is an easy matter. As the first, Ptole-
my III, reigned only twenty-five years (247-222
b. c.), it must be the second, Ptolemy VII, who is
intended. This latter prince shared the throne along
with his brother (from 170 b. c. onwards), and after-
wards ruled alone (from 145 b. c. onwards). But he
was wont to reckon the years of his reign from the ear-
er date. Hence "the thirty-eighth year of Ptol-
emy Euergetes", which forms the title of Jesus, the
son of Sirach, came to Egypt, is the year 132 b. c.
This being the case, the translator's grandfather, the
author of Ecclesiasticus, may be regarded as having
been born and written this work after the passage of
twenty-five years before (between 190 and 170 b. c.), for
there can be no doubt that in referring to Jesus by means of the term pàntos and of the definite phrase ὁ πὰντος μόνον
‘Iouvοs, the writer of the prologue designates his
grandfather, and not a more remote ancestor. The
second datum that is particularly available for determin-
ing the time at which the writer of Ecclesiasticus lived
is supplied by the book itself. It has long been felt that
since the son of Sirach celebrates with such a genuine
and genuine glow of enthusiasm the deeds of "the high priest
Simon, son of Onias", whom he praises as the last in
the long line of Jewish worthies, he must himself have
been an eyewitness of the glory which he depicts (cf.
i, 1-16, 22, 23). This was, of course, but an inference,
and so long as it was based only on a more or less subjective appreciation of the passage, one can easily understand why many scholars questioned, or even rejected, its correctness. But with the recent discovery of the original Hebrew of the passage, there has come in a new, and distinctly objective, element, which places practically beyond doubt the correctness of the inference. In the Hebrew text, immediately after his eulogy of the high priest Simon, the writer subjoins the following fervent prayer: “May His [i.e. Yahweh’s] mercy be continually with Simon, and may He establish with him the covenant of Phineas, that will endure with him and with his seed, as the days of heaven” (I, 24). Obviously, Simon was yet alive when this prayer was thus formulated; and its actual wording is strongly implied in I, 14, manifestly that when the author’s grandson rendered it into Greek, at a date when Simon had been dead for some time, he felt it necessary to modify the text before him, and hence rendered it in the following general manner: “May His mercy be continually with us, and may He redeem us in His days.” Besides thus allowing us to realize the fact that Jesus, the son of Sirach, was a contemporary, not the high priest Simon, character of Ecclesiasticus affords us certain details which enable us to decide which of the two Simons, both high priests and sons of Onias and known in Jewish history, is the one described by the writer of the book. On the one hand, the only known title of Simon I (who held the pontificate under Ptolemy Soter, about 300 b. c.) which would furnish a reason for the great encomium passed on him in Ecc. I, is the surname “Just” (cf. Josephus, Antiq. of the Jews, Bk. XII, chap. ii, 5), whence it is inferred that he was a renowned high priest worthy of being celebrated among the Jewish heroes praised by the son of Sirach. On the other hand, such details given in Simon’s panegyric, as the facts that he repaired and strengthened the Temple, fortified the city against siege, and protected the city against invaders (cf. Eccles., i, 1-4), are in close agreement with what is known of the times of Simon II (about 200 b. c.). While in the days of Simon I, and immediately after, the people were undisturbed by foreign aggression, in those of Simon II the Jews were sorely harassed by hostile armies, and their territory was invaded by Antiochus, as we are informed by Josephus, in the Jews, Bk., chap. XIII, 11, chap. xiv. It was also in the later time of Simon II that Ptolemy Philopator was prevented only by the high priest’s prayer to God, from desecrating the Most Holy Place; he then started a fearful persecution of the Jews at home and abroad (cf. I11 Mach., ii, iii). It appears from these facts—to which others, pointing in the same direction, could easily be added—that the author of Ecclesiasticus lived in the latter part of the second century b. c. As a matter of fact, recent Catholic scholars, in increasing number, prefer this position to that which identifies the high priest Simon, spoken of in Ecclus., I, with Simon I, and which, in consequence, refers the composition of the book to about a century earlier (about 280 b. c.).

THE METHOD OF COMPOSITION.—At the present day, there are two principal views concerning the manner in which the writer of Ecclesiasticus composed his work, and it is difficult to say which is the more probable. The first, held by many scholars, maintains that an impartial study of the topics treated and of their actual arrangement leads to the conclusion that the whole book is the work of a single mind. Its advocates claim that, throughout the book, one and the same general purpose can be easily made out, to wit: the purpose of teaching the practical value of Hebrew wisdom, and that one and the same method in handling the materials can be readily noticed, the writer always showing wide acquaintance with men and things, and never citing any exterior authority for what he says. They affirm that a careful examination of the contents discloses a distinct unity of mental attitude on the author’s part towards the same leading topics, towards God, life, the Law, wisdom, etc. They do not deny the existence of differences of tone in the book, but think that they are found in various paragraphs relating to minor topics; that the diversities thus noticed do not go beyond the range of one man’s experience; that the author very likely wrote at different times, and with different moods; and that the whole book was not composed at one time. It is certain, so that it is not to be wondered at if pieces thus composed bear the manifest impress of a somewhat different frame of mind. Some of them actually go so far as to admit that the writer of Ecclesiasticus may at times have collected thoughts and maxims that were already in current and popular use, may even have drawn material from collections of wise sayings no longer extant or from unpublished discourses of sages; each and all, are positive that the author of the book “was not a mere collector or compiler; his characteristic personality stands out too distinctly and prominently for that, and notwithstanding the diversified character of the apocryphal, they are all the outcome of one connected view of life and of the world” (Scheil).

The second view maintains that the Book of Ecclesiasticus was composed by a process of compilation. According to the defenders of this position, the compiled character of the book does not necessarily conflict with a real unity of general purpose pervading and connecting the elements of the work; such a purpose proves, indeed, that one mind has bound those portions of Ecclesiasticus which are not original, that on the whole, the book is a compilation. Briefly stated, the following are the grounds for their position. In the first place, from the very nature of his work, the author was likely a “gleaner after the grape-gatherers”; and in thus speaking of himself (xxxvi, 16) he gives us to understand that he was a collector or compiler. In the second place, the structure of the work still betrays a composition in process. There is a former or real appendix to the book, and was added to it after the completion of the work, as is proved by the colophon in I, 29 sqq. The opening chapter reads like a general introduction to the book, and indeed as one different in tone from the chapters by which it is immediately followed, while it resembles some distinct collections which are marked by the address of a certain number of chapters commonly, beginning the second chapter (xxiv, 1), is a prayer for the Jews of the Dispersion, altogether unconnected with the sayings in verses 20 sqq. of the same chapter; ch. xliii, 15-1, 26, is a discourse clearly separate from the prudential maxims by which it is immediately preceded; chs. xvi, 24; xxiv, 1; xxxix, 16, are new starting-points, which, no less than the numerous insertions as marked by the address “wise saying” (ch. xii, 1; iii, 19; iv, 1, 23; vi, 18, 24, 33; etc.), and the peculiar addition in I, 27, 28, tell against the literary unity of the work. Other marks of a complicative process have also been appealed to. They consist in the significant repetition of several sayings in different places of the book (cf. xx, 32, 33, which is repeated in xlii, 17b, 18; etc.); in the marked presence of discussion of the doctrine of the law (ch. xvi; chs. xvi; xxxix, 21-41; xl, 11-11; etc.); in certain topical headings at the beginning of special sections (cf. xxxii, 12; xli, 16; xlvi, 1, in the Hebrew); and in an additional psalm or canticle found in the newly discovered Hebrew text, between ii, 12, and ii, 13: all of which are best accounted for by the use of several
smaller collections containing each the same saying, or differing considerably in their general tenor, or supplied with their respective titles. Finally, there seems to be an historical trace of the compulsory character of Ecclesiasticus in a second, but unauthentic, prologue to the book, which is found in the “Synopsis Sacrae Scripturae”. In this document, which is printed in the works of St. Athanasius and also at the beginning of Ecclesiastus in the Compltensian Polyglot, the actual reduction of the book is ascribed to the Greek translator as a regular process of compilation of detached hymns, sayings, prayers, etc., which had been left him by his grandfather, Jesus, the son of Sirach.

VII. DOCTRINAL AND ETHICAL TEACHING.—Before seeing them summarily the principal teachings, doctrinal and ethical, contained in the Book of Ecclesiasticus, it will not be amiss to premise two remarks which, however, elementary, should be distinctly borne in mind by anyone who wishes to view the doctrines of the son of Sirach in their proper light. First, it would be obviously unfair to require that the contents of this Sapiential book should come fully up to the standards of a New Testament writer, however great that writer may be. Neither should equal in clearness and precision the dogmatic teachings embodied in the sacred writings of the New Testament or in the living tradition of the Church; all that can be reasonably expected of a book composed some time before the Christian Dispensation, is that it shall set forth substantially good, not perfect, doctrinal and ethical tenets in a form which is to be in accord with a sound common sense demand that the silence of Ecclesiasticus concerning certain points of doctrine not be regarded as a positive denial of them, unless it can be clearly and conclusively shown that such a silence must be so construed. The work is mostly made up of unconnected sayings which bear on all kinds of topics, and on that account, hardly ever, if ever at all, will a scholar be able to pin down on the actual motive which prompted the author of the book either to mention or to omit a particular point of doctrine. Nay more, in presence of a writer manifestly wedded to the national and religious traditions of the Jewish race, as the general tone of his book proves the author of Ecclesiasticus to have been, every scholar will deny that the author himself has any part toward regarding some important doctrine, such for instance as that of the Messias, is no proof whatever that the son of Sirach did not abide by the belief of the Jews concerning that doctrine, and, in reference to the special point just mentioned, did not share the Messianic expectations of his time. As can readily be seen, the two general remarks just made simply set forth elementary canons of historical criticism; and they would not have been dwelt on here were it not that they have been very often lost sight of by Protestant scholars, who, biased by their desire to disprove the Catholic doctrine of the inspired character of Ecclesiasticus, have done their utmost to deprecate the doctrinal and ethical teaching of this deutero-

Catholic. The following are the principal dogmatic doctrines of Jesus, the son of Sirach. According to him, as according to all the other inspired writers of the Old Testament, God is one and there is no God beside Him (xvii, 5). He is a living and eternal God (xvii, 1), and although His greatness and mercy exceed all human comprehension, yet He makes Himself known to man through His wonderful works (xvi, 18—xxviii, 4). He is the Creator of all things (xviii, 1; xxiv, 12), which He produced by His word of command, stamping them all with the marks of greatness and goodness (xii, 15—xxiii, etc.). Man is the choice handi-

work of God, who made him for His glory; set him as king over all other creatures (xvii, 1—8), bestowed upon him the power of choosing between good and evil (xv, 14—22), and will hold him accountable for his own personal deeds (xv, 9—16), for while tolerating moral evil He reproves it and enables man to avoid it (xv, 11—21). In dealing with man, God is no less merciful than righteous: “He is mighty to forgive” (xvi, 12), and: “How great is the mercy of the Lord, and His forgiveness to them that turn to Him” (xvii, 28); yet no one should presume on the Divine mercy and hence delay his conversion, “for His wrath shall come on a sudden, and in the time of vengeance He will destroy thee” (v, 6—9). From among the children of men, God selected for Himself a special nation, Israel, in the midst of which He wills that wisdom should reside (xxiv, 13—16), and in behalf of which the son of Sirach offers up a fervent prayer, replete with touching re-

membrances of God’s mercies to the patriarchs and the prophets of Israel, and exalting the union and exaltation of the chosen people (xxvi, 1—19). It is quite clear that the Jewish patriot who put forth this petition to God for future national quiet and prosperity, and who furthermore confidently expected that Elia’s return would contribute to the glorious restoration of all Israel (cf. xviii, 10), looked forward to the introduction of Messianic times. It remains, however, to be accounted for, does he not speak anywhere of a special interposition of God in behalf of the Jewish people, or of the future coming of a personal Messias. He manifestly alludes to the narrative of the Fall, when he says: “From the woman came the beginning of sin, and by her we all die” (xxv, 33), and apparently con-

formed with the limitations of Jewish exegesis in the presentation of the miseries and passions that weigh so heavily on “the children of Adam” (xi, 1—11). He says very little concerning the next life. Earthly rewards occupy the most prominent, or perhaps the sole, place, in the author’s mind, as a sanction for present good or evil deeds (xiv, 22—xx, 6; xvi, 1—14); but this will not appear strange to anyone who is acquainted with the limitations of Jewish exegesis in the treatment of certain ancient parts of the Old Testament. He depicts death in the light of a reward or of a punishment, only in so far as it is either a quiet demise for the just or a final deliverance from earthly ills (xii, 3, 4), or, on the contrary, a terrible end that overtakes the sinner when he least expects it (ix, 16, 17). As regards the under-

world, or rather the hereafter, it appears to the writer nothing but a mournful place where the dead do not praise God (xvii, 26—27).

The central, dogmatic, and moral idea of the book is that of wisdom. Ben Sira describes it under several important aspects. When he speaks of it in relation to God, he almost invariably invests it with personal attributes. It is eternal (i, 1), unsearchable (i, 6, 7), universal (xiv, 6 sqq.). It is the creative force, or creative power of the world (xxiv, 3 sqq.), yet is itself created (i, 9; also in Greek: xxiv, 9), and is nowhere treated as a distinct, subsisting Divine Person, in the Hebrew text. In relation to man, wisdom is depicted as a quality which comes from the Almighty and works most excellent effects in those who love Him (i, 10—13). It is “identified with the power of life” (iii, 19—xx, 32, 33). It is a priceless treasure, to the acquisition of which one must devote all his efforts, and the imparting of which should never grudge (iii, 19—xx, 32, 33). It is a disposition of the heart which prompts man to prac-

tise the virtues of faith, hope, and love of God (ii, 8—10), of trust and submission, etc. (i, 18—23; x, 23—27; etc.); which also secures for him happiness and glory in this life (xxiv, 14—20; xxxii, 37, 38; etc.). It is a frame of mind which prevents the discharge of the ritual law, especially the offering of sacrifices, from becoming a heartless compliance with mere outward
observances, and it causes man to place inward righteousness far above the offering of rich gifts to God (xxxv). As can readily be seen, the author of Ecclesiastices inculcated in all this a teaching far superior to that of the Pharisees of a somewhat later date, and in no way inferior to that of the prophets and of the other prophetic writers before him. Highly commendable, too, are the numerous pithy sayings which the son of Sirach gives for the avoidance of sin, wherein the negative part of practical wisdom may be said to consist. His maxims against pride (iii, 30; vi, 2–4; x, 14–30; etc.), covetousness (iv, 36; v, 1; xi, 18–21), envy (xxx, 22–27; xxxvi, 22), impurity (ix, 1–13; xix, 1–3; etc.), anger (vii, 11–14; x, 6), incontinence (xxxv, 5; xxxi, 13), are of the sort that are best (xv, 30; vi, 13, 14; xi, 2, 3; i, 36–40; v, 16, 17; xviii, 15–27; etc.), evil company (xi, 31–36; xii, 11–18; etc.), display a close observation of human nature, stigmatize vice in a forcible manner, and at times point out the remedy against the spiritual distemper. Indeed, it is probably no less because of the success which Ben Sirî attained in branding vice than because of that which he obtained in directly inculcating virtue, that his work was so willingly used in the early days of Christianity for public reading at church, and bears, down to the present day, the pre-eminent title of "Ecclesiastes".

Together with these maxims, which nearly all bear on what may be called individual morality, the Book of Ecclesiastes contains valuable lessons relative to the duties which make up human society. The natural basis of society is the family, and the son of Sirach supplies a number of pieces of advice especially appropriate to the domestic circle as it was then constituted. He would have the man who wishes to become the head of a family determined in the choice of a wife by her moral worth (xxxvi, 23–26; xl, 19–23). He repeatedly describes the advantages of consulting the possession of a good wife, and contrasts with them the misery entailed by the choice of an unworthy one (xxvi, 1–24; xxv, 17–30). The man, as the head of the family, he represents indeed as vested with more power than would be granted to him among us, but be does not neglect to point out his numerous responsibilities towards those under him; to his care he devotes his day, and he is compelled by the circumstances of his office to bear their burdens, and perhaps might more particularly be tempted to neglect (vii, 25 sqq.), and his slaves, concerning whom he writes: "Let a wise servant be dear to thee as thy own soul" (vii, 23; xxxiii, 31), not meaning thereby, however, to encourage the servant's idleness or other vices (xxxii, 25–30). The duties of children towards their parents are often and beautifully insisted upon (vii, 29, 30, etc.). The son of Sirach devotes a variety of sayings to the choice and the worth of a real friend (vi, 6–17; ix, 14, 15; xii, 8, 9), to the care with which such a one should be preserved (xxvii, 25–32), and also to the worthlessness and dangers of the unfaithful friend (xxxvii, 1–6, 17–21; xxxii, 6). The author has no brief against those in power, but on the contrary considers it an expression of God's will that such should be exalted, and others in humble, stations in life (xxxii, 7–13). He conceives of the various classes of society, of the poor and the rich, the learned and the ignorant, as able to become endowed with wisdom (xxxvii, 21–29). He would have a prince bear in mind that he is in God's hand, and owes equal justice to all, rich and poor (v, 18; x, 1–13). He bids the rich give alms, and visit the poor, and yet, too, are the numerous pithy sayings (xxvii, 1–7; etc.), for almsgiving is a means to obtain forgiveness of sin (iii, 33, 34; vii, 10, 36), whereas hard-heartedness is in every way hurtful (xxxv, 25–29). On the other hand, he directs the lower classes, as we might call them, to show themselves submissive to those in higher condition and to bear patiently with those who cannot be safely and directly resisted (vii, 1–13; ix, 18–21; xiii, 1–5). Nor is the author of Ec-
clesiastes anything like a misanthrope that would set himself up resolutely against the legitimate pleasures and the received customs of social life (xxxi, 12–42; xxxii, 1 sqq.); while he directs severe but just rebukes against the parasite (xxix, 28–35; xl, 29–32).

Finally, he has favourable sayings about the physician (xxviii, 1–15), and about the dead (vii, 37; xxxviii, 16–24); and long words of caution against the dan-
gers which one incurs in the pursuit of business (xxv, 28; xiv, 1–4; vii, 15, 16).

1. Introductory: T. SCHOLLE* (Paris, 1836);

Eccleston, Samuel, fifth Archbishop of Baltimore, U. S. A., b. near Chestertown, Maryland, 27 June, 1801; d. at Georgetown, D. C., 22 April, 1851. His father was Samuel Eccleston, an Episcopalian. After his death in 1817 he was sent to England. He was ordained a priest in 1828, and after he was consecrated titular Bishop of Thermia, and coadjutor with the right of succession for the Diocese of Baltimore, and, upon the death of Archbishop Whitfield, 19 October, 1834, succeeded to the metropolitan see. He became also administrator of Richmond, until Bishop Whelan's appointment in 1841.

During his first term, new churches were erected. He contributed largely of his own means towards the building of the cathedral. To provide for German Catholics the Redemptorists were invited from Austria in 1841; the Brothers of the Christian Schools were introduced into the United States in 1846, establishing Calvert Hall School at Baltimore, and the same year the Brothers of St. Patrick took charge of the annual labours of the Redemptorists near that city. An important event was the opening, 1 November, 1849, of St. Charles's College, founded by the generosity of Charles Carroll of Carrolton. Five provincial councils, the third to the seventh inclusive, were held at Baltimore under Archbishop Eccleston. (See Baltimore, Archdiocese of.)

J. P. W. McNeele.

Eccleston, Thomas, of thirteenth-century Friar Minor and chronicler, dates of birth and death unknown. He styles himself simply "Brother Thomas", and Bale seems to have first given him the title "of Eccleston". He appears to have entered the order about 1232–3 and to have been a student at Oxford between 1230 and 1240. After the latter year he was ordained, and in 1241; it is not known when he appeared to have ever held any office in the order. He is chiefly famous for his chronicle "De Adventu Fratrum Minorum in Anglia", which extends from the coming of the friars into England under Agnellus of Pisa, in 1224, up to about 1258, when the work was probably completed. Eccleston declares that he spent twenty-six years collecting material for his chronicle, most of the information it contains being derived from
personal knowledge or verbal communication, although he seems to have had access to certain written documents now lost. His "De Adventu" is a collection of notes rather than a finished work. He describes with extreme simplicity and vividness what has been called the heroic period of the Franciscan movement in England. In spite of the absence of dates and of any chronological sequence and of its tendency to extol the English province above all others, his chronicle is very valuable and is accurate and reliable in all that concerns the establishment and spread of the Friars Minor in England. Incidentally it throws some light on the trend of early Franciscan events in England, and on the various MSS. of the "De Adventu", all of which go back to one lost archetype, are known to scholars. The chronicle has been often edited, in part by Brewer in the "Monumenta Franciscana" (Rolls Series, London, 1855); and by Howlett in the same series (1882); by the Friars Minor at Quaracchi (in Anecleta Franciscana, I, 1885, 217-57); by Liersmann in the "Monumenta Germanica," (XXVIII, Hanover, 1885, 560-69). A critical edition of the complete text is much needed. There is an English translation of Ecleeston's work by Father Cuthbert, O.S.F.C., "The Friars and how they came to England" (London, 1903).

Echard, Jacques, historian of the Dominicans, b. at Rouen, France, 22 Sept., 1614; d. at Paris, 15 March, 1724. As the son of a wealthy official of the king he received a thorough classical and secular education. He entered the Dominican Order at Paris and distinguished himself for his assiduity in study. When Jacques Quétif, who had planned and gathered nearly one-fourth of the material for a literary history of the Dominican Order, died in 1688, Echard was commissioned to complete the work. After much labour and extensive research in most European libraries this monumental history appeared in two quarto volumes under the title "Scriptores ordinis praedicatorum recensiti, notse hic historici illustrati" etc. (Paris, 1721). Beside a sketch, based chiefly on Pignon and Salanec, and a list of each writer's works, with the dates and particulars of the considerations found in the works, Echard enumerates the unpublished, spurious, and doubtful works, with valuable indications as to their whereabouts. He displays throughout a keen, sane, and incisive criticism which has been highly praised by competent critics (Journal des Savants, LIX, 574). A new and revised edition was prepared in 1808 by Rémon Coulon, O.P.

Echard, Baltasar de, painter, b. at Zumaya, Guipuzcoa, Spain, in the latter part of the sixteenth century; d. in Mexico about the middle of the seventeenth. As there was a painter of the same name, thought to be his son, he is known as Echave the Elder. He was one of the earliest Spanish artists to reach Mexico, arriving at about the same time, near the end of the sixteenth century, as Sebastian Arteaga and Alfonso Vasquez. He was then a young man, and there is a tradition that his wife, also a painter, was his instructor. Echave, whose subjects are chiefly religious, had especial skill in composition, and his best works, which have much charm of colour and tendereness of treatment, are thought to recall those of Guerino. In the galleries of the National Academy of San Carlos, Mexico City, there are many of his best pictures, notably "The Adoration of the Magi", "Christ in the Garden", "The Martyrdom of San Antoniano", "The Holy Family", "The Visitation", "The Holy Sepulchre", "Saint Ann and the Virgin", "The Apparition of Christ and the Virgin to San Francisco", "The Martyrdom of San Ponciano", and "Saint Cecilia." In the church of San José el Real, generally known as the "Profesa", are several others, including "St. Isabel of Portugal", while he executed for the church of Santiago Chalteco fifteen altar-panels. In the cathedral is his "Candelaria" and a "San Sebastian", believed to be by his wife. Among the smaller paintings of Echave is one of San Antonio Abad with St. Paul, the first hermit. The artist also had a reputation as an author, among his works being one on the Biscayan language.

Augustus van Cleef.

Echinus, a titular see of Thessally, Greece. Echinius ('Exéne), also ('Exénius) was situated on the northern shore of the Gulf of Lamia (Molucia Sinus). To-day it is a small village, Akhinos (Aχηνευ), of 500 inhabitants, in the demes of Philara and the eparchy of Pithithosis. On the conical hill which rises above the village are remains of the old walls. The city has been destroyed by earthquakes and rebuilt many times, particularly in 426 B. C. and A. d. 551. Philip II of Macedon left it to the Maceans, and Philip V took it from the Etoians. It was fortified by Justinian. The see, mentioned in "Notitia episcopatum" of the tenth or eleventh century, is a suffragan of Larissa. Three bishops are known: Theodore in 431, Peter in 451, and Aristotle in 495 (Lequien, Orients christianus, II, 115).

Earl, Northern Greece (London, 1833), II, 80; Pauly-Weis- sowa, Real-Encycl., s. v.

S. Pétridès.

Echternach, Abbey of (also Eternach, Lat. Eternacensis), a Benedictine monastery in the County of Luxembourg, in the Grand Duchy of Luxembourg and the Diocese of Trier. It was founded in 698 by St. Willibrord, an English monk of Ripon, who became the Apostle of Friesland and first Bishop of Utrecht. Although a bishop, he ruled the monastery as abbott until his death in 739. The abbey stood near Tier on land given him for the purpose by St. Irmine, Abbess of Ouren and daughter of Dagobert II. It had many royal and other benefactors, including Pepin and Charlemagne, who conferred upon it great privileges. In 859 the monks were displaced by secular canons, as was so often the case with the early monasteries, but in 971 Emperor Otto I restored the Benedictine life there, bringing forty monks thither from the great Abbey of St. Maxima in Trier. It was larger before the Reformation, but was reduced to an abbey. The monastery became very celebrated and was, during the Middle Ages, one of the most important in Northern Europe. It continued to flourish until the French Revolution, when it was suppressed, and the monks dispersed. The buildings put up by St. Willibrord were burnt down in 1017, and a new abbey was then erected. The church was Romanesque in style, but Gothic additions and alterations were made in the fourteenth and sixteenth centuries. In 1797 it was sold and became a pottery manufactory, but in 1861 it was reacquired by the townspeople, through whose generosity and devotion it was restored and made a parish church. The reconsecration took place with great solemnity in 1894. After that date of the chapter, the reconstruction and decoration has continued steadily. It is popularly called "the cathedral", though not the seat of a bishop. The conventual buildings, originally erected in 1017-31, have been frequently rebuilt and added to, and they were entirely modernized in 1732. At the suppression they became State property and have for many years served as barracks. The library was set apart for a "Library Museum", of very early date which it contained; some of them are now in the Bibliothèque Nationale at Paris.

The Dóning Procession.—The Abbey of Echternach owes much of its fame, especially in modern times,
to the curious "dancing procession" which takes place annually on Whit Tuesday, in honour of St. Willibrord. The cult of the saint may be traced back almost to the death of pilgrims to his tomb in the abbey church has never ceased. The Emperors Lothair I, Conrad, and Maximilian may be numbered amongst them. The tomb stands before the high altar, and has been recently entirely renewed. On it is a recumbent effigy of the saint, and amongst other relics preserved there are a mitre, crosier, and chasuble said to have been used by him. The origin of the procession cannot be stated with certainty. Authentic documents of the fifteenth century speak of it as a regular and recognized custom at that time, but for earlier evidence there is only tradition to depend upon. The legend is that in 1347, when a pestilence raged amongst the cattle of the neighbourhood, the symptoms of which were a kind of trembling or nervous shaking followed by speedy death, the people thought that by imitating these symptoms, more or less, whilst imploring the intercession of St. Willibrord, the evil might be stayed. The desired result was obtained, and so the dancing procession to the saint's tomb became an annual ceremony. Nowadays it is made an act of expiation and penance on behalf of afflicted relations and especially in the case of victims of the Black Death. Vitally, it is a prayer for the dead, and all nervous diseases. The function commences at nine o'clock in the morning at the bridge over the Sicca, with a sermon by the parish priest (formerly the abbot of the monastery); after this the procession moves towards the basilica, through the chief streets of the town, a distance of about 1½ kilometres. Three steps forward are taken, then two back, so that five steps are requisite in order to advance one pace. The result is that it is well after midday before the last of the dancers has reached the church. They go four or five abreast, holding each other by the hand or arm. Many bands accompany them, playing a traditional melody which has been handed down for centuries. A large number of priests and religious also accompany the procession and not infrequently there are several bishops as well. On arrival at the church, the dance is continued around the tomb of St. Willibrord, when litanies and prayers in his honour are recited, and the whole concludes with Benediction of the Blessed Sacrament. Though curious and even somewhat ludicrous, the people perform it in all seriousness and as a true act of devotion. It usually attracts to Eckersbach a great number of pilgrims and visitors, as many as ten thousand people generally take part in it. The procession took place annually without interruption until 1777. Then, on account of some abuses that had crept in, the music and dancing were forbidden by the Archbishop of Trier, and in 1786 Joseph II abolished the procession altogether. Attempts were made to revive it ten years later, but without success. It was recommenced, however, in 1802 and has continued ever since. In 1826 the Government tried to change the day to a Sunday, but since 1830 it has always taken place on Whit Tuesday, as formerly.

G. CYPRIN ALSTON.

Echter von Mespelbrunn, JULIUS, Prince-Bishop of Würzburg, b. 18 March, 1545, in the Castle of Mespelbrunn, Spessart (Bavaria); d. 13 Sept., 1617, at Würzburg. Descended from an ancient family in the service of the archbishops of Mainz, he received a good education in the schools of that city, also at Louvain, Douai, Paris, Angers, Pavia, and Rome; it was in Rome that he became a licentiate of canon and civil law. In 1567 he entered on his duties as canon of Würzburg, an office to which he had been appointed in 1554; in 1570 he became the dean of the cathedral chapter, and in 1573, at the age of twenty-eight, even before his ordination to the priesthood, was appointed Prince-Bishop of Würzburg. Various causes had combined to bring the diocese into a sad state. Deeply in debt and poorly administered, it had an almost entirely Protestant population. The clergy, in point of virtue and learning, were for the most part unprofitable. Their leader was adverse to any ecclesiastical reform. During the first ten years of Echter's government the attempt to unite the Abbey of Fulda and the Bishopric of Würzburg, after the deposition of the Prince-Abbot Balthasar von Dernbach, caused much confusion. This was due to the youthful ambition of Echter, and not, as some wish to interpret it, a sign of any anti-Catholic sentiments on his part. From the outset he endeavoured to carry out a thorough ecclesiastical restoration. For this reason he encouraged, as far as possible, the Jesuits and promoted their beneficent ministry. In the same spirit he conceived the plan of founding a university at Würzburg, and despite all difficulties it was solemnly opened (2 Jan., 1582) and became a model of all similar undertakings. Under the Jesuits it flourished, grew rapidly, and furnished the see with the priests and officials needed to counterbalance the more or less irreligious temper of the population. The bishop was now able to take decisive steps against Protestantism. He banished all Lutheran preachers from his territory and removed all priests who were unwilling to observe the discipline of the church. The officials had to be Catholics, and none but Catholic teachers could be appointed. He began, moreover, courses of careful instruction for non-Catholics, and to some extent threatened them with penalties and even with banishment. Within three years about 100,000 returned to the Catholic Church. Public worship was also improved by the introduction of new devotions, processions, and the establishment of confabratories. Bishop Echter restored ruined monasteries or devoted their revenues to the erection of new parishes and to the building of three hundred new churches. The tapering towers of these churches, called after the bishop "Julius towers", still preserve his memory. His most beneficial and lasting monument, after the university, is the Julius Hospital, which he founded as a refuge for the abandoned monastery of Heiligenthal. By skilful administration he improved the decadent economic conditions of his ecclesiastical states, reduced taxes, perfected the administration of justice, and established many primary schools. In a word, he proved himself one of the most capable rulers of his time. Not only in his own diocese did he display an extraordinary and varied activity, but as the founder and soul of the Catholic League, he exercised a decisive influence on the future of Germany.

PAULUS SCHRÖDER.

Eck (ECKIUS), JOHANN, theologian and principal adversary of Luther, b. 15 Nov., 1486, o. Eck in Swabia, d. 10 Apr., 1543, at Ingolstadt. His family name was Maier, and his father, Michael Maier, was for many years magistrate in the town, the Latinized name of which, Eckius or Eccius, was adopted after 1505 by Johann. His uncle, Martin Maier, pastor at Rothenburg on the Neckar, received Johann in his house (1495) and educated him. In 1498, when twelve years old, he was admitted to the University; thence he went in 1499 to Tübingen where he received the degree of Master of Arts in 1501; then to Cologne and in 1502 to Freiburg in the Breisgau. After his graduation in the faculty of arts
he began the study of philosophy and theology, took courses at the same time in jurisprudence, physics, mathematics, and geography, joined the Humanistic movement, and in addition to Latin, learned Hebrew and Greek. Among his instructors at the university were many distinguished scholars. His uncle now withdrew his allowance and Eck was obliged to earn his livelihood as a tutor while continuing his studies. In 1505 he was appointed rector of the Artisienburse zum Plun, i.e., principal of the hall for students in arts at Freiburg, and received the degree of Bachelor of Theology the same year. In 1508, when twenty-four years old, he received the degree of Doctor of Theology. He had been ordained to the priesthood in 1508 with a papal dispensation from the age requirement. Shortly after graduating as doctor, he was invited (1510) by the Dukes of Bavaria to the professorship of theology in Ingolstadt. He was appointed pro-chancellor of the university in 1512, and during his professorate of thirty-two years filled repeatedly the offices of dean, pro-rector, and rector; he also served as pastor and was appointed canon in Eichstatt. At Freiburg and during his earlier years at Ingolstadt, his literary activity was remarkable, not only in theology but also in other departments of science where he had been educated. His writings, which have been preserved partly in print and partly in MS, engaged in geographical research and published a series of philosophical works, some of which were to serve as textbooks in the faculty of arts at Ingolstadt. In these writings he attempts to combine in a rational synthesis the advantages of the older philosophy with those of the new. His principal theological work during this period, entitled "Chrysopassus," treats of predestination with special reference to the dogmas of grace and free will which were so soon to become, in consequence of Luther's outbreak, the centre of sharp discussion. The tenor of this treatise, written when its author was only twenty-eight years old, evinced both confidence and modesty.

Luther's appearance, and especially the Disputation at Leipzig (1519), formed the turning-point in Eck's intellectual development and in his activity as a theologian. Thenceforth he is a prominent figure in the history of that period. With a clear insight into the meaning of Lutheranism, he was the first to champion the cause of Catholic teaching against Protestant error; and he became the Lutheran theologian's primary and principal critic. Eck was thoroughly equipped in theology. The rest of his life was spent in conflict with the Reformers in Germany and Switzerland. He defended the Catholic Church, its doctrines and its institutions, in his writings, in public debates, in his speeches at the diets, and in his diplomatic missions. For the betterment of ecclesiastical life and the spread of genuine reform he laboured earnestly by preaching to the people and by insisting on the scientific education of the clergy. As a reply to Luther's "theses" he wrote his "Obelisc," originally intended solely for the Bishop of Eichstatt. Both Luther and Karlstadt answered bitterly and then it was agreed to submit the points at issue to the test of a public debate, which took place at Leipzig, 1519. During this time, July 1519, Eck came off victorious, exposed Luther's heresy, and won over as a loyal adherent to the Catholic standard, George, Duke of Saxony. During the same year he published several essays attacking the tenets of Luther, and grew steadily in prominence as an authority on theological questions. In 1520 he visited Rome to report on the condition of affairs in Germany and the Netherlands, and upon his return was elected sub-dean. He submitted his essay on the Primacy of Peter to Leo X, was appointed prothonotary Apostolic, and was charged as papal legate, along with the two other legates, Aleander and Caracciolo, to carry out in Germany the provisions of the Bull "Exsurge Domine," which excommunicated Luther and condemned his 41 theses. The execution of this mandate was beset with difficulties on every side. Eck, through his Epistles ad Carolum V (1521), admonished Emperor Charles to enforce the papal ban. In the same year he went to Rome again, principally at the behest of the Bavarian dukes for whom he acted as counsellor in ecclesiastical affairs, and made a third visit to Rome in 1523. Meanwhile (1522) he had induced the Bavarian duke to publish an edict in defence of the Catholic Faith. While in Rome he procured for the dukes, among other measures, a privilege for the appointment of the bishops, decrees for the moral reformation of the clergy; and furthermore the right to appropriate, for use against heretics and Turks, a fifth part of all church revenues.

Eck in the meantime combated Lutheranism by his letters and essays. Between the years 1522 and 1526 he published eight voluminous treatises against Luther. Through his influence the University of Ingolstadt retained its strictly Catholic attitude and strenuously opposed the rising Protestant institutions. Eck had also a considerable share in organizing the "Catholic Federation," founded 5 June, 1524, by the leaders in Church and State for the purpose of safeguarding the ancient faith and enforcing the Edict of Worms. He took an active part in the preparation of the traditional doctrines of the Church against Zwingli and his adherents, and participated in the religious discussion in Baden (1526). When the Protestants, at the Diet of Augsburg in 1529, promulgated the "Augsburg Confession," defining their religious views, Eck headed the Catholic champions upon whom the refutation of the articles in this confession devolved. Together with Wimpina and Coehlincus he represented the Catholic party at the conference (16 Aug.) between Catholic and Lutheran theologians relative to the "Confession" and its "Confutatio:" and as theologian he served on the sub-committee which canvassed the results of the conference. Zwingli also had presented at Augsburg a Confession of Faith, and this Eck alone refuted. Eck then drew up 404 heretical theses upon which he challenged the Protestant theologians to public debate. The challenge was not accepted; the only answer from the Protestant party was a torrent of abuse. In the negotiations relative to the Council of Trent, Eck was consulted by the emperor, Charles V, as well as by the pope, Paul III, and was charged with the so-called "Cochlaeus" and "Chrysopassus" cases. At the religious disputation in Worms (1540), Eck again appeared as the chief Catholic representative and debated with Melancthon on the issues involved in the "Augsburg Confession." This discussion was continued during the Diet of Ratisbon (1541) to which, besides Eck, the emperor delegated as spokesmen on the Catholic side, Julius Pflug and Gropper. Eck maintained clearly and decisively the Catholic position, and quite disapproved the "Ratisbon Interim." He also went on a mission to England and the Netherlands in the interest of the Catholic cause. In 1529 the bishops of Denmark invited Eck and Coehlincus to the discussion at Copenhagen; but neither appeared. Eck fully deserved the promise of his contemporaries, "the father of his country," of which he showed himself the most distinguished theologian of the time in Germany, the most scholarly and courageous champion of the Catholic Faith. Frank and even in disposition, he was also inspired by a sincere love of truth; but he showed none less than an intense self-consciousness and the jovial bluntness of speech which characterized the men of that day. His indomitable courage, his hatred of heresy which he opposed him, publicity, fueled him with drunkenness and immorality; but the general tone of the writings published against Eck and the readiness of the Protestants to calumniate their victorious opponent, arouse strong suspicion as to the truth of these accusations and make them, so far as the evi-
ECKART

Becker, ANSELM, missionary, b. at Bingen, Germany, 4 August, 1721; d. at the College of Polstok, Polish Russia, 29 June, 1809. Entering the Society of Jesus at nineteen, he was sent as a missionary to Brazil. Two years after his arrival in that country, he and his brethren were seized like felons and conducted to Portugal, where they languished in prison till death released them or till the king, in whose name it was all done, was summoned by his own Judge. Father Eckart was confined for eighteen years in the underground dungeons of Almeida and St. Julian. He wrote the story of his own sufferings and those of his companions in prison. Upon the death of Joseph I of Portugal in 1777, Pombal fell into disgrace, and those of his victims who survived were released from their loathsome dungeons. The Society of Jesus, which had been suppressed four years earlier by the Brief of Clement XIV, had continued to exist in Russia. Father Eckart applied for readmission, and for thirty-two years following had the consolation of wearing the habit of the proscribed order. After filling the office of master of novices at Dinaburg, he was sent to the College of Polstok, where this venerable confessor of Jesus Christ, the last survivor, perhaps, of the cruelties of Pombal, preserved in extreme old age the same vigour of soul which had sustained him in the missions and in captivity. He died full of days and merits in the eighty-eighth year of his age and the sixtieth of his religious life. 

EDWARD P. SPILLANE.

Eckhart (EKBERT, EGBERT), Abbot of Schönau, b. in the early part of the twelfth century of a distinguished family along the Middle Rhine; d. 28 March, 1184, in the Abbey of Schönau. He was for a time canon in the collegiate church of Sts. Cassius and Florentius at Bonn. In 1155 he became a Benedictine at Schönau in the Diocese of Trier, and in 1166, after the death of the first abbot, Hildelin, he was placed at the head of the monastery. A man of great zeal, he preached and wrote much for the salvation of souls and the conversion of heretics. The Cathari, the heretics of the Rhineland, gave him especial concern. While a canon at Bonn he left in his last volume to debate with heretics, and after his monastic profession, was invited by Archbishop Rainald of Cologne to debate publicly with the leaders of the sect in Cologne itself. His chief works are: "Sermones contra Catharos" with extracts on the Manichaeans, from St. Augustine (P. L., CXXXV); "De Lando Cruces" (ibid.); "Soli debitionem quos Medicationes" (ibid.); "Ad Beatum Virginem Deparam in paracone panegyricus" (ibid., CLXXXIV); "De sancta Elizabetha virgine", a biography of his sister, a Benedictine nun and a famous visionary and mystic (see ELIZABETH OF SCHONAU), a portion of which is in P. L., CXXXV, also in "Acta SS.". June, IV, 501 sqq. (ed. P. L., 1877). A complete edition of his works is found in Roth, "Die Werke des hl. Elizabeth und die Schriften der Abtei Ecket und Euchno von Schönau" (Brünn, 1881).

FRANCIS J. SCHEAER.

Eckhart, JOHANN GEORG VON (called Eakkard before he was ennobled), German historian, b. at Duren in the principality of Kleilenburg, 7 Sept., 1667; d. at Würzburg, 9 Feb., 1730. After a good preparatory training at Schulhoffort he went to Leipzig, where at first, at the desire of his mother, he studied theology, but soon turned his attention to philology and history. On completing his course he became secretary to Field-Marshal Count Fleming, the chief minister of the Elector of Saxony; after a stay of three years, however, he went to Hanover to find a permanent position. Owing to his extensive learning he was soon useful to the famous historian Leibniz, who, in 1694, took Eckhart as assistant and was, until death, his large-hearted patron and generous friend. Through the efforts of Leibniz Eckhart was appointed professor of history at Heidelberg, 1706, and in 1714 councillor at Hanover. After the death of Leibniz he became historiographer of the royal family of Hanover, and was soon after ennobled by Emperor Charles VI, to whom he had dedicated his work "Origines Austricae". For reasons which have never been clearly explained he gave up his position, in 1723, and fled from Hanover, perhaps on account of debt, to the Benedinestatery of Corvey, and there to the Jesuits at Cologne, where he became a Catholic. Not long after this the Prince-Bishop of Würzburg, Johann Philipp von Schönborn, appointed Eckhart his librarian and historiographer. In his work Eckhart was influenced by the new school of French historians, and gave careful attention to the so-called auxiliary sciences, above all to diplomacy; he also strove earnestly to follow a scholarly method in the treatment of historical materials. Together with Leibniz he may be considered as a founder of the critical school of historical writing. Besides the help he rendered Leibniz, of whom he prepared an affectionately respectful obituary (in Müir, "Journal für Kunstgeschichte", VII), he issued a number of independent works. His chief work, while professor at Helmstedt, is his "Historia studii etymologi linguae germanicae" (Hanover, 1711), a literary and historical study of all works bearing on the investigation of the Teutonic languages. At Hanover he compiled a "Corpus historicum mediætii avi" (Leipzig, 1723), in two volumes; at Würzburg he published the "Commentarii de rebus

V.—18
ECKHART

Francis Orientalis et episcopus Wirzburgensis" (1729), also in two volumes, an excellent work whose raw materials were treated with scientific exactitude.

Bonniere, Grundriss einer Geschichte von der Universitat Wirzburg (Würzburg, 1752), II, 12-27; Allgemeine deutsche Biographie (Leipzig, 1877), V, 677-678.

PATRICK SCHLAGER.

Eckhart (Eckard, Eccard), Johann, Meister (the Master), Dominican, preacher, theologian, and mystic, b. about 1260, probably at Cologne. He went to Cologne. He made his philosophical and theological studies in the Dominican Order. Although a profound mystic he was also an able man of affairs, admirably manifesting the spirit of his order by uniting throughout his entire career great activity with contemplation. After a period of teaching he was made, in 1298, prior of the Dominican convent at Erfurt and vicar-provincial of Thuringia. Two years later he began to lecture at Paris, where in 1302 his order gave him the degree of Master of Sacred Theology. In the following year he was elected provincial of the Province of Saxony, to which office he was re-elected in 1307, when he was also appointed vicar-general of Bohemia and charged to reform its convents. His term of office was not long, for in 1310 he took the professorial chair at Paris, whence he went in 1314 to teach at Strasbourg. After three years he was made prior at Frankfort. He finally returned to the schools in 1320, when he was made first professor of his order at Cologne, where he remained until his death.

Eckhart's activity was also displayed in the pulpit, of which he was a master. His discourses were employed in the form of treatises and sayings. As a preacher he disdained rhetorical flourish and avoided oratorical passion; but effectively employed the simple arts of oratory and gave remarkable expression to a hearty sympathy. Using pure language and a simple style, he has left us in his sermons, and in his treatises, he finds frequent citations from such writers as Seneca and Avicenna, as well as from the theologians and Fathers. His discourses are directed to the intellect rather than to the will and are remarkable for their depth of mystical teaching, which only those who were advanced in the spiritual life could fully appreciate. His favourite themes are the human soul as a twofold man, the faculties, gifts, and operations of the human soul, the return of all created things to God. These and kindred subjects he develops more at length in his treatises, which partake of the catechetical character of his sermons. In his sayings he presents them in short and pithy form. Although the writings of Eckhart do not present a connected and studied system, they reveal the mind of the philosopher, the theologian, and the mystic. The studies of Henry Denifle, O.P., while showing Eckhart to have been less of a philosopher than he was supposed to be, show also that he was a Scholastic theologian of very superior merit, although not of the first order. He followed the teaching of Albert the Great, and of St. Thomas, and derived their Scholastic method and form. Some opponents of Scholasticism, admiring his aphorisms and originality of method, have pronounced him to be the greatest thinker before Luther. And there have been Protestants who called him a Reformer. It was, however, as a mystic that Eckhart excelled. He is held by many to have been the greatest among the many mystics, and by all to have been the father of German mysticism. To Tauler and Suso he gave not only ideas but also a clear, simple style, possessing a heartiness like that of his own. Although he frequently quotes from the writings of the Pseudo-Arcipagite and of John Scotus Eriugena, in his mysticism he follows more closely the teaching of Hugh of St. Victor.

The very nature of Eckhart's subjects and the untechnicality of his language were calculated to cause him to be misunderstood not only by the enemies of his order but by the hearers of his sermons, but also by the Schoolmen who listened to him or read his treatises. And it must be admitted that some of the sentences in his sermons and treatises are Beghardic, quietistic, or pantheistic. But although he occasionally allowed harmful sentences to proceed from his lips or his pen, he not infrequently gave a new meaning to them.

The general tenor of his teaching shows that he was not a Beghard, nor a quietist, nor a pantheist. While at Strasbourg, although he had no relations with the Beghards (q.v.), he was suspected of holding their mystical pantheism.

Finally the charge was made at a general chapter of his order, held at Venice in 1325, that some of the German brethren were disseminating dangerous doctrine. Father Nicholas, O.P., of Strasbourg, having been ordered by Pope John XXII to make investigations, declared Eckhart schismatic, and his writings were burnt. Finally an investigation ordered by the Dominicans, in which Eckhart was appointed to a prominent position at Cologne, was closed without finding any charge being made. It was, however, stated that some of his writings had been translated into Italian in a heretical form.

The works of Eckhart have not been preserved. Pfeiffer in "Deutsche Mystiker des 14. Jahrhunderts" (1857), II, has given an incomplete edition of his sermons. Additions have been made by Steuers in "Zeitschrift für deutsche Alterthumer", XV, 373-378, and Wackerbarth, in the Almanach der Gesellschaft der Neueren Sprache, XLI, 223 sqq.; Berlinger in "Alemannia", III, 15 sqq.; Bech in "Germania", VIII, 223 sqq.; X, 381 sqq.; Jundt in "Histoire du Panthéisme" (1875), 234 sqq. There is a translation in High German by Landauer, "Meister Eckharts mystische Schriften" (1903). Eckhart's Latin works bore the title "Opus Tripartitum". In the first part (Opus propositionum) there are over one thousand theses, which are explained in the second part (Opus questionum), and proved in the third part (Opus expositionum). Of these only the three prologues are known. Denifle discovered also a portion of the third part, part of an explanation of Genesis, a commentary on Exodus, Sirach, xxiv, Wisdom, and other fragments.

Eckhel, Joseph Hilarius, German numismatist, b. 13 January, 1737, at Enzesfeld near Pottenstein, in Lower Austria, where his father, Johann Anton Eckhel, was steward to the Prince of Montecuccii; d. 16 May, 1798. In 1745 he was sent to study in Vienna.

A. L. Mahon.
in 1751 was admitted into the Society of Jesus, and thirteen years later was ordained priest. He had studied humanities in Leoben and philosophy in Graz, besides mathematics, Greek, and Hebrew. The first fruit of his literary labours, produced in his twenty-first year, was an "Exercitium grammaticum in prophetiam Obadiah." This he published as an appendix to the "Institutiones linguæ sacræ" of P. Engstler. After his ordination, and probably for some time before, he was professor at the Jesuit gymnasium at Leoben and Steyer; probably also at Judenburg, and finally at the college of Vienna, where he taught poetry and rhetoric, and acquired a mastery of Latin, which he handled with ease and elegance. He still possesses two rather comprehensive verses from his pen, "Phaenix Urbis" and "Phaenix Rusti." He left, besides, two German poems written for special occasions, in the style of that period, and a speech of the same nature delivered on the occasion of the journey of Emperor Joseph II to Italy.

How he became a numismatist, Eckhel himself has told us in the preface to his "Numi veteres anecdoti". While appointing him at the Academic Gymnasium he became interested in its cabinet of coins, which was under the supervision of his fellow-jeuit, P. Khel. The collection, containing principally Greek coins, had attained considerable size, through the exertions of the learned Erasmus Frohlich, who had edited a catalogue of most of the ancient coins; Eckhel set to work selecting the coins which were as yet unknown and unedited, and added thereto the unedited coins of the choice collections of Count Michael Viezay and Paul Fustetius. Forced by ill-health to abandon teaching, he devoted himself entirely to numismatics and archaeology. With the permission of his superior he went to Italy in 1772 for his further education. In Bologna and Rome he studied all the accessible coin collections, but found his richest treasure in the city of Florence. Mando Cooche, prefect of the Archaelogical Museum, received him most cordially and obtained for him the commission to arrange the coins which had been collected by Cardinal Leopoldo de' Medici, and which had afterwards been very considerably increased. Cooche, who died shortly after this, recommended Eckhel to the Archdeacon Peter Leopold, who in turn introduced him to his mother, the Empress Maria Theresia. Meanwhile (1773) the Society of Jesus was suppressed, and Eckhel, like his brethren, was secularized. Returning to Vienna through the South of France in January, 1774, he was delighted to be entrusted by the empress with the task of transferring the collection which belonged to the university college of the Jesuits, to the court cabinet, where, however, it received a separate place. In March of the same year, having acquired an excellent reputation as a numismatist, he was named director of the cabinet of ancient coins, with Duval as his superior. After the latter's death (1775) he received sole charge. Eckhel was commissioned to deliver bi-weekly lectures on numismatics in the coin cabinet. In the fall of 1775 he was promoted to the chair of antiquities and of the historical auxiliary sciences in the university. In the same year his first numismatic publication appeared.

J. von Bergmann writes of Eckhel's official work: "Eckhel, as is everywhere evident, was an expert administrator of the treasure committed to his charge. Without much ado, without ostentation, he wrote only what was needful and regarded merely that which was essential. Besides his very simple accounts and some reports written during the twenty-four years of his incumbency, only a very few documents concerning the collection of antique coins are in existence. He enriched the cabinet without advertising it." He obtained the means for these acquisitions from the proceeds of the sale of duplicates of gold and silver coins. The duplication of examples resulted from the numismatist's principle that a coin should form a part of the imperial family. Moreover, the series of the Persian and Parthian kings were transferred from the Oriental to the ancient department. The collection of Duke Charles of Lorraine, that of the Count of Ariosti, and a selection of coins from the collections of suppressed monasteries were added. By means of embassies and lucky finds the coin cabinet acquired important edifices for its purpose (see Szilagy-Somlyo). As a professor in the university Eckhel lectured on ancient numismatics. His delivery is described as being simple, clear, instructive, inspiring, and often abounding in humour. He was highly respected by his pupils. That he also enjoyed high repute among his colleagues is attested by his appointment as dean of the philosophical faculty in 1789. However, he was renounced the next year.

The first numismatic work published by Eckhel was "Numi veteres anecdoti ex museis Caesareo Vindobonensi, Florentino Magni Ducis Etruriae, Granelliano nunc Caesareo, Vitzaitano, Festetisiano, Savorgnano Veneto alisque" (Vienna, 1775, in two 4to sections with 17 copperplates). "Catalogus Musei Caesarei" (Vienna, under the direction of the numismatist with numerous illustrations) followed four years later. Eckhel had given the collection entrusted to him an entirely new arrangement, discarding the time-honoured alphabetical order, and substituting quite a new system. He divided ancient numismatics into two departments: the first contained the coins minted by cities other than Rome, arranged according to the geographical situation of the countries as far as this was possible; the second comprised all the coins of the Roman Empire. First come the important but crude assorts, then the unclassified pieces with the inscription Roma. They are followed by those of the various families, emperors, and empresses, all arranged as far as possible in chronological order. Those whose date could not be determined are placed after each emperor as unclassified in alphabetical order of the name which he was known by (Method)." says Eckhel, "the author was enabled to rectify countless errors which Mezzabarba had forced upon us in his "General Catalogue" (Imperatorum Romanorum numismata, Milan, 1683). And to make these corrections principally led him to prepare this catalogue for print. In it he gives an account, not on outside authority, but from personal observation and after lengthy and painstaking research, of everything instructive which so numerous a collection presents. The work was written in Latin and, "contrary to the present ornamental style, in the simplest language." This catalogue was followed by "Syllago II, numorum veterum anecdotorum Thesauri Caesarei," and "Descriptione numorum Antiochiae," (1786), then by the "Museum Antiquitatum veterum," in seven volumes (1792-1798). Friedrich Kenner says of this: "Misguided dilettantism had produced most mischievous results in the field of numismatics. Lack of system, want of critical judgment, and the disorderly arrangement of the literature had begotten confusion and distrust, which prevented numismatists from taking the place among other sciences to which it was entitled. With his naturally erudite eye, Eckhel mastered all the literature of his subject, eliminated errors and forgeries with the help of his profound learning, and then combined the results into an organic whole in his 'Doctrina numorum veterum' . . . ." Eckhel has become the founder of the scientific numismatics of classical antiquity and taken his place alongside of his contemporaries, Heyne and Winckelmann.
ECCLESIASTICISM

matics, hitherto despised, he changed into a kind of encyclopedia of classical antiquities, which includes extensive and much-used sources for other branches of archeology.” The addenda to this work which Eckhel entered in his manuscript copy were edited by his successor, Steinbuechl.

By contrast, the editor Joseph II, Eckhel wrote an excellent manual, “Kurzgefasste Anfangsgründe zur numismatik” (Vienna, 1787; 2nd ed., 1807). The work appeared in a Latin translation in 1799 and in a French revision in 1825. He edited, besides, “Choix des pierres gravées du Cabinet Impérial”.

Furthermore, a number of smaller treatises still exist in manuscript form. His “Inscriptions veteres” was used by Theodore Mommsen. He also left an extensive correspondence with the most prominent representatives of his branch of learning (Abbe Barthély, R. Cocci, Cousinry, L. Lanzi, G. Marini, F. Ségner, and others).

Eckhel died shortly after the completion of his “Doctrina”. He was, as Bergmann writes, “a man of firm and decided character, serious, but at the same time cheerful, indulging in sarcasm, and at times heated, attacks on cant and literary arrogance. He used his extensive learning to correct thousands of blunders committed by other writers, and was modest and not at all disputative in his controversies. He spoke as he thought and acted as he spoke.” Later scholars rank Eckhel’s scientific importance second equally high. At the first centenary of his birth a medal was struck (by Manfredini) with the inscription, Syste-

matis. Rel. Nymphe. Antiqu. Conditori. The distich which Michael Denis dedicated to his dead friend will vindicate its own truth:—

Eckhelium brevis hora tult, sed diva Moneta Scripta vix secum vivere scelae jubet.

phies, V (1877), 653 sqq.

KARL DOMANIC.

Eccentricism (Gr. ἐκ, ἐκτείνω; Lat. eligere, to select), a philosophical term meaning either a tendency of mind or a thinker to consider the different viewpoints for the solution of a problem, or a system in philosophy which seeks the solution of its fundamental problems by selecting and uniting what it regards as true in the various philosophical schools. In the first sense, Eclecticism is a characteristic of all the great philosophers, with special development in some, such as Leibniz; an element of the integral method of philosophy most or less emphasized in the various schools. The term eclectic, however, is properly applied to those who accept Eclecticism as the true and fundamental system of philosophy. It is with Eclecticism in this strict sense that we are dealing here.

As a rule, in the history of philosophy, Eclecticism follows a period of scepticism. In presence of conflicting doctrines regarding nature, life, and God, man at length severely and adequately and with an adequate knowledge about these important subjects. Eclecticism then aims at constructing a system broad and vague enough to include, or not to exclude, the principles of the divers schools, though giving at times more importance to those of one school, and apparently sufficient to furnish a basis for the conduct of life. In the latter period of Greek philosophy, during the two centuries preceding the Christian Era and the three centuries following, Eclecticism is represented among the Epicureans by Asclepiades of Bithynia; among the Stoics by Boethus, Panetius of Rhodes, (about 180-110 b. c.), Posidonius (about 50 b. c.), and later on by the neo-Cynics, Demetrius and Demox (about a. d. 150); in the New Academy by Philo of Larissa (about 50 b. c.) and Antiochus of Ascalon (d. 65 B. C.); in the Peripatetic School by Andronicus of Rhodes (about 70 b. c.), the editor and commentator of the works of Aristotle, and later on by Aristocles (about a. d. 180), Alexander of Aphrodisias (about a. d. 200), the physician Galen (a. d. 131-201), Porphyry in the third, and Simplicius in the sixth, century of our era. The eclectic school was by character, the one which was best suited to the practical mind of the Romans. With the exception of Lucretius’s doctrine, their speculative philosophy was always and altogether eclectic, while Stoicism dominated in their ethical philosophy. Cicero is, in Rome, the best representative of this school. His philosophy is a mixture of the Eclecticism of the same school, and of Stoicism and Peripateticism. The School of the Sextians, with Quintus Sextius (50 b. c.), Sotion, and Celsus, was partly Stoic and Cynic, partly Pythagorean.

Under the empire, Seneca, Epicetius the slave, and the Emperor Marcus Aurelius combined the principles of Stoicism with some doctrines taken from Platonism. The neo-Platonic School of Alexandria, in the second and third centuries after Christ, is considered by some as eclectic; but the designation is not exact. The school borrows, indeed, many of its principles from Pythagoreanism, Stoicism, Peripateticism, and especially from Platonism; but all these doctrines are dominated by and interpreted according to certain principles of religious mysticism which make this neo-Platonic thought peculiar. The name may be said of the Christian writers of this school who take some of their philosophical principles from the dominant systems, but who are guided in their choice as well as in their interpretation by the teaching of Christian revelation.

In modern times Eclecticism has been accepted in Germany by Wolff and his disciples. It has received its best characteristic form in the century from Victor Cousin (1792-1867) and his school, which is sometimes called the Spiritualistic School. Drawn away from sensationalism by the teaching of Royer Collard, Cousin seeks in the Scottish School a sufficient foundation for the chief metaphysical, moral, and religious truths. Failing in this attempt, he takes up the different doctrines in the order that he is influenced by Maine de Biran whom he calls “the greatest metaphysician of our time”, by the writings of Kant, and by personal intercourse with Schelling and Hegel; finally, he turns to the works of Plato, Plotinus, and Proclus, only to come back to Descartes and Leibniz.

He then reaches the conclusion that the successive systems elaborated throughout the preceding periods contain the truths; that the complete truth is to be found in a system resulting from the happy fusion, under the guidance of common sense, of the fragmentary truths expressed by the different thinkers and schools of all ages. Four great systems, he says, express and summarize the whole development of human speculation: sensism, idealism, scepticism, and mysticism. He thus contains the truth, at least partially, in the nineteenth century exclusively, the whole truth. Human thought cannot invent any new system, nor can it neglect any of the old ones. Not the destruction of any of them, but the reduction of all to one, will put us in possession of the truth.

There is, indeed, nothing true in Eclecticism. It would be only for such a thinker to deliberately construct all that has been said and taught before him; such a method would render progress impossible. The experience and knowledge acquired by past ages is a factor in the development of human thought. The history of philosophy is useful; it places at our disposal the truths already discovered, and by showing us the errors into which philosophy has fallen, it guides us against them and against the principles or methods which have caused them. This is the element of value contained in the system. But Eclecticism errs when it substitutes for personal reflection
as the primary source of philosophy a mere fusion of systems, or the history of philosophy for philosophy proper. Eclecticism does not furnish us with the ultimate principles of philosophy or the criterion of certitude. We cannot say that philosophy has reached the highest degree of precision either in its solution or in its presentation of every problem; nor that it knows all that can be known from history, system, or science. But even if this were the case, the principles of Eclecticism cannot provide us with a firm, complete, and true system of philosophy. Cousin says that there is some truth in every system; supposing this to be exact, this partial truth has evidently to be acquired at first through principles and a rule of certitude which are independent of Eclecticism. When Cousin stresses the necessity of truth and error in every system, he evidently assumes a principle superior and antecedent to the very principle of Eclecticism. The eclectic must first separate error from truth before building into a system the results of his discrimination. But this is possible only on the condition of passing a judgment upon each of these systems and therefore of having, quite apart from history, system, or science, a criterion which can be used as a standard. In a word, Eclecticism, considered as a study of the opinions and theories of others in order to find in them some help and enlightenment, has its place in philosophy; it is a part of philosophic method; but as a doctrine it is altogether inadequate.

M., Ecstasy, 277 (2 vols., Halle, 1853); Ritter and Frezler, Historia Philosophorum Graecorum (Gottha, 1885); Zeller, Die Philosophie der Griechen (Leipzig, 1892); Alleyn, Eclectics (London, 1881); Cousin, Histoire générale de la philosophie (Paris, 1884); Leroux, Réflexion de l’Eclectisme (Paris, 1891); Taine, Les philosophes classiques du XIXe siècle (Paris, 1876), vi, vi.; Mercier, Critériologie générale (Louvain, 1900), III.1.

G. M. SAUVAGE.

Ecstasy.—Supernatural ecstasy may be defined as a state which, while it lasts, includes two elements: the one, invisible and intangible, when the mind rivets its attention on a religious subject; the other, corporeal and visible, when the activity of the senses is suspended, so that not only are external sensations incapable of influencing the soul, but considerable difficulty is experienced in awakening such sensations, and this whether the ecstatic himself desires to do so, or others attempt to quicken the organs into action. The one is a religious experience, the other a pure psychological operation. Ecstasies are attested by history; and nowadays even free-thinkers are slow to deny historical facts that rest on so solid a basis. They no longer endeavour, as did their predecessors of the eighteenth century, to explain them away as grounded on fraud; several, indeed, abandoning the pathological theory, current in the nineteenth century, have advocated the psychological explanation, though they exaggerate its force.

FALSE VIEWS ON THE QUESTION OF ECSTASY.—The first three errors here mentioned are psychological in nature; they fail to estimate at its proper value the content of ecstasy; the other false theories spoken of identify this state with certain morbid physical or psychic states. This is the theory of Murisier and of Leuba. The arguments for this view are based upon an exaggerated interpretation of certain phrases used by the mystics. Their accounts, however (those, for instance, of Blessed Angela of Foligno), give the lie to such an explanation. The mystics state clearly that they experience, not only the fullness, but the superabundance of intelligence, an increase of activity of the highest faculties. Now, in a science that is based on observation, as is mysticism, we are not justified in brushing aside the numerous and consistent testimonies of those who have tested the facts, and putting in their place the creations of the imagination.

(2) The theory of unconsciousness distorts the facts so unseparably that some writers have preferred a theory less crude, i.e. the emotional explanation. The ecstasy, it is admitted, is not buried in a heavy sleep; rather, he experiences violent emotions, in consequence of which he loses the control of his faculties, and as there is nothing new to occupy his attention, it follows that his mind is taken up by some trilling thought, so trilling, indeed, that these writers deem it unworthy of their notice. This theory clashes less with historical data than does the first, since it does not wholly eliminate the activity of the ecstatic; but it denies half the fact, namely, by so-called trilling, that there is as much activity as in any other state of excitement.

(3) It has been said that ecstasy is perhaps a phenomenon wholly natural, such as might well be occasioned by a strong concentration of the mind on a religious subject. But if we are not to rest satisfied with arbitrary conjectures, we must show that similar facts have been observed in spheres of thought other than purely religious. The ancients attributed natural ecstasies to three or four sages, such as Archimedes and Socrates, but, as the present writer has proved elsewhere, these stories are founded either on inconclusive arguments or upon false interpretation of the facts (Des grâces d’oraison, c. xxii).

(4) The rigid condition of the ecstatic’s body has given rise to a fourth error. Ecstasy, we are told, is but another form of lethargy or catalepsy. The loss of sensibilities, however, has sometimes these latter states points to a marked difference.

(5) In view of this, some have sought to identify ecstasy with the hypnotic state. Physically, there are usually some points of contrast. Ecstasy is always accompanied by noble attitudes of the body, whereas in hospitals one often marks motions of the body that are convulsive or repelling; barring, for example, the counter-command of the hypnotist. These latter differences, though, is to be found in the soul. The intellectual faculties, in the case of the saints, became keener. The sick in our hospitals, on the contrary, experience during their trances a lessening of their intelligences, while the gain is only a slight representation in the imagination. A single idea, let it be ever so trivial, e. g. the number of flies or a fly, easily comes up to the profound and univocal attention. This is what is meant by the narrowing of the field of consciousness; and this is precisely the starting-point of all theories that have been advanced to explain hypnotic ecstasy. Moreover, the hallucination noticed in the case of these patients consists almost always of representations of the imagination. They are visual, audible, or tactile; consequently, they differ widely from the purely intellectual perceptions which the saints usually enjoy. It is no longer possible, then, to start with the extremely simple hypothesis that the two kinds of phenomena are one and the same. A comparison of the effects that follow these states will bring out more clearly the essential difference between the two. (a) The neuropath, after an hypnotic trance is, as it were, his lifelong condition. He does not return to his normal state. (b) Ecstasy, on the other hand, is extremely weak. In this abnormal weakness is to be sought the reason why the subject can no longer resist suggestion. These poor creatures, distraught, listless, and helpless, pass their days in idle dreams. (c) The level of their morality is frequently almost as low as that of their intelligence. From a threefold point of view, then, there is a contrast between the case and that of the saints who have been granted ecstasies. (a) The latter possess strong intellects, conceiving projects lofty and difficult in the execution; in proof of this assertion we might appeal to the history of the founders of religious orders. (b) Their will-power is second to none in energy; so strong, indeed, as to enable them to break through all opposition, especially when that arises from their own na-
ture. (e) Lastly, the saints keep before them a moral ideal of a lofty character, the need of self-forgetfulness if they would give themselves to the glory of God and the temporal and spiritual welfare of their fellow-men. The hysterical subject of hypnotism, on the contrary, combines in himself none of these noble qualities.

(6) An attempt has been made to rank ecstasy with somnambulism, with which have also been classed, but with little reason, cases of spirit manifestations. The case which most approaches, on the surface, the ecstasy of the saints is that of Helen Smith, of Geneva, whom Professor Flournoy studied carefully during the closing years of the nineteenth century. During the crises of spontaneous somnambulism she described her visions in word or in writing. At one time she saw the inhabitants of the moon, Venus, at a distance of 500,000 miles among the Arabs or the Hindus of the fourteenth century. In 1904 she had crises lasting a quarter of an hour, during which she painted in oil pictures of Christ and the Madonna, though she was quite unconscious of what she was doing. The ecstasies of the saints were, it was thought, of exactly the same nature. There are, however, some striking differences: (a) From the moral viewpoint the visions of the saints produce a remarkable change in their manner of life, and lead them to the exercise of the most difficult virtues. Helen experiences nothing of the kind. She is a good woman, that is all. (b) Unlike the saints, she remembers nothing of what she has seen. (c) While the vision lasts, the faculties at play are not the same. In Helen’s case; Love; in the case of the saints, the imagination is arrested during the culminating periods, and throughout always holds a subsidiary place, while the intellect undergoes a marvellous expansion. In the case of Helen, the imagination alone was at work, and its objects were of the most commonplace character. Not a single elevated thought; simply descriptions of houses, animals, or else nothing but a mere repetition of what we see on earth. Such descriptions serve only as stories to amuse children.

(7) A seventh theory would identify ecstasy with the wild raptures and disordered fancies occasioned by the use of alcohol, ether, chloroform, opium, morphia, or nitrous oxide. In the first place, the physical condition is quite different. No one, for instance, would mistake the effects of the first for those of the latter. A man under the influence of narcotics. Secondly, the mental perceptions are not the same in character. For if the slave of the drugs we have mentioned above does not lose all consciousness, if he still retains any ideas, they consist of extravagant, incoherent images, whereas the ideas and thoughts of the mystic are throughout coherent and elevated. Finally, the victims of alcohol and of morphia, on recovering from their debouch, remain in a state of sottishness. Thought and action are simultaneously lessened; the moral and the social life have equally suffered. The use of narcotics has never enabled a man to lead a purer life or to better himself and others; experience points to the contrary.

These, then, are the false views that have been entertained of ecstatic experiences. Nor should it be a matter of surprise that free-thinkers should have ventured on these explanations. It is but the conclusion that follows logically from the principles with which they start, i.e., there is no such thing as the supernatural. They must, then, at any cost, seek the causes in natural phenomena. (See Contemplation.)

Ecuador, Republic of (La República del Ecuador), an independent state of South America, bounded on the north by Colombia, on the east by Brazil, on the south by Peru, and on the west by the Pacific Ocean. The north-western corner of the State is crossed by the Equator, hence its name. No part of America has been so prominent for scientific explorations, specially geographic and physiographic, as Ecuador. The country forms, on a less elevated surface, and in the first half of the nineteenth century. One, sent out in 1735 by the French Government for the purpose of measuring the meridian near the Equator, recalls the names of La Condamine and Bouguer. The other (1799—1804) forever associates Alexander von Humboldt with the history of the New World.

The Equator, as its name implies, is the third smallest of the South American republics. It forms, approximately, an isosceles triangle wedged in between Colombia and Peru. Indenting the south-west coast is the Gulf of Guayaquil within which lies the large Island of Isabela. As in the case of other South American republics, the boundaries of Ecuador are ill-defined and subject to modification by treaty. Its area is variously given as from 80,300 to 152,000 sq. miles, to which must be added the Galapagos Islands in the Pacific, lying about 90°—92° west long., 10 degrees off the coast, and covering from 2100 to 3000 sq. miles. These islands are about ten in number, only one of which (Isabella or Abemarlic) is inhabited by some two hundred people. The eastern half of Ecu-ador is divided into two parts: the coast region, emptying into the Marañon or Upper Amazon; the western is very mountainous, the high Andes chain dividing the two sections. This mountain range runs nearly due south from the southern boundary of Colombia to the Peruvian frontier. It has a number of high peaks, all of volcanic origin, among them Cotopaxi, 20,500 ft. high. The latter, Cotopaxi (19,615 ft.), Tunguragua (16,690 ft.), and Sangay (17,404 ft.) are still active; Antisana (19,333 ft.), Pichincha (15,918 ft.), etc. have been extinct for a century or more; while Antisana, Cotocachi, etc. show traces only of activity in ages long past. The Ecuadorian table-land and higher mountain valleys are temperate, though the temperature is low in winter. The climate is characterized by the dry and the wet season. Under the Equator, however, there is little difference between the seasons. The coast valleys and shores are very hot and the climate generally unhealthful. Ecuador has but one navigable river, the Guayas, which empties into the Gulf of Guayaquil. The other streams or rivers, which are all very inaccessible. The flora is luxuriant except in high altitudes. Both lower slopes of the Andes are densely wooded. On the coast there is an arid zone of limited extent; the larger portion, however, is very fertile as far as the Peruvian boundary at Tumbes. The inland forests in the south are rich in eucalyptus bark, and extend nearly to the Equator. The latter forms a sub-Andean zone for the next 3500 feet, in which cereals thrive in an average temperature of from 55° to 59° Fahr. This is followed by what are called the píramos, cold and stormy wastes, treeless, and exposed to daily snows, which reach an altitude of 15,000 feet above sea-level, and where the tough puna-grass flourishes. On the eastern slope of the Andes dense forests are found along the and the cinnamon trees. Animal life is tropical and is found in proportion to the vegetation. As far as known Ecuador is fairly rich in minerals. It is the only South American state, with the exception of Colombia, where emeralds have been found in any quantity (near the coast at Manta and Esmeraldas); their location, however, is uncertain. The population is 3,272,000 (1904). About 60,000 are supposed to be Indians. Exact statistics, however, do not exist. Of the 400,000, one-
half is allowed to the wild forest-tribes of the Eastern section and the other half to the remnants of the diverse sedentary tribes which formerly occupied the table-land and coast. The whole country is divided into fifteen provinces besides the Eastern Territory and the Galapagos Islands.

History.—Of the pre-Columbian conditions and languages of the Indians of Ecuador little is known. The coast tribes have almost disappeared and those of the higher regions have adopted Spanish customs. That they differed from the Peruvian Quechua seems likely. The best-known were the Cañarí, the Carangas, and the Puruas or Puruyas; a tribe known as the Sercy is mentioned in the neighbourhood of Quito. They were all sedentary; knew how to work gold, silver, copper, and possibly bronze; and practised the cultivation of maize and potatoes. The coast tribes built their houses of wood and cane, while those of the interior used stone. They were skilful navigators, some of their vessels being estimated at thirty tons, and propelled by oars and cotton sails.

The Spaniards, led by Francisco Pizarro, first saw the coast of Ecuador in 1525, from Tacamore, or Atacames, and Pizarro directed his pilot, the south. In the account of Pizarro we have the earliest description of the Ecuadorian coast people. He sailed south beyond the present limits of Peru, verifying his pilot's reports, and in 1528 returned to Spain to prepare for the conquest of Peru. He returned in 1531, landing at Coaque, and, marching south along the slope, established Guayaquil, also originally founded at a place distinct from the one it now occupies. Meanwhile Pedro de Álvaredo had landed on the coast with a considerable force from Guatemala. Reaching the central plateau he was confronted by Bichalácivar and Diego de Almagro the elder. An amicable agreement was reached, and Gonzalo Pizarro pushed into the cinnamon country, but failed. In 1536 the Captain-General, Orellana, however, floated down the Amazon and landed on the Isle of Trinidad, whence he carried to Spain the first information about south-eastern Ecuador.

The second epoch of civil wars in Peru, the uprising of Gonzalo Pizarro against the viceroy Núñez de la Vela, came to an end with the defeat and death of the viceroy near Quito, 16 Jan., 1546. Quito became the head-quarters of the Crown's representative, and with this as a basis the independence movement was put down. During the colonial period the Church founded institutions of learning such as the University of Quito and established a printing press at the same place in 1560. Political disturbances were few, but during the sixteenth, seventeenth, and eighteenth centuries volcanic eruptions and earthquakes in the southern part of the country caused frequent and often disastrous. An attempt was made in 1689 to overthrow the Spanish power, and Ecuador, Colombia, and Venezuela, together with the rest of Spanish South America, then engaged in efforts towards independence. In 1820 Guayaquil succeeded in throwing off Spanish control, and the battle of Pichincha (22 May, 1822) finally put an end to the domination of the mainland country. Ecuador, with Colombia and Venezuela, next formed an independent confederacy until 1830, when the union was dissolved and the first Ecuadorian congress met. Since then Ecuador has been torn by internal dissensions and foreign complications, chiefly with Colombia. The opposing political parties are the Conservatives, or Clericals, and the Liberals. Since 1893 the latter have been in power and have to a great extent adopted a policy of secularization in church matters. From 1833 to 1908 Ecuador has had nineteen presidents.

Government, Education, etc.—Ecuador is a constitutional republic. From 1830 to 1883 it had no less than ten constitutions; the last was adopted in 1897. The executive head is the president, elected with the vice-president directly by the people for a term of four years. The senators (30) and the deputies (41) are also elected by direct vote, the former for four, the latter for two. Congress meets biennially at Quito, the capital, on 10 August, and is in session for sixty days. The principal cities are: Quito (80,000), Guayaquil (51,000), Cuenca (30,000), Riobamba (18,000), and five of 10,000 or more inhabitants. The capital is connected by the eastern railway with Guayaquil, which had 168 miles of railroad and 2565 miles of telegraph, both of which have since been added to. The monetary unit is the sucre, about equal to the peso of other Spanish-American countries, but subject to fluctuation in value. The chief exports are cacao, vegetable ivory, indiarubber, and straw hats.

Educational statistics are scanty. There is a university at Quito with thirty-two professors and two hundred and sixteen students (1905). Institutions for higher education are found at Guayaquil and Cuenca. The number of secondary schools is 35; primary schools 1083 with 1498 teachers and 68,380 pupils; and 9 high schools and colleges.

Religion.—Soon after the discovery of the country missions were established, both by the Jesuits and the Dominicans, in Ecuador, and in 1545 the Bishopric of Quito was erected. Work among the different Indian tribes on the tributaries of the Amazon was difficult, and the Dominican missions were destroyed in 1599 by the savage Jivaros. Later, however, the Dominicans re-established themselves and were assisted by the Jesuits who had been in Quito since 1536. By the close of the seventeenth century Ecuador was well evangelized, but after the expulsion of the Jesuits in 1767, who on the Napo alone had thirty-three missions with 100,000 inhabitants, the Dominicans were unable to keep up the work and the natives fell back into paganism. The revolution destroyed all traces of two hundred years of untiring labours. Since 1848 Ecuador has formed an ecclesiastical province. The population is Catholic except for a small number of foreigners and a few pagan Indians in the East.

Up to 1861 the government was in the hands of the Liberal and largely anti-Catholic party. When García Moreno (q. v.) was elected president (1861-65 and 1868-73), however, he reorganized civil and religious affairs. Under him a concordat (20 Nov., 1863) was concluded with Rome, new dioceses were erected, schools and missions given to the Jesuits (who had been recalled) and others, and in 1874, at the time of the splication of the Holy See, ten per cent of the State's income was guaranteed to the pope. Moreno was murdered 6 Aug., 1875, and his death not only put an end to the concordat, but under the new regime which succeeded him series of persecutions occurred. In 1885, when Bishop Schumacher took charge, nearly all the native clergy were suspended and replaced by Europeans and practically a new hierarchy established. The religious and moral education of the people was likewise in bad condition. The revolution of Alfaro in 1895 was a severe blow to the Church. The orders, among them the Capuchins, Salesians, Missionaries of St. Vincent de Paul, and the Teutonic orders, were all abolished and Bishop Schumacher obliged to flee.

The State religion is the Catholic, but other creeds are not interfered with. Since tithes were abolished the State has provided for the maintenance of Catholic worship; it also supports religious educational institutions, such as the three seminaries at Quito and six elsewhere, one in each of the six dioceses. Civil marriage was recognized in 1902, and two years later the
Church and its property were placed under State control. At the same time it was enacted that no new or former monastic, collegiate, and canonicate writing could be printed. Gomara, a missionary of the Jesuits in the South American Indian missions, published Widerstand (1818), a description of the Ecuadorian coast made by Juan de Samano, Relaciones de los primeros descubrimientos de Francisco de Vitoria y Diego de Almagro (1525-26) in Documents for the History of Spain. Account of eyewitnesses on the Conquest, translated into German by Gering (Leipzig, 1892), into English by Daset (1842), by Blackwell in Mallet's "Northern Antiquities" (London, 1770), and R. B. Anderson (Chicago, 1880).

II. "The Elder Edda," a collection of mythological and heroic songs in the ancient Icelandic language. The Edda consists of thirty-three such songs, twelve of which are contained in the famous "Codex Regius," the most important of the Eddie manuscripts. This codex was found in Iceland in 1643 by Bishop Brynjolf Sveinsson. It had no title, and, since it contained poems, portions of which are cited in the Snorra Edda, the bishop concluded that this was Snorri's source and so he called it the "Edda." Furthermore, R. Anderson supposed that the priest Semund (1056-1133), whose reputation for learning had become proverbial, was the author, or at least the collector of these songs, and he therefore wrote on a copy which he caused to be made the title "Edda Semundul multi i" (Edda of Semund's mind), and the title "Edda" has since then remained in general use. Among the volumes desiring to be classified as "Codex Regius." Such poems differ both in content and form from the so-called skaldic poems. There is no doubt that these songs were collected and written down in Iceland from oral tradition; but nothing certain is known concerning their age, original home, and authorship. All this has to be inferred from internal evidence, and hence opinions differ as to whether the poems are not common Scandinavian, but purely Norwegian; they were composed either in Norway or in Norwegian settlements like Iceland and Greenland. As to their age, it is conceded that none dates earlier than the middle of the ninth, and that some were written as late as the thirteenth century. The subject-matter of the songs is largely religious, either about Christian or Heathen mythology, and of the mythological poems the most famous is the "Voluspa" (the prophecy of the volva or sibyl), the most important source for our knowledge of Norse cosmogony. Important also in this respect are the "Vafthrudningsmál" and "Grimnmál," where Olaf's superior wisdom is set forth. Of the songs dealing with Thor the best known is the "Thrymskvitha" (the song of Thrym), relating Thor's quest of his hammer. The sententious wisdom of the Northmen is represented by the "Hávamál" (sayings of the High One, i.e., Odin). Among the heroic poems the chief interest attaches to the lays of Sigurd and the Niflung. Unfortunately this cycle of poems is incomplete owing to a great gap in the collection. The theory that the contents of the lost poems may be gained from the prose version of the "Volsungasaga," the author of which still had before him the complete collection. The first complete edition of the "Edda Elder," with Latin translation, was issued by the Arma-Magnae Society (Copenhagen, 1787-1825). The first critical edition, on which all subsequent ones were based, was given by Sophus Bugge (Christiana, 1867). A lithographic fac-simile edition of the "Codex Regius," with a diplomatic text, was given by Wimmen and Jönsson (Copenhagen, 1891). Other editions are those of Simons and Gering (Halle, Vol. 1, text, 1888-1901; Vol. II, glossary, 1903); F. Jónsson (Halle, 1888-90, 2 vols.); Hildebrand-Gering (Paderborn, 1904); F. Peter and R. Heimel (Leipzig, 1903, 2 vols.).
poems of this kind not found in the "Codex Regius" were edited by Heusler and Randisch, "Eddica Minora" (Dortmund, 1903). The best translation into German is the metrical version of Hugo Gering (Leipzig, 1892). The first English version (of the mythological songs only) was made by A. S. Cottle (Bristol, 1797). A complete English version is that of Benguith Thorpe (London, 1856–60). The songs are also translated in Vignyfusson and Powell's "Corpus poeticum boreale" (Oxford, 1883), and some songs are also rendered in Magnusson and Morris's "Translation of the Volsungasaga" (London, 1870). A new translation by W. H. Carpenter is in preparation (1908).

For the Saxon and Franconian parts, see J. Jonsson, "Den Oldnorske og Oldfrisiske Lit teratur i FORN Musik Den Grunds der der Germanischen Philologie (Strass burg, 1904), pp. 698–703; 906–910.

For the Elder Edda consult Jonsson, op. cit., I, 9–321; Moos, op. cit, 569-656; Goltzer, "Nordische Literaturgeschichte" (Leipzig, 1915), 16–57. See also the introduction to the edition of Simonson-Gering for full bibliographical and critical material.

ARTHUR F. J. REMY

Edelinck, the family name of four engravers.

Gerard, b. in Antwerp, c. 1640; d. in Paris, 2 April, 1707. Galle instructed him in the rudiments of his art, and from him, in Antwerp, the youth imbibed that vigour and energy characterizing Rubens' school of engraving. But it was later to transform the art in France and impart to it Northern freshness and simplicity. In 1665 Gerard came to Paris, studied with de Poilly, quickly surpassed him, and almost immediately reached the height of his powers, which remained undiminished until his death. Le Brun and Colbert called Louis XIV's attention to Edelinck, who received a pension, the title of engraver to the king, apartments in the Gobelins, and the position of professor in the Gobelins Academy from the monarch whose features he depicted in fourteen engravings. In 1675 he was naturalized; in 1677 he became a Royal Academician; and soon thereafter the order of Chevalier of Saint-Michel was conferred upon him.

Edelinck was one of the greatest masters of pure engraving. He never used etching or dry-point on his plates, and of the four hundred that he produced there is not one that is poor or second-rate. Edelinck's work was epoch-making: he revolutionized engraving, abandoning lines that crossed to form squares for longue forms. Further, he massed his lines and changed their direction, thus avoiding the modern method worked upon by Edelinck. He was a notable woman artist, and his Masterpiece was a Roman portrait, highly esteemed in France. Edelinck had all the merits of his predecessor and, besides, rendered texture, colour, and light and shade as they never before had been rendered. His strokes were clear and bold, and the results beautifully finished, harmonious, and silvery. His proofs were the first to possess the quality called technically by engravers "colour." Sometimes they were slightly variegated, and reproduced by Edelinck frequently suggested more colour and quality in the originals than the latter possessed. He worked with marvellous facility and concealed his consummate science under an unobtrusive technique. While he did not confine his burin to portraits, it was these which gave him his great fame, for he so depicted all the notable men of his time, in the Church and the Courts, and, above all, the artists, that we, to-day, gain an insight into their very character. The greater part of his work was reproductive, but he sometimes engraved from his own drawings, for he was a superb draughtsman. Edelinck was chosen to engrave Raphael's "Holy Family," Le Brun's "Magdalene," and "Alexander Visiting the Family of Darius," the first-named bringing him instant fame. Only two impressions before letters of the "Holy Family" exist. Edelinck's life was one of piety, contentment, and tireless labour; it was made up of teaching engraving to his son and his two brothers and working on his own plates. Death found him engraving the "Alexander Entering the Tent of Darius," a superb plate finished by Pierre Drevet. To his family he left a fortune. Plates wholly his own were signed "Ger ard Edelinck," or "Edelinck aequus"; but when his compatriot Pitau or Gaspard Edelinck assisted him the signature was "Edelinck". Among his pupils were Gaspard, Jean, and Nicolas Edelinck, Lombard, and Trouvain. His principal works are: "Portrait of Louis XIV," after Le Brun; "Portrait of Rigaud," after Rigaud; "Portrait of Philippe de Champagne," which the artist thought his best work; after Champagne; "Combat of the Four Horsemen," after da Vinci.

Nicolas, son of the preceding, b. in Paris, in 1690; d. there in 1730. He studied under his father, Gerard, and to perfect himself subsequently went to Italy. In Venice he produced many plates in the style of his father, whom, however, he never equalled in vigour or quality. He engraved several plates for the Crozat collection. His masterpiece is a "Virgin and Infant" after Correggio.

Jean, b. in Antwerp, c. 1613; d. in Paris, 1650. He was a younger brother and pupil of Gerard, with whom he worked and whose style he imitated. Plates wholly his own are much inferior to those of his celebrated brother, though they have considerable merit. "The Deluge," after A. Veronese, is his masterpiece. He made many engravings of the statues in the gardens of Versailles.

Gaspard-François, b. in Antwerp, 1652; d. in Paris, 1722. Gaspard, the youngest brother of Gerard, who was his teacher and co-worker, was inferior in talent to the other members of the Edelinck family, and did not long follow the career of engraver. Because he used a signature similar to that of Gerard and because his master often helped him with his plates, much of his work is difficult to distinguish from Gerard's.

LEIGH HUNT.

Edeus, See Paradise, Terrestrial.

Edeusis and Frumentius, Tyrian Greeks of the fourth century, probably brothers, who introduced Christianity into Abyssinia; the latter a saint and first Bishop of Axum, styled the Apostle of Abyssinia, d. about 383. When their ship stopped at one of the harbours of the Red Sea, people of the neighbourhood massed the whole crew, with the exception of Edeusis
and Frumentius, who were taken as slaves to the King of Axum. This occurred about 316. The two boys soon gained the favour of the king, who raised them to positions of trust and shortly before his death gave them their liberty. The widowed queen, however, prevailed upon them to remain at the court and assist her in the education of the young prince Erazanes and in the administration of the kingdom during the prince’s minority. They remained and (especially Frumentius) used their influence to spread Christianity. First, they encouraged the Christian merchants, who were temporarily in the country, to practise their faith openly by meeting at places of public worship; later they also converted some of the natives. When in 338 Constantius I, the son of Edessa, died, he was succeeded by his son Frumentius, who supplied his place and relatives at Tyre and was ordained priest, but did not return to Abyssinia. Frumentius, on the other hand, who was eager for the conversion of Abyssinia, accompanied Edeus, as far as Alexandria, where he requested St. Athanasius to send a bishop and some priests to Abyssinia. St. Athanasius considered Frumentius himself the most suitable person for bishop and consecrated him in 328, according to others between 340–46. Frumentius returned to Abyssinia, erected his episcopal see at Axum, baptized King Aeizanas, who had meanwhile succeeded to the throne, built many churches, and spread the Christian faith throughout Abyssinia. The people called him Abuna (Our Father) or Aboba Salkama (Father of Peace), titles still used by the Abyssinian bishops. Frumentius, 365 Emperor Constantius addressed a letter to King Aeizanas and his brother Saizams in which he vainly requested them to substitute the Arian bishop Theophilus for Frumentius (Athanasius, “Apol. ad Constantium” in P. G., XXX, 164). The Latins celebrate the feast of Frumentius on 27 October, the Greeks on 30 November, and the Copts on 18 December as the foundation of the first Ethiopian translation of the New Testament.

MICHAEL OTT.

Edessa, a titular archiepiscopal see in that part of Mesopotamia formerly known as Osrhoene. The name under which Edessa figures in cuneiform inscriptions is unknown; the native name was Usro, after some local satrap, this being the Armenian form for Chosroes; it became in Syriac Osrhoi, in Armenian Osrhoi, in Arabic Er Roha, and in Pehlevi Ushra, a shortened name. Seleucus Nicator, when he rebuilt the town, 303 B. C., called it Edessa, in memory of the ancient capital of Macedonia of similar name (now Vodena). Under Antiochus IV (175 164 B. C.) the town was called Antiochia by colonists from Antioch who had settled there. On the foundation of the Kingdom of Osrhoene in the 1st century B. C. by the Seleucids after the Parthian dynasty, this kingdom was established by Nabilean or Arabic tribes from North Arabia, and lasted nearly four centuries (132 a. c. to A. D. 244), under thirty-four kings. It was at first more or less under the protection of the Parthians, then of the Romans; the latter even occupied Edessa from 115 to 118 under Trajan, and from 216 to 244, when the kingdom was divided among the Parthians and the Romans. The literary language of the tribes which had founded this kingdom was Aramaic, whence came the Syriac.

The exact date of the introduction of Christianity into Edessa is not known. It is certain, however, that the Christian community was at first made up from the Jewish population of the city. According to an ancient legend, King Abgar of Edessa, who was one of the seventy-two disciples. (For a full account see Abgar.) In fact, however, the first King of Edessa to embrace the Christian Faith was Abgar IX (c. 206). Under him Christianity became the official religion of the kingdom. As for Addai, he was neither one of the seventy-two disciples as the legend asserts, nor was he the Apostle Thaddaeus, as Eusebius says (Hist. Eccl., IV, xxiii), but a missionary from Palestine who evangelized Mesopotamia about the middle of the second century, and became the first bishop of Edessa. (See Doctrine of Addai.) He was succeeded by Aggi, then by Pa- lout (Pahlut) who was ordained about 200 by Serapion of Antioch. Thenceforth the Church of Edessa, until then under that of Jerusalem, was subject to the metropolitain of Syria. The aforesaid relations with Jerusalem and Antioch assumed an important Syrian literary movement at Edessa of which the city long remained the centre. Thee came to us in the second century the famous Peshitto, or Syriac translation of the Old Testament; also Tatian’s Diatessaron, which was compiled about 172 and in common use until St. Rabula (Rabulas), Bishop of Edessa (412–53), forbade its use. Among the illustrious disciples of the School of Edessa was a special mention is due to Frumentius, 354-222, a schoolfellow of Abgar IX, the originator of Christian religious poetry, whose teaching was continued by his son Harounim and his disciples. (See Bardeanes and Bar deanes.)

A Christian council was held at Edessa as early as 197 (Euseb., Hist. Eccl., V, xxiii). In 201 the city was captured and burned by Persia, the Edessan city was destroyed (“Chronicon Edessenum”, ad. an. 201). In 232 the relics of the Apostle St. Thomas were brought from India, on which occasion his Syriac Acts were written. Under Roman domination many martyrs suffered at Edessa: Sts. Scharbil and Barsamy, under Decius; Sts. Gürja, Schémona, Habib, and others under Diocletian. In 410 a large portion of Edessa and the inhabited Mesopotamia and Persia, and established the first Churches in the kingdom of the Sassanides. Altiliattä, Bishop of Edessa, assisted at the Council of Nicaea (325). The “Peregrinatio Silviae” (or Etheric) (ed. Gamurrini, Rome, 1887, 62 sqq.) gives an account of the many sanctuaries at Edessa about 388.

When Nestorius was exiled from Persia in 363, St. Ephrem left his native town for Edessa, where he founded the celebrated School of the Persians. This school, largely attended by the Christian youth of Persia, and closely watched by St. Rabula, the friend of St. Cyril of Alexandria, on account of its Nestorian tendencies, reached its highest development under the Bishop Ibas, famous throughout the controversy. The controversy which had come from Edessa had evangelized Eastern Mesopotamia and Persia, and established the first Churches in the kingdom of the Sassanides. Altiliattä, Bishop of Edessa, assisted at the Council of Nicaea (325). The “Peregrinatio Silviae” (or Etheric) (ed. Gamurrini, Rome, 1887, 62 sqq.) gives an account of the many sanctuaries at Edessa about 388.

Suffice it to mention here among the later celebrities of Edessa Jacob Baradava, the real chief of the Syrian Monophysites known after him as Jacobites (q. v.); Stephen Bar Sudafai, monk and pantheonist, to whom was owing, in Palestine, the last crisis of Origenism in the sixth century; Jacob, Bishop of Edessa, a fertile writer (d. 771). The controversy which had arisen through the Syriac translation into Syriac of Homer’s Iliad and Odyssey; the anonymous author of the “Chronicon Edessenum” (Chronicle of Edessa), compiled in 540; the writer of the story of “The Man of God”, in the fifth century, which gave rise to the legend of St. Alexius. The oldest known dated Syriac manuscripts (A. D. 411 and 422), containing Greek patristic texts, come from Edessa (q. v.).

Rebuilt by Emperor Justin, and called after him Justinopolis (Evagrius, Hist. Eccl., IV, viii), Edessa was
taken in 609 by the Persians, soon retaken by Heraclius, but captured again by the Arabs in 649. Under Byzantine rule, as metropolis of Oroshe, it had eleven suffragan sees (Echos d'Orient, 1907, 145). Lequien (Oriens christ., II, 953 sqq.) mentions thirty-five Bishops of Edessa; yet his list is incomplete. The Greek hierarchy seems to have disappeared after the eleventh century. Of its Jacobite bishops twenty-nine are mentioned by Lequien (II, 1429 sqq.), many others in the "Revue de l'Orient chrétien" (VI, 195), some in "Zeitschrift der deutschen morgenländischen Gesellschaft" (1899), 261 sqq. Moreover, Nestorian bishops are said to have resided at Edessa as early as the sixth century. The Byzantines often tried to retake Edessa, especially under Romanus Lecapenos, who called the inhabitants the "Holy Mandylion", or ancient portrait of Christ, and solemnly transferred it to Constantinople, 16 August, 944 (Rambaud, Constantin Porphyrogénète, Paris, 1870, 105 sqq.). For an account of this venerable and famous image, which was certainly at Edessa in 544, and of which there is an ancient copy in the Vatican Library, brought there in 1527 by the Venetians in 1207, see: W. Ribbeck, "Christus und Apostelbilder" (Freiburg, 1902), and Dobschütz, "Christusbilder" (Leipzig, 1899). (See also PORTRAITS OF CHRIST.) In 1031 Edessa was given up to the Greeks by its Arab governor. It was retaken by the Arabs, and then successively held by the Greeks, the Seljuk Turks (1087), the Crusaders (1109), who established there the "county" of the Osmandis, and the Venetians, until in 1213 it was again captured by the Turk Zengui, and most of its inhabitants were slaughtered together with the Latin archbishop. These events are known to us chiefly through the Armenian historian Matthew, who had been born at Edessa. Since the twelfth century, the city has successively belonged to the Sultans of Aleppo, the Mongols, the Mamelukes, and finally (since 1317) to the Osmanlis.

Orfa is to-day the chief town of a sanjak in the vilayet of Aleppo, and has a trade in cotton stuffs, leather, and jewellery. Ruins of its walls and of an Arab castle are yet visible. One of its curiosities is the mosque of Abraham, this patriarch according to a Mussulman legend having been slain at Orfa. The population is about 35,000, of whom 15,000 are Christians. (Curtis and Wright, Orfa.)

EDEWORTH, FATHER, born at Edgeworthstown, County Longford, Ireland, in 1745; d. 22 May, 1807, at Mittau, Russia. His father, the Rev. Robert Edgeworth, Protestant rector of Edgeworthstown, or Mostrim, was a first cousin to Richard Lovell Edgeworth, the father of Maria Edgeworth, the novelist; and his mother was a granddaughter of the Protestant Archbishop Ussher. The Rev. Robert Edgeworth owned an estate at Firmont, or Fairymount, a few miles distant from Edgeworthstown, where the elder branch of the Edgeworth family resided. The Edgeworths were of English descent, and went to Ireland in the reign of Elizabeth. The title, "Edgeworth de Firmont", by which the abbé was universally known in France, was derived from Firmont, the vicarage house at Edgeworthstown where he passed his childhood is believed to be the same in which Oliver Goldsmith went to school to the Rev. Patrick Hughes. The Rev. Robert Edgeworth through conscientious motives resigned his living, embraced the Catholic religion, and, finding life at home intolerable under the penal laws, with his family (all of whom became Catholics) removed to Touhouse in France, where Henry Edgeworth, sex, then four years of age, received his early training for the ecclesiastical state. Subsequently he went to the seminary of St. Trois, Paris, at the suggestion of Bishop Moylan of Cork (at one time a curé in Paris). After a course of theology at the Sorbonne, Henry Essex Edgeworth was ordained priest, and the capital of France became the theatre of his apostolic labours. The Irish bishops offered him a mitre in Ireland, an honour which he declined with his usual humility. On the removal of her confessor, Madame Elisabeth, sister of the ill-fated Louis XVI, requested the superior of Les Missions Etrangères, where the abbé resided, to recommend her daughter and unsheatheingely selecting the abbé Edgeworth. The Archbishop of Paris approved of the choice, and introduced him at court. Thus he became known to the royal family as a devoted friend. In their fallen fortunes he stood by them at the risk of his life, followed the survivors after the Revolution into exile, and died in their service.

When the Archbishop of Paris was obliged to fly in 1793 in order to save his life, he vested the Abbé Edgeworth with all his powers, making him grand vicaire, and committed the great diocese to his care. In answer to the urgent entreaties of his friends to seek safety in Ireland or England, at this time, the abbé replied: "Almighty God has baffled my measures, and ties me to this land of horrors by chains I have not the liberty to shake off. The case is this: "The vicaire-general [the king] charges me not to quit this country, as I am the priest whom he intends to prepare him for death. And should the iniquity of the nation commit this last act of cruelty, I must also prepare myself for death, as I am convinced the popular rage will not allow me to survive an hour after the tragic scene; but I am resigned. Could my life save him I would willingly lay it down, and I should not die in vain" (Letter to Mr. Maffey, priest in London).

At last, on the 20th of January, 1793, he was summoned by the Executive Council to proceed to the Temple prison at the desire of "Louis Capet", who was condemned to die on the following day. The abbé, having remained in the Temple all night, said Mass in the king's apartment on the morning of the execution, sat beside him in the carriage on the way to the sacrificial place.
fold, and, when the axe of the guillotine was about to fall, consoloed his beloved master with the noble words: "Son of St. Louis, ascend to heaven. In his philosophy and authoritive account of the last moments of Louis XVI (the original of which in French is preserved in the British Museum) the abbe is silent about this fine apostrophe, which everyone has heard of; but, when asked if he made use of the memorable expression, he replied that, having no recollection of anything that happened to himself at that awful moment, he neither affirmed nor denied having used the word. It would be the least of his reasons to let the execution unmolested, and so escaped; but soon after his head was demanded in several clubs, so that he was obliged to quit Paris and take refuge at Bayeux, whence at that time he might easily have escaped to England. Three chief considerations, however, bound him to the land of horrors. He had a great diocese committed to his care; he had promised Madame Elisabeth, then in prison, never to desert her, and he could not abandon his mother and sister, still living in Paris. Dressed as an ordinary citizen, and passing under the name now of Essex, now of Edgeworth, and again of Henry, he eluded capture and the guillotine, until finally in August, 1796, after the death of his mother, and the execution of Madame Elisabeth, he escaped to Portsmouth, and proceeded to London.

Mr. Pitt offered to settle a pension for life on him, but he respectfully declined it. During the three months he spent in London he was lionized by fashionable society. His brother, Usher, who resided at Firmount, and his relatives at Edgeworthstown, proud of his name and renown, were most anxious to see him in Ireland; and, in fact, he was on the point of revisiting the land of his birth when he was entrusted with confidential despatches for Louis XVIII, then at Blankenburg. This changed all his plans. At the earnest entreaty of the exiled king he resolved to remain with him as his chaplain, going afterwards with the royal family to Miitau in Russia, where he spent the remainder of his days, revered and honoured by all with whom he came in contact. The Emperor Paul settled a pension of 500 roubles per annum on him. When Napoleon invaded Russia in 1807 it happened that some French soldiers were taken prisoners, and sent to Miitau. A contagious fever broke out among them, and in attending to their spiritual wants Abbe Edgeworth (he was a chaplain at this time) became a victim to the plague. The daughter of Louis XVI, despite the manifest danger of contagion, attended night and day at the sick bed of her "beloved and revered invalid, her more than friend, who had left kindred and country for her family", to use her own words. He was interred at Miitau. Louis XVIII wrote his epitaph, a copy of which, together with a letter of condolence, was sent by Louis' orders to Mr. Usher Edgeworth, the abbe's brother, residing in Ireland.

**Edict of Nantes.** See **Huguenots.**

**Edict of Worms.** See **Luther.**

**Edinburgh.** The capital of Scotland, though not its largest city, derives its name from the time (about a.d. 620) when the fortress of Edwin's burgh was raised on a lofty spur of the Pentlands Hill, overlooking the Firth of Forth, and established the Anglian dominion in the northern part of the Northumbrian Kingdom. Edinburgh Castle was a royal residence in the reign of Malcolm Canmore, husband of St. Margaret, who died there in 1093. Round the castle the town grew up, and a little lower down the collegiate church of St. Giles, predecessor of the present church bearing that name, was erected in the twelfth century. St. Margaret's son, King David I, founded the Abbey of Holyrood, at the foot of the castle hill, 1128; but the town of Edinburgh for several centuries did not extend beyond the ridge sloping eastwards from the castle. In the middle of the fifteenth century Edin-

**Edinburgh University.** The only one of the four Scottish universities not founded in Catholic times, was established in 1582 by royal charter granted by James VI, and was speedily enriched by many benefactions from prominent citizens. It has occupied the site of the ancient collegiate church of St. Mary-in-the-Fields, or the Kirk of Field (well known as the scene of the mysterious murder of Lord Darnley), and have in recent years been greatly extended and embellished. The university comprises the usual faculties of divinity, law, medicine, and arts, and has pro-

**Edinburgh.**
duced many eminent men. The Edinburgh medical school has a world-wide reputation, and attracts students from all parts of the empire, as well as many foreigners. No religious tests prevent Catholics from enjoying the full benefit of university education in Edinburgh; but the number of Catholics frequenting the schools is remarkably small. The total number of students frequenting the university is between three and four thousand.

Ecclesiastical History.—Edinburgh is naturally much bound up in its ecclesiastical history with the country at large. In the earliest centuries of its existence, belonging as it did to the Kingdom of Northumbria, Edinburgh was included in the Diocese of Lindisfarne, as we find from the list of churches belonging to that see compiled by Simeon of Durham in dral had been in existence for some fifteen years. It has no architectural interest, but a spacious chancel was added, and other improvements carried out, in 1891. A cathedral for the Episcopalian body (whose bishop resides in Edinburgh) was erected about 1878, at a cost of over $500,000, from funds left by two charitable ladies. It is a Gothic building of much dignity, and by far the finest ecclesiastical building, either ancient or modern, now existing in Edinburgh. The Presbyterians have some handsome churches, but the grand old church of St. Giles, now in their hands, has been hopelessly vulgarized by the "restorer". A new church built by the Irvingites is adorned within by some fine mural paintings.

The seven Catholic churches which (besides the cathedral) supply the needs of the Catholic population

854. The early connexion of the city with Lindisfarne is shown by the dedication to St. Cuthbert of its oldest church, founded probably in the ninth century. St. Cuthbert's church was presented to the newly established Abbey of Holyrood by King David; it was the richest church in Edinburgh, and possessed several outlying chapels, such as St. Ninian's, St. Roque's, and St. John Baptist's. When the diocesan system came to be fully established in Scotland, under Malcolm and Margaret and their sons, Edinburgh was included in the metropolitan Diocese of St. Andrews, and continued to be so until the suppression of the ancient hierarchy in the sixteenth century. The archbishop's see, as well as the episcopal residence, was of course in the primatial city of St. Andrews, beyond the Firth of Forth; and there was no building known as a cathedral in Edinburgh prior to 1634, when the Anglican Diocese of Edinburgh was formed out of the ancient archdeaconry of Lothian, and Forbes became the first occupant of the see. The old collegiate church of St. Giles was at this time, and during the revival of Episcopalianism in Scotland, used as the cathedral of the Protestant bishop. As regards the Catholic Church, Edinburgh was the head-quarters of the vicars Apostolic of the Eastern District of Scotland from the time of the foundation of that vicariate in 1828, when the church now known as St. Mary's Catholic Cathed-
made progress in the Scottish capital as elsewhere in the kingdom. Catholics are generally respected, and may and do rise to high positions of trust in the commercial, legal, and municipal world.

Something remains to be said of the religious houses which have flourished in Edinburgh in ancient and modern times. The principal and wealthiest monastery in former days was the Abbey of Holyrood, founded by David I for Augustinian canons, who were brought from St. Andrews. The Blackfriars or Dominican monastery was founded by Alexander II in 1290, on a site now occupied by a hospital. The Greyfriars or Franciscan church (of the Observant branch of the order) stood in the Grassmarket until it was destroyed by fire in 1845. The Whitefriars or Carmelites did not settle in Edinburgh until 1518. Their house of Greenside, near the Calton Hill, was transformed at the Dissolution into a lepers' hospital. Beyond the Carmelite house, nearer Leith, stood the preceptory of St. An-

college for teachers as well as a ladies' school. The other convents are those of the Sisters of Charity, Little Sisters of the Poor, Sisters of the Sacred Hearts, Poor Clares, Order of Marie Réparatrice, Helpers of the Holy Souls, and Sisters of the Immaculate Conception. The other Catholic institutions of the city include a children's refuge, orphanages for boys and girls, home for working girls, and a substitute institute for childen, dispensary, and home for penitents.

D. O. HUNTER-BLAIR.

Editions of the Bible.—In the present article we understand by editions of the Bible the printed reproductions of its original texts. We are not concerned with copies of the versions of the Bible, whether printed or written; nor do we purpose to consider the manuscript copies of the original text. The written reproductions are described under "editions," or "prints" and similar articles. See also CRITICISM, BIBLICAL, in the latter part of which article (Vol. IV, pp. 499, 500) will be found an explanation of the critical nomenclature of Bible codices and the symbols by which they are denoted. The translations of the Bible will be treated under the title VERSIONS OF THE BIBLE. Since the original text of the Bible was written in Hebrew or Greek (the original Aramaic portions can for the present purpose be considered as coincident with the Hebrew), our study of its printed reproductions naturally considers first the editions of the Hebrew text, and secondly those of the Greek.

I. Editions of the Hebrew Text of the Bible.—Roughly speaking, there are three classes of editions of the Hebrew text: 1. The so-called Incunabula (Lat. cunabula, pl., "cradle"); 2. The common editions; 3. The critical editions. The reader will see that this division has an historical as well as a logical basis.

1. The Incunabula.—Technically speaking, the Incunabula are the editions issued before the year 1500. From our present point of view, they are very defective; but since they represent manuscripts now lost, they are important even for critical purposes. The following publications constitute the main body of the Incunabula:—

(1) The quarto edition of the Hebrew Psalter with the commentary of Rabbi David Kimchi, printed in 1477, probably at Bologna. Vowels and accents are wanting, except in the first four psalms. The volume is noted for its omissions, abbreviations, and general lack of accuracy.

(2) The folio edition of the Pentateuch, with vowels and accents, containing the Targum of Onkelos and the commentary of Rabbi Samuel Jarchi, printed at Bologna, 1482. This publication is much more perfect and correct than that of Psalter.

(3) The so-called Earlier Prophets, i.e., the Books of Josue, Judges, Samuel, and Kings, printed in 1488 at Seneino, near Cremona, in Italy.

(4) The folio edition of the Later Prophets, i.e., Isaïas, Jeremias, Ezéchiel, and the twelve Minor Prophets, printed soon after the preceding publication, without accents and vowels, but interleaved with the text of Kings. Very defective, this was the first to be printed from the Masoretic text.

(5) The Psalter and the Megilloth, or "Rolls," i.e., the Canticle of Canticles, Ruth, Lamentations, Ecclesiastes, and Esther, printed in the same year as the preceding publication, at Seneino and Casale, in Italy, in a quarto volume.

(6) Three folio volumes containing the Hagiographa with several other biblical commentaries, printed at Naples in 1487; the text is accompanied by the vowels, but not by the accents.

Church of St. Giles (XIV Century)
A complete Hebrew Bible, in folio, printed in 1488 at Soncino, without any commentary. Its text, accompanied by both vowels and accents, is based partly on the previously printed portions of the Hebrew Bible, partly on Hebrew manuscripts, but it lacks accuracy.

A folio containing the Hebrew and Chaldean Pentateuch with Rashi's commentary, printed in 1900 in Isola del Liri.

A most accurate and highly esteemed quarto edition of the Pentateuch, printed at Lisbon in 1491.

A second complete edition of the Hebrew text, in folio, was printed in 1494 at Breslau. The editor calls himself Gerson ben Mose of Soncino. The text, which is accompanied by its vowels and accents, exhibits many peculiar readings not found in any other edition. The type is small and indistinct; the proofreading most slovenly; in a word, the edition is utterly defective. Luther based his translation on it.

The foregoing text is repeated in an octavo edition printed at Pisa in 1494.

A folio edition of the Hebrew Bible, printed on parchment, bears no indication of its date or place of printing; it probably appeared in Constantinople about 1500.

To these may be added Scr. Munster's Hebrew-Latin Bible, printed in folio at Basle, 1534 and 1546, since its text is based on the critical principles of the 1488 and 1494 editions. Here also belong, for the same reason, the "Biblia Rabbinnica Bombergiana", first edition (see below), the editions of R. Stephanus (1539-44, 1546), and the manual editions of Bomberg.

2. Common Editions.—By these we understand editions of the Bible reproduced either from manuscripts or previous printed editions without the aid of critical apparatus. While the editions of the Hebrew text thus far enumerated owed their publication to Jewish enterprise, those that follow were, at least in part, due to Christian scholarship. For practical purposes we may divide the common editions into two classes: (1) those not depending on other printed editions (independent editions); (2) those depending, at least partly, on a previously printed text (dependent, or mixed, editions).

(1) Independent editions.—This class of editions comprises two principal ones: (a) the "Biblia Polyglotta Complutensis"; (b) the "Biblia Rabbinnica Bombergiana", second edition. Here we can give only a summary of their principal features.

(2) Dependent, or Mixed, Editions.—In the year 1502, Cardinal Ximenes engaged several learned scholars to prepare the edition of a polyglot Bible called variously after the name of its ecclesiastical patron and the place of its publication (Alcalá, in Lat. Complutum). The editors of the Hebrew text were Jewish converts. Ancient manuscripts, estimated at the value of 4000 florins, and probably also the best existing part of the codex of the Hebrew text, were used by them at their disposal. Thus the cardinal's scholars produced a text quite different from the other printed texts of his time. They marked the vowels, but not the accents. The Polyglot was finished in 1517, but was published only in 1520 or 1522, according to Gregory (Canon and Text of the New Testament, New York, 1900). The pure form of its text was only once reprinted in the so-called "Biblia Polyglotta Vatahii", or "Polyglotta Sanctambrae", or again, "Bertram's Polyglot" (Heidelberg, 1556, 1599, 1610).

(b) "Biblia Rabbinnica Bombergiana", second edition.

Daniel Bomberg, of Antwerp, who had established a printing-office for Hebrew and rabbinic literature in Venice, published, in 1518, two important editions of the Hebrew text: (a) an edition for Christian readers, in quarto, which was printed in 1521, 1525-28, 1533, 1541; (b) an edition for Jewish readers, edited by the Jewish convert Felix Pratensis. It contained the Targumim, the Massorah, and many Jewish commentaries, but did not satisfy the Jews. Hence Bomberg found it advisable to publish another edition under the editorship of R. Jacob ben Chayim, the most celebrated Jewish scholar of his time. He brought the text into closer agreement with the Massorah, and added several more Jewish commentaries. The work appeared in Venice, in four folio volumes, 1525-26, and was justly regarded as the first Massoretic Bible. It won the approbation of both Jewish and Christian scholars, so that it had to be republished in 1547-49, and 1568; the last edition was brought out under the name of "Biblia Rabbinnica Bombergiana", and its great merits of the work, it is not wholly free from defects; Ben Chayim paid too much attention to the Massorah and too little to reliable old manuscripts. The principal codex he followed fell afterwards into the hands of de Rossi, who testifies that it is quite defective and has not been carefully edited. Chayim printed it without correcting its most glaring mistakes.

The subsequent editions were influenced principally by Ben Chayim's text, and only secondarily by the Complutensian Polyglot. Thus the former text was repeated by Bragadin (Venice, 1617), and, in a slightly modified form, by Justiniani (Venice, 1551, 1552, 1563, 1573), the editors of Geneva (1618), John de Grava (Venice, 1566, 1568, 1582), Plantin (Antwerp, 1610), Hansemann (1628), Buxtorf of Wittenberg (1586, 1587), and Torres (Amsterdam, 1705). Long before the last publication appeared, John Buxtorf edited first the Hebrew text in a new and improved form (Basle, 1611), then Chayim's rabbinic Bible in four volúmes (Basle, 1618, 1619). Though he corrected some of Ben Chayim's mistakes, he allowed others to remain and even introduced some new ones. He sought not to improve the vocalization of the Targumim according to the vowels in the Chaldean fragments of the Bible, and it was at least inconsistent to change the Massorah according to the Hebrew text, seeing that Ben Chayim, whose text he professed to follow, had modified the Hebrew text according to the Massorah.

(2) Dependent, or Mixed, Editions.—In the editions thus far mentioned the text of one or the other of the two principal forms of the Hebrew Bible was reproduced without any notable change. We have now to consider the attempts made to correct the text either according to the reading of other editions or according to that of ancient manuscripts.

(a) Texts Corrected according to Printed Texts.—The first mixed text of a Hebrew Bible appeared in the Antwerp Polyglot (1569-72); the same text was repeated in the Paris Polyglot (1629-45), in the London Polyglot (1657), in that of Reineccius (Leipzig, 1750-51), the smaller Plantin editions (Antwerp, 1550, 1582; Burgos, 1581; Leyden, 1613), the mixed edition of Reineccius (Leipzig, 1725, 1759, 1760); and in the Venice Polyglot (1572). The beautifully printed Bible of Hutter (Hamburg, 1588) presents a peculiarly mixed text. Here may be added the names of a few editors who published a Hebrew text without vowels and without pretense to critical accuracy: Plantin (Antwerp, 1573, 8vo and 12mo; Leyden, 1595, 16mo; 1610, 12mo; Hanau, 1610, 24mo); Menasse ben Israel (Amsterdam, 1630, 1639, 8vo); Leusden (1694, 8vo); Masoritta (1721) (Heilbronn, 1731, 24vo); Forster (Oxford, 1750, 1to).

(b) Texts Corrected according to Codices and Printed Texts.—The mixture of Chayim's text with the Complutensian could not give permanent satisfaction. Every comparison of the mixed text with that of any good manuscript brought to light many discrepancies and suggested the idea that the Hebrew text might be obtained by the help of good codices. The first attempt to publish a Hebrew text thus corrected was made by John Leusden with the cooperation of the printer Jos. Athias (Amsterdam,
1661, 1667). The editor revised Chayim's text according to the readings of two codices, one of which was said to be about 900 years old. This edition, printed by Athias, was revised by George Nissel according to the readings of Hutter's Bible (Leyden, 1699). Nissel makes no pretence of having collated any codices, so that his work is noted for its scarcity rather than its critical value. Clodius, too, endeavoured to correct Athias's text according to earlier editions, but was not always successful (Frankfort, 1677, 1692, 1710). Jablonsky corrected the second edition of Athias according to the readings of several codices and the writings of French scholars, paying special attention to the vowels and accents (Berlin, 1699, 1712); his first edition is generally regarded as being one of the best. Van der Hooght corrected the second edition of Athias according to the Massorah and the previously printed editions (Amsterdam and Utrecht, 1705); his attention to the smallest details and the printer's care account for the general favour with which the edition was received. A still more perfect reprint of the edition was published by Props (Amsterdam, 1724). Simonis, too, published correct and cheap reprints of Van der Hooght's Bible. Opitz corrected the edition of Athias according to the readings of seventeen of the best previous editions and of several manuscripts (Kiel, 1709; Züllicham, 1741). His textual apparatus, in one printed in 1736, was remarkable for its size and clearness, so that the edition was considered the most accurate extant. J. H. Michaelis edited the first Hebrew text with variants (Halle, 1720). He based it on the text of Jablonsky which he compared with twenty-four earlier editions and with five manuscripts preserved in Erfurt. The more important variants he added at the bottom of the page, but those that are not important have been taken away. The basis of the comparison was made rather superficially as far as the printed editions were concerned, and there is no good reason for supposing that more care was taken in the comparison of the manuscript text. Still, the edition remains valuable, because it is the first of its kind, and some of its variants deserve attention even to-day. The Oratorian Patris Huganti, who added to it a new text far superior to the commonly received one. Taking Van der Hooght's text for his basis, he added his own corrections and conjectures in critical notes. His apparatus consisted of a number of manuscripts, the ancient versions, and the Hebrew context. The precipitancy of his inferences and the rashness of his conjectures mark this edition as inferior to previous. Nevertheless, though the merit of his work has been duly appreciated by scholars, his "Notae Criticae" were printed in separate form in Frankfort (1777), after the full edition had appeared in Paris (1763).

Here may be mentioned the work of the Italian Jew, Salomo Norzi. He began in the early years of the seventeenth century to compare Bomberg's text with the best of the printed editions, with a number of good manuscripts of both Bible and Massorah, with the Biblical citations found in the Talmud, the Midrashim, and in other rabbinic writings, and with the critical annotations of the more notable Jewish commentators; the results of his long study he summarized in a Massoretico-critical commentary intended to accompany the Sephardic edition of Bomberg's Bible, which was reasoned to have been not inconsiderably corrected. The title of the work was to be "Reparer of the Breach" (Is., lvii, 12), but the author died before he could publish his book. Nearly a century later, a Jewish physician named Raphael Chayim Italia had Norzi's work printed at his own expense under the title "Offering of the Gift" (Man- tua, 1742-44). Among Christian scholars it appears to have had little influence, but modern Hebrew scholars drew attention to it. In spite of his best intentions, Norzi at times rather corrupts than corrects the Hebrew text, because he prefers the readings of the Massorah to those of the manuscripts.

3. Critical Editions.—The editions thus far enumerated can hardly be called critical, since their editors either lacked the necessary apparatus or did not consider it prudent to correct the received Hebrew text according to the full light of their textual information. Later on, two classes of scholars published really critical editions of the Hebrew text; some endeavoured to restore critically the most correct Massoretic text obtainable; others tried to find the most accurate pre-Massoretic text.

(1) Critical Editions of the Massoretic Text.—In order to restore the correct Massoretic text it was necessary to rely on the apparatus of the printed editions of Bomberg. The middle of the eighteenth century this need was felt very keenly by Benjamin Kennicott, a canon of Christ Church, Oxford, who determined to remedy the evil. Beginning in 1759, he collated either in person or through others as many as 615 Hebrew manuscripts, 52 printed editions, and the Talmud, continuing this preparation until the year 1773. Then he began the writing of the work (Vetus Testamentum Hebræum in varia lectionibus, 2 volumes, Oxford, 1776-80) based on Van der Hooght's Hebrew text as edited by Simonis. The variants, with their respective sources, were indicated below the text. In the introductory dissertation of the second volume the author gives the history of his enterprise and justifies its methods. He found this work HIS SECOND to be so time-consuming that in the first volume, his critic had charged him with lack of care and discernment in the choice of the manuscripts used, of the variants noticed, and in the treatment of the Massorah.

Bernardo de Rossi, professor at Parma, tried to construct an apparatus that should not be open to the accusation of Kennicott and other critics that his edition was based on only 231 manuscripts, 303 printed editions, and several ancient versions. In his work (Variae lectiones Vet. Test. 4 volumes, Parma, 1784-88) and its subsequent supplement (Supplementa ad varias s. text. lectiones, 1798) he noted the more important variants, gave a brief appreciation of their respective sources and their values, and paid due attention to the Massorah. He follows Van der Hooght's text as his basis, but considers it known, and so does not print it. All of de Rossi's critics are at one in admiring the laboriousness of his work, but they deny that its importance bears any proportion to the labour it implies. Perhaps the author himself, in his "Dissertatio preliminari" (Script. antiqu., IV, 1792), is inclined to agree with them, so that we need not deal further with his attacks on the Massorah. But even with these means at their command, the editors of the Hebrew text did not at once produce an edition that could be called satisfactory from a critical point of view. The editions of Döderlein-Meisner (Leipzig, 1793) and Jahn (Vienna, 1807) only popularized the various readings of Bomberg, without utilizing them properly. The edition published under the name of Hahn and prefaced by Rosenmüller (Leipzig, 1834) is anything but critical. The stereotypy editions of Hahn (Leipzig, 1839) and Theile (Leipzig, 1841) remained for many years the best
manual texts extant. More recently the apparatus has been used to better advantage in the edition of Ginsburg (The New Massoretico-Critical Text of the Hebrew Bible, 1894) and in that of Baer and Deitzscher. The last-named appeared in single books, but in itself, it cannot pretend to be the last word which textual criticism has to say concerning the Hebrew text of the Old Testament. After all, the Massoretic text attained to its fixed form in the early centuries of the Christian Era; before that period there were found many text-forms which differed considerably from the Massoretic, and which nevertheless may represent the original text with fair accuracy. The most ancient and reliable witness for the pre-Massoretic text-form of the Hebrew Bible is found in the Septuagint. But it is practically certain that, even at the time of the Septuagint, the original text had suffered considerable corruptions; these can be corrected only by comparing parallel passages of the context, or again by conjectural criticism; a critical edition of this kind presupposes, therefore, a critical edition of the Septuagint text.

Various attempts have been made to restore the pre-Massoretic text of single books of the Old Testament: thus Ohlhausen worked at the reconstruction of the Book of Genesis (Beiträge zur Kritik des überliefernten Textes im Buche Genesis, 1856); Wellhausen (Text des Buches Genesis, 1871); Masoretic and Hebrew Texts of the Books of Samuel, 1880), and Klostermann (Die Bücher Samuels und der Könige, 1887) at the correction of the Books of Samuel; Cornelii at the correction of the Book of Ezechiel (Das Buch des Propheten Ezechiel, 1880). To these might be added various other publications; e.g., several recent commentaries, some of the works published by Biblical Association, are devoted to the work of correction of the Old Testament text. "The Sacred Books of the Old Testament," edited by Paul Haupt (see Criticism, Biblical, s, v. Textual), is a series intended to embrace the whole Hebrew text, though the value of its criticism is in many instances questionable; Kittel's "Biblia Hebraica" (Leipzig, 1905), too, deserves a mention among the critical editions which attempt to reproduce the pre-Massoretic text.

II. Editions of the Greek Text of the Bible. Before speaking of the Greek text of the New Testament, we shall have to give a brief account of the editions of the Greek books of the Old Testament. They appear partly in separate editions, partly in conjunction with the Septuagint:

Editions. The principal separate editions of the deuterocanonical books appeared at Antwerp, 1566 (Planit), 1581, and with Latin text taken from Ximenes' Polyglot, 1612; at Frankfort, 1691; Halle, 1749, 1766 (Kircher); Leipzig, 1757 (Reinecius), 1801 (Augusti), 1857 (Apel), 1871 (Fritzscbe); Oxford, 1855; London, 1871 (Greek and English); Frankfort and Leipzig, 1891 (partial edition); Book of Esther, 1896 (Mauch); Book of Job, 1870 (Reusch); Book of Judith, Wurzburg, 1857 (Schoel, Commentator); Book of Wisdom, 1580 (Holkoth's Praelectiones edited by Ryterus); Coburg, 1601 (Faber); Venice, 1827 (Greek, Latin, and Armenian); Freiburg, 1858 (Reusch); Oxford, 1851 (Deane); Ecclesiasticus, 1551, 55, 60, 70, 59, 90 (Brusins); Book of Machaeees, Franeker, 1600 (Drusius); I Mach., Helmstadt, 1784 (Brusins).

2. Editions Joined to the Septuagint. The history of these editions of the deuterocanonical books of the Old Testament is connected with that of the Septuagint editions. The reader will find full information on the question in the article Septuagint.

The newly invented art of printing had flourished for more than half a century before an attempt was made to publish an edition of the Greek New Testament. The Canticles, Magnificat, and Benedictus were printed at Milan, 1481; at Venice, 1486 and 1496, as a separate appendix to the Gregorian Ordo; the Greek New Testament appeared in Venice, 1583 and 1584, together with the poems of St. Gregory Nazianzen; the beginning of the Fourth Gospel, John, i, 1–14, was published at Venice, 1493, and at Tubingen, 1511. Not that the reading public of that age did not feel interested in the other parts of the New Testament; but it did not show any desire for the Greek text of the Bible. After the beginning of the sixteenth century the world's attitude with regard to the Greek text of the New Testament changed considerably. Not counting the publication of codices, mere stereotype reprints, or the issue of parts of the Testament, the number of editions of the complete Greek text has been estimated at about 550; in other words, since the beginning of the sixteenth century, every year has seen a new edition of the Greek text. Not only has the Greek text been translated into every living tongue, but it has been the object of various critical editions. The problem does not resolve itself so much into the question of the Greek text, as into the question of the full text of the New Testament, in which a large part of the text is made up with the help of apocryphal and deuterocanonical books. These discussions have been initiated by the Complutensian Polyglot (1502), and continued in the Polyglott (1591); and have reached their high-water mark in the critical edition of the critical editions, V. 19.
eighth volume reappears in a number of editions: Antwerp, 1573–84 (four editions, Christopher Plantin); Leyden, 1591–1613 (four editions, Rapheleng); Paris, 1584 (Syriae, Latin, and Greek text; Prevostau); Heidelberg, 1599, 1602 (Commelin); Lyons, 1599 (Vincent); Geneva, 1599; Geneva, 1609–27 (eight different editions; Pierre de la Rounè, Sam. Crispin, James Stoër); Leipzig, 1657 (with the interpolatrix of Arias Montanus; Kirchner); Vienna, 1740 (edited by Debiel, published by Kaliwoda); Mainz, 1753 (edited by Goldhagen; published by Varentrapp); Liège, 1839 (Kersten). To these editions, containing the Plantinian, or the modified Complutensian text, were added, and to some extent, a mixture of the text of Plantin and that of Stephanus: Cologne, 1592 (Arnold Mylius; Greek and Latin text); Nuremberg, 1599–1600 (Hutter’s Polyglot, twelve languages); 1602 (the same, four languages); Amsterdam, 1615 (the same, Welschaert); Geneva, 1628 (Jean de Tournes; one edition gives only the Greek text, another gives Beza’s Latin version and a French translation).

2. The Erasmian Text.—On 17 April, 1515, the well-known humanist, Beatus Rhenanus, invited Desiderius Erasmus, who lived at the time in England, to edit the New Testament which John Froben, a celebrated printer of Basle, was anxious to publish before Passover. When his edition appeared (1516), the Complutensian text printed more than a year before. Erasmus hastened to Basle, and printed almost bodily the text of the manuscripts that had fallen to his hands: the Gospels according to a manuscript of Basle (Evv. 2); the Book of Acts and the Epistles according to another manuscript of Basle (Act. 2); the Apocalypse according to a manuscript of Leyden (Apoc. 1). He made a few corrections after superficially collating some other Basle manuscripts, Evv. 1 among the rest. Since Rhenich’s manuscript did not contain the end of the Apocalypse, Erasmus translated Apoc., xxii, 166–21, from the Vulgate. The printing began in Sept., 1515, and the whole of the 5th Erasmian text was finished in the beginning of March, 1516. Under these circumstances, satisfactory work could hardly be expected; Erasmus himself, in a letter to Pirkheimer, confesses that the first New Testament edition is “practicatim verius quam editum.” In 1519 appeared the second Erasmus edition, in which the text of the first was almost entirely repeated, though several hundred mistakes which were introduced in the first edition were corrected. This was the first German translation of the New Testament. Urged by the importunities of his critics, Erasmus admitted into his third edition (1522) the passage I John, v, 7, according to the reading of the Codex Montfort. (Evv. 61). In his fourth edition (1527) he changed his text, especially in Apoc., in several passages according to the readings of the Complutensian Polyglot; in his fifth edition (1555) he repeated the text of the fourth with very few changes.

The Erasmian text was frequently reprinted: Venice, 1518; Hagenau, 1521; Basle, 1524, 31, etc.; Strasbourg, 1524; Antwerp, 1571, etc.; Paris, 1546 and 1549 (Robertus Stephanus introduced corrections from the Complutensian Polyglot); in his third edition, R. Stephanus repeats the text of the Complutensian Polyglot (Paris, 1550). This edition is called Regia, and is the basis of the English Authorized Version (1611). Stephanus’s fourth edition (Geneva, 1561) adds the Latin to the Greek text, the latter of which is for the first time divided into verses, a contrivance which was introduced in the English Text in 1555, and then became general. The last edition of R. Stephanus was reprinted with slight modifications a great number of times; its principal repetitions were those supervised by Theodore Beza (Geneva, 1565, 1582, 1589, 1598 in folio; 1565, 1567, 1550, 1590, 1604 in octavo) and the brothers Bonaventure and Abraham Elzevir (Leyden, 1624, 1633, 1641; Amsterdam, 1650, 1662, 1670, 1678). In the preface of the second Elzevir edition (Leyden, 1653) we read the words: “Textum ergo habemus unum et omnibus receptum.” Hence this Elzevir text became known as the textus receptus, or the Received Text.

3. The Received Text.—From what has been said it follows that the Received Text is that of the second Elzevir edition, which is practically identical with the text of Theodore Beza, or the fourth edition of Robertus Stephanus corrected in about one hundred and fifty passages according to the readings of the Complutensian Polyglot, the Codex Cantabrigenis, the Latin, Syriac, and Arabic versions, and certain critical notes of Henry Stephanus. In its turn, the fourth edition of Robertus Stephanus is almost identical with the fifth Erasmian edition which exhibits the text of five rather recent manuscripts corrected in about a hundred passages according to the reading of the Complutensian Polyglot. Still, it can hardly be denied that the readings peculiar to the text can be traced at least as far back as the fourth century. For about a century the Received Text held undisputed sway; its editions numbered about one hundred and seventy, some of the more important being the following: (1) The Oxford translation, first published in 1612 (London, 1615) contains the New Testament in Greek, Latin, Syriac, Arabic, Ethiopic; a learned apparatus is added in the sixth volume. (2) John Fell edited the text anonymously (Oxford, 1675) with variants collected “ex plus centum ms. codicibus et antiquis versionibus.” (3) John Mill reprinted the text of Stephanus, 1599, together with valuable prolegomena and appendices (Oxford, 1707), and then published an enlarged and corrected edition of Mill’s work (Amsterdam, 1710). (4) Not to speak of Richard Bentley’s “Proposals for Printing,” published in 1720, we must mention Wetstein’s edition, the prolegomena to which appeared anonymously in 1730, and which followed by the body of the work in two folios (Amsterdam, 1751–1752) with some additional corrections. (5) Critical apparatuses, as for instance those of the Fathers, printed editions, and works of Biblical scholars. He also laid down principles for the use of variants, but did not put them into practice consistently enough. (5) The principles advocated by Wetstein were more faithfully followed in W. Bowyer’s edition of the Greek New Testament (London, 1763). (6) When the foregoing principles had been modified. After laying down a number of variants, John Albert Bengel endeavored to simplify their use by dividing them into two families, an Asiatic and an African; besides, he constructed a Greek text based on the readings of previous editions, excepting that of the Apocalypse, which was based also on the readings of manuscripts (Tübingen, 1754). (7) This edition was enlarged and emended by Bürck (Heidelberg, 1763).

4. The Critical Text.—In the last paragraph we have enumerated a list of editions of the Greek New Testament which contain, besides the text, a more or less complete apparatus for the critical reconstruction of the true reading. We shall now mention a number of editions in which such a reconstruction was attempted. It was a natural task for Bengel and his followers to bring the variants into a formal system. He admitted three textual recensions: the Occidental, the Alexandrian (or Oriental), and the Constantinopolitan (or Byzantine). The first two he derived from the middle of the second century, and the third he considered as a mixture of the two, belonging to the fourth century. And, while Bengel defended his principles of textual criticism, he tried to reconstruct the text best known in the ancient Church of both East and West. In 1774 he published the text of the synoptic Gospels; in 1796–1806, the text of the
New Testament, called "Editio secunda"; in 1827 David Schulz added the first volume of a third edition. Griesbach is not always faithful to his principles, being too much under the sway of the Received Text; moreover, he did not sufficiently utilize the codices most important for his purpose. His text has been followed by Schott, Knapp, Tittmann, Hahn, and Theile.

(2) It suffices to mention the editions of Mace (London, 1729), Harwood (London, 1776), Matthaei (Riga, 1782–1788), Alter (Vienna, 1780), and Scholz (Leipzig, 1830-1836); the last named scholar (a Catholic, and perhaps the last of the ancient type of the Commentator) reduced Griesbach's first two recensions to one, distinguishing it only from the Constantinopolitan text-form, which he derived from the more correct copies circulating in Asia Minor, Syria, and Greece during the first centuries. Scholz himself had industriously collected manuscripts in the East. The labours of Hug and Eichhorn may also be mentioned briefly. The former substituted the so-called Common Edition, and the latter the uncorrected text of Asia and Africa, for Griesbach's Occidental class. Both Hug and Eichhorn assign the Alexandrian text-form to Hesychius, and the Byzantine to Lucian; finally, Hug assigns to the labours of Origen in his old age a fourth text-form identical with a middle class favoured by Griesbach and considerably different from his Latin-Greek texts. Eichhorn would distribute the Occidental manuscripts into African and Latin, both of which are surpassed in purity by the Oriental.

(3) Carl Lachmann was the first critic who tried to reconstruct a New Testament text independent of the Received. Believing that the autograph text could not be found, he endeavoured to restore the text-form most common in the Oriental Church during the course of the fourth century. He published his small stereotype edition in 1831 (Berlin), and his large Latin-Greek text in 1842–50 (Berlin); this latter is accompanied by P. Buttmann's list of authorities for the Greek readings. Though Lachmann's text is preferable to the Received, his apparatus and the use he made of it are hardly satisfactory in the light of our present knowledge.

(4) Among the editors of the New Testament text, Tischendorf deserves a place of honour. During the thirty years which he devoted exclusively to textual studies, he published twenty or twenty-one editions of the Greek Testament; the most noteworthy among them belong to one or another of the following five recensions: (a) In 1841 (Leipzig) he issued an edition in which Lachmann's text was adopted. The text was taken from the Received Text; the ancient manuscripts, the early versions, and the citations of the Fathers were regarded as the highest authorities in the selection of his reading. In 1842 Tischendorf published in Paris an edition destined for the French Protestants (Didot), and in the same year and place, at the instance of the Abbé J. M. Jager, another for the French Catholics, which he dedicated to Archbishop Afre. In this he received the Greek readings most in keeping with the Latin Vulgate. (b) The second recension consists of four stereotype editions (12mo, 1842–59) containing the Greek text brought into agreement with the Latin Vulgate. (c) Tischendorf's third recension is represented by his fourth (Lipsiensis secunda, 1849; Winter of his fifth (sterotype; Leipzig, 1850; Tauchnitz), and his sixth edition (with corrected Latin Vulgate and Luther's translation; Leipzig, 1854, Avenarius and Mendelssohn). A separate print of the Greek text of this last edition (1855) constitutes the first of Tischendorf's so-called "academic" editions. In the seventh reprint of the academic edition, as well as in the third of Tauchnitz's stereotype text, the readings of the earlier text were adopted. (d) The fourth recension is found in Tischendorf's "Editio Septima Crítica Major" (Leipzig, 1856–59; Winter). The work contains valuable prolegomena and a detailed critical apparatus. (e) Tischendorf's fifth recension is found in his "Editio Octava Crítica Major" (Leipzig, 1864–72, Gieseeke and Devrient). In his first recension Tischendorf is further removed than Lachmann from the Received Text; in his second he favours the Latin Vulgate; in the third, and still more in the fourth, he returns to the readings of the Received Text of Elzevir and Griesbach; but in the fifth he again follows the principles of Lachmann and favours the readings of his first recension rather than those of his third and fourth. Tischendorf will always occupy a high rank among the critics, and is always a student of the text rather than a textual critic. The "Prolegomena" to the eighth edition had to be supplied by C. R. Gregory on account of the great editor's untimely death (7 Dec., 1874). Gregory published these "Prolegomena" in three instalments (Leipzig, 1884, 1890, 1894), giving the reader a most satisfactory and complete summary of the information necessary or useful for the better understanding of the Greek text and its apparatus.

(5) The discrepancy between the text of Scholz's edition (Leipzig, 1830–36) and the readings of the early documents stimulated Tregelles to study the textual questions more thoroughly in order to relieve the existing uncertainty. The favourable reception of his "A Book of Books" (1843) and of "The English Version" published with a "Prospectus of a Critical Edition of the Greek New Testament, now in Preparation" encouraged him to continue the arduous course of studies he had begun. After collating all the more important manuscripts which were to be found in England, he visited the libraries of Rome, Florence, Modena, Venice, Munich, Basle, Paris, Hamburg, Dresden, Wolfenbüttel, and Utrecht for an accurate study of their respective codices. It has been noted that when the results of Tregelles differ from those of Tischendorf, the former are usually correct. He was enabled to publish the Gospels of St. Matthew and St. Mark in 1857; those of St. Luke and St. John in 1861; the Acts and the Catholic Epistles in 1865; the Pauline Epistles in 1869–70. While engaged on the last chapters of the Apocalypse, he had a stroke of apoplexy, so that this part had to be finished by the hand of a friend (1872). Seven years later, Hort and Streane added "Prolegomena" to the work of Tregelles. A reprint of the text without its critical apparatus appeared in 1887. The character of the work is well described by its title, "The Greek New Testament, According to the Majority Text, with Various Readings in full, and the Latin Version of Jerome" (London, 1857–79).

(6) The textual labours of Tregelles and Tischendorf were, to a certain extent, overshadowed by the work achieved by the two eminent Cambridge scholars, Brook Foss Westcott and Fenton John Anthony Hort. Like their predecessors, they acknowledged and followed the principles of Lachmann; but they differed from Lachmann as well as from Tischendorf and Tregelles in utilizing and systematizing the genealogical grouping of the ancient readings, thus connecting their readings with the views of Bengel and Griesbach. They distinguished four branches of textudial tradition. (a) The Western has a tendency to paraphrase the text and to interpolate it from parallel texts or other sources. It is found mainly in Codex D, the old Latin Version, and partly in Cureton's Syriac manuscript. (b) The Alexandrian is purer than the Western, but contains changes of a grammatical character. It is found in the oldest uncial codices, except in B (and part of K), a number of cursive manuscripts, and the Egyptian versions. (c) The Syrian is a mixture of all the other types, and contains the characteristics of all the others. It is found in the later uncial, and in most of the cursive manuscripts and versions. (d) The neutral text comes nearest to the original text, being almost identical with it. Its
pure form is found nowhere, but the readings of Ρ and some of the oldest uncials, especially of B, give us the nearest approach to it. As to the value of the several classes of readings, Hort believes that most of the Western and Alexandrian, and all the Syrian must be rejected; but in the latter he finds evidence before the middle of the third century. All the necessary explanations have been collected in a volume accompanying Westcott and Hort’s “New Testament in the Original Greek” (Cambridge and London, 1881). The volume contains an introduction (324 pages) and an appendix (173 pages). The introduction treats of the necessity of the text-form, and the accepted Graeco-Latin versions; it gives a short exposure of the various methods (19–72), of the application of its principles to the restoration of the New Testament text (73–287), and finally of the character, the aim, and the arrangement of the new edition (288–324). The appendix contains critical comments on difficult passages (pp. 1–110), notes on certain orthographic and grammatical discrepancies between the ancient codices (pp. 111–173), and finally a complete list of the Old-Testament passages employed in the New (pp. 174–188).

The volume containing the text of Westcott and Hort’s edition was printed also separately in the year of the first appearance. In 1886 (1887, etc.) the text appeared separately in a volume of smaller size, and in 1896–96 both volumes of the original work were reprinted in their last form.

(7) Westcott and Hort’s Greek New Testament, though hailed with delight by a great number of textual critics, did not meet with unchallenged praise. Among the dissenters were Godet, Wunderlich, Dobschütz, Jülicher, Bousset, and Burgen (The Revision Revised; The Quarterly Review, 1881–82; 2nd edit., London, 1889). Some of these latter, however, have been convinced by this method, others to their appreciation of Codex B, others to their attitude towards the so-called Western readings, others, finally, upheld the claims of the Received Text. In the third and fourth editions of his "Plain Introduction to the Criticism of the New Testament," F. II. Scrivener writes against the views of Tischendorf, Tregelles, and Westcott-Hort; he favours the readings of the later manuscripts in the reconstruction of the Greek New Testament text, and advocates the return to a text-form similar to the Received Text. Among his various publications we may notice “The New Testament in the Original Greek, together with the Variations Adopted in the Revised Version” (New Edition, London, 1894) and his various collations of text, and the revision of the Greek Testament of Lightfoot, Lachmann, and Nestle, previously published by the Nestle Committee in 1853; Collation of Codex Sinaiticus with the Received Text, Cambridge and London, 1863, 1867). Here may be mentioned also “The Greek Testament with a critically revised text, a digest of various readings, marginal references to verbal and idiomatic usage, prolegomena, and a critical and exegetical commentary” edited by Henry Alford, afterwards Dean of Canterbury, and published in 5 volumes (1870–71). Tischendorf was of opinion that Alford’s revision of the text was not satisfactory. Again, “The New Testament in the Original Greek, with Notes and Introduction” (London, 1856–60; newly edited with index, 1867), by Christopher Wordsworth, Canon of Westminster, is a mixture of the texts of Griesbach, Lachmann, and Alford. Einleitung in the Revised Edition, Professor C. Palmer, of Oxford, published “The Greek Testament, with the Readings adopted by the Revisers of the Authorised Version” (Oxford, 1881; Clarendon Press).

(8) Among the chief works dealing with the textual restoration of the Greek New Testament which have appeared in recent years, may mention the edition of B. Weiss: Part I. Acts, Catholic Epistles, Apocalypse (Leipzig, 1894, Hinrichs); Part II, The Pauline Epistles together with Hebr. (1896); Part III, The Gospels (1900). A manual edition of this text appeared 1902–05, in three volumes; the mistakes of the first issue were corrected as far as possible. Richard Francis Weymouth edited in a handy form “The Resultant Greek Testament” (London, 1886; Eliot Stock; cheap edition, 1892 and 1896; third edition, 1905); in it he gives us the text on which the majority of modern editors are agreed, together with the readings of Stephens (1550). Lachmann, Tregelles Lightfoot, Ellicott, Alford, Weiss, the Bdale Edition (1880), Westcott-Hort, and the Revision Committee, with an introduction by J. J. St. Perowne. The editor may not give the reader anything of his own, but he furnishes an amount of textual erudition which the Bible student and literary critic may afford to neglect. Dr. F. E. Nestle has edited a “Novum Testamentum Graecum apparatu critico” (Stuttgart, 1898, 1899, 1901, 1903, 1904, 1906) based on the four most prominent of the recent texts: Tischendorf, Westcott-Hort, Weymouth, and Weiss. All the variants of the four editions, excepting as to minor details, are noted, so that the reader obtains at a glance the results of the foremost textual criticism on any given text. It would be difficult indeed to contrive a handier and more complete edition of the Greek text than this of Nestle’s, which seems likely to become the Received Text of the twentieth century.

(9) It is, therefore, all the more to be regretted that Nestle’s text cannot be recommended to the general Catholic reader. Not only is it, as already stated, far removed in its principles from the Received Text, but it places John, v. 4, and vii, 53–viii, 11, among the foot-notes, and represents Mark, xvi, 9–20, together with an alternative ending of the Second Gospel, as a “Western non-interpolation,” suggesting that it is an ancient Eastern interpolation of the sacred text. The rules of the new Index enumerate with precision those places of the New Testament where Nestle has adopted different readings from those of Nestle’s; others must content themselves with one or another of the following editions: P. A. Gratz re-edited the Complutensian text (Tubingen, 1821; Fusi); L. Van Ess published a combination of the Complutensian and the Erasmian text (Tubingen, 1827; Fusi); Jaumann adheres closely to the edition of Tittmann (Munich, 1872; Lindauer); we have already mentioned Tischendorf’s text prepared for Catholic readers under the influence of L. M. Juger (Paris, 1847, 1851, 1850); Reimherr produced a combination of this latter edition and that of Lachmann (Munich, 1847; Ratisbon, 1851); V. Loch derived his text, as far as possible, from the Codex Vaticanus (Ratisbon, 1822); Taeubnitz published, with the approbation of the proper authorities, a revised edition of Nestle’s text almost without change, together with the text of the Latin Vulgate; Brandscheid edited the Greek text and the Latin Vulgate of the New Testament in such a way as to bring the former as much as possible into agreement with the latter (Freiburg, 1901, etc.); finally, M. Hetzenauer published his “Novum Testamentum Graecum” (Innsbruck, 1904, Wagner), reproducing in the Latin in parallel with the Greek text of Weymouth the Greek-Latin edition (1896–98). He is more independent of the Vulgate text than Brandscheid, and he adds the more important variants in the margin, or in footnotes, or again in an appendix critica.

(10) It must not be imagined that the textual criticism of the New Testament has arrived at a state that renders the results of the modern editor’s work definitive and complete. The splendid results attained by the labours of the scholars enumerated in this article, it must be confessed that the condition of the textual criticism of the New Testament is more uncertain to-day than it was twenty years ago. The uncertainty springs mainly from the doubts of our critics as to the real value of the Western readings. Professor Blunt very exaggerate the importance of these Western readings, at least with regard to the Book of Acts, when he considers them as the transcript of the inspired writer’s first or rough copy, while he identifies the Eastern with the copy actually sent out to Antioch. Even if stu
Edmund Campion, Blessed, English Jesuit and martyr; he was the son and namesake of a Catholic bookseller, and was b. in London, 25 Jan., 1540; executed at Tyburn, 1 Dec., 1581. A city company sent the promising child to a grammar school and to Christ Church Hospital. When Mary Tudor entered London in state as queen, he was the schoolboy chosen to give the Latin salutation to her majesty, Sir Thomas White, lord mayor, who built and endowed St. John's College at Oxford, accepted Campion as one of his English scholars, appointed him junior fellow at seventeen, and, dying, gave him his last messages for his academic family. Campion showed Oxford in 1560, when he delivered an oration at the burial of Amy Robsart, and another at the funeral of the founder of his own college; and for twelve years he was to be followed and imitated as no man ever was in an English university except himself and Newman. He took both his degrees, and became a celebrated tutor, and, by 1568, junior proctor. Queen Elizabeth had visited Oxford two years before; she and Dudley, then chancellor, won by Campion's bearing, beauty, and wit, bade him ask for what he would. Successes, local responsibilities, and allurements, his natural case of disposition, the representations, above all, of his friend Bishop Cheyné of Gloucester, blinded Campion in regard to his course as a Catholic: he took the Oath of Supremacy, and deacon's orders according to the new rite. Afterthoughts developing into scruples, seruples into anguish, he broke off his happy Oxford life when his proctorship ended, and betook himself to Ireland, to await the reopening of Dublin University, an ancient papal foundation temporarily extinct. Sir Philip Sidney, the lord deputy, was interested in Campion's future as well as in the revival which, however, fell through. With Philip Sidney, then a boy, Campion was to have a touching interview in 1577.

As too Catholic minded an Anglo-Catholic, Campion was suspected, and exposed to danger. Hidden in friendly houses, he composed his treatise called "A History of Ireland." Written from an English standpoint it gave much offence to the native Irish, and was severely criticized, in the next century, by Geoffrey Keating in his Irish history of Ireland. Urged to further effort by the zeal of Gregory Martin, he crossed to England in disguise and under an assumed name, reaching

Edmund, Congregation of Saint, founded in 1843, by Jean-Baptiste Muard, at Pontigny, France, for the work of popular missions. The members also devote themselves to parochial work, to the education of youth, and the support of the clergy. They direct various missions, and to foreign missions. The mother-house is at Pontigny, but since the expulsion of the religious orders the superior general resides at Hitchin, England. In the United States, the congregation has two houses: a missionary house and apostolic school at Winton, Vermont, for the training of young men who wish to study for the priesthood and the religious life; and a college at Winton, Vermont, with 12 fathers, 8 scholastics, and 100 pupils.

Edmund Arrowsmith, Venerable, English martyr, b. in 1585 at Hadlock; executed at Lancaster, 23 Aug., 1628. He is of great reputation for the numerous favors, spiritual and temporal, which are wrought through his "Holy Hand", still preserved as an object of veneration in the church of St. Oswald, Ashton, near the martyr's birthplace. His parents suffered much for their religion, and the future martyr was once, when a child, left shivering in his night-gowns by the persecutors, who carried his parents off to Lancaster jail. He entered Douai College in 1605, lived there eight years, and wished to interrupt his studies; but he was, however, ordained priest in 1612. Lancashire was the scene of his missionary labours and he was eminent for "fervour, zeal and ready wit." Apprehended, probably in 1622, he was brought before Bridgeman, Protestant Bishop of Chester, and had a lively discussion with him and his ministers. Regaining his liberty he entered the Society of Jesus in 1623, and made his novitiate in France. In 1629, he returned to England and was sent to the Ærmel духовенства, 1863; AMERICAN MISSIONARY, 3. New-Testament Texts. The value of the text, and the uncertainty of its form and the development of each of these recensions gives rise to a number of subdivisions. The problem for the textual critic is to discover the archetype which lies in each case at the bottom of the three recensions. If von Soden's method should eventually prove to be false, it may at least contribute to the improvement of our Greek New-Testament editions.

Several sources have been mentioned in the course of the article. We might refer the reader for a list of the other principal authors to KUEHN-DURK-HÜNDENMACHER in Kirchenlot., s.v. Bibliographien, or to von Gerhardt in Reden und Geschichten, Berlin, Duncker. The writer distinguishes three groups of readings: most manuscripts present the Antiochen text, which is probably the recension of Lucian, called K; about fifty witnesses represent the Egyptian text, probably the recension of Hyginus, denoted by H; the third group, denoted by AA', is the Vatic, in which investigations of the original form and the development of each of these recensions gives rise to a number of subdivisions. The problem for the textual critic is to discover the archetype which lies in each case at the bottom of the three recensions. If von Soden's method should eventually prove to be false, it may at least contribute to the improvement of our Greek New-Testament editions.

London in time to witness the trial of one of the earliest Oxonian martyrs, Dr. John Storey. Campion now recognized his vocation and hastened to the seminary at Douai. Cecil lamented to Richard Stanihurst the expatriation of "one of the diamonds of England." At Douai he professed for his theological course and his lesser degree, but then set out as a barefoot pilgrim to Rome, arriving there just before the death of St. Francis Borgia; "for I meant," as he said at his examination, "to enter into the Society of Jesus, thereof to vow and to be professed." This he accomplished promptly in April (1574), being the first Englishman to do so. As the English province was as yet non-existent, he was allotted to that of Bohemia, entering on his noviceship at Prague and passing his probation year at Brunn in Moravia. Returning to Prague, he taught in the college and wrote a couple of sacred dramas; and there he was ordained in 1578. Meanwhile, Dr. Allen was organizing the apostolic work of the English Mission, and rejoiced to secure Fathers Robert Parsons and Edmund Campion as his first Jesuit helpers. In the garden at Brunn, Campion had had a vision, in which Our Lady foretold to him her martyrdom. Comrades at Prague were moved to make a scroll for P. Edmundus Campanius Martyr, and to paint a pro- phetic garland of roses within his cell. Parsons and Campion set to work at Brunn and called upon St. Charles Borromeo in Milan, and called upon Beza in Geneva. Campion was met in London, and fitted clothed, armed, and mounted by a devoted young convert friend. His office was chiefly to reclaim Catholics who were wavering or temporizing under the pressure of governmental tyranny, but his zeal to win Pro-

stantists, his preaching, his brotherly and self
devotion, were a general and profound im-
pression. An alarm was raised and he fled to
the North, where he fell again to writing and produced his famous tract, the "Decem Rationes." He returned to London, only to withdraw again, this time towards Norfolk. A spy, a former steward of the Roper family, one George Eliot, was hot upon his track, and ran him and others down at Lyford Grange near Wantage in Berkshire on 17 July, 1581.

Amid scenes of violent excitement, Campion was derisively paraded through the streets of his native city, bound hand and foot, riding backwards, with a paper stuck in his hat to denote the "seditious Jesuit." First thrown into Little Ease at the Tower, he was carried privately to Rome, but being his nature a patrician, there he encountered the queen herself, and received earnest proffers of liberty and preterments which he would not forsake his papistry. Hopton having tried in vain the same blandishments, on Campion's return to the Tower, the priest was then examined under torture, and was reported to have betrayed those who had harboured him. Several and as were made on the strength of the lies he had asked for a public disputation. But when it came off in the Norman chapel of the Tower, before the Dean of St. Paul's and other divines, Campion had been denied opportunity to prepare his debate, and had been severely racked. Thus weakened, he stood through the four long conferences, without chair, table or book, and when proffered a sight of Philip Howard and Earl of Arundel, who was looking on in the flush of worldly pride, became thereby inspired to return to God's service. The privy council, at its wit's end over so purely spiritual a "traitor," hatched a plot to im-
pinch Campion's loyalty, and called in the hirdings Eliot and Munday as accusers. A ridiculous trial ensued at Westminster Hall, 20 Dec. 1581, and the judge Daniel was quite unable to hold up his often-wrenched right arm, seeing which, a fellow-prisoner, first kissing it, raised it for him. He made a magnificent defence. But the sentence was death, by hanging, drawing, and quartering: a sentence re-

ceived by the martyrs with a joyful shout of Radd dies and Te Deum. Campion, with Sherwin and Brant, who were on a separate hurdle, was dragged to Tyburn on 1 Dec. Passing Newgate arch, he lifted him

self up, and with his best he said to the statue of Our Lady still in situ. On the scaffold he was taunted to express his mind concerning the Bull of Pius V excommunicating Elizabeth, he answered only by a prayer for her, "your Queen and my Queen." He was a Catholic Englishman with political opinions which were not Allen's, though he died, as much as ever Felton did, for the primacy of the Holy See. He professed his faith fourteen years before the harvest of conversions began. A wild, generous-

hearted youth, Henry Walpole, standing by, got his white doublet stained with Campion's blood; the incident made him, too, in time, a Jesuit and a martyr.

Historians of all schools are agreed that the charges against Campion were wholesale sham. They praise his high intelligence, his beautiful gaiety, his fiery energy, his most chivalrous gentleness. He had renounced all opportunity for a dazzling career in a world of master men. Every tradition of Edmund Campion, every remnant of his written words, and not least his unstudied golden letters, show us that he was nothing less than a man of genius; truly one of the great Elizabethans, but holy as none other of them. He was born, as Benjamin of St. Albans wrote, on 21 Nov. 1586. Relics of him are preserved in Rome and Prague, in London, Oxford, Stonyhurst, and Roch
apton. A not very convincing portrait was made soon after his death for the Gesù in Rome under the supervision of many who had known him. Of this there is a copy in oils at Stonyhurst, and a brilliantly executed print at the Gesù. A work called "Historicall Antwerp, 1669," Vol. III (Englebantid, etc.), though not in every copy of that now scarce work.

Campion's "Historie of Ireland" was first published by Stanihurst in Holinshed, Chronicles (1587), then in Ware's book under the same title (1633), and again by the Hibernia Press (Dublin, 1809); Edmunds' "Campanii Decem Rationes et alia Opuscula," carefully edited (Antwerp, 1631); this included Orationes, Letters, and the Novatores Divortii Hennes VIII, Regis Anglia, ab Uzore et ab Ecclesia, first printed by Harpersfield. There is no modern ed. or tr. The standard biography is Campion, Edmundus, Martyr of England (London, 1666; reissued, London, 1897). Accounts of Campion's life, labours, and death are in Challoner, Memoirs of Missionary Priests; Foxey, Records of the English Province, of the Society of Jesus, and Stanton, Memoir of England and Wales. The article on Campion by Cooper in the Dict. Nat. of the English Church (London, 1885) is very good. A sketch by Goldie appears in The English Martyrs (Catholic Truth Society, 2 vols., London, 1882). For minor points connected with Campion see The Month (August, 1893; September, 1897; January, 1905); and The Irish Ecclesiastical Record, XII, Series III, 1891, pp. 629, 729. Besides a bibliography in Gellow, pp. 380-392, there is a more extensive one in Simpson, Appendix, itself founded on de Becker, Bibl. des anes de la dite J. A small book devoted to him is The Blessed Edmund Campion in the St. Nicholas Series (London, 1908).

L. I. Guiney.
alone in the fields. In memory of what passed between him and Christ on that occasion, he used every night to sign his forehead with the words "Jesus of Nazareth," a custom he recommended to others. Anxious to preserve purity of mind and body, Edmund made a vow of chastity, and as a pledge thereof he procured two rings; one, he placed on the finger of Our Lady's statue in St. Mary's, Oxford, the other he himself wore.

About 1195, in company with his brother Richard, he was sent to the schools of Paris. Thenceforward, for several years, his life was spent between Oxford and Paris. He taught with success in both universities. After having devoted himself to the study of theology, Edmund was elected its head and was commissioned to preach the Sixth Crusade in various parts of England. All this time his austerities were very great. Most of the night he spent in prayer, and the little sleep he allowed himself was taken without lying down. Though thus severe to himself, he was gentle and kind towards others, especially to the poor and sick, whom sometimes he personally attended. In 1222 Edmund became treasurer of Salisbury cathedral. Ten years later he was appointed to the Archbishops of Canterbury by Gregory IX and consecrated 2 April, 1234.

Notwithstanding the gentleness of his disposition, he firmly defended the rights of Church and State against the exactions and usurpations of Henry III. It is said that his body was conveyed by Canterbury to Pontigny, and numerous miracles have been wrought at his shrine. Notwithstanding the devastation that from time to time has overtaken Pontigny, the body of St. Edmund is still venerated in its abbey church. Important relics of the saint are preserved at Westminster Cathedral; St. Edmund's College, Ware; Portsmouth Cathedral, and Erdington Abbey. The ancient proper Mass of St. Edmund, taken from the Sarum Missal, is used in the Diocese of Portsmouth, of which St. Edmund is patron. In September, 1874, 350 English pilgrims visited St. Edmund's shrine. The community, known as Fathers of St. Edmund, were forced to leave their home at Pontigny, by the Associations law. The "Speculum Ecclesiae," an ascriptive treatise, and the "Provincial Constitutions," are the most important of St. Edmund's writings.

Education.—In General.—In the broadest sense, education includes all those experiences by which intelligence is developed, knowledge acquired, and character formed. In a narrower sense, it is the work done by certain agencies and institutions, the home and the school, for the express purpose of training immature minds. The child is born with latent capacities which must be developed so as to fit him for the activities and responsibilities of life. The means, purposes and values as understood by the educator, primarily determines the nature of his work. Education aims at an ideal, and this in turn depends on the view that is taken of man and his destiny, of his relations to God, to his fellowmen, and to the physical world. The content of education is furnished by the previous acquisition of mankind in literature, art, and science, in the religious, social as well as economic fields. Inheritance, however, contains elements that differ greatly in value, both as mental possessions and as means of culture; hence a selection is necessary, and this must be guided largely by the educational ideal. It will also be influenced by the consideration of the educative process. Teaching must be adapted to the nature of the material, and special devices must be made and carried out to prepare the mind for further instruction, and make the adaptation; more thorough results in theories and methods which are used, or should be, based on the findings of biology, physiology, and psychology.

The work of education begins normally in the home; but it is, for obvious reasons, continued in institutions where other teachers stand in place of the parents. To secure efficiency it is necessary that each school be properly organized, that the teachers be qualified so that the subjects of instruction be wisely chosen. Since the school, moreover, is so largely responsible for the intellectual and moral formation of those who

EDMUND

EDMUND THE MARTYR, SAINT, King of East Anglia, b. about 840; d. at Hoxne, Suffolk, 20 November, 870. The earliest and most reliable accounts represent St. Edmund as descended from the preceding kings of East Anglia, though, according to later legends, he was born at Nuremberg (Germany), son to an otherwise unknown King Alcmen of Saxony. Though only about fifteen years old when crowned in S65, Edmund showed himself a model ruler from the first, anxious to treat all with equal justice, and closing his ears to flatterers and untrustworthy informers. In his eagerness for prayer he retired for a year to a hermitage at Hunsanton, and learned the whole Psalter by heart, in order that he might afterwards recite it regularly. In 870 he bravely repulsed the two Danish chieftains Hinguar and Hubba who had invaded his dominions. They soon returned with overwhelming numbers, and pressed terms upon him which as a Christian he felt bound to resist. In order to avert a fruitless massacre, he disbanded his troops and set out for the abbey of Framlingham; on the way he fell into the hands of the invaders. Having loaded him with chains, his captors conducted him to Hinguar, whose impious demands he again rejected, declaring his religion dearer to him than his life. His martyrdom took place in 870 at Hoxne in Suffolk. After beating him with cudgels, the Danes tied him to a tree, and cruelly tore his flesh with whips. Throughout these tortures Edmund continued to call upon the name of Jesus, until at last, exasperated by his constancy, his enemies began to discharge arrows at him. This cruel sport was continued until his body had the appearance of a porcupine, when Hinguar commanded his head to be struck off. From his first burial-place at Hoxne his relics were translated to two prelates who had all his assets worth, since called St. Edmundsbury, where arose the famous abbey of that name. His feast is observed 20 Nov., and he is represented in Christian art with sword and arrow, the instruments of his torture.

THOMAS ARNOLD, Memoirs of St. Edmund's Abbey in B. S. (Cranbrook, 1880); in contained in History of Ely. Robert E. Edmund (1863), and UAVFERES DE PONTECHI, Infatia S. Edmundi (c. 1150); TINEMOUTH AND CAPHRAYE, Nova Legenda aurea, ed. RAWLES (Oxford, 1900); SIRROCK, Lives of the Saints (Dublin, 1872); MACKINLAY, Saint Edmund King and Martyr (London, 1895).
